13. As I have stated under Answer 9 I should like to see the resident terms reduced to nine; whether the term of admission should be done away with I am hardly prepared to say. There are those who think it gives time for inquiries and domestic communications to take place prior to residence, and therefore that it is of great use; but by the first plan we should get rid of the great inconvenience which arises in many ways from having four years in residence at once. As I have already stated, I would have three Examinations, one at the end of each academical year (doing away with the hodge-podge of the previous Examination of the Lent Term), and after the third Examination the men should be in the position of commencing Bachelors. Those who purposed to become candidates for the Honor Triposes should be examined at the usual time, and either be compelled or not (as might be deemed best) to reside during the ensuing Michaelmas Term. I do not think any great inconvenience would arise from the presence of the reading men of a fourth year in this term. Resident terms.

I believe a majority of the governing body of the University are in favour of a lengthened residence, and would wish to have *two-thirds* of the Term kept by every student, instead of the major part as at present.

14. Whenever a Fellow resides in College during the long vacation, those students, to whom the College is disposed from their steady habits and good conduct to give special permission, are allowed to remain in College and have the use of their rooms, but with this understanding, that they are, for *any irregularity* in respect of gates or otherwise, at once sent out of residence. From experience I can say, that I believe more is done during a long vacation by those who are permitted to remain in College than by those who join reading parties elsewhere. I myself tried both plans, and much doubt the extent of benefit which attends the latter. Residence during vacation.

15. A few of our students do from time to time reside in lodgings in the town, and I have no reason to believe that any great evil arises out of it. The penalty which falls on a lodging-house keeper for breaking the University rules is so heavy, that I suspect they are *very rarely* found to make false returns, or in any way gratify a student in anything forbidden at the risk of losing their license; and, moreover, the giving of this license, in the first instance, is a sort of guarantee for the respectability of the house. Still there are certainly greater temptations than within the walls of a College, and perhaps some further inspection or discipline than that which the Proctors can at present possibly exercise would be found wholesome: for instance, an especial officer might be appointed to have the regulation and management of these matters, and such a suggestion has, I believe, already emanated from some quarters, but it is a subject on which the Tutors of larger Colleges are much more competent than myself to speak, and therefore I shall say no more on this head. Lodging-houses.

16. In reply to the last question, I can only add, that probably what I have already suggested will be thought far too much, and too redolent of rash and hasty legislation, and therefore I shall close the subject.

I am, my Lord and Gentlemen,
Your faithful servant,
(Signed) EDWARD WARTER.

P.S. I have received a list of questions in reference to the College libraries, and also to the management of the Pitt Press. Our Librarian has undertaken to answer the former, and I shall therefore leave it in his hands; absence frem College will, for some time, prevent me from sending any information I might feel justified in giving in relation to the latter.

Answers from the Rev. W. Whewell, D.D., Master of Trinity College.

Rev. W. Whewell, D.D.

Trinity College Lodge, Dec. 5, 1850.

The discipline of the University, as distinct from the discipline of the Colleges, is provided for by the privileges conferred upon the University for the purpose of discipline, and by the University officers who act in virtue of these privileges. Discipline.

It does not appear that the means thus provided for preserving good order and good morals in the University, so far as such discipline can preserve them, have been found greatly deficient, till we come to very recent times. But it is apprehended that some of the ancient privileges of the University, which were very valuable for such purposes, have been weakened, or destroyed, by recent laws and judicial decisions; so that, for instance, the University has no longer the undoubted power, which it has hitherto been supposed to possess, of preventing assemblages of persons which may be injurious to order and decency, such as those which are collected by exhibitors of wild beasts, horsemanship, and the like.*

Also the power which is exercised by the proctors of apprehending or removing suspected women in the streets, and of entering houses of ill-fame for the like purposes, has of late been found more difficult to exercise, in consequence of a growing jealousy of such deviations from common law.

* At least the authority of the University in such matters has of late been allowed to be disobeyed with impunity.

Rev. W. Whewell, D.D.

This difficulty has been much increased by the want of cooperation between the University and the town in supporting and directing the police; and by the existence of other subjects of contention between these two bodies.

Expenses.

The alleged expensiveness of a University education may be regarded as coming under the head of discipline; and is undeniably a matter deeply affecting the beneficial influence of the University. On this subject a few remarks may be made.

The expensiveness of students at the University is in a great measure the act of the students themselves, not in consequence of, but in spite of the measures taken by the University and by Colleges. The necessary College bills are everywhere small. The additional expenses incurred by students, for dress, luxuries, entertainments and amusements, may be very large, and are very difficult to control.

The amount of such expenses depends very much upon the previous habits of the students, as formed in their own families, and at the schools where they have been; and upon the conduct of their parents and friends. When a student has been accustomed to expensive habits at home, and at school, as is very often the case, it is very difficult to prevent such habits at College, where he is necessarily less closely and constantly subjected to control.

Parents.

Nor can it be proper to conceal the fact, that the conduct of parents and friends very often greatly increases the difficulty of controlling the expenses of students disposed to be extravagant. Such guardians of our young men, often, though loud in their complaints of their extravagance, and of the College and University authorities for not preventing it, are not ready to aid the authorities in enforcing measures really effectual for that purpose, either by making the payment of tradesmen's bills dependent upon there being a proper reserve in the credit given, or by removing from the University a student when he shows a disposition to be extravagant, or by pleading his minority in cases where this may be reasonable, or by assisting the authorities in other measures for controlling extravagant expense.

Checks to extravagance.

Nevertheless, measures have been adopted by the University, which, if steadily persisted in, will produce a good effect in controlling unreasonable expenses, or at least in making them known in time to the guardians of our students. It has been ordered by the University that not only the tradesmen's bills which are "taken in" and paid through the Tutors shall be thus, term by term, made known to the parents; but that all tradesmen whatever in Cambridge who have claims against any of the students, shall every term give a statement of the amount of their claims to the respective Tutors. The penalty for not doing this is, that the offending tradesman be "discommoned;" which penalty has already been inflicted in several instances.

This measure has been much complained of as a hardship by the Cambridge tradesmen; but it is plain that it is only a hardship upon those who wish that students should contract debts, unknown to their Tutors and parents. Nevertheless, in the present temper of the town with regard to the University, the execution of such a rule is likely to be represented as an oppressive proceeding.

Clandestine extravagance.

This measure, however effective it may be, cannot absolutely prevent clandestine extravagance; for there is now so easy an intercourse with London tradesmen, that the students may incur debts with them to a great amount; and in such cases, it does not appear what means, either of detection or of punishment, the University possesses. It may be recommended, as a point for consideration to the legislative friends of the University, whether anything can be done to obviate this evil.

Private tuition.

There is one article of expense connected with the studies of the place, which might probably be materially diminished with advantage to the students, if the means of doing this could be found; namely, Private Tuition; which, in the extent to which it is now carried, injures the education of our students, both by removing them from the beneficial influence of public and responsible Professors and Tutors, and public lecture rooms, to the influence of private and irresponsible teachers, whose instructions have no higher aim than success in examinations; and also by preventing that salutary intellectual discipline which arises from the student having to overcome difficulties for himself.

Considering the imperfect preparation for University and College studies with which many students come to College, it would probably not be desirable to prohibit private tutors in the early part of the student's residence in Cambridge. But it would be a great improvement in the educational influence of the place, if private tuition during the latter portion of the student's residence could be prevented; and in this way, a considerable amount of expense also would be saved to the students; since at present almost all of them engage private tutors.

The University has, at various times, legislated against the practice of students reading with private tutors in the latter part of their Undergraduateship; and there is a Grace prohibiting the practice for the last six months of this period, passed May 19th 1824, and still, as I conceive, in force. It has not, however, been recently enforced. In what manner it could now be carried into effect, or any similar and more extensive regulation established and made effective, I do not here pretend to say: but it is not too much to assert that such a regulation would be highly advantageous, both to the intellectual and the pecuniary interests of the students.

MY LORD, *Trinity Lodge, Cambridge, December* 19, 1850. *Rev. W. Whewell, D.D.*

I AM induced, by the kindness with which your Lordship has acknowledged the few remarks which I ventured to make on the subject of the control of the expenses of students at the University, to offer a few additional remarks on the same subject.

I cannot help again stating, as one of the most important considerations bearing upon this subject, that it will be very difficult, and probably impossible, to control effectually the expenses of students at the University, when they have been accustomed to habits of expense at school not sufficiently controlled by their parents. I have been given to understand that the expenses of a schoolboy at one of our great schools are often 200*l.* a-year or more. I do not think, so long as this is the case, it will be likely that the same schoolboys, removed as students to the Univerity, will cost their friends less. I have heard on the best authority, that at one of our great schools the Master asked the parents of his boys to join him in enforcing *effectual* measures for preventing the boys incurring debts with the tradesmen, and that the parents univerally, with hardly an exception, would not give their assistance to such measures. The same is the case, as I have before said, very generally at the University; and so long as it is the case, it will be impossible to control the expenses of students materially. Expenses.

The principal means which the University has of controlling the expenses of students, so far as their debts to tradesmen are concerned, reside in the power of discommoning or otherwise punishing tradesmen who are too facile in giving credit to the students, or who do not give notice to the tutors of debts contracted by the students, as the University rule now requires. The enforcement of this rule in particular cases is attended with difficulties; the evidence can only be obtained in peculiar cases; any additional facility in inflicting the punishment on the tradesmen would not be likely to be abused, and would be likely to aid in checking the evil.

The expenses of students arising from payments to their College are small, and (so far at least as the expense of tuition is concerned) could not be diminished without being made quite disproportionately small in comparison with all other educational payments, and inefficient for providing adequate instruction for the students. As it is, the emoluments of the Tutors and Assistant Tutors in Colleges, even in the greatest Colleges, are not more than one-third or one-fourth of the emoluments of men of equal distinction engaged in the great schools. I do not think, therefore, that the payments for tuition and the like could be properly diminished.

The principal other payments to the Colleges are for food; and these are, in very few instances, *necessarily* considerable; some of them, however, for instance, the cook's bills, may become serious when the student is luxurious or too hospitable. In some Colleges there are rules limiting such expenses, but such rules, if made very rigid, are almost unavoidably evaded. It appears to be desirable that the student should be constantly apprised (for instance, by weekly bills) of the expenses which he is thus incurring. This mode of warning has already been adopted at some Colleges, and will probably be extended to others.

A considerable portion of the expenses of students commonly arises from their amusements, and in these they are naturally very little under the control of the officers of their College. Perhaps some moderation in such matters might be produced, if the places of their sports were more closely connected with the Colleges and the University; if, for instance, there were in the fields behind the principal great Colleges a cricket-ground, a fives' wall, and the like. Such arrangements appear to have been connected with the Colleges at a former period.

I shall be glad if the above remarks in any degree fall in with the views of the Commissioners.

I am, my Lord,
Your very faithful and obedient servant,
The Lord Bishop of Chester. (Signed) W. WHEWELL.

MY LORD, *Trinity Lodge, Cambridge, March* 22, 1851.

I HAVE received, with the date "Cambridge University Commission, February 18, 1851," a series of questions respecting University and College matters, which, perhaps, I may describe, for the sake of distinction, as "questions respecting expenses and teaching." Upon these I beg to be allowed to remark, as I have remarked upon former sets of questions, that they refer to matters which are, as law, reason, and the interests of the University require, regulated by College and University authorities, and cannot be regulated by any external power, without superseding such authorities, and introducing confusion and mischief. If these questions, therefore, are answered by persons holding office in the University, it can only be with a view of gratifying curiosity; which course they may take the more readily as there is, on such points, nothing which the University need wish to conceal; and on some of the points, the effect of a rightly directed public opinion may be a beneficial auxiliary to existing rules.

I must, however, be allowed to add, that the questions contained in this and accompanying lists are so numerous and comprehensive, and my time so much occupied with important employments, that I can by no means undertake to answer the whole or any considerable part of these questions, and must content myself with making such remarks as the questions suggest to me. I am the less reluctant to give this imperfect reply, inasmuch as I do not doubt that your Lordship will find it easy to obtain answers on all the definite and positive parts of the subject.

I will number my remarks with reference to the queries which suggest them.

Rev. W. Whewell, D.D.

Expenses.

1. To the inquiry, whether there are any privileges conceded to College tradesmen and servants which have the effect of increasing the expenses of students, I reply that I know of none. But I must say further, that if I knew of any privileges of College tradesmen or servants which increased the expenses of students without some equivalent advantage gained, I should not report them to any extraneous party, but should, with the assistance of the College, suppress such privileges. Examinations of the College arrangements have repeatedly and recently been made for this purpose. I may add, that if your Lordship will refer to the statement of the necessary College expenses which I sent a short time ago, you will perceive from the moderate amount of the whole, that they cannot be *much* increased by any such cause as is here referred to.

As to the possibility of diminishing the *ordinary* expenses of College students (which appears from the context to be what is meant in Question 1 by "necessary" expenses), I have already offered some remarks, of which the most important may be thus summed up:—the great obstacles to the diminution of the College expenses of students are, *first*, the conduct of parents who will rarely co-operate heartily with the College authorities in measures which tend to reduce the expenses; they wish their sons to be on a level in dress and company-keeping with rich men, and are pleased to complain of the College authorities, as if the expense were their fault: *second*, expensive habits begin at school; if boys cost 200*l.* or 300*l.* a-year at Eton or Harrow, they are not likely to live on less at Cambridge: *third*, Cambridge tradesmen resist as much as they can all rules tending to limit expense of students.

Credit.

2. I can suggest nothing better, in the way of checking the excessive credit given to students by Cambridge tradesmen, than the rule lately made by the Heads of Colleges, that all dealers to whom students owe debts send, every term, a statement of the amount to the Tutor. This rule has been especially disobeyed, I am informed, by the horse-dealers; a fact the more to be regretted, inasmuch as, in their case, the refusal of too great credit could not generally drive the students to London dealers.

Lectures.

3. I send herewith (A) a schedule of the lectures given in the College, which schedule is followed in its main features every year. I conceive that the lectures so given would be sufficient for students of ordinary capacity and preparation, if they were resorted to with that intention, the lecturers being always willing to explain special difficulties when applied to specially "after lecture." But, undoubtedly, a large portion of the students seek the assistance of private tutors in addition to the lectures.

Private Tuition.

4, 5, 6, and 7 refer to the habit existing in the University of the students employing the assistance of private tutors, and to the effects of that habit. In my publication respecting "Cambridge Education," to which I have already taken the liberty of referring your Lordship, I have made several remarks upon this subject, which I see no occasion to alter. I send the book, and beg particularly to refer to Articles 154, 155, 156, 157, and again to Articles 265, 266. I have, in Article 268, stated what appears to me to be the general result of a careful consideration of the subject, namely, that private tuition and its predominance over other modes of teaching, arise naturally from the exclusive prevalence of paper examinations; still more, if the system of selecting examiners be such that the examiners and the private tutors, taken collectively, form the same body, rapidly renewed by new accessions of successful prizemen. I have there stated what appear to me the most probable remedies for the evils of this state of things. In particular, I conceive that the restoration of oral examination as a part of the examination for honours would have that effect. I may add that I conceive that a beneficial result in this respect would be produced by having the examinations conducted by a Board of Examiners, slowly changing, instead of a body of examiners, each of whom is elected for the year only. I may say further, that as the ascendency of private tutors depends in a great measure on their belonging to the same class which supplies the examiners, so I conceive that additional influence and attractiveness could be given to the public lectures of University Professors and College tutors, if these classes of persons were made to supply a portion of the examiners by some permanent arrangement.

7. I have, in the "Cambridge Education," Article 269, and following, given an account of the steps taken by the University with regard to private tuition. The prohibitory grace of 1781 was repealed in part by successive steps, in 1807, 1815, and 1824; and by the last grace, still unrepealed, no student is allowed to obtain honours in his B.A. examination, who has had a private tutor within the *six months* previous. This grace is not acted on, and, I believe, never was enforced. It would not be difficult to enforce it by requiring a declaration from the student or his College tutor that it has not been violated; and I think that the actual enforcement of this grace would be beneficial, but it would go a very small way in suppressing the practice of private tuition, or even its gross abuses and evils.

Poor Students.

8. In this College there are sixteen sizarships, to which applicants are appointed according to merit. The value of these appointments may be considered as about 45*l.* a-year. From my knowledge of the history of those who have been sizars without possessing superior attainments, I am of opinion that it is no benefit in general, either to them or to society, to encourage such persons to come to College. The effect of a poor man's College, such as the question speaks of, would not, in my opinion, be beneficial.

The members of such a College would probably be for the most part rarely admitted into any University society but their own. They would feel themselves degraded by such exclusion, and would not participate in the effect which a University education produces upon most students, of giving them a knowledge of the tone of good English society. If, as seems to be implied in the question, the College were not endowed so as to offer prizes to the merit of its members in the form of fellowships, and the like, the members would be much worse off than a meritorious poor man is in the existing Colleges.

The number of Examinations.

9. The question with regard to the number of examinations would require some considerable

Rev. W. Whewell, D.D.

space to answer it fully, and appears to be inserted merely to serve as an introduction to the next question, Whether they are too many or too difficult? I do not think that, speaking generally, it can be said that the College examinations and the ordinary University examinations form too numerous or too difficult a series to be a good course of study. For the College lecturers prepare the students (or ought to do) for the College examinations, and the College examinations are made, in a good measure, a preparation for the University examinations. But the *University Scholarships*, and perhaps some other prizes, do appear to me very much to interfere with the possibility of a progressive and instructive course of reading; and they divert men's thoughts from the College course of study, which, for most students, is by far the best and most improving employment of their time. I must again beg leave to refer to my "Cambridge Education," Article 318.

It is certainly true that, as I have remarked, Article 257, the establishment of the "*Previous Examination*" appeared to thin the attendance at the Professors' Lecture Rooms. But this, a compulsory *Pass* examination, affects quite a different class of students from those who are commonly candidates for the University Scholarships.

It is worth notice, as showing to what an extent the competition for the University Scholarships disturbs the ordinary course of progressive study, that for a single scholarship, where one only can be elected, there are sometimes above 70 candidates. Many students like better writing in an examination what they do know, than learning anything more; and some run through such a constant series of examinations that it is scarcely possible they should make any progress such as requires continued study.

Matriculation Examination.

10. There is an *Initial Examination* at this College, and I conceive that it produces good effect. But I am not prepared at present to recommend an Initial *University* examination In the book on "Cambridge Education," Appendix xiii., are some reasons against such an examination, which appear to me very forcible. Our initial examination is principally useful as turning the attention of the tutors upon those students who are the worst prepared, but still who may be allowed to pass. With regard to the effect of an initial examination upon the schools, I do not think it would be beneficial. A single examination given once for all is a very bad test, either of knowledge or of training. If the requirements are made high, many very fit students will be rejected by accident; if it is made low, it will be futile. So far as it affects the systems of the schools, it will do them harm, as every attempt to make a long course of study bear upon a single examination must do. But probably it would not affect the schools much. They would soon learn the trick of it. Also, if the requirements implied the preparation which the best schools give, it would not be easy to go on in College teaching *progressively* from that point. The best scholars from the schools would have nothing to learn; and if there were any worse among the students, they would be behind the College lectures.

But in truth, the examiners (themselves probably coming from great schools) would not be found stern enough to go on rejecting resolutely all but very good scholars: nor would it be a benefit to the University if they did.

Inducements held out to distinguished men to leave the University.

11. The changes affecting men's prospects in the Law and in the Church, which are referred to in this Question, have not affected this College so as to prevent our obtaining, on every vacancy, persons well qualified to fill the more important College offices. But it is evident that, with the present very wide license of non-residence to Fellows, such causes might operate so as to draw away from College all the best qualified Fellows, if there were not some counteracting causes. I suppose that if the need were to occur, a Master of a College, with the other governing persons, might refuse to allow non-residence to such of the Fellows as should be wanted to carry on the business of the College, and that the Fellows would acquiesce in such restraint; or Fellows might be elected on condition of taking certain College offices, as is now sometimes done in some Colleges. But it would certainly be better if the necessity of such modes of proceeding could be obviated. Moreover, the new studies which have been introduced or encouraged of late by the Universities, may be thought to require the establishment of some corresponding studies in the Colleges, and thus we may need a new class of teachers. I do not think that any external power can guide the Colleges through difficulties of this kind, but it appears very likely that the independent action which is necessary to their life, and which generally finds a way out of their difficulties, might be aided by giving them some additional powers, of the same kind as those which several of the Colleges have obtained on particular occasions by special application to Government. Suppose, for instance, merely for the sake of illustration, it were made practicable for them to alter the conditions of tenure of some of their Fellowships; adding to the conditions certain duties of residence and instruction, and, in return, relaxing certain obligations, as Holy Orders and celibacy. By such a change, the commuted Fellows might really acquire the position of Professors, and even of University Professors; for there is no reason why their instruction should be confined to the members of their own College. And there would be a great advantage in providing in this manner a class of College Professors who might give instruction in the subjects of the New Triposes; since such instruction is needed, in order that the Triposes, and the other measures for encouraging the Moral and Natural Sciences, may produce their effect.

Terms.

13. The reduction of the number of terms of residence required, by omitting the first *or* last (not the first *and* last as stated in the Question), is at present under the consideration of the University, and the University is likely to apply to the Crown for the authority requisite to make this change. If such a change be made, the consequent new arrangements of Examinations, and the like, must necessarily be settled by a careful discussion among persons practically acquainted with the subject.

It is also likely that a similar application will be made by the University for authority to increase the proportion of each term required to be kept by residence.

Residence during Vacation.

14. Students of this College are not allowed to reside in Cambridge during the long vacation, without express permission; which permission is generally given only to those who have been

Rev. W. Whewell, D.D.

in the First Class, and are of quiet and regular habits. A more extensive practice of the Students staying here during the long vacation would lead to great evils, from the want of the usual regular College employments, and some of the usual restraints; as has been found by experience.

Lodging-houses.

15. I believe that Students in lodgings, in general, are nearly as much under control, as to their hours, as Students in College. In the cases in which the returns of the lodging house keepers are faithful, which I believe to be the ordinary cases, the Students are more under the notice of the authorities as to their hours, than the Students who are in College; because the latter may stay in their friends' rooms till very late hours, without its being known by any formal report. The reports of the Proctors with regard to Students found in the streets at late hours are a check upon the returns of the lodging-house keepers; as are also the returns of the College Porters.

The statement of the numbers of members of this College residing in College and in lodgings, in November last, is 226, and 311, respectively.

Begging your Lordship to excuse the defects of this statement, arising from inevitable haste and want of leisure, I have the honor to be, my Lord,

Your very faithful and obedient servant,

The Lord Bishop of Chester. (Signed) W. WHEWELL.

(A.)—Trinity College, Cambridge.

Course of Studies.

Course of Studies.

The Freshmen usually assemble between the 12th and 16th of October, and in order to be allowed to reside, must pass, in a satisfactory manner, an examination on the following subjects:—

Cicero "De Amicitiâ" and "De Senectute."
The first book of the Æneid.
The first book of Xenophon's "Memorabilia."
The first book of the Iliad.
The Gospel of St. Luke.
Arithmetic, including Fractions and Decimals.
Algebra as far as Simple Equations.
Euclid, B. I. and II.

The Freshmen, Junior Sophs, and Senior Sophs (students of the first, second, and third year), attend College Lectures according to the Table below.

N.B. *All Junior Sophs and Senior Sophs, as well as Freshmen, are requested to avoid any arrangements (with Private Tutors or otherwise), which are likely to prevent their following the subjects in the College Course of Lectures, according to the Division* (A, B, *or* C), *in which they are.*

There is an Examination of the Junior Sophs at the end of the Michaelmas Term in their subjects: (Conic Sections treated geometrically, Analytical Geometry, Elementary Mechanics, a classical subject of the Previous Examination, Butler's Three "Sermons on Human Nature" and "Dissertation on Virtue," and Dr. Whewell's Introduction to his "Morality;") and an Examination of each of the three years at the Division of the Easter Term, in their respective subjects.

Prizes of books are given to those who are in the First Class in the Easter Term Examination in each year. Also, those who pass the best Examination in the New Testament on this occasion receive prizes in books; thirty-five pounds is thus given to a number of Senior Sophs, not exceeding five, and twenty-five pounds to a number of Junior Sophs, not exceeding five.

Persons who are found not worthy to be classed at any of these Examinations will be brought before the College Authorities, in order that they may be removed from the College.

Each Senior Soph has to compose one Latin and one English Declamation, in his Michaelmas Term, on subjects proposed by the Senior Dean and Head Lecturer. The best of these are to be recited in the Lent Term. Three prize goblets are given to the three best English, and two prizes of books to the two best Latin Declaimers.

There is a prize in every Term for the best copy of Latin verses on a given subject, which may be written for by any undergraduate of the College.

There is also a prize given every year for the best English Essay on a given subject, to be written for by the Senior Sophs.

There is also a prize for the best essay on the character and conduct of King William III., to be written for by any Junior Bachelor of Arts of the College.

The election of College Scholars from among the Junior and Senior Sophs takes place by an Examination held in Easter Week.

Lectures of the Tutors and Assistant Tutors.

MICHAELMAS TERM.

Freshmen.	Euclid. Book I—VI.	hour.	Greek Play.	hour.
JUNIOR SOPHS.				
Division *A*	Conics, Analytical Geometry, and Mechanics.		Composition in Latin and Greek. Classical subject of "Previous Exam^{n}."	
,, *B*	Conics (Geometrical), and Elementary Mechanics, (1st and 2nd Law of Motion.)		Butler's Three Sermons, &c., and Dr. Whewell's Morality, Book I.

Answers from the Rev. T. Worsley, M.A., Master of Downing College.

Rev. Thos. Worsley M.A.

On the questions in this paper also, which involve Tutorial details, I have consulted the College Tutors.

1. In this College several items of expenditure have lately been diminished by withdrawing privileges conceded to former College servants. It does not appear to us practicable further to diminish very materially the *necessary* expenses of a residence in College. Considering the existing habits of society, we think that in some cases the *actual* expenditure of Students in a College may be diminished by a slight increase of the necessary expenses; or that, under a more economical management, better provision can be made at the present rate of charge. A good deal may be effected if perquisites be regulated and kept in check, but more depends on the Senior Members of a College setting the example of sociability without luxury. Expenses.

2. For greater accuracy in Tutorial details, I have remitted this question to the Senior Tutor, and his answer is not yet received.

3. Lectures have been spoken of under the previous Question 5. The staff of Lecturers is in my opinion sufficient for the present circumstances of the College, under the condition of two resident Fellows. Less than this, as a permanent staff, would be wholly insufficient. Lecturers.

4. An Undergraduate of Downing is rarely put to the expense of a private Tutor, unless he takes a Degree in Law; when, being a Fellow-Commoner, he is liable to be charged 20*l.* per Term for private tuition; and it would seem that he cannot dispense with such assistance. The expenses attendant on graduating in Law, may therefore extend to 60*l.* or 80*l.* Private tuition.

5 & 6. Students of Downing College are usually prepared for an ordinary B.A. Degree, without the aid of a private Tutor; in this respect we consider that they differ from the generality of Students.

7. The College Tutors are decidedly of opinion that it is futile to pass Graces with a view to bar or restrict the services of a private Tutor. I should myself very much doubt the efficiency of any such Grace taken singly.

8. There is no such provision in this College.

I do not think it expedient to afford such aid on the ground of poverty alone. There would remain no desirable mode of choosing from the crowd of Candidates for such positions of advantage or emolument, if moral and intellectual tests of superiority were excluded: and whether we look at the direct consequences to the supposed College, or to its reaction on the class from whence its Members would be recruited, the results of Poor Students.

Rev. Thos. Worsley, M.A.

excluding such tests would be equally unsatisfactory. Such a Hall or College could not, in my opinion, educate successfully for the liberal Professions as they are now constituted; unless it possessed sufficient endowments to aid its Students during the earlier and more unproductive period of their professional life, by Fellowships or Exhibitions tenable for a certain number of years. That Colleges might be advantageously founded, furnishing many of those who cannot afford to enter the liberal professions with a completion of their school education analogous to that which the Universities supply to those who can, is very probable: but I should have serious doubts about Oxford or Cambridge being the best localities for such foundations. Such a College established there, but unprovided with adequate emoluments of its own, would attract few if any pupils from among those of the poorer class who are ambitious of a liberal profession; for the hopes excited by a somewhat more expensive College possessed of endowments, would be more attractive than the offer of a completed liberal education unaccompanied by any ostensible means of making it available.

Examinations.

9. On this question the Tutors express themselves as follows:—A Student of moderate abilities and fair habits of application, who knows a little Latin when he comes up, but no Mathematics, next to nothing of Greek, will have his time fairly and fully employed in preparing for his previous Examination, which takes place in his 5th Term. This however, he may pass with credit if he is diligent. He will then not have such full employment in preparing for his B.A. Examination in his 10th or 11th Term. We consider that he might be very well prepared in his 9th Term with all that is now required.

To apply this statement to Question 9, we would observe, with regard to a pupil duly prepared at a tolerable school, the previous Examination far from being too difficult, does not comprise a sufficient amount of standard classical subjects, and that the space of time between the previous Examination and that for B.A., is amply sufficient for attendance upon one or more courses of Professorial Lectures, and for the reading necessary to illustrate the subjects of those Lectures, without in the least degree involving a neglect of the preparation necessary for passing the B.A. Examination. We conceive that the need of a private Tutor does not arise from the extent or difficulty of the subjects of the previous or of the B.A. Examination; but from the fact that the University requires greater accuracy then is usually required at school, that the College Lecture to a large number, cannot sufficiently test or impart this accuracy, which can be done only by repeated oral examination. Let the subjects of Examination be ever so much restricted, still private Tutors would continue to be necessary, so long as the University required accuracy, and the ordinary College Lecture class as at present constituted, did so little towards imparting this valuable qualification. We would further observe that it would be futile, or worse than futile, to impose a Matriculation Examination, unless at the same time the standard of later tests were raised, or their range enlarged.

With regard to frequency of Examinations, there is a large class of young men from whom it is very difficult to obtain anything like earnest work, from any interest they take in that kind of exact knowledge—philological be it or scientific, which is preeminently valuable as a discipline of the *character*, from the sustained application it demands, as well as of the mind. Of these a considerable number may be roused to exertion by the twofold stimulus of honour and disgrace which Examinations involve; and there is no doubt that many who thus begin, on lower inducements, are raised by them, within the influence of worthier motives, and end by loving science or literature for themselves.

Still it remains true that the perpetual recurrence of Examinations, tends to give an undue predominance to the lower motives for intellectual exertion, and fosters the system of *cramming*, and that it often interrupts and discourages those more genial Students who are capable of pursuing a subject for itself, rather than for the number of marks they will gain by it. Were it not for this danger—which, be it remembered, affects the most valu able men, whether as members of the University or of society—there would certainly be room and grounds for an Examination in the third year, when this influence of the previous Examination, has ceased to operate, and that of the B.A. Examination has hardly begun to lay hold on the majority.

Such difficulties can, I believe, be effectually met, only by that Legislation from within the University, which from time to time originates in the best wisdom and experience of her abler sons, and which is carried out into practice by their united energy, and interest in their own well considered and gradually matured improvements. One of the grounds on which I look with much hopefulness to the new Triposes, is the probability that they will supply this want without the *deadening* effect of another *sine quâ non* Examination. If they do not, I believe that the University is fully alive to the question, and that it wants neither the intelligence, nor the will to supply a proper remedy.

Matriculation Examination.

10. They are examined individually, on applying for admission. I think the present system of each College examining its own Candidates for admission, more advantageous and better fitted to the constitution of the University, and its relations to the Colleges. There actually exists, a certain diversity in the characters and characteristic pursuits of the several Colleges; and I do not think it desirable (setting aside the question of each College's rights) to discourage or do away with such a diversity by a uniform and compulsory test of fitness for admission.

The University requirements for Degrees and for Honours, are in my opinion a sufficient check upon the College admission.*

Inducements to leave the University.

11. I think the causes here enumerated have tended materially to engage the abler University men in the practice of professions more generally, and earlier than heretofore.

* The objections to this scheme are presented in greater detail in Appendix XIII. to Dr. Whewell on Cambridge Education, Part II. With these objections I coincide in the main.

Rev. Thos. Worsley, M.A.

They are thus themselves prematurely withdrawn from those larger and more exact studies, in Theology e.g., or in the history and philosophy of Law, which are essential to solid and dignified professional eminence; and on the other hand, the Faculties and the study of Theology, Law, &c., are weakened and discouraged in the Universities. And even though the Professors in these Faculties may be quite competent to their position, such additional inducements to an immediate entrance into professional life tend materially to weaken and diminish their classes. The abler Students, whose intelligence and sympathy would have encouraged the Professor in larger historical research, and a more thorough investigation and exposition of principles, are, by such inducements, withdrawn from the University very soon after their first Degree.

Before that time, the competition for honours in the primary and essential disciplines of classics and mathematics has, hitherto at least, precluded their effectual attention to professorial lectures of such a character as I am now contemplating. Hence the Universities are to a considerable extent withheld from cultivating and communicating that amount and variety of exact knowledge, and those habits of exact thought, which are invaluable and which are indispensable preparations for a really useful and dignified professional life.

I think that this undue tendency to the merely and immediately practical, which is thusinjuriously affecting the Universities, as well as undermining the solid dignity and usefulness of professional life, lies too deep to be met by any financial arrangements for securing higher salaries to Professors or to Tutors.

Practically speaking the assumed necessities, the predominant views and aims even of those who attend Tutorial—still more of those who attend Professorial Lectures, will, in the main, determine the *character* and finally the *success* of such Lectures.

Hence the practical wisdom of the endeavours recently made and still being made by this University to bring the Professorial as well as the Tutorial Lectures within the range of those motives whose influence is, and, especially in an endowed society, must be, most generally and immediately operative on the Students.

I can hardly doubt that if these endeavours be allowed free scope, so that the new element may gradually and firmly take its place in the University system, honours and emoluments will be growingly awarded to proficiency in the Moral and Natural Sciences, &c., as well as in Classics and Mathematics, and that these new branches will be studied with such exactness as to furnish new and valuable instruments of mental discipline as well as important accessions of useful knowledge. These new or newly-organized studies, growing as they have done out of a want which has been for some time making itself felt more and more in the University and in the country, have in them a true principle of life and growth: and they are the more hopeful inasmuch as they are gradually taking shape under the combined views and efforts of those persons in the University whose further zealous co-operation in working them out is *available*, and is also in my opinion *essential* to their progressive and ultimate success.

Emoluments of Professors.

With regard to emoluments for the Professors, I think the principle now in operation of *various* modes of election and sources of endowment more conducive to the best interests of the University and of the country than any uniform system. And though I do not think it an infraction of this principle that a limited number of these chairs should be, as they are, appointed to by the Government for the time being, whether with sufficient or as in most cases with insufficient stipends; I should think it an injury to the University and to the country for which no increase of their stipends could compensate, if the element of Government patronage in the University Professorships were materially increased.

With regard to the adequate remuneration of the Professors, thinking as I do, that if not injudiciously interfered with, their lectures will in due course become an integrant portion of the University system, I am further inclined to hold that the increase of professorial emoluments will be best left to the increase of each Professor's class, added to such further emoluments of his Professorship as may from time to time be made, in the spirit of those which already exist, whether from public or private sources.

Tutorial Emoluments.

As to the Tutorial emoluments, which depend almost wholly on the actual number of Students in each Tutor's side or class, I should say, *generally*, that no increase in such emoluments is necessary as an inducement for sufficiently able men to hold College Tutorships.

College Staff of Tutors and Lecturers.

12. One of the greatest difficulties I have had to contend with since my appointment to the Mastership has been the securing a sufficient and permanent supply of Tutors and Lecturers. This difficulty has arisen, first, from the fact that only three out of the whole number of sixteen Fellowships have hitherto been filled up—there remaining thirteen to which the Crown will not by the Statutes nominate, until the buildings of the College are complete; second, from the uncertainty whether, in the actual state of the College, two out of these three Fellows are to be elected, as they are when the College is complete, with special reference to their fitness for the College offices of Tutors, Lecturers, Chaplains, Deans, &c., and to their residence for the discharge of these offices.

With regard to the moral necessity for two of the Fellows being, in the present state of the College, elected with such reference, I have had a former occasion to express my opinions fortified by those of several influential persons at that time resident in the University, and to lay them before the Visitor in certain letters, of which I had two copies only printed, for his perusal and for my own satisfaction. If further details on this head be necessary to that clear understanding of the actual position of Downing College, which I am endeavouring to supply, it may perhaps become expedient to submit these letters to the Commissioners. I do not, however, at present perceive the expediency of this: as I believe the existing Society is fully convinced both that such elections are necessary and

Rev. Thos. Worsley, M.A.

that it possesses the power of making them. At all events it actually enjoys the advantage of two gentlemen holding Fellowships in conjunction with Tutorships and other College-offices, who reside regularly for the discharge of these duties, and in whom I have entire confidence. And so long as the College remains devoid of any attractions for Undergraduates, in the form of Scholarships, Exhibitions, or other emoluments, I conceive this to be a sufficient staff for the College Tuition.

Reduction of Terms.

13. I have not sufficiently matured my own views on the points here mentioned to give a decided opinion with regard to them. The expediency of introducing such changes would depend to a considerable extent on the degree in which the new Triposes and the other changes recently introduced, became essential parts of the University system. It appears to me that the University has not shown itself devoid of the power or of the will to introduce such changes in proportion as they become necessary; and that the fact of their becoming so, can be satisfactorily determined only by observing for some limited period, the workings of the very important alterations so lately effected.

Residence in College during Vacations.

14. In so small a Society it rarely happens that a Student wishes to reside during the Long Vacation; and, as the governing body of the College is then either absent or but partially resident, I have generally discouraged the practice. Once or twice I have allowed it, on the strong recommendation and personal responsibility of the Tutor.

Lodgings.

15. We have very rarely had any residents in the Town, excepting married Fellow Commoners.

Library.

With reference to the questions of February 18, 1851, I have little to say, inasmuch as the College Library is not yet built, nor any Librarian appointed.

A room has, however, been set apart sufficient to contain the small number of Books and MSS. which the College possesses; the former consisting chiefly of a collection of law-books, presented by Mr. Gurdon, one of the Fellows. The Society has determined on appropriating a certain portion of the Fellow Commoners' fees to the gradual enlargement of this nucleus for its future Library. There are at present no funds statutably appropriated to this purpose.

Rev. A. H. Wratislaw, M.A.

Answers from the Rev. A. H. Wratislaw, M.A., Fellow and Tutor of Christ's College.

SIR, *Christ's College, Cambridge, March* 11, 1851.

I BEG respectfully to return the subjoined answers to such of the Queries of Her Majesty's Commissioners as I have deemed myself competent to answer either wholly or in part.

I have the honour to be, Sir,

Your obedient humble servant,

(Signed) A. H. WRATISLAW,

Fellow and Tutor of Christ's College.

Expenses.

1. It scarcely appears to me practicable, consistently with what is due to the habits of those classes in society in this country to which students usually belong, to diminish by much more than a fair percentage the *absolutely necessary* expenses of a residence in my College. The system of paying College servants by perquisites instead of direct salaries, of employing caterers as supposed checks upon the cook, of placing more meat upon the Hall table than really necessary, of never allowing meat to appear a second time in the College Hall, even in the shape of made dishes, and the position of the College Steward as an annual officer with little knowledge, experience, or power, appears to me to have the effect of increasing those expenses.

Lectures.

3. There are five persons employed in the tuition in my College. Three of these are employed in Mathematical Lectures only, Latin, Greek, and Theology being intrusted to the other two. I confine myself to the latter of the two departments, in which the various courses are as follows:—

Compulsory Lectures.

Compulsory Lectures.

1. To the Freshmen, on a Greek subject, a Latin subject, and one of the Gospels.
2. To the ill-prepared candidates for the previous Examination, or little go, in the second year.
3. To the candidates for the ordinary degree in the third year.
4. Examinations for the candidates for the ordinary degree in the fourth year.

Voluntary Lectures.

Voluntary Lectures.

5. To a voluntary class of candidates for Classical Honours in the second and third years.
6. To a voluntary class consisting of B.A.'s and students in all the years on theological subjects more or less connected with the Voluntary Theological Examination in the University.
7. To a voluntary class in Hebrew.

Staff of Lecturers.

The students are classified after the first year. Candidates for Mathematical Honours are not compelled to attend any but Mathematical Lectures after the first year. The Moral and Natural Sciences are not recognized in the system of my College. The College does not afford a staff of lecturers sufficiently complete to prepare the students for the various Honour Examinations, though ample to conduct them through that part of the University system, which is or ought to be common to all. In the case of the candidates for Honours upon almost all Triposes their functions are necessarily, in that of the candidates for the ordinary degree unnecessarily (except in a few exceptional cases of extreme ignorance or dulness), to a considerable extent superseded by private Tutors.

4. There are two classes of charges for Classical Private Tutors, according as the pupil reads every day (whole pupil), or every other day (half-pupil) with his Tutor.

	Whole Pupil.	Half-Pupil.
For a Term . .	14*l.* to 20*l.*	7*l.* to 10*l.*
For a short vacation .	10*l.*	5*l.*
For a long vacation .	30*l.* to 40*l.*	15*l.* to 20*l.*

I should conjecture that nearly three-fourths of the students employ a private Tutor for the whole or some portion of a year, and I should think the annual expense would vary from 21*l.* to 50*l.*, or even to 70*l.*; thus, in some cases, exactly equalling the absolutely necessary expenses of residence at my College.

Private Tutors.

5. The office of Private Tutor has become a permanent and professional occupation of many men of eminence both as mathematicians and classical scholars, especially the former. In Classics the practice as to lecturing the pupils singly or in classes is very variable. Those who lecture their pupils in classes usually charge them as half-pupils. When I was an Undergraduate, the two principal professional Classical Private Tutors adopted opposite plans with equal success. It is very rare for a student to become a candidate for the higher Classical Honours in the University without the assistance of a private Tutor. With respect to Mathematical Honours I never heard of such a case since I have been in the University.

6. There exists a similarly organized system of private tuition for those students who are not candidates for honours, but who merely seek to pass the ordinary Examinations required before the first degree.

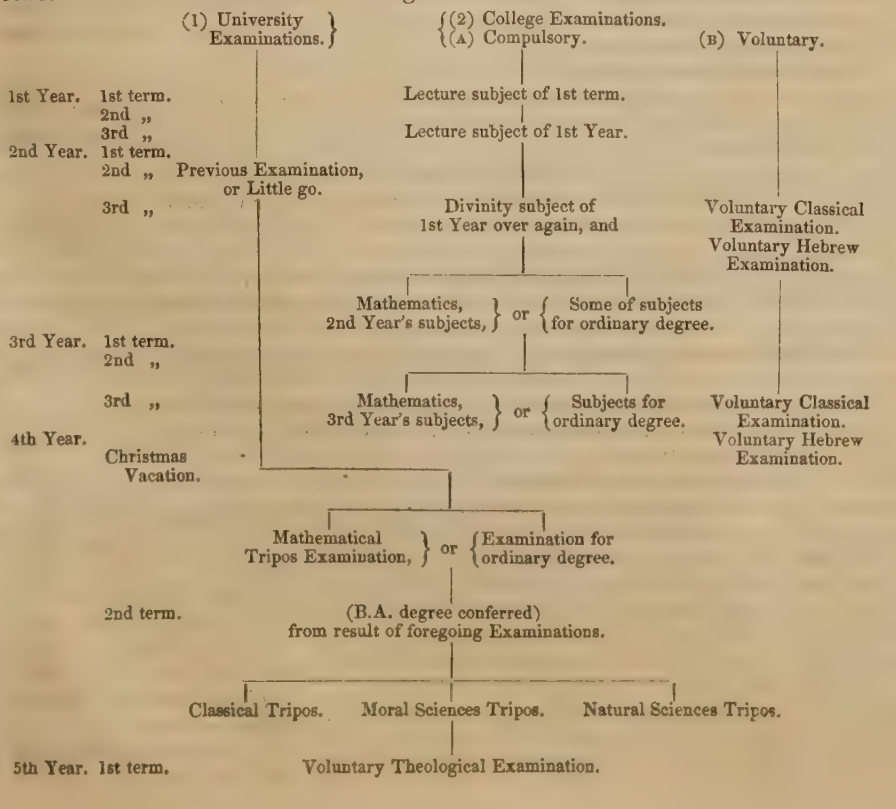
7. Without the establishment of a complete and well-organized University Staff of Professors, I think it would be highly injurious to put any limitation upon the students employing private Tutors. With the establishment of such a staff, some limitation of the kind formerly existing would, in my opinion, be a great boon to science and learning, would tend to develope individual power and character in the students, and would make the higher University honours of far more practical value than they are at present. I should, however, desire to confine the prohibition of the employment of a private Tutor to Term time, and to avoid any legislative interference with the long vacation.

Poor Students.

8. Provision is made in my College for the assistance of poor students by means of Sizarships. A Sizarship is worth about 25*l.* per annum. The Sizarships are four in number. The Sizars are selected from such students already in residence as apply for them through the Tutors. The qualifications required are poverty, good conduct, and, *ceteris paribus*, ability. It is not, in my opinion, expedient to afford such aid in the education of students on the grounds of poverty alone without regard to merit and superior attainments. As far as my observation would enable me to judge, the establishment of a Hall or College for poor students only, who should be educated and maintained at the lowest practicable scale of expenditure, would be beneficial if confined to *bonâ fide* Theological Students, and if made entirely subsidiary to the study of Theology. The domestic system of Cambridge, by which students of one College are rarely admitted to Scholarships or Fellowships at another, would, in my opinion, have a most baneful effect upon the probable success and public benefit of such an institution, supposing it unprovided with ample endowments of its own.

Examinations.

9. I now proceed to give, in a tabular form, the various University and College examinations for which the students of every College are required to prepare in the interval between their first residence and the degree of M.A.

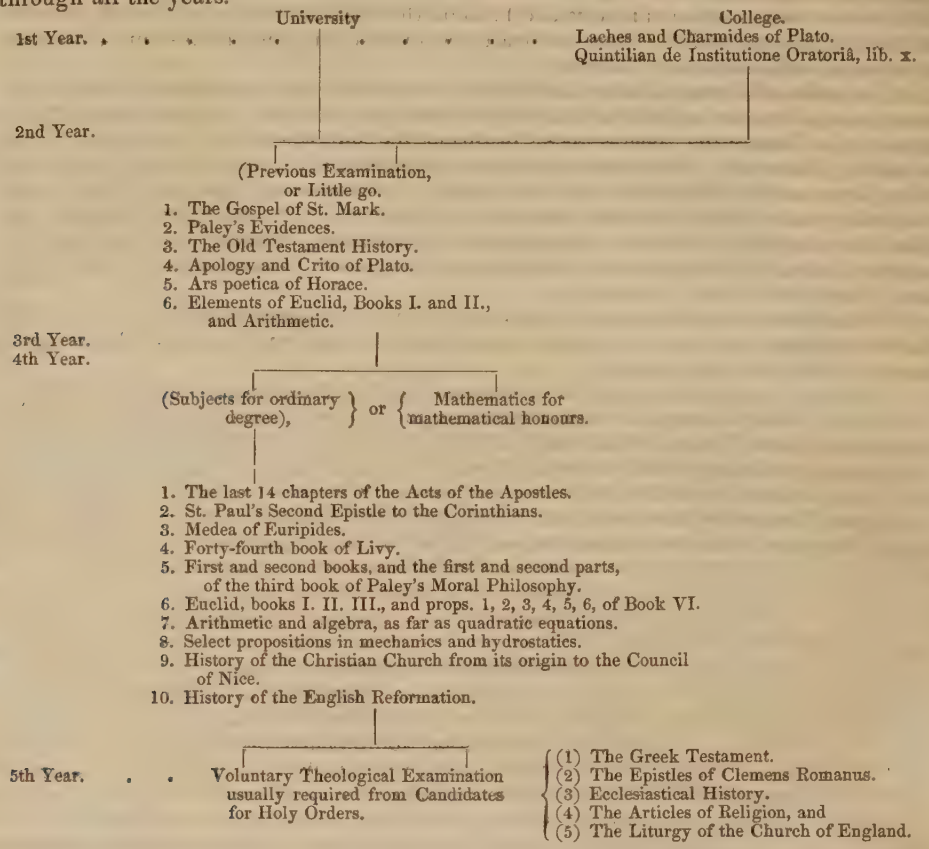


(1) University Examinations.
(2) College Examinations.
(A) Compulsory.
(B) Voluntary.
1st Year. 1st term.
2nd „
3rd „
Lecture subject of 1st term.
Lecture subject of 1st Year.
2nd Year. 1st term.
2nd „ Previous Examination, or Little go.
3rd „
Divinity subject of 1st Year over again, and
Voluntary Classical Examination.
Voluntary Hebrew Examination.
Mathematics, 2nd Year's subjects, } or { Some of subjects for ordinary degree.
3rd Year. 1st term.
2nd „
3rd „
Mathematics, 3rd Year's subjects, } or { Subjects for ordinary degree.
Voluntary Classical Examination.
Voluntary Hebrew Examination.
4th Year.
Christmas Vacation.
Mathematical Tripos Examination, } or { Examination for ordinary degree.
2nd term.
(B.A. degree conferred) from result of foregoing Examinations.
Classical Tripos.
Moral Sciences Tripos.
Natural Sciences Tripos.
5th Year. 1st term.
Voluntary Theological Examination.

Rev. A. H. Wratislaw, M.A.

Course of study.

I now give a table of the compulsory subjects of the University, and also of the College (where the latter are not identical with the former), for the current year 1850-51. A fair view will thus be presented of the nature of the Compulsory College and University Courses taken together. A course of Mathematics for Mathematical Honours continues through all the years.



University
College.
1st Year.
Laches and Charmides of Plato.
Quintilian de Institutione Oratoriâ, lib. x.
2nd Year.
(Previous Examination, or Little go.
1. The Gospel of St. Mark.
2. Paley's Evidences.
3. The Old Testament History.
4. Apology and Crito of Plato.
5. Ars poetica of Horace.
6. Elements of Euclid, Books I. and II., and Arithmetic.
3rd Year.
4th Year.
(Subjects for ordinary degree),
or
Mathematics for mathematical honours.
1. The last 14 chapters of the Acts of the Apostles.
2. St. Paul's Second Epistle to the Corinthians.
3. Medea of Euripides.
4. Forty-fourth book of Livy.
5. First and second books, and the first and second parts, of the third book of Paley's Moral Philosophy.
6. Euclid, books I. II. III., and props. 1, 2, 3, 4, 5, 6, of Book VI.
7. Arithmetic and algebra, as far as quadratic equations.
8. Select propositions in mechanics and hydrostatics.
9. History of the Christian Church from its origin to the Council of Nice.
10. History of the English Reformation.
5th Year.
Voluntary Theological Examination usually required from Candidates for Holy Orders.
(1) The Greek Testament.
(2) The Epistles of Clemens Romanus.
(3) Ecclesiastical History.
(4) The Articles of Religion, and
(5) The Liturgy of the Church of England.

It will thus be manifest that the addition made by the College to the compulsory University course consists of one Greek and one Latin subject in the first year.

The voluntary subjects for Classical Students in the College for the current year are as follows:—

Second and third years;—

1. Rhetoric of Aristotle.
2. Orator of Cicero.
3. Homeric Hymns.
4. Jus Publicum Græcorum.

In part of these subjects the students have the opportunity of attending voluntary lectures, the rest they are expected to prepare themselves.

Shortly after the B.A. degree the majority of the students go out of residence; and such as contemplate entering into Holy Orders prepare for the Voluntary Theological Examination at their own homes. There is no Examination for the M.A. degree.

College examinations.

The College Examinations after the first year do not in anywise interfere with independent study except as confining the attention of the students to Classics and Mathematics only. The University Previous Examination, or Little-go, does so not from its difficulty, but from its position, cutting up the second year, and necessarily interrupting any course of study that may have been entered upon. That for the ordinary degree, both interferes with private study, and frequently necessitates the employment of a Private Tutor; not from its difficulty, but from the very great number of minute scraps of subjects which have to be got ready in a producible state for one and the same Examination—a circumstance that drives even well-prepared students to undergo the process of "packing" at the hands of an experienced *Poll*-Tutor. In the Classical Tripos the aid of a Private Tutor is rendered necessary by the want of University Lectures and the requirement of Verse Composition in both Greek and Latin. And the restrictions laid upon candidates for the Classical Tripos give occasion to "coaching" of a most useless kind, in order to secure the low Mathematical Honour, or the first class in the *Poll*-List. As regards the Mathematical Tripos, it is well known that success is unattainable without the constant employment of a Private Tutor.

Private tuition.

Matriculation examination.

10. There is no Examination of the students of my College previous to admission or Matriculation with a view of ascertaining their fitness to profit by the College Lectures. I am disposed to think that a General Examination conducted by the University, and not confined to the members of particular Colleges, would be most desirable. All that is at present demanded at the Little-go in the second year, might most reasonably be required from every student previous to admission or Matriculation. The probable result of such an examination would be a temporary, but only temporary diminution in the number of

admissions. Its effect in stimulating the public and other schools in preparing their pupils for the University would undoubtedly be most beneficial. At present many students come up excellently prepared in Classics, who are ignorant of the first principles of Geometry and Algebra; and others, possessed frequently of considerable mathematical talent or attainments, who are equally ignorant of the very elements of Greek and Latin. *Rev. A. H. Wratislaw, M.A.*

11. As far as my observation has extended, the effect of the great increase of the emoluments, offices, and civil honours of the law, and of the recent legislation with respect to cathedral and other preferments in the Church, as well as the very general prevalence of higher views with respect to the obligations of the Christian ministry in inducing the more distinguished students after attaining Fellowships to quit the University, and engage at once in professional studies, or in the active duties of a parish, has been most prejudicial to the University. And a similar, or even more prejudicial effect has been produced by the improvement, both in social position and emolument of the Masterships at the public and other schools in various parts of the country. These changes have undoubtedly tended to increase the difficulty of retaining the best qualified persons to fill the more important offices in the Colleges and the University. In order for the emoluments of those who devote themselves, whether as Tutors or Professors, to the duties of public instruction, both in the Colleges and the University, to be increased so as to secure more effectually the services of the ablest men for these important offices, I would suggest changes in both the Collegiate and Academical system of the following nature :— Inducements to leave Cambridge.

(1.) I would respectfully suggest the attachment of several Fellowships (or their incomes) from each College, in proportion, freed from all College duties and restrictions, to permanent Professorships in the University. Recommendations.

(2.) I would suggest that sufficient Fellowships to work the College system much as at present should be left upon their present footing in each College, requiring, however, residence and employment in the public tuition from each of these Fellows.

(3.) I would suggest that one or more permanent Fellows (freed from the restriction of celibacy) should be attached as Tutors to each College in proportion to its magnitude, such Tutors to be chosen from among the resident Fellows, or otherwise, by the several societies.

(4.) In order not to lose the stimulus to exertion, which is exerted by the present non-resident Fellowships, I would suggest the creation of small *temporary* Fellowships in each College without any duties or restrictions whatever.

(5.) Lastly, I would suggest that the College preferment should be offered to the resident Fellows and Tutors (if in holy orders), in order of seniority, and in case of their declining it, to such present or late temporary Fellows as happen to be clergymen.

By some such system, I believe, the services of the ablest men in their several branches would be secured to the University, as Professors, one or more suitable Tutors, and a succession of competent Lecturers to each College, and the services of valuable clergymen, at an earlier and more fitting age than is frequently the case at present, to the College livings.

12. The staff of Lecturers and Tutors in my College being sufficient to prepare students for the various Examinations necessary for a degree, but insufficient to prepare them to compete successfully in the various Honour Examinations; the plan I should suggest for supplying this deficiency, would be simply the increase, completion, and regular organization of the Professorial Staff of the University. As far as the College is concerned, I should recommend that its staff should consist (including the Tutor) of two Lecturers on Mathematics and Natural Science, two on Classics and Moral Science, and one on Divinity; and that these should be expected to prepare the students for the ordinary degree, and give elementary instruction in their several branches, leaving the higher education entirely in the hands of the University Professors. But I should most earnestly deprecate any increase in the payments at present made for tuition in the several Colleges, which I consider ample for all that the Colleges actually do, and for all that they are capable of doing, or at any rate, for all that the public can have any security for their doing. Were there to be any increase in the payments of the students, which, with a properly regulated application of the already existing Collegiate revenues to the purposes of education, I believe to be scarcely called for; I should trust that it would go towards supporting the staff of the University rather than that of the Colleges College Staff.

13. I am disposed to recommend the omission of the first and last terms now formally required by statute, and the substitution of nine terms of actual residence for ten for the degree of B.A. Nay, I should rejoice to see the time assigned to general studies reduced to two years, provided a third year were spent in professional studies. And I should desire to see a professional degree granted under such circumstances instead of the usual degree in Arts. Under the present arrangements the unequal accumulation of the students in the Michaelmas Term, produces the effect of driving either the Freshmen or those just about to take their degrees, into lodgings. The present arrangements also cause considerable delay in commencing lectures in the Lent Term. Were the number of terms for the B.A. degree reduced from ten to nine. I should suggest a general examination for all the students of the proper standing immediately after the division of the Easter Term for the degree of B.A. As soon after that as practicable, I should recommend that the Mathematical or Classical Tripos Examinations should follow, even at the risk of driving one or both of them into the Long Vacation. I should place the Medal Examination at the beginning of the next Michaelmas Term, and those for the Moral and Natural Length of Terms.

Rev. A. H. Wratislaw, MA.

Science Triposes in the Christmas Vacation following. From my own experience as Classical Tripos Examiner, I should say that the conduct of an important University Examination might interfere very considerably with College duties, and should be inclined to recommend the adoption of the principle, that all Honour Examinations should take place in vacations. I should not consider it expedient to shorten any of the vacations, but should recommend an increase in the proportion of each Term required to be kept by statute. Perhaps two-thirds of each Term instead of half would be sufficient, if the Colleges began lectures at the beginning and ended them at the end of each Term.

Residence in College during vacation.

14. None but scholars (who have a statutable right to do so), are allowed to reside in my College during the long vacation, without special permission. All who do reside there are required to attend chapel daily, and not permitted to be out of College after 10 at night. It is usual to form reading parties under private Tutors elsewhere than at Cambridge, during the long vacation. Their numbers are very variable, and they continue during 12 weeks. Their effect depends upon the moral influence of the Tutor and the set of students who happen to be thus thrown together. I should not, so far as I can judge, assign them any very great importance or influence over and above the regular University system.

Lodgings in the town.

15. Several of the students in my College reside in lodgings in the town. Lodging-house keepers are required to make a return of the hour at which the students lodging with them return to their lodgings at night, should it be later than that of closing the College-gates. They are also required to keep their doors locked after the above-mentioned hour. In my opinion these regulations are very loosely observed, and there is frequently an understanding between the lodging-house keeper and the students lodging with him, that he is not to return their names as late, unless they come directly from their own College, where they are noticed at the gates, in which case they inform him of the fact, and their names are returned accordingly. I am disposed to think that students in the town are under far less rigorous control, and are in some respects exposed to greater temptations than those who are within the College. The external discipline of the University exercised by the Proctors and their officers tends (to the best of my knowledge) only accidentally and occasionally to enforce the regulations of the lodging-houses.

Alterations in the Cambridge system desirable.

16. I should beg respectfully to recommend to the consideration of Her Majesty's Commissioners the following alterations in the Cambridge system :—

(1.) I should recommend an University Examination comprehending all the branches of learning and science, for which honours are offered by the University, and also theology, for all candidates for Fellowships in the smaller Colleges, no graduate to be eligible to a Fellowship without passing in at least two branches. At present, the Fellowships at Trinity are attained entirely, at St. John's partially, by Examinations independent of those of the University ; and while many graduates, with qualifications superior, perhaps, to those of almost every Fellow in some of the smaller Colleges, are rejected entirely from these great Colleges, especially Trinity, others by no means qualified for the public duties of the University are elected into the governing bodies of the smaller societies. I should deprecate taking the election of Fellows entirely out of the hands of the Colleges, but I should rejoice to see their choice confined to candidates really worthy of the honour, and available for the great end of the Colleges and the University. This would also reduce within harmless limits the, at present, so injurious domestic system of Cambridge, by which students and graduates of one College are rarely elected Scholars or Fellows of another.

(3). I should also beg to recommend the institution of an University Honour Examination for the Oriental and another for the modern languages.

(4.) I believe that it would be a great advantage to the students intended for the ministry, and to the Church itself, if the Faculty of Theology and its degrees were brought practically to bear upon the study of that science. I beg respectfully to refer to the suggestions upon this point contained in my answer to Question (13). At present the degrees of B.D. and D.D. are of no positive value whatever, as denoting or exacting proficiency in Divinity ; and I cannot but look upon them as little more than matters of form and money. The real value of the Divinity Professors consists in their relation to the Undergraduates and Bachelors of Arts, and here their influence as Lecturers and Examiners is most beneficial. I would respectfully suggest to the Commissioners, that an honourable professional degree be made at a comparatively early period, the sequel of a regular course and *bonâ fide* proficiency in Theology. And I should recommend the granting to all who thus take *bonâ fide* professional degrees, all the privileges of Master of Arts, when of standing sufficient to take that degree.

(4.) Should public lectures be delivered to any extent in the University, public lecture-rooms would be absolutely necessary, and, in fact, the want of them is already sensiby felt. I beg to suggest to the Commissioners that the site of the Old Botanic Garden, which belongs to the University, would be both available and admirably suited for such a purpose. As the University is without funds for the erection of such a building, or for any similar purpose, I beg to remind the Commissioners that the Colleges contribute nothing towards the expenses of the University, and to recommend the imposition of an income-tax upon their revenues, primarily for the object above-mentioned, and afterwards for the general purposes of the University.

(5.) Should any considerable increase be desired in the number of students in the University, I do not think that the present Colleges would be able to make arrangements to meet it. I would, therefore, respectfully suggest that members of the Senate, under proper guarantees, be allowed to take private pupils into their houses

Rev. A. H. Wratislaw, M.A.

independently of the Colleges, (a step which would also tend to diminish the number of students in ordinary lodgings in the town); and also that students residing with their parents or near relatives, in the town, be relieved from the expenses of connexion with a College.

(5.) Should it be considered expedient to have more University Examinations between that at matriculation and that for the degree, I would press upon the Commissioners the expediency of placing it or them towards the conclusion of the Easter Term. The College Examinations have no control over the idler students, whom in fact, nothing but the fear of actual disgrace, can induce to work at any time, much less can they be effectually restrained by the Colleges in the finest summer weather. The first two terms would thus be at the disposal of all students who can fairly be expected to employ themselves in other and independent studies, and the idle would have their idlest time necessarily devoted to serious work.

(Signed) A. H. WRATISLAW.

CAMBRIDGE UNIVERSITY COMMISSION.

EVIDENCE ON MATHEMATICAL STUDIES AND EXAMINATIONS.

The following paper was addressed to the Heads of the several Colleges, the Mathematical Tutors and Lecturers, and the Moderators and Examiners for the past ten years:—

Cambridge University Commission,
Downing-street,
December 1850.

SIR,

HER Majesty's Commissioners for inquiring into the state of the University of Cambridge and the Colleges thereof, respectfully invite your attention to the subjoined List of Queries; and request the favour of such information in reply as you may be kindly disposed to communicate.

I have the honour to be,
Sir,
(Signed) Your obedient humble Servant,
W. H. BATESON,
Secretary.

---

1. What is the mode followed by the University, for ascertaining the proficiency in Mathematics of Students who are candidates for the Degree of B.A.? Have any and what changes taken place of late years in the nature, order, and duration of the examination for this purpose, and what has been the general character, design, and tendency of such changes?

2. Are the examinations in Mathematics at present more or less searching and severe than heretofore? Do they embrace a wider range of subjects, and those subjects less elementary than formerly? Is there a tendency in this direction still observable in the questions and problems which are proposed?

3. What amount of mathematical knowledge is required for a common Degree? What is the minimum of knowledge, as nearly as it can be ascertained, that is required for a place on the Tripos? Has there been a tendency of late years, both in one case and the other, to raise the standard of qualification?

4. What is the average proportion of Students taking honours to the total number taking Degrees? Is this proportion greater or less than heretofore, comparing decennial periods? What proportion of candidates for honours fail in attaining them, and what proportion of all the candidates for Degrees are rejected?

5. Are—(1) the mode of examination at present followed, (2) the nature of the questions proposed, (3) the mode of proposing them, (4) the way in which the answers are required to be given, and the time allowed for giving them—the best calculated, in your opinion, to bring into evidence the more or less full possession of the several subjects by the candidates? If not, state what you consider their defects, and the remedies you would propose?

6. In what manner does the recently appointed Syndicate of Studies act, or propose to act, on the course of University reading? What is their authority in effecting changes in the mode, direction, or severity of the examination? Have they already effected any such changes?

7. Would you be disposed to recommend the limitation of some of the subjects included in the present range of the examinations, for instance to omit such propositions and applications of the Calculus of Variations, of the theories of Definite and Elliptic Integrals, of the Planetary and Lunar theories, of the theories of Heat, Electricity, and Magnetism, of the undulatory theory of Light, as require for their treatment a very refined and laborious analysis? Might such higher mode of treating these subjects be advantageously reserved for examination for special prizes at periods subsequent to the Degree of B.A.? Would not the concentration of the attention of Students upon a smaller number of subjects, and those restricted within narrower limits, tend to increase the accuracy and raise the character of their knowledge, and to bring their instruction more completely within the grasp of the public and recognised teaching of the University?

8. What are the usual English or Foreign elementary books which are used in the University? Do they comprise a course of Mathematics sufficiently comprehensive and continuous, and sufficiently on a level with the present state of knowledge, to qualify Students for the examinations, or do they require to be completed by manuscript compilations? Are such manuscripts, containing collections of problems, or teaching short processes, or superseding printed books, very generally used? What objections, in your opinion, may be made to their use?

9. Is it your opinion, or the contrary, that the course of Mathematical study, as determinep by the University examinations, is tending to become more and more exclusively analytical and symbolic? If so, do you think that it has passed the beneficial limit? Do you consider it a fact, or the contrary, that the present system of reading tends to fix the attention unduly upon the dextrous use of symbols to the neglect of natural relations in the application of Mathematics to physical subjects?

10. Is it your opinion, or the contrary, that the problems proposed in the examinations bear too large a proportion to the questions derived either immediately or by a very simple deduction from the books which are commonly read? Are they for the most part so proposed, as to admit of their being readily apprehended and their solution effected by a Student who thoroughly understands the principles and applications of the branches of Mathematics upon which they depend, or are they not unfrequently involved in such a form as to require for their solution a peculiar tact distinct from accurate and philosophical knowledge? Are you not disposed to think the number of problems proposed to be solved in the time allowed (as many, generally, as seven or eight in one hour of time) is greater than the best prepared Student can be expected to complete?

11. What is the course usually followed by Students in preparing themselves for the examinations for Honours? Is not the assistance of a private Tutor, with very rare exceptions, considered indispensable? Are not many of the private Tutors men of great eminence, who devote themselves to the private instruction of Students as a professional pursuit? Can you suggest any change of this system, by which the labours of this important body of teachers might be rendered more generally useful to the students, without increasing unduly the expenses of academical education?

12. What inducements does the University hold out for the continuance of Mathematical study or the retention of the knowledge acquired, after attaining the degree of B.A.? Would the deferring the examination for the Smith's Prize to a later period (say one or two years) operate as such an inducement? What is the nature of the recently instituted Adams' Prize, and what influence may it be expected to exercise in this respect? Would not the institution of similar Prizes for the best Essays or Examinations on particular branches of Mathematics and Natural Philosophy (such as the examination for the B.A. degree can very imperfectly touch upon) materially contribute to the continued and progressive study of those subjects?

13. Are there any other suggestions which you are disposed to make for increasing the efficiency of the public teaching of the University.

Answers from the Rev. J. Cooper, M.A., Fellow and Tutor of Trinity College.

Rev. J. Cooper, M.A.

SIR, *Trinity College, Cambridge, Feb. 4, 1851.*

Mathematical Examinations.

I HAVE had the honour to receive from you a list of queries to which my attention is invited by Her Majesty's Commissioners, for inquiring into the state of the University of Cambridge, and the Colleges thereof, with a request that I will furnish, in reply, such information as I am disposed to communicate.

The majority of questions refer to matters of detail on which my practical experience in the Mathematical Teaching and the Examinations of the University does not place me in a position to offer any remarks for the consideration of the Commissioners.

Private Tuition.

With regard to the subject mentioned in the 11th Query, I can say that I have never known an instance of a Student taking Mathematical Honours without the assistance of a Private Tutor. Students who are well prepared in their Mathematical subjects when they commence residence, sometimes dispense with this assistance until their second year; but so far as my experience extends, no one, aiming at high honours, trusts to the public teaching of the College, or the University, after his first long vacation.

Among the Private Tutors who prepare Students for honours, are many who have distinguished themselves on the Mathematical Tripos. They devote themselves to the private instruction of Students as a professional pursuit.

I believe this system to be a necessary consequence of our present system of examinations, and on the whole I consider it advantageous. There are, however, two alterations in it which I should think very desirable. First, a more free and regular communication between the Private and the College Tutor, with respect to all that concerns the Student's progress, habits of study, &c. Secondly, a reduction in the charge for private tuition, which at present appears to be out of proportion with the scale of charges for public teaching, and the general advantages of the Institution. But I do not see how these changes can be effected by direct interference.

Examinations.

With reference to the last query, I am of opinion that the examinations are, and must be, the great instrument of public teaching. From the advanced age at which Students now enter the University, from the improved standard of the Public Schools of the Country, and from the ready diffusion of knowledge, by means of cheap books, I believe that Professors' lectures, independent of some peculiar felicity of manner in the lecturer, or some remarkable discovery in science, will never again command the attention they did when the facilities of acquiring information were fewer. The Professors will always occupy a most important position as the heads and representatives of their several sciences, but the public teaching of the University is in the examinations, and any alteration in the subject or method of our studies must be introduced here. It appears to me that the machinery for effecting such alteration, when it is required, is already in existence in the Mathematical Board recently established.

I should have had greater satisfaction in replying to the queries of Her Majesty's Commissioners if I had been in a position to treat the subject of their inquiries more fully.

I am, Sir,
Your obedient humble servant,

The Rev. W. H. Bateson,
Secretary, &c.

(Signed) J. COOPER.

R. L. Ellis, Esq., M.A.

Answers from Robert Leslie Ellis, Esq., M.A., late Fellow of Trinity College.

The Course of Mathematical Studies.

THE seventh query so far as it relates to the limits beyond which it is not expedient that the undergraduate course of mathemetics should extend, seems naturally to form a part of a more general question, namely how the whole time given to the study of mathematics may be most advantageously employed. In order to discuss this more general question, it is necessary to consider on what grounds the study of mathematics is made to form part of our system of education.

I. The grounds are two-fold: mathematics are studied as ancillary to natural philosophy and as a means of training and developing the mind. In the latter point of view they are chiefly valuable, because they deal with necessary and not contingent truth.* Of every necessarily true proposition which the mind distinctly apprehends as such, the contradictory is seen to be inconceivable; this inconceivableness of the contradictory being *ex parte mentis* the criterion of necessary truth. Nevertheless, although when we think of any simple proposition in arithmetic or geometry, we perceive not merely that it is true, but that it must of necessity be so, this is nowise the case with respect to all demonstrated or demonstrable results. The intuition, so to speak, of the ablest mathematician is confined within a narrower circle than that of the truths which he can prove. He may satisfy himself of the cogency of each step of the demonstration, and yet

---

* This applies to mixed as well as to pure mathematics; the necessity of the conclusion being, however, in the latter absolute, and in the former hypothetical,—*τὸ ἐξ ὑποθέσεως ἀναγκαῖον.*

the essence of the conclusion—the fundamental principle of its truth—remains unseen. The ὅτι is manifest, but the διότι obscure; and consequently a proposition contradictory to that to which he has been led does not appear to him an absurdity, but simply an untruth. It might, for what he sees, have been true, though he knows that actually it is not, and thus while he is aware that his conclusion is true necessarily, yet still it seems as if it were so only contingently and as a matter of fact, the demonstration appearing *assensum constringere, non rem.* In a word, his conception of the matter is still imperfect. But between this state of mind and that which is produced by the contemplation of any elementary proposition, there is no fixed or definite boundary. Every one who has really studied mathematics must remember cases in which, after long and patient thought, the reason of the truth of a proposition, with the demonstration of which he may have been acquainted for years, has seemed to dawn on him; the proposition thenceforth becoming, as it were, a part of his own mind,—a matter about which he is no more capable of doubting than about the primary conceptions of form and magnitude. The mind thus brought into nearer, if not immediate, contact with necessary truth is conscious of its own development; and herein, I believe, resides the special benefit to be derived from the study of mathematics, a benefit, that is, distinct from the exercise of patience and attention which it undoubtedly requires, but which is required also in other pursuits. The study of mathematics is especially valuable, not because it gives the Student practice in ratiocination but because it enlarges the sphere of his intuition, by giving him distinct and conscious possession of truths which lay hid in his conceptions of figure, number, and the like. But in order to this kind of mental development, it is necessary not only that the Student should master the successive steps of the demonstrations set before him and retain them in his memory, but that his mind should become imbued with their spirit and essence. His real progress therefore is not to be measured simply by the extent of ground over which he has passed: it varies also according to the degree in which he has approached towards a complete intuition into the results which he is able to prove.

I believe that this principle ought to be our guide in examining the merits and defects of a course of mathematical study intended to form part of a liberal education. But the connexion of natural philosophy with mathematics must, to a greater or less extent, modify the conclusions to which it would lead us.

II. It would be impossible to trace in detail the consequences which appear to follow from this way of considering the subject. They may be classed under two heads, the choice of subjects, and the choice of methods. With respect to the former, my impression has long been that a good deal might be omitted which now enters into our course of reading, not only without impairing its utility, but with positive advantage. A more rigorous subordination of details to fundamental principles would not only save the Student's time, but would make the principles themselves be more clearly apprehended. Everything received into our course ought to justify its admission there, either by its own importance or by its connection with something more valuable than itself. Mere exercises of industry and ingenuity, long numerical calculations, complicated processes of algebraical reduction, tricks of transformation for the evaluation of integrals and the solution of differential equations, and the like, may all be accounted comparatively useless. These things may be impressed on the memory but will hardly long remain there, and meanwhile are felt to be rather a burden than an acquisition. So in mixed mathematics,—many of the approximate formulæ in optics, the less important astronomical corrections, detailed descriptions of philosophical instruments, &c., might all be advantageously laid aside. Not that these things are not worth knowing, but that they do not properly belong to such a course of mathematics as we are considering—in which the chief end proposed is a clear insight into fundamental principles. In general it may be said that formulæ of approximation are unsuited to the end we have in view; they give little or nothing on which the mind can rest: their value resides in the practical application which is to be made of them, but which the Student never makes. It is the predominance of approximate results which renders the Lunar and Planetary theories unsatisfactory portions of the Student's course. They are, however, by no means to be omitted or curtailed, and with respect to the latter, the evil might be lessened, though not without some inconvenience, by giving more prominence so the general theory of the variation of parameters as we find it in the Mécanique Analytique and in some of Poisson's memoirs. Sir W. Hamilton's essays in the Philosophical Transactions, and those of Jacobi in Crelle's Journal, might, perhaps, give some additional materials for the formation of a course of study on this part of natural philosophy.

III. Secondly, as to the choice of methods, and especially as to the preference to be given to geometry or to analysis. Ever since the introduction of the modern analysis into University reading, there have been complaints of its having superseded the older methods and traditions of the Cambridge system. Those who favoured its progress affirmed, and most truly, that by its aid the Student advances faster, and goes farther, than he could do without it; he gains in fact more knowledge of the subjects set before him. But this argument had little weight with those who held that not the knowledge but the process of acquiring it—the training and discipline of the mind was the thing chiefly to be thought of.

It has been said that if information merely is the end in view, mathematics have less claim on our attention than many other things, and that most of the arguments in their favour cease to be applicable if geometry is discarded or disparaged. Of late these views seem to have gained ground in the University: their influence may be traced in the recent legislation on the subject of mathematical honours. The principle on which this re-action against the newer methods is chiefly based, namely that the mind of the Student ought to be as much as possible conversant with fundamental conceptions is, I think, perfectly correct. But it does not follow that analytical methods ought to be discouraged. Demonstrations may be geometrical, and yet in a high degree artificial; and first principles may be lost sight of in a maze of triangles, no less

R. L. Ellis, Esq., M.A.

The Course of Mathematical Studies.

than in a maze of equations. Though in mathematical investigations there is no royal road, yet there is a natural one, that namely which enables the Student, as far as possible, to grasp the natural relations which exist among the objects of his contemplation. If this route be followed, it matters but little whether the reasoning be expressed by one set or kind of symbols or by another—in plain words—in short hand—or algebraically. To change the notation is merely to translate from one language into another.

It is common to find persons in Cambridge and elsewhere who insist upon it that geometry is geometry, and analysis analysis; but it may be doubted whether this notion of an absolute separation between the two things is not the result of a want of familiarity with either. It seems to be supposed that if a mathematician treats a problem geometrically, he has to think about it for himself, whereas if he treats it symbolically, the symbols think for him. Perhaps it may be said that the fact of there being any tendency towards so childish a notion is in itself evidence of the mischief produced by the use of symbols; and certainly if symbols were never used, the notion could not exist. But neither could it exist if they were rightly used and rightly understood. The phrases which I believe may now and then be heard from some of our younger analysts, such as "the irrefragable x," and "putting it into the mill," for expressing the conditions of a problem symbolically, show perhaps that those who use them have but a half understanding of what they are doing. But this evil is not to be remedied by discouraging the use of symbols. That our methods should be geometrical is not by any means essential; they ought to be natural, and it has been too hastily supposed that they will necessarily be so if symbols are excluded: whereas it is not by precise adherence to any particular mode of expression that we are to bring the Student to a familiar apprehension of the principles of what he is engaged on. This is to be accomplished rather by a "mélange heureux de synthèse et d'analyse," to use the words of a great master in the art of which he speaks, than by imposing either on Teacher or Students any unnecessary restraints. Let us consider the question more generally. When the conditions of a problem have been stated, the solution may be evolved from them by innumerable sets of combinations. It does not often occur that even a practised mathematician divines the simplest and the best. His choice among the routes which he may follow is determined by an infinity of circumstances, and more especially by the way in which the conditions have been expressed. "Words shoot back on the understanding of the wisest," and so do symbols; and if the conditions of the problem, whether geometrical or mechanical, or, if we will, logical, are expressed by means of algebraical symbols, he will, in all probability, not deal with them as he would have done had they been expressed in common language: the reason of which is, that the combinations and inferences which are the most obvious when one mode of expression is employed, cease to be so when it is replaced by another. Hence and from other causes arises a variety of forms of demonstration, often, it is true, perplexing, and yet, if attentively considered, full of instruction. For as to a mind which has attained to a perfect mastery of the subject, and by which, therefore, the connection of the data of the problem, with its solution is perceived as by intuition, all the demonstrations appear to be in their essence identical,—different modes merely of presenting the same conceptions,—so contrariwise the comparison of the different demonstrations by which a given result has been established, tends to make us recognise the grounds of their essential unity. It is not by merely fixing in the memory the successive steps of a single mode of demonstration, or even by studying several, if we allow them to remain in the mind as distinct and heterogeneous processes of thought, that we are to acquire a complete insight into the subject in hand, but by a more discursive method, —by inquiring perpetually into the grounds and reason of what we are doing,—by interpreting our symbols and following the train of geometrical or physical conceptions to which their interpretation leads, and again by retracing our steps and passing from general considerations or purely geometrical reasoning to the technical language of symbols. Every change of form should be suggestive of a new aspect of the subject, and it is thus that the simplest way of considering it is to be discovered.

In confirmation of some of the opinions which I have been endeavouring to express, I may refer to Poinsot's admirable tract on the motion of a rigid body. He has there shown, with great felicity both of thought and of expression, that the art of combining symbols is by no means the whole of mathematical analysis;—that we must join to it the art of interpretation, and that in many cases the essence and meaning of a result are scarcely more obvious in the equations which express it than in the original "mise en équation."

It did not belong to his purpose to point out that on the other hand geometrical are not necessarily natural methods of demonstration; but that there is a real distinction cannot, I think, be questioned. If it were not so,—if the Student felt that by studying a subject geometrically he acquired more real insight into it than he could else have got, geometry would be more popular in the University than it now is. In truth, the difficulty of remembering many geometrical demonstrations is in itself a proof of their artificial character; for that which the mind has once completely grasped it does not easily forget. What we want is the introduction of a freer and more liberal method,* and especially the abandonment of the notion that anything is gained by a rigorous separation of geometry and analysis. It is this which for the most part makes our geometry pedantic, and many of our analytical text books dry and sterile. If

* What may be called the new geometry seems to be little studied in the University; yet the method of which it makes so much use, namely, the generation and transformation of figures by ideal motion, is more natural and philosophical than the (so to speak) rigid geometry to which our attention has been confined. It has been well said that the differential calculus is the symbolical expression of the law of continuity, and probably the principles of the calculus would be better understood if notions connected with this law were introduced at an earlier period of our course. See, on the impossibility of severing our conceptions of space from those of time and motion, Trendelenburg's *Logische Untersuchungen.*

R. L. Ellis, Esq., M.A.

it be asked how such a change could be brought about, I am inclined to think it could only result from a change in the opinions of those on whom the character of our studies chiefly depends,—the Professors, Tutors, and Examiners. It could hardly be made the subject of direct legislation.

The Course of Mathematical Studies.

IV. The same remark would apply to the subject more especially suggested by the seventh query, namely, the proper limits of an undergraduate course of mathematics. In every branch of mathematics there are parts which from their abstruseness ought not to be introduced into the degree examination; but it would be found difficult to trace any precise and permanent line of demarcation by which these might be separated from the rest. In the progress of every science its methods tend to become simpler; and to refer especially to one of the subjects mentioned in the query, namely, Electricity, I may remind the Commissioners of the great simplification which the theory of induced electricity has recently received. Professor William Thomson's theory of electrical images has made, so to speak, elementary, problems which previously required a "very refined and laborious analysis." This theory, if electricity is to be studied at all, would now almost of necessity form a portion of the undergraduate course. It is, however, sometimes doubted whether not only electricity but also the cognate theories of heat, light, and magnetism ought not to be excluded from the degree examination. I confess to being unwilling that the Terminus of our mathematical studies should be made to recede, and am disposed to believe that with the changes suggested in the earlier part of these remarks, sufficient time would be found for these subjects to be, up to a certain point, satisfactorily studied. They now engage so much of the attention of scientific men that it seems particularly desirable that the highest class of Students should leave the University in a condition to follow their progress and development. A young man will not willingly forget what he learned at Cambridge if he finds that it enables him to understand the discoveries and researches which are now going on; on the contrary, he will probably always retain, at least, an interest in scientific matters. This advantage would in many cases, perhaps in most, be lost if the subjects in question were not studied until after the B.A. degree. Few even of our best Students could then be induced to devote themselves to fresh mathematical studies, notwithstanding the influence of any system of prizes either for mere proficiency or for original research. Of all such prizes* it may, I think, be said that they could not be made to form a natural element of the system of University education.

I do by no means deny, or even doubt of, their utility; but we must remember that a University may be considered in two points of view,—as a seat of learning and as a place of education. Much may be done by means of prizes to encourage learned men in the pursuit of the kind of knowledge to which they have especially dedicated themselves; but as things are, and perhaps as they ought to be, even a liberal education must end about the age at which the Bachelor's degree is commonly taken. And it may further be affirmed, with much show of reason, that those whom after that epoch circumstances still permit "inter silvas Academi quærere verum," may with advantage, so far as the symmetrical development of the mind is concerned, turn from mathematical to other studies.

V. With respect to the subjects mentioned in the seventh query, I have already made some remarks on the lunar and planetary theories, as well as on electricity and the kindred branches of physics. There remain, therefore, only the calculus of variations and definite and elliptic integrals. Of these subjects the first seems not unsuited for University reading. It involves important principles and admits of important applications. From its connection with the theory of conditions of integrability it forms a natural sequel to the integral calculus; and, on the other hand, if the planetary theory were to be studied in the manner which I have suggested, some previous acquaintance with its principles would be indispensable. In favour of definite integrals there is not so much to be said, many of them depending for their evaluation on particular artifices, which must uselessly burden the Student's memory; and if in an examination he attempts to determine the value of one with which he is not already acquainted, he will often only waste time and ingenuity to no purpose. Still certain definite integrals must be known, and the theory of definite integrals of periodic functions is especially important from its connection with Fourier's theorem and the development of discontinuous functions. The difficulties of this theory have I think been sufficiently removed to justify its introduction into our course; and it is not to be forgotten that no other step in the recent progress of analysis has exercised so great an influence on mathematical physics. The general theory of elliptic integrals is too extensive and too abstruse for University reading, and the study of isolated propositions almost useless. But Abel's theorem ought to be studied as the natural development of the theory of symmetrical functions, nor is there any difficulty in the demonstration by which an intelligent student can be embarrassed. Likewise Abel's method for the division of the complete elliptic function might with advantage replace Gauss's solution of the binomial equation. It includes this solution as a particular case, and from its generality is far more intelligible: Boscovich's doctrine, that the more generally a subject is considered the more easily is it understood, being for the most part true. These instances, in which portions of the theory of the comparison of transcendents serve to complete and illustrate the theory of equations, tend to show that a course of mathematical study cannot well be made to adhere precisely to any definite classification of the different branches of mathematics.

Number of Problems.

VI. One of the obstacles which hinder our mathematical studies from being quite what they ought to be is touched on in the tenth query. It is there asked whether the number of problems proposed in the Senate House examination is not, regard being had to the time allowed for solving them, greater than it should be. It may be answered that it is necessary to set

* The remark does not apply to the Smith's Prizes, the examination for these Prizes being in effect a kind of sequel to the degree examination, and, therefore, not requiring a distinct course of reading.

R. L. Ellis, Esq., M.A.

before the candidates for high honours more problems than any one is supposed capable of solving in the given time, in order by the variety of subjects to provide sufficient employment for each, and at the same time to leave a certain freedom of choice ; and, further, that if no more problems were proposed than the ablest questionists might be presumed capable of solving, the number would still be too great for those of inferior ability. All this is true, and it is therefore much less easy to point out a remedy than to perceive the evils which result from the present state of things, not only in the problem papers but throughout the examination. He who for a season can remember a great deal, and who while he remembers it can reproduce it rapidly and well, generally attains to more honour than he quite deserves; and though the undue influence of mere memory is somewhat diminished by papers consisting of original problems, yet at any rate the Student is trained to be quick and ready rather than wise and thoughtful. In devising problems it is difficult to avoid mere puzzles—things to be solved only by some happy guess; and if on the other hand, examiners were to confine themselves to tolerably obvious deductions from known propositions, the problem papers would cease to be a counterpoise to the rest of the examination. If the candidates for high honours were, as in the Smith's prize examination, examined apart from the rest, it might be possible, so far as they were concerned, to diminish these difficulties by varying the modes of examination. In a select examination there could be no excessive inconvenience in giving almost unlimited time for the consideration of the questions proposed, and in these questions the candidate might be required to state accurately, and in detail, the grounds of his views on fundamental principles in analysis, geometry, or physics. Again, in such an examination books might perhaps be introduced, and if so, interesting questions might be proposed of a kind now inadmissible ; to mention one class only—the candidate might be required to form an opinion on any controverted point, to examine for instance the correctness of Sir James Ivory's doctrine, that in certain cases the ordinary condition of fluid equilibrium is insufficient, and to state his reasons for adopting or rejecting it.

It must, however, be remembered that after all possible improvements the complaint that schools "lack profoundness and dwell too much on seeming," will always be more or less just. A course of study, of which the most obvious purpose is to prepare the student for an ἐπίδειξις, can never be quite what a course of study ought to be, and might be made if higher ends could always be kept in view.

Rev. T. Gaskin, M.A.

Answers from the Rev. T. Gaskin, M.A., late Fellow and Tutor of Jesus College.

1. What is the mode followed by the University for ascertaining the proficiency in Mathematics of Students who are candidates for the Degree of B.A.? Have any, and what changes, taken place of late years in the nature, order, and duration of the examination for this purpose, and what has been the general character, design, and tendency of such changes?

Mathematical Studies.

1. A complete answer to this question will be found in the Report of the Board of Mathematical Studies for 1849, pp. 5 to 8. I have been a member of the Board since its institution. The Report will be found in the Appendix attached hereto, and is marked A.

2. Are the examinations in Mathematics at present more or less searching and severe than heretofore? Do they embrace a wider range of subjects, and those subjects less elementary than formerly?

Examinations.

2. The book-work questions are more searching. Very little accession of new matter has taken place in the last 10 years, during which the character of the examination, with respect to the subjects it includes, may be asserted to be nearly stationary. About 1831 various subjects were introduced, for example, the Planetary Theory, and the Undulatory Theory of Light, with questions occasionally proposed in Analytical Hydrodynamics, Definite Integrals, La Place's co-efficients, and, sparingly, in the Mathematical Theories of Electricity, Magnetism, and Heat. The present tendency is to reduce the range of subjects, and by the regulations which came into operation in January 1848, one part of the examination is entirely elementary, and made essential for a place in the List of Honours. The first three days are assigned to the elementary, and the last five to the higher parts of Mathematics.

Is there a tendency in this direction still observable in the questions and problems that are proposed?

There is no tendency either to extend the number of subjects or to make them less elementary.

3. What amount of mathematical knowledge is required for a common Degree?

Amount of Mathematical knowledge required for a Common Degree.

3. The Mathematical subjects are:—

1. Arithmetic, simple Algebraical operations, a few propositions in Ratio and Proportions; Simple Equations, or simple questions producing such Equations.
2. Euclid, Book I., II., III., and six propositions of Book VI.
3. Twenty-three elementary propositions in Mechanics, and 23 elementary propositions in Hydrostatics, with simple examples arising immediately out of the propositions.

The paper proposed on Arithmetic and Algebra consists of about 10 questions in Arithmetic and six in Algebra. In these subjects Students are generally found extremely deficient, and the Examiners are obliged to be satisfied with less than one-third of the paper, otherwise they would be reduced to the necessity of refusing degrees to a large proportion of the Can-

didates. The time allowed is three hours, but the paper may in general be solved by Students well prepared in two hours. With regard to the questions in Hydrostatics and Mechanics, about three-eighths of the whole is generally required, but in the great majority of instances there is little evidence that the principles are understood. With regard to Euclid, the answers to the propositions are in general written out correctly, although very few answers are given to the deductions from the propositions. About three-eighths of this paper is also required for a degree. *Rev. T. Gaskin, M.A.*

What is the minimum of knowledge, as nearly as it can be ascertained, that is required for a place in the Tripos ?

Six papers are proposed to Candidates for a place in the List of Honours. The subjects are :—

1. Euclid and Conics.
2. Arithmetic, Algebra, and Plane Trigonometry.
3. Elementary Statics and Dynamics.
4. Elementary parts of Hydrostatics and elementary parts of Optics.
5. Newton, Sections I., II., III., and elementary parts of Astronomy.
6. Problems in all the preceding.

Problems have but little influence upon the lowest places on the Tripos, and an average of about one-third of the first five papers will generally secure a place thereon.

Has there been a tendency of late years, both in one case and the other, to raise the standard of qualification ? Tendency to raise the standard of qualification.

The Moderators and Examiners of late years have been anxious to do so, both for honours and the ordinary degree, but, in consequence of a regulation by which classical honours were restricted to those whose names appeared in the List of Mathematical Honours, the Moderators and Examiners not unfrequently extended the List of Honours beyond its proper limits, in order to include some who were likely to distinguish themselves if they might have an opportunity of becoming Candidates for Classical honours. The restriction being now done away, it is to be hoped that there will in future be fewer Candidates for honours, and that the Moderators and Examiners will still further raise the standard. Also by a grace of the Senate which came into operation last Easter, the elementary rules of Arithmetic, and the first two Books of Euclid, are required in the previous examination ; and as the natural consequence is to increase the proficiency of the Students at the examination for degrees, I am not without hope that this regulation will enable the Examiners to make the Mathematical standard for the ordinary degree less discreditable.

4. What is the average proportion of Students to the total number taking Degrees ? Is this proportion greater or less than before, comparing decennial periods ? Average proportion of Students to the number taking Degrees.

Year.	Total B.A. Degrees.	Number taking Honours.	Ordinary Degrees.	In Gulf.
1801	119	43	69	7
1811	129	43	78	8
1821	212	50	152	10
1831	327	85	233	9
1841	309	106	194	9
1851	337	116	198	23

Formerly all persons admitted into the Senate-house as Candidates for honours were entitled to a degree, but if thought unworthy of an honour, they were thrown into the gulf, that is to say, their degree was allowed, but their position was neither in the honours nor the poll.

What proportion of candidates for Honours fail in attaining them, and what proportion of all the candidates for Degrees are rejected ?

Of the six years mentioned in the foregoing table, 1851 is the only one in which a record has been kept of the practice of rejecting Candidates for honours, and in that year there were eight Candidates for honours so rejected, and 23 were sent down into the gulf, the effect of which now is to exclude them from an honour but to give a certificate of approbation for an ordinary degree so far as the Mathematical part of the examination is concerned. In order, however, to obtain a degree, it will be necessary for the Candidates who have obtained such Certificates to be approved in all the subjects of the ordinary degree with the exception of the mathematical ones. The average of the total number rejected for the last 14 years is about one Candidate out of seven. In 1851, the number rejected was 54, in 1841 it was 47.

5. Are (1) the mode of examination at present followed, (2) the nature of the questions proposed, (3) the mode of proposing them, (4) the way in which the answers are required to be given, and the time allowed for giving them, the best calculated, in your opinion, to bring into evidence, the more or less full possession of the several subjects by the candidates ? If not, state what you consider their defects, and the remedies you would propose.

5. Yes, with one exception. (3.) In order to obtain a surer test of the real acquaintance of the Candidates with the subjects of the reading, examples and deductions are attached to many Examinations, &c.

Rev. T. Gaskin, M.A.

of the propositions from books. The prevailing tendency is, in my opinion, to make these examples and deductions too difficult. The examples ought to be of the most simple kind, to show whether the Student can apply the formulæ or results he has obtained to a particular case. In many instances, the solution of the example requires considerable ingenuity even when the proposition to which it is attached is perfectly understood.

6. In what manner does the recently-appointed Syndicate of Studies act, or propose to act, on the course of University reading?

The Syndicate of Studies.

6. The Board consult together on all matters relating to the state of the mathematical studies and examinations, and also to the course of reading.

What is their authority in effecting changes in the mode, direction, or severity of the examination?

They have no such authority; but they lay annually before the Vice-Chancellor a Report, in which they recommend such alterations as they may consider desirable. In certain cases they recommend that the Vice-Chancellor be requested to offer to the Senate a Grace for making such alterations as they may think essentially necessary.

Have they already effected any such changes?

Two Graces have already been passed upon the recommendation of the Board; and in the Reports of 1849 (attached hereto in the Appendix, and marked A), and 1850 (attached hereto in the Appendix, and marked B), many recommendations were made with regard to the subjects of the examination, *e. g.*, that some should be omitted altogether, and others shortened. (See Appendix B., pp. 9, 10.)

7. Would you be disposed to recommend the limitation of some of the subjects included in the present range of the examinations; for instance, to omit such propositions and applications of the Calculus of Variations, of the Theories of Definite and Elliptic Integrals, of the Planetary and Lunar Theories, of the Theories of Heat, Electricity, and Magnetism, of the Undulatory Theory of Light, as require for their treatment a very refined and laborious analysis?

Limitation of Subjects.

7. By the recommendation of the Board, in the Report of 1850, the subject of Elliptic Integrals is altogether omitted, and it is recommended that the questions proposed in the Lunar and Planetary Theories be confined within such limits as not to require for their treatment a refined or a laborious analysis. (See Appendix B., p. 10.) By a recommendation of the Board in the Report for 1849, the theories of Electricity, Magnetism, and Heat are not to be proposed as subjects of the examination. (See Appendix A., p. 7.) The questions proposed in the Calculus of Variations, which have fallen under my observation, do not in general require for their treatment any refined or laborious analysis, and I should be unwilling to recommend any alteration with regard to that subject. With respect to the Undulatory Theory of Light, the propositions relating to "interference" may be read with advantage, and will in general excite in the Student sufficient interest to induce him to pursue the subject at his leisure. The Mathematical Theory of Double Refraction is imperfect and unsatisfactory, and I am of opinion that before the Degree of B.A., the Student's attention should be confined to the practical and interesting results of experiment.

Might such higher mode of treating such subjects be advantageously reserved for examination for special prizes at periods subsequent to the Degree of B.A.?

The higher mode of treatment might be advantageously reserved.

Would not the concentration of the attention of Students upon a smaller number of subjects, and those restricted within narrower limits, tend to increase the accuracy and raise the character of their knowledge, and to bring their instruction more completely within the grasp of the public and recognized teaching of the University?

The subjects embraced in the course, since the recommendation of the Board in 1850, do not appear to me too extensive or too numerous, and I should be inclined to recommend but little alteration.

8. What are the usual English or foreign elementary books which are used in the University?

Books used in the University.

8. *Euclid*, (Potts' edition with Geometrical Exercises).

Elementary Course of Mathematics.—Goodwin.
Algebra.—Peacock, Hind, Wood (Lund's edition), De Morgan.
Trigonometry.—Hymers, Hind, Snowball.
Geometrical Conics.—Whewell, Hustler.
Theory of Equations.—Hymers, Stevenson.
Co-ordinate Geometry.—O'Brien, Hymers, Salmon, Walton's Examples.
Differential and Integral Calculus.—Moigno, Navier, Miller, Hind, Hemming, O'Brien, Hall, Hymers, De Morgan, Peacock's Examples, Gregory's Examples.
Newton.—Secs. I., II., III., Whewell; Secs. I., II., III., IX., XI., Evans.
Theory of Gravitation.—Airy.
Statics and Dynamics.—Poisson, Whewell, Earnshaw, Pratt, Griffin, Walton's Examples.
Hydrostatics.—Miller, Webster, Walton's Examples.
Geometrical Optics.—Griffin.
Plane Astronomy.—Herschel's Outlines, Grant, Hymers.
Differential Equations and Finite Differences.—Hymers, Herschel's Examples.
Solid Geometry.—Hymers, Gregory.
Physical Astronomy.—O'Brien's Tracts, Airy's Tracts.
Undulatory Theory of Light.—Lloyd, Airy, Moigno.

Do they comprise a course of Mathematics sufficiently comprehensive and continuous, and sufficiently on a level with the present state of knowledge, to qualify Students for the examinations, or do they require to be completed by manuscript compilations? *Rev. T. Gaskin, M.A.*

I am of opinion that the books referred to do comprise a course both comprehensive and continuous, and that they do not require to be completed by MSS.

Are such MSS., containing collections of problems, or teaching short processes, or superseding printed books, very generally used? What objections, in your opinion, may be made to their use?

I am not aware that such MSS. are in general use, but if they are they will doubtless be drawn out by able men for the benefit of their Pupils. These Pupils may distinguish themselves, and in course of time be called upon to take part in the examinations; then, their course of study imparting a tone to the examination, the Pupils of the Tutor who compiled such MSS. would, in all probability, have great advantage over those Students who had not had the benefit of his advice.

9. Is it your opinion, or the contrary, that the course of mathematical study, as determined by the University examinations, is tending to become more and more exclusively analytical and symbolic? If so, do you think that it has passed the beneficial limit? Do you consider it a fact, or the contrary, that the present system of reading tends to fix the attention unduly upon the dextrous use of symbols, to the neglect of natural relations in the application of Mathematics to physical subjects?

Tendency of the course of Mathematical studies.

9. The course of study will mainly depend upon the class of questions proposed in the University examinations. From 1832 to 1847 the tendency was to become more and more symbolic and analytical. Within that period, pure geometrical reasoning was altogether abandoned, and the attention of the Students, by the questions proposed, was unduly fixed upon the dexterous use of symbols, to the neglect of natural relations in the application of Mathematics to physical subjects. I have always endeavoured to confine the Students to analytical operations upon real quantities, and whenever I have been apprehensive that an attempt might be made to answer a question proposed by purely symbolic operations, I have restricted the question to the Calculus of Generating Functions, upon which the theory of symbolic operations, in my opinion, altogether depends. The regulations which came into operation in 1848 effectually checked this tendency, and I do not think any alteration in the kind of question desirable.

Problems.

10. Is it your opinion, or the contrary, that the problems proposed in the examinations bear too large a proportion to the questions derived, either immediately or by a very simple deduction, from the books which are commonly read?

10. It is not my opinion.

Are they, for the most part, so proposed as to admit of their being readily apprehended, and their solution effected by a Student who thoroughly understands the principles and applications of the branches of Mathematics upon which they depend, or are they not unfrequently involved in such a form as to require for their solution a peculiar tact, distinct from accurate and philosophical knowledge?

It has always been my endeavour to propose the problems in such a form that they might be readily apprehended by a Student who thoroughly understands the principles and applications of the branches of Mathematics upon which they depend. I have avoided the introduction of any unusual analysis or difficult philosophical principle, except in cases where I have tried to lead the Student to it by the enunciation of the problem. It cannot, however, be denied that I have met with many problems proposed in different years which display great ingenuity, and would embarrass any one who has not an opportunity of devoting to them much more time and thought than can be allowed in the limited hours of the examination.

Are you not disposed to think the number of problems proposed to be solved in the time allowed (as many generally as seven or eight in one hour of time) is greater than the best prepared Student can be expected to complete?

The number of problems proposed is often much greater than the best prepared Student can complete in the time allowed; but in an examination where the number examined is so great I have observed several instances in which talents of different kinds have been drawn out by the variety of the problems, and where no opportunity would have been afforded to the Student of showing his power, except by the choice which has been given in the selection of the problems suited to his capacity. It is, therefore, undesirable that the number of problems should be materially reduced. As a general rule, I have found, upon the average, that more problems are solved when there is a greater choice.

Examinations for Honours.

11. What is the course usually followed by Students in preparing themselves for the examinations for Honours?

They attend College lectures on different subjects, all the Students on the same year being classed together under their College Tutor. The greater part also attend a Private Tutor, who explains all difficulties which his Pupils may meet with in their reading, and proposes examples and problems for exercises.

Is not the assistance of a Private Tutor, with very rare exceptions, considered as indispensable?

Yes.

Private Tuition.

Are not many of the Private Tutors men of great eminence, who devote themselves to the private instruction of the Students as a professional pursuit?

Yes. Many of the most eminent men in the University are Private Tutors.

Can you suggest any change of this system, by which the labours of this important body of Teachers might be rendered more generally useful to the Students, without increasing unduly the expenses of academical education?

The members of different Colleges might be sub-divided into a greater number of classes,

Rev. T. Gaskin, M.A.

and Private Tutors might assist in lecturing such classes. The general expenses of the Undergraduates might in this manner be reduced. At present, men of very different capacities are classed together, and the lectures of the Tutor are, in a great measure, useless to the majority. In Trinity College, for instance, there will perhaps be 150 men of the same year divided among three Tutors, making 50 in each class. To all of these 50, the same lecture will be addressed, and it is impossible for the College Tutor to adapt it to the various capacities of his hearers. I would suggest that the College Tutors should procure the assistance of those gentlemen who now officiate as Private Tutors, and sub-divide their Pupils into different classes, so that the members of each class may be nearly equal in capacity. The remuneration to be awarded to the Private Tutors for such assistance is a subject for mature consideration, and could only be settled after some practical experience of the working of the system and the advantages to be derived from it.

12. What inducements does the University hold out for the continuance of mathematical study, or the retention of knowledge, after attaining the Degree of B.A.?

Prizes.

12. Till the introduction of the Adam's Prize, none, except the chance of obtaining lectureships under the public Tutors.

Would the deferring the examination for Smith's Prize to a later period (say one or two years) operate as such an inducement?

The competition for the Smith's Prize each year is in general confined to three or four of the highest men of that year. I do not think that a delay in the examination would operate as any inducement for the continuance of mathematical study, but much benefit might be derived by converting it into a prize for some essay on pure mathematics or natural philosophy, similar to the Adam's Prize.

What is the nature of the recently-instituted Adams' Prize, and what influence may it be expected to exercise in this respect?

The Adam's Prize is awarded every two years to the author of the best essay on some subject of pure mathematics, astronomy, or some other branch of natural philosophy, and will be likely to draw forth great talent, which would otherwise have remained unknown.

Would not the institution of similar prizes for the best essays, or examinations on particular branches of Mathematics and Natural Philosophy (such as the examination for the B.A. Degree can very imperfectly touch upon) materially contribute to the continued and progressive study of these subjects?

Undoubtedly.

13. Are there any other suggestions which you are disposed to make for increasing the efficiency of the public teaching of the University?

Remarks.

13. I am unable to make any suggestions which bear directly upon the public teaching of the University, but take the liberty of offering a few remarks upon two prevailing customs. 1. With regard to mathematical honours, great importance is attached to the difference of a single place among the High Wranglers, both in and out of the University, and particularly in the smaller Colleges where the prospects of a candidate for honours may materially depend upon a single place. In order to determine the relative merits of the candidates for mathematical honours, a certain number of marks, according to an arrangement of the Examiners before the commencement of the examination is affixed to each question, and within my own experience a difference of less than one and a quarter per cent. in the total number of marks has made a difference between the first and second Wranglers. A difference of less than one-half per cent. has been sufficient to make a separation of two places among the first ten, and less than one and a half per cent. has made a difference of three places among the first twelve Wranglers. I have always felt considerable doubts about the justice of making a distinction where the relative merits of the candidates were so nearly equal; and I think that the difficulty might be removed either by retaining the order as at present from the absolute number of marks, and at the same time bracketting those who are nearly equal, or by affixing a scale of marks to the List of Honours.

Private Examinations.

2. With regard to the candidates for ordinary degrees: many of these put off their preparation to a late period. In consequence of a change of habits, unusual application and anxiety for the result, the health becomes impaired, and applications are made for private examinations. In such cases the Examiners, besides the inconvenience to which they are subjected by the additional labour, are afraid of increasing the illness by too long or too severe an examination. In consequence also of strong medical representations, the Examiners are sometimes induced to allow men to pass the examination against their better judgment. In each of the two public examinations for ordinary degrees in which I have been concerned, applications for private examinations have been made by men with whose friends I was personally acquainted, and I felt it my duty to entrust their cases entirely to the other Examiners. There is always another examination before Ash Wednesday, which seldom happens more than a month after the general examination, and often considerably earlier. In my opinion it would be a great benefit to the University if the practice of allowing private examinations, which is liable to much abuse, was altogether discontinued.

(Signed) THOMAS GASKIN,
Late Fellow and Tutor of Jesus College, Cambridge.

Appendix A.

APPENDIX A.

Report of the Board of Mathematical Studies, 1849.

St. Peter's College Lodge, May 19, 1849.

The Vice-Chancellor begs leave to publish to the University the following Report, in accordance with the Regulation D adopted by the Senate October 31st, 1848.

Rev. T. Gaskin, M.A.

Report of the Board of Mathematical Studies, 1849.

The Board of Mathematical Studies beg leave to lay before the Vice-Chancellor the following Report:—

With the view of carrying out the intention of the University in appointing a Board of Mathematical Studies, the present members commenced their duties by making regulations for holding meetings and conducting the discussion of the questions that might require their consideration, and for keeping minutes of their proceedings to serve as an authentic record for future reference. The existing state of the Mathematical Studies of the University has been the subject of mutual communications and discussions, which have resulted in their agreeing upon certain recommendations which will be found in the latter part of this Report.

I. The Board conceive that the objects intended to be secured by an Annual Report on the state of our Mathematical Studies may be promoted, and a basis formed for future suggestions, by bringing under review in this first Report, (1) the changes that have been made from time to time by Graces of the Senate in the regulations for conducting the Mathematical Examinations; (2) the progressive steps by which new modes of treating the subjects of examination, and new subjects, have been introduced into the course of mathematical study.

(1). In 1808 the examination of the Candidates for Honours commenced on the first Monday in the Lent Term; three days were devoted to mathematics; and the candidates having been arranged in Brackets according to the result of the examinations on those days, the order of their merit was finally determined by examinations of the Brackets on the following Friday. Each candidate was examined 18 hours in the course of the three days, of which 11 hours were employed in answering questions from books, and the remaining 7 in the solution of problems. The number of candidates that obtained Honours in that year was 38. In 1828, when the number had increased to 90, the examination commenced on the Friday preceding the first Monday in the Lent Term, and extended over four days, exclusive of the day of examining the Brackets; the total number of hours of examination was 23, and the time assigned to problems remained the same as in 1808. By regulations which took effect in January 1833, the commencement of the examination was placed a day earlier, the duration was five days, and the hours of examination on each day were $5\frac{1}{2}$. Thus $4\frac{1}{2}$ hours were added to the whole time of examination, 4 of which were appropriated to the answering of questions from books, and the remaining half hour to the solution of problems. The successful candidates in that year amounted to 105. In 1835 the number was 117, and the examination, for the convenience of the examiners, began on the Wednesday of the same week, without alteration in other respects. In January 1839, there were six days of examination, beginning on the Monday preceding the first Monday in the Lent Term, and the total number of hours of examination was 33, of which $8\frac{1}{2}$ were given to problems. The first day of examination was altered in 1841 to the Wednesday week preceding the first Monday in the Lent Term. The number on the List of Honours in 1840 was 146.

Of the alterations relating to the classification of the candidates, and the mode of proposing the questions, the following are those of chief importance. Previous to January 1828, the candidates were divided into six classes, determined by the exercises in the Schools; different printed problems and *vivâ voce* questions were proposed to different classes, generally taken two together, and the only questions proposed to all in common were the Evening Problems. In the year above named, important regulations, confirmed by Grace of the Senate, November 13th, 1827, came into operation. The classes were reduced to four, determined as before by the exercises in the Schools. On the first two days all the candidates had the same questions proposed to them, inclusive of the Evening Problems; and the examination from books on those days excluded the higher and more difficult parts of mathematics, with the view of securing an object which, in the opinion of the Syndicate on whose recommendation these regulations were adopted, was highly desirable, viz., "That the Candidates for Honours may not be induced to pursue the more abstruse and profound mathematics to the neglect of more elementary knowledge." Accordingly, on the first day (Friday), the questions from books extended to such parts of pure Mathematics and Natural Philosophy as do not require the Differential Calculus, and on the Saturday were added parts of Natural Philosophy somewhat more advanced, and the simpler applications of the Calculus. On Monday, the first and second classes were examined together, and the third and fourth together, in questions from books and in Problems; and on Tuesday, the second and third were examined together, and the first and fourth separately, in questions from books. The questions which had previously been given out *vivâ voce* were printed, in order to make generally known the questions proposed in each year, and, by thus directing the reading of the students, to produce more fixity and definiteness in the mathematical studies of the University. The printed papers also afforded the opportunity of ascertaining by inspection that the examination embraced in due proportion all the ordinary subjects of mathematical study. No change was made in the substance of the examination; the questions inserted in the papers being, like those which had been proposed *vivâ voce*, propositions contained in the mathematical works commonly in use in the University, or simple examples and explanations of such propositions. For the purpose of preventing those who had attended to a part only of the subjects from having any undue advantage by this mode of conducting the examination, it was especially recommended that "there be not contained in any paper more questions than students well prepared have been generally found able to answer within the time allowed for such paper." At the same time a discretionary power was given to the examiners of proposing additional questions *vivâ voce*, if any candidate should before the end of the time have answered all the questions in the paper. This power, however, was not continued in the regulations of 1833, nor in any subsequent regulations. With this exception, the preceding regulations may be said to have determined the principles on which in the main the examinations have been since conducted; and for this reason it has been thought right to insert them at some length in this Report.

By regulations which came into force in January, 1833, the same questions were proposed to all the classes during the first four days. The order of difficulty of the questions on the first three days was the same as it had previously been on the first two days; but on the fourth day the examination extended to subjects of greater difficulty, care, however, being taken to insert into the papers some questions suitable to the lower classes. On the fifth day the examination was conducted according to classes.

In January, 1839, the division into classes was discontinued, and the same questions were proposed throughout the examination to all whom the Moderators judged from the public exercises in the Schools to be qualified for examination as candidates for Mathematical Honours. The order of difficulty of the questions was regulated nearly as before, questions selected exclusively from the higher parts of the subjects being proposed only on the sixth day of the examination.

Rev. T. Gaskin, M.A.

Appendix A.

Report of the Board of Mathematical Studies, 1849.

The most recent alterations came into force in January 1848. As these are of an important character, and the Board may be expected to give some account of their operation in the last two examinations, it will be necessary to state the regulations in some detail. The examination commences on the first Thursday after the first day of January. Questions and Problems are proposed to the candidates on eight days, instead of six as formerly, the first three days being assigned to the elementary, and the last five to the higher parts of mathematics. After the first three days there is an interval of eight days, and on the seventh of these days the Moderators and Examiners declare what persons have so acquitted themselves as to deserve Mathematical Honours. Those who have so acquitted themselves, and no others, are admitted to the examination in the higher parts of mathematics, and after the examination the Moderators and Examiners, taking into account the examination of all the eight days, arrange those who have been declared to deserve Mathematical Honours in the order of merit in the usual manner. The three classes of Wranglers, Senior Optimes, and Junior Optimes, are published on the Friday morning preceding the general B.A. admission, and no provision is made for any further examination corresponding to the examination of the Brackets, which formed part of the previous scheme, but had in practice been discontinued for several years. A principal feature in the new scheme is the limitation by a Schedule of the subjects and parts of subjects of examination in the first three days, and of the manner in which the questions are to be answered. The subjects are, the portions of Euclid usually read; Arithmetic; parts of Algebra, embracing the Binomial Theorem and the Principles of Logarithms; Plane Trigonometry, so far as to include the solution of Triangles; Conic Sections, treated geometrically; the elementary parts of Statics and Dynamics, treated without the Differential Calculus; the First three Sections of Newton, the Propositions to be proved in Newton's manner; the elementary parts of Hydrostatics, without the Differential Calculus; the simpler propositions of Optics, treated geometrically; the parts of Astronomy required for the explanation of the more simple phenomena, without calculation. In all these subjects, examples and questions arising directly out of the propositions are introduced into the Papers in addition to the propositions themselves. Easy problems in all the subjects are also proposed in a separate Paper. The order of the examination in the remaining five days differs in no important respect from that of the last five days under the former arrangement. The hours of examination in the first three days amount to 17, inclusive of 3 hours for the Problem Paper, and in the last five days to 27½, inclusive of 9 hours for the Problem Papers. The number of candidates that obtained Honours in 1848 was 135.

With respect to the general effect of the alterations which have now been enumerated, it may be asserted from present experience, that the discontinuance of classes has facilitated the determination of the relative merits of the candidates; and that the publication of all the questions proposed has secured the introduction of a due proportion of all the subjects into each year's examination. The Board has had the opportunity of consulting a careful abstract of the number of questions in each subject in the examinations of ten years, from 1833 to 1842, from which it appears that during that interval, the subjects were proposed very nearly in the same proportions, and this practice, they have reason to say, has been adhered to since. It has, however, been found necessary to guard against the effect of proposing the same questions to all the candidates, which was apprehended by the framers of the regulations of November 13th, 1827, viz., its holding out an inducement to read the higher, to the neglect of the more elementary subjects; and it was partly with the view of correcting this tendency that the regulations which came into operation in 1848 were adopted. With reference to this point, the Board has the satisfaction of reporting, on the authority of the Moderators and Examiners of 1848 and 1849, that generally the candidates who acquitted themselves best on the first three days of examination were also the most successful in the remainder; and that it never happened that those who acquired little credit in the first part of the examination attained eventually to a high place on the Tripos.

(2). No precise information, excepting so much as may be gathered from the published Problem Papers, can be obtained respecting the questions proposed to the candidates for Honours before 1828, when the practice of printing all the questions commenced. The character of the questions appears to have been determined by a few standard original works, and by the English elementary treatises in common use, which, though admirable as models of sound reasoning, certainly fell behind the progress of Mathematics on the Continent. The Principles of Analytical Calculation, published by Professor Woodhouse in 1803, and his Plane and Spherical Trigonomery published in 1809, are the earliest indications of the introduction of more of the *analytical* element into the Mathematics of the University; but the most decided impulse in that direction was given by the translation of the Differential and Integral Calculus of Lacroix by Herschel, Peacock, and Babbage, in 1817, followed by Peacock's Examples to the Differential and Integral Calculus, and Herschel's to the Calculus of Finite Differences in 1820. The symbol of differentiation, first used in an Examination Paper in 1817, had already in 1819 superseded the symbol of the Fluxional Calculus. A like impulse as to the extent and character of the questions proposed in Natural Philosophy, was given by the publication of Whewell's Mechanics (1819), Whewell's Dynamics (1823), Coddington's Optics (1823), and Woodhouse's Plane Astronomy (1821–1823). The first edition of Airy's Tracts was published in 1826, containing the Lunar Theory, the Figure of the Earth, Precession and Nutation, and the Calculus of Variations. All these subjects soon found their way into the Examination Papers. Woodhouse's Physical Astronomy, and his Treatise on Isoperimetrical Problems had already appeared, but not being composed in a form adapted to the University system of examinations, these works had not made a general impression. Analytical Geometry, which had only been read in French treatises by the more advanced Students, gained a decided footing after the publication of Hamilton's Analytical Geometry (1826), and Hymer's Analytical Geometry of Three Dimensions (1830), and now holds a prominent place in the examinations. Mr. Airy, on being appointed Lucasian Professor in 1826, commenced a course of Lectures in Experimental Philosophy, which he continued as Plumian Professor. These Lectures had the effect of raising in a very important degree the standard of information among our Students, and exciting their interest in classes of phenomena till then little known in the University. In 1830 Professor Airy began the practice (now fully established) of publishing the questions proposed to the Candidates for Dr. Smith's Mathematical Prizes. In several instances, new classes of questions introduced for the first time into the Smith's Prize Examination, were shortly after admitted into the Examinations of the Candidates for Honours. Peacock's Treatise on Algebra (1830) had the effect of directing the attention of the Students to the Principles of Symbolic Calculation. The second edition of Airy's Tracts was published in 1831, containing, in addition to the matter in that of 1826, the Planetary Theory, and the Undulatory Theory of Light, the latter of which had already been experimentally

exemplified in his Lectures. From that time questions in each of those subjects appear in the papers in considerable numbers. About the same time, and more recently, there appear questions in Analytical Hydrodynamics, Definite Integrals, Laplace's Coefficients, and, sparingly, in the Mathematical Theories of Electricity, Magnetism, and Heat. Very little accession of new matter has taken place in the last ten years, during which the character of the examination, with respect to the subjects it includes, may be asserted to be nearly stationary.

In taking the foregoing retrospect, it is satisfactory to remark, that the more important innovations in the subjects of examination and in the modes of treating them, receive a kind of sanction by having originated in works written by members of our body whose names are closely connected with the scientific reputation of the country. The responsibility of introducing the alterations rested with the Moderators and Examiners, no regulations having been provided by the University to which they could refer for authority or guidance; and there is reason to say that the uncertainty as to the subjects the examinations would embrace, and the want of due notice of any extension being given to them, have been felt as a serious inconvenience by the higher class of Students. Generally, however, the introduction of each new subject was preceded by the publication of a treatise on the subject by a Cambridge Mathematician, in which the Propositions were enunciated and proved in a manner suitable to the established system of examination. It is unnecessary to enumerate here the various treatises that have now come into use: suffice it to say that, on the different branches of Pure Mathematics and Natural Philosophy which constitute the present Mathematical course, there is a considerable number of English works which are well adapted to convey exact knowledge of the subjects, and at the same time to facilitate the preparation of the Students for the Examinations.

II. Respecting the Lectures of the Mathematical Professors, it may be sufficient to state the following particulars. The Lectures begun by Professor Airy twenty-three years ago, embraced Mechanics, Hydrostatics, and Pneumatics, Geometrical Optics, and the Theory of Light. Lectures on the last four subjects have been continued by the present Plumian Professor, since 1837, at which time the Lowndean Professor also began courses of Lectures alternately on Astronomy and Geometry. In 1843, the Plumian Professor added Practical Astronomy to his other subjects, the Lowndean Professor having discontinued his Astronomical Lectures. The Lectures of the Plumian Professor have had the disadvantage of being given at a time when increasing activity in Astronomical Science demanded extraordinary attention to the duties of the Observatory. They have, however, been attended by a class varying from twenty to thirty, consisting chiefly of the more advanced Students. Since 1838 the Jacksonian Professor has given annually a course of Lectures on Mechanism, and in the present year he has added to these a series of experimental and illustrative Lectures on Mechanics, more immediately bearing on the reading of the Students who are preparing for Honours.

It will appear from the foregoing statement that, in order to give increased efficiency to the Lectures of the Mathematical Professors, it is desirable that the subjects should be more equally distributed among the different Professors. These Lectures cannot, however, be expected under any arrangement to supersede other channels of instruction; and it may be doubted whether Professorial Lectures on Pure Mathematics are ever likely to form an effective part of the general system. The case is different with the branches of Natural Philosophy, the importance of experimental and illustrative Lectures on which, as supplementary to the other modes of instruction, cannot be too much insisted upon; not only on account of the greater distinctness of conception which is acquired by visible representation of what is read in books, but because such Lectures can hardly fail to increase the Student's interest in what he reads, and add to his stock of information, and because they afford the opportunity of leading him on to the practical bearings and applications of the subjects of his study. The circumstance of our being able to collect in this University an audience consisting of Students who, by previous training, are qualified to understand and appreciate experimental Lectures on Mathematical subjects, is an advantage by no means to be lost sight of. With respect to any direct means of securing a correspondence between the Lectures of the Professors and the Mathematical Examinations, it is conceived that the publication of a Syllabus, or Outline of the Lectures, accompanied by descriptions of the experimental arrangements, and by Mathematical proofs of propositions immediately connected with the facts exemplified, may materially conduce to this end.

III. To the foregoing review of the past and existing state of the Mathematical Studies of the University, the Board beg leave to add the following recommendations:—

(1). Taking into consideration the great number of subjects which now occupy the attention of the Candidates, and the doubt which exists as to the range of subjects from which questions may be proposed, the Board recommend that the Mathematical Theories of Electricity, Magnetism, and Heat, be not admitted as subjects of examination.

(2). It has appeared from statements in the former part of this Report, that while the total number of hours of examination has gradually been increased, the time allotted to the solution of Problems has not been altered in the same proportion.* As this arrangement, which could hardly be avoided on account of the large addition to the number of subjects, had the effect of inducing the Candidates to neglect examples and problems, it seemed highly desirable to counteract this tendency. Partly with this view, and partly to obtain a surer test of the acquaintance of the Candidates with the subjects of their reading, examples and deductions have been attached to many of the propositions from books.

* The following Table exhibits in one view the principal changes in the regulations for conducting the examination which have been mentioned in the course of the Report, together with the average proportion, in the successive intervals over which the changes extended, of the number of candidates that obtained honours, to the whole number of questionists admitted to the B.A. degree.

Interval.	Number of Days of Examination.	Number of Hours of Examination.	Hours allotted to Propositions from Books (B).	Hours allotted to Problems (P).	$\frac{P}{P+B}$	Number per cent. of Questionists that obtained Honours.
1808—1827	3	18	11	7	·39	27·8
1828—1832	4	23	16	7	·30	28·3
1833—1838	5	27½	20	7½	·27	38·0
1839—1847	6	33	24½	8½	·26	36·9
1848	8	44½	32½	12	·27	40·3

Rev. T. Gaskin, M.A.

Appendix A.

Report of the Board of Mathematical Studies, 1849.

The Board, however, having had before them an analysis of the answers to the questions proposed in 1846, 1847, 1848, and 1849, find that the number of answers to the examples and deductions has fallen below the amount which it is desirable to secure. They are of opinion that such a result may in a great measure be prevented by diminishing the number of questions, and they have agreed to recommend, that the Papers containing the questions from books be shortened, in order to enable the Candidates to give more time to Examples and Deductions.

(3). Some uncertainty having been expressed as to the kind of answers the Candidates are allowed to give to questions in Optics on the first three days of examination, the Board feel called upon to state, that they understand the term "geometrically" in the Schedule, to mean in a strictly geometrical manner, such, for instance, as that employed in Wood's Optics. At the same time, taking into consideration that the attention of the Candidates to geometrical reasoning is sufficiently secured by other subjects of examination on the first three days, they are of opinion, that with reference to Optics, the restriction "geometrically" may with advantage be omitted, and that the questions should be so framed as not necessarily to require any particular kind of demonstration. They, therefore, suggest that it would be desirable to offer to the Senate a Grace for omitting the words "treated geometrically" in the Schedule.

May 17, 1849.

The Vice-Chancellor gives Notice, That a Grace will be offered to the Senate at the Congregation on the 23rd instant, to omit the words "treated geometrically" (so far as they relate to Optics) in the Schedule which constitutes the third clause of the Regulations for the Examination of Questionists who are Candidates for Honours, approved by Grace of the Senate, May 13, 1846.

Appendix B.

Report of the Board of Mathematical Studies, 1850.

APPENDIX B.

Christ's College Lodge, June 3, 1850.

The Vice-Chancellor begs leave to publish to the University the following Report, in accordance with the Regulation D, adopted by the Senate, October 31, 1848.

The Board of Mathematical Studies beg leave to lay before the Vice-Chancellor the following Report:—

1. In order to acquire precise information respecting the actual working of the Examination for Mathematical Honours, the Board requested the Moderators to prepare a Report of the last examination, and to suggest any changes or improvements which they might judge desirable. The Moderators accordingly presented to the Board a Report, in which they state that "In accordance with the expressed wishes of the Board, the papers in the earlier part of the examination were shortened, so as in no case to consist of more than fourteen questions. The Moderators and Examiners consider that a further curtailment is practicable and desirable, as the small number of solutions of examples and applications of book-work still presents itself as a prominent defect."

Another subject suggested for the consideration of the Moderators was the great inconvenience arising from the short time allowed for examining the papers of the first three days of examination. On this point they conclude that for many reasons "it appears better not to interfere with the integrity of the examination as at present conducted. The desired relief may be obtained by placing the commencement of the examination two or three days earlier, or by transplanting it into the Michaelmas Term. The former alteration offers the advantage of being easily made without disturbance of existing arrangements, while the latter would probably be found to open several large questions, which the Moderators think they are not called on to discuss."

In accordance wish the foregoing suggestions, the Board recommend that the papers of the first three days be still further shortened.

They also suggest that it would be desirable to offer to the Senate a Grace, to the effect that the first part of the examination commence two days earlier than at present.

2. The Board, having had under review the course of mathematical reading at present usually adopted in the University, are of opinion that there are some portions of the very numerous subjects presented to the Candidates for Mathematical Honours, which may with advantage be omitted altogether, and others which, although necessary to be included in the course of reading, are unfit to be produced in an examination, such as

(1.) Investigations which are not of much interest, or which relate to methods that have now become obsolete.

(2.) Investigations which are imperfect, or unsatisfactory, or involve questions about which mathematicians are not sufficiently agreed.

(3.) Investigations which lead to long analytical processes.

Investigations of the last class are frequently of great importance, and it is in some cases essential to a complete mastery of the subject that they should be gone through at leisure by the students. It does not, however, appear desirable to induce students to spend much time in rendering themselves so familiar with particular algebraical calculations as to make sure of being ready, when called upon, to write them down with rapidity. Such an inducement, it is conceived, would be held out by requiring these investigations to be produced in the limited time allotted to an examination paper. The Board are of opinion that the time thus spent would be much better employed in working examples and problems calculated to elucidate the principles of the several subjects, and in thinking over the elementary principles themselves, in order, by regarding them in different points of view, to acquire a thorough mastery over them.

With respect to particular subjects, the Board make the following recommendations:—

Theory of Equations.—There are not many propositions in the Theory of Equations, which it seems necessary to notice, as being too long or laborious to be produced at an examination: methods of solving equations approximately, such as Newton's or Horner's, as being of great practical utility, may be specially recommended to the attention of the Students.

The proof of the theorem that equations with rational coefficients are always resolvable into simple or quadratic factors may be simply read to be understood, but not to be produced in examination.

The same may be said respecting Lagrange's investigation of the dimensions of his reducing equation, upon an assumed form of the root. The results however may be assumed in their application to the Theory of the Solutions of Cubic and Biquadratic Equations, as well as of Binomial Equations, whose dimensions are prime numbers of the form $2^n + 1$.

Integral Calculus.—The subject of Elliptic Functions may very well be omitted.

Laplace's Coefficients.—This subject may be omitted altogether.

Hydrostatics.—In this subject the theory of Capillary Attraction may be omitted.

Hydrodynamics.—It seems advisable to confine this subject to the formation of the general equations; the calculation of the velocity of discharge of a liquid or gas through a small orifice, according to the theory of steady motion; the theory of long waves; and the theory of sound.

Common Optics.—It is undesirable that questions in this subject should be proposed to the Candidates, which require the investigation of second approximations to be written out in the examination.

Plane Astronomy.—There is no subject in which a student more requires precise direction both with respect to what he should read and what he should omit than in Astronomy; for it embraces a vast variety of propositions and methods, which vary from time to time, not merely from the progress of mathematical knowledge, and the changes of form which it assumes, but still more from improvements in the instruments and modes of observation, and from the new objects to which they are applied. We find many quantities which in one age have been altogether overlooked or included in the wide margin of instrumental and other errors, becoming in another the most important objects of research: such are the orbital movements of systems of double stars, the parallax of some of the fixed stars, the movement of the solar system, and other results of increased nicety of observation and greater instrumental power, which have become the foundation of the largest views which have hitherto been taken in Astronomy.

The following are some suggestions with respect to what it would be expedient to avoid or notice in future examinations in Astronomy.

Corrections for precession, nutation, aberration, and parallax, in the reduction of observations, and in the calculation and prediction of phænomena, such as eclipses, occultations, transits, &c., should be applied to right ascension and declination, not to longitude and latitude, in conformity with the practice now universally adopted. The method of the *nonagesimal* (Woodhouse, page 741) is now altogether abandoned. The most improved form of the corrections for precession, nutation, and aberration, is that which involves the use of the variable coefficients A, B, C, D, and of their constant multipliers a, b, c, d, as given in the Introduction to the Tabulæ Regiomontanæ of Bessel. (Dr. Hymer's Elements of the Theory of Astronomy, Art. 303.)

All propositions should be omitted (unless treated as problem only) which have no bearing upon the determination of important elements in Astronomy, or the real business of observation, except such as are recommended by the possession of some peculiar interest in the history of the science. This principle would exclude the equation of the aberratic curve, and the problem of shortest twilight; it would not exclude Flamsteed's method of finding the Sun's right ascension.

The same principle would exclude the mathematical investigation relating to kinds of observation which have been practically abandoned, such as Lacaille's method of finding the longitude of the perihelion (Hymers, Art. 309).

No propositions should be reduced to formulæ when not sufficiently rigorous to give accurate determinations, unless such formulæ are used merely for the purpose of explaining the general principles of a method, or the necessity for adopting some modification of it in practice.

This principle would apply to the determination of the parallax of a planet by observing absolutely its zenith distances at different points of the same meridian, without the intervention of reference to a star.

All investigations should be carried to extreme accuracy, when required for frequent and very important determinations in Astronomy, and when not of a nature to press very severely upon the memory of a student. Thus the formulæ for the moon's parallax and for the changes of her diameter produced by it, which are required in some of the most delicate observations in Astronomy, and which are of frequent occurrence, should be thoroughly mastered. The complete solution of the problem for determining the orbit of a planet or comet in the absence of a previous knowledge of some of its elements, appears to be too complicated and of too great length to be produced in examination.

Lunar Theory.—It is recommended that questions in the Lunar Theory be confined to—

(1.) The formation of the general equations, and explanation of the method of approximation.

(2.) Calculations of the effects of particular parts of the disturbing forces which produce terms in the expressions for the radius vector, longitude, and latitude, of the second order of small quantities.

(3.) Explanations of terms in the expressions for the radius vector, longitude, and latitude.

Planetary Theory.—It is recommended that questions in this subject be confined to—

(1.) The formation of the equations of motion.

(2.) Calculations of the perturbations of radius vector and longitude, with the consideration of the terms in the expression for the disturbing force which produce the most remarkable inequalities.

(3.) Explanation of the method of the variation of parameters, as applicable to the Planetary Theory.

(4.) Calculations of the variations of the elements.

(5.) Properties of the secular inequalities, avoiding operose processes which depend on the expansion of the disturbing function.

By these recommendations respecting the Lunar and Planetary Theories it is not intended to discourage the introduction of miscellaneous questions of general interest.

Theory of the Earth's Figure.—Questions in the Theory of Attraction, and of the figure of the Earth considered as homogeneous, may be proposed with advantage.

The Theory of the Figure of the Earth considered as heterogeneous may be omitted.

Light.—Inasmuch as the dynamical part of the theory of light, such as it came from the hands of

Rev. T. Gaskin, M.A.

Appendix B.

Report of the Board of Mathematical Studies, 1850.

Fresnel, is confessedly altogether imperfect, it is recommended that students pay particular attention to the experimental verification of the results to which Fresnel was led from dynamical considerations.

In concluding these recommendations, the Board wish to express their belief that they have in the great majority of instances only given a definite form to that which has for some years past been the practice in the University Examinations. They trust, therefore, that their Report will not have the effect of introducing any violent change into the existing system of mathematical study; but they hope, that even in those cases in which they have proposed no important omissions, they will have done some service to the Candidates for Mathematical Honours, by giving increased definiteness to their course of reading, and by putting before them such results as they might possibly have themselves deduced from the study of the Senate House papers of the last few years.

Rev. H. Goodwin, M.A.

Answers from the Rev. H. Goodwin, M.A., late Fellow of Gonville and Caius College.

Gentlemen, *Cambridge, January 7*, 1851.

I have had the honour of receiving a series of Thirteen Questions, respecting the present condition of the Teaching and Examinations in the University of Cambridge; and although my name appeared amongst the list of those who remonstrated against the appointment of the Commission, still I believe that under existing circumstances I shall serve the interests of the University best by endeavouring to return satisfactory replies to the queries which you have propounded.

Mathematical Examinations.

1. The Mathematical Examinations are conducted entirely by means of papers of printed Questions. The Examination for "Honours" extends over eight days, the first three of which are employed in Elementary Mathematics, the last five in the Higher. The gradual process by which the Examination has assumed this form is described at length in the First Report of the "Board of Mathematical Studies," a document which is doubtless in the hands of the Commission. I can add nothing to what is contained in that Report.

The Examination of those not Candidates for Honours differs only in degree of difficulty and extent from the other, but in these respects almost infinitely.

2. I am disposed to think that there has on the whole been an improvement in the Examinations of late years: they are certainly more *severe*, and I think also more *searching*, there being a perceptible effort to set questions in such fashion as shall encourage *real* and not superficial knowledge. The range of subjects has undoubtedly become wide; this has been almost necessarily the result of two causes—(1), new subjects have been treated Mathematically, or the Mathematical treatment has become more satisfactory: *e. g.* Mr. Airy's tract on the Wave Theory of Light has rendered that subject a part of the standard University Course—and (2) the improvement and simplification of pure Mathematics has rendered difficult subjects more generally accessible. For the *last few years*, however, there has been a tendency to restrict rather than extend the range of subjects, and this restriction has become more recognised in some particulars by reason of the recommendations contained in the *last Report* of the Board of Mathematical Studies. I may observe that the Board of Mathematical Studies may be regarded as the best safeguard which the University can have against the prevalence of any mischievous tendency in the Examinations.

Subjects required for a Common Degree;

3. Arithmetic; Four Books of Euclid; a *very little* Algebra; Mechanics and Hydrostatics. The last two, from my own experience as an Examiner, I should describe as *almost nominal*, and the Algebra generally very unsatisfactory: the *Euclid* is really the useful part of this course.

For Honours.

It is difficult to describe the *minimum* of knowledge necessary for a degree with Honours, but I should say that a *fair* knowledge of the subjects required on the first three days of the Examination, as given, for instance, in my "Course of Mathematics," would ensure success: a *good* knowledge, but not first-rate, will carry a man to the higher part of the Junior Optimes.

Raising the Standard for Ordinary Degrees.

With regard to raising the standard, (1) for ordinary degress, there has been an *attempt* to do so, and it is perhaps thought that the standard has been raised: I have not sufficient experience to decide the point, but my impression is that the standard has not been raised, nor do I think that it can be: for bearing in mind the difficulties which abstruse subjects present to many men whom we should be most sorry to exclude from an academical degree, I think that it is impossible to make the standard anything but very low: *Euclid* is capitally done, and as I have said before, this seems to me to be the real strength of the Mathematical ordinary Examination.

(2) For Honours—the standard is now made more *definite*, but I think not higher. The connexion between the Mathematical and Classical Tripos has been an effectual bar to the raising of the standard.

4. I have no data for an accurate answer to this question. Of late years I think that the proportion of degrees with Honour to the ordinary has been something like three to five. The proportion has, I believe, been increasing.

Rev. H. Goodwin., M.A.

Mathematical Examinations.

In my own experience the number of rejected Candidates for Honours has been from three to six; besides these there have been perhaps a dozen whose degrees have been *allowed* without Honour. In the Ordinary Degree Examination, I think as many as twenty or thirty, and sometimes more are rejected in the January Examination, where the number of Candidates is about 200: in *by-term* Examinations the proportion of those rejected is very much larger. It very seldom happens, however, that a man fails ultimately in obtaining a degree.

Opinion respecting the present Examinations.

5. I am disposed to regard the present system of examination as being as nearly perfect as a *paper* examination can be. And so far as the object of a Mathematical course is to give men an accurate knowledge of the present state of science, and to fit them to pursue science for themselves, I do not know that any improvement could be made; but looking upon our Mathematical course as a preparation for practical life, and especially as a means of acquiring those habits of mind which are likely to lead to success in the House of Commons and at the Bar, I feel some regret at the entire omission of the old Academical School Exercises; and I cannot but deem that the re-introduction of such exercise under a modified form would be an improvement upon our present method of awarding Mathematical honours. On this subject I take the liberty of putting into the hands of the Commission a pamphlet published by me some years back.

Board of Studies.

6. The authority of the "Board of Studies" is merely recommendatory, but those recommendations which they have hitherto made have been well received, and there seems no reason to doubt but that (with due discretion on their part) their reports will have all the influence which they can desire. Having myself been a member of the Board from its first appointment, it does not become me to speak its praise, but I think I am not wrong in saying that it has justified the expectations of the Senate.

7. The subject of this question is treated of in the last Report of the "Board of Studies." I am disposed to think that the recommendations of that Report go as far in this direction as is desirable.

Books in use.

8. I am quite unable to give a complete catalogue of books; it is continually varying, I think it is quite possible to find satisfactory books on all subjects; with regard to many, the character of the books has of late been much improved.

No manuscript compilation can be said to be necessary for a Student, because it is an almost invariable rule with the Examiners not to set a question, the answer to which cannot be found in some recognized book. But manuscript instruction is very generally used, as I believe, for another reason, viz., that it is found practically to be the best mode of conveying knowledge. I do not think the method is in any way abused: it may have been abused years ago, and a feeling unfavourable to it may have arisen in the minds of our senior members on that account, but I think it is not so now. Of course I speak of MSS. not as superseding printed books, but as used in conjunction with them.

Tendency of the present Examinations.

9. I think that there may be such dangers as are hinted at in this question; but I think they are such as have attracted the attention of all influential members of the University, and are likely to be watched; more especially any probable mischief in this direction would come under the notice of the "Board of Studies." The addition of three days' examination in the Elementary Mathematical subjects, as a preparation for the higher Examination, was partly intended to prevent undue attention to the more symbolical parts of Mathematics before the elementary portions had been well mastered.

Problems.

10. I am disposed to think that the present proportion of problems to the other questions could not be altered with advantage. The character of the problem varies much with the moderator, and is, I think, beyond all legislation; because the problem paper is to a certain extent a picture of its author's mind, and I have several times known instances in which a problem paper has been considered by its author very easy, whereas it has been found quite the contrary; these problems seem to me as much out of the reach of legislation as poems, sermons, or speeches in Parliament. The number of problems proposed is no doubt greater than men can be expected to solve, but it is necessary to suit the tastes of a variety of men, and in the two instances in which I have myself been Moderator, I have had a very large proportion of my problems solved.

Private Tuition.

11. It may unquestionably be said, that the ordinary preparation for the Senate-house is now by means of a Private Tutor. There are a considerable number of men, some of them of high order, who devote themselves to private tuition, but few of them exclusively or with the intention of adopting it as a permanent profession.

I am persuaded that in many instances at present, due attention to College tuition would render private tuition unnecessary; and an increase of the staff of College lecturers might probably render it still more generally so.

I do not venture to make any definite suggestions, but it seems to me that the defect of the present system is the want of a recognized *status* for the private tutor, and an understood relation between him and the Tutor of the College, so that the two might co-operate.

Encouragement of Mathematical Reading.

12. The University has no direct means of encouraging the continuance of Mathematical reading; the "Cambridge Philosophical Society," however, performs an important part in giving a stimulus to original productions, and the inspection of the Transactions of that Society, and also of the volumes of the "Cambridge and Dublin Mathematical Journal," will show that at present the University is far from deficient in men who have pursued Mathematics with success.

The suggested change with regard to the Smith's Prizes might probably be beneficial; nothing can be more inconvenient than the occurrence of the examination for those prizes at a time when the students have been thoroughly wearied by their long exercises in the Senate-

Rev. H. Goodwin, M.A.

house. How far such a change would be *justifiable*, having reference to the terms of the bequest, is another question.

The operation of the Adams Prize has hardly become known at present: I do not know how many exercises were sent in at the late competition, nor the character of the successful essay which is not yet published; but I should be disposed to augur favourably of the working of this prize in future times.

I should be disposed to think that the institution of prizes for the Bachelors of Arts of various years would be beneficial; but with regard to the whole question of the pursuit of Mathematical Science after the time of B. A. degree, it is to be borne in mind that only occasionally is there a man whose devotion to science is likely to be of any great advantage to science itself; and probably even at present very few give up their Mathematical pursuits who could have followed them with any very great advantage. However, the real bar to the pursuit of science seems to me to be one which will not be touched by the institution of prizes, viz., the difficulty which exists in England of a man living (out of College) by means of his scientific pursuits; on this account probably the Bar swallows up so large a proportion of our promising men.

Public Teaching of the University.

13. By the general tone of the questions I conceive that the answer to this question, although put generally, is intended to be limited to the Mathematical or Scientific *public teaching* of the University. The only point to which I think it necessary to advert is this: I think that our condition would be much improved by the better endowment and enforced residence of our professors, and the increase of their number; I am not one of those who think that much is to be gained by using the professorships chiefly as means of elementary instruction and by forced attendance at professorial lectures, but I think that the existence in the midst of us of a body of men whose business it is to advance their respective departments of science, and who, by proper endowments, are enabled to do so, is of the highest importance to our intellectual well-being. As it is, there is scarcely a professorship which in a pecuniary point of view is to be considered a prize: the Plumian Professorship is eked out by the University itself, in consideration of the Professor undertaking the labours of the Observatory, themselves quite sufficient without Professorial duties; and when the Lucasian Professorship was lately vacant, there was only one candidate, and he was regarded by his friends as a martyr for the cause of science. It seems to me that these Professorships should be so endowed as to be an adequate provision for a man of science, and that the increase of their number (with the condition of residence) would tend more than anything else to lead men to look to science as their ultimate pursuit, and to ensure the existence of a body of men in Cambridge who would keep up the character of the University. And if this result were attained, the indirect effect upon the *teaching* of the University would (as I believe) be greater than could be effected in any other way.

I have the honour to be, Gentlemen,
Your obedient servant,
(Signed) HARVEY GOODWIN, M.A.,
Late Fellow and Mathematical Lecturer of Gonville and Caius College.

To the Cambridge University Commission.

Rev. John Hind, M.A.

Answers from the Rev. John Hind, M.A., late Fellow of Sidney College.

Mathematical Examinations.

1. See the "Cambridge Calendar" for the first part of this query.

Great and beneficial changes have been made in the examination during late years, and their general character, design, and tendency have been to render it much more satisfactory and efficient than it was.

2. Perhaps they are somewhat more searching and severe, but they do not embrace a wider range, nor are the subjects less elementary, though the tendency has been to increase the difficulty in their application.

3. See the "Cambridge Calendar" for the first part of this query. There have been in late years many *praiseworthy* endeavours to raise the Mathematical standard of qualification for the *ordinary* degree.

4. I cannot answer this query satisfactorily, because I have not the data requisite for the purpose; but I believe the failures of candidates, both for honours and the ordinary degree, to be more numerous than they used to be.

5. I consider it to be scarcely possible that better plans can be contrived for effecting this purpose.

The Syndicate of Studies.

6. The Syndicate of Studies recently appointed has, no doubt, a most beneficial effect upon the course of University reading. The improvements already effected through its agency are very considerable.

7. The subjects of Heat, Electricity, and Magnetism have been left out by the Syndicate of Studies, and I should not feel disposed further to curtail the extent of subjects as applied to the examination of the *best* candidates in each year.

Limitation of Subjects.

Perhaps these very abstruse parts of Mathematical science might be advantageously deferred to a later period, more particularly as I am fully aware that the lower subjects are treated in an imperfect and slovenly manner by some persons who obtain high Mathematical honours.

Books in use.

8. Few Foreign works at the present day are the text books of the University, because every-

thing of value found in them has been transferred to the recent English works, so as to render the course of Mathematics sufficiently comprehensive and continuous. *Rev. John Hind, M.A.*

I have a great objection to *manuscripts*, except such as are almost entirely devoted to the solutions of examples and applications of the several subjects; but I believe that *manuscripts* are extensively used, though not so much so as formerly.

9. Till of late years the tendency of the examination to become more analytical was decidedly on the increase, but I am glad to think that it has now received a salutary check, and is little or nothing beyond its beneficial limit. The purely analytical system had the tendency mentioned in the last paragraph of this query.

10. I am of opinion that the problems are not too numerous. Perhaps they are generally a little too difficult, but their number being not too small is a great advantage, as the experience of former times clearly proved to me. Problems.

11. The assistance of a private Tutor, with rare exceptions, is considered indispensable.

The private Tutors are men of great eminence, and many of them devote themselves to the instruction of Students as a professional pursuit. Private Tuition.

I should think that the approval of the Syndicate of Studies and of the Tutors of the Colleges might be of benefit to the system in a great number of cases, without at all increasing the expenses of academical education.

12. Little or no inducement is held out for the continuance of Mathematical study by the University after attaining the degree of B.A. Inducements to study Mathematics after the B.A. degree.

It might be better on this account to defer the examination for the Smith's Prize, and the institution of similar prizes would, no doubt, have a material tendency to keep up and extend Mathematical studies.

13. I have a very decided opinion that the proficiency in Mathematical science required for the ordinary degree is too small, and that it is fast becoming less than what is considered requisite in other collegiate and academical institutions, with some of which I have had occasional connexion as an Examiner. This is a point on which I would desire to lay particular stress, as I see how it affects the education of Students previously to coming into residence at the University. Proficiency in Mathematical Science required for the ordinary Degree.

In consequence of *severe domestic afflictions*, I have not been able to answer the queries so early as I could have wished; and if the answers be not considered sufficiently full and explicit, I shall be happy to appear before the Committee with the design of giving further elucidations of my views on each of the queries proposed.

(Signed) JOHN HIND, M.A., F.C.P.S., F.R.A.S.,
Late Fellow and Tutor of Sidney-Sussex College, Cambridge.

Cambridge, December 13, 1851.

Answers from William Hopkins, Esq., M.A., President of the Geological Society. *W. Hopkins, Esq., M.A.*

Question I.

I CONCEIVE it to be unnecessary for me to enter into any detailed account either of the formal mode followed by the University for ascertaining the proficiency in Mathematics of Candidates for the Degree of B.A., or of the formal changes which have taken place in the examinations since the year 1827. The Commissioners will doubtless have received such information from other sources. I shall only dwell on such points so far as may be necessary to enable me to answer fully the question—what has been the general character, design, and tendency of the changes which have taken place?

The first of these changes was sanctioned by a Grace of the Senate, Nov. 13, 1827. Previously to this period a great increase had taken place in the number of Candidates for Mathematical honours, and important extensions in the range of our Mathematical Studies were then beginning to take place, principally through the immediate influence of the Lectures given by the present Astronomer Royal as Lucasian Professor, and by the publication of his Mathematical Tracts. For both these reasons—the increased number of Candidates, and their more extended reading—it became absolutely necessary to lengthen the duration of the Examinations, to which accordingly two days were added. The more immediate object was to allow longer time to the Examiners to look over the answers to the questions proposed, but additional time was also allowed to the Candidates for giving their answers. In the course of the four days, during which the actual examination of the Candidates continued, five hours were added for this purpose. At several subsequent periods the time allotted for the Mathematical examination was increased, till, at the present time, the Candidates are under actual examination during eight days (a week intervening between the first three and last five days), and for five hours or five and a half on each day, whereas formerly the examination continued only four days. The object of these changes has been to allow more adequate opportunity for the Students to develope their knowledge, and sufficient time for the Examiners to form a more critical judgment of their respective merits. I consider these changes as constituting an essential and important improvement in our system of examination, for the conducting of which ample time seems now to be allowed. Changes in the Examinations since 1827.

Another important change was also made by the Grace of the Senate of 1827. Before that period the questions from books had always been proposed to the Candidates *vivâ voce*, the *problems* alone being given in printed papers. It was then ordered that all questions whatever should be given in printed papers. In examinations *vivâ voce* it was necessary that every question should admit of a brief and simple enunciation, such that the meaning might

W. Hopkins, Esq., M.A.

Changes in the Mathematical Examinations since 1827.

easily be caught by the persons examined, whereas the enunciation of written questions may be far more varied, *riders*, or questions intended to elucidate more leading propositions, may be much more easily introduced, and the examination may thus be made more effective and searching than by the former method. It was also contemplated at the time, that these printed questions would form valuable guides (as they undoubtedly have been) for the reading of future Students. This is one of the most important improvements which have been made in our mode of examination.

Previously to 1827, the Candidates for Mathematical honours were arranged, preparatory to their examination, in six classes, which were afterwards, by the Grace of that year, reduced to four. Up to the period just mentioned, the exercises in the schools had been regularly insisted on, and afforded the grounds for this preparatory classification; but afterwards they rapidly declined, in consequence of their having ceased to have sufficient relation to our more advanced system of Mathematical studies, no longer affording therefore adequate means for a correct previous classification of the Candidates. Hitherto the examination of each Class had been in a great degree distinct, and, so long as adequate means of a correct preparatory classification existed, this plan had much to recommend it; but, by a Grace of 1832, it was ordered that for the first four days of the examination (which then comprised five days) the same questions should be proposed to all the Candidates. In 1838 the preparatory classification was finally discontinued. The only purpose for which the exercises in the schools had been latterly maintained no longer then existed, and their entire discontinuance was the immediate consequence of discontinuing the classes, though not directly sanctioned by the Senate. Whether these Exercises might not have been preserved under some modified form which should have brought them into harmony with the rest of our system, is a question on which I may have some remarks to make in the sequel.

Changes in 1848.

The last important modification in our examinations is that which was made in 1848, when the duration of the examination was extended from six to eight days. The principal feature of this measure was the restricting of the examination on the first three days entirely to elementary subjects—those not requiring the aid of the Differential Calculus. When the preparatory classification was entirely discontinued, as already mentioned, one evil was anticipated as the necessary consequence of every candidate being admitted to answer every question proposed, as far as he might be able, instead of the Candidates in each class having, to a certain extent, questions expressly adapted to the more extended or more limited reading of those composing it. Under such circumstances, Students with more ambition than mathematical power, would naturally endeavour to obtain distinction by reading the higher to the comparative neglect of the lower subjects comprised in our mathematical course. It must always be difficult to counteract entirely this evil tendency. One of the most effective modes of doing so I believe to be the plan just mentioned, of limiting the examination during three days out of eight to elementary subjects. This makes the student fully aware of the importance of a due attention to those subjects to ensure his proper place on the tripos—a consideration which, in the young Student, will naturally be often more influential than the conviction of the importance of his cultivating the elementary subjects as the foundation of sound knowledge, or as part of a system of mental culture and discipline. After the first three days and the interval of a week, the last five days are devoted principally to the higher subjects. This I believe to be decidedly the best form which our examinations have ever assumed. Sufficient time seems now to be afforded to the Candidates to bring forth their mathematical knowledge, and ample time to the Examiners to form a correct and critical judgment of their relative merit.

Opinion of those changes.

In the legislation of the last four and twenty years, of which I have now given a brief outline, there is much, in my estimation, entitled to the strongest approbation of those who are interested in the working of our Academic system. Each progressive step has been taken with that deliberation and caution which has obviated the necessity of a single retrograde step. No shock has been given by changes too abrupt, and the entire confidence reposed in the results of our examinations, not only by the older members of the University, but also by the Students themselves, has remained unimpaired.

Moderators and Examiners.

I have not thought it necessary to enter into any statement of the formal manner in which Moderators and Examiners are appointed, but I think it right to say that they are chosen, without exception, from those most highly qualified for the office, as determined by their academic success or other public proofs of their efficiency. The nominations are made in rotation by the different Colleges with great circumspection; and, in fact, if any one of doubtful qualifications were nominated to the office, there are numbers of persons in the University who would feel it to be an imperative duty to *non-placet* the appointment when brought before the Senate. I can myself bear extensive testimony to the accuracy with which the relative merits of the Candidates are determined; and such is the confidence of the Students in the final results of the examinations, that the last cause which the most disappointed Candidate would probably venture to assign for his own failure would be a want of the most perfect impartiality and entire competency on the part of his Examiners.

The result of the examination for Mathematical Honours is given on the Tripos list, where the names of the Candidates are arranged, not alphabetically in a few separate classes, but in the order of individual merit. It is this determination of individual merit that constitutes the nicety and difficulty of our examinations,—a difficulty which could only be overcome by means of the assiduity, the ability, and impartiality which distinguish our Examiners.

Question II.

Examinations.

1. The Mathematical examinations are unquestionably more searching and severe than formerly. This is due in a great degree to the change of which I have already spoken in the

W. Hopkins, Esq., M.A

mode of conducting them,—the proposing of the questions to the Candidates in printed papers instead of *vivâ voce*. Scarcely any formal proposition is now set without some question attached as a *rider*, which may test more thoroughly the real knowledge of the persons examined. This has been a great improvement in the examinations, and its importance has been more distinctly recognized from year to year.

Subjects of Examinations.

2 and 3. The subjects embrace a wider range than formerly. This extension began upwards of 30 years ago by the introduction of the analytical methods of treating mathematical subjects. The works of the late Professor Woodhouse, the translation of Lacroix's Differential Calculus (1816), and Dr. Peacock's Examples in the Differential and Integral Calculus (1820), were highly instrumental in producing this change. Dr. Peacock's excellent work on Algebra (1830) has extended our knowledge of that elementary branch of Mathematics. Dr. Whewell's works introduced a considerable extension of Statics and Dynamics; and the late Mr. Coddington's treatise on Optics (1829) gave us a more complete development of that subject. A little before that time Mr. Airy published the first edition of his Mathematical Tracts. The Lunar Theory had previously been read, according to the method of Newton, as contained in the third volume of the Principia. That laborious method, notwithstanding its great geometrical beauty, was immediately superseded by that of Laplace, as given by Mr. Airy. Recently the work on Solid Geometry, as treated analytically, commenced by the late Mr. Gregory and concluded by Mr. Walton, has extended the subject and added considerably to its interest among our Students by the symmetry and elegance of its formulæ. The extension of all the subjects of our mathematical course, with the exception, perhaps, of Optics and Astronomy, has been aided also by the introduction of the elementary works of the most distinguished of the French Mathematicians.

Limitation of subjects.

These extensions, however, of our mathematical studies must not be taken as a measure of additional labour imposed on the Student, for they have resulted from or been accompanied with increased facilities afforded by new and more powerful methods of mathematical analysis. The introduction of analytical methods, for instance, in the treatment of the problems of the Principia, whatever may be thought of the advantages or disadvantages of the change, has undoubtedly diminished the time and labour required to gain a competent knowledge of them; and a similar remark would apply in a greater or less degree to other subjects. Complicated propositions, too, in every subject, the production of which in examination is rather an exercise of the memory than a test of real knowledge, have been to a great extent rejected by our Examiners, and this rejection has been confirmed and extended recently by the recommendation of the Board of mathematical studies. The subjects of Heat, Electricity, and Magnetism, which had once obtained a partial footing in our examinations, may now also be considered as excluded. The tendency has, undoubtedly, been of late to lessen the more laborious part of the Student's reading. The addition of Physical Optics to our course must be placed in the opposite scale; but this does not seriously affect more, perhaps, than a dozen or fifteen men in each year. Independently of this subject, it is my impression that the time and labour required by our mathematical course have been lessened within the last five and twenty years. It may also be remarked that our Students generally come to the University, as I conceive, much better prepared in Mathematics than formerly. The remark is certainly true as regards that class of Students who read the highest subjects of our course.

Questions III. *and* IV.

These questions may be better answered by persons who have been more immediately and practically engaged than myself in conducting our examinations.

Question V.

Examinations.

1. Our examinations must be considered in two points of view. The first object is, of course, the determination of the absolute or relative merits of the persons examined; the second is to form a standard and guide by which the reading of the Student may be regulated. With reference to the first object, and regarding our examinations merely as a portion of the administrative part of a recognized system, I believe them to be susceptible of little improvement. I have already described the successive amendments which have been made in them, and I have also borne testimony to the ability, care, and impartiality with which they are conducted, as well as to the accuracy with which the relative individual merits of the Candidates for mathematical honours are determined, so far as their merits depend on mathematical knowledge acquired in the course of our present recognized system of studies. In all this I repeat our examinations are excellent.

In one respect, however, they might perhaps be improved. Rather too many questions, I think, are still proposed in each paper. When rapidity is too much an element of success in examination, the Student is too frequently induced to seek for methods which are more recommended by their brevity than by their logical accuracy or philosophical character.

The importance of the second object of our examinations,—that of affording a guide and direction to the studies of the Undergraduate,—is scarcely inferior to that already mentioned, and is enhanced by the peculiar character of our two old Universities, consisting as they do of a number of Colleges, each dispensing independently its own rewards and emoluments, and having its own system of tuition administered almost exclusively by its own members. Our recognized system of tuition is strictly collegiate and not academic, and might be altogether wanting in unity if it were not that our public examinations supply a standard to which all make appeal in much the same though not in an exactly equal degree. Whether those examinations afford tests of the very highest order of merit in mathematical science, and whether they

W. Hopkins, Esq., M.A.

guide the Student to the best and most philosophical views of his subjects, are questions which must always be open to discussion and admit of considerable difference of opinion.

Mathematical Examinations.

2. One peculiar character of our Mathematical examinations consists in their being so extremely *definite*. The questions proposed, almost without exception, admit of such distinct and definite enunciations that a well-prepared Student will know almost exactly where his answers are expected to begin and end, and the precise degree of development required. This has its great advantages, especially in correcting the tendency which is always strong in the great majority of young Students, to rest satisfied with vague and indeterminate knowledge, for such knowledge is of little avail in our examinations. The value of the answer to each question can also be assigned with great accuracy, and the relative merits of the Candidates well compared, according to the test which examination affords. On the other hand, this extreme definiteness precludes the exhibition of that more extensive and matured acquirement which would display itself in an essay on some subject more general than those usually contained in the separate questions as now proposed, or that knowledge which might be drawn forth in the course of an examination *vivâ voce*. Our present system determines with great accuracy the elements of the Candidate's knowledge, but it does not encourage or finally test sufficiently that combination of these elements which constitutes at once the unity and comprehensiveness of his knowledge, and which is the result of his last and highest mental efforts. This, in my estimation, is the defect in the present system of examination.

Vivâ voce Examination recommended.

It is much easier, however, to find faults than to point out practical remedies for them; but it appears to me that the most efficacious mode of correcting the defect above mentioned might be the union of an examination *vivâ voce* with that which is now in operation. The former, taken alone, could not, in my opinion, be comparable with the latter as applied to a class of Students whose abilities and acquirements are so various as they are among our Candidates for mathematical honours; but it might be made the means, undoubtedly, of drawing forth other and in some respects higher qualities in our Students than those encouraged and elicited by written examinations alone. This would show itself more especially in the higher class of Students; and from a long acquaintance with that class I am fully convinced that, however necessary and efficacious written examinations may be in encouraging and testing an adequate acquaintance with mathematical reasonings and processes, and their applications to the solutions of individual problems, examinations *vivâ voce* afford the surest test of that higher intellectual power which enables a man to take comprehensive and philosophical views of mathematical and physical science, and prepares him to grapple with its higher difficulties. I have already stated my confidence in the general determinations of the relative merits of our Candidates, according to our present examinations, and I have no doubt that the results of the two modes of examination of which I am speaking would, when applied to our higher Students, be in accordance with each other in a great majority of instances; at the same time I have been acquainted with a considerable number of cases in which, I have no doubt, these results would have been different; and judging not only from my own impressions at the time, but also from the subsequent careers of the persons alluded to, I believe that in almost every instance the examination *vivâ voce* would have supplied the higher intellectual test.

The defect of which I have been speaking must have been formerly obviated by the exercises in the schools. Their entire discontinuance was not, as I have already intimated, directly authorized by the Senate, but was a consequence of the discontinuance of the preparatory classification of the Candidates under the sanction of the Moderators of the year. This was regretted at the time by many Members of the University; for, though it was allowed by nearly all that these exercises in their existing form had become utterly useless, it was thought that they might possibly have been so modified as to form still a valuable part of our system of examination, and the views of many persons now probably coincide with those I have stated. The practical difficulties of introducing a *vivâ voce* examination for nearly 150 Candidates would, however, be considerable; but still I am convinced that those difficulties would be by no means insuperable if a general opinion should arise in the University in favour of the change.

I profess to offer no practical suggestion on the subject; but I would remark that it would be essential, as I conceive, to the efficiency of the measure that the results of the examination *vivâ voce* should be combined with those of the examination by printed questions, so that the final place of each Candidate on the Tripos should depend on the aggregate marks obtained in both examinations.

Rewards and emoluments.

The distribution of rewards and emoluments in our Colleges, according to the precise order of individual merit as tested by careful public examination (so far as such distribution is possible), is that which gives to our system its great influence and efficiency: it is not to be expected, however, that this active influence should not be attended by some concomitant evil. Thus, while there is drawn forth in a large number of our Students great intellectual effort and much patient and persevering industry, it too frequently happens that their energies are too much directed to those objects which may appear most likely to influence their places in the Tripos, without sufficient regard to the higher purposes of their studies. I do not believe it possible to correct altogether this tendency, so long as the University shall continue to recognise the important and vital principle above mentioned in the award of its honours and emoluments. Many Students, if they believe they can improve their places in the Tripos by a system of *cramming*, will adopt that system in a greater or less degree; and if they cannot obtain the aid of their Tutors, they will still follow the same course in defiance of recommendations to the contrary. The most effectual check on this evil must be found, I think, in the character of our examinations rather than in any particular modes of tuition. I am disposed to believe that examinations *vivâ voce* might be rendered more effective than any other for this purpose

W. Hopkins, Esq., M.A.

and whatever influence might thus be exercised on the tone of our examinations, a corresponding influence would necessarily be exercised on our tuition, both that of the College Lecturer and that of the private Tutor.

Excellence of the present Mathematical Examinations.

Let me not be thought, in making these remarks, to undervalue the excellence of our present examinations and the influence they exercise over our studies. The facility and accuracy with which our Students go through complicated processes of mathematical investigation, and the command they acquire over the ordinary artifices of analysis, are very remarkable and very much facilitate their progress in any higher mathematical researches to which they may afterwards apply themselves. There is also another consequence of our mode of examination, which, in considering our system of studies as one of mental discipline, can hardly be too highly appreciated. The necessity of giving brief and accurate answers to the questions proposed, superinduces the necessity also of a distinct and logical arrangement of the successive steps of a demonstration and the habitual use of condensed and accurate language. The tendency to careless and illogical habits of thought, existing in most undisciplined minds, finds in this system as perfect a correction as the individual character of the Student will admit of. It has often been a matter of great interest with me to watch the gradual development of this exactness of thought and perspicuity of language. The young Student frequently commences his studies here with great defects in these respects; but where there has been sufficient intellectual power and activity, I have never failed to witness a rapid improvement, as the result of our system, from the moment he became sensible of his own deficiency, and (which is equally essential) that it could only be amended by his own persistent efforts, and not merely by the corrections which his Tutors might from time to time suggest to him. The perfect arrangement and style with which many of our higher Students answer the questions proposed to them constitutes one of the most striking results of our system. I could wish to see the same power called forth more effectively on a larger scale,—in the exposition of the more general principles and results of mathematical science as well as in the development of its individual propositions.

Question VI.

The Syndicate of Studies.

Members of the Syndicate of Studies will, I conceive, be the proper persons to answer these questions. Their recommendations, on the whole, have been, in my estimation, extremely judicious; and I consider their general superintendence of our mathematical studies to afford an excellent means of regulating and modifying them from time to time as circumstances may require.

Question VII.

Limitation of subjects.

1. The *Calculus of Variations*, and the theories of *Definite* and *Elliptic Integrals*, are now generally read only so far as to introduce those subjects to the notice of the Student, and to give him a knowledge of their general principles, without taxing him with complicated applications of them. I think it extremely desirable that these branches should not be extended. The two latter especially, whatever may be their intrinsic importance, are very ill-adapted, I think, for all the purposes of a course of academic studies. In the Lunar Theory the investigation of the differential equations of motion, their integration in some simpler cases, and the interpretations of the general results are read; and the same may be said of the *Planetary Theory*. The more complicated parts of each may be considered as being excluded from our examinations. These two subjects do not occupy much time when the Student approaches them properly prepared, and are read, in my opinion, by our higher Students with great benefit. The theories of Heat, Electricity, and Magnetism were never very distinctly recognised in our course; and since the recommendations of the Syndicate of Studies that they should be discontinued, they may be considered as entirely excluded from it. The *Undulating Theory of Light* is read as far as originally given by Fresnel and explained by Mr. Airy in his lectures and treatise on the subject. A few additional geometrical investigations respecting polarized light have been adopted; such, for instance, as Sir W. Hamilton's explanation of conical refraction: but all that more remote dynamical branch of the subject which treats of the vibratory motions of the constituent particles of a medium, and the moticular forces to which such motions are referrible, is entirely excluded from our examinations. I regard this subject, when thus limited, a very valuable one for our higher Students: they read it with great interest, and, I believe, with great advantage. It introduces them to a new class of dynamical ideas. They become familiar with the principles of a beautiful theory, and their views of physical science and of the application of mathematics to its investigations become enlarged by their study of this subject. Physical Astronomy and Physical Optics are the subjects which give to our Students a more elevated conception of our course of mathematical reading than any other; and I have no doubt but that the general principles and conclusions of these two noble branches of science often remain with those who have studied them here when many other results of their mathematical studies have been long obliterated from their remembrance.

2 and 3. I shall unite the answers to these questions with that to the last of the questions (XII.) I wish only to remark here, that I should be strongly opposed to the restriction of our system of studies for the sake of bringing them "within the grasp of the present public and recognized teaching of the University." If we are to preserve the high character of our Mathematics and the intellectual activity of our Students, we must have tuition adequate to their demands for it, and not attempt to reduce the range of their studies for the sake of bringing them within the limits of any imperfect system of teaching.

W. Hopkins, Esq., M.A.

Question VIII.

Books in use at the University.

1. It will not, I imagine, be deemed necessary that I should give a mere list of the titles of the mathematical works in common use in the University. The English works are such as are written, for the most part, expressly for the use of our Students. To these may be added nearly all the best elementary works in the French language, many of which have been written for the use of the Students of the *Ecole Polytechnique* at Paris. I have noticed the great definiteness which characterizes our examinations; a similar character distinguishes our elementary books. Every subject is divided into as many separate propositions, formally enunciated, as it will admit of. Great perspicuity in details is thus secured, but generally at the expense, in a greater or less degree, of a comprehensive exposition of general views and principles. This arrangement contributes to the distinctness of the Student's knowledge in detail, but it renders more difficult the perception of the logical connexion of one part of a subject with another, and impedes, more or less, his general views. Its advantages and disadvantages exactly correspond to those which belong to the extreme definiteness of our examinations, and indicate that mutual action which one part of a system, working with efficiency and vigour, must necessarily exert on another. The character of the French elementary works, usually written by the most eminent mathematicians, is exactly the reverse of our own in the points above mentioned, as is also their system of examination, which, I believe, is entirely *vivâ voce*. It has always appeared to me that something intermediate would be preferable to either of these systems.

2. Our elementary books comprise a course of Mathematics entirely continuous and co-extensive with the subjects in our examinations. They do not, as regards the course they comprise, require to be completed by manuscript compilations.

3. Manuscripts, however, are universally made use of. How far they may be used as superseding books by the lower classes of Students I have but imperfect means of judging; they are certainly not used to any extent in that way by our higher class. Their manuscripts usually contain proofs of particular propositions, somewhat different from those given in ordinary books, examples elucidating the more important propositions furnished by their Lecturer or private Tutor, a general analysis of each subject, &c., with such other hints and memoranda as may afford facilities in preparing the subject for examination.

4. These I regard as legitimate purposes in the use of manuscripts; and when thus employed, and for the purpose of presenting a condensed view of a whole subject and the logical connexion between the different propositions composing it, I think them most valuable and essential aids to the Student, and such as would be naturally and almost necessarily resorted to not merely by the mathematical Student, but by any one wishing to acquire a detailed and accurate knowledge of any difficult and complicated subject. There is always danger, however, that the Student may not limit himself to the legitimate use of manuscripts. Such is the case, I conceive, when they are made chiefly to consist of particular propositions proved by methods which have little but their brevity to recommend them, and which do not flow naturally out of the subject, and do not harmonize with its complete and logical development. Such manuscripts, especially when allowed to supersede continuous treatises on their respective subjects, give a fragmentary character to the Student's acquirements, and become very objectionable.

Question IX.

Tendency of the present course of Mathematical Study.

1. The course of mathematical study in the University is not now becoming more and more exclusively analytical and symbolic. It is not more so than it has been for many years past. On the contrary, the last regulation introduced into our examinations, by which the first three days are restricted to proofs which exclude the Differential Calculus, and which are as far as possible *geometrical*, is a decided step in the opposite direction.

3. The present system of reading, combined with our present system of examining (by which, in fact, it is determined) *does* in my opinion tend to fix the attention too much on the mere use of mathematical symbols, and such I believe must almost necessarily be the case so long as our examinations are conducted exclusively by means of written questions and answers. Examinations *vivâ voce* would probably afford the best correction to this tendency.

Question X.

Problems.

1. I have always been disposed to think that the number of *problems* in our examinations does bear somewhat too large a proportion to that of *questions from books*, and simple *examples*. I have no doubt of the number of difficult problems being much too large. If, however, an efficient *vivâ voce* examination were superadded, it would be equivalent to the extension of the questions taken more immediately from books, and in such case the proportionate number of problems might not be too great.

2. The problems are carefully enunciated, and their meaning may for the most part be readily apprehended by any well-prepared Student. They frequently indicate great mathematical knowledge and acuteness on the part of the Examiners, and require, of course, corresponding reading and skill on the part of the Student for their solution. It is also undoubtedly true that some of the problems do require for their solution, in the short time allowed for it, certain artifices and tact which may be learned by a Student having sufficient mathematical ingenuity, and independently of much philosophical acquirement.

3. The number of problems proposed for solution in an assigned time (three hours) is undoubtedly greater than can possibly be solved by the best prepared Student in that time. But I do not regard this as an objection. It affords each Student a greater choice and a better

opportunity of doing himself justice than he would have in a more limited number of problems. The objection already mentioned with reference to questions from books, against requiring the answers to too many questions in a limited time, is not applicable to problems. *W. Hopkins, Esq., M.A.*

Upon the whole I consider the Problem Papers as a valuable part of our examinations. They afford important tests for determining the relative merits of our higher Students, and exercise a great and beneficial influence upon their general reading. At the same time I feel confident that their utility would be increased in all respects by the substitution of easier for the more difficult problems. Problems.

Question XI.

1. The higher class of Mathemetical Students come up to Cambridge, generally well prepared in the elementary branches of mathematics. The reading of some of them, on entering the University, is much more extensive, but I believe the consequence to be injurious. This more extensive preparatory reading is generally obtained at the expense of an accurate knowledge of the lower branches, while the knowledge gained thus early of the higher branches is usually superficial and imperfect; and (which is still more important) loose and careless habits of thought frequently result from this premature reading. I believe, too, that it seldom happens that a Student who has thus skimmed superficially over his higher subjects ever returns to them again with that zest and earnestness with which he would read them for the first time, with his mind better disciplined and his previous knowledge more matured. I have known a considerable number of instances in which I could trace these evil consequences. Course followed by those reading for Honours.

2. Few of our students, I imagine, take private Tutors during the whole of their residence at the University, but those who become candidates for mathematical honours may probably avail themselves of private Tutors, on the average, during two-thirds of that time, including almost always the last long vacation, and generally that of the previous year. This assistance in his last vacation is considered to be, if not essential, of great use in preparing the Student for his final examination for mathematical honours. Private Tuition.

During each term these Students are required to attend the regular course of lectures in their own Colleges, once a-day in general in the larger Colleges, and in some others three or four days a-week. These lectures are generally more adapted to the middle and lower classes of candidates for honours than for the higher, the time devoted to them seldom allowing the Lecturer to enter into the details of the more difficult subjects. If he were to enter into them, a very small portion only of his class would be able to follow him. Attendance on Lectures.

The summer vacations are important periods for the Student who devotes himself to hard reading. He can then pursue more uninterruptedly than in term time that particular line of study which he makes his more especial object. Most of the Candidates for the highest honours usually pass three months of their second and last summer vacations under the guidance of private Tutors. Some remain in Cambridge, and others accompany their Tutors to other places. The last vacation is usually passed in maturing and methodizing the knowledge previously acquired, preparatory to the final examination for the B. A. degree the following January. There is no part of his course more important to the Student than the period now mentioned. Vacations.

3. For several years past there have been usually in the University four or five men of high mathematical attainments, who may be considered to have devoted themselves to private tuition as a profession. To these may be added a few others who, as resident Fellows of Colleges, have also devoted their time to private tuition in the higher branches of mathematics, though not with the same permanent object as those just mentioned. Most of these men have obtained the highest academic honours, and several have been the authors of mathematical treatises and original memoirs. Nearly the whole of the higher mathematical tuition has devolved upon them, and I may venture to assert that no men in the University have performed their duties with more zeal and earnestness than themselves. There are also many others who receive a few Mathematical Pupils, but not such as usually obtain the higher mathematical honours. Private Tutors.

It would seem desirable that a body of men on whom so large a portion of the effective teaching of the University, both in classics and mathematics, has devolved, should in some way be recognized as authorized Teachers; but how this might be effected so as to supersede the present demand for their assistance as *Private* Tutors is, I think, a question of great difficulty. They might be employed (as some, I believe, now are) by the different Colleges to give *College* lectures; but if their time were entirely thus occupied, the sphere of their usefulness would, in my opinion, be only contracted. Each College would furnish so small a class of Students for the higher mathematical Lectures, that they would become, in fact, a kind of private tuition, and possibly not under its most effective form. I believe that the addition which could be made to the number of College Lecturers would diminish in a very small degree the demand of private tuition as it now exists.

Another mode of recognizing this class of Tutors would be to form them into a body of Public Lecturers, and thus associate them with the Professors of the University, rather than with the College Tutors. As a means of rendering our public teaching more effective, this plan would, I think, be far superior to the other; but in its adoption, and possibly also in its subsequent working, if adopted, great difficulties would have to be encountered. I will endeavour to explain such of them as present themselves most prominently to my own mind.

The *collegiate* system, in contradistinction to that which is more general, or *academic*, has been the necessary result, in our old Universities, of the existence of a number of Colleges, forming so many independent foundations. At present it influences our public system of instruction nearly as much as it does the distribution of rewards, in the form of Scholarships The Collegiate system as distinguished from the Academic.

W. Hopkins, Esq., M.A.

The Collegiate and the Academic systems.

and Fellowships. It not only affects the whole scheme of the University, but seems also to be interwoven, as it were, in our affections. The attachment which so many men continue to feel through life to our institution is probably traceable to their own particular Colleges, as the centres of their academic remembrances and associations; nor is it likely that this feeling could remain unimpaired in future generations, if the individuality of our Colleges were merged, in any respect, in academic generalities. And undoubtedly the collegiate system has important advantages. It is not surprising, therefore, that many persons should look with extreme jealousy on any plan which might have the least apparent tendency to supersede it.

An opposition founded on this feeling would arise to any plan like that suggested, independently of the particular merits of the plan itself. Another serious difficulty would be found in the means of endowing such lectureships. They ought not to be given to persons having only a temporary interest in them, and therefore the emoluments derivable from them ought to afford a comfortable livelihood; otherwise they would not command the services of that class of men who alone could render them available for any good purpose. The classes must necessarily be small, as I know from long experience, in order that this mode of tuition might afford the Student adequate means of preparing himself for our present examinations; and, consequently, if the terms were much lower than those of private tuition (as one-third or one-fourth, for instance), some endowment would be absolutely necessary.

Again, in its working, a system of this kind would encounter a serious difficulty arising from its *antagonism* to our established collegiate system. It would manifestly be necessary that the public lectures should consist of a determinate series, embracing also the particular lectures of each Mathematical Professor. The present mathematical lectures in the different Colleges, though having the common object of preparing the Students for their final public examination, have never been conducted on a uniform plan, but each College has, to a certain extent, its own system, which it has long adhered to, and would, in many cases, be very unwilling to modify, for the sake of bringing it into harmony with any public academic system of lectures. Such modification would be essential to give complete efficiency to these lectures, but would probably be deemed by many persons a public acknowledgment of that superiority and precedency in the professorial body, in directing the studies of the University, which ought, in the opinion of such objectors, to remain in the hands of the College Tutors, on whom such great responsibilities rest. Whatever may be the real consideration due to such a view of the subject, I believe it would oppose great obstacles to the adoption and working of a plan like that I am discussing, or of any professorial plan whatever which should materially interfere with our collegiate system.

Another difficulty in the working of any system like that we are considering would arise from the varied characters of our candidates for mathematical honours. All are encouraged to enter the lists, but all do so voluntarily. Some read for the higher honours, and the emoluments which never fail to accompany them; some for the honours alone; others, again, in consequence of the wishes of their friends; while some think it easier to obtain a low honour than to pass the ordinary examination for the B.A. degree. Hence it is that among these candidates we find almost all shades of difference, from the highest to the lowest, in habits of application, in mathematical knowledge, and in the capacity for acquiring it. It is impossible that any one mode of teaching can be best for every section of such a mixed body of Students. For the higher portion, public teaching in well-arranged classes might, I have no doubt, be rendered extremely efficient, provided it had the general concurrence and support of the University; but I am disposed to believe that any mode of teaching the lower order of Students must be comparatively inadequate, unless it be calculated to meet the almost infinitely varied individual difficulties of each. Such persons, in the study of mathematics, find their progress arrested at almost every step by difficulties which they are only able to surmount by instruction which applies to themselves individually, whether it be derived from a Private Tutor or one more publicly authorized.

Lectures.

Public academic lectures could never be efficient as a means of preparing the Student for an examination so detailed and rigorous as those of the University, if they consisted merely of the exposition of the Lecturer's own views, like those which are usually termed *professorial* lectures. I believe it to be absolutely necessary that they should have much of a *catechetical* character, or that they should be associated with other lectures which have that character. I have myself for many years given lectures of this mixed character to my own Pupils, but I am conscious that they would have entirely failed without the catechetical part. It is by this means that the Lecturer is able to ascertain the particular difficulties of each individual, and to explain and discuss such difficulties in the presence of the whole class. Thus every one has the opportunity of viewing the difficulties of the subject through the medium of other minds as well as his own; and I believe that a far more comprehensive knowledge may be thus gained by many Students than could be gained from merely individual tuition. I consider this one of the greatest advantages of teaching in classes; but it must be recollected that it can only be obtained when there is a certain degree of equality, both as to capacity and acquirement, in those who compose the class. It is this which would impose the necessity of small classes. The largest, composed of the best men, ought not probably to exceed 15 or 20, and in the more difficult subjects not more than half that number. The lower classes must be still smaller; but even with this subdivision I doubt whether a system of this kind could be rendered effective for much more than half our candidates for mathematical honours; effective, I mean, as a system of teaching which should adequately prepare our Students for examinations as detailed and rigorous as those of our present system, without degenerating into mere individual teaching.

W. Hopkins, Esq., M.A.

Lectures.

A system of teaching of this more public and academic character might undoubtedly lessen the expenses of tuition for those who could avail themselves of it, though not probably to the extent which has been sometimes represented. The expense of private tuition to most of our Students of the higher class probably amounts on the average to about 150*l.* during the three years of their Undergraduateship. This sum includes 60*l.* usually paid for private Tutors during two of their summer vacations. No system of public teaching during *term time* would affect this part of their expenditure, over which the University can have no control. If we suppose the public tuition to cost 4*l.* a term, the whole expense for three years would be 36*l.*, so that, according to the calculation, between 50*l.* and 60*l.* on the whole, or about 20*l.* a-year, might be saved by each Student. I believe this to be a full average estimate for those who could best avail themselves of public, as a substitute for private instruction; for it is very probable, that, with public teaching in term time, more recourse would be had in many instances to private tuition during the vacations than at present. Of course, for the lower classes of Students who could but more imperfectly avail themselves of a public system of teaching, the pecuniary advantages would be still less.

The previous discussion will naturally suggest the question—Why have not the present Mathematical Professors attempted to establish some system of Academic Lectures like that above suggested? If we refer to a period sufficiently remote, the answer will probably be found in the *collegiate* spirit which, as already stated, pervades our institution. In more recent times there have been additional reasons. The Cambridge Observatory was completed in 1824. Since that period its duties have devolved on the Plumian Professor, and when performed as they are now by Professor Challis, and were previously by the present Astronomer-Royal, they leave no available time for other public occupations. Also during the present century, with the exception of a few years, the Lowndean Professorship has been held by a non-resident; and this must always be liable to happen, since the University, whatever might be its wishes on the subject, has no control over the appointment. The Lucasian Professor, again, is under no obligation to be in residence. Under such circumstances it would be in vain to expect from our present Mathematical Professors any continuous systematic series of lectures such as could alone exercise any material influence over the general mathematical teaching of the University. I do not mention this as the slightest reproach against the Professors. The University has never imposed upon them the duty of giving such lectures, and many persons would probably regard them as stepping beyond their proper line of duty if they were to make the attempt. It is rather considered their especial duty to give lectures on subjects more immediately connected either by custom or the expressed wish of the Founders, with their respective Professorships. Thus the Lowndean Professor lectures on Astronomy or Geometry, the Plumian on Astronomical instruments, and the Lucasian on Physical Optics. It will be at once apparent how small a portion these lectures must constitute of the Mathematical teaching required; and also how little power the Professors have, without much assistance, to establish a complete system of lectures sufficient to guide our general Mathematical studies, however disposed they might be to do so, and to acknowledge the obligation of constant residence.

Question XII.

Inducements to continue the Study of Mathematics.

1. The University has few inducements to hold out for the continued study of Mathematics after the B.A. degree. The emoluments accruing from public and private tuition are almost the only incentives she has to offer, and, from the nature of such an institution, almost the only ones she can have; but these do not operate except in a very few cases, as motives for permanent and long-continued study. The College Lecturer, after 8 or 10 years, generally transfers his duties to a successor, and in a few years more he probably takes a College living and leaves the University altogether. Moreover, few College Lecturers are called upon to lecture in the higher departments of Mathematics, so that their knowledge is not necessarily progressive with the employment of lecturing. Much the same may be said of private tuition. Few persons follow that occupation for a longer time than that above stated, with the exception of the small number who adopt it as a profession; but still it is probably a stronger stimulant than any other to continued exertion in the study of the higher Mathematics recognized in our University course. Our system is admirably calculated to stimulate the younger Students to exertion; nor do I believe there is any plan in the world where greater intellectual efforts are called forth in that class of persons than in this University. At the same time the small number of our Professorships, and the transitory tenure of all tutorial offices deprive the University of means of offering any considerable encouragement to the continued study of the higher branches of science. As the reward of early exertion, she offers a competence for a single man, and consequent leisure to prosecute any favourite study; but direct encouragement after the B.A. degree is wanting.

2. I do not believe that the deferring the examination for the Smith's prize would have any good effects. One bad consequence would be, that the best men would sometimes not be Candidates for it. The additional honour of gaining it would not always be deemed a sufficient compensation for the continued neglect of other, and especially of professional studies. Moreover, I believe, that reading *for an examination* after the age at which young men take their degrees, and after having acquired the knowledge which our best Students possess, is far from being the most profitable occupation of the time of those who still may be disposed to apply themselves to scientific studies. I should be strongly opposed to the postponement of the examination in question. On the same grounds I should be opposed to the establishment of any prizes to be gained by examination. Prizes for Essays would, in my opinion, be far preferable. They would give encouragement to more calm and continued exercise of thought,

W. Hopkins, Esq., M.A.

and to more philosophic research, than could result from the excitement of an anticipated examination. If several such prizes were established, so as to give each year efficient range and choice of subjects, I should have no doubt of their exercising a beneficial influence on the tone and progress of our mathematical studies.

Question XIII.

Recommendations for the Improvement of Teaching.

In answering the foregoing questions it has been my object to point out the improvements which have been made from time to time in our Mathematical system, and to describe its actual working at present. In doing this, I have been led to suggest the importance of examinations *vivâ voce*, in addition to those by printed questions, and also to discuss the plan of establishing a body of authorized public Teachers. As regards the first measure, I should have no hesitation in recommending it to the serious attention of those within the University with whom projects of internal improvement may be expected to originate. The second measure, theoretically considered, would seem to afford the means of effecting an essential improvement in our system of teaching. The Collegiate system probably affords almost the best means that could have been devised for exercising an efficient superintendence and personal influence over our Students, and this I believe to be an advantage which cannot be too highly prized; but it admits only a system of teaching necessarily imperfect, at least in the smaller Colleges, because, to render the teaching perfectly efficient, it would be necessary to divide the Students of each College into nearly as many classes, according to their capacities and acquirements, as if all the Students of the University were taught collectively on some more general system. Thus a separate staff of Lecturers is required for each College; but it frequently happens that a sufficient number of Lecturers, especially in the higher subjects, cannot be found in the smaller Colleges, and sometimes not in the large ones, because the University has no adequate inducements to offer to many of our best men to remain with us. This deficiency is now supplied by private tuition; it might be supplied by a public system like that which I have discussed. The more, however, I have considered such a plan, the more sensible have I become of the practical difficulties which it would encounter; and I would have it distinctly understood, that what I have said is not to be construed into a recommendation on my part of any such measure for immediate adoption. I believe the University at present not to be prepared for it, and unless adopted with a predominant, if not an unanimous feeling in its favour, it would assuredly fail. I am also fully convinced that, under any circumstances, no system of teaching only in classes could be entirely adequate to meet the varied individual wants of a body of Students who can no longer be treated as schoolboys, and who come to the University with capacities and acquirements, as I have before remarked, so widely different. Many of our voluntary Candidates for Honours would, I believe, soon give up the attempt to obtain them, unless they possessed greater facilities for the prosecution of their studies than class teaching alone would afford; and if we descend to a still lower class of Students, I can conceive no mode but that of *individual* teaching which can reach the incapacity, idleness, or comparative ignorance which must frequently be found among them.

General Character of the higher class of Students.

I would beg, in conclusion, to make a few remarks on the general character of our higher class of Students, and the influence which our system appears to exercise over them. One of the most striking features in this character is the steady and persevering industry with which they apply themselves to their studies; and the great influence of our system is shown in the amount of intellectual effort which it draws forth in them. This influence depends mainly on the great principle on which the distribution of the Honours and emoluments of the University entirely rests. Every Candidate for Honours knows that his ability and acquirement will be ultimately tested by a rigorous and scrutinizing examination, and that distinction will be awarded to him in exact proportion to his own merit; and the most humble and unfriended Student is upheld and encouraged by the thought that the interest and patronage which he possesses not, are utterly useless to those among his competitors who might command them. All meet on a fair field, and all are honoured and rewarded according to the same law. Vigour and activity cannot fail to result from such a system, strengthened by the value of the honours and emoluments which the University has the power of bestowing; for though these emoluments are generally not great in themselves, and not numerous enough to reward more than a fraction of the Candidates for them, they are of the utmost importance to a large majority of those who obtain them, to whom, in fact, they often make all the difference between immediate dependence and independence, besides that they frequently open the highest path in future life which the ability of the Candidate may qualify him to tread. It is especially to the humble but talented Student, that our University proffers her most effectual aid, and the means of working his way to distinction by his own manly and independent exertion.

It might be expected that the emulation excited by this system would degenerate into unworthy feelings of rivalry and jealousy. It is quite certain, however, that such is far from being the case. Men who are competitors for the highest honours frequently live together in the most intimate daily association with each other, and without a feeling of friendship being subsequently disturbed by the relative success of one or failure of another. It is difficult to conceive a system where such high honours and prizes have to be awarded, uniting more of the advantages of emulation with fewer of the evils of jealous rivalry.

Tests of Merit

There is also another point on which my own experience enables me to bear extensive testimony. The test of merit established by the University, and recognized by the different Colleges in the disposal of their emoluments, is strictly an intellectual, and not directly a moral test; and the question may arise—How far can this intellectual test be depended upon

W. Hopkins, Esq., M.A.

Tests of Merit.

as a test of high moral conduct? I believe it to be unquestionably the best moral test that could be acted upon. When I look back to the long list of those who, under my own immediate guidance, have taken distinguished Degrees, and whom I have known intimately, morally, as well as intellectually, I remark, with singular satisfaction, how very few there are comparatively who were not young men of unexceptionable moral character, proving, incontestably that the intellectual powers elicited and cultivated by our studies, and the habits of life superinduced by an earnest attention to them, are co-existent, in an immense majority of instances, with high moral feeling. I am satisfied that no direct moral test could answer its purpose equally well, and for this there is at least one obvious reason—there can be no hypocrisy in Mathematics.

Answers from the Rev. W. C. Mathison, M.A., Fellow of Trinity College.

Rev. W. C. Mathison, M.A.

Her Majesty's Commissioners have not, I confidently hope, any intention of founding upon the information which they may obtain, a recommendation of external interference with our course of mathematical study, or the conduct of our examinations. Such interference would, I am convinced, be extremely prejudicial, and could end only in disappointment and disaster. I cannot, however, believe that anything of this kind is contemplated by the Members of the Commission, and I therefore willingly proceed to answer, as far as I can, some of the Queries which I have had the honour of receiving from them.

Mathematical Examinations.

1. I beg to direct the attention of Her Majesty's Commissioners to the "First Report of the Board of Mathematical Studies," published May 19, 1849. In pp. 1—4 will be found a full account of the changes which have taken place since 1808, in the nature, &c., of the Examinations for Mathematical Honours, as well as the general effect of those changes. I refer in particular to the alterations which came into force in January 1848, the effect of which has been to render more definite the course of reading followed by the less advanced Students, and to secure in all a better acquaintance with the more elementary and geometrical subjects.

4. In p. 7 of the "Report" above mentioned, will be found a table of the number per cent. of Questionists who obtained Mathematical Honours during different periods since 1808.

5. The plan of the Examination, as it now exists, is in my opinion very well adapted for the purpose in view. Very great care is taken by the Moderators and Examiners in the selection of the Book-work questions, and in the mode of stating them. In 1846 and the two following years, it was found that, owing to the *length* of the Book-work papers, the Candidates were not able to give sufficient time to the examples and deductions contained in them. With a view to obviate this, in 1849, the Mathematical Board recommended that the Book-work papers should be shortened, which has since been done. The length of the *Problem* papers will be considered in the answer to (10).

The Board of Mathematical Studies.

6. The Board of Mathematical Studies is, I conceive, intended to act by recommendations conveyed in a Report to be published to the University annually by the Vice-Chancellor. They have no power to compel the observance of their recommendations. It is expected that these will, in general, be attended to, partly from the fact of the Board including the Moderators and Examiners for the time being, and still more from the respect due to the opinion of a body of distinguished Mathematicians and experienced Examiners. Should, however, which is very unlikely, the recommendations contained in Reports signed by a large majority of the Members of the Board be frequently disregarded, the University will no doubt take care to ensure the requisite attention to such recommendations. Until this is observed to be the case, I should be very sorry to abridge the independence of the Moderators and Examiners.

Limitation of Subjects.

7. With regard to the limitation of subjects, I agree on the whole with the recommendations contained in the Second Report of the Mathematical Board, (published June 3, 1850,) which I should have signed, had I then been a Member of the Board. I should be opposed to any further reduction of subjects for the present.

Problems.

10. I do not think that there is any ground for altering the present proportion of the problems to the other questions. The *number* of problems proposed to be solved in the time allowed is no doubt greater than the best prepared Students can be expected to complete. There is no objection to this, provided that their number is not so great, or their enunciations so long as to perplex the Student in the choice of the problems best suited to his reading. It is desirable to propose a considerable variety, in order that equal justice may be done to students of different tastes and habits of thought.

Private Tuition.

11. The assistance of a Private Tutor is in most cases considered, not indispensable, but certainly very desirable. Practically, as far as I know, most students who wish to obtain high Mathematical Honours, read with a Private Tutor during the greater part of their second and third years. Several of the Private Tutors are persons of considerable Academical distinction, and some have attained great eminence in the scientific world. Speaking generally of the Private Tutors, I believe that in that capacity they render the most important service to the education of our Students. The mutual confidence and intimacy which often exists between a Student and his Private Tutor (a man perhaps of high character and abilities, and frequently of an age little greater than his own), is, I think, of the greatest benefit to him. Any *official* position given to the Private Tutors would in a great measure destroy this relation, which I consider an excellent feature in the practical working of the system. This should, in my opinion, be borne in mind whenever the objections to the system of private tuition are brought under notice. Those objections admit

Rev. W. C. Mathison, M.A.

in a great degree of being obviated by proper attention to their pupils' reading on the part of the College Tutors, in regard, for instance, to the choice of a Private Tutor, and to the adoption of a course of reading which shall not interfere with, but be subservient to, the system of public instruction in the University and Colleges.

It should be mentioned that the general practice of those who read for honours, except in the case of a few who read very high, is to engage a private Tutor for three days in the week only, the expense of which is 7*l.* for each term.

Suggestions.

12. There appears to me to exist very serious objections to the institution of examinations one or two years later than the present B.A. degree. One result would be to depreciate the value of that honour, and to lengthen the period of preparation for the final examination in the case of Students of the higher class by that additional period. This would be very undesirable. Of our high Mathematical Students, many, after taking their B.A. degree, leave the University for the purpose of pursuing Professional Studies, and for other important objects. Most of these could ill afford either the time or the money for a prolonged residence in the University; and it would be very unjust to give others, whose circumstances enable them to remain here, an advantage over them. Of the Bachelors who remain here, there are some who possess great Mathematical talents, and whose further pursuit of Mathematical Studies in an exclusive or principal degree may be expected materially to advance the interests of science. Such, however, have in general been found, without the stimulus of Examinations or Prizes, to apply themselves vigorously to their favourite branche of study, and they probably would in most cases be rather impeded than encouraged by the necessity or inducement of preparing themselves for an Examination.

(Signed) W. C. MATHISON, M.A.,
Fellow of Trinity College.

Rev. J. G. Mould, M.A.

Answers from the Rev. J. G. Mould, M.A., Fellow and Tutor of Corpus Christi College.

Sir, *Corpus Christi College, Cambridge, April* 9, 1851.

I beg to submit to the University Commissioners, the following Answers to Questions proposed to me, in a letter dated 14th December, 1850.

I have the honour to be, Sir,
Your obedient Servant,
(Signed) J. G. MOULD.

Examinations for the B.A. Degree.

Questions 1 and 2.—Candidates for the B. A. degree are required by the University to pass two Examinations, into both of which Mathematics enter.

It would be a task very long and quite needless, to write the *details* of these Examinations; they are already in print, accessible to all the world.

For the previous Examination, (*see* "Camb. Calendar," 1851, pp. 8—10).

For the ordinary B. A. Examination, "Camb. Calendar," pp. 12—19.

For the Mathematical Tripos, "Camb. Calendar," pp. 11, 12, and pp. 351—376.

Also an important document issued by the Board of Mathematical Studies, June 3, 1850. (*See page* 55).

Changes.

Very many changes have been made in the Examinations of late years. The general tendency has been to make them more thorough. Elementary Mathematics have been introduced into the previous Examination:

Elementary Mechanics and Hydrostatics into the common B. A. Examination.

Mathematical Tripos.

As regards the Mathematical Tripos, two opposite tendencies have appeared. For many years the course of reading was widened, higher mathematical subjects were from time to time introduced. Lately some of the high subjects, heretofore read, have been excluded wholly or partly (*see* the Report of the Board of Mathematical Studies).

A far more searching examination is now given in the lower subjects; especially in Geometry, and Physics treated by Geometrical methods (*see* "Camb. Calendar," pp. 11, 12).

The duration of the Examinations has been increased.

Amount of Knowledge required for the ordinary Degree.

Question 3.—It is scarcely possible to define what amount of knowledge just suffices to obtain a Student his degree. This is left to the Examiner's discretion.

I examined for Mathematical Honors in 1843. The last Junior Optime gained $\frac{1}{10}$th of the marks of the Senior Wrangler.

The examination is now much fuller in the low subjects; probably the lower men exhibit a better fraction.

It may, however, be observed that a Candidate for the Ordinary Degree must pass in *every* subject.

So for Mathematical Honours, a Student must pass in the Examination of *the first three days*, which is confined to the lower subjects, and is very searching (*see* "Camb. Calendar," pp. 11, 12, and pp. 351—359).

Thus it is provided that a Student shall not apply himself to some subjects and neglect others, or aim at high reading without being properly grounded in Elementary.

The standard of qualification is perhaps rather higher than formerly. Any change of this kind must, however, be slow. It is more practicable in the Honour Examination, where the effect is simply to force more men to take the common B. A. Degree.

But in dealing with Candidates for the Common Degree, a limit is fixed, by the average

Rev. J. G. Mould, M.A.

human capacity, and by the amount of education received by men before entering the University.

Mathematical Honours.

Question 4.—I should think that about $\frac{4}{5}$ths of the Students take Mathematical Honours, but cannot speak exactly.

In 1843 there were 151 candidates, of whom 127 gained Honours, and 4 were ill.

Vivâ voce Examinations.

Question 5.—It appears to me well worth consideration, whether the introduction of some *vivâ voce* questions into the B. A. Examinations would not be beneficial. *Classification* of the candidates may be best effected by written papers; but there is great power afforded to an Examiner for judging of a man's *competency* by a *vivâ voce* Examination, even a brief one. Nothing so completely tests the *quality* of a man's knowledge, and discriminates him who understands from him who has "crammed."

Question 6.—The Board of Mathematical Studies has made more than one Report, of a very valuable kind. The changes recommended by it are already adopted.

Question 7.—The suggestions in this question are anticipated in the Report of the Board, dated June 3, 1850. I agree with that Report, and should be disposed to add that part of the Undulatory Theory, which respects double refraction, to the excluded subjects.

Books in use.

Question 8.—The books in use at Cambridge and written there make on the whole a very fair course of study. They are chiefly deficient in matters belonging to the practical applications of science. Our Students in general lack knowledge in practical Mechanics, Optics, and Astronomy, especially the last. Such knowledge can only be imperfectly obtained from books; but our books are not as good as they should be. It requires an experienced man to write on practical science; our books are too often written by men fresh from the Senate House. Many of them present a fragmentary character, and are obviously designed to prepare Students for producing rapidly on paper. They give detached propositions, neatly and briefly proved, rather than a connected view of a subject.

The MSS. in use are commonly still more obnoxious to this criticism.

Opinion regarding the course of Mathematical Studies.

Question 9.—I think that the examination as *now* carried on in accordance with the scheme in "Camb. Calendar," pp. 11, 12, is *not* too analytical and symbolical. I believe that the attempt to force geometrical methods on Students beyond our present habit, is neither desirable nor practicable, for several reasons—

1. Geometry is inadequate to the demands of modern science.

2. Except in Elementary Mathematics, Geometrical methods are in general operose and inelegant, and impose a severe tax on the memory, thereby giving a stimulus to "cramming."

3. Even in the conic sections, there are certain propositions, proved by piling up heaps of proportions, and drawing an inference *ex æquali*, which seem little beneficial, for—

4. I find that although you may make students *write* geometry, they will in such cases *think* algebra. They regard rectangles and ratios as products and quotients, and *will* do so; so that what looks like geometry is a sham, only a clumsy algebra.

5. In the higher applications of so-called geometry, the pretence of real geometrical conceptions is thrown aside, (*e. g.* in Newton's proposition,

$$\text{that force} = \frac{2h^2}{SP^2} \text{ limit } \frac{QR}{QT^2},$$

what geometrical idea is called up, h being an *area*?)

Problems.

Question 10.—The character of the problems varies much from year to year. The objections suggested in this question are not unfrequently applicable. The problems given in each paper are not too many, considering the range of subjects and the differences of taste in the Students, and the necessity of giving fair play to all. But there is a tendency to make the problems too difficult. They ought to be obvious applications of known principles, carried out by a fair amount of geometrical and analytical power and knowledge. They often depend on special artifice. This offers a premium to dexterity rather than sound understanding, rewards mere cleverness, not the highest order of intellect, and throws an element of chance into examinations.

Private Tutors.

Question 11.—Students who read for Honours almost universally get the help of Private Tutors. This is a great expense to them; and in a large number of cases it is a very bad investment of capital, I do not mean in a mere pecuniary point of view. Many could graduate in Honours without Private Tutors by diligence and the instruction given them in College. They might not read quite so much, but what they read would do them more good.

It is to me doubtful whether a man who cannot gain Honours without a Private Tutor would not do better to content himself with a common degree; for students who read high, private tuition is all but necessary, and quite worth the expense.

Many of the Private Tutors are accomplished mathematicians. The expenses of Students could only be relieved in this respect, by Private Tutors being paid from some general fund. The professorial system is utterly inadequate to meet the wants of Students, more so than College lectures. The defect of College lectures is, that classes are often too large, and always composed of Students of unequal talent and attainment. The professorial system has these faults, and in addition this other, that the Professor has not a personal knowledge of his hearers, their individual needs and capacities. The Private Tutor system tends to the other extreme; Students are over-tutored, and independent thought checked,—the worst of all faults. Good Tutors avoid this, but, speaking generally, it is the tendency. I am disposed to think that the best kind of tuition is that given by a Tutor to his *Pupils*, not singly, but in a class of *five or six*, provided they are about on a par.

Rev. J. G. Mould, M.A.

Inducements held out to Mathematical Study.

Question 12.—The University holds out scarcely any inducement to a man to continue Mathematical study after the degree of B.A. The postponement of the Smith's Prize might do a little, but very little. In fact, science is not a profession. When a man takes his B.A. degree at the age of 22, he must at once betake himself to a profession. If he gains a Fellowship, the case is not altered; that is only a temporary provision. He turns either to Divinity, which is compelled by many College statutes, or to Law, or Physic, or he may obtain some educational situation. In the three latter cases he generally goes out of residence. In the former he remains in College for some few years in college office, or he takes a curacy in the country. In no case is there anything to induce him to prosecute science except his natural inclination; but there is everything to turn him away from such pursuit. The institution of prizes for Graduates would scarcely at all, in my opinion, alter this.

There is a great want of men permanently resident in Cambridge devoted to science, and finding that a profession. We have none such, except the Professors and Private Tutors. Even many of the Professors are non-resident. The income attached to the Professorships is often so small, that the Professor is obliged to adopt some profession for a maintenance, and make his Professorship quite secondary. The value of resident Professors is not, in my opinion, principally as Lecturers. I have already pointed out the insufficiency of the professorial system; but to have a resident staff of men of science, labouring to promote discovery, would be most important. To them we might also look for good books, as authorised text-books for the Students.

Each such Professor might, instead of lecturing in the ordinary professorial way, undertake the private tuition of two classes, each class containing five or six students, for a small payment, supposing the Professorship to have a fair endowment. This tuition would be his stated work; his labour in promoting science must spring from his love of science, sense of duty, honourable desire of distinction, the force of public opinion, and the general spirit which would pervade a body of men who felt that science was their profession. Laboratories and other means of carrying on experimental philosophy, which Cambridge is now quite destitute of, would then come into existence. Neglect of the experimental and classificatory sciences appears to me a great fault of our system, which would thus be remedied.

Christ's College Lodge, June 3, 1850.

The Vice-Chancellor begs leave to publish to the University the following Report, in accordance with the Regulation D. adopted by the Senate, Oct. 31, 1848.

The Board of Mathematical Studies beg leave to lay before the Vice-Chancellor the following Report:—

Report of the Board of Mathematical Studies.

1. In order to acquire precise information respecting the actual working of the Examination for Mathematical Honours, the Board requested the Moderators to prepare a Report of the last examination, and to suggest any changes or improvements which they might judge desirable. The Moderators accordingly presented to the Board a Report, in which they state that "In accordance with the expressed wishes of the Board, the papers in the earlier part of the examination were shortened, so as in no case to consist of more than fourteen questions. The Moderators and Examiners consider that a further curtailment is practicable and desirable, as the small number of solutions of examples and applications of book-work still presents itself as a prominent defect."

Another subject suggested for the consideration of the Moderators was the great inconvenience arising from the short time allowed for examining the papers of the first three days of examination. On this point they conclude that for many reasons "it appears better not to interfere with the integrity of the examination as at present conducted. The desired relief may be obtained by placing the commencement of the examination two or three days earlier, or by transplanting it into the Michaelmas Term. The former alteration offers the advantage of being easily made without disturbance of existing arrangements, while the latter would probably be found to open several large questions, which the Moderators think they are not called on to discuss."

In accordance with the foregoing suggestions, the Board recommend that the papers of the first three days be still further shortened.

They also suggest that it would be desirable to offer to the Senate a grace, to the effect that the first part of the examination commence two days earlier than at present.

2. The Board, having had under review the course of mathematical reading at present usually adopted in the University, are of opinion that there are some portions of the very numerous subjects presented to the Candidates for Mathematical Honours which may with advantage be omttted altogether, and others which, although necessary to be included in the course of reading, are unfit to be produced in an examination, such as—

(1) Investigations which are not of much interest, or which relate to methods that have now ecome obsolete.

(2) Investigations which are imperfect, or unsatisfactory, or involve questions about which mathematicians are not sufficiently agreed.

(3) Investigations which lead to long analytical processes.

Investigations of the last class are frequently of great importance, and it is in some cases essential to a complete mastery of the subject that they should be gone through at leisure by the students. It does not, however, appear desirable to induce students to spend much time in rendering themselves so familiar with particular algebraical calculations as to make sure of being ready, when called upon, to write them down with rapidity. Such an inducement, it is conceived, would be held out by requiring these investigations to be produced in the limited time allotted to an examination paper. The Board are of opinion that the time thus spent would be much better employed in working examples and problems calculated to elucidate the principles of the several subjects, and in thinking over the elementary principles themselves, in order, by regarding them in different points of view, to acquire a thorough mastery over them.

With respect to particular subjects, the Board make the following recommendations:—

Rev. J. G. Mould, M.A.

Report of the Board of Mathematical Studies.

THEORY OF EQUATIONS:—There are not many propositions in the Theory of Equations, which it seems necessary to notice, as being too long or laborious to be produced at an examination: methods of solving equations approximately, such as Newton's or Horner's, as being of great practical utility, may be specially recommended to the attention of the students.

The proof of the theorem that equations with rational coefficients are always resolvable into simple or quadratic factors may be simply read to be understood, but not to be produced in examination.

The same may be said respecting Lagrange's investigation of the dimensions of his reducing equation, upon an assumed form of the root. The results, however, may be assumed in their application to the Theory of the Solutions of Cubic and Biquadratic Equations, as well as of Binomial Equations, whose dimensions are prime numbers of the form $2^n + 1$.

INTEGRAL CALCULUS:—The subject of Elliptic Functions may very well be omitted.

LAPLACE'S COEFFICIENTS:—This subject may be omitted altogether.

HYDROSTATICS:—In this subject the theory of Capillary Attraction may be omitted.

HYDRODYNAMICS:—It seems advisable to confine this subject to the formation of the general equations; the calculation of the velocity of discharge of a liquid or gas through a small orifice, according to the theory of steady motion; the theory of long waves, and the theory of sound.

COMMON OPTICS:—It is undesirable that questions in this subject should be proposed to the Candidates, which require the investigation of second approximations to be written out in the examination.

PLANE ASTRONOMY:—There is no subject in which a student more requires precise direction both with respect to what he should read and what he should omit than in Astronomy; for it embraces a vast variety of propositions and methods, which vary from time to time, not merely from the progress of mathematical knowledge, and the changes of form which it assumes, but still more from improvements in the instruments and modes of observation, and from the new objects to which they are applied. We find many quantities which in one age have been altogether overlooked or included in the wide margin of instrumental and other errors, becoming in another the most important objects of research: such are the orbital movements of systems of double stars, the parallax of some of the fixed stars, the movement of the solar system, and other results of increased nicety of observation and greater instrumental power, which have become the foundation of the largest views which have hitherto been taken in Astronomy.

The following are some suggestions with respect to what it would be expedient to avoid or notice in future examinations in Astronomy.

Corrections for precession, nutation, aberration, and parallax, in the reduction of observations, and in the calculation and prediction of phænomena, such as eclipses, occultations, transits, &c., should be applied to right ascension and declination, not to longitude and latitude, in conformity with the practice now universally adopted. The method of the *nonagesimal* (Woodhouse, page 741) is now altogether abandoned. The most improved form of the corrections for precession, nutation, and aberration, is that which involves the use of the variable coefficients, A, B, C, D, and of their constant multipliers a, b, c, d, as given in the Introduction to the Tabulæ Regiomontanæ of Bessel. (Dr. Hymers' Elements of the Theory of Astronomy, Art. 303).

All propositions should be omitted (unless treated as problems only) which have no bearing upon the determination of important elements in Astronomy, or the real business of observation, except such as are recommended by the possession of some peculiar interest in the history of the science. This principle would exclude the equation of the aberratic curve, and the problem of shortest twilight; it would not exclude Flamstead's method of finding the sun's right ascension.

The same principle would exclude the mathematical investigation relating to kinds of observation which have been practically abandoned, such as Lacaille's method of finding the longitude of the perihelion (Hymers, Art. 309).

No propositions should be reduced to formulæ when not sufficiently rigorous to give accurate determinations, unless such formulæ are used merely for the purpose of explaining the general principles of a method, or the necessity for adopting some modification of it in practice.

This principle would apply to the determination of the parallax of a planet by observing absolutely its zenith distances at different points of the same meridian, without the intervention of reference to a star.

All investigations should be carried to extreme accuracy, when required for frequent and very important determinations in Astronomy, and when not of a nature to press very severely upon the memory of a student. Thus the formulæ for the moon's parallax and for the changes of her diameter produced by it, which are required in some of the most delicate observations in Astronomy, and which are of frequent occurrence, should be thoroughly mastered. The complete solution of the problem for determining the orbit of a planet or comet in the absence of a previous knowledge of some of its elements, appears to be too complicated and of too great length to be produced in examination.

LUNAR THEORY:—It is recommended that questions in the Lunar Theory be confined to

(1) The formation of the general equations, and explanation of the method of approximation.

(2) Calculations of the effects of particular parts of the disturbing forces which produce terms in the expressions for the radius vector, longitude, and latitude, of the second order of small quantities.

(3) Explanations of terms in the expressions for the radius vector, longitude, and latitude.

PLANETARY THEORY:—It is recommended that questions in this subject be confined to

(1) The formation of the equations of motion.

(2) Calculations of the perturbations of radius vector and longitude, with the consideration of the terms in the expression for the disturbing force which produce the most remarkable inequalities.

(3) Explanation of the method of the variation of parameters, as applicable to the Planetary Theory.

(4) Calculations of the variations of the elements.

(5) Properties of the secular inequalities, avoiding operose processes which depend on the expansion of the disturbing function.

By these recommendations respecting the Lunar and Planetary Theories it is not intended to discourage the introduction of miscellaneous questions of general interest.

THEORY OF THE EARTH'S FIGURE:—Questions in the Theory of Attraction, and of the figure of the Earth considered as homogeneous, may be proposed with advantage.

The Theory of the Figure of the Earth considered as heterogeneous may be omitted.

LIGHT:—Inasmuch as the dynamical part of the theory of light, such as it came from the hands of

Rev. J. G. Mould, M.A.

Report of the Board of Mathematical Studies.

Fresnel, is confessedly altogether imperfect, it is recommended that students pay particular attention to the experimental verification of the results to which Fresnel was led from dynamical considerations.

In concluding these recommendations, the Board wish to express their belief that they have in the great majority of instances only given a definite form to that which has for some years past been the practice in the University Examinations. They trust, therefore, that their Report will not have the effect of introducing any violent change into the existing system of mathematical study; but they hope, that even in those cases in which they have proposed no important omissions, they will have done some service to the Candidates for Mathematical Honours, by giving increased definiteness to their course of reading, and by putting before them such results as they might possibly have themselves deduced from the study of the Senate-House papers of the last few years.

Rev. J. N. Peill, B.D.

Answers from the Rev. J. N. Peill, B.D., Fellow and Tutor of Queens' College.

My Lord and Gentlemen, *Queens' College, Cambridge, March* 8, 1851.

I have the honour to lay before you the following remarks in reply to a series of Questions bearing date the 14th of December, 1850, and forwarded to me. I take the liberty of declining to answer all questions which can be easily and fully answered by a reference to the printed graces of the Senate, or by referring to the "Cambridge University Calendar for 1850." The numbers refer to the corresponding numbers in the list of questions.

Qualifications for Degrees.

No. 3. The tendency of late years, both in one and the other, has been undoubtedly to raise the standard of qualification; and although in the common degree, by reason of the fact that the propositions in natural philosophy requisite for such degree being precisely stated, several of the Candidates may be able to learn by rote sufficient to enable them to pass in each paper without understanding the principles or philosophical character of the said propositions, yet the appreciation of these principles is much more general among the Candidates than formerly; and there is no reason to suppose that this improvement will not be progressive, especially as these subjects are beginning to form a part of education in many of the schools from whence students come up to the University of Cambridge.

Examinations.

No. 4. I consider the mode of examination for the common degree well calculated to exhibit the qualification of the different candidates.

No. 5. In respect to the Honour Examination, I am decidedly of opinion that the present papers are much too long for the time allotted to each; so much so that the more elementary papers test a man's quickness of writing and readiness of idea, rather than his real knowledge of the subject-matter of the several questions. I would suggest that six hours at least be allowed for each of the two last Problem Papers.

Course of Mathematical Study.

No. 6. I would omit calculus of variations, theory of elliptic integrals, and the higher parts of the theory of definite integrals. If the object of the University be to improve the mathematical knowledge of those who have taken high honours, then should special prizes subsequently to B.A. be given for proficiency in the higher branches of mathematics and physics, and in such case, the concentration of the attention of the Students previously to B.A. would act advantageously upon the accuracy and soundness of their knowledge.

No. 8. Such manuscripts are universally used, and appear to me to form an essential part of the system of private tuition.

Problems.

No. 10. They too frequently require a peculiar tact, distinct from accurate and philosophical knowledge, and depend more upon the mere power of working out long and complicated equations than upon understanding the philosophical principles upon which their solutions depend; thus, their effect is rather to give a mechanical dexterity than to provide mental discipline.

Private Tuition.

No. 11. The assistance of a Private Tutor, with very rare exceptions, is considered indispensable for those who aspire to the higher mathematical honours. It would be desirable that the instruction of the Private Tutor might be connected with the College Lecture, and although I have considered the subject with some care, there are so many difficulties to be surmounted that I am not prepared to suggest any practicable plan.

The above replies to seven Questions I have the honour to transmit, and remain,

My Lords and Gentlemen,
Your obedient Servant,
(Signed) JOHN NEWTON PEILL, B.D.
Tutor of Queens' College, Cambridge.

To Her Majesty's Commissioners, &c. &c.

Answers from J. B. Phear, Esq., M.A., Fellow of Clare Hall.

J. B. Phear, Esq., M.A.

SIR, *Clare Hall, Cambridge, December* 15, 1851.

I WISH to make the following answer to two out of the list of queries which you forwarded to me under the direction of the Cambridge University Commission, in a letter dated the 14th December, 1850.

I am, Sir,
Yours, obediently,
(Signed) J. B. PHEAR.

Answer to Query 11.—The Mathematical education given in this University is mainly conducted by the Private Tutors; but little if any loss would accrue to the Students if at any moment College lectures should be for the future suspended. I do not attribute this generally to inefficiency or negligence on the part of the College Lecturers; most of them labour hard in their posts, and are well qualified to teach, but to great defects in the present Collegiate system, which I will attempt to explain:— Mathematical Education.

The study of every Mathematical subject presents itself under two phases; the first is that of its theory and general principles; the second, of its manipulation or practical working: of course these can be only partially disunited: knowledge, to be worth anything, must be the result of both. But the learner must enter upon them as separate courses; he must commence with the latter, and it is the undoubted office of his teacher carefully to guide his steps in it. This, then, is the first thing that falls to the lot of his College Lecturer to do, because he ignores the existence of the Private Tutor, and considers himself solely responsible for his pupils' progress. The classes which he must address for this purpose consist of young men, who vary greatly both in attainments and mental capacity; he is therefore unable to adapt himself to the disposition or requirements of individuals; the time, too, at his disposal is limited, and he finds it exhausted before he has attained even the one aim, of imparting to his class the bare rules of working their subject. Meanwhile the Private Tutor, to whom the learner was obliged to have recourse for help through the difficulties even of the lecture-room, has been doing the same thing much more perfectly because he has been able to devote himself entirely to understanding one person's mode of thought, to appreciating and removing the stumbling blocks on his road to knowledge. Neither College Lecturer nor Private Tutor, except in rare cases, has the opportunity to expound and illustrate the general theory of the subject. Such I conceive to be the present state of our University's Mathematical teaching, and its cause to be the false position, or rather none at all, which the Private Tutors hold in the public eye of the College authorities. Private Tuition.

Upon careful consideration, I cannot help concluding that our body of Private Tutors—which is fortunate enough to include more than one person of great scientific eminence—is essentially necessary to a healthy state of our education, and I should like to see them publicly recognized. They should, however, be as independent of the different Colleges as they are at present; I would in no degree curtail the freedom with which a Student chooses his Private Tutor, or changes him for another, upon finding his method of teaching unsuited to him; for this freedom does, I believe, as much lead the Pupil to a cheerful prosecution of his studies as the competition which it fosters amongst the Tutors induces them to exert their best efforts. With such support to rest upon, the College Lecturer would confine himself to his own most important department of teaching, *i. e.*, exposition of general theory, analytical and physical illustration of it, and examination.

I can offer no suggestions respecting a material reduction in the expenses of academical education. Expenses.

Answer to Query 13.—In answering this question, I assume the College Lecturer to be a really acting and useful personage; in addition to his own department of teaching, he would have, by virtue of his position, the general educational supervision of the Students of his College; his duties could be efficiently performed only by a very able man, and one who would devote himself professionally to them. Unfortunately, under the present circumstances, the most talented men of the University are just those who are the first to leave her for other places and pursuits. Those who feel their own intellectual power are little likely to waste precious time in an employment which can only be temporary. We thus see, every year, our best men seeking and obtaining permanent educational posts elsewhere, because we can offer them nothing of the kind at home. In my opinion, this difficulty would be met, and the character of the public teaching in the University greatly exalted, if each lectureship were endowed with a fellowship, together with a sum proportionate to the number of Students in its classes, and were rendered a life-appointment in the gift of the Master and Fellows of the College. The Public Teaching of the University.

I think it in the highest degree important that the University should, in her education of the young men who are candidates for Degrees, pay attention rather to mental training than to giving information; but I also consider it her duty to offer the means of acquiring information to *all* who seek it. The University Professors afford a machinery well adapted to this purpose, and I should like to see their Lectures open to all persons, whether members of any College or not. I conceive that there are many classes of persons in the kingdom, especially those engaged in educational or scientific pursuits, who would eagerly seize such an opportunity for gathering knowledge, but who have neither the time nor the means to proceed to a Degree. Professorial Lectures.

Rev. R. Phelps, D.D.

Answers from the Rev. R. Phelps, D.D., Master of Sidney-Sussex College.

My Lord Bishop and Gentlemen, *Sidney College, July* 10, 1851.

I beg leave to send you herewith a few remarks on some of the very important subjects alluded to in a paper of questions dated 14th December, 1850. The questions relating to matters of fact, and which therefore admit of definite and accurate replies, have doubtless been answered by others. I have almost confined myself to such as are known to be subjects of diversity of opinion.

I have the honour to be,
My Lord Bishop and Gentlemen,
Your obedient humble servant,
(Signed) ROBERT PHELPS.

To the
Cambridge University Commissioners.

Mathematical Examinations.

Question 1.—What is the mode followed by the University, &c., &c. ?

By a Public Examination held in the Senate House, which is fully described in the "Cambridge Calendar" for the year 1851.—*vide* p. 10 *et seq.*, the nature and detail of this examination have been subjects of frequent and careful deliberation. The Master of Trinity College, in recent publications, has given an elaborate history of the successive changes which have been adopted. Those publications I have no doubt are in the hands of the Commissioners, and cannot fail to have great weight with them.

Question 2.—Are the Examinations in Mathematics, &c., &c. ?

I consider the Examination for Mathematical Honours as now practised to be not perhaps more searching but certainly more extensive than heretofore. And on this account, as well as for other reasons, I consider the recent change, whereby it was decreed that the subjects of the first three days' examination should be limited to the elementary parts of the course, and that, according to the results of that examination, it should be decided whether a Candidate were deserving of an Honour or not, to be one of the most important ever adopted. Upon the whole, if I can admit that there is anything to complain of in our Mathematical Tripos Examination, it is that for some years past the tendency has been to embrace too wide a range of subjects, and to keep down the proportion of elementary questions. This tendency may arise from the natural desire of the Examiners continually to vary the examination from year to year, and perhaps also from the difficulty which persons who have long accustomed themselves to grapple only with the most obscure and abstruse points must experience in restraining themselves to a class of questions which have ceased to interest them, and not rather drawing from their own ulterior researches. Hence the variety, the ingenuity, and the novelty of many of our questions and problems. And hence it is that so many of the acts of University legislation on this subject have been with the view of insuring in the Examination a due amount of the more elementary parts of mathematics, with plain questions and easy problems on the same.

Question 3.—What amount of Mathematical knowledge, &c., &c. ?

Amount of Mathematical knowledge required for a common Degree.

In answer to the first part of this question, I must refer to the Schedule, p. 16, of the "Cambridge Calendar," 1851. The minimum of knowledge now required for a place in the Mathematical Tripos is such an acquaintance with the subjects of the first three days' examination, and of which a schedule is given at p. 11 of the "Cambridge Calendar" for 1851, as the Examiners deem sufficient to merit an honour.

There has been a great desire on the part of many resident members of the Senate of late years to raise the standard of qualification both of the common degree and for the lowest mathematical honour. In regard to the latter case, I fully participated in such desire; and likewise to some little extent as regards the former; but I think both are now rendered sufficiently difficult.

Question 4.—What is the average proportion, &c., &c. ?

This question can be, and I have no doubt has been, answered with the utmost accuracy by the Registrary. I will only therefore remark, that, as regards Sidney College, the number of Students who have obtained Mathematical Honours during the last ten years is 32, the whole number of B.A. degrees during the same period having been 66. And this proportion of honours to the common degree is much greater than heretofore.

Question 5.—Are the mode of Examination, &c., &c. ?

I am not prepared to venture upon any suggestions for alterations in the particulars alluded to in Question 5. It is hardly necessary to observe that of all the parts of our Academical system, the Mathematical Tripos is that which has obtained the largest share of attention and solicitude on the part of the resident members of the Senate and the greatest reputation in the country. The present form of the Examination, whatever imperfections it may still possess, has been arrived at after a long period of years by the successive deliberations of Syndicates or Committees appointed by the Senate, with definite powers of offering suggestions and amendments, through a formal Report printed and published bearing the signatures of the Syndics, and voted upon by the Senate after ample time allowed for consideration. The greatest care is always taken in selecting persons to form

Rev. R. Phelps, D.D.

Mathematical Examinations.

these committees. And it seems to me that it would be impossible to combine higher qualifications for effecting any proposed object than have generally been secured for deliberating on these measures. Consequently, without pretending that the best possible form of Examination in all respects has necessarily been obtained, I am persuaded that no better mode can be devised of progressing towards that condition than the one which has hitherto been so successfully practised.

Question 6.—In what manner, &c., &c.?

Board of Mathematical studies.

The manner in which the Board of Mathematical studies was intended to act, and does act, on the course of University reading, is, 1st, as regards suggestions of change or amendment, by the influence exercised by their Reports on public opinion in the University. For if such suggestions meet with general approval, they are sure to be taken up and embodied in a Grace to be offered to the Senate, as has already happened. And, 2nd, the Board is calculated to act very beneficially by the weight which the deliberate and joint counsel of such a body will naturally have with the Students themselves in general.

Questions 7 and 9.—Would you be disposed, &c.?—Is it your opinion, &c.?

Limitation of Subjects.

Questions 7 and 9 involve matters of the greatest importance. I confess that I am disposed to agree in principle with what I cannot but regard as the suggestions of those questions, but I think the detail of any measure founded thereon would require the very careful deliberation of a Syndicate, and I would by no means venture to put forth in reply any scheme of my own, even were I prepared with such, unless I had arrived at it in joint consultation with others duly appointed. Perhaps the general view which persons take of the matters alluded to in Question 7, will depend in some measure upon what they consider to be the main object of an University. There are certainly two distinct objects, and those not at all incompatible with one another; but yet I conceive that as a person inclines to assign the greater degree of importance to the one or the other of these objects, so will his views be modified in regard to the question of limiting the range of the academical course. The two objects to which I allude are, 1st, to promote science and learning in the sense of extending their boundaries, by cherishing and stimulating talent of the highest order, and by encouraging and assisting the development of genius. 2nd, to present to the general body of the students the best form of a liberal education, including, of course, religion and philosophy.

I am of opinion that both these objects should be, and may be kept in view; but I can imagine a person giving such a preponderance to the one as almost to lose sight of the other. Indeed I am persuaded that many difficulties and much agitation on academical questions ought to be referred to this two-fold view of the proper design of an University. For instance, I think that that very want of uniformity in the several colleges in which some persons find so great an evil, and which it has been proposed to correct in one respect, by the establishment of an *University* admission examination, in contradiction to a College admission examination, entirely loses its evil aspect to those who assign much importance to extending as widely as possible the sphere of usefulness of the University, in regard to the 2nd of the above named objects.

Questions 8 and 11.—What are the usual English, &c.?—What is the course usually followed, &c.?

Books used in the University.

Twenty or thirty years ago, most lecturers, as well as private tutors, taught from Manuscripts. And the necessity there was for that practice gave rise in a great measure to the system of private tuition which has prevailed to so great an extent of late years. I cannot conceive, however, that any such necessity exists at the present time, when there is so great a number of works, both French and English, of first-rate excellence on every branch of Mathematics. Indeed so ample is the information to be obtained from printed books, and so varied the form in which that information is laid down and illustrated, that I can hardly imagine any one of ordinary mental powers and industry requiring a Private Tutor or any other guidance than what is given to him in his College lectures. If to this it be objected that the extent of the course in which students are examined who are candidates for Mathematical honours is so great that they require all the forcing and way-smoothing which the system of private tuition is calculated to afford, then I would suggest that it may be doubted whether the superior efficacy of the more independent course of study in strengthening and developing the powers of the intellect would not more than compensate for some difference in the amount of knowledge acquired.

Private Tuition.

Undoubtedly many of the Private Tutors in the University are men of great eminence, both for their attainments and for their skill in teaching; and I should much regret the adoption of any measures which would deprive the University of the benefit of their services. Still I am decidedly of opinion that the almost universal recourse which our students have to the assistance of private tuition is an evil very much to be lamented. It not only adds at once a large sum to the expense of University education, but, as I think, in very many cases prevents the student from deriving all the benefit which his academical course might and ought to yield him.

I am of opinion that private tuition would be considerably diminished if the University were to adopt and issue authoritatively a settled course of Mathematics. It would probably not be very easy to select such a series of treatises out of those already published as the Members of the Senate would agree to adopt as the Cambridge course of Mathematics. But as such a course would be required to contain only the well-known and essential propositions of each subject, I do not see why the University should not appoint a Syndicate

Rev. Dr. Phelps.

of its most eminent resident Mathematicians to deliberate upon, and settle the order and form of demonstration of those propositions.

Question 12.—What inducements, &c., &c.?

Inducements to continue Mathematical Study.

It cannot be expected, nor can it be desired, that Students *in general* should so devote themselves to Mathematics, after taking their first degree, as to become candidates for further honours or prizes. The number of Students whom it would be desirable so to stimulate and encourage would be small. And for that end I am of opinion that a succession of prizes, say three, to be adjudged at the end of each of three consecutive years, from the time of the B. A. degree, would be found effective. Such prizes, however, ought to be substantially valuable; a gold medal presented in the Senate House, for instance, as a public commemoration of the honour, and a sum of money sufficient to induce a student of small means to devote his time to the competition, instead of giving it, as he probably otherwise would, for a maintenance, to private tuition. I would add, that on this consideration there ought also to be a second prize of money, but not a second medal in each case. Some such plan as this, it seems to me, would be a very fit and proper step for the University to take, if it had the means, towards the fulfilment of the first of those two great branches of its duty to which I before alluded, as regards at least one department of knowledge. And moreover, it would remove objections to limiting the range of the subjects examined in for the Mathematical Tripos.

Rev. H. Philpott. D D.

Answers from the Rev. H. Philpott, D.D., Master of Catharine Hall.

Mathematical Examinations.

I. The Senate appoints, in the beginning of the Michaelmas Term of every year, two Moderators and two Examiners, whose business it is to ascertain the proficiency in Mathematics and Natural Philosophy of the persons who are candidates for honours in the Mathematical tripos of that year. The Examiners are required (by Grace, March 20, 1779) to be, in general, the persons who held the office of Moderator in the preceding year, and they are each to have equal voice with a Moderator in determining the list of honours.

Two other Examiners are also appointed by the Senate about the same time, to ascertain the proficiency in Mathematics of those candidates for the degree of B.A. in the examination of the following January, who do not seek for mathematical honours; and those Examiners are generally the persons who were Moderators in the year next but one preceding.

The examination of the candidates for honours commences on the Tuesday next succeeding December 30th in every year, and is continued for three days. The subjects of examination during these three days are defined to be, Euclid, Conic Sections, Arithmetic, Algebra, Plane Trigonometry, the Elementary parts of Statics, Dynamics, Hydrostatics and Optics, the first three sections of Newton's Principia, and the Elementary parts of Plane Astronomy. The examination is conducted entirely by printed papers of questions being placed before the candidates, and a certain fixed time allowed for answering the questions in every paper; the written answers to the questions are carried away by the Moderators and Examiners and examined in their own rooms.

On the Saturday of the following week, the Moderators and Examiners declare what persons have shown sufficient proficiency to deserve places in the list of honours, and also what persons, though not sufficiently qualified for honours, have yet acquitted themselves in the examination well enough to be allowed to pass for an ordinary degree so far as the subject of mathematics is concerned.

Amount of Mathematical knowledge required for the first degree.

The examination of those persons who have been declared to deserve honours is then resumed on the following Monday and continued during five days. It embraces all the other parts of Mathematics and Natural Philosophy, which are the subjects of study in the University, and is conducted in the same manner as the examination of the first three days.

At the close of the examination the candidates are finally arranged in three classes, called respectively Wranglers, senior Optimes and junior Optimes, and the names are placed in each class according to merit; the examination of all the eight days having been taken into account.

The examination of those candidates for the degree of B.A. in January, who do not seek mathematical honours, so far as regards their proficiency in Mathematics, occupies part of each of three days, and is conducted by the two Examiners appointed for the purpose, in the same manner as the examination of the candidates for honours, viz. by requiring written answers to questions in printed papers, a fixed time of three hours being allowed for answering the questions in each paper. The subjects of examination are the first three books and first six Propositions of the sixth book of Euclid, certain specified rules of Arithmetic and Algebra, and certain prescribed elementary propositions and principles of Mechanics and Hydrostatics.

Besides the general examination in January, there are three additional examinations for B.A. degrees in every year—the first commencing on the Thursday preceding Ash-Wednesday, the second on the Thursday preceding the division of the Easter Term, and the third on the Thursday preceding the division of the Michaelmas Term. The mathematical part of the examination embraces the same subjects and is conducted in the same manner as the examination in January, the Examiners however being always in these cases the Moderators for the time being.

Changes in the Examinations.

Several changes have been made of late years in the examination of candidates for mathematical honours; he most important of them having been made at the respective dates

November 14, 1827	June 2, 1838
April 6, 1832	May 13, 1846

Rev. H. Philpott, D.D.

Changes in the Examinations for Honours.

(1). The time of commencement of the examination, and the interval between the commencement and the final publication of the list of honours, comprehending as well the time allowed for answering questions as the time spent by the Moderators and Examiners in considering the answers, have been altered as follows:—

Before 1827 the examination began on the first Monday in the Lent Term, and the list of honours was published 5 days after (excluding Sunday).

After 1827 the examination began on the Friday before the first Monday in the Lent Term, and the list of honours was published 7 days after (excluding Sunday).

After 1832 the examination began on the Thursday before the first Monday in the Lent Term, and the list of honours was published 8 days after (excluding Sunday).

After 1834 the examination began on the Wednesday before the first Monday in the Lent Term, and the list of honours was published 9 days after (excluding Sunday).

After 1838 the examination began on the Monday before the first Monday in the Lent Term, and the list of honours was published 11 days after (excluding Sunday).

After 1841 the examination began on the Wednesday week before the first Monday in the Lent Term, and the list of honours was published 15 days after (excluding Sunday).

After 1846 the examination began on the first Thursday after January 1, and the list of honours was published 19 days after (excluding Sunday).

And in 1851 the examination began on the first Tuesday after December 30, and the list of honours was published 21 days after (excluding Sunday).

(2.) The time allowed to the candidates for answering questions was

Before 1827,		3	days	comprising	18	hours examination.
After 1827, it occupied		4	„	„	23	„ „
After 1832,	„	5	„	„	27½	„ „
After 1838,	„	6	„	„	33	„ „
After 1846,	„	8	„	„	44½	„ „

Also before 1832 part of the examination was held in the evening, but by the change then made the evening examinations were discontinued; and the candidates have been since examined twice only in each day, and during 2½ hours or 3 hours at each time.

(3.) The questions proposed consisting of two kinds, first, propositions contained in books which are commonly used in the University, together with simple examples and applications of the principles which they involve, and secondly, Problems; the time allotted to the two kinds respectively has been determined as follows:—

Before 1827, for questions from books,		10	hours—	for Problems	8	hours.
After 1827,	„	15	„	„	8	„
After 1832,	„	19	„	„	8½	„
After 1838,	„	24½	„	„	8½	„
After 1846,	„	32½	„	„	12	„

(4.) Again, before 1827 the candidates for honours were divided into six classes previously to the examination, such classes being determined by the exercises in the public schools, and different questions for the most part were proposed to the different classes. The exercises of the schools thus contributed indirectly to the final result of the examination, and had a share in determining the honour gained by the student.

In 1827 the number of such classes was reduced to four, and the Examiners were allowed to propose the same questions to the different classes as they should think fit—accordingly all the questions from books for the first two days and all the Problems were made common to all the classes.

In 1832, the number of classes being still four, the same questions were directed to be proposed to all the classes for four out of the five days of examination.

In 1838 the division of the candidates into classes before the examination was discontinued, and the exercises of the schools ceased in consequence. Since that time the same questions have been proposed throughout the examination to all the candidates, and the final result has been made to depend entirely on the written answers to printed questions and problems.

(5.) Again, before 1827, the problems only being printed, all the questions taken from books were proposed *vivâ voce* to the candidates, and the answers given in writing, no question being given out until those which had been previously proposed were answered by some one or more of the candidates.

In 1827 it was directed that all the questions for each time of examination should be printed and placed at once before the candidates, care being taken that the number of questions in each printed paper should not be more than students well prepared have generally been found able to answer in the time allowed. It was provided, however, that if the Moderators and Examiners should be satisfied that any candidate had answered all the questions in the paper, additional questions should be given out *vivâ voce*. I believe, however, that very few instances occurred where such *vivâ voce* questions were thought necessary: the subsequent Regulations of 1832 did not contain any such provision, and the examination since that time has been entirely conducted by printed papers.

(6.) Again, previously to 1846 it was provided that, after the result obtained from examining the answers of the candidates to the printed questions and problems, if the Examiners should have any doubt respecting the relative merits of two or more candidates they should be at liberty to re-examine the candidates on the day before their admission to degrees. The questions proposed on that day were necessarily given *vivâ voce*, and other persons were occasionally called in to propose questions and assign the proper degrees of merit to the answers. For some years, however, before 1846, the practice of re-examining candidates on the day

Rev. H. Philpott, D.D.

before admission to degrees had fallen into disuse, and by the change then made, the final list of honours was directed to be published on the morning of that day without any opportunity of re-examining the candidates.

It will be seen that by the changes which have been described, the *duration* of the examination has been continually lengthened, both as respects the time allowed to the candidates for answering questions, and the time spent by the Examiners in considering the answers; also, that the time devoted to *questions from books* has been increased in a much greater degree than the time allowed for *problems*.

The alterations have also led gradually to the result of proposing *the same questions* to all the candidates, the conviction appearing to gain ground by degrees that the relative merits of different candidates can not be fairly determined unless they are all tested by the same examination.

The practice of *printing* all the questions and problems seems to have been confirmed by the deliberate judgment of the Senate as tending to give a fixed character to the examination, and by making the nature of it known to guide the students in their course of reading. Another object by which the Senate has professed to be guided in this matter is to show whether each of the several subjects of examination has had its proper share of attention in the papers.

It should be stated, also, that in every plan of examination which has been sanctioned by the Senate it has been carefully provided that their due weight and influence should be given *to the elementary parts* of mathematical subjects of study, so that students may not be tempted to pass with haste and inaccuracy over the fundamental principles. Three days out of eight are at present entirely devoted to such elementary subjects, and they are also allowed their full share of attention during the remaining five days.

Mathematical Examination for the B.A. degree.

The mathematical examination of persons proceeding to the degree of B.A., who are *not candidates for honours*, was materially changed in the year 1837. Previously to that time the examination occupied parts of two days, and embraced on the 1st day the first four Books of Euclid, which were considered *necessary* for all students, and also Propositions in the 5th, 6th, and 11th Books of Euclid, and in Plane Trigonometry, at the discretion of the Examiners, the answers to these latter questions being taken into account in assigning relative degrees of merit to the successful candidates. The examination on the second day embraced questions in the elementary parts of Arithmetic and Algebra, in which it was required that every candidate should pass a satisfactory examination; and also, as before, questions at the discretion of the Examiners in the higher parts of Algebra and some of the elementary parts of Natural Philosophy, these latter questions not being proposed as indispensable for all the candidates, but only to such as wished to gain distinction in the list of commencing Bachelors of Arts.

In the year 1837 the examination was extended to three days, and was, at the same time, made more fixed and definite for all students; on one day the examination was to embrace the first three Books of Euclid, and a part of the sixth Book; on the second day, Arithmetic and Algebra, not exceeding the theory of ratio and proportion; and, on the third day, certain prescribed Propositions in Mechanics and Hydrostatics (46 in number); and every candidate was required to pass an examination satisfactory to the Examiners in every one of these three subjects.

In 1846 the subjects of examination were slightly extended by adding the theory of Equations of the first and second degree to the Algebra, and requiring the paper of questions on Mechanics and Hydrostatics to contain, also, simple examples and applications arising directly out of the specified propositions. The list of commencing Bachelors of Arts, not candidates for honours, which had been previously arranged according to merit, was directed to be discontinued, and four classes were substituted for it, arranged according to merit, but the names in each class being placed in alphabetical order.

Improvement in Examinations.

2. The changes which have taken place of late years have unquestionably made the examinations more searching and severe than they were formerly. The practice of determining beforehand and printing all the questions to be proposed, and the increased time allowed for the examination, have tended to secure for every subject and branch of study its due share of attention. The Moderators and Examiners, also, by having access to the papers of former years, are better able to put their questions in a way calculated to test the accuracy and extent of the student's knowledge. I do not think, however, that any great change in regard to the searching and severe character of the examination has been made during the last fifteen or sixteen years, nor does it appear that the examinations, as now conducted, leave anything to be desired in this respect.

The examinations now embrace a wider range of subjects than formerly, and many branches of study have been introduced which require extensive reading, and much patient thought and time for comprehending them. Attention, however, has been fully secured to all elementary subjects and parts of subjects, especially since the alteration of 1846, by devoting a large part of the time occupied by the examination entirely to such subjects.

Problems.

Questions and problems have been sometimes proposed in new subjects, which have been considered by some persons not sufficiently elementary, or not sufficiently recognized in the usual course of study to be allowed to form a part of the examination in general. It is to be expected that the recommendations of the recently constituted Board of Mathematical Studies will exercise an important and salutary influence in this respect, by guiding the Moderators and Examiners in their introduction of new subjects, and by checking the tendency which may be felt occasionally by an Examiner to propose questions on what may happen to be his own favourite subject of pursuit or study.

Rev. H. Philpott, D.D.

3. The candidates for a common degree are required to pass a satisfactory examination in every one of the three following subjects:—

(1.) Euclid, books 1, 2, 3, and the first six propositions of book 6.

Course of Mathematical study for the first degree.

(2.) Arithmetic and Algebra, as defined in a schedule fixed by grace of the Senate. It may be sufficient to state, that the examination in Algebra extends only to easy equations of a degree not higher than the second involving one or two unknown quantities and questions producing such equations.

(3.) Certain elementary propositions and principles in Mechanics and Hydrostatics (forty-six in number), prescribed in a schedule also fixed by grace of the Senate, together with simple examples and applications.

It is difficult to state, with any approach to accuracy, the minimum of knowledge that is required for a place on the tripos: it can only be said, that no person is allowed to obtain an honour who does not pass a satisfactory examination in the subjects appointed for the first three days, it not being required that he should be approved in every one of the several papers (as in the case with candidates for common degrees), but only that he should show a sufficient amount of knowledge during the whole course of the three days' examination. The subjects appointed for these three days are—

Euclid, books 1—6, propositions 1—21 of book 11, and propositions 1 and 2 of book 12.

Arithmetic, and the elementary parts of Algebra.

The elementary parts of Plane Trigonometry, so far as to include the solution of triangles.

The elementary parts of Conic Sections, treated geometrically.

The elementary parts of Statics, Dynamics, and Hydrostatics, treated without the Differential Calculus.

The first three sections of Newton's Principia, the propositions to be proved in Newton's manner.

The elementary parts of Optics, not including aberrations; and the theory and construction of telescopes.

The elementary parts of Astronomy, so far as they are necessary for the explanation of the more simple phenomena, without calculation.

Qualifications for Honours.

I think that there has been no great tendency of late years to raise the standard of qualification for mathematical honours. It was intended in 1846, by the regulations then made, to render that standard more fixed and certain by defining the subjects of examination for the first three days.

The standard of mathematical attainments required for a common degree was raised in 1837, when the subjects of Mechanics and Hydrostatics were introduced for the first time; and again slightly in 1846, when the theory of equations of the first and second degrees was added, but I do not think that in other respects the standard of qualification has been materially altered of late years.

4. I have no means of answering this question.

Vivâ voce Examinations.

5. I am inclined to think that much advantage would be gained towards bringing into evidence the amount and accuracy of a student's knowledge, if part of the examination were to be conducted *vivâ voce* in the way of question and answer, every candidate being examined publicly in this way by one or more of the Examiners respecting the principles of the several subjects of his reading and their application, and credit being given to him for his answers, which should be added to the credit given for his written answers to printed questions and problems, and be thus taken into account in determining his final place of honour. My experience as Moderator in the years 1833, 1834, and 1836, when the exercises in the schools were still kept up, led me to attach great value to the examinations *vivâ voce* which those exercises gave the means of holding; and I think that a test may be thus applied to the accuracy of many parts of a student's knowledge, which would be more efficient and trustworthy than that which is given only by written answers to questions proposed all at one time.

I am also inclined to think that too much advantage is occasionally given to quickness of writing and readiness in producing knowledge by the number of questions proposed to be answered in a given time. Examiners of experience are aware of the error which may be committed in this way, and are generally disposed to allow longer time for answering questions than persons of less experience think necessary. It is difficult, however, to lay down any rules on this subject for the direction of Examiners other than the general regulation which has been made by the Senate, that the papers proposed should not contain more questions than students well prepared have generally been found able to answer in the time allowed for them.

Problems.

The two papers of problems, proposed respectively by the Senior and Junior Moderators, have been sometimes complained of as containing too many questions, and questions of too difficult and complicated a nature to be answered in the time (three hours each) allowed for them. The complaint is perhaps not altogether without foundation as it respects the difficult character of some of the problems requiring for their solution long processes of complicated analysis and reasoning. It is not, however, expected that a student should be able to answer all the questions proposed in each problem paper, but rather it is intended, by proposing a variety of questions in different subjects, to give every student an opportunity of showing whether he can make application for himself of the principles which he has learnt from books. In this respect a collection of easy problems is of great service, as testing the soundness and accuracy of the student's knowledge; and it would surprise many who are disposed to complain of the length and hardness of the problem papers, to learn how many and how satisfactory are the solutions given by ready and well-prepared students. It would be obviously impolitic to attempt to fetter the discretion of Moderators by too close and formal directions respecting their problem papers.

Rev. H. Philpott, D.D.

After an attentive consideration of the questions proposed throughout the examinations for some years past, I am disposed to think that they have been in general well adapted to draw forth and shew the actual knowledge of the students, and that the result obtained from considering the answers to them has been true and trustworthy in determining the relative merits of the candidates for honours.

Board of Mathematical Studies.

6. The Board of Mathematical Studies was appointed (October 31, 1848) by a grace of the Senate, confirming the Report of a Syndicate which recommended the measure. The object of the appointment of the Board will be best made to appear by reciting the words of the Syndicate referring to it, and which the Senate adopted by the grace. The Syndicate recommend the formation of such a Board "with a view to encourage attendance at the lectures of the Mathematical Professors, and to insure a correspondence between those lectures and the mathematical examinations of the University, and also as a means of communicating to the students themselves, from a body of experienced Examiners and Lecturers, correct views of the nature and object of our mathematical examinations." The Syndicate further proposed that it should be the duty of the Board "to consult together from time to time on all matters relating to the actual state of mathematical studies and examinations in the University, and to prepare annually and lay before the Vice-Chancellor a Report to be by him published to the University in the Lent or Easter Term of each year."

The words which thus define the duty of the Board, and the object aimed at by appointing it, serve perhaps sufficiently to mark out the way in which it may be expected to act on the course of University reading. It seems to be required that the Board should consider from time to time the mode of conducting examinations and the questions and problems actually proposed in them; and put forth recommendations suggested by such consideration which may serve as a guide to Examiners and Students afterwards; advising, for example, the omission or restriction within prescribed limits of such subjects or parts of subjects as appear to them either to be of little value in themselves, or to occupy a larger share of the student's time and attention than can be profitably devoted to them; or again, advising the introduction of problems and questions relating to subjects which the Mathematical Professors are accustomed to treat in their lectures, or which may have acquired interest and importance by researches recently made, or which may have been presented by recently published books in a form adapted to the reading of students.

It does not appear that the Syndicate in recommending the appointment of the Board, or the Senate in adopting the recommendation, thought it to be necessary to define the exact amount of authority which the Board should have in effecting changes in the mode of conducting examinations. The terms used imply a power of recommending and suggesting changes rather than any authority to make positive laws without reference to the Senate. It is difficult to conceive that the recommendations made by such a body of persons as constitute the Board, so far as they do not interfere with any positive regulations made by the Senate, should not be readily adopted and carried into effect by the Moderators and Examiners.

It may be observed that in each of the two Reports which the Board have submitted to the Vice-Chancellor, it has been suggested that he should offer a grace to the Senate for confirming their recommendations: the points to which the recommendation in both cases referred having been previously determined by grace, it seems to have been considered by the Board that the authority of the Senate was necessary to make any change in them. In each case a grace to confirm the recommendation was offered to the Senate, and passed without opposition.

The Board has hitherto published only two Reports, but the recommendations made in them affect to a considerable extent the course of reading in the higher parts of mathematics. They refer mainly to the omission of problems and questions on subjects respecting which it was before in some degree uncertain, whether they were to be regarded as a part of the regular course of reading or not. It would be necessary to recite the Reports themselves in order to give a full account of the recommendations; it may be sufficient to state in general on this head, that the Board have recommended the entire omission in examinations of the Mathematical Theories of Electricity and Magnetism and Heat, and also of all investigations, (1) which either are of little interest, or relate to methods that have become obsolete; (2) which are imperfect or unsatisfactory, or involve questions about which mathematicians are not agreed; (3) or which lead to long analytical processes, in the several subjects of the Theory of Equations, Integral Calculus, Laplace's Coefficients, Hydrostatics, Hydrodynamics, Common Optics, Plane Astronomy, the Lunar and Planetary Theories, the Theory of the Earth's figure, and the Theory of Light.

The Board have also recommended in both Reports that the papers containing the questions from books should be shortened, in order to allow more time for the solution of the examples and deductions attached to such questions. In their Second Report, the Board also recommended that the examination should commence earlier, so as to allow two days more time to the Examiners for their perusal and consideration of the papers written during the first three days.

I conceive that results of a very beneficial nature may be expected to follow from the superintendence thus exercised by the Board over the examinations, and the course of reading of the candidates for honours.

7. I entirely concur in the recommendations which have been already published by the Board of Mathematical Studies for the limitation or omission of the subjects and parts of subjects named by them as requiring "a refined and laborious analysis."

Prizes.

It would perhaps be premature to express any decided opinion respecting the establishment of special prizes for proficiency in the higher branches of mathematics at periods subsequent to the degree of B.A., until the University shall have been able to estimate the effect of the

Rev. H. Philpott, D.D.

Adams Prize lately instituted. It must not be lost sight of, however, in considering the subject, that many of our students who obtain the highest mathematical honours are obliged by circumstances to give up the study of mathematics either wholly or in part after taking the degree of B.A., in order to qualify themselves for professional or other pursuits, or to engage in more active duties. It is probable that some of our best men would thus be unable to compete for what ought to be considered our highest mathematical honours, the special prizes referred to being awarded for proficiency in the highest parts of mathematics; and the competition for them might thus be left to persons of inferior attainments and ability. Three years of close reading and study of this kind of academical learning may perhaps be considered to be as long a time as could be advantageously devoted to such subjects by the most promising of our students.

I am, also, inclined to think that the particular subjects mentioned in this question, and which require "a very refined and laborious analysis" for their treatment, cannot advantageously be made the subjects of examinations of the same nature as the present examination of the candidates for mathematical honours.

Elementary Mathematics.

It is considered, I believe, that very full attention is secured by the existing regulations from all candidates for honours to the elementary subjects and principles of Mathematics. The Board of Mathematical Studies found reason, upon inquiry, to think so; for they say in the Report of 1849, that "generally, the candidates who acquitted themselves best on the first three days of examination" (when the subjects are all elementary) "were also the most successful in the remainder, and that it never happened that those who acquired little credit in the first part of the examination attained eventually to a high place in the Tripos." I believe also that it may be stated in general of *all* the candidates for honours, that the knowledge shown by them deserves great commendation for its high character and accuracy. Notwithstanding, however, the care which the University has bestowed upon this matter, I am of opinion that the course of reading pursued by the advanced students has been too extensive, and that it may be restricted with advantage. The recommendations lately made by the Board of Studies will have effect for good in this direction, and more benefit of the same kind may be expected from their continued superintendance.

Lectures.

8. Not having been engaged directly in mathematical lectures or examinations for several years past, I consider that I am not competent to give a sufficiently precise and accurate list of the elementary mathematical books now used in the University.

During the time that I was engaged in giving mathematical lectures in College (from 1829 to 1845) a great addition was made to the number of elementary books published for the use of students. Manuscript compilations of the nature described were in much use formerly, but the supposed necessity for them no longer existed after the publication of the books to which I refer, and I believe that they gradually went out of use, and were considered to be of little value by the great body of students. I am not aware that such compilations have been made or circulated to any extent of late years, and I think that they are not now generally used.

I think that the use of such compilations is objectionable because they are not so generally accessible as printed books, and require the student almost of necessity to have recourse to the aid of Private Tutors who possess or make them. The composition of them, moreover, cannot be expected to be executed with so much care and accuracy as that of treatises which are published and exposed to general remark; a loose and unsatisfactory method of treating subjects would be encouraged by the use of them, and the attention of our students diverted from the study of more able and profitable works.

The regulations made by the Senate at different times direct that in those parts of the examination which are not devoted to problems the questions and propositions proposed should be taken from *the books* which are in common use, and I consider that it was one object of this rule to discourage the use of the MS. compilations in question. The Moderators and Examiners have it much in their power (and the regulation referred to seems to oblige them to use such power) to discourage the use of such MS. compilations by selecting their questions and propositions from printed books accessible to all students, and by taking care that the illustrations and examples proposed by them should be, as far as possible, original.

Tendency of the course of Mathematical study.

9. In the regulations which have been made of late years by the Senate for the conduct of examinations, care has been taken to provide that the course of mathematical study should not become too exclusively analytical and symbolic.

Thus in 1827, when the examination was made to occupy four days, it was directed that on the first day such parts of pure mathematics and natural philosophy only should be embraced as do not require the methods of the differential calculus; and on the second day, only the simpler applications of the calculus were to be admitted.

Again in 1832, when the examination was extended to five days, similar regulations were made, the differential calculus being altogether excluded on the first day, and only the simpler applications of it admitted on the second and third days; on the fourth day also, care was to be taken that there be some questions suitable to the lower classes.

In 1838, when the examination was extended to six days, the regulations were similar, one day only being allotted exclusively to the higher parts of the subjects of examination.

In 1846 the regulations made in this matter, and which are still in force, were yet more stringent, three out of the eight days of examination being entirely assigned to the elementary parts of Mathematics. A large portion of Euclid is made indispensable; the examination in Algebra and Plane Trigonometry is restricted to the elementary parts; Conic Sections are to be treated *geometrically;* Statics, Dynamics, and Hydrostatics are to be treated *without the Differential Calculus;* the Propositions of Newton's Principia are *to be proved in Newton's manner;* such elementary parts of Astronomy only are to be admitted as are necessary for the

Rev. H. Philpott, D.D.

explanation of the more Simple Phenomena *without calculation.* The elementary parts of Optics also were to be treated *geometrically,* though this restriction has since been abandoned on the recommendation of the Board of Mathematical Studies, who state that "the attention of the candidates to geometrical reasoning is sufficiently secured by other subjects of examination on the first three days."

The regulations thus in force respecting the mode of treating *all* the elementary subjects seem to be sufficient for preventing the course of reading, so far as it regards those subjects, from becoming too exclusively analytical and symbolic.

The mode of treating the higher parts of pure mathematics and natural philosophy is necessarily more analytical and symbolic than formerly from the great power which the methods of analysis now possess for mathematical investigations. It is a question, however, of great interest and importance how far the higher processes of investigation in pure mathematics, and the application of difficult and refined analysis to problems of natural philosophy, may be advantageously introduced into our examinations and the course of reading of our Students. The recommendations of the Board of Mathematical Studies have been already mentioned as calculated to exercise a beneficial control over our examinations in this respect, and I see no reason to doubt that with such control, and with the restrictions already in force respecting the lower subjects, the attention of our students may be prevented from being fixed unduly upon symbols, to the neglect of processes of investigation and proof which require more direct exercise of the reasoning powers.

Problems.

10. I do not think that the time assigned to problems in the examinations for mathematical honours is too great in comparison with the time assigned to questions from books. The tendency of all the late changes has been to increase the time assigned to questions from books in a greater proportion than the time allowed for problems, and I think that, considering the value of such exercises in testing the accuracy and the facility of application of the knowledge of students, the problems do not now occupy too large a share of the whole examination.

Of the four papers of problems now proposed in every year, occupying three hours each, one is restricted to the elementary subjects treated in the first three days of examination, and another is directed to be a paper of "*Easy Problems,*" two only being left to the unfettered discretion of the Moderators, in which they may test the skill of the more advanced students in the higher parts of mathematics.

There are sometimes, perhaps, occasions when fault may not unreasonably be found with particular problems as partaking more of the character of mathematical puzzles and riddles, requiring particular tact for their solution, than of fair instances of application of sound philosophical and mathematical knowledge, but I am far from thinking that such problems are of very frequent occurrence. I should say with reference to the problems proposed in general of late years that they have been "*for the most part* so proposed as to admit of their being readily apprehended, and their solution effected by a student who thoroughly understands the principles and applications of the branches of mathematics upon which they depend." I have been led to form this opinion as well from perusal and consideration of the problems themselves, as from the knowledge of the large number which are well and completely solved in every year by the better class of students.

I am disposed to think that the number of problems in each paper might be diminished with advantage, care, however, being taken that the problems proposed during the examination embrace a sufficient variety of subjects.

Private Tuition.

11. Students, who are well advised, endeavour to prepare themselves for the examination for honours by strict and industrious attendance on the College lectures, which treat of the subjects of examination in order. They have the opportunity also of testing their knowledge from time to time and of exercising and accustoming themselves to examination by the several College examinations, which are held during their time of residence and more particularly during the term previous to the examination for B.A. degrees.

I believe that the notion prevails extensively among the students that the continued assistance of a private tutor is indispensable for the attainment of high honours, but I think that this notion does not rest on any good foundation. I am inclined to think, on the contrary, that the continued reliance on a private tutor is in many cases of great injury to the student, and that much sounder and more knowledge would have been acquired, and a higher honour gained if the student could have been persuaded to rely more on his own strength and resources, and either to depend altogether for guidance and assistance on his college tutor, or to have recourse only occasionally, and towards the end of his course, to the help of private tuition. Instances occur repeatedly of failure to obtain high honours in the case of students who have had the benefit (as they consider it) of continued private tuition, and instances are also to be found, in sufficient number to prove the advantage of reliance on a student's own personal exertion, in which high honours have been gained by students who have had little or no private tuition.

It cannot be denied that private tuition may be of great advantage in mathematics, as in all other subjects, when both the tutor and the student are disposed to avail themselves of the opportunity properly. Private tuition is valuable when the tutor endeavours to assist the mind of the student to exert itself, and points out sources of information and modes of exercise of mind, and encourages a regular and systematic course of study, and when at the same time the student avails himself of the advantage properly. But it cannot fail to be injurious when it attempts to supply, by ready prepared scraps of information, the pupil's own exertion of mind, and to prevent him from searching for himself or using his own faculties in acquiring knowledge. I conceive that good private tuition must thus always have a positive value in education, and while its value is recognised and felt to be important in securing the rewards of competition, it is difficult to prevent abuses of it from growing up also side by side with its advantages.

Rev. H. Philpott, D.D.

There are at the present time many men of eminent abilities and attainments residing in Cambridge, who devote themselves to the private instruction of students as a professional pursuit; and the money spent by students in procuring their assistance adds considerably to the expenses of their residence at the University.

The Senate has made regulations at several times to prevent or restrain the use of private tuition, and the last of such regulations, made in 1824, and which prescribes that a candidate for honours should not use the assistance of a private tutor in the University for six months previous to his application for a degree, remains still unrepealed, though it has long ceased to be regarded in effect. All such attempts to put an end to private tuition by prohibition seem to have failed, and I am inclined to think (if it were supposed to be desirable to renew such attempts) that means would be still found to defeat them. The remedy to be adopted against *the abuses* of private tuition seems to me to be looked for from other sources than from direct prohibition. One most obvious means of checking such abuse is to be found in carefully watching and guarding our examinations, by asking the candidates for such kinds of knowledge, and by putting the questions in such a way, that the difference may be made to appear between those who have learned by rote and those who have really exercised their own minds in the acquisition of knowledge; again, the attempts which have been made of late years, and which are still going on, to make the course of study for a common degree and for honours *definite and well known*, may be expected to have effect in showing the students that the assistance of a private tutor may, in many cases, and for the greater part of residence, safely be dispensed with.

Another obvious mode of restraining private tuition is by increasing the number and value of the public College lectures. The students in a College might thus be divided into a greater number of classes, each class containing persons of nearly the same degree of attainment or capacity, and the superintendance of each class by the College lecturer be thus made more nearly to approach to the method and give the advantages of private tuition. If the fee paid for College tuition (10*l.* for a pensioner per annum) were increased, an arrangement might be made which would enable tutors of Colleges to secure the assistance of some of the distinguished members of other Colleges, or of graduates living in the town (as is even now the case in some instances), to aid in conducting the course of education of the students, and in preparing them as candidates for mathematical and other honours.

Another obvious mode of attempting to check the abuse of private tuition seems to be to open out in greater number different courses of study and of competition for honours (such as those provided by the recently constituted Triposes for Moral and Natural Sciences), so as to provide scope, according to the tastes and inclinations of students, to the free and independent efforts of their own minds.

Inducements to continue Mathematical Study.

12. In some Colleges the examinations for Fellowships hold out inducements to Bachelors of Arts who have obtained honours, to continue their course of mathematical study and retain the knowledge acquired by them.

In all Colleges, also, tutors and lecturers are required to keep up their mathematical knowledge, and to make themselves acquainted with the actual course and system of study, in order to carry on the instruction of students who compete for honours.

The office of Moderator.

The office of Moderator, also, is considered highly honourable, and reflects credit on those who discharge its duties well; and the expectation of being invited to fill that office induces many Bachelors and Masters of Arts, who have followed the study of mathematics successfully, to retain and extend and complete their attainments in mathematical knowledge. Before the discontinuance of the disputations and examinations in the public Schools a severe test was applied by those disputations and examinations to the accuracy and extent of a Moderator's knowledge, and to his familiarity with the subjects of study; and it required a continuance of careful study for a Moderator to discharge the duties of his office with credit. The examination being now entirely conducted by printed papers, the test applied to the Moderator's knowledge is not so severe as it was, yet still severe enough, it is considered, to ensure a careful continuance of mathematical study.

The several mathematical professorships of the University, the Lucasian, the Plumian, the Lowndean, the Jacksonian, hold out inducements to the more distinguished members of the University to continue the study of mathematics and natural philosophy, and to seek for distinction in pursuing it, in order to qualify themselves for election, and for the discharge of the professorial duties.

Prizes.

I do not think that the deferring the examination for the Smith's prize to a later period, such as one or two years after admission to the B.A. degree, would have any beneficial effect in promoting the study of mathematics in the University. I have already said (under Question 7), that three years continued and close study of strictly academical subjects is perhaps as much as can be considered desirable for students intended for the active pursuits of professional life; and if the examination for the Smith's prizes were deferred for one or two years, it is to be feared that many of our best students would not remain in the University for them, and that the competition might thus be left to persons of inferior abilities and attainments.

The Adams' prize is awarded every two years to the author of the best Essay on some subject of pure mathematics, astronomy, or other branch of natural philosophy—the subject being selected by certain Examiners, and announced about a year and a quarter before the Essays are required to be sent in, and the competition being open to all persons who have been admitted at any time to a degree in the University.

The institution of this prize seems to be calculated to encourage the study of mathematics and natural philosophy among members of the University who have leisure and opportunity for it. If the subjects be chosen with care, I think that as the prize becomes more widely known it may be expected to excite much competition for the honour of gaining distinction by

Rev. H. Philpott, D.D.

it, and may induce persons to pursue original researches with very good effect upon the progress of science.

I am of opinion that the institution of similar prizes for the best Essays on particular branches of mathematics and natural philosophy would have a similarly beneficial effect upon the advancement of accurate and extended knowledge on those subjects. A person knowing that opportunity would be afforded for obtaining distinction in any particular branch of enquiry would be likely to pursue investigations and collect information with respect to that branch; and the labours of persons so encouraged could hardly fail to produce the attainment of more accurate and extended knowledge.

If such a plan were contemplated, it might be worth consideration whether a longer time should not be allowed, than in the case of the Adams' prize, after the announcement of the subject for the prosecution of original research, and the composition of the Essay. Persons might thus be encouraged to compete for the prize, who being engaged partly in other occupations are not able to devote their whole time and thought to the subject during a more limited period.

I think that the institution of prizes for Essays is more calculated to promote the effective study of any subject in mathematics or natural philosophy than the institution of examinations, especially when the competition is open to students of mature age, or entirely free from restriction as to age, as in the case of the Adams' prize.

Catharine Lodge, Cambridge, March 24, 1851. (Signed) H. PHILPOTT.

Rev. E. H. Steventon, M.A.

Answers from the Rev. E. H. Steventon, M.A., late Fellow of Corpus Christi College.

My dear Sir, 21, *Eastbourne Terrace, Paddington, December* 31, 1850.

I am very sorry I really have not had time sooner to reply to the communication which Her Majesty's Commissioners for Inquiry into the State of the University of Cambridge and the Colleges thereof have sent me.

I shall be most happy to furnish them with all the information I can.

With regard to the information sought for in Queries 1, 2, 3, 4, 5, 6, and 7, I would say, that it being now 10 years since I was resident in, or in any official way connected with the University, I do not feel competent to give it; or at any rate, certainly feel that others can give it better than I can.

Books in Use.

With regard to Query 8, I chiefly wish to say, that I consider what the University much stands in need of is a set of *really standard and satisfactory books.* It has always been my opinion that the plan of gathering information out of any books or MSS. the students could find, or their private or public tutors might recommend, in vogue in my time, and I believe in vogue *now*, is a bad one, and works ill. I certainly think a learner is taught better out of *one good book,* even though the subject should be more or less imperfectly treated in that book, than by endeavouring to obtain acquaintance with the *subject* out of *many* books.

I think one of the main wants of the University is a supply of *really good* and *standard books*, to which the students should be *confined.*

Tendency of the Course of Mathematical Study.

As regards Query 9, it was quite my opinion when I left the University "that the course of mathematical studies, as determined by the University Examiners, was tending to become more and more exclusively analytical and symbolic;" and "that it had *far* passed the beneficial limit;" and "that it tended, &c." I consider that *few* of the students derive any real benefit from the almost entirely analytical and symbolic course of reading.

I would also say that I very much deprecate the hasty introduction into the University course of reading of new subjects, such as those of Heat, Electricity, Magnetism, and the Undulatory Theory of Light. Decidedly let these be reserved, if they are admitted at all, for special prizes, or the like, at periods subsequent to the taking the degree of B. A.

Classification of Candidates for Honours.

Availing myself of the invitation given in Query 13, I would say that on no point connected with the University proceedings do I feel more strongly than on this;—that the present mode of classifying, after examination, the Candidates for Honours is open to the gravest objections.

I think that the effect of it, viz., the making the Students all through their course feel that they are pitted *man against man,* is exceedingly injurious to their intellectual development. It keeps them in a feverish and too excited state. The consciousness that an hour's relaxation may make the difference of a *place* to them, is, I conceive, highly injurious to them. And this acts *most injuriously* on the *best men*, robbing them of calm reflection, and keeping them in a state of morbid excitement.

Alphabetical arrangement.

I should decidedly much rejoice to see an *alphabetical* arrangement; and, *not as at present,* in *necessarily three*, and *only three* classes.

I have no hesitation in saying that the present classification does not, in general, *fairly* and *correctly* represent the comparative attainments or intellectual characters of the men.

There will often be more difference between two men, who, under the present system, stand next to each other in the same class, than there is between the last in one class, and the first in the class below it.

I consider the present system of classification artificial and unsatisfactory.

As far as my observation has gone, the men very naturally divide themselves into distinct classes; three or four perhaps. The *numbers* that should be included in these classes *vary* from year to year. You will sometimes have *one* first-class character of man, and

then *all the rest inferior to him*, not only in *degree* but in *kind*. Sometimes you will have *three* or *four*, or *perhaps more* of these first-class men. And so of the next order of men; and the next; and so on. *Rev. E. H. Steventon, M.A.*

I should decidedly advocate an unfettered classification. Let the classes report the men exactly as they show themselves, and let the names be arranged alphabetically in the class. Suggestions.

I should consider this one of the greatest improvements that could be made in our University system.

I would only say, further, that I should much rejoice to see *more University Examinations*.

1. Let there be a *University* Examination previous to the admission of any one on the Boards of any College.

The standard in the preparatory schools, &c., wants raising, and that might, I think, be done by requiring every one who sought for admission to any College in the University to pass a previous *University* Examination. I do not think a previous *College* Examination would do.

2. Let every Candidate for a B.A. degree pass through a *University Examination*, at the *end of every Academic year*. And let his place on the B.A. Tripos be determined by the aggregate of the results of his several examinations. Always providing that he shall be required to pass through *every* examination *at least satisfactorily*.

The object I should have in view in such a regulation would be to make *all* the men read more than they do, and to keep them *all at work* more than they are.

I conceive that the *standard* in any examination, through which *all* the men are to pass, can never be *very high*; for if it were, it would reject a too large proportion of them. If then it is sufficiently low to allow the majority of the men to *come up to it*, it is not sufficiently high to make the clever or the well prepared *work* for it. As, on the other hand, if it be sufficiently high to make such men work for it, then is it so high that the majority can never come up to it.

My opinion is, that by multiplying the examinations, even with only a moderate standard as to requirement in each, you could make the cleverest and best prepared *work*, and *keep them at work*; whilst almost the worst prepared, and the dullest, *with application*, might pass them.

These are the remarks I would take the liberty of making in reference to the queries put before me by Her Majesty's Commissioners.

I have to apologise for the very hasty, and, as I am afraid it will be found, unperspicuous mode in which they are made. The daily parochial and ministerial calls upon my time and attention are now such that I hope they will be considered as my excuse. I have the real welfare and the efficiency of the University very sincerely at heart; and I rejoice to think or hope that steps are being taken to increase the latter, and thereby—as I am sure it will be—to promote the former.

I have the honour to be, my dear Sir,

Your very obedient servant,

(Signed) E. H. STEVENTON,

Formerly Fellow of Corpus Christi College, Cambridge, and now Minister of All Saints', Paddington.

Answers from G. G. Stokes, Esq., M.A., Lucasian Professor of Mathematics. *Professor Stokes.*

SIR, *Pembroke College, Cambridge, October* 21, 1851.

IN reply to the Circular relating to the Mathematical Studies of the University, which I have had the honour of receiving from Her Majesty's Commissioners, I beg to offer the statements subjoined.

I have the honour to be,
Sir,
Your obedient humble Servant,
G. G. STOKES.
Lucasian Professor of Mathematics.

To the Rev. W. H. Bateson, Secretary.

1. The candidates for the degree of B.A., must be divided into two classes, (1) those who aspire to Mathematical Honours, (2) those who aim only at an ordinary degree. Mathematical Examinations.

The mode in which the Examination for Mathematical Honours is at present conducted, as well as the changes which have of late years taken place in this Examination, are so fully described in the first Section of the first Report of the Board of Mathematical Studies, that I beg to refer to that Report, of which a copy is enclosed.

The Mathematical part of the Examination for Ordinary Degrees is, like the Examination for Mathematical Honours, conducted exclusively by printed papers of questions, to which the Students are to return written answers. The Examination, of course, extends over a far more limited range of subjects than the Examination for Mathematical Honours. It is conducted according to a Schedule fixed on by the Senate, and published in the Cambridge University Calendar.

Professor Stokes.

Changes in the Mathematical Course.

2. I have no direct means of comparing the Examination of Mathematical Honours, as at present conducted, with what it was thirty or forty years ago, especially with reference to its more or less searching character. During this interval the range of subjects included in the Mathematical course has been decidedly widened, and subjects of greater difficulty have been introduced, as may be seen from the Report to which I have already referred. During the last twelve or fourteen years, however, the course has remained pretty nearly stationary. There have indeed been questions sparingly introduced out of high subjects, which never became thoroughly recognized as forming part of the course, and there may be some slight tendency towards the employment of more refined methods; but further than this there appears to be no inclination to extend the course already pursued. On the contrary, the Board of Mathematical Studies, in their Second Report, and to a certain extent also in their First, have recommended some abridgment in the higher parts of the course.

3. The course of Mathematics required for an Ordinary Degree is very strictly defined, and consists of the common parts of Arithmetic, a little Algebra, some books of Euclid and certain elementary propositions in Statics and Hydrostatics, according to a Schedule published in the Cambridge University Calendar. Unless the Students exhibit by their answers what is deemed by the Examiners a sufficient knowledge of these subjects, their Degrees are not allowed. In the Examination for Mathematical Honours, as at present conducted, it depends altogether on the result of the first three days of Examination, which are devoted to the more elementary parts of the course, whether or not the Candidates obtain a place on the Tripos, though it depends on the result of the whole Examination what that place shall be. It is left to the discretion of the Moderators and Examiners what amount of correct answering returned to the questions proposed during the first three days shall be deemed sufficient for a place on the Tripos; but it may be stated that at present the lowest Student placed on the Tripos obtains somewhere about a fourth or fifth part of the average marks got by a few of those who are best prepared.

About 150 Students usually present themselves as candidates for Mathematical Honours, and the Examination extends over eight days. In an Examination of such magnitude, it would be quite impossible to place the candidates in anything like order of merit, without some regular system. That actually adopted is as follows:—Before the

System of Marks.

Examination, a certain number of "marks" are assigned to the different questions which have been prepared, according to the judgment which the Examiners form as to what the answers returned, if perfect, would be worth. In examining one by one the written answers returned by the Students, the Examiners give "full marks," that is, the number previously fixed on, for those questions which have been answered perfectly, and such proportion of full marks as they judge the answers deserve, for those questions which have been answered in a great measure, though not quite, correctly. These marks, according as they are assigned, are entered in books. When all the papers have been examined, the marks obtained by each Student during the whole Examination are added up, and the Students are placed in order according to the result.

This system has been adopted from its practical convenience and perfect fairness. There is, however, no allusion to marks, that I recollect, in any Grace of the Senate, the mode of arranging the Students in order of merit being included among the details which are left to the Examiners. There are some objections which might be urged against the system of marks. Still, no system can be perfect in all respects, and under the circumstances the system of marks seems about the best that could be devised. Its rigorous justice harmonizes completely with the general tone of feeling in the University, where honours and emoluments are distributed solely according to merit, without any reference to political views or party feelings.

I do not think that for many years previously to the introduction (in 1848) of the mode of Examination which at present prevails, there had been much tendency either to raise or lower the standard of qualification required for a place on the Mathematical Tripos: if anything, I should say the tendency was rather to lower it. By the regulations which came into force in 1848, it was rendered possible for a Student who failed to obtain Mathematical Honours, but who had shown sufficient knowledge of Mathematics for an Ordinary Degree, to obtain his Degree at the regular time, by passing the Examination for Ordinary Degrees then in progress, the Mathematical part of such Examination being allowed him. By a still more recent regulation, it is rendered not absolutely necessary for those who are candidates for Classical Honours to have previously obtained a place on the Mathematical Tripos. These two regulations have rendered it so much less severe a measure than formerly to refuse a Student a place on the Mathematical Tripos that latterly the standard seems to have been somewhat raised. With respect to any alteration in the standard for Ordinary Degrees, I cannot speak from experience.

Proportion of Students who obtain Mathematical Honours.

4. At present about 38 per cent. of the Students who take B.A. Degrees obtain Mathematical Honours. The accompanying Report contains a table in which the average per centage is given for the periods which elapsed between the different changes introduced into the Examination by Grace of the Senate. Although these periods are not decennial, the table will serve equally well to exhibit the result. It appears that about the year 1833, the proportion, which had previously been nearly constant, rapidly increased by about 10 per cent., after which it became nearly constant again. The cause of this increase is probably to be sought for in the regulations which came into effect in 1838, but which would not produce their full effect for three or four years.

Professor Stokes.

At present about one-fourth or one-fifth of the candidates for Mathematical Honours fail in attaining them. The proportion of all the candidates for Degrees who are rejected is, I believe, somewhere about one-sixth.

5. I think that, if it be assumed that the examination is to be conducted entirely by written answers, the mode at present adopted is extremely good. Perhaps the papers, or some of them, might be slightly shortened with advantage. But I have frequently felt, while examining the written answers returned by the Students to the questions proposed, that the entire absence of all examination *vivâ voce* is a defect in the present system. I am inclined to think that it would be desirable to revive something like the old exercises in the Schools in a different shape. However, were the introduction of examination *vivâ voce* generally thought advisable, there would be no difficulty in introducing it by grace of the Senate.

Vivâ voce Examination.

6. The duty of the recently established Board of Mathematical Studies is "to consult together from time to time on all matters relating to the actual state of Mathematical Studies, and Examinations in the University; and to prepare annually, and lay before the Vice-Chancellor, a Report, to be by him published to the University in the Lent or Easter Term of each year." Thus, it is peculiarly their province to discuss such questions as these—Whether the mode of examination at present followed, the nature of the questions proposed, the mode of proposing them, the way in which answers are required to be given, and the time allowed for giving them, are the best calculated to bring into evidence the more or less full possession of the several subjects by the Candidates—whether it would be desirable to limit some of the subjects included in the present range of the Examination, and so forth. An example of the way in which the Board acts on the Mathematical Studies of the University may be seen in the accompanying Report, which is the first issued by the Board. Questions from the theories of Electricity, Magnetism, and Heat, had been introduced into the Examination, but so sparingly, that it was doubtful whether the subjects were to be considered as forming part of the regular course or not. Accordingly the Board, having considered the question, recommended that these subjects be not admitted into the Examination. Again, it seemed to the Board desirable that a slight change should be made in the schedule of subjects for the first three days of Examination, and they suggested that it would be desirable to offer to the Senate a Grace to that effect. Accordingly the Vice-Chancellor brought in such a Grace, which was granted by the Senate.

Board of Mathematical Studies.

In their Second Report, the Board recommended a much more considerable abridgment in the higher subjects, with a view, chiefly, to the exclusion of laborious analytical processes from the subjects which the Students might expect to be called upon to produce in Examination. At the same time they recommended the entire omission of one or two short but difficult subjects, which had hitherto been considered as forming part of the course.

The Board possess no *technical* authority to control the Moderators and Examiners in the exercise of the discretionary power left them by the Senate in conducting the examination. In particular, they have no absolute authority to enforce the recommendations which they may issue relative to any change in that part of the course which, not being fixed by Grace of the Senate, is left to established usage, and to the discretion of the Moderators and Examiners. At the same time, there is no doubt that, *practically*, their recommendations would be attended to. In particular, it is to be presumed that the Moderators and Examiners would not feel themselves justified in proposing for examination, at least in the Book-work Papers, subjects of which the Board had recommended the omission, because Students would not prepare themselves in such subjects, not expecting to be examined in them.

7. The question of limiting some of the subjects which had been included in the range of the Examinations has already been considered by the Board of Mathematical Studies; and in their Second Report, which was published in the beginning of June, 1850, they have recommended the omission of various propositions in the higher subjects, which required for their treatment a rather laborious analysis. They have even recommended the entire omission of two or three subjects, in addition to the Mathematical Theories of Heat, Electricity, and Magnetism, the omission of which had been recommended in their First Report. The course, no doubt, still remains very extensive.

Limitation of Subjects.

Since the abolition of the "classes," the same questions have been proposed to all the students who are candidates for Mathematical Honours, but it by no means follows that all the candidates prepare themselves for examination in all the subjects included in the course. On the contrary, except in the case of a few of the Students of the greatest proficiency, the usual plan is for them to "take in," or prepare themselves for examination in, a certain number of subjects, according to their power, and the amount of their knowledge before coming up to the University. In this they are guided by the advice of those to whom they look for counsel.

Considering the very great difference in the Mathematical powers of the candidates for Honours, a difference of which all those who have been concerned in the Examination must have a lively sense, I do not see what other plan could be adopted. I mean, that I do not see in what way a course of study could be proposed which should not be either too much for some, or too little for others, or both. Assuming that the same questions are to be proposed to all the Students, I think the best plan is that actually adopted, namely, to give the best Students enough to do, and let the rest prepare themselves each man according to his power. There is no doubt one danger attending this plan, namely, that

Professor Stokes.

Students may be induced to read, in a superficial manner, a large number of subjects, rather than prepare themselves accurately in a smaller number. But I think that, in a great measure, this tendency may be, and is, counteracted by the mode in which questions are proposed in examination. I believe that it is an object which the examiners bear constantly in mind, in preparing the Examination Papers, to propose the questions in such a shape as to detect those students who may have read, without digesting, the subjects which they have nominally prepared.

The question, then, of the desirableness of reducing the present course, seems to me to resolve itself into this—Is the present course too extensive for the best class of students? I have already mentioned that the Board of Mathematical Studies have recommended the abridgment, to a certain extent, of the course of Mathematics which forms the subject of Examination for Honours. I believe that the course, as so curtailed, is not more than the best Students can master. If, however, any change were to be made, I think it desirable that it should be made in the direction of further curtailment, rather than extension. I do not here enter into the question whether it would be desirable that something besides Mathematics should be required in the Examination for the B.A. Degree. In that case, of course, the range of subjects ought to be still further limited.

Public Tuition.

By the public tuition of the University is meant, I suppose, the tuition publicly given in the University, including the lectures of the College Tutors and Lecturers, in contradistinction to the tuition given by private Tutors. Nearly the whole of the actual course for Mathematical Honours forms the subject either of lectures publicly given in the different Colleges, or of lectures given by the Mathematical Professors, or of both. There would not, I conceive, be much difficulty, if it should be thought desirable, in providing for the very small part of the course for which no provision is at present made in respect of public Lectures. In this respect, therefore, the actual course may pretty well be said to be within the grasp of the public teaching of the University.

If there were no such thing as private tuition in the University, students would be more thrown on their own resources, and the amount of Mathematics which they could acquire in a given time would be lessened. In such case the present course would probably be found too long. But I do not think that it by any means follows that a diminution in the course would be attended by a proportionate diminution in the system of private tuition. Indeed, considering the immense competition which exists for places on the Tripos, I believe that but little difference would be made in this respect.

Elementary Books.

8. The elementary books now used in the University are chiefly English, since English treatises have appeared on subjects which used formerly to be studied in foreign works. Inasmuch as there are no text-books adopted by the University, with the exception of Euclid and Newton's Principia, the treatises actually used are pretty numerous. The following may serve as a specimen, but is by no means a complete list.

Lund's Algebra; Goodwin's Elementary Course of Mathematics; Snowball's or Hymers's Trigonometry; Whewell's or Hustler's Geometrical Conic Sections; Hamilton's or Hymers's Analytical Geometry; Miller's, O'Brien's, Walton's or Hemming's Differential Calculus; Hymers's Integral Calculus, Differential Equations, and Finite Differences, Hymers's or Gregory's Analytical Geometry of three dimensions; Earnshaw's, Whewell's, or Pratt's Statics and Dynamics; Airy's Tracts; Miller's Hydrostatics; Hymers's Astronomy.

The published books in common use are, I conceive, quite sufficiently comprehensive, and sufficiently on a level with the present state of knowledge, to qualify Students for the Examinations. Indeed I know that it has been felt by the Moderators and Examiners to be an almost insuperable objection to the proposal of a proposition in Examination, at least in the Book-work Papers, that it was not to be found in any of the books in common use. Manuscripts are no doubt very generally used, but not for the sake of completing what is to be found in printed books. They are, I believe, most generally used by way of syllabi, containing the principal propositions in the subjects of which they treat, and in some cases superseding printed books. They are used, I conceive, chiefly because it is found by experience that Students make more completely their own what they have written out themselves than what they find in printed books.

Use of MSS.

The strongest objections against the use of Manuscripts are valid only against such a use of them as is not, I conceive, made in the University. It would be a great evil if the Public Examinations of the University were conducted with reference to private manuscripts not accessible to the Students generally. It would be objectionable, again, that manuscripts should be used to supersede standard works, such as Newton's Principia. But such objections would not apply with at all the same force to the use of manuscripts (supposing that such a use were made) to supersede treatises which are themselves compilations, and which have no claims to be considered standard works, except what results from their pretty general use during a few years. The transition from oral instruction to teaching by the aid of manuscripts is so easy and natural that it seems almost impossible to allow the one and object to the other. It is principally by private Tutors that manuscripts are used. It may very well be a question whether Students, with a smaller amount of Mathematical information, might not receive a more beneficial mental discipline by being deprived of the aid of private Tutors, so as to be thrown more on their own resources. But taking the system of private Tuition as it exists, I think that the system of instructing by means of Manuscripts must be accepted as part and parcel of it. I have not mentioned the evils which would attend the recognition of private Manuscripts as text-

books in a Public Examination, because I am convinced that such recognition is purely imaginary. *Professor Stokes.*

9. If the course of Mathematics as at present pursued be compared with what it was a great many years ago, there can be no question that it is decidedly more analytical in its character than formerly. Of late years, however, there has not been much change in this respect. Perhaps some slight tendency in the same direction may still be perceptible in some of the higher subjects; but on the other hand the last change in the examination has had a contrary tendency. I am decidedly of opinion that the best course of study is that which leads Students to contemplate the same results in different ways—to attend, for example, to natural relations in the application of Mathematics to physical subjects, as well as to the analytical modes of deducing the results. I believe that, as a general rule, the better class of Students do really understand the interpretation of the symbolic processes which they employ, as well as exercise themselves in viewing the same results in different ways. Questions are frequently proposed in examination with the express object of testing Students with respect to this kind of knowledge, and rewarding those who possess it. In the case of Students of only second-rate ability, I think that there is some danger that they may be led away by the symbolic processes which they employ, and that for them a course of less refined methods might be more beneficial. Analytical tendency of the course of Mathematical Study.

10. As regards the relative proportion of problems and book-work proposed in the Examinations, I think that experience shows that the present system works well; and in such matters I regard experience as the safest guide. Problems.

In the two problem papers which are set by the two Moderators separately, the problems, though such as can readily be apprehended, are by no means generally of such a nature that they would be solved, as a matter of course, in a short time by a Student who thoroughly understood the principles and application of the branches of Mathematics on which they depend. Success in the solution of such problems undoubtedly does depend on something in addition to accurate and philosophical knowledge, namely, innate talent for Mathematics.

In the case of the difficult problem papers, at least, it is notorious that the number of problems proposed for solution is more than the best prepared Student can be, or is, expected to complete in the time allowed. I am decidedly of opinion that such ought to be the case, in order to allow the Students some power of selection, and thereby diminish the amount of chance which attaches itself to the result. It is otherwise with a paper containing no problems but such as ought to be solved as a matter of course, and without delay, by a Student thoroughly acquainted with the principles of the branches of Mathematics to which the problems relate. Such a paper ought not, I conceive, to contain more problems than could be solved in the time allowed; otherwise a Student of good abilities, but idle habits, might gain nearly as much credit as another of equal ability but more application, who had prepared a larger number of subjects.

11. Most Students in preparing for the Examination for Mathematical Honours begin to read with a private Tutor either on coming into residence in the University, or at the end of their first year, or at some other early period. They are then guided in their course of study mainly by his advice. It is, I believe, generally found that the best Students are diligent in their attendance at College Lectures, and they avail themselves of the assistance which they there receive in addition to that of their private Tutors. Many of them also attend the Lectures given by the Mathematical Professors, or such of those Lectures as relate to subjects which are included in their own course of reading. Private Tutors.

The private Tutors who take pupils for Mathematical Honours are nearly all of them men who have taken high degrees. Some, on obtaining their B.A. degree, take up private tuition for a time, intending, after a few years, to go out of residence, or devote themselves to some other pursuit. But others, and they chiefly men of eminence, become permanent residents in Cambridge, and devote themselves to private tuition as a professional pursuit. Private tuition increases, no doubt, the expense of a University education; but it cannot be expected that the services of such men should be secured without adequate remuneration.

12. The University does not hold out any *direct* inducements to the continuance of Mathematical study after attaining the degree of B.A., except what is afforded by the Adams' Prize, which has recently been founded, and which will be mentioned presently. There are, however, inducements to the retention of the knowledge acquired incidental to the system which at present prevails in the University. The greater number of those who take high degrees remain for a certain time in Cambridge, and take private pupils, and are thereby compelled, if not to add to the Mathematical knowledge they have already required, at least to retain the greater part of it Inducements to continue Mathematical Study.

It must be confessed that the Smith's Prizes have at present but little influence on the studies of the University, because the examination for these prizes immediately follows that for Mathematical honours, and the competition for places on the Tripos is so great that the additional stimulus to exertion afforded by the Smith's Prizes is hardly worth taking into consideration. I think that the deferring the examination for the Smith's Prizes to a later period would have some tendency to induce Students to keep up and add to their stock of Mathematical knowledge. Still I think it doubtful whether the tendency would be material. The prize is not of sufficient magnitude, in a merely pecuniary point of view, to induce men to undertake a one or two years' course of study on the chance of obtaining it: the honour is, of course, the chief thing to look to. Now the reputation in which the prize is at present held depends, in a great measure, upon the circumstance that, with rare Smith's Prizes.

Professor Stokes.

exceptions, all the best men of each year compete for it. But it would be likely frequently to happen that some of the best Students would leave the University shortly after taking their B.A. degrees, and would be unable, without any disparagement to their Mathematical attainments, to become candidates for the prize. A consequence which seems very likely to ensue is, that after a few years it would become common even for residents not to become candidates for the prize; and with the competition the reputation of the prize would diminish, so that at last it would cease to offer much inducement to exertion.

Adams' Prize.

The Adams' Prize was accepted by the University under the following regulations:—

(1.) That a Prize, to be called "THE ADAMS' PRIZE" be awarded every two years, during the Michaelmas Term, to the Author of the best Essay on some subject of Pure Mathematics, Astronomy, or other branch of Natural Philosophy.

(2.) That the Vice-Chancellor and the Plumian Professor of Astronomy and Experimental Philosophy be requested to undertake the office of Examiners and Adjudicators of the Prize, in conjunction with two persons to be nominated by Colleges in rotation, according to the cycle of Proctors, and to be approved by grace of the Senate, provided always that not more than two of the Examiners be Members of the same College.

(3.) That the Adams' Prize be open to the competition of all persons who have at any time been admitted to a Degree in this University.

(4.) That the successful Candidate receive two years Income of the Fund, and in case no Essay be considered deserving of the Prize, the income of the past two years be added to the Capital of the Fnnd.

The remaining regulations relate to the appointment of the Examiners, and other details. A provision is also made for altering the scheme in case it should hereafter appear expedient to do so.

The magnitude of this Prize in a pecuniary point of view, the infrequency of its adjudication (only once in two years), the freedom of the competition, and the circumstance that it is the only Mathematical Prize in the University, (with the exception of the Smith's Prizes, which are almost entirely merged in the Examination for Mathematical honours) all conspire to render the Adams' Prize one of great dignity, but at the same time may possibly have the effect of determining any but a few from competing for it. However this is a point which can only be learned by experience, and the institution of the Prize is too recent to allow us to gather much information from that source.

I think that the institution of *a few large* prizes of a similar nature might exercise a good deal of influence in inducing some of those who had recently taken their B.A. degree to enter on a thorough and extended study of particular branches of Mathematics and Natural Philosophy, but I do not think that the institution of a large number of small prizes would work well.

Rev. C. A. Swainson, M.A.

Answers from the Rev. C. A. Swainson, M.A., Fellow and Tutor of Christ's College.

SIR, *Christ's College, Cambridge, March* 8, 1851.

I BEG at length to submit to you the best information I can give on the subjects mentioned in the inquiries of the University Commission of the date December 14, 1850. To some of the earlier queries none but gentlemen officially connected with the University have the ability to furnish answers. I have, therefore, confined myself to those subjects on which I felt I have the power of expressing an opinion.

I am, Sir,
Your obedient humble servant,

The Rev. W. H. Bateson, (Signed) C. A. SWAINSON.
Secretary to the Cambridge University Commission.

Mathematical Examinations.

5. I do not consider that the time allowed to the Students in the Senate House is sufficient for the exercise of much thought on their parts. This appears to me to be a great defect. If a Candidate for his degree, under examination, cannot answer a question immediately, and without reflection, he knows that he will injure his position in the tripos if he delay any time to consider it, so long as other questions remain unanswered to which he knows he has the power of replying. And this is the case with nine-tenths of the men in the Senate House: they have read far more than they have digested, and they therefore avoid the questions which are out of the routine of the regular book-work. The questions to which the majority of the men send answers are as it were stock questions. It is difficult, with the length of papers, to prevent many such occurring; and even the majority of the problems ordinarily answered are of a fixed and stereotype character, similar to others which the Student has seen, and solved in his rooms before. This kind of examination, which is to decide the position they must take on entrance into the world, produces on the majority even of the higher men a very injurious effect, damping the exercise of reflection throughout their career, making them trust to such knowledge of the propositions contained in the books as will enable them to write them out without a moment's hesitation, and also to rapidity of penmanship rather than to habits of reflection,

Rev. C. A. Swainson, M.A.

or to a true and deep knowledge of the subject. They are content to know "Hymers" or "Griffin," or "Miller;" they do not profess to know their "Conic Sections," their "Optics," or their "Hydrostatics." Of course, I am speaking of the majority of men who come under my notice; of the majority of those who take places in the tripos from the 20th or even 15th Wrangler's downwards. So long as they feel confident that there will be a sufficient amount of book-work to employ them during the three hours they are in the Senate House, without attacking the "deductions" or "riders," they will shape their course accordingly. And it is with the utmost difficulty that the majority of such Candidates for honours can be brought to believe hat it is desirable to weigh thoroughly the principles of the studies they are professing to pursue.

Moreover, one evil effect of the recent institution of a preliminary examination will, I think, become more patent every year. Instead of encouraging the Student to read and re-read a subject like the Statics or Dynamics, each perusal settling more deeply the foundations of the science in his mind and strengthening his grasp, and in each perusal the Student pushing his investigations further, he is compelled now to diffuse his energies over several subjects, and is not required to know any one of them thoroughly. It is of no use to be thoroughly conversant with Mechanics if, for want of the barest knowledge of Optics and Hydrostatics, he may be rejected in this preliminary examination. Optics, again, is read in the most dry and uninviting form, all knowledge of the beautiful effects of colour being ignored in this examination; indeed, the intention apparently might have been to exclude all points that could possibly raise any interest in his work in the mind of the Student.

Length of papers.

The length of the papers has, by the advice of the new Mathematical Board, been somewhat diminished during the last two years. My opinion is, that they should be still further abridged: thus, the book-work questions would become fewer, greater scope might be allowed to the Student who had rendered himself acquainted with the principles of his studies; and encouragement might be given to him to read collaterally works like "Lamé's *Cours de Physique*," or "Peschel's Physics," or such parts of them as apply to his more favourite subject.

Limitation of subjects.

7. Although, in my answer to No. 5, I have had in view the case of the majority of the Candidates for honours, who, I think, have been neglected for the sake of the first half dozen or dozen Wranglers, yet I am not an advocate for the omission from the general examination of the Lunar, Planetary, or Undulatory Theory. I think that no one who has studied them in his undergraduateship can refrain from considering that the greatest reward for all his previous exertions lies in the attainment of the results to which these theories lead him. If we were to cut them off from the course required for the Senate House, we should, I think, dismiss from the University the majority even of the higher class of our Students without any apparent tangible reward for their toils. Their reasoning powers will have been disciplined and their inventive powers will have been to a certain extent exercised; they will have obtained that which is considered the huntsman's best reward, "the quickened eye, the lengthened breath, the firmer nerve;" but still they will rejoice more if they have added some "rich and curious game" to their stores, and this, I think, is supplied in these theories. The delight with which the Student views the results to which they lead him, throws a charm over all his previous work: and this would be lost if they were omitted. Neither would this loss be compensated, in my mind, by having a re-examination for special prizes at any period subsequent to the degree of B.A., even on such an one as is suggested below. There will always be a break in the reading, on taking the degree; the enthusiasm will be gone then; no longer will men work under pressure. They have decided their relative positions, and they will be content, except under extraordinary circumstances, to abide by that decision: and even in these extraordinary cases, I should tremble for the results on the minds of our highest men, if the struggle were to be prolonged for another year. They may become for the time better Mathematicians; but the world will not gain, they will be exhausted. I would rather leave them time to recruit their strength; and if the decision of the Examiners is to be reversed, let it be reversed by the judgment of the scientific world on their subsequent philosophical careers.

With regard to the Calculus of Variations, the theories of Definite Integrals and Elliptics, which are merely analytical, and to the theories of Heat, Electricity, and Magnetism, which are confessedly imperfect, I do not hold the same opinions. I was ignorant of them when I took my Degree, and have not therefore my experience, as an Undergraduate, on which to lean.

I do not consider that the number of subjects at present required by the University is greater than such as one reasonably prepared on admission, and of fair abilities, may be expected to master during his residence. In any attempt to diminish their number it should be borne in mind that neither the University nor the Colleges make any provision for the advance of the Student between the end of May and the middle of October. It appears to me that they ought not therefore to limit the reading of the Undergraduate to the subjects in which they provide the means for instruction. Moreover, if the reading were so limited, there would be great danger of the Examinations becoming cramped, and I question whether the men of greatest talent and genius would have due provision made for the attainment of the positions they deserve. A difficulty would be introduced, which is already found to operate among those who are not candidates for honours; superior men would fall because they could not apply themselves to the work required for their Degree. *They* could not, if I might be permitted to use the Cambridge phrase, "cram" for the Examination. At the same time I acknowledge that the difficulty referred to by the Commissioners is great. Whether it would not be met by a recurring back to the old class system, or to a modification of it, I must leave to better judges to decide. This would permit the highest men to "take in" the highest studies, and

Rev. C. A. Swainson, M.A.

means might be found to prevent inferior men from being too diffuse in their work. And even if this scheme involved the necessity of putting the questionists at the close into classes, of numbers varying from 1 to 20 or 25, at the discretion of the Examiners, I, for one, should not object.

Elementary books used.

8. It would be extremely difficult to enumerate the books at present used as elementary works in the University. Confessedly we are not content with those which we possess, for efforts are continually being made to improve upon them. Neither would it be desirable to check the publication of these works. They are the evidence of a continual effort at amendment. I do not consider that the use of MSS. is carried to any injurious extent. I think they are less used as superseding printed books than formerly. Indeed I consider that it is a great advantage to be able to ensure that the attention of the Pupil is drawn to the details of the proof he is required to master. It is a test of a moderate man's powers whether he can copy from dictation. Moreover the opportunity is furnished for *vivâ voce* Examination, more continuous and more general than can be gained otherwise under our present system. On the other hand, the exclusive use of MSS., or even the habit of forming MSS. for ourselves, tends to diminish throughout life the power of fixing the attention in the reading of books, if unaccompanied with the taking of notes. Thus the habits formed promote exactness in study, but diminish seriously the amount of reading.

But yet so long as new works are constantly being published it seems impossible to supersede the use of MSS. In Statics, for instance, or the Differential Calculus, the books are so numerous that a careful painstaking Tutor is compelled, fixing on some one edition definitely as his standard, to supply the omissions in that volume by MSS. from others. And, so far as my knowledge goes, I conceive that at present MSS. are chiefly used, first, to supply the deficiencies in the volumes used as text books, and secondly, for the purpose of systematizing and arranging the subject under discussion; and I cannot see how this can be objected to.

Tendency of the present course of Mathematical Study.

9. I rejoice to say that I consider that the tendency during the last four or five years has been to diminish the advantage gained by a mere readiness in the management of symbols. But I do not consider that the higher class of the candidates for honours have ever suffered from the preference given to analytical methods so much as the lower classes. I have repeatedly known instances of men who could, without committing any error, write out the proofs in the chief properties of the Conic Sections, but who were ignorant of the most elementary considerations as to the Equations they used. They were employing a machine, the construction of which they had never attempted to understand. This has been remedied lately by the recurrence to geometrical proofs, in which a Student knows whether he understands what he is engaged in; this is a great gain to the inferior man, to the superior the change is unimportant.

I readily allow that it requires a much greater effort to master the proofs given by Newton of the higher propositions in Dynamics, than to become familiar with the corresponding analytical investigations. I think also that as an element in education, in training the mind, the former process possesses merits which the latter does not possess. In the former new conceptions are constantly formed; new ideas constantly called forth and embodied; the proof is at one time direct, at another indirect, and the mind perceives at once that the mode of proof is varied. Not so in the analytical proofs. In them the Newtonian propositions form merely a class amongst many others, all treated by regular rules. And these rules, and their application, are mastered with comparatively very little effort on the part of the Student.

I am inclined to consider that one consequence of this change of study is, that habits of long, fixed, continuous attention, are not encouraged in the present generation of high mathematical men, so much as is desirable, or so much as 30 years ago was attained. I need scarcely say that, if this opinion is correct, the evil complained of is great, and deserves serious attention.

Problems.

10. I have already expressed my opinion that the problems proposed in the Senate House do not bear too large a proportion to the book-work questions. Neither do I consider that the mental effort required to unravel and express in algebraical language the complicated relations occasionally set forth in the questions proposed, is the least important part of the test applied to the Student. I should be glad to see more time allowed for their solution, although I believe that instances have occurred in which so many as 16 or 18 have been solved by one man in the time allotted. Moreover they are generally so arranged that each subject ordinarily read furnishes its quota, and few men are so well acquainted with all of these subjects as that the prospects of each would be equally "fair" if the number were much diminished. I mean this: the fewer the problems set, the greater "chance" would there be that the relative merits of the Students under Examination would not be equitably determined thereby. The answers to 20 or 30 questions would be more likely to assign to the Students their due places than their replies to 6 or 7.

Residence required, and Private Tuition

11. I conceive that so long as the University requires residence merely for six months out of the year, the Students can never be wholly restrained from resorting to private tuition. And I conceive also, that so long as the prizes attached to high positions in the tripos are so great, Undergraduates will take every means in their power to render themselves eligible for them. The majority of the Wranglers, after the first 12 or 15, do not differ much in ability; to their training, therefore, they look as that which will decide their destinies. Under such circumstances they will train highly, and I know not what arrangements can be devised to prevent it. I do not see how, with the present payments for tuition in College, the advantages conferred by the private Tutor can be replaced by College Lectures. The staff is not sufficient, and cannot be made so. To the highest class of private Tutors this staff might

become inferior in ability at almost all the Colleges, except Trinity and St. John's. Neither do I see how the University Professor could, if he merely lectured, supersede the private Tutor. The main element in this system of tuition is a continual system of Examinations. The work thus entailed on the Professor with a large class would be insurmountable. Moreover, one element at present operating largely would be lost. Each private Tutor has now his own efforts, and his own success, to depend upon for the continuance of his pupils. This motive to exertion would not work on the Professor whose position is official. *Rev. C. A. Swainson, M.A.*

Perhaps I may be permitted to express my opinion, founded on the observations of many years, that more has been done by one of these private Tutors, a gentleman of recognized ability and success, to resist the tendency to prepare merely for the University Examination, and to encourage larger and more philosophical views, than by any other man, or body of men, in Cambridge. Collecting around him the *élite* of the Students he has happily succeeded in encouraging them to view their pursuits, as being worthy of study for their own sake, and not only with an eye to the results of the Senate House Examination.

Expense of Private Tuition.

The greatest evil in regard to the system of private tuition is the manner in which some men, for the sake of obtaining a place among the Senior or even Junior Optimes, pay sums, varying from 40*l.* to 60*l.* a-year, for at least two years, to a private Tutor. For myself I should like to see the time when the majority, if not all, of the Junior Optimes, as at present constituted, were declared unworthy of the name of "Honour Men." As a class I consider them by no means superior to the first class of those who are not Candidates for Honours, and generally speaking they are, on the whole, inferior. I may be wrong, but I consider that the increase of Candidates for Honours, since the institution of the classical tripos, is mainly due to a lowering of the standard in Mathematics out of compassion to the classical men. I do not consider that the Junior Optimes, as a class, are more diligent, more talented, or better informed than the first class amongst the "Poll Men." They spend large sums in private tuition, for which there is no adequate return. They cramp the College Lecturer, demanding attention which would be better disposed elsewhere, and rendering necessary a greater subdivision among the classes to be lectured. Whereas, if they were required to proceed in the "ordinary" degree, and if to the highest men the Lectures of the Professors were to supersede College Lectures, then, although they might still attend the house of the private Tutor, yet to the remainder of the Candidates for Honours, nothing would be necessary beyond the Lectures provided by the College.

I can conceive no other way of diminishing the expense attached to private tuition. For the purpose of supplying to the upper half of the Wranglers the assistance they need, six or seven gentlemen of recognized ability would be sufficient, and the objections at present reasonably raised against the manner in which the duties of Tutor are assumed immediately after taking the degree of B. A., by men who a few weeks before were Pupils themselves, would be much diminished, if not wholly removed.

Inducements to continue Mathematical Reading.

12. Beyond the Fellowship Examination at Trinity College I know of no inducements (except the newly instituted Adams prize) offered in Cambridge for the extension of Mathematical reading after the degree of B. A. There is scarcely any inducement to retain the knowledge acquired, unless the possessor be called upon to examine in the Senate House, or obtain office in the tuition of his College. The very few who are carried forwards without any temporal inducements are, of course, acted on by their love of science. The rest, except the scholars of Trinity, are left to themselves. After their efforts to obtain their Degree their minds need repose, and rarely, except in extraordinary cases, do they resume these studies. At Trinity College on the contrary, after the first pause is over, the Bachelor is awakened to the necessity of further exertion; progress is made, and the effect on the character of the College is most marked, and most beneficial. Unless similar Examinations were required for election to Fellowships elsewhere, I do not think that any general progress in Mathematics would be attained. Such Examination would be productive of some good results, for instance, it would arouse the Bachelor again, after his Degree is attained, to the necessity for further exertion; and would prevent him from sacrificing his whole time to private Pupils to the entire check of all growth of his own mind. But there are serious, I think fatal, objections to such an Examination. The majority of the Students are 22 or 23 years old when they take their Degrees. They have been led to regard the study of Mathematics as chiefly valuable as training and disciplining the mind. This being gained, the more diligent are anxious now to apply themselves to some professional pursuit, whereas if they were required to prepare for one, two or three years for an Examination in branches of study, which they would otherwise dismiss at the period of taking their B. A. Degree, they would shrink from the loss of so much time in the pursuit of an object the attainment of which was dubious.

At the same time they who have been elected to Fellowships without special Examination may be not unreasonably required to prove to the University that they have not neglected the pursuits which have gained them their position. I am speaking with submission when I respectfully suggest that much good might be effected in the smaller Colleges, and great advantage gained by the University, if all those who have been elected Fellows should, at a certain time, say about one year after their election, or earlier if they are prepared, be examined by a University Board, in a manner similar to that suggested by the Commissioners, whether they have such a comprehensive grasp of the ordinary subjects for the Degree as would enable them to write treatises similar to those which were called for in the Smith Prize Examinations about 11 or 12 years ago. Perhaps, also, some knowledge of the history of Mathematics might be required. Of course the classical men would be examined in a different manner; and others, should the new triposes be conducted so as to furnish Candidates for Fellowships. The power of *veto* merely should be furnished, I conceive, to this Board. If it were said that such a proceeding would bear unduly hard on a Fellow elect, who, since

Rev. C.A. Swainson, M.A.

he has taken his Degree, has been engaged in a curacy in the country, I should urge that no one ought to be elected a Fellow of whom there were not good hope entertained that he would prove competent to assist in carrying on the tuition of the College,—the only object for which now the Colleges exist. By some plan, such as this, it seems to me two great advantages would be gained; first, a greater, or at least a more settled and more compact, knowledge of Mathematics would be called for, and so the study of that branch would be furthered; and secondly, after the pause necessary on taking the Degree was over, the Student would be preserved from remaining in a state of quietude and indolence.

Classification of Students.

Note to No. 7.—On reconsidering my suggestion on this question I think that some such plan as the following would meet the difficulty alluded to by the Commissioners. It is formed on the basis of the class system, abrogated before I took my Degree, *i. e.* before 1841. The Examinations for the different classes should be separated so far that no one should be allowed to proceed to the higher subjects, unless he had shown sufficient knowledge of the lower. Thus the first class man must pass through the Examination of the lower three satisfactorily before he could be permitted to submit himself to the highest ordeal. And it would be no drawback to such a scheme, if a considerable time were allowed to elapse between the successive Examinations.

Encouragements to Mathematical Studies.

12. The inducements which the University holds out to the systematic continuance of any kind of study after attaining the degree of B.A. are much too small. It seems very probable that the changes suggested in this question would operate in the right direction, and the idea of original essays on points of mathematical or physical science is especially worthy of attention. The Essay Prizes at present offered by the University fail to produce much effect, but mainly, as I believe, because the subjects proposed do not belong to the positive and progressive sciences, but are either theological, or, as in the case of Members' Prizes, such as to invite rather a rhetorical than a philosophic treatment.

Prizes.

But the scheme of Prize Essays, to be written by Bachelors, in departments of knowledge which are perpetually widening, where plagiarism is easily detected, and rhetoric out of place, appears to me not only new in the University, but likely to elevate and improve the mode of studying the branches of science in question.

Increase and better payment of Professors.

13, and part of 11. I think that the Professors ought to be more numerous, better paid, and compelled to reside during the major part of every term. If the first condition were complied with, it is probable that many of the eminent men to whom Question 11 refers, would be employed in a manner more worthy of their talents, and more conducive to the honour of the University. The fulfilment of the second condition would render possible that of the third, which, in my opinion, is indispensable to give efficiency to the public teaching of the University.

Private Tuition.

These remarks apply to the Non-mathematical even more than to the Mathematical Professors. The instinctive preference of the Undergraduates for private over public teaching, *as a preparation for the Mathematical Examinations,* does not appear to me to be wholly unreasonable; and I fear that any attempt by direct legislation to put down, or even materially to modify the relation between Private Tutors and their Pupils, would be eventually unsuccessful. If the changes indicated in Question 12 were carried out, the Mathematical Professors would probably find it easy to attract to their Lecture-rooms an attentive and intelligent, if not a very numerous audience. In fact there can be no greater fallacy than to estimate the efficiency and value of a Professor's teaching by the mere numbers of his habitual hearers.

Rev. W. Whewell, D.D.

Answers from the Rev. W. Whewell, D.D., Master of Trinity College.

My Lord, *Trinity College, January 9th,* 1851.

Mathematical Studies.

I have received a letter from the Secretary of the Cambridge Commission, to which is annexed a List of Questions and a request that I will, in reply, communicate such information as I may be disposed to furnish. These questions refer principally to the mathematical studies of the University, and the examinations held by the University in those subjects. Many of the questions, referring to the books now used in the University, and the character and peculiar features of the Examinations in recent times, I cannot answer with any precision of my own knowledge, not having been for several years directly engaged in mathematical instruction; except in so far as books on mathematical subjects which I have recently published, and which are still in use, form a part in such instruction; nor in the Mathematical Examinations of the University, except in so far as the Examinations of the Bachelors of Arts for Dr. Smith's prizes are concerned. I have no doubt that your Lordship will have no difficulty in obtaining, from persons who have recently taken and are at present taking a share in the Mathematical instruction of our students, and in the Mathematical Examinations of the University, full information with regard to all those

portions of the Questions sent which admit of being answered in definite terms. But I will offer a few remarks in reply to those portions of the Questions on which my own knowledge enables me to speak. *Rev. W. Whewell, D.D.*

I will take the liberty of saying, in the first place, that if it is in contemplation to interfere in the matters here inquired into, by any authority exterior to the University's own power of regulating such matters by its own legislation and its own practice, such an intention is utterly inconsistent, not only with the authority and independence of the University, as it has hitherto existed, but with any free agency or authority which can in any way exist in the University. If the University cannot be allowed to regulate the manner, details, and extent of its own Examinations, and is to be accountable to an exterior power for the changes which the course of time and the progress of knowledge produce, as these are seen in the proceedings of its officers, acting to the best of their discretion, on the rules prescribed by the University; the University must be a mere instrument in the hands of such exterior power. The matters inquired into, the range of subjects, the introduction of the higher portion of Mathematics, the relative proportions of analytical and geometrical methods, and, in short, every point in the Questions which admits of a reply in any degree definite, have been settled, as they exist, by the University itself, and for the most part at very recent periods. They may be altered very greatly in a few years by the same authority which has made them what they are, though the University, I trust and believe, is sufficiently aware of the evil of sudden and extensive alterations of Academic studies not to be likely to introduce any such if left to herself. In establishing the system which at present exists, the authorities and officers of the University have brought to their task great thought, labour, care, and I venture to say, such an amount of knowledge of these subjects of study as is not at all likely to be found in any other body. If the direction of these matters be taken out of their hands, or interfered with by any other body, that body thenceforth assumes those functions which have hitherto been the distinctive attributes of the University authorities. Such a body so acting would, in fact, become the University authority; and there would be left for the teachers and examiners at Cambridge a merely subordinate and ministerial office; which it does not appear to me to be likely that teachers and mathematicians, such as we have hitherto had the privilege of possessing among us, and such as have made the name of Cambridge illustrious in the mathematical world, would be found willing to undertake. Such a proceeding would, I take the liberty of saying, ruin both that which I venture to consider as the Great School of Mathematics in Britain, and the least defective System of Mathematical Examinations which has hitherto existed.

If, however, the Questions thus sent are proposed only for the gratification of curiosity, and with a view of enabling the Commissioners to state to the world what the present practice at Cambridge is, without any intention of interfering with the authority which has established and is administering it, although the information is already, I conceive, abundantly before the world in other forms, I have no objection to contribute some remarks for such a purpose.

Question 1.—The mode of ascertaining the proficiency in Mathematics of Students who are Candidates for the Degree of B.A. is by examinations in certain portions of mathematics, (Euclid, Algebra, Mechanics, Hydrostatics, Astronomy,) for those who are not candidates for honours, and in a more extensive range of subjects for those who are candidates for honours. These examinations are *now* conducted entirely *upon paper*, which I should consider a great evil, if it were not almost a necessary result of the great number of candidates, and of the difficulty of conducting a *vivâ voce* examination in such a case. The examiners are presented by the Colleges according to certain rules, and appointed by the Senate. There is great reason to believe, as seems to me, that the Examinations would be more consistent from year to year, and less affected by peculiar views and habits of the Examiners, if the Examiners were constituted somewhat more as a permanent Board. This has been to a certain extent effective with regard to the Examinations for Honours, by the recent institution of the Board of Mathematical Studies. Examinations.

Among the elements of the process employed by the University for ascertaining the qualifications of candidates for the degree of B.A., I place a high value on the demand of certificates of residence in some College for a certain number of terms; for such certificates ought to imply, and commonly do imply, that the candidate has attended a series of courses of College Lectures on the subjects of study; and in my judgment, such courses form the most valuable part of the Student's residence at the University. If such courses are not attended by the Student, the knowledge which is supposed to be ascertained by the Examination may be, and often is, quite worthless.

With regard to the changes which have been made of late years in the examination, they are very numerous; and in order to avoid tediousness here, I may perhaps take the liberty of referring your Lordship to a little book which I lately published, in which these changes are traced historically, and the graces of the Senate by which they were established are given. I have also there made some remarks on the character, design, and tendency of these changes. I will direct this book to be sent to the Commission.

Questions 2, 3, 4.—For various reasons, some of which I have mentioned, I have no answers to give to these questions.

Question 5.—In answering Question 1, I have said that a mere paper examination appears to me to be a very imperfect method of ascertaining whether the candidates fully understand the subjects of examination; but I conceive there would be great difficulty in conducting a *vivâ voce* examination *on the part of the University*. Something of the same kind existed a few years ago, in the "Disputations in the Schools;" and these were abolished, on the ground of the difficulty of combining their results with those of the paper examinations. Vivâ voce Examinations.

Rev. W. Whewell, D.D.

The practice of College Lectures ought to be so conducted, and, for the first year at least, is commonly so conducted, as to supply some remedy to the evil. In the later periods of the Student's Undergraduateship, the beneficial effect of College Lectures is much disturbed or quite destroyed by the approaching paper examinations.

The Syndicate of Studies.

Question 6.—The *Board of Mathematical Studies*, which, I presume, is meant by "the recently appointed Syndicate of studies," has issued reports which I have no doubt will in the main be complied with, as to the recommendations which they contain respecting the subjects to be examined in. They have suggested changes in the mode (that is, in the times, &c.) of examination; which suggestions have been made Regulations of the University; the Vice-Chancellors for the time being having introduced graces of the Senate, on the ground of such recommendations. I do not see how they, or any authority, could otherwise regulate the "severity" of the examination; except, perhaps, by being authorized to receive appeals from disappointed candidates, and to reverse the decision of the examiners.

Limitation of Subjects.

Question 7.—The subjects here mentioned have been under the consideration of the Board of Mathematical Studies, as we learn from their Reports. I think that no opinion on the subjects is of any value compared with theirs.

I do not well understand what is meant by, "bringing the instruction of the Students within the grasp of the public and recognised teaching of the University," except it be, making the examinations correspond to the Lectures of the Mathematical Professors; and if this be meant, I do not see how it could be effected by "restricting the studies of the Students within narrow limits," without giving up almost all that is valuable in the present College University system.

Books in use.

Question 8.—I have given opinions on the subject of some of the books now in use in the University, in the publication to which I have already referred, and I will not here make any further remarks on that subject.

Tendency of the course of study.

Question 9.—As to the relative prevalence of analytical, and what, in the way of antithesis, I may call *geometrical* mathematics, I think that there was a very mischievous tendency to the former kind in the University *till lately*. Several of the changes recently made in the University examinations were intended to check this tendency, and I hope have been to a great extent successful. I hope, too, that the establishment of such regulations shows that there is in the University at present a disposition to resist the tendency; and that, if further steps be requisite for this purpose, they will be taken.

Problems.

Question 10.—I think that of late years Problems have borne *too small* a proportion to Questions from books. That the proportion has gradually diminished, is shown in the Report of the Board of Mathematical Studies. I think that no Problems should be proposed which do not require some ingenuity or clearness of head, which I conceive to be what is meant by "peculiar tact" in the Question.

Private Tuition.

Question 11.—I believe that the Students do, for the most part, avail themselves of the assistance of Private Tutors, in preparing for the University Examinations, both those who aspire to high mathematieal honours and those who merely endeavonr to avoid failure. I believe, however, that in the cases in which the Students study by themselves, and grapple with the difficulties which they meet with in their studies, with no other assistance than the occasional special explanations which the College Tutors are always ready to give, in addition to the general explanations given in their Lectures, the education of the mind is of a much higher character than is attained where a Private Tutor is always at hand, and where consequently the difficulty is not clearly seen before it is overcome. I believe, however, that so long as Private Tutors are *generally* allowed, *individual* Students will not abstain from such assistance, because they will not subject themselves to a disadvantage in the Examinations, whatever superiority the other course may have on mental education. The rules by which the character of our mental education is kept up must be, and ought to be, the work of the governing body, not the result of private plans of succeeding.

Many of the Private Tutors are good mathematicians in the kind of mathematics which is generated and kept up by the prevalence of the system of private tuition; but many of these would not be found good mathematicians in any other field for the application of mathematical knowledge.

Those who are now merely Private Tutors might be engaged as College Lecturers; but I do not think that this would be likely to produce any material improvement, if private tuition were still permitted to the same extent as at present. In the principal Colleges there is no opening for them in addition to the Fellows, of whom a sufficient supply, well qualified for the office of College Tutors, is always found. In some of the Colleges, those who are known principally as Private Tutors out of the College are engaged as College Lecturers.

I have made other remarks on the effect of private tuition, in my reply to the questions on the subject of the expenses of students, and to those remarks, I beg leave here to refer.

The Smith's Prizes.

Question 12.—It appears to me difficult to forsee what would be the effect produced on the study of mathematics, by deferring the examination for the Smith's prizes to a period one or two years after the examination for the Honours of Wranglers, &c. If this were done, it is very possible that the highest wranglers might not generally be competitors for the Smith's prizes. They might become engaged in College tuition, or in private tuition, or in the study of Divinity, or of Law, or in other studies or pursuits, and might cease to pursue mathematics with any zeal, and thus might leave the Smith's prizes to a lower class of competitors; nor does it seem to me likely that the temptation of the Smith's prizes alone would prevent this result. And if this were to happen, it would be useless to make the examination for the Smith's prizes turn, as it hitherto generally has done,

Rev. W. Whewell, D.D.

mainly upon the higher parts of our mathematical course, and upon subjects which go beyond, and therefore take for granted a familiarity with, the ordinary range of the mathematical studies of Undergraduates.

It appears to me also difficult to say what will be the effect of prizes, like the Adams prize, offered for dissertations upon special mathematical problems, proposed beforehand by the examiners. It does not appear likely that there will be many competitors for such prizes; since the problems will, it may be supposed, be such as to require both a considerable familiarity with the higher mathematics, and considerable time and labour in working out the results. Perhaps if some of the examiners be selected from year to year, (as is the case with the Adams prize,) the effect of the study which the prize will impose *upon the examiners*, which is in all cases an important effect of examinations, may tend to promote and keep up the study of the higher parts of mathematics, and the recent progress made in them. But in this case, as was remarked with regard to the Smith's prizes, it is likely that only a few of those who had made great proficiency in mathematical studies at the time of the B. A. examination will be sufficiently influenced by the motives held out to resist the more powerful motives which after that period draw our Students to other studies.

Improvement of the teaching of the University.

Question 13.—With regard to any suggestions which I might have to make for improving the teaching of the University, I conceive that the proper occasion for making such is, in my place, as one of the persons concerned in making Regulations on such subjects by the authority of the University. A great many changes, and I hope a great many improvements, have been made in the University Examinations of late years. The regulations by which such changes have been made have been discussed and prepared in Syndicates appointed by the University; and such as it may be expedient hereafter to make, cannot in my opinion be made in any other way than by the authority of the University, which generally, and very beneficially, acts by such discussions in Syndicates, followed by legislation founded thereon. I believe that I have been a member of most of the Syndicates held on these subjects for many years. I have proposed many of the changes, and have assented to all that have been established, with the exception of a regulation which threw open the Honours of the Classical Tripos to persons who had not obtained a Mathematical Honour. This step I opposed, because I thought that Students ought not to obtain University Honours for mere schoolboy studies; and as the classics are the main employment of boys at the great Schools for many years before they come to the University, I thought that, if they had not shown at the University that they can give their attention to some study which exercises the reasoning faculties more, they were very imperfectly educated. I still retain these opinions; and on these grounds think that to have been a retrograde step in our University career.

I have spoken of the advantage which, as I conceive, would be gained by having the examinations conducted, not by examiners all appointed in a detached manner, but by a Board, of which a portion should be permanent, or slowly changing. I believe this to be a wise and beneficial arrangement in every subject of examination, and I am very desirous of seeing other Boards, of a constitution resembling the Board of Mathematical Studies, established to direct and controul, if not to conduct, the examinations in other subjects. I would especially mention, as desirable in this way, *a Board of Moral Studies*, including the study of the Civil Law; (such a Board was under the consideration of a Syndicate last year, but, for the time, was not carried through;) *a Board of Classical Studies;* and *a Board of Natural Science Studies.*

Such Boards might of course be established by the University itself; and could not be established with any advantage or any propriety by any other authority.

I have the honour to remain,
my Lord,
Your faithful and obedient servant,

To the Lord Bishop of Chester. (Signed) W. WHEWELL.

CAMBRIDGE UNIVERSITY COMMISSION.

EVIDENCE ON CLASSICAL STUDIES AND EXAMINATIONS.

The following paper was addressed to the Heads of the several Colleges, the Classical Tutors and Lecturers, and the Examiners for the Classical Tripos during the past ten years:—

Cambridge University Commission,
Downing-street,

SIR,

HER Majesty's Commissioners for inquiring into the state of the University of Cambridge and the Colleges thereof, respectfully invite your attention to the subjoined List of Queries: and request the favour of such information in reply as you may be kindly disposed to communicate.

I have the honour to be,
Sir,
Your obedient humble Servant,
(Signed) W. H. BATESON,
Secretary.

---

1. Will you state the leading points of difference between the various honorary Classical Examinations in the University, and in particular the extent to which a power of writing prose and verse in the original languages, a knowledge of the subject matter of classical authors, and information either general or collateral, are required in these examinations?

2. Can you give an historical statement of the way in which the prizes and examinations for the encouragement of classical learning have been instituted? What changes have taken place in the Classical Tripos examination, in the mode of conducting it, the qualifications required in candidates, and the increase or decrease of numbers, since its first institution?

3. Would you recommend any change in the constitution of the various Boards which now conduct the Classical Examinations in the University? Are you of opinion that a Board for the superintendence of Classical Studies, similar to that constituted for Mathematical Studies, might be attended with advantage in preserving a suitable correspondence between the different Classical Examinations; in regulating with greater certainty the course of reading; in directing the attention of Students to such modern works of critical or historical research as possess real and solid merit; or in limiting the length of passages proposed for examination in a given time?

4. Would it be expedient in your opinion to specify the Classical books comprehended in the range of academical study and examination, so as, without impairing the substantial proficiency of the Students, to exclude such portions of Classical literature as are less suitable, on moral or other grounds, to be made subjects of study

5. Are there any conditions of eligibility now attached to the Chancellor's Medals, the University Scholarships, or the Classical Tripos, which you would recommend to be modified?

6. Can you suggest any other changes in the present system of the University, whereby the advancement of classical learning would, in your opinion, be more effectually promoted?

Answers from the Rev. B. W. Beatson, M.A., Fellow of Pembroke College.

Rev. B. W. Beatson, M.A.

REVEREND SIR,

IN answer to your Questions, which I received on May 19th, I lay before you the following brief statement:—

Examinations.

1. The examination for the medals, and that for University scholarships, admit original compositions. They also propose extracts from Athenæus and other late writers. The Classical Tripos excludes original composition; and the passages for translation are selected from Greek authors not later than Theophrastus, and from Latin authors not later than the age of Trajan. Ignorance of the subject-matter will discover itself in the candidate's translations; it is also detected by the questions appended to the extracts. General information is necessary for these questions, and for the miscellaneous papers of questions proposed in the examinations for university scholarships, and in the historical department of the Classical Tripos.

Classical Tripos Examination.

2. The Classical Tripos originated in 1824. It was at first concluded in four days: so that compositions in Greek and Latin prose were given jointly, each with a short translation paper, on two of the mornings; while verse composition had two whole mornings, one for Latin, the other for Greek. In 1836 (according to the Cambridge Calendar) a fifth day was added, so that every kind of composition had a whole morning. In 1850 a sixth day was added, to be employed in answering a paper of questions on history. As to the conduct of the examination, I can speak only of the years in which I was an examiner. In 1839 we agreed that every paper should be seen by two examiners at least; but, finding no advantage from that change, we next year (three of us being in office in both years) returned to the old practice that one should look over each long paper, three each short paper, and all each composition paper: and this has been the method in my other years of office, 1846, 1847, 1848, 1849. The Senate have ordered that from 1850 every paper should be seen by two examiners at least. At first it was required that every candidate for the Classical Tripos should have obtained a mathematical honour. Since 1850 candidates are admissible who obtain a place in the first class of the ordinary degree list, or who obtain any place in it after being passed by the honour examiners in mathematics, yet so as not to be judged worthy of an honour.

The number of the candidates has increased slowly and irregularly.

No change advisable.

3. I am opposed to any change in these Boards. I believe them all to possess the full confidence of the University. I should wish for fuller experience of the working of the Mathematical Board before I could pronounce upon a similar board for classics. The objects suggested are already secured partly by the College lecturers, and partly by the grace of 1850, which directs the examiners for the Classical Tripos to confer with each other, and settle their papers in common.

Specification of Classical books.

4. At present I see no necessity for such a specification of classical books. It seems to me but fair to expect that a candidate should master any ordinary passage of a Greek or Latin author within the recognised limits; and I find that a large proportion of them do so. I have no objection to the present length of the papers, as compared with the time allotted for them; and I cannot say that I have found short papers better answered than long ones. The modern works of sterling merit are recommended by the College lecturers in introductory lectures, and as the students apply individually for information.

Classical Tripos.

5. I should advocate opening the Classical Tripos to all the classes of the ordinary degree.

Recommendations.

6. I would fain see Greek anapæsts and Latin lyrics confined to the examinations for scholarships and medals, and discontinued in the Classical Tripos. And it might be desirable to give, on the sixth afternoon of the Classical Tripos, a paper on the ancient systems of philosophy, and the other non-historical subjects connected with classical literature.

I remain
Yours very sincerely,
(Signed) B. W. BEATSON.

Answers from the Rev. E. M. Cope, M.A., Fellow of Trinity College.

Rev. E. M. Cope. M.A.

GENTLEMEN,

In replying to the paper of Questions upon the present condition of Classical Examinations in this University, which you have done me the honour to send me, I have not attempted to return formal and definite answers to each particular Question, but have preferred throwing together such observations as I have to make into a connected form, without following strictly the order in which the topics occur in your circular letter. I have directed my attention principally to Question 1, and the first part of Question 3; and in conformity with the tenour of Question 6, I have ventured to offer suggestions of such alterations as seem to me fitted to remove objections which have been or may be justly urged against our present system.

Classical Examinations.

The principal Classical Examinations which are at present carried on in the University of Cambridge are three; those namely for the University Scholarships, for the Chancellor's Medals, and for the Classical Tripos. In the conduct of these three Examinations there are many points of difference, connected with the appointment of Examiners and the

Rev. E. M. Cope, M.A.

details of the examination. The two former may be considered together as essentially similar in their constitution and nature; the latter which is of comparatively recent institution, differs considerably from both. First as to the appointment of Examiners. In the case of the University Scholarship and Chancellor's Medals these are fixed and unalterable; the duty of examining being attached as a burden to certain offices and dignities in the University, which unfortunately in many cases offer no sufficient guarantee for the competency of the person who is thus called upon to act. A mere catalogue of the officials who are empowered to examine will make this apparent. For the Chancellor's Medals eleven officers have the liberty of examining. The Vice Chancellor, the Provost of King's, the Masters of Trinity, St. John's, St. Peter's, Clare Hall, and Christ's, the senior resident Fellow of Trinity who has gained a Medal, the Public Orator, the Greek Professor, and the Professor of Modern History. Of these eleven, only three, the senior resident Medallist of Trinity, the Public Orator, and Greek Professor are *necessarily* competent by previous education and training to fulfil the very peculiar duties which fall upon a Classical Examiner, and for which it is manifest that a mere ordinary acquaintance with a few Greek and Latin authors is a quite insufficient preparation. For the Craven Scholarship the Examiners are the Vice Chancellor, the five Regius Professors (of Civil Law, Divinity, Physic, Hebrew, and Greek), and the Public Orator; here there are only two whose studies have necessarily qualified them for undertaking this office. The ill effect of such a system must be apparent. Not only is there no certainty of proper qualification for these peculiar functions in the persons thus intrusted with them, and a temptation to the perfunctory discharge of duties often entirely foreign to the habits and studies of those who are thus forced into them, but this system also reacts to the disadvantage of the University by hampering the electors in their choice of these very Regius Professors who are also by virtue of their office to be concerned in some of the most important Classical Examinations; for in the selection of a candidate for one of these Professorships, it is not only to be considered who is best fitted to occupy the chair of Civil Law, or Medicine, or Divinity, but also who will make the best Classical Examiner: and thus, if it should happen that excellency in these two departments, entirely distinct as they are, and the result of a totally different habit of mind and course of study, does not chance to be united in the same person, one of them must needs be sacrificed to the other: either we must purchase a good Regius Professor at the price of a bad Classical Examiner, or we obtain a good scholar and an indifferent Professor. I have dwelt so long upon this point because I believe it to be one of the most crying evils of our Classical system. I can assert from my own experience that University Scholarship Examinations *have* suffered severely from this cause, and I hold it to be one of the greatest obstacles to any improvement of them. And as the evil is apparent, so is the remedy obvious and easy Two Examiners annually elected by the Senate, in addition to the Public Orator and Greek Professor, would be amply sufficient (especially if the Medal Examination were done away with; which since the institution of the Classical Tripos seems to have lost a great part of its utility and significance): and I cannot suppose that the University, if the case were properly set before it, could refuse to furnish the very small annual sum which would be necessary for such a purpose.

Ex-officio Examiners.

Recommendations.

Examiners for the Classical Tripos.

For the Classical Tripos the Examiners are four; annually nominated by the Colleges according to the cycle of Proctors and confirmed by the Senate. The practice has been, with a very few, and—as a matter of principle—much to be regretted exceptions, to appoint only men for whom the honours obtained by them in this branch offer an adequate security that they are duly qualified to exercise these important functions.

Examination Papers for University Scholarships and the Classical Tripos.

The main difference in detail which subsists between the University-Scholarship and Chancellor's Medals Examinations on the one hand, and the Classical Tripos on the other, is that the two former—which date, as may be gathered from the Cambridge Calendar, the one from the 17th, and the other from the 18th century, and, though considerably modified, still have reference rather to the Scholarship of a bygone age than to that of the present—give a decided preponderance, at least in number of papers, to composition in Greek and Latin prose and verse, and more particularly to writing Latin verse; whilst in the Classical Tripos the balance is in favour of translation into English. In the University Scholarship examination, for example, there are no less than six papers of Composition, three of them Latin verse; one short philological paper; and four of translation into English: and it is much to be lamented that even out of these four, some of the passages are not unfrequently selected from authors which do not fall within the range of what are usually designated as Classical writers. I believe it may be safely asserted that, as a general rule, a candidate who is unskilled in the composition of Latin verse, whatever may be his merits in other respects, has little chance of obtaining a University Scholarship. Encouragement is thus given to a desultory habit of reading, and to the cultivation of the taste (or what passes for it) at the expense of the more solid and useful faculties of the mind. In the Classical Tripos out of eleven papers four are devoted to Composition, two in prose and two in verse; six to translation into English; and one to Ancient History, the last of recent introduction. The range of authors from which extracts are allowed, is strictly limited to the Classical periods of Greek and Latin literature, and within that range very few authors of importance—at least in prose, for the poets are too numerous to be embraced entirely in any Examination—are omitted in each examination: a close and accurate translation, and a scientific knowledge of the grammar of the two languages is looked for; and care is taken to select passages which test the candidates' knowledge, archæological, legal, and historical, to such an extent as the nature and length of the Examination permits: there is also always at least one extract from the

works both of Plato and Aristotle, which requires some acquaintance with the philosophy of those authors, and not unfrequently a similar passage from the philosophical writings of Cicero. *Rev. E. M. Cope, M.A.*

Still it has been asserted, and it is, I believe, the opinion of some who are unfavourable to the exclusive use of the Classics as an instrument of intellectual culture, that the education which the University offers to the Candidates for Classical Honours is insufficient; and that the study of this branch of learning, as at present carried on, has a tendency to cultivate only certain faculties of the mind, and those not the most important and valuable We are accused of a want of scientific training and logical habit of thought. Insufficiency of the education for Classical Honours.

I believe that it is rather against a past than the present state of things that this charge could be justly directed; but still if any alteration be thought necessary, in order to give a greater solidity to the course of reading required for our final Classical Examination, perhaps that end might be attained without any material change of our present system by some such scheme as the following.

Suppose that—the number and character of the papers in the Classical Tripos remaining in other respects as they now are—the works of Aristotle, the abstruser treatises of Plato, and the philosophical writings of Cicero, were withdrawn from the Greek and Latin prose translation-papers, which might very well be filled up from the entire authors that remain, as well as the more popular parts of Cicero, Plato (the Phædo, Symposium, Protagoras, for example), and—if there be any such—of Aristotle. Select works, say a dozen or more treatises from these three authors, which should not be subject to alteration, might be made to constitute a new paper, which would give, with those that at present exist, four translation-papers from Greek and Latin *prose* writers, the most solid element of a Classical Examination. The subject of these treatises would be purely philosophical, and from the importance they would acquire in the Examination by constituting a separate paper, the student would be obliged to pay particular attention to the contents of them. Suppose, for example, that the Ethics, Rhetoric, Politics, &c. of Aristotle, the Republic, Theætetus, Philebus, &c. of Plato, the De Finibus, De Officiis, De Legibus, &c. of Cicero, were taken, it would not be difficult to select such passages from these works, or to append such questions, as would oblige the student to make himself fully master of their subject matter, or perhaps, in certain cases, if it were thought desirable, of the philosophical systems which these treatises illustrate, or of which they form a part: and thus the attention could be directed to such studies as tend to cultivate the robuster mental faculties and supply an antidote to the enervating effects of Latin elegiac verses, which would also, by the introduction of an additional paper, lose some of their weight in the Examination. An objection is entertained by some persons, and perhaps with justice, to any alteration which, by the introduction of special subjects, would tend to divest the Examination of the perfectly general character which it now has, and encourage what is commonly called "cramming," a word of very extensive application, which we may suppose to mean, in this case, learning by rote in schoolboy fashion. I believe that the plan above proposed is not liable to this objection. It would be impossible to "cram" a dozen or more long treatises in such a way as to produce an injurious effect upon the education of the candidates for these honours, whilst the difficulties of the translation itself, and the history of philosophy connected with them, would afford that solid food for the mind, and that field for the exercise of the reasoning powers which are supposed to be wanting under our present system. Another objection which has been alleged against such a course of reading, is, that some of these writings are so vague and indefinite, that the contents of them can not form proper subjects of examination, and also that we have no generally received text book in these subjects which is fitted for such a purpose. This objection is directed no doubt principally against the Dialogues of Plato. The works at least of Aristotle and Cicero are certainly definite enough, and I believe that if we take separate treatises of Plato, without attempting to deduce any *general* system from his writings as a whole, portions may be easily found which, viewed in and by themselves, and historically rather than systematically, have a sufficiently positive character, and may be well made instrumental in forwarding the object which we have in view, namely, that of giving a more serious and solid character to the course of study which leads to the attainment of Classical Honours. Recommendations.

I have the honour to be, Gentlemen,
Your very obedient servant,
Trinity College, Oct. 18th. (Signed) E. M. COPE.

Answers from the Rev. G. Currey, M.A., late Fellow and Tutor of St. John's College. *Rev. G. Currey, M.A.*

Sir, *Charterhouse, London, May* 22, 1851.

In reply to the questions of Her Majesty's Commissioners, I must mention that, having ceased to reside at Cambridge since 1847, I do not profess any practical acquaintance with the classical examinations since that date, although I have observed with interest all that is connected with them.

1, 2. I do not possess any information with regard to the institution of the classical prizes and examinations beyond that which is to be found in the Cambridge Calendar. Classical Prizes and Examinations.

The earliest seems to have been the Craven scholarship (A. D. 1649), to which the Battie, Davies, and Pitt, have been added, with much the same regulations and examinations. The Chancellor's medals, first given in 1751, are next in point of time, followed by the Members' prizes in 1753. Various prizes for compositions of different kinds have been added at intervals by several donors.

Rev. G. Currey, M.A.

Examinations and Prizes.

The Browne scholarship (1775) and the Bell scholarships (1810) are additional University scholarships with particular limitations.

The most important step however towards the encouragement of classical studies was taken in 1824, when the Classical Tripos was instituted, whereby every candidate has an opportunity of exhibiting the amount of classical knowledge which he possesses.

In estimating the effects of these various prizes upon the studies of the University we need scarcely reckon the Browne and Bell scholarships. The particular restriction which requires the successful candidate for the former to enter at St. Peter's College has rendered it of comparatively little general interest; and the early period at which the Bell scholarships are competed for connects them rather with school than with University studies.

The examination for these scholarships has always been such as to test the grammatical and critical knowledge of such subjects as are usually read at schools, and the power of the candidates in composition both prose and verse.

The prizes for particular exercises have little general effect, and it has been found that the institution of the Classical Tripos has rather lessened the interest which is felt in these prizes.

The most important examinations, as affecting the studies of the University, are those for (1) the Craven and similar University scholarships, (2) for the Chancellor's medals, (3) for the Classical Tripos.

The general style of all Cambridge classical examinations has been, and still is in a great degree, such as to test rather grammatical and critical knowledge of the Greek and Latin languages, and power of composition in each, than the knowledge of the contents of the books themselves.

In the University scholarship and medal examination this is more particularly the case. Original Latin composition is made a subject of the examination, and less attention is generally paid to the proficiency of candidates in classical antiquities or history, particularly in those branches to which the researches of continental scholars have been more recently directed, than in the examination for the Classical Tripos.

The Classical Tripos examination is usually more comprehensive in this respect. The examiners have of late years been in the habit of introducing questions in such subjects, and the addition of an historical paper is a movement in the same direction.

The passages for translation are also generally selected with a view to such knowledge, and care is usually taken that the papers shall include translations from each of the most pure standard classical authors.

The desire to make this examination thus comprehensive, combined with the strict limitation by Grace of the time of duration of the examinations, and the number of hours to be given for each paper, has led to the allowing too little time for many of the papers, and given rather an undue advantage to quickness of writing, and rapidity of composition. The time allowed in the university scholarship and medal examination is generally more adequate.

While the selection of passages for translation is generally such as to make it necessary that a person must, in order to distinction, have studied carefully the best classical authors, there is little in the examination to try the knowledge of the subject matter of the works read, and the general information which is obtained is commonly from modern rather than ancient authors. Many good scholars who are well grounded in the translations of Thucydides, Plato, and Aristotle, would be much at a loss to give an accurate account of the contents of the works which they have read, and have little or no notion of the nature and aim of the philosophy of Plato or Aristotle. And the same is true with regard to Latin authors.

The number and difficulty of other papers lessen the weight of the composition papers, which are confined to translationsin prose and verse; but this is still considerable, and the fact of there being such papers is enough to prevent any (except occasionally a very few) from entirely neglecting any kind of composition which is regularly set.

The number of candidates for the Classical Tripos has not very materially increased since its institution, and I should not conceive that there has been much change as to the qualifications required; except that there has been, as I have said, more attention paid of late to general and historical information. A day has been added since its institution, in which translations from authors only are required; and quite recently a paper containing historical questions separate from translations has been appointed to be set.

Examiners.

3. The examiners for the several University scholarships are not always the same body. This has arisen from the circumstances under which each scholarship was founded, *e. g.*— A founder belonging to King's College has named the Provost of King's. In one case (the Battie) the Proctors are named.

It seems very desirable that the examinations for those scholarships which are grouped together in one class, as the Craven, Battie, Davies, and Pitt, should be conducted by the same board of examiners. In all cases except the Pitt scholarship, the examiners are determined *ex-officio*. In cases where the office does not necessarily imply occupation in classical studies, or considerable classical attainments, this method of determination of the examiners is certainly objectionable. The Regius Professors of physic and law, although they often are admirably fitted for the task, cannot be supposed necessarily to be the best classical examiners, and the occupation of the Regius Professor of divinity in his own department must render the duties of a classical examiner burdensome to him. The mode of appointing Proctors renders them still less desirable for examiners. These remarks as to official examiners do not apply to the Greek Professor, or Public Orator, both of

Rev. G. Currey, M.A.

whose offices are intimately connected with classical attainments, and whose province it especially is to watch over and direct the classical studies of the University.

Examiners.

The constitution of the board of examiners for the Pitt scholarship appears to me a very good one, combining these two official examiners with two examiners appointed by the Senate. I should only desire that the Vice-Chancellor should, unless he examines himself, appoint a deputy to act for him. There would, I think, be little fear that the Vice-Chancellor, with his numerous engagements, would act himself, unless his acquirements and tastes should dispose him to the task.

I think it would be good that such a board conduct the examination for the Craven and similar University scholarships. It seems to me by no means undesirable that for scholarships on a somewhat different footing, there should be a differently constructed board of examiners.

In the case of the Bell scholarships, the objection to the Professors of divinity, law, and physic as examiners, is the same as in the former case, except that divinity forms some part of the examination. Perhaps, if each Professor was allowed to appoint a deputy, and it was expected that any one who did not examine himself should do so, it might meet this case.

The examiners named for the Chancellor's medals are far too numerous to be expected all to act. The objection to official examiners applies in full force to the appointment of Heads of Houses, especially considering how frequently mathematical distinction alone recommends to such a position. Nor do I approve of the nomination of the senior resident medallist of Trinity College as an examiner ; (1) because it is possible that the first classic of his year may not be able to compete for a medal; but chiefly (2) because I think any restriction to a particular college objectionable in an examination which concerns the whole University. It would not be difficult to suggest a principle of apointment free from these objections. I will, however, only express my opinion that it would be preferable that there should be some difference in its constitution, and that for the University scholarships, in order that classical proficiency be tested by different persons.

I would leave the appointment of examiners for the Classical Tripos as it is.

Board of Classical Studies.

I am not of opinion that there is any necessity for appointing a board for the superintendence of classical studies. The examinations for the Classical Tripos show that regard is paid to the researches of modern scholars, and they have had the effect of directing studies to such works as possess most real and solid merit. Nor do I think that there is much reason to complain of deviation from the best classical authors, or much want of certainty as to the course of reading. It would scarcely be worth while to appoint such a board simply to limit the length of passages proposed for examination. I am myself much averse to impeding the free action of examiners. Public opinion and usage are generally sufficient checks, and I cannot discover any such want of uniformity in the classical examinations as to make me desire the exercise of such control.

Specification of Classical Books.

4. Nor do I think there is much need for a specification of classical books to be comprehended in the range of academical study. I do not believe that the range usually adopted is too wide, nor am I at all apprehensive of any moral evil arising from a free study of classical literature. The good taste and good feeling of examiners must be sufficient to regulate any point where morality is concerned ; and any formal exclusion of books on moral grounds appears to me quite out of place and unnecessary for students at the University.

Restrictions on University Scholarships ;

5. There are certain minor restrictions as to the standing of candidates which affect one or other of the University scholarships. These should be so far removed, as to place all the scholarships of the Craven group on exactly the same footing.

In the Bell scholarships I would substitute for the rule excluding all who have been admitted previously to a given date, a rule defining eligibility by the time of commencing actual residence. I do not see why students of Trinity Hall should not be allowed to compete for these scholarships.

The Browne scholarship must be regarded rather as a Peterhouse than an University scholarship, and I think it quite fair that it should remain so.

And the Chancellor's Medals.

The most important restriction as to the Chancellor's medals is that which requires candidates to have taken the honor of Senior Optime.

Estimating very highly the advantage of a system which requires of classical scholars a certain amount of mathematical knowledge, I think this should be secured rather by rules as to the Classical Tripos, which must affect the great body of men, than such prizes as the medals, which will affect only the few best men. But to prevent students being attracted to aim at medals, avoiding mathematical studies, I should prefer that the same conditions be required in each case, and the recent arrangement with regard to the Classical Tripos in this respect seems to me to meet the case very well.

Change in the method of Examination.

6. I do not believe that any change in the method of examination or style of questions can be surely or safely made, except by those who are concerned in the education of students, whose practical experience will from time to time develop these studies in the way best suited to the requirements of the University. Such modifications of the classical studies are continually taking place, as sources of fresh learning are laid open by the research of scholars.

In stating, therefore, my individual opinion as to the desirability of any change in this respect, I do so with considerable deference to those who are practically conducting the the classical education of the University.

I believe it not to be undesirable that there should be some difference in the examinations for University scholarships, medals, and the Classical Tripos.

Rev. G. Currey, M.A.

Change in the method of Examination.

For the two former the examinations should be chiefly conducted with a view to the highest class of students, and therefore composition of all kinds should continue to have great weight. For the University scholarships I think critical and grammatical knowledge of the Greek and Latin languages should be chiefly required. In the medal examination, which is for students at the end of their academical career, collateral information in history and philosophy might be more insisted upon; and I think it would be a good thing that English composition (especially prose essays) should form an essential part of such examinations. Perhaps the appointment of the Professor of modern history as one of the examiners indicates an intention that this should be so.

The Classical Tripos must necessarily have most influence on the classical studies of the University.

Recommendations.

The points wherein I think there is room for improvement are these:—

1. More time should be allowed for the papers set; and this would be best secured by leaving some discretionary power to the examiners as to the time allotted to each paper, and increasing the number of days without adding to the work.

2. Some method should be devised of ascertaining definitely the aquaintance of the candidate with the subject matter of some at least of the works which he has read. I am aware of many objections which may be urged to *vivâ voce* examinations. But I do not know any mode by which this can be so effectually done as by a *vivâ voce* examination, conducted by an examiner who is thoroughly acquainted with his subject. One or two books might be fixed by the examiners a year before the examination, in which the candidates should so examined.

3. While the power of writing Greek and Latin prose is essential to scholarship, the supposed necessity of being able to write Greek and Latin verse has I believe an injurious effect in deterring some from classical study altogether, and inducing others to bestow much labour in attaining a moderate degree of power in these exercises, which labour is to a great extent thrown away. There is much difficulty in obviating this, and at the same time giving opportunity for the display of taste, and the full appreciation of classical poetry and classical feeling which real excellence in verse composition is best adapted to prove. Might it not be desirable to restrict the examinations in verse composition to certain of the candidates selected by the examiners after an inspection of other papers? Or might papers in verse composition be set only to those who should desire to be so examined, it being understood that account should be taken only of those exercises which should possess real merit? Neither of these courses is free from objection; of the two, I should prefer the latter. But I should be glad to see some better plan, by which the stumbling-block of verse composition to moderate men could be removed.

I have the honor to remain, Sir,

Yours faithfully,

(Signed) G. CURREY.

Rev. W. H. Bateson,
Secretary to the Cambridge University Commission.

Rev. F. France, M.A.

Answers from the Rev. F. France, M.A. Fellow and Tutor of St. John's College.

Classical examinations.

1. The principal honorary classical examinations in the University are the University Scholarships, the Classical Tripos, and the Chancellor's Medals Examinations. The Classical Tripos Examination chiefly differs from the other two, in requiring no original composition from the candidates, in proposing a greater number of passages for translation from Greek and Latin authors (both prose and verse), and in the addition of a paper of questions on Ancient History.

In the University Scholarships Examination it is usual to set for composition one paper of English into Latin prose, one paper of English into Greek prose, one paper of English verse into Greek verse (tragic iambics and anapæsts), one paper of English verse into Latin elegiac verse, one paper of English verse, or of a chorus from a Greek tragedian, into Latin lyric verse, an original Latin theme or essay, and an original copy of Latin verses (generally hexameters) on a given subject. There is sometimes an additional paper set for translation from English verse into Latin hexameter verse.

The Chancellor's Medals Examination is very similar to that for the University Scholarships, but a less amount of Latin verse composition is, on the whole, required from the candidates. In this examination occasionally a passage from a Latin poet is proposed for translation into English verse.

University Scholarships.

2. The principal University Scholarships are those founded by Lord Craven (originally two in number, which have since been increased to five by a decree of the Court of Chancery), to which the first election was made in the year 1649: one founded by Dr. Battie of King's College, to which the first election was made in 1747; one by Dr. Davies of King's College, to which the first election was made in 1810; and one founded by the subscribers to Mr. Pitt's statue in 1813, and called the Pitt Scholarship.

The Chancellor's Medals.

The Chancellor's Medals were instituted by the Duke of Newcastle, Chancellor of the University, in 1751. They are annually awarded "to two commencing Bachelors of Arts, who, having obtained Senior Optimes at least, show themselves the greatest proficients in classical learning."

It was thought that two Annual Medals were not sufficient, as Classical distinctions, for Commencing Bachelors of Arts, whose names had appeared on the list of Mathematical

Rev. F. France, M.A.

honours, and accordingly the Classical Tripos Examination was established by grace of the senate in 1822. Candidates were limited to those among the Commencing Bachelors who had obtained Mathematical honours in the preceding January. A grace passed the Senate in 1835, by which another day was added to the Examination for four additional short translation papers, without any increase of composition. Finally a grace was passed, October 31st 1849, for the regulation of the Classical Tripos Examination. The principal changes established by this grace were, 1st, The addition of a paper of questions in Ancient History; 2nd, The arrangement of the third class in alphabetical order; 3rd, The extension of eligibility of candidates "to those who, having been declared by the Moderators and Examiners for Mathematical honours in the preceding January to have deserved to pass (according to the present standard) for an Ordinary Degree, so far as the Mathematical part of the examination for such degree is concerned, shall have afterwards passed in the other subjects of that examination;" and to "those whose name shall have been placed (according to the present standard) in the first class, in the Examination for an Ordinary Degree in the preceding January." The number of names which appeared in the list of the Classical Tripos the first year of its establishment was seventeen; the number in the list for 1851 was thirty-eight. The increase, however, has not been *uniformly* progressive.

Examination for University Scholarships.

3. The Examination for the principal University Scholarships is at present conducted by *ex-officio* Examiners. The offices which the majority of these Examiners hold, have no necessary connexion with the classical studies of the University. It would, in my opinion, be desirable that the method pursued in the Pitt Scholarship Examination should be extended to the other great Classical Scholarship Examinations,—*i. e.*, that the Regius Professor of Greek and the Public Orator (whose offices are necessarily connected with the study of classics) should be permanent Examiners, and that they should be assisted from year to year by two members of the Senate appointed by the different Colleges (subject of course to the approval of the Senate), according to the cycle of Proctors: an arrangement of this nature, as compared with the present system, would, I conceive, have the advantages of relieving University officers, already overworked, from an onerous duty, of preventing too constant a routine in the Examination, and of placing the whole more under the control of the University. It would be also, I think, desirable that there should be a general meeting of the Examiners previous to the Examination, when the papers set by each Examiner should be submitted to his colleagues for their approval, as in the case of the Classical Tripos Examination.

If it be thought necessary to retain the Medal Examination at all, it would, I think, be advantageous (instead of the present Board of Examiners) to adopt an arrangement similar to the practice at the Pitt Scholarship Examination.

Board of Classical Studies.

A Board for the general superintendence of Classical Studies, similar to that constituted for Mathematical Studies, and composed of a permanent element (*e. g.* the Greek Professor and the Public Orator), and also of a variable one (*e. g.* the Examiners for the Classical Tripos of the two years preceding), would, I am convinced, be of great service to the University. The suggestions of the Board might be embodied in a Report addressed from time to time to the Vice-Chancellor.

Selection of Classical Books.

4. It might be found expedient to exclude authoritatively from Classical Examinations,

1. All Greek and Latin authors of a later age, as the selection of passages for translation from such authors must have a tendency to discourage the exclusive study of the pure classical authors.

2. Fragments of authors, even of the best age (especially of Greek lyric, tragic, and comic poets), which do not serve for illustration of the more common classical authors; and all such fragments as are in themselves rather *curious* than instructive.

3. Certain works of authors of the best age which most grossly offend against morality, (*e. g.*, certain comedies of Aristophanes, and satires of Juvenal.)

4. Some of the more recondite and less useful works of Plato and Aristotle.

The Medal and Classical Tripos Examinations.

5. The object of the Medal and the Classical Tripos Examinations being the same, it would seem that there is no longer any necessity for the continuance of the former. If, however, the Medal Examination be still retained, I should conceive that it would be expedient to make the eligibility of the Candidates co-extensive with that of Candidates for the Classical Tripos Examination.

It is highly desirable, in my opinion, to throw open the Classical Tripos to *all* who have passed the ordinary Degree Examination in the preceding January; because, in the first place, the Mathematical element has been so increased of late years in the Polloi Examination, that in the opinion of some of the very best Mathematicians it is amply sufficient for educational purposes; and because, secondly, according to the philosophical and critical system of acquiring the Greek and Latin languages which is now established in the University, the study of Classics in itself is a most important discipline for the mind.

To show that the principle here contended for has been already sanctioned by the University, it is only necessary to refer to the recent institution of the Triposes in the Moral and Physical Sciences, which are honorary in the same sense in which the Classical Tripos is, and yet impose no restriction of eligibility upon the Commencing Bachelors of Arts.

Examinations for Scholarships.

6. I would respectfully suggest that in the examinations for the University Scholarships, as at present conducted, there is too much encouragement given to elegant, as contrasted with sound Scholarship: in particular, too much importance seems to be attached to Latin verse composition. It is well known that facility in writing Latin verses is acquired

Rev. F. France, M.A.

by long practice, frequently to the neglect of more solid attainments; that it can rarely, if ever, be acquired by those who have not been trained at Public Schools before they come up to the University; and that it does not necessarily indicate even good Latin Scholarship. We should be anxious, I think, to avoid even the imputation (to which, I fear, the amount of Latin verse required in the University Scholarship Examinations must subject us) of awarding our greatest Classical distinctions to Undergraduates of elegant accomplishments, but with whose education the University has had so little to do.

Classical Prizes.

The number of Classical prizes for exercise in verse and prose might, I think, be diminished with advantage. At present they are so numerous as to tempt Undergraduates of the greatest classical promise seriously to neglect their general studies. Nor does the competition itself, for such distinctions, serve any real educational purpose. The mind of the competitor is for a time engrossed in a study for a specific end, and acquires a *temporary* knowledge of a subject, to the neglect of uniform intellectual progress. The time which unsuccessful Candidates have bestowed upon their exercises (except in the case of some particular prizes) is almost entirely lost, and success is frequently but a poor recompense for the labour expended.

I would venture to suggest, that while we retain the Chancellor's Medal (English poem), the Porson and the Camden Prizes for Undergraduates, it would be advantageous to discontinue the two Undergraduate Latin Essay Prizes, and to double the value of the two Bachelor Latin Essay Prizes.

It is inexpedient, I think, to continue the present Prizes for the Greek Ode and the Epigrams. If it were possible to consolidate the three Browne Medals, a valuable prize might be given for the best Latin Alcaic Ode written by Bachelors of Arts of the first and second years.

Lectures.

The following Answers have reference to Queries on Expenses and Tuition.

3 & 4. There are two Mathematical and two Classical Tutors on each of the two sides into which St. John's College is divided.

The Lectures given by the Classical Tutors, on the side to which I belong, comprehend the following subjects:—

First year	One Greek Subject One Latin Subject St. Matthew's Gospel.	Selected a year previously by the Tutors.
Second year.	One Greek Subject One Latin Subject One of the Gospels.	Selected by University authority for the Previous Examination.
Third year	One Greek Subject One Latin Subject Half (alternately) of the Acts of the Apostles One or two of the Epistles.	The Subjects chosen for the Ordinary Degree Examination.

The classical Tutors also deliver Lectures on half the moral subjects, *e. g.*, Bishop Butler's "Analogy," Paley's "Evidences" and Moral Philosophy, &c., which the College requires at the Midsummer and Christmas Examinations.

A selection is also made of the more promising Classical scholars of the second and third years, to attend courses of Lectures on certain higher Classical subjects which are annually chosen by the Tutors. Those Undergraduates who attend the higher Classical Lectures have an opportunity of doing composition in Greek and Latin prose and verse, in the Lecture-room, twice a-week.

Tuition.

At present, almost all the candidates for the Classical Tripos Examination think it necessary to read with a Classical private Tutor during part of their University career, and this very seriously augments the expense of a University education. If, however, arrangements could be made to double the staff of Classical Lecturers in College, there would be, I am persuaded, no real necessity for the employment of classical private Tutors in preparation for the Classical Tripos Examination.

Even under the present system it is not necessary for Undergraduates to engage the services of Classical private Tutors to prepare them for the Previous or Ordinary Degree Examination, unless they have wasted much of their time, or were at first insufficiently prepared to derive instruction from the College Lectures.

7. No re-enactment of the Grace of the Senate passed in 1781, or of a similar prohibition, would have, in my opinion, the desired effect. What is wanted (as far as the study of Classics is concerned), is I think, an increase in the number of College Lecturers, and the systematic discouragement, in the University Examinations, of all Scholarship which is not *general* in its character.

Poor Students.

8. In St. John's College there are 54 Sizarships (the annual value of each is about 30*l.*), of which 18 are filled up each year. An Examination for the vacant Sizarships takes place in June. The subjects of the Examination are the elements of Geometry and Arithmetic and certain Classical works selected annually by the Tutors. The 18 Candidates who pass the best Examination are elected irrespective of grades of poverty. Proper Sizarships (nine in number) to which additional advantages are attached, are subsequently bestowed upon the most deserving Sizars. The condition of poverty, as well as learning, is also annexed to many of the Exhibitions left to the College by private benefactors. I think that no other standard than that of merit is practicable, or even desirable, in selecting from a number of candidates fit recipients of eleemosynary bequests.

Rev. F. France, M.A.

The establishment of a Hall or College inadequately endowed for poor students only, would, I feel assured, prove a failure. The Colleges would be unwilling to elect to the offices and emoluments of their own foundations (except in the case of distinguished excellence) persons not of their own body, and confessedly of a different grade from the other members of the University; and parents would rather make great sacrifices to send their sons to Colleges, where they would have a chance of prizes or preferment, than give them a cheaper University education, if they were generally precluded from such expectations.

College Examinations.

9. There are two general Examinations of the Undergraduates in the year at St. John's College—one at the end of the Michaelmas Term, and the other at the division of the Easter Term. All Undergraduates are obliged to attend these Examinations, which embrace Mathematical, Classical, and Theological subjects. In addition to these mixed Examinations, there is a Classical Examination at the commencement of the Easter Term, of such of the students in the second and third years, as have attended the Voluntary Classical Lectures. The Scholarship Examination takes place early in the Michaelmas Term and is entirely Classical. The University Examinations, for which preparation s required, are the Previous Examination (in the second year), the B.A. degree Examiiations, the Classical Tripos Examination and the Theological Examination, which last, almost all the students who take holy orders have to pass, during the interval between their B.A. and M.A. degrees.

I should be disposed to think that frequent College Examinations rather tended to discourage than encourage the system of private tuition, provided the College Lectures be efficient, attendance at them compulsory, and a correspondence be maintained between the College Examinations and the instruction given in the lecture-rooms. With this view it is, of course, necessary that the College Examinations should be conducted in correspondence with, and subordinate to the University Examinations.

Matriculation examination.

10. There is no examination at St. John's College of the students previous to Matriculation, except that of candidates for Sizarships.

A general University Examination before admission would not, I think, be advisable. The persons most likely to fail in an Entrance Examination, would probably belong to a class which it would be very undesirable, even temporarily, to exclude. I allude to those persons who come to the University solely with the view of taking holy orders, and who, perhaps, have previously had but little opportunity of acquiring a sufficient knowledge of Mathematics and Classics. Such a class of persons usually by their industry attain to a competent knowledge of the subjects of the University Examinations during their residence at College, and subsequently prove most useful members of the body of the parochial clergy.

Schools do not, I think, require to be stimulated in preparing pupils for the University. The class most likely to be unsuccessful in a preliminary Examination would be composed of those who had not had the advantage of a regular school education.

Staff of Tutors and Lecturers.

12. To secure effectually the services of a larger staff of Tutors and Lecturers in the Colleges, it seems advisable that the fees of College tuition (at present 2*l.* 10*s.* per quarter, in the case of a Pensioner, and 15*s.* per quarter in the case of a Sizar), should be increased to each person *in statu pupillari*. If, as I believe, with an increase of the number of College Lecturers, private tuition would become comparatively unnecessary, the student would derive great benefit in a pecuniary point of view from the change.

Number of Terms.

13. The omission of the first and last Terms, now formally required, would, in my opinion, be advantageous to the University. A general Degree Examination ought, I think, to take place in the June of the third year of residence. Such a regulation would, to a great extent, ensure the reading of those students who are candidates for the ordinary B.A. degree, during a period in which, under the present system, they are most disposed to waste their time. The majority of candidates for the ordinary degree do not now usually begin to prepare for examination until the last three Terms of their University career.

The inconveniences of the accumulation of students at St. John's College, in the Michaelmas Term, are the overcrowding of the College Hall and Chapel, and the necessity the Questionists (or students of the fourth year) are under of vacating their rooms in College and taking lodgings in the town, in order that Freshmen may be located within the College walls.

If such a change were adopted, the course which most naturally suggests itself with respect to the order of Examinations, would be to have one general Examination for all students (in Mathematical, Classical, and Theological subjects), in the June of the third year of residence, and afterwards to allow the candidates for Mathematical and Classical honours to enter their respective Tripos Examinations in the January and February following.

I would recommend that residence should be required during the whole Easter Term, and that the College Examinations should take place at the close instead of at the division of that Term.

Residence during Vacation.

14. About 100 of the most regular and deserving students are allowed to reside in College during the Long Vacation. They are required to obtain special permission for that purpose. The surveillance to which students who are permitted to remain in College during the vacation, are subjected, is stricter than that of Term.

Reading parties.

Comparatively few students of St. John's College leave Cambridge with reading parties under private Tutors during the Long Vacation.

Rev. W. G. Humphry, M.A.

Answers from the Rev. W. G. Humphry, M.A., Fellow of Trinity College.

13, *Arlington-street, June* 7, 1851.

I BEG to submit the following remarks upon the paper of Queries which I have had the honour of receiving from Her Majesty's University Commission.

Boards of University Scholarship Examiners.

Qu. 3. I think it would be an improvement if the various Boards of University Scholarship Examiners were modified, so as to resemble, as nearly as possible, the Board of Examiners for the Pitt Scholarship. The assistance of one or two *fresh* men, appointed by the senate, and the omission of some professors who are not necessarily scholars, I should consider very desirable.

Oral Examination.

Qu. 6. I wish to direct the attention of the Commissioners to a defect, which is of comparatively recent date, in the system of the University. I have long regretted it, and, especially since I have ceased to reside at Cambridge, every year's experience and reflection has more fully convinced me of its importance. I refer to the absence of *oral* examination, without which no educational system, in my opinion, can be complete. Mere written questions, however carefully framed, do not always enable the examiner to ascertain whether the candidate really understands the subject, nor to search the full extent and test the accuracy of his knowledge, nor to judge as to the quickness of his perceptions, the *readiness* of his memory, and his power of producing wha he knows on the spur of the moment—qualities which, being of so much use in manhood, ought to be encouraged, developed, and rewarded in youth. For this purpose, the University should give full scope to them in her examinations; and this, I submit, she cannot do without the *vivâ voce.*

I think, therefore, that we should do well in this respect to imitate the Oxford system, or, I would rather say, to revive our own. I have had several opportunities of conversing on the subject with eminent Oxford examiners, and of observing their practice; and I am satisfied that the *vivâ voce* examination as conducted by them is of great value, that there is no objection to it on any grounds of equity and impartiality, and that its results may without difficulty be combined with those derived from the paper work.

Vivâ voce may, I think, be introduced with advantage into the Classical Tripos and medal examinations; I doubt if it would be efficient in the University scholarships, where a large number of candidates are contending for a single prize.

In the Classical Tripos it might be thought expedient to limit the *vivâ voce* to one or more authors or subjects, to be announced twelve months beforehand. Each candidate to be under examination two or three hours.

The adoption of *vivâ voce* examinations by the University would lead to their more frequent use and greater efficiency in the Colleges; and I should anticipate that the advantages accruing from them would be scarcely less to the examiners than to the students.

(Signed) W. G. HUMPHRY.

The Rev. W. H. Bateson.

Rev. J. A. Jeremie, D.D.

Answers from the Rev. J. A. Jeremie, D.D., Regius Professor of Divinity.

SIR,

I HAVE the honour to acknowledge the receipt of your letter of the 15th of May, containing a list of Queries from Her Majesty's Commissioners for Inquiring into the state of the University of Cambridge. I am not sufficiently acquainted with the history of the University to be able to give a detailed account of the way in which the various prizes, &c., for the encouragement of Classical learning have been instituted; but I beg leave to state my opinion on other points to which your letter refers. I cannot but think that it would be desirable to regulate the course of reading, and to limit the length of passages proposed for Examination in the Classical Tripos. This might be done by a Board for the Superintendence of Classical Studies composed of persons whose position, experience, and known judgment would give weight to their opinions and recommendations.

Specification of Subjects.

Board of Classical Studies.

It appears to me that the portions selected for examination should be exclusively drawn from authors of acknowledged excellence. It may be perfectly true, that admirable passages may be found in writers of inferior importance, and that the translation of such passages may afford an adequate test of the merits of the Candidates, but successive examinations form parts of a system—they become guides to the student, and they ought not to withdraw his attention from the purer Models of Classical Antiquity.

Scholarships.

I do not mean to extend this remark to the University Scholarships. These are prizes for one or two men of high attainments. In such cases the range of reading may without any inconvenience be considerably enlarged. Moreover, as the Examiners for these Scholarships are for the most part a permanent body appointed by the wills of the respective founders, it would probably not be practicable, and, if practicable, it would not, I think, be desirable to fetter in any way their discretion.

The Classical Tripos ought to be open to all.

I have always thought that the Classical, as well as the Mathematical Tripos, ought to be open to all members of the University without exception, or limitation whatever. I believe that any system by which men of distinguished scholarship are debarred from the honours to which such scholarship is fairly entitled tends only to defeat the great objects of academical education.

I have the honour to be, Sir,
Your obedient servant,

(Signed) J. A. JEREMIE.

Answers from J. Roberts, Esq., M.A., Fellow of Magdalene College.

J. Roberts, Esq., M.A.

GENTLEMEN, *Magdalene College, Cambridge, September* 16, 1851.

I BEG to apologize for delaying so long to answer those of your Queries on the state of Classical Studies in the University, upon which I am desirous of offering an opinion.

I have the honour to be, Gentlemen,
Yours very faithfully,
(Signed) JOHN ROBERTS.

Boards of Examiners.

(3.) I think it would be advisable to remodel the Boards of Examiners for the various University Scholarships and for the Chancellor's Medals. In particular, I would suggest that instead of appointing Examiners for the Classical Tripos merely, four Public Examiners in Classics should be chosen annually to examine, as at present, Candidates for the Classical Tripos, but two of them, at least, to take part also in each of the Examinations above mentioned. These, with a portion of the existing Boards, would constitute an adequate staff of Examiners, and a suitable correspondence between the different Classical Examinations would be better maintained.

Specification of Books.

(4.) The only change which appears to me necessary under the head of Query 4, is that of limiting *all* the Classical Examinations to the *best* authors, the present rule of the Classical Tripos.

Chancellor's Medal. Examination.

(5.) I am decidedly of opinion that the Chancellor's Medal Examination should be open to all the three classes of the Mathematical Tripos alike, and the Classical Tripos to all persons who have passed the Examination for the ordinary Degree. The restriction of the Chancellor's Medals to the Mathematical Tripos would of itself, I think, be quite a sufficient spur to Students of high classical attainments to direct their attention partially to Mathematics without requiring a Senior Optimes Degree, while the opening of the Classical Tripos would prevent Classical Students who have a decided distaste for Mathematics from abandoning the hope of attaining Classical Honours. The principle of this change having already been adopted, it only remains that the distinction now made between the first and lower classes of the ordinary B.A. examination, in respect of admission to the Classical Tripos, be abolished.

Classical Tripos Examination.

(6.) On the general changes in the present system of the University, which would be likely to promote the advancement of Classical learning, I am not prepared to offer an opinion. I will only mention one particular change which it appears to me would be useful, namely, the addition to the present Classical Tripos Examination, of a special Examination in a particular portion of Classical Literature to be chosen annually about two years previously to the Examination.

(Signed) JOHN ROBERTS, M.A.,
Fellow of Magdalene College and Classical Lecturer of Sidney College.

Answers from the Rev. W. H. Thompson, M.A., Fellow and Tutor of Trinity College.

Rev. W. H. Thompson, M.A.

The Honorary Classical Examinations.

1. There are three principal honorary Classical Examinations in the University. 1. That for the University Scholarships, which is open to all undergraduates of every College. 2. That for the Chancellor's Medal, open to incipient Bachelors of Arts, who may have been placed on the List of Wranglers or Senior Optimes in the January preceding the Examination. 3. The Examination for the Classical Tripos, which is now open to all who may have obtained an honour in the Mathematical Tripos, or a first class on the list of Ordinary Degrees. In all these the candidates are required to translate passages from Greek and Latin authors into English, and passages from English writers into Latin and Greek verse and prose. In the two former, subjects are also proposed for original composition in Latin prose and verse. In all three, questions are set on points of grammar, archæology, or history, more or less naturally arising out of the passages proposed for translation: and in the Classical Tripos Examinations a paper is now given, containing general questions in ancient history, which occupies the morning of the sixth day of examination.

From this description it will be seen that the more elegant accomplishments of Classical Scholarship are encouraged at the two former in a higher degree than at the last-mentioned examination, in which a thorough acquaintance with the classical languages is the quality which best insures success. In my opinion, the Classical Tripos Examination ought to be still further distinguished from those for the Medals and the University Scholarships, by omitting to require proficiency in Greek and Latin verse composition even as at present restricted. Many students are deterred from competing for Classical honours, by the consideration of the great difficulty of acquiring those accomplishments, which are valueless unless carried to a high point of perfection.

The power of prose composition (especially in Latin) appears to me both a more valuable attainment, and also a better test of Scholarship, than composition in verse, which ought to be confined to examinations like those for the Medals, and University Scholarships, in which one or two first-rate scholars are selected for especial distinction.

Rev. W. H. Thompson, M.A.

Specification of Books.

With regard to questions relating to "the subject matter of classical authors, &c.," I doubt whether they could with advantage be introduced into the Classical Tripos Examination to a much greater extent than at present. A proposal was made at a Syndicate in 1849 to introduce a paper of questions on Greek and Roman Philosophy, in addition to the History Paper, but it was rejected, after consideration, by the majority of the Syndicate. I supported the proposal at the time: I hope some day to see it revived. But I should be sorry if that or any other addition to the Examination had the effect of diverting the students' attention from the Classical authors themselves to the productions, however ingenious, of modern speculation upon them.

Examinations.

2. I am unable to give any information concerning the history of our Classical Examinations which may not be found in the Calendar.

The changes that have taken place in the Classical Tripos Examinations are—1. The increase of the relative proportion of the Translation to the Composition Papers. 2. The addition of two more days. 3. The institution of a History Paper (in 1849.)

The qualification used to be, a Junior Optime's degree at least; it is now enough if a person be placed in the 1st class of the ordinary degrees, (*Report of Syndicate*, 1849.)

These changes have been accompanied by, if they have not caused, an increase in the number of candidates. For instance, in 1824 the number was only 17. In 1828 it had risen to 24; in 1835 to 32, and this year the number of persons classed was 38.

3 & 4. The Examinations for the University Scholarship and Medals are at present conducted by unpaid *ex-officio* Examiners. This arrangement is not without its inconveniences. In practice, the right result is usually—I may almost say invariably—attained; but the constitution of the Boards of Examiners is open to grave theoretical objections. It may, for instance, very well happen, that a Professor of Medicine may be but slightly acquainted with the best Greek authors, or that a Master of a College may owe his position rather to his scientific than to his literary reputation. The reason why the arrangements work fairly in practice is to be sought in the fact, that some two or three of the *ex-officio* Examiners (*e.g.* the Professor of Greek, the Public Orator, and the Regius Professor of Divinity) hold offices for which classical attainments are a necessary qualification; and also that in the case of those officials whose functions do not require classical knowledge for their adequate performance, classical scholars will sometimes receive a *cæteris paribus* preference, in consideration of the part they are to take in conducting Classical Examinations. A simple, though not complete, remedy would be to allow such official Examiners as Heads of Houses, Professors of Physic, &c., to appoint deputies to be approved by the Senate. This change, however, is not in the power of the University, as the Examiners for the Scholarships are fixed by the will of their founders.

I do not think that a Board such as that alluded to is required. By the Grace of 1849, the papers set at the Classical Tripos Examination are agreed upon by the four Examiners who meet for that purpose. This I conceive to be a sufficient precaution against the tendency of any particular examiner to give undue prominence to inferior authors, or to display his own learning rather than ascertain that of the examined.

The Chancellor's Medals and Classical Tripos.

5. I should wish to see all persons eligible as candidates for the Chancellor's Medals and Classical Tripos who have passed the ordinary examination of the B.A degree. The relaxation made in the qualification for the latter (in 1849) has been attended with this good effect, that several students have been encouraged to read for classical honours whom the condition of a previous mathematical honour would have deterred from making the attempt. As a tutor of a large College, I may perhaps be disposed to attach too much importance to this fact (of the existence of which I am certain), but it will be admitted that it is entitled to consideration.

English Essays.

6. I have, in my answers to a previous paper of questions, given as my opinion that English Essays, requiring original investigation of some questions connected with Classical Philology, would be proper objects of encouragement. I should say that one of the member's prizes might advantageously be given for the best Essay of this description, the other being given, as at present, to the author of the best Latin Essay.

(Signed) W. H. THOMPSON,

Fellow and Tutor of Trinity College.

Henry Thring, Esq., M.A.

Answers from Henry Thring, Esq., M.A., Fellow of Magdalene College.

SIR, 6, *Old Square, Lincoln's Inn, June* 3, 1851.

I HAVE the honour to enclose the following answers to your inquiries:—

Classical Examinations.

1. The first question is a difficult one. I should say that the leading points of difference between the examinations of the classical tripos and the university scholarship were, in my time, that the university scholarship examination gave greater weight to proficiency in the more elegant accomplishments of a classical scholar, especially in original composition both in verse and prose, than the classical tripos examination, which leaned rather to a preference of solidity in scholarship, as tested by skill in writing Greek prose or construing, *e. g.*, a passage of Thucydides. As a general rule, however, a university scholar would also attain the first place in the classical Tripos, thus showing that there is no violent discrepancy between the two systems.

Henry Thring, Esq., M.A.

2. I regret that I am not sufficiently acquainted with the facts to afford the Commissioners any information on these points.

3. This question, and the succeeding one, involve the whole subject of classical education and the feasibility of any change in the Cambridge system. In order to explain my opinion on these points, I must first state what appear to me to be the end which all education should propose to itself, and then inquire how far the classical system at Cambridge conduces to that end.

Now the end of all education appears to me to be twofold; firstly, to strengthen the intellect for the acquisition of knowledge; secondly, to furnish the mind with knowledge itself.

Of these two objects, the first is more properly the object of university teaching, and the means applicable to carrying it out constitute "education," in the strict sense of the term; for the acquisition of knowledge is the result of education, rather than education itself, and bears the same relation to it that reading a book does to learning the alphabet.

Testing, then, the Cambridge system of classics by these principles, I think that it is pre-eminently calculated to strengthen the intellect and prepare it for the acquisition of knowledge. The perfection to which the study of language, as a science, is carried, gives a habit of accuracy combined with a precision of expression which can be obtained (so far as I am aware) by no other method, and which is of infinite value in the more active professions and earnest business of life.

On the other hand, I think that the excessive devotion to that study, almost to the exclusion of history and philosophy, by acting on the intellect alone tends to harden the mind, and make it a mere reasoning machine; if, therefore, an infusion of general information could be introduced as a part of the classical course, without seriously detracting from the advantages of the present system, I should deem it a great improvement.

Ex-officio Examiners.

Having thus answered generally these questions, I may state in detail that I am strongly opposed to the system of *ex officio* examiners; I think, therefore, that a board for the superintendence of classical studies, similar to that constituted for mathematical studies, might be attended with advantage in preserving a suitable correspondence between the different classical examinations, in regulating with greater certainty the course of reading, and in directing the attention of students to such modern works of critical or historical research as possess real and solid merit.

Examination Paper.

The determination of the proper length for an examination paper is a difficult matter, and involves the question of giving greater or less encouragement to quickness as compared with mere learning. If a paper be long, a man whose mind moves slowly, however learned he may be, has no chance with another of less acquirements, whose knowledge is producible on demand. In my opinion this is as it should be; for I consider a ready habit of mind an essential element of success in life, and as such a fit object of encouragement at the University. I should say, therefore, that the proper measure of length in a paper is the quantity which a quick man can finish in his *best* style within the allotted time. I think that some years since the Tripos papers rather exceeded the limit, and were of such a length, that even the best men were driven, in order to clear their work, to scramble through it in a comparatively imperfect manner. If this bad practice still continue, I would so far shorten the papers as to prevent that effect, but not further.

Specification of Classical Books.

4. I think it would be desirable to exclude such portions of classical literature as are not of the highest order; for instance, I should exclude some of the minor Latin poets, and some of the minor Greek poets, and should confine the examination to the purest and most important of the classics. I would not, however, so contract the course of study as to enable a man, however hard he might read, to get up the whole course, or to *take up books* in the sense in which that expression is used at Oxford. In other words, I think a man should not trust so much to his memory as to his knowledge of language generally for success.

I do not think any books are objectionable on moral grounds; in my opinion men of evil tendencies are corrupted by other influences, and never by classics.

I think that a paper of questions, and an essay to be written upon one out of several proposed subjects, should form part of every classical examination; but such questions should not be directed so much to facts as to the result of facts; for instance, I would not ask dates, but I would ask the distinguishing characteristics of modern and ancient civilization, the political relation of the ancient states to each other; the nature of their government and laws; and so forth. I think that the cultivation of Latin, as compared with Greek, is neglected at Cambridge, and that some steps should be taken to remedy the defect. From the circumstance of Latin being taught at schools before Greek, a moderate proficiency in Latin is met with almost universally amongst candidates for classical honours; on the other hand, great excellence in Latin is quite an exception, even among the first men. I conclude that this comparative inferiority in Latin arises from the fact, that a good scholar can obtain more marks in Greek than he can in Latin, and consequently devotes most time to that study in which his superiority will, in an examination, be most conspicuous. Now as Latin is to the full as useful as Greek, I think such an alteration should be made in the system of marking as would encourage candidates for honours to cultivate Latin to an equal degree with Greek.

Honorary distinctions independent of Degrees.

I think that honorary distinctions should be quite independent of degrees; I would allow any member of the University, who in the several examinations came up to the requisite standard, to become University scholar, attain a class in the classical Tripos, or be Chancellor's Medallist, whether he took a degree or not. If after a certain time he declined to take a degree, I would declare that he could no longer continue to be a

Henry Thring, Esq., M.A.

member of the University, but during the period of his membership I would not prevent him from attaining any honours within his grasp.

Vivâ voce Examination.

One most important question, namely, that of *vivâ voce* examination, has not been alluded to. On the whole I am of opinion that a *vivâ voce* examination is the only test by which a man's scholarship, combined with his capacity to express himself in appropriate language, can be fairly gauged. I should recommend, therefore, that every candidate for classical honours should be examined *vivâ voce*, and that proficiency in such examination should be highly marked. I consider excellence in those qualities which make a good construer, to be of at least as much value as excellence in qualities which are required by a good translator. I would endeavour, therefore, so to balance the examination that excellence in *vivâ voce* should meet its due reward without giving it a preponderance over good translation.

I am aware of an objection to the introduction of *vivâ voce* examination, namely, that it would throw great difficulties in the way of classing men according to merit: in answer to that I may state that I am inclined to view with disapprobation the extent to which mere classification is carried in Cambridge, as tending to an unhealthy degree of competition. I think, therefore, that the second and third classes of the classical tripos should be arranged alphabetically, and that brackets should be freely used on the arrangement of the first class.

Study of the English Language.

6. I think that greater encouragement should be given to the cultivation of our own language. This might be done by setting an English Essay; and also by marking highly excellence in expression, as well as accuracy in translation. A paper of modern languages, which I have recommended below, will afford a good opportunity for the display of proficiency in English.

I will conclude by stating that I think that in every instance all the examiners should read over and mark every paper.

I have the honour to be, Sir,

Your obedient servant,

(Signed) HENRY THRING.

Rev. E. Warter, M.A.

Answers from the Rev. E. Warter, M.A., Fellow and Tutor of Magdalene College.

To Her Majesty's Commissioners for Inquiring into the University of Cambridge.

My Lord and Gentlemen, *Magdalene College, July* 1, 1851.

In answer to a series of Questions, dated 15th May, 1851, I shall be somewhat brief, because some of them are generally known, and others require only an expression of opinion.

Classical Examinations.

1. The three great honorary Classical Examinations in the University are, of course, the University Scholarship, the Tripos, and the Medal Examinations. The first and last of these differ from the third in *these two particular* points, viz., 1st. That the former involve original composition in prose and verse, whereas the latter consists only of translations. 2nd. That since the late alterations of 1849, or indeed I may say from its commencement, the Classical Tripos Examination has, in my opinion, involved much more general and collateral information than either of the other two, and been from that and other causes the surest test of a man's Classical knowledge. How far it is desirable that any of our Examinations should contain so much verse composition, either original or in the way of translation, is a question which has been much discussed. Perhaps it is not desirable that such entire uniformity of character should exist amongst these several Examinations, at any rate the Sister University would appear to entertain such an opinion, as will appear to any one on comparing her University Scholarship Papers with the Class Examination. The character of our University Scholarship Examination would appear to have altered for the better, and now-a-days to require deeper reading than it did some years ago; at least the Freshman is no longer able to obtain it, whereas such instances were formerly not uncommon, and I for one am not disposed to doubt that men come up *at least* as well prepared as they did in former years. The day of excessive Critical Scholarship may have existed, but at any rate it did good service, while the late addition of an Historical Paper to the Classical Tripos would indicate that we are disposed to require more general and collateral information than we have hitherto done. Still I trust that they will ever go hand in hand, and that one will not be sacrificed to the other, although we may be told by some of those who do not entertain the best feeling to the Classical Scholarship of our University that *it is mere* school-boy knowledge. We owe a heavy debt of gratitude to the memory of Professors Porson and Dobree (to say nothing of many other great names) and I sincerely hope that we shall be careful not to allow the sound knowledge of the Greek language, established amongst us by them and the Scholars of Germany, to be hastily superseded or over-built by what I humbly consider the faults of some other Universities.

I somewhat doubt whether Latin verse has not too much weight given to it in all our Classical Examinations; but this is a point on which Scholars, I am aware, disagree, and therefore I shall not enter on a discussion of it.

2. Time does not permit me to give a succinct account of the alterations which have been

Rev. E. Warter, M.A.

Classical Tripos Examination.

introduced in the Classical Tripos Examination since its foundation in 1824. They have, however, been given pretty correctly in the "Cambridge Calendar" from time to time, and do not, up to October 1849, involve any very important change. The new regulations drawn up in that year by a Syndicate (of which I myself formed one), and adopted by the Senate in that year, are fully given in the "Cambridge Calendar" of 1850.

In the first instance the Examiners might be all new at each successive Examination, but now it is provided that only two of the four shall go out of office each year, and thus a more uniform and systematic character has probably been secured to the Examination.

The method of setting the papers under the last regulations must also, I think, give general satisfaction, as some very first-rate scholars have their *crochets*, and these may probably be counteracted by their having to submit their papers to *their Colleagues for approval.*

The Historical Paper, also, with the provision that the questions therein shall be fixed upon by the Examiners in common, must have a beneficial influence. The introduction of a philosophical element has also been suggested, and in spite of difficulties and objections, which really do exist, would, I believe, under proper limitation, prove advantageous. As to the qualification required for Candidates under the new regulations, I consider it an improvement on the old rule, but one which must be still extended, from the *very uncertain character* of the *Ordinary Degree Examination.* I hope, however, that some such plan as I have alluded to in Answer 9, to the questions issued by the Commission, February 18, 1851, will ultimately be adopted, and thus all the Triposes made independent honours consequent on a General Degree Examination.

Ex-officio examiners.

3. It is somewhat difficult to answer the first part of this question without making invidious remarks. However, I shall not hesitate to express my opinion that in many instances *ex-officio* Examiners are objectionable. The experience of years has convinced me of this, and I know that I am not singular in entertaining this opinion. I can quite understand a Regius or other professor being a most proper person to examine *ex-officio* in his own department; but I am not therefore of opinion that the Head of a College is fit to take part in a Classical Examination, merely because he is the Head of that College, and named for the purpose in the will of the Founder. He may or may not be a Classical scholar, and the candidates are at his mercy. Practically, I believe, many who find themselves in this position decline to Examine, but the result is that the Examination is in the end conducted by some two or three, and the impression on the mind of the examined not so satisfactory. The second part of the question I can only re-echo in the shape of an answer. I conceive such a board would be *most desirable* for all the objects mentioned therein; and I hope no petty jealousies will prevent its ultimate adoption. For although we may lack Professors to form a Board of equally weighty names with those on the Mathematical, the University has undoubtedly within her precincts a sufficient number of men of standing and learning resident to constitute such a body from time to time; and there seem to me to be quite as important reasons for establishing the latter as the former; for though the languages are dead, the study and knowledge of them are still progressive.

Specification of Books.

4. I conceive that a specification of classical books to be comprehended in the range of academical study and examination would be found to be practically very difficult, and might impair the substantial good which at present results from what I may call our present open field, while I much doubt whether the exclusion of portions of certain authors on moral grounds would produce any beneficial result. Little encouragement is given at present to investigate such parts, and I believe the body of our students do not generally peruse them; but if we were to put a bar upon them, we might only give an additional stimulus to men of prurient imagination, and produce a greater evil than at present exists. No one, for instance, would wish Aristophanes, I presume, to cease to be read amongst us; and yet, were we to interdict certain plays, I believe we should do more mischief than by leaving matters as they are at present; and the same remark would apply to Juvenal and other authors. What under such circumstances could we do with Martial? Not, I presume, adopt the edition with a certain appendix. As the case is now, if examiners will abstain from unwise selections, there is no fear for the body of the classical students being corrupted; while they ever were and will be men who, in spite of any such specification as the University might make, will select such books for their reading. I would, however, confine the reading of Aristotle, if not of Plato, to certain portions, as an exception to the rule, but on very different grounds, and I know that many scholars of experience entertain this opinion. The student is much more likely to enter on the perusal of these authors with ultimate advantage, if his reading during his academical career as an Undergraduate be limited to the more simple portion of either, at any rate, of Aristotle. Moreover, Plato must certainly be read in part first, and by such limitation one may be brought to bear more directly on the other; for no one can be expected, during the above time, to get through any large portion of both.

Those who legislated in the first instance for the Classical Tripos, when they recommended that the passages proposed for translation should be selected from the *best* Greek and Latin authors, clearly intended that those of a lower and inferior age should be pretty much excluded. This direction has not always been observed, and therefore some line of demarcation or exclusion might possibly be drawn with advantage.

This same remark would of course, with equal truth, apply to the other Classical Honour Examinations, although I am prepared to admit that there is somewhat to be said on the other side of the question. I have, for instance, seen very fair passages set by the

Rev. E. Warter, M.A.

present Greek Professor from Athenæus, on which a man could bring his general reading to bear, and exercise his ingenuity to good purpose.

University Scholarships.

5. The University Scholarships are, as far as I know, with the exception of that of Sir William Browne and the Bell's Scholarships, free from all restrictions, and probably no one would wish to see the latter of these two altered.

Chancellor's Medals.

My opinion on the freeing of the Classical Tripos I have already stated, and I could wish that the Chancellor's Medals were given independent of the clause which requires the Candidate to have taken a Senior Optimes degree; for though this was no doubt the intention of the Founder, great confusion arises out of it, not unfrequently at the present day. There has been, for instance, a case of the last man in the first class obtaining the Second Chancellor's Medal; and yet the vulgar impression, in consequence of this restriction, is that he is one of the two most proficient in classical learning in his year. There could at any rate be no great obstacle in the way of this alteration, because they are given by the Chancellor for the time being, and might have the conditions at once changed.

My replies to the above questions have been written with some degree of haste, and are, I am aware, very crude, but they may perhaps fall in some degree with the views of abler scholars, and some of the ideas be carried out advantageously, at any rate by some future generation.

I am,

My Lord and Gentlemen,

Yours very faithfully,

(Signed) EDWARD WARTER.

Rev. W. Whewell, D.D.

Answers from the Rev. W. Whewell, D.D., Master of Trinity College.

My Lord, *Trinity College, Cambridge, May* 20, 1851.

I have received a list of Queries relative to the Examinations for Classical Honours in the University, asking for information as to their subjects and conditions, and inviting suggestions of change. I will take the liberty of remarking, as I have done before, that the matters to which these queries refer have been regulated by the University at various times, upon mature deliberation, and may be modified hereafter by the same means whenever it is found desirable; and, further, that though changes were made by the University itself, directed by the opinion of experienced Examiners and Teachers residing in it, and likely to be effective and beneficial, there is no probability that changes in such points, attempted by an extraneous power, will be either the one or the other. But as on this as well as other subjects relative to the administration of the University, there is no reason for concealment or mystery, I will make a few remarks on some of the points referred to in the list of Queries here spoken of.

A Board of Classical Studies desirable.

(3.) I believe I have already given your Lordship my opinion on one of the questions proposed, namely, whether a Board of Classical studies of the same kind as the Board of Mathematical studies would be desirable. I think there would be a great advantage in having such a Board, constituted as the other is, partly of permanent and partly of changeable members. Such a Board might direct the course of the Examinations, and of the reading of the students, in a far more consistent, authoritative, and comprehensive manner than can be done by a succession of detached Examiners drawn from various classes, with no habits of conference or permanent co-operation, each following his own notions. If the Classical Examiners for Honours were members of such a Board, the Classical Examinations of the University would be likely to produce a much more powerful effect than they now do upon the course of reading at the principal Classical schools. As the matter now is, the course of reading at the schools is framed by the master with no regard to the University course. Indeed, there cannot be said to be a *University Course* of Classical reading for those who are Candidates for high Classical honours. The Classical schools govern the University, as to the style and manner of Classical reading, and are not governed by it.

Specification of Books.

(4.) It may be desirable to exclude certain portions of eminent Classical authors on moral grounds. But, besides this reason for specifying the books which are to form the subject of a given Classical Examination, there is another reason, depending upon the object just now alluded to, the introduction of a *progressive course* of Classical reading in the University. If an examination is made to extend to the whole field of good Classical literature, as is the case in most of the *University* Examinations for Classical honours, the honours are most commonly carried off by those who were the best scholars at school; and there is no evidence that they have made any special progress in such studies while they have been at the University. But if, on the contrary, special books are fixed beforehand, as the special subjects of given examinations, a Student who was behind another at school may surpass him by studying more carefully and completely the special subjects; add to which, the Examination, so specified and confined, may be of a much more exact, varied, and philosophical nature than it can be when all the good Classical authors indiscriminately are the subjects of Examination.

The Chancellor's Medals, &c.

(5.) The Mathematical proficiency which is required of the Candidates for the Chancellor's Medals and the Classical Tripos is the principal point which secures that the Classical scholars who obtain those honours shall have made progress in something during the time they have been at the University. If those conditions were abolished, the University would cease for such persons to be an educating body, and would be merely a Bestower of Rewards for schoolboy merits.

I have the honour to be, my Lord,

Your very faithful and obedient servant,

The Lord Bishop of Chester. (Signed) W. WHEWELL.

Answers from the Rev. Rowland Williams, B.D., Fellow and late Tutor of King's College.

Rev. R. Williams, B.D.

St. David's College, Lampeter, July 28th, 1851.

Classical Examinations.

1. The honorary classical examinations which best deserve notice are, (*a*) those for the various University Scholarships, (*b*) that for the Classical Tripos, and (*c*) that for the Chancellor's Medals. (*a*) It is usual for some Scholarship to become the object of competition annually. The examination turns, perhaps, in pretty equal proportions, upon elegance as well as correctness in composition (which is in part original), and upon a power of translating passages selected (*professedly*) from the best authors. As such subjects differ but slightly from those studied at the highest public schools, it is possible for an Undergraduate to become a University scholar without much *knowledge*, and even in the first year of his course; though, in proportion as the examination is judiciously conducted, and the standard of classical attainment evenly maintained throughout the three years, a probability arises that the successful candidate will have passed through half or two-thirds of his career. (*b*) The examination for the Classical Tripos, which follows the B.A. degree after an interval of a few weeks, is of a severer kind, and affords more room for the display of proficiency in the construction of language, but less for that of elegance or feeling. It admits of no original composition; but allows such value to be attached to both metrical and prose translations into Greek and Latin, that a power of producing such exercises is essential to a respectable position in the Tripos. (*c*) The Medal Examination may be said to revert in some degree to the characteristics of those for Scholarships, being conducted by a similar class of Examiners, and rather restoring to elegance, or taste in composition that rank which in the Tripos had been conferred upon naked translation, or rapidity of work.

Of all the above Examinations it may be remarked, that they require no *direct* knowledge of the subject matter of any author, and (with one novel exception) very little collateral information; while general ignorance on most subjects, ancient and modern (though not a thoroughly illiterate turn of mind), is perhaps compatible with a high place in any one of them. This compatibility, however, is not so entire in reality as it is in appearance, for general knowledge will indirectly tell. At the same time there is no security that the profoundest or obscurest authors may not be set in the Scholarship Examination which is open to Freshmen, or the simplest in that for the Medals, which closes the Academical career.

2. The historical statement referred to in the question will probably be given better by some one still resident in Cambridge. It is generally understood that the first establishment of the Classical Tripos in 1824 met with considerable opposition on the part of influential persons; and subsequent proposals to set it free from mathematical restrictions have not been more fortunate: the number of Candidates has not increased so largely as might be desired; nor is it quite agreed whether this slowness of growth should be attributed to the requirement of a mathematical honour as a qualification in the Candidates, or to the over-technical nature of the examination itself. Both of these explanations have so much reason, that some steps have been properly taken in the two directions which they would severally suggest. The mathematical requirement has been relaxed, and a still farther relaxation of it would be hailed as a boon by most Classical Scholars; while some tendency has been shown of late years to diminish the comparative value attached to Greek and Latin composition. Probably this latter may be carried *somewhat* farther with advantage; the variety of metres open for proposal may be lessened; or the passages shortened; and the number of marks at which they are appreciable, lowered. At the same time too hasty a progress in this direction, and especially the abolition (which some have suggested) of metrical composition in either Greek or Latin is very strongly to be deprecated. It should be remembered that *one unquestionable effect of the working of the Cambridge Classical Tripos has been materially to raise the standard of accuracy in teaching Greek throughout the better grammar-schools of the country.* It has popularized the doctrines of Porson and of his immediate followers. No good metrical composer can be a very inaccurate scholar; and the attempts often made to depreciate particular forms of such exercise almost invariably proceed from a consciousness of inability. It is not desirable that the most prominent places at least in the Tripos, or that the *rank of Examiners* at a later period in life, should be assigned to persons destitute of such art. Already the working of the Classical Tripos has been to lessen the estimation in which the prize exercises generally are held among younger members of the University, and to foster rather a hard and mechanical kind of scholarship, which, although a wholesome re-action upon the superficial æstheticism of a former generation, may be carried to an unreasonable extent. Some corrective to this tendency may perhaps be supplied by the balance of other examinations in which that original composition is retained, to which, after all, the *humanizing* effect of a Classical education more particularly belongs; while in the Tripos itself a remedy must probably be sought in the requirement of some collateral information, and some appreciation of the subject matter, as well as the verbal *colour* of the style of the greatest authors. By a recent "grace" of the Senate, a paper in History has been enjoined; and it would probably be a great improvements if the examination also embraced some stated portions of Greek philosophy. There seems no reason why a *cycle* should not be arranged by which the attention of students in each year might be turned to some *one* of the *greater* works of Plato and (in turn) Aristotle. Such a plan would both afford greater variety than the Oxford system, and at the same time reserve *due pre-eminence to pure philology;* while it would be more generally efficient

Rev. R. Williams, B.D.

than the College Examinations in which something of the kind has been attempted for particular classes of students. Every due precaution should be taken as to making the order of the cycle understood, and limiting the ratio of value assignable to this philosophical element. Yet probably, as the Academic mind became familiar with the idea of some other requirement from scholars than that of mere translation, it would be considered a superfluous caution to insist upon any paper, except the composition, being scrutinized by all the four Examiners. In all cases where the question is of knowledge rather than of taste, two Examiners may suffice to balance each other.

Board of Classical Studies.

3. However desirable it may be to limit the length of passages to be proposed in examinations, such an object, singly, would scarcely require the establishment of a Classical Board. There are, however, other purposes which such a Board as has been suggested might conveniently fulfil. It would furnish a common ground on which the more dignified authorities, who are *ex-officio* Examiners, might come in contact with the younger members of the Senate who receive their powers by annual election. By such communication perhaps both parties would gain, and their several tastes might lead to a sound balance instead of a capricious oscillation. The Board need not prevent the various examinations from differing, but it might subject the difference to useful regulations; and, in short, might constitute a *standing Syndicate*, by which new books of sterling value might be recommended, and such improvements introduced by "grace," or otherwise, as experience might from time to time suggest. Possibly even a *veto* on measures, or appointments, affecting classical studies, might be intrusted to *the majority* of such a Board, analogous to that which is not very happily vested in each separate member of the *Caput*. One of the greatest practical evils in an University is the bias apt to be given to appointments, such as those of Examiners, or of Preachers, &c., by *Collegiate* interests or egotisms. Notions of patronage prevail, by which perhaps the Colleges which have the greatest affluence of talent principally suffer, but by which the character of the University is also in some measure compromised. It might enter into the province of a Classical Board to check the sway of such feelings, and to consult for the permanent advantage and reputation of the Academic body. It may be said that, where Boards exist, the vicious habit of considering appointments as a species of patronage to be exercised by each member in rotation may prevent the proper object of their constitution from being attained; still such abuse might be guarded against, either in the case of Examiners or of Preachers, by a distinct assertion of a more correct principle. The united wisdom ought to be exercised as far as possible in each appointment.

Selection of Classical Books.

4. It would probably not be expedient to fetter the discretion of Examiners by very narrow restrictions; and perhaps a Classical Board might preclude the necessity for minute legislation, by recommending a particular usage, or by keeping alive a right tone of opinion. One benefit which it might confer upon the University, would be the observance of some gradation in the subjects proposed at several periods. The Examiners for scholarships, without being reduced to a mere puerile range, might find sufficient scope in the purest classical historians and poets, with some limitation on the use of the Greek Orators, and possibly even on that of Thucydides and Tacitus; and certainly introducing only the simpler (such as the Socratic Trilogy), if any, of the works of Plato. The Tripos, without essentially losing its present character, might have a philosophical paper; while the *Medal* Examination, being for the chosen few, might not improperly require more critical refinement; and *here, if anywhere*, comparative philology or metrical and emendatory niceties might be dwelt upon; and possibly the obscure comic fragments from Athenæus introduced, which have, with a singular want of judgment, been sometimes thrust upon the Candidates for University Scholarships. It may be added that the practice which, though unfrequent, is not unknown of proposing for translation passages which the Candidates could only have become previously acquainted with by wading through gross obscenity, deserves the strongest censure, as both wicked and cruel.

Restrictions on the Chancellor's Medals.

5. The conditions of eligibility attached to the Chancellor's Medals can only be the subject of the most respectful suggestion. It may perhaps be considered a drop of bitterness in the cup of the best scholar in his year, if, in consequence of being only an average mathematician, he fails to receive the most flattering and permanent recognition to which his classical attainments might have aspired. With respect to the Tripos, it has been often argued, that either a sufficient knowledge of mathematics is not required by the University of Cambridge for her ordinary degrees, or else the especial qualification insisted upon in Candidates for the Classical Tripos is unnecessary; and, if it is unnecessary, it is a grievance. Nor have the answers generally given to the above argument been of so convincing a force as the eminence of their authors might have led us to expect. The question, however, has reached a stage where it would be most properly considered in connexion with the whole system of graduating. Those plans deserve at least careful attention, and are probably sound in principle, which advocate *a general examination to be undergone alike by all Candidates for a B.A. degree*, and to be followed at certain intervals by competition for honours in the several Triposes. Whether such examination should take place at one period or whether it should be *divided by epochs, so as to give each year its distinct and appropriate subjects*, can only be quite decided by those who have had experience in working large masses of students. To shorten the ordinary career by as much as a whole year, though in some respects a desirable measure, might possibly discourage reading for Honors; unless, at least, the privilege of "*passing*" at the end of the second year were restricted to those who declared themselves Candidates for some subsequent Tripos. Still there appears no reason, if the ordinary undergraduate course is to remain of its present length, why the second year should not have some examination; especially for those students whose attention is in no danger of being distracted from profounder subjects; and, in any case, the idea of

a "general degree examination for all B. A.'s," whether it took place at *Michaelmas at the end of the third year* (which might be convenient for the numerous class who aspire to no subsequent honour, as regards questions of lodgings), or whether it were at some other period, or broken into more periods than one, appears to deserve more attention than it has received. Moreover, if the recently established Triposes in miscellaneous subjects are intended to benefit the higher as well as the more ordinary class of students, it may be expedient to enlarge (*optionally*) the period during which they shall be open. Possibly it might be prolonged even to the M.A. degree. It is also a question whether prizes in the Moral Philosophy Tripos (either from the liberality of the Professor, or from other sources) would not be most profitably given in the 4½th rather than in the 3½th year. Such subsequent Triposes might thus be made little degrees in their respective subjects If, however, the ordinary degree were brought a year forward, the reasons for throwing such Triposes back would be lessened in proportion. *Rev. R. Williams, B.D.*

It appears not to have been sufficiently borne in mind, that there are many subjects for which the University does not so much require stimulus as *facilities of learning:* this remark is not altogether inapplicable even to classical literature. The system of private tuition has been often canvassed; and the expense which it entails upon poor students is a very serious burthen. If encouragement were given to the *formation of classes* by Graduates (acting either with the title of Private Tutors or of Sub-Professors or Prælectors), an equal amount of information might be givln at a far cheaper rate. There are always men among the younger M. A.'s whose transation or exposition of the higher classics would be listened to greedily by attentive audiences. Modern fashion and the fear of appearing obtrusive prevent such lectures from being given; though the degree of M. A. is probably a statutable qualification for any one who chose to do so. At the same time, the permission of the Vice-Chancellor for any proposed course might, perhaps, not improperly be asked; and if Undergraduates were known to attend lecturers of sufficient standing and character to secure the due observances of time, dress, and behaviour, (which are considerations not to be overlooked,) it might be in many cases convenient to relax the system of College lectures in proportion (the propriety of relaxation in any given College being a question for the consideration of its own authorities). Such a system might both secure discipline, and allow sufficient freedom to admit of Undergraduates classing themselves under such teachers as best suited their several tastes and degrees of proficiency. At the same time, it would leave the more dignified machinery of Professors in possession of its existing honours, and be only a modification and a legitimatising of Private Tuition, which might be made to play in harmony with the College lectures. There is no reason why such a system should not embrace even "composition;" and, perhaps, a class in comparative philology might occasionally be formed by any person who happened to have studied the subject sufficiently. Private Tuition.

But there are kindred subjects, for which *a free formation of classes* appears to be still more required. To persons who know Universities only by report, it must appear almost incredible that a lifetime may be spent at Cambridge without the opportunity of hearing a single lecture in either *Logic* or *Rhetoric*. In such subjects most Cambridge men are either ignorant or self-taught. If the Barnaby lectureships (however nominal their salary) were not, by the characteristic vice of the place, made matter for *Collegiate* patronage, they might supply the germ of offices to be profitably filled. The application of Rhetoric to the composition of sermons would furnish a subject for an useful course. There appears no reason why a Christian Quintilian should not arise. Collegiate Patronage.

Similar remarks may also be extended to modern languages. It probably would not be wise to multiply Triposes unnecessarily, and might not be expedient to stamp the acquisition of living tongues with formal Academic honours. Such studies scarcely enter into the circle which an University is most bound to teach, or has the means of teaching best; they find ample encouragement in the ordinary circumstances of modern society, and are their own reward. There are also many reasons why the University should beware of affording easy triumphs to superficial pretension, and diminishing the amount of sound knowledge in the world. If, however, it should be determined ever to institute Triposes for the encouragement of the study of modern languages, it would be at least for the interests of the higher class of Students that such Triposes should not take place until a period somewhat later than the B. A. degree; otherwise, a professed extension might be in reality only a change of subjects. *But the inexpediency of diverting the body of Undergraduates from severer Studies presents no reason why those who wish to become acquainted with modern languages should not enjoy greater facilities of doing so than are now afforded to a resident in Cambridge.* Fourteen Pounds to an ordinary teacher for the few weeks of a Lent Term, especially when coupled with the *supposed necessity* of employing the same teacher for the still fewer weeks of residence during the Easter Term, is an unreasonable charge. French and German might be taught in Classes as well as Latin and Greek. The good sense of the younger members of the University has occasionally dictated the formation of such classes; but it would fall quite within the province of the governing powers to see that such facilities were constantly afforded, and that the more important languages of Europe had each its representative, who should give terminally one or two courses of lectures at a reasonable rate. Some modification of the same remark would perhaps apply in a fainter degree to music (which, however, seems able to protect itself), and possibly also to Hebrew; though the present conscientious Professor's lectures may already have anticipated (so far as could be expected from the position of a Professor) this suggestion. In almost all cases a very moderate payment, subject to annual vote of the Senate, would furnish the groundwork of the Teacher's Salary. Modern Languages.

Rev. R. Williams, B.D.

7. Though the above suggestions would entail only a slight additional expense upon the University chest, the frequent mention of pecuniary difficulties which are supposed to impede various improvements renders some allusion to the subject in this place not unnatural. It is earnestly to be hoped the University may ever continue to reject any proposals which would have the effect of enhancing the expenses of poor students by taxing the common degree. The prospective diminution of clerical incomes throughout the country supplies an additional reason why the principle involved in the rejection of such measures should be steadily maintained. A more legitimate source of supply to the University chest would be a small poll-tax upon all Members of the Senate who enjoy the Academic franchise. If it be true, as has been sometimes alleged, that the Senate has no power to enforce such bye-laws upon its own members, under the penalty, if necessary, of taking away their vote, the Legislature might reasonably be asked to confer such powers.

Moreover, it may be suggested that, while the University is poor, the Colleges are comparatively rich; and although any measure involving the principle of confiscation would inspire natural aversion and alarm, there appears no just reason why the element of property, which in ordinary cases is made to enhance the payment of fees for graduating, should, in the case of *Fellows of Colleges*, be altogether overlooked. Perhaps the payment at present required of *Grand Compounders* is excessive; but, in any reconsideration of the scheme, an arrangement might probably be made by which the various Colleges should contribute to the University chest, either in proportion *to the number of Degrees conferred on their Fellows during the year*, or perhaps to the number of their Fellows possessing the franchise, or on some other equitable scale.

Fellow (and late Tutor) of King's College.

To the Reverend
The Secretary of Her Majesty's Commissioners,
&c. &c. &c.

Rev. W. S. Wood, M.A.

Answers from the Rev. W. S. Wood, M.A., late Fellow of St. John's College.

GENTLEMEN, *Oakham, May* 21, 1851.

IN reply to your Circular of the 15th inst., requesting my attention to certain Queries concerning the classical examinations in the University of Cambridge, I beg to offer the following remarks. It may be necessary to premise that I have not resided in Cambridge during the last five years, and therefore cannot have the same intimate acquaintance with the present state of things there as if I were in residence. But, substantially, I do not believe that any important change has taken place.

On the 2nd and 6th questions I have nothing to remark.

Classical Examinations.

1. By honorary classical examinations I understand you to mean those which are open to the whole University, but not compulsory upon any. These are the Classical Tripos, and the examinations for scholarships and for the Chancellor's medals. Except the previous *vivâ voce* examination, to which candidates for scholarships are subjected, and which is merely for the purpose of sifting them, there is no material difference between the two last. Therefore the examinations may be classed under two heads,—the Tripos and the scholarship examinations.

The points of difference between them are—(α) that original composition, in Latin or Greek prose or verse, on some given subject, is required in the scholarship and not in the Tripos examination; (β) that the range of authors from which passages may be taken is more extensive in the first than the second; and (γ) that elegance of scholarship is generally considered to tell more in the first than in the other. It is not easy to define this mor clearly, and in fact depth and extent of classical knowledge are commonly found united with elegance. Still I believe that the former without the latter would be more likely to succeed in the struggle for the Tripos than for a scholarship or medal.

The order and subjects of the examination are far more strictly limited in the Tripos examination than in any other, every kind of composition and every variety of author, in prose or verse, having a due place and share in the examination. But to all the same remarks are applicable. In all, the power of writing prose and verse in the original languages, that is, more particularly, of *translating* into them, is of the highest importance. And next I believe to be the power of translating readily and rapidly into English. Without these it would be impossible for any one to attain a high place. However, as comparatively few are able to write both prose and verse well, the order of the names, after the first few, will be decided mainly by the correctness and vigour of the English translations. In any case, a single piece of composition, for instance of Latin prose, thoroughly well done, would weigh strongly with an examiner. In estimating the comparative importance of translation and of composition, it must be remembered that, in the Tripos, at least three-fifths of the time and marks are assigned to the former. It will, however, I think, generally be found that any one's powers are more tested by the composition than by the translation, and hence the reason for attributing greater influence in the higher places to composition.

Questions have always been added, more or fewer, at the discretion of the examiners, to the passages selected for translation, referring either to grammatical, or metrical, or historical points suggested by the passages, or in some cases to the general scope of the work, or of the context. And within the last two years a separate paper on history has been given in the Tripos. Formerly this was the case also in scholarship examinations. Whether it is generally done now or not I cannot say, but it is not uniformly. It is of course

a valuable help to the correct translation of any given passage to know the context of subject-matter of the author but beyond this I do not think such knowledge has hitherto been directly available. What may have been the effect of the separate paper now given, or what its relative importance, I am not aware. *Rev. W. S. Wood, M.A.*

3. The Boards which now conduct the examinations for scholarship and medals are composed of certain Heads of Houses, and Professors and Officers of the University. It is to them, I presume, that the 3rd query refers. I certainly think that the constitution of these Boards might be improved, on two grounds,—that the present members, many of them, are sufficiently loaded with other duties, and that their pursuits are not always consistent with continuous classical study. What precise alteration to recommend I am not at present prepared to say. Nor, I must add, do I think that practically the present system has worked ill. Probably the appointment of a Classical Board, such as you speak of, would be useful for the purpose of regulating the studies of undergraduates, and making the several examinations more uniform; but has the University yet had sufficient experience of the effects of the Mathematical Board, to justify one in speaking with certainty? I cannot see any objection to extending the plan to Classics, and I think the present progress in historical and antiquarian investigation is such that students would find an authoritative guide most valuable to them. I think also that many schoolmasters, who are preparing pupils for the Universities, and who naturally look to the course of study there pursued as in some measure a rule for themselves, would be glad to know from time to time what are the works in highest repute in the University. But I am not now prepared to suggest anything definite on this point. Boards of Examiners.

4. In any measures for restricting the books and subjects of study and examination, I think a distinction ought to be made between the Classical Tripos and the scholarship examinations. The one is or ought to be the completion of the University course of classical training, and, as such, considered simply with a view to educational purposes. The other may fairly be regarded as prizes or distinctions for extensive classical information. The advantages of classics as an instrument of education ought to be primarily considered in the first; the other need not be so narrowly limited. I think, therefore, a greater range of subjects might be admitted in the latter than the former. In fact, unless it were found that want of definiteness led to desultory reading, I should not be disposed to restrict examiners for scholarships or medals in their choice of authors. Their own good sense or the feeling of the University would be a sufficient check. But for the Tripos it would I believe be highly desirable to specify the books required. It is hardly possible, consistently with a due attention to other branches of study, for undergraduates to make themselves masters of the whole range of classical literature. Much of it also is objectionable, or at least is not suitable, on various grounds, to be made a subject of study in comparatively early life. Practically men are obliged to limit themselves, or their tutors do it for them. And what I think most important of all, the appointment of a given limited number of authors or works would enable students to make themselves far more thoroughly conversant with them, as well as to acquire collateral and illustrative information to a far greater extent. If it be true that the mind derives more benefit from knowing one book well than many imperfectly, surely this ought to be taken into account in any scheme of education, by the instrumentality of classics, or through whatever other agency. Selection of Classical Books.

5. With respect to the University scholarships, I do not see that any question need arise. They are open to all; and the only possible doubt, it seems to me, would be whether men of *all* years should be brought into competition. But I am not aware of any special evil resulting from that. University Scholarships.

The other examinations are confined to those who have passed certain mathematical examinations previously with credit. The conditions of admissibility to the Tripos have been lately modified, so as to throw it more open. I cannot see any necessity for further change. The studies of the University ought not to be moulded merely to suit the tastes of individuals. If she hold that a certain amount of mathematical training is requisite to the due formation of the intellect,—and I think she does so rightly,—she is perfectly justified in exacting from her sons that amount of knowledge. So far as my experience goes, I do not believe that one person in a hundred is incapable of giving that attention to mathematical studies which would qualify him for passing a creditable examination. There are exceptional cases, but the cases are infinitely more numerous in which idleness or want of inclination is the reason of failure. Whether the precise kind and degree of training in mathematics now required is the best calculated to effect its object, is a different question; but I have no hesitation in saying that I should be most sorry to see the conditions of admissibility to the Tripos rendered less strict. To the Chancellor's medals the same arguments do not altogether apply; and if they be considered as a purely classical distinction, independently of educational purposes, I see no objection to their being thrown open. The Chancellor's Medals.

I am not aware that I can add anything to these observations. Want of leisure must be my excuse for their imperfect nature.

I have the honour to be, Gentlemen,
Your obedient humble servant,

(Signed) WM. S. WOOD.

Rev. Thos. Worsley, M.A.

Answers from the Rev. T. Worsley, M.A., Master of Downing College.

Board of Classical Studies.

3. I am decidedly of opinion that a Board or Syndicate constituted in a manner analogous to that now existing for the superintendence of Mathematical Studies, would be able to deal advantageously from time to time with such questions as those here specified; that it would tend to give better and clearer aims to the several Classical Examinations and Courses of Reading, and enable the Students more effectually to enter into and co-operate with them.

Specification of Classical Books.

4. This I should conceive to be a proper question for the consideration of such a Board. With regard to the Oxford system of *taking up* definite portions of Classical authors, I should not myself object to see it somewhat more largely engrafted on our Cambridge method of examining *generally* in Classics, and without specifying beforehand the authors or books to be examined in. College Examinations, however, supply this more accurate study of particular portions of Classical Literature, to a considerable extent. Whether *sufficiently* at any given time, or under any given alteration of other conditions (such *e. g.* as the introduction of the Moral Sciences Tripos, and the consequent study of Plato and Aristotle for their subject matter also) would again, as it appears to me, be most advantageously decided by such a Board.

The Chancellor's Medals, and Classical Tripos.

5. Until within a few years of my holding the office of Vice-Chancellor, I certainly felt disposed to allow those who had taken no Mathematical Honours, to contend for the Medals. Further reflection, however, led me about that time to adopt views on this point, which I have since seen additional reason to regard as sounder, and induced me to discourage, whilst in office, a proposal for thus throwing the Medals open.

It appears to me that Classics and Mathematics, though they do not constitute the whole of a liberal education, are yet the two main branches of that *primary discipline*, which is necessarily implied in it; and that *neither of these can be made to supply the place of the other, without defrauding the Student of a really Catholic Education.*

I am very far from affirming that an exact and severe study of *Language*, simply as such, is incapable of exercising and cultivating the reasoning powers; or even that a similar study of Science does not react favourably on the faculties which deal with language; nor would I affirm that certain portions of Moral Science may not be so presented and employed for the purposes of education, as to supply a mental discipline in some important respects intermediate between the two.

This, however, does not in my opinion, affect the position that *Language* on the one hand, and *Science* on the other, furnish two primary disciplines of the mind, which are in their characteristic principles and effects distinct from each other, and which are both essential to a liberal education.

Hence it appears to me (especially after the admission by a Grace, Oct. 31, 1849, of the first class of the *Polloi* to contend for the Honours of the Classical Tripos) that any further concession to the principle of Students being permitted to choose freely between Classics and Mathematics, is at present to be strongly deprecated. And specially, I should object to removing the present Mathematical conditions for admission to the Chancellor's Medal Examinations.

I would add, generally, with reference to the subject of Classical Studies at Cambridge, that, unless the Moral Sciences Tripos can be made to supply the place of a deeper attention to the subject matter of Classical authors, as well as to their language, and generally to philology in its wider sense, I am of opinion that alterations in this direction should, and probably will, be made in the Cambridge Classical system. I do not mean to the exclusion or diminution of the present severe and exact study of the Greek and Latin languages as such, or of the present exercises of writing Greek and Latin prose and verse; but, *in addition to these*, and, as giving to this accurate discipline some worthier earnest of its intelligible end and reward.

I have now to express my regret to your Lordship and the Commissioners, that indisposition has delayed the conclusion of these papers much longer than I had expected, and to subscribe myself, with great respect,

Your very obedient servant,

(Signed) THOMAS WORSLEY, M.A.,
Master of Downing College.

P.S. After the copious extract made from the Lord Chancellor's judgment with reference to the election of Fellows, it appears unnecessary to send the single copy I possess of that document. If the Commissioners think otherwise, I am still prepared to forward it.

To the Right Reverend the Lord Bishop of Chester, and the Cambridge University Commission.

Rev. A. H. Wratislaw, M.A.

From the Rev. A. H. Wratislaw, M.A., Fellow and Tutor of Christ's College.

SIR, *Christ's College, Cambridge.*

I BEG to transmit to you the following answers to the paper of questions I received from Her Majesty's Commissioners dated the 15th May, 1851.

I have the honour to be, Sir,
Your obedient humble servant,
(Signed) A. H. WRATISLAW.

Rev. A. H. Wratislaw, M.A.

The honorary classical examinations.

1. The various honorary classical examinations in the University may be divided into three classes, that for the Bell scholarships, which is confined to sons of clergymen, and is of a more elementary nature; those for other university scholarships and the Chancellor's medals; and thirdly for the classical tripos. Those for the university scholarships are supposed to embrace a greater range of subjects than that for the classical tripos, and to be calculated rather to educe a display of the accomplishments and elegances of classical literature, than the results of patient study and accumulation. Skill in verse composition is supposed to exercise a far greater influence upon them than upon the classical tripos. At all, however, the candidates are expected to be prepared to translate from English into Greek and Latin prose, into all kinds of Latin verse, and into Greek tragic, iambic, trochaic, and anapæstic verses. At some university scholarship examinations, a paper of general questions is given, but nothing but translation and composition is supposed to have much weight in the decision of the examiners. Original composition in Latin prose and verse, occurs also in university scholarship examinations, but not in that for the classical tripos. No knowledge of the subject matter of authors is required in any university examinations for classical honours, but a paper of historical questions has just been added to the requirements of the classical tripos. I should say, that the classical tripos was rather calculated to bring out the sound and accurate, the university scholarship the accomplished and elegant scholar.

Prizes.

2 (*a*). Two gold medals, value 15 guineas each, are given annually by the Chancellor of the University, to two commencing B. As., who, having obtained senior optimes at least, shew themselves the greatest proficients in classical learning. These prizes were established in 1751, by the Duke of Newcastle, and have since been continued by the succeeding Chancellors.

(*b*) The representatives in Parliament of the University give four annual prizes, of 15 guineas each, to two B. As., and two undergraduates, who compose the best dissertations in Latin prose. These prizes were established in 1753, and have since been continued.

(*c*) Sir William Browne, Knt., M.D., directed three gold medals, value five guineas each, to be given yearly to three undergraduates; the first, for the best Greek Ode in imitation of Sappho; the second, for the best Latin Ode in imitation of Horace; the third, for the best Greek and Latin Epigrams. These medals were first given in 1775.

(*d*) The Rev. Charles Burney, D.D., and the Rev. John Cleaver Bankes, M.A., only surviving trustees of a fund raised by the friends of the late Professor Porson, and appropriated to his use during his lifetime, did, by deed, bearing date November 27, 1816, transfer to the University the sum of 400*l.*, Navy 5 per cents, upon trust, that the interest should be annually employed in the purchase of one or more Greek books, to be given to such resident undergraduate as should make the best translation of a proposed passage in Shakespeare, Ben Jonson, Massinger, or Beaumont and Fletcher, into Greek verse. This is called the Porson prize.

(*e*) The Marquess Camden gave, in 1841, and has since continued, a gold medal as a prize for the best exercise in Latin hexameter verse.

(*f*) The Craven scholarships were first assigned in 1649; they are now much increased in value and number. When first instituted they were two in number, and of the value of 25*l.* per annum; they are now five in number, of the value of 75*l.* per annum each.

(*g*) The Battie scholarship was first given in 1747. Its present value is between 30*l.* and 35*l.* per annum.

(*h*) The Davies scholarship, upon the same footing as the Craven scholarships, was first given in 1810. Its value is 30*l.* per annum.

(*i*) The Pitt scholarship was first given in 1814.

(*j*) The Porson scholarship is founded, but has not yet been adjudged. These are open to the whole University, without distinction of college or parentage.

(*k*) Bell's scholarships are confined to freshmen, sons of clergymen. They were first given in 1810.

(*l*) Browne's scholarship is open to the whole University, but the successful candidate must remove to St. Peter's College.

The Classical Tripos examination.

(*m*) Lastly, the examination for classical honours, called the classical tripos examination, first took place in 1824. It was then confined to such students as had obtained mathematical honours. The following complicated arrangement was adopted by the Senate October 31, 1849—

That the following persons only shall be admitted to examination.

1. Those who shall have obtained honours at the mathematical examination of the preceding January.

2. Those who, having been declared by the moderators and examiners for mathematical honours in the preceding January to have deserved to pass, according to the present standard, for an ordinary degree, so far as the mathematical part of the examination for such degree is concerned, shall have afterwards passed in the other subjects of that examination.

3. Those whose names shall have been placed, according to the present standard, in the first class in the examination for an ordinary degree in the preceding January.

4. Those persons entitled to noblemen's degrees, who shall have entered into their eighth term at least, having previously kept six terms, exclusive of the term in which they were admitted, and shall have passed the examination for an ordinary degree in the preceding January; provided, however, that not more than eight terms shall have passed in the case of any such person after his first term of residence.

In 1824 there appear 17 names in the list of classical honours.

Rev. A. H. Wratislaw, M.A.

In 1830	28
„ 1835	32
„ 1840	38
„ 1845	24
„ 1850	29

The papers of questions and passages are now submitted by each examiner to the judgment of his colleagues, and no answers are looked over by fewer than two examiners. Formerly the examiners were much more independent of each other.

Ex-officio Examiners.

3. I think that *ex officio* examiners, excepting classical professors and the public orator, should be removed from all connection with the university classical examinations. I should hope that classical professorships would be instituted in sufficient numbers to fill up the gaps thus caused. In that case, a board for the regulation of classical studies, similar to that already constituted for mathematical studies, would be very advantageous, otherwise, I think, prejudicial. I think that the difference in kind between university scholarship, and classical tripos examinations is advantageous, but it would also be advantageous to secure uniformity to each in its own kind.

Specification of books.

4. I think it would be advantageous to specify the books comprehended within the range of the classical tripos; beyond that, I should wish to see the students left to their own tastes and inclinations.

Chancellor's Medals.

5. I would respectfully recommend that the conditions of eligibility to the Chancellor's medals be made the same as those of the classical tripos, whatever the latter may be. That all students who pass the examination for the B. A. degree at the usual time, be admitted as candidates for the classical tripos, without distinction. That a complete uniformity of regulation be instituted as regards the Pitt, Craven, Battie, Davies, and Porson scholarships.

I think it would be advantageous, if a knowledge of certain fixed books were required, instead of verse composition in the classical tripos examination.

It would also be advantageous for classical literature, if a knowledge of modern languages, especially the German language, were encouraged in the University.

(Signed) A. H. WRATISLAW, M.A.
Fellow ond Tutor of Christ's College.

CAMBRIDGE UNIVERSITY COMMISSION.

EVIDENCE FROM COLLEGES.

The following paper was addressed to the Heads of the several Colleges, with additional copies for the use of the other members of the Society:—

Cambridge University Commission,
Downing-street,
December 1850.

SIR

HER Majesty's Commissioners for inquiring into the state of the University of Cambridge and the Colleges thereof, respectfully invite your attention to the subjoined List of Queries; and request the favour of such information in reply as you may be kindly disposed to communicate.

I have the honour to be,
Sir,
Your obedient humble Servant,
(Signed) J. CHESTER.

---

1. The Regulations of the Statutes by which your College is now governed, respecting the Head, the Fellows, the Scholars, of the Foundation; as to the mode of appointment; the qualifications for, or restrictions upon, Election; the conditions and duration of Tenure; the length of Residence required; the Duties or Services enjoined; the Powers given; and the Stipends, Emoluments, and Advantages assigned, in each case. The present practice, as to the same particulars.

2. The like information respecting the Fellowships and Scholarships of any Supplemental or Bye Foundation; or respecting any Exhibitions not incorporated, but connected, with the College.

3. The Regulations respecting the admission of Students over and above the Members of the Foundation; as prescribed by the Statutes; and as observed in practice.

4. The times at which Divine Service is performed in the College Chapel, and the Regulations respecting attendance at the same.

5. The course of Collegiate Instruction given to the Students; and its relation to the Public Examinations of the University.

The number of Fellows, or others, employed in giving the College Lectures.
The number of the College Examinations in the course of the year, and how conducted.
The rewards for proficiency.

6. The Regulations of discipline as to the attendance of the several Classes of Students at the College Lectures;

As to the attendance at the Dinner in the College Hall;
As to the hour of the evening at which the Students are required to be within the College or in their licensed Lodgings;
And as to their Expenses.

7. An Estimate of the *necessary* Expenses of a Nobleman, Fellow Commoner, Pensioner, and Sizar respectively, comprising College Tuition, Room Rent, Meals, Attendants; Fees and other like incidents, from the time of entrance to that of taking the first Degree.

8. The *actual* average expenses of persons in each of the same classes, so far as such expenses come under the knowledge of the College Tutors; with a statement whether any allowance for Private Tuition is included in this Estimate.

9. The provision made in your College for the maintenance or assistance of Poor Students.

10. The practicability of reducing the expenses of College residence, and of further restraining habits of extravagance and facilities of credit.

11. Is it your opinion that, from the change of times and circumstances, it would be expedient to remove any of the appropriations, limitations, or restrictions, now affecting the election to, or tenure of, Fellowships, or Scholarships, or Exhibitions in your College?

12. Have any Scholarships or Exhibitions become ineffective through default of Claimants?

13. In cases where Fellowships, Scholarships, or Exhibitions are of small amount, would in your opinion, be advantageous to consolidate two or more together; so as to afford a more substantial help towards maintenance, or a better reward for merit; provided such consolidation could be effected by competent authority.

The following paper was addressed to the several Colleges in their corporate character, with sufficient copies for the use of the members of the Society:—

Cambridge University Commission,
Downing-street, Nov. 5, 1851.

GENTLEMEN,

THE Commissioners respectfully request the attention of the

to the following inquiries relating to the Revenues of the College. They will be happy to receive the desired information either in the form of written answers, or from any Officer of the College deputed to attend the Commissioners for the purpose, as the Society may prefer.

The Commissioners beg to express an earnest hope that the information may be furnished at the earliest convenience of the Society, and, if possible, before the end of the present Term, in order that they may be enabled to prepare their Report with due deliberation, and in a proper form, within the limit of time fixed by the terms of the Commission.

I have the honour to be,
Gentlemen,
Your most obedient Servant,
(Signed) W. H. BATESON,
Secretary.

To
The _____
of _____ *Cambridge.*

---

1. What is the amount of the gross yearly Income of your College derived from Estates in Land, on an average of the last seven years? What part of this consists in Rack Rents; in Reserved Rents under Beneficial Leases; in Fines for the Renewal of Leases; in Manorial Fines and Quit Rents; in rent-charges and in any other proceeds; as for instance, from the Cutting of Timber or the Working of Mines?

2. What is the amount of the gross yearly Income of your College derived from Houses, on an average of the last fourteen years? Specify, as in the former question, the several particulars of which this consists.

3. What is the amount of the gross yearly Income of your College derived from Tithe Rent-charges, not included in your answer to the first question?

4. What is the corresponding net amount of Income in each of the three foregoing questions? Specify the deductions which constitute the difference between the gross and net Income.

5. What is the yearly amount of the Income of your College derived from Funded Property or Exchequer Bills?

6. What is the yearly amount of the Income of your College derived from the Rent of Rooms in the College; from Fees and Charges paid by the Members of the College; or from any other source not specially included in the Answers to the foregoing Questions?

7. What is the total aggregate of gross and of net Income respectively, arising from all sources?

8. In what manner and to what purposes is the net Income distributed and applied?

Specify the yearly sum received by the Master, by the several Fellows, by the several Scholars on the Foundation; and state any inequality in the payments made to different Fellows or Scholars, and the reason of such inequality.

State the same particulars with respect to the Fellows or Scholars on any Supplemental or Bye Foundation; specifying, so far as the case admits, the particular sources out of which the sums paid to them are derived; and the present value of the Estates or Property constituting the Endowment.

Specify in the same way the several Exhibitions in your College; the Emoluments and Conditions attached to them by their respective Founders, and the Annual Value of the Estate or Property out of which they are payable.

In the case of supplemental or bye-foundations, whether of fellowships, scholarships, or exhibitions, state whether any, and if so, what part of the proceeds of the estates or funds with which they are endowed is paid to the general funds of the College. State also whether such reservation is made in virtue of the terms of their foundation, or of a general statute of the College, or of a custom of long standing. Are these estates administered by the general authorities of the College?

When the value of Estates has increased, have the several payments to all parties beneficially interested been increased proportionally in the distribution? If not, on what other principle has the distribution been made?

Is the Expense of the Table in the College Hall for the Fellows and of that for the Scholars defrayed out of the general Income of the College, or either wholly or in part by the individual Fellows and Scholars?

Is there any provision, and if so, to what extent, made in your College, either by the Statutes or otherwise, towards the maintenance of Students entered as Sizars or Sub-sizars?

Specify the average annual Expense of keeping up and repairing your Collegiate Buildings. Is there a special Building Fund? Specify the average annual Expense incurred by the repair of the Chancels of Churches, in cases in which the College is the Impropriator or Patron. State the amount annually given as prizes or rewards for the encouragement of learning in the College, and as donations or subscriptions to charities and schools. Specify the other particular purposes to which the Income of your College is applied.

9. Is there any system pursued in your College with the view of running out Beneficial Leases? Have any such Leases expired within recent years? Did the Master and Fellows receive any compensation for the loss of the Renewal Fine? If so; from what source, and to what extent? In renewing Leases, have there been any cases in which a diminution has been made in the Fine in order to obtain an increase of the Reserved Rent during the years added to the then remaining Term, and thus to improve prospectively the regular yearly Income of the College?

10. If your College possesses any fund for the purchase of advowsons or the augmentation of small livings in its patronage, describe its nature and amount and the manner in which it has been applied since the year 1800.

11. Has any considerable addition been made to your Collegiate Buildings in recent years, with the view of accommodating a larger number of Students? If so; in what manner were the Funds for this purpose raised? If wholly, or in part, by Loan, has the debt thus contracted been paid off entirely, or to what extent has it been liquidated?

12. Are there any Fellowships, Scholarships, or Exhibitions, attached to your College, in the conditions or application of which you would think it advantageous to obtain alterations or modifications by competent authority with the view of giving greater effect to the intention of the Founders and rendering them more practically beneficial? If so, specify the cases; and the nature of the present inconvenience and the proposed remedy.

13. State particularly, whether in the case of any Exhibitions, limited to particular Schools or Localities, it would, in your opinion, be expedient, from the deficiency of fit Claimants, to extend the range of eligibility.

14. Are there any cases in which it appears to you that more effectual provision ought to be made for the maintenance of Scholars and Exhibitioners by means of a readjustment in the distribution of the Revenues of Property intended for this end?

The following paper was addressed to the Heads and Librarians of the several Colleges:—

Cambridge University Commission,
Downing Street;
SIR, *February* , 1851.

HER Majesty's Commissioners for inquiring into the state of the University of Cambridge and the Colleges thereof, respectfully invite your attention to the subjoined List of Queries; and request the favour of such information in reply as you may be kindly disposed to communicate.

I have the honour to be,
Sir,
Your obedient humble Servant,
(Signed) W. H. BATESON,
Secretary.

---

1. Is the Library of your College placed under the care of a Librarian? What are his duties, and authority, whether prescribed by the statutes of the College, the terms of the foundation of the Library, or by College orders? Is there any assistant Librarian, and during what hours does he attend?

2. Is there a printed or manuscript catalogue of your Library? Are the books arranged in classes? Is the room in which they are placed well ventilated, and sufficient for its purpose? Is any portion of it fire-proof? Upon what principle is the arrangement of the Library connected with the Catalogue, so as to admit of readily finding a book referred to?

3. What are the funds appropriated to the support of your Library, whether derived from special bequests, or other sources? What is the average annual sum expended in the purchase and binding of books?

4. What is the number of books and manuscripts in your Library? What special gifts or bequests of importance have at different times been made to it, and upon what conditions, if any? Does it contain many books or manuscripts of great rarity or value? To what departments of literature do the books chiefly belong? Is the Library well supplied with modern and other books connected with the usual subjects of academical instruction and study?

5. Upon what conditions is the Library accessible to different Members of the other Colleges? Are Members of other Colleges, or Strangers, allowed access to it for purposes of special reference or research?

Rev. H. W. Cookson, D.D., Master of St. Peter's College

Answers from the Rev. W. H. Cookson, D.D., Master of St. Peter's College.

Quest. 1. The regulations of the Statutes by which your College is now governed, respecting the Head, the Fellows, the Scholars of the Foundation, as to the mode of appointment, the qualifications for, or restrictions upon, election, the conditions and duration of tenure, the length of residence required, the duties or services enjoined, the powers given, and the stipends, emoluments, and advantages assigned in each case. The present practice as to the same particulars.

Statutes.

In the answers to this and the following question no formal distinction is made between the present practice and that required by the Statutes. It is understood throughout that the regulations of the Statutes as to the particulars mentioned are literally in force, unless the contrary is expressed or obviously implied.

Appointment of the Head.

The Bishop of Ely, who is Visitor of the College, appoints to the Mastership one of two Candidates presented to him by the Fellows. On the day after that on which a vacancy becomes known, the Senior Fellow summons the rest who are in residence. and declares the office of Master vacant. He then makes known the day of election, by means of a notice fixed for twelve days together on the door of the College Hall. He is not required to give further notice, either of the vacancy or of the day of election, to those Fellows who are absent. The election takes place in the College chapel, on the twelfth day after the declaration of the vacancy, at the conclusion of the Morning Service. The Fellows severally take an oath that they will nominate and present those persons whom they consider, in their consciences, best fitted for the office of Master, according to the tenor and meaning of a particular Statute of the College. This Statute describes the moral qualification of the Master, directs that he shall be either a Doctor or Bachelor of Divinity, and enjoins that in the election a preference shall be given to a Fellow, provided that any of the Fellows be qualified for the office. The Statute also directs that one of the persons nominated and presented to the Bishop shall be of the northern part of England, and the other of the southern, according to a division which is specified in the Statute. The Fellows have equal voices in the election. The votes are taken in scrutiny. Each Fellow votes for two Candidates, and if there be a majority for any two, those are nominated and presented to the Bishop of Ely, who selects one of them. If, at the first scrutiny, no two Candidates have a majority, a second and third scrutiny may be taken. If, after the third scrutiny, (which must take place within three days of the first) no two Candidates have a majority, the appointment of the Master is vested absolutely in the Bishop of Ely.

The Master elect is instituted by the Bishop, and is admitted by the Fellows in obedience to the Bishop's mandate, after being sworn to obey the Statutes. He continues in office for life.

There is no direct statutable obligation to residence.

Duties.

It is the office and duty of the Master, according to the Statutes, to exercise supervision over the College in all matters, both of a temporal and spiritual nature, and to the utmost of his power, to maintain the rights of the Society. The Statutes enjoin these duties chiefly in order that the other Members of the College may enjoy the advantage of leisure and quietness for the purpose of study. It is also the statutable duty of the Master, sometimes alone, and sometimes in conjunction with two of the Fellows who fill the offices of Senior and Junior Dean, to exercise discipline over the Members of the College, and to appoint and remove the servants. If any of the Fellows be guilty of serious misconduct, the Statutes enjoin that he be admonished twice by the Master in the presence of the rest of the Fellows, and if he do not amend, the Master is directed to report him to the Bishop of Ely, in order that he may be expelled. The admonitions are not required in case of very great offences against morality and in cases of violence, but the offender must, in such cases, be reported at once. The ejected Fellow has no right of appeal from the Bishop of Ely's sentence. In some minor offences, which are specified, it is the duty of the Master and Deans, or the Master alone, to admonish a Fellow, and, if found incorrigible, to report him to the Bishop of Ely, in order that he may be ejected. According to the present practice, when Students are the offenders, the Master, Deans, and Tutors severally exercise discipline in minor cases, but whenever the offence is of a grave character, the matter is heard and adjudged by the Master and Fellows at a College Meeting.

The Master summons meetings of the Fellows, and submits the arduous affairs of the College to their deliberation. The Statutes direct that the matter shall be decided by the *major* and *senior* part. The Master has the power of appointing one of the Fellows his *locum-tenens* during his absence from the College. The *locum-tenens* can perform any act which the Master himself can perform, with the exception that he cannot alienate (by lease or otherwise) any part of the College property. For this purpose the additional consent of the Master is necessary.

Stipend.

The Stipend of the Master is not fixed by the Statutes. The Statutes direct that the annual income of the College shall be divided equally amongst the Master and Fellows, so that when all the Fellowships are filled, he has a fifteenth part of the whole income. The only additional statutable allowance to the Master is an annual sum of forty shillings for the maintenance of a horse, with the right of pasturage in the College grove. The Statutes take for granted that there is a residence in the College for the Master, and Commons in the Hall, and they prescribe the sum of twenty shillings annually for livery. Since the Statutes were given, the Mastership has been increased by various private benefactions, especially through the munificence of Dr. Bernard Hale.

Election of Fellows.

The Foundation Fellows are elected by the Master and Fellows, and are instituted by

the Bishop of Ely after a year of probation. The Statutes require a Candidate to be a Bachelor of Arts complete. When an election is about to take place, the Master gives eight days notice at a Meeting to which all the resident Fellows are summoned. The eighth day afterwards is the day of election. The Master and Fellows elect, and each is bound by the oath of obedience to the College Statutes to select for the Fellowship an indigent person, who possesses moral and intellectual eminence. The Master ard Fellows severally vote for the Candidate whom they prefer, and the Candidate who has the greatest number of votes is elected. In case of disagreement the Master and Deans decide the question. The Fellow elect is sworn to his not possessing any income, pension, or corrody for life, of the annual value of five pounds. Also, that he will attend diligently to the lectures and disputations suitable to his degree. He also swears to some minor points of College regulations, and that he will be obedient to the Master *in omnibus licitis et honestis mandatis*. During his year of probation he has no voice in the affairs of the College, and he receives the commons and rooms only. At the end of the year, if there be no complaint against him, the Master and Fellows present a petition to the Bishop of Ely, to institute him to the Fellowship to which he has been elected, and the Bishop is required by the Statutes to institute him accordingly. The Master subsequently admits him in obedience to the Bishop's mandate, after administering to him an oath that he will obey the Statutes of the College. The Statutes enjoin that a fourth part of the Fellows shall be in holy orders. They do not contain any direction that a fellowship shall be vacated by marriage: according to present practice, however, a fellowship is immediately vacated by marriage. They prevent any one from retaining a Fellowship who has had peaceable possession of a living of which the annual value is five pounds, or a pension or corrody of the same amount, otherwise the fellowships are tenable for life. In practice the annual value of a living is taken from the annual value in the Valor Ecclesiasticus.

Rev. H. W. Cookson, D.D., Master of St. Peter's College.

Election of Fellows.

The Statutes enjoin residence during the Terms, unless leave of absence is obtained from the Master. Two of the Fellows may, with the leave of the Master and Fellows, devote themselves to the study of the Civil Law, and one to the study of Medicine. The majority are required to devote themselves to the study of the Liberal Arts, until they are allowed by the Master and Fellows to devote themselves to Theology. The remainder are directed by the Statutes to study Aristotle. No special duties or services are prescribed to the Fellows by the Statutes, unless they hold some of the offices, as that of Dean, Bursar, or Lecturer. Each Fellow has a separate voice in the election of a Master or Fellow, and in all matters which require the sanction of the Body Corporate. The stipend of a Fellow is not fixed by Statute. Like the Master, he enjoys an equal share of the annual income of the Master and Fellows. He has an allowance of twenty shillings per annum, for livery, and Commons in Hall, and rooms within the College. Two of the Fellows fill the offices of Senior and Junior Dean. Besides the duties already mentioned and hereafter described, as appertaining to their offices, the Deans are especially required by the Statutes to superintend and regulate the scholastic exercises of the various Members of the College, and to administer discipline in some minor matters. Together with the Master and three Senior Fellows, they are required to audit the accounts of the Senior Bursar, and they and the Master are the keepers of the common chest, in which are deposited the muniments of the College. At present the duties of the Dean chiefly consist in attending to the discipline of the College, in auditing the accounts, and in advising the Master on the appointment and removal of servants. The offices are annual.

Residence during Terms.

Stipends.

Duties.

Two of the Fellows fill the offices of senior and junior Bursar. It is the duty of the senior Bursar, according to the Statutes, to receive the income of all kinds, due to the Master and Fellows, and, with the consent of the Master and junior Bursar, to pay all outgoings. The junior Bursar holds his office chiefly for the purpose of learning the duties which are discharged by the senior Bursar, and with a view to his succeeding the senior Bursar at the end of a year, if found duly qualified. According to the present practice, the senior Bursar attends to the management of the property of the College, and receives and pays everything on account of the Master and Fellows. All matters, however, of an important nature respecting the College property, are deliberated upon at College Meetings. The office of junior Bursar is now only nominal. Both offices are annual.

The Bursars.

One of the Fellows fills the office of Prælector. According to the Statutes, his duties are, to give lectures in Dialectics and Physics. His stipend arises from an allowance of one shilling per quarter from each pensioner and sizar. In practice the Prælector presents candidates for their degrees, and attends at the performance of Acts in the public schools. His office is annual.

Prælector.

The Statutes referred to in the foregoing answers are exclusively those of the College, no notice being taken of the 50th Statute of the University Code of 12 Elizabeth. In what respects such Statute is binding upon the College or its members; or whether it be at all binding, appears doubtful.

Quest. 2. The like information respecting the Fellowships and Scholarships of any Supplemental or Bye Foundation; or respecting any Exhibitions not incorporated, but connected with the College.

There are no regulations in the Statutes respecting the Fellowships and Scholarships of the Bye Foundations. The Fellowships on the Perne, Parke, Ramsey, and Gisborne foundations, are regulated either by particular ordinances or by deeds. The Fellows have no voice in the affairs of the College, and they have no allowance from the Master and Fellows for commons in hall or rooms. They are under the general authority of the Statutes of the College. No duties or services are enjoined upon them.

Bye Foundations.

Rev. H. W. Cookson, D.D., Master of St. Peter's College.

Bye-Foundations.

Two Bye Fellowships were founded by Dr. Perne in 1589. The Candidates must be B. A. at least, and a preference is given to those who are of founder's kin, and then *cæteris paribus* to natives of Ely, Balsham, Somersham, Colne, Pidley and East Bilney, and then to natives of Norfolk. The Master and Fellows are the electors, and the form of election is the same with that for Fellows on the foundation. The Fellow elect is admitted at once, without passing a year of probation and without institution by the Bishop of Ely. The Fellowships are tenable for life. In practice these Fellowships are virtually open. No residence is required.

Fellowships.

Two Bye Fellowships were founded by Lady Mary Ramsey, in 1601. The foundation is subject to special ordinances. The appointment to the fellowships is vested absolutely in the Master, and must take place within six months of a vacancy, on pain of a small pecuniary forfeit. The Fellows must be chosen from the scholars on the Ramsey foundation, if, in the judgment of the Master, any of them be duly qualified. Each Fellow, on his appointment, takes an oath that he will enter holy orders within a year of the time of his admission. The Fellowships are tenable for life. No residence is required.

Four Fellowships were founded in 1637, by Thomas Parke, Esq. The election is alternately with the Master and Fellows and the heir male of Archbishop Sandys. The Fellows elect must be qualified by learning and morals for their new position. When the Master and Fellows elect, the form of proceeding is the same as in the election of the Fellows on the Perne foundation. They are required to elect a Scholar of the Parke foundation, if there be one qualified. The Fellowships are tenable for life, unless vacated as the Fellowships on the foundation are vacated.

Two Fellowships were founded in 1824, on a benefaction by the Rev. Francis Gisborne. The foundation is established by a deed. The election is with the Master and Fellows, and the form of proceeding is the same as in the case of the Perne Fellows. A candidate for a Gisborne Fellowship must have been a scholar on the Gisborne or some other foundation in the College. A Fellowship is vacated by marriage, or by the possession of a permanent annual income amounting to 250*l*. It is tenable for seven years only.

Scholarships.

There are sixty-eight Scholarships on 16 different foundations. The following is a list of them.

Six founded by Edward Lord North, in or about 1574.

One founded by Archbishop Whitgift.

One by Henry Wilshaw, B.D.

Five by Dr. Perne, in 1589.

Four by Lady Mary Ramsey, in 1601, with a preference to Students from Christ's Hospital. They are tenable until the scholars are of the standing for the degree of Master of Arts, and are intended for persons who expect to take holy orders.

One by Mr. Warren, in 1613.

Two by Mr. Blythe in 1620.

Two by Mr. Slade.

Two by Dr. Hawkins in 1631.

Two by Lady Frances Matthews in 1632.

Four by Thomas Parke, Esq., in 1637.

Two by Mr. Woodward, in 1661. These are tenable until the Scholars are of the standing of Bachelors of Arts.

An unlimited number by Dr. Bernard Hale, in 1662. There are now twenty-five. In the patronage of Lord Melbourne.

Five by Bishop Cosin, 1669.

One by Mr. Miller, 1683. Appropriated to a Scholar from Huntingdon Grammar School.

One by Mr. Worthington.

Four in 1824, on a benefaction from the Rev. Francis Gisborne. These Scholarships are only tenable until the possessors are of standing to proceed to the degree of Bachelor of Arts.

All the Scholarships, except those on the Gisborne foundation, are paid in proportion to residence. Except in the cases specified in the foregoing statement, the Scholarships are tenable until the time for taking the degree of M.A.

Quest. 3. The regulations respecting the admission of Students over and above the members of the Foundation; as prescribed by the Statutes; and as observed in practice.

Admission of Students.

There are no regulations in the Statutes respecting the admission of Students over and above the members of the foundation. In practice Students are admitted by the Tutor, with the consent of the Master, on the recommendation of a Master of Arts, and on the payment of the caution money and the fee for Matriculation. There is no College examination upon admission.

Quest. 4. The times at which Divine Service is performed in the College chapel, and the regulations respecting attendance at the same.

College Chapel.

Service is performed daily in the College chapel, at the hours of 7¼ A.M., and 6 P.M., except during the long vacation, and during those periods in the Easter and Christmas vacations, when scarcely any persons are in residence. All the Students are expected to attend Divine Service twice on Sunday, and six times during the rest of the week. Absence from College chapel subjects the Student to admonition from one of the Deans, or to confinement within the walls of the College after certain hours in the evening. Frequent irregularities are regarded as serious breaches of discipline, and are noticed as such by the various College authorities. There are no penalties of a pecuniary nature for non-

attendance. I believe that the chief constraining influences to a regular attendance at chapel are of a moral kind, and that these influences operate to a great extent. The Students are advised to attend the celebration of the Holy Communion, but they are not compelled to do so by any of the penalties attached to breaches of discipline. In cases of non-attendance, their attention is called to the subject by the Master, Deans, or Tutor. *Rev. H. W. Cookson, D.D., Master of St. Peter's College.*

Quest. 5. The course of Collegiate instruction given to the Students; and its relation to the Public Examinations of the University.
The number of Fellows, or others, employed in giving the College lectures.
The number of the College Examinations in the course of the year, and how conducted.
The rewards for proficiency.

The following is the course of Collegiate instruction given to the Students. Course of collegiate instruction.

First Year.—In Mathematics:—Euclid, Books 1—6, and part of Book 11. Arithmetic and Algebra, with the exception of the Theory of Equations. Plane Trigonometry. In Classics:—A Greek Play. The Greek Testament. The Latin subject selected for the previous Examination. Also Paley's Evidences of Christianity, and the Old Testament History.

Second Year.—The Students are divided into those who are candidates for Honours, and those who are not. Those who are candidates for Mathematical Honours, attend to the following subjects:—Conic Sections and Algebraical Geometry. Differential and Integral Calculus. The Elementary parts of Differential Equations and Finite Differences. The Elementary parts of Geometry of Three Dimensions, Statics and the Elementary parts of Dynamics. Newton's Principia, Sections 1—3, also to the mathematical subjects enumerated for Students of the first year. Those who are candidates for Classical Honours attend lectures in Greek and Latin subjects selected by the Lecturer, and are employed in Classical composition. Those who are not candidates for either Mathematical or Classical Honours attend lectures in Algebra and the elementary part of Statics. All the Students are expected to attend to the subjects which are fixed for the previous Examination, namely, one Greek and one Latin subject. The Greek Testament. Paley's Evidences and the Old Testament History. Euclid, Arithmetic, and Algebra.

Third Year.—The candidates for Mathematical Honours attend to the following subjects:—Dynamics, Hydrostatics, and Hydrodynamics, Optics, Plane Astronomy, and also to the subjects enumerated for Students in the first and second years. The candidates for Classical Honours attend to the subjects appointed for those who are of the second year. Those who are not candidates either for Classical or Mathematical Honours, attend to the Greek and Latin subjects required for the degree of Bachelor of Arts; The Greek Testament, Paley's Moral Philosophy, Ecclesiastical History, and the elementary parts of Statics and Hydrostatics.

All the subjects above mentioned are comprised in the scheme of the Public University Examinations. The Students in the second and fourth years are privately examined in the subjects of the University Examinations, with a view to a more complete preparation for them.

Three Foundation Fellows and one Bye-Fellow are employed in giving the College lectures.

There is one College Examination in the course of the year. It is conducted by means of printed papers, suitable to the Students of separate years and classes.

There is also a Sizarship Examination at the beginning of each Michaelmas Term.

The vacant Scholarships and prizes of books are given as rewards for proficiency.

There are no lectures in the Civil Law, and none in Medicine. The very few Students who proceed to degrees in those faculties, attend the Lectures of the public Professors, and pursue their studies privately. No lectures have yet been established in those parts of the Natural and Moral Sciences, which have recently become subjects of Examination in the Triposes of Natural and Moral Sciences.

Quest. 6. The regulations of discipline as to the attendance of the several classes of Students at the College lectures: as to the attendance at the dinner in the College hall; as to the hour of the evening at which the Students are required to be within the College or in their licensed lodgings; and as to their expenses.

All Students who are candidates for degrees in Arts are expected to attend the College lectures suitable to their class. Absence from lectures subjects the Student to admonition from the Tutor or Lecturer, to confinement within the walls of the College after certain hours of the night, or to the penalties attached to more serious offences. Discipline.

The attendance of Students in the College hall is marked. Absence renders a Student amenable to the penalties attached to absence from lectures. The College gates are closed at 10 P.M., and no Undergraduate is allowed to go out after that time. Students entering at late hours are considered guilty of a serious breach of discipline. A record is kept of all persons entering after 10 P.M.

The regulations of the University require notice to be sent to the Tutor of all bills incurred beyond 5*l*. The College Tutor does not admit bills from the cook and butler beyond a certain amount. The chief expenses of the Students are under the constant supervision of the College Tutors, and of the parents through them, and are in this manner more effectually controuled than by any special Regulations on the subject.

Quest. 7. An estimate of the necessary expenses of a Nobleman, Fellow-Commoner, Pensioner, and Sizar respectively: comprising College tuition, room-rent, meals, attendants, fees, and other like incidents, from the time of entrance to that of taking the first Degree.

In the following statement of expenses, the Student is supposed to be admitted in the Michaelmas quarter (say 1848) before the end of the Easter Term, to reside twenty-two Expenses.

Rev. H. W. Cookson, D.D., Master of St. Peter's College.

Expenses.

weeks during each academical year, and four weeks besides, at and about the period of the Examination for the degree of Bachelor of Arts (say January, 1851). It includes all the necessary expenses from the time of admission to the time of taking the degree of Bachelor of Arts, for College tuition, room-rent, meals, attendance, laundress, coals, furniture, academical dress, fees and payments to the College.

	Fellow Commoner.			Pensioner.			Sizar.

College Expenses .	324	5	0	187	7	10	75	14	3
University Fees. .	19	0	6	13	10	6	9	5	6
Total . . .	£343	5	6	200	18	4	84	19	9

Quest. 8. The actual average expenses of persons in each of the same classes, so far as such expenses come under the knowledge of the College Tutors; with a statement whether any allowance for private tuition is included in this estimate.

The following statement of the *actual* expenses of Fellow-Commoners, Pensioners and Sizars for the whole period of their undergraduateship, includes not only College tuition, room-rent, meals, attendance, laundress, coals, furniture, academical dress, fees and payments to the College, but also all such accounts of tradesmen and others, for personal and general expenses, as the Students have paid through the Tutor. It does not, however, include any allowance for private tuition. In some of the cases the Students have paid only a limited number of their accounts through the Tutor, in others, almost all; and nevertheless in some of the latter cases, owing to the economical habits and good management of the Students, the totals of the expenses are among the smallest. In cases of the last mentioned description, some of the Students have been among those most remarkable for uniform propriety of conduct and demeanor, and most generally respected. The regulations of the Tutor admitted the bills of bookseller, butler, chinaman, cook, grocer, hosier, milkman, porter, shoemaker, surgeon, tailor, and upholsterer. The cases specified below have been taken from a Tutor's books as fair specimens of actual expenditure.

No.	Fellow Commoners.					
	£.	s.	d.	£.	s.	d.
1	261	0	9			
2	206	11	6			
3	243	8	5			
4	474	14	7			
				4) 1185	15	3
Actual Average College Expenses				296	8	10
Add University Fees				19	0	6
Actual Expenses of a Fellow Commoner from the time of entrance to that of taking the degree of B.A. . .				£315	9	4

In the above statement the charges for rooms and attendance are not included, except in the case specified as No. 4. This remark will partially explain why the *actual* average expense appears to be smaller than the sum stated as the *necessary* expense in the answe to Question 7.

No.	Pensioners.			No.	Pensioners.		
	£.	s.	d.		£.	s.	d.
1	274	14	3	13	427	14	9
2	379	11	2	14	293	16	6

Actual Average College Expenses	181	14	3
Add University Fees	9	5	6
Actual Expenses of a Sizar from the time of entrance to that of taking the degree of B.A.	£190	19	9

In the above statement, both with regard to Pensioners and Sizars, no reduction is made in any of the cases on account of Scholarships or Exhibitions. These deductions, in some instances, were so considerable as to bear a very large proportion to the whole amount of the expenses incurred, in others, indeed, almost to exceed them.

Quest. 9. The provision made in your College for the maintenance or assistance of poor Students.

Poor Students

The Scholarships and Exhibitions above mentioned are the chief provision for the maintenance and assistance of poor Students. The Sizars have their commons in hall free, and one of them fills the office of Chapel clerk. The rents of some of the College rooms are kept low with a view to diminishing the charges upon the poor Students. Some of them are 6*l.* per annum, others are 8*l.* and others 10*l.*

Quest. 10. The practicability of reducing the expenses of College residence, and of further restraining habits of extravagance and facilities of credit.

Reduction of expenses and restraint on extravagance.

I believe that the necessary expenses of College Residence cannot be materially diminished. The ordinary charges may, by vigilance and care on the part of particular officers, be kept low; and some charges may, from time to time, be removed by the interference of the College: but I do not think that the whole can be greatly reduced. If, by diminishing them, a provision were made for Students, unsuitable to persons belonging to the middle classes of society, the Students would cease to be satisfied, and would resort to other and more expensive methods of obtaining what they wanted. Habits of extravagance are partially prevented through the controul of the College Tutors, and by moral influences of various kinds. They are also checked by some of the laws of the University, and by some College regulations. I cannot suggest any general remedy for the evil. I believe, however, that shameful extravagance is of comparatively rare occurrence, and that even a taste for expensive luxuries has much diminished of late years. Imprudent and expensive habits are now limited to a much smaller class than formerly, and a considerate and economical mode of living is more generally prevalent.

Quest. 11. Is it your opinion that, from the change of time and circumstances, it would be expedient to remove any of the appropriations, limitations, or restrictions, now affecting the election to, or tenure of, Fellowships, or Scholarships, or Exhibitions in your College?

Removal of restrictions on Fellowships, &c.

There are not many appropriations or restrictions affecting the election to, or tenure of, Fellowships, Scholarships, or Exhibitions, in this College. The principal one with regard to the Fellowships is that which prevents the election of any one into a Foundation Fellowship, who is of sufficient standing to take the degree of Master of Arts. Of the expediency of removing this limitation different views exist, and I am not myself prepared to express a positive opinion on the subject. A restriction formerly existed which was found to act prejudicially upon elections to Fellowships; this required that no more than seven of the Foundation Fellows should be of the Northern Division of England, and no more than seven of the Southern; it further prevented more than two persons of any one county, except Middlesex and Cambridge, from being Fellows at the same time. Upon petition from the Visitor and College this restriction was partially removed by Letters Patent about the year 1839, and was entirely abrogated shortly afterwards.

The principal limitations which exist with regard to any of the Bye Fellowships and Scholarships are not such as have been materially affected by the change of time and circumstances.

Quest. 12. Have any Scholarships or Exhibitions become ineffective through default of claimants?

Scholarships or Exhibitions ineffective.

Provision is made in the Statutes for eight poor scholars. These scholars were required to perform menial services, and had a precarious allowance of Commons in Hall, and a contribution from the alms of the other Members of the College, at the discretion of the Almoner. For a longer period than can be traced these scholars have had only a nominal existence. The Sizars, from receiving the allowance of Commons, appear to be their representatives. The menial services are abolished.

No Scholarships or Exhibitions have become ineffective through default of claimants.

Quest. 13. In cases where Fellowships, Scholarships, or Exhibitions are of small amount, would it, in your opinion, be advantageous to consolidate two or more together, so as to afford a more substantial help towards maintenance, or a better reward for merit; provided such consolidation could be effected by competent authority?

Consolidation of Fellowships, &c.

I am not of opinion that it would be advantageous to consolidate any of the Fellowships, Scholarships, or Exhibitions. The Parke and Gisborne Fellowships are of sufficient

Rev. H. W. Cookson, D.D., Master of St. Peter's College.

value to be considerable rewards of merit. They are usually held by candidates who fail in obtaining Foundation Fellowships. The other Fellowships are chiefly honorary, and would not be advantageously diminished in number, for they could not be made of sufficient value by such a process to be worthy of much greater consideration than at present. With regard to Scholarships, the College has been in the habit of allowing the same Student to hold Scholarships on various foundations, though not more than one on the same foundation. Deserving and distinguished Students have thus obtained as great an amount of pecuniary reward as they would be fairly entitled to in any re-adjustment of the Scholarships. The same observations apply to the Exhibitions.

In returning the foregoing answers to the questions which Her Majesty's Commissioners have been pleased to put to me, I am desirous of being allowed to state that the College is not responsible for the accuracy of any of the information contained in them, or for any of the opinions expressed. The information and opinions are respectfully submitted to Her Majesty's Commissioners in my own name only; and the answers are given to the best of my knowledge and judgment.

St. Peter's College, 16*th December*, 1851. (Signed) H. W. COOKSON, *Master.*

The Master and Fellows of St. Peter's College.

Answers from the Master and Fellows of St. Peter's College.

St. Peter's College, Cambridge, Dec. 20*th*, 1851.

My Lord and Gentlemen,

I have the honour to transmit to you, in the name of the College, the annexed answers to certain questions forwarded by you to the Master and Fellows under date of the 5th November last, upon which you requested them to furnish you with information. The answers have been prepared with as much care and at as early a period as the occupations of the term would allow.

I have the honour to remain,
My Lord and Gentlemen,
Your obedient humble servant,

Her Majesty's Commissioners, Cambridge University Commission. (Signed) H. W. COOKSON, *Master.*

Average gross yearly Income of the College.

1. The amount of the gross yearly income of the College derived from estates in land on an average of the last seven years, is about 3795*l.* 11*s.* 6*d.*; which amount consists of the following particulars:—

	£.	s.	d.
Rack rents	2879	17	9
Reserved rents under beneficial leases	279	12	7½
Fines for the renewal of leases	448	1	2
Manorial fines and quit rents	37	15	8½
Rent charges	132	13	4
Wood sold	17	10	11
	£3795	11	6

The quit rents mentioned in the above particulars include not only those of land, but also those of houses; and in those cases in which houses and farms are let or charged together, no separation of the lands from the houses has been made in any part of the above statement, which, therefore, in such cases, includes the income arising from both.

2. The amount of the gross yearly income of the College derived from houses, on an average of the last fourteen years, is about 730*l.* 7*s.* 10*d.*; which amonnt consists of the following particulars:—

	£.	s.	d.
Rack rents	127	6	5
Reserved rents under beneficial leases	134	15	2
Fines for the renewal of leases	455	5	2
Manorial fines	13	1	1
	£730	7	10

3. The amount of the gross yearly income of the College derived from tithe rent-charges, so far as such property is not included in our answer to the first question, is 4*l.* 9*s.* 6*d.*, or thereabout.

Net Income.

4. The gross amount of the several particulars of income mentioned in the three foregoing answers, is about 4530*l.* 8*s.* 10*d.* The corresponding net amount of income is about 3931*l.* 8*s.* 3*d.*

Deductions.

The deductions which constitute the difference between the gross and net income, consist of land tax, insurance, repairs, restoration of farm-buildings, quit rents, allowances for drainage and fencing, enclosure and commutation expenses, abatements of rent, several fixed charges or customary payments and donations not made to members of the College, and some other expenses of a similar character.

The chief portion of these deductions has reference to property mentioned in the answer to the first question.

The Master and Fellows of St. Peter's College.

5. The yearly amount of the income of the College derived from funded property is about 851*l.* 0*s.* 9*d.* The College does not possess any Exchequer Bills.

6. The gross yearly amount of the income of the College, derived from the rent of rooms in the College, on an average of the last seven years, is about 794*l.* 8*s.* 1*d.* The corresponding net amount is about 507*l.* 8*s.* 5*d.* The deductions which constitute the difference consist of insurance, repairs, and several fixed customary payments and donations not made to members of the College.

Fees.

The yearly income arising from fees and charges paid by members of the College is about 54*l.* 2*s.* 11*d.*

The yearly amount arising from other sources not specially included in the foregoing answers is about 92*l.* 14*s.* 0*d.*

Total aggregate of gross and net Income.

7. The total aggregate of gross income is about 7317*l.* 3*s.* 0*d.*; that of net income about 5923*l.* 14*s.* 4*d.*

This statement includes not only the income of the Foundation estates and property; but also the income arising from benefactions, and from the estates and property of all supplemental or bye-foundations; and that arising from or belonging to the Domus fund, and the chapel, library, lecture-room, graduates' composition, building, and advowson funds.

Application of the net Income.

8. The net income of the College, as before estimated, is applied to the payment of all such expenses connected with the administration and management of the several estates as are not comprised in the before mentioned deductions; and also of the income-tax; the stipends of the scholars and bye-fellows; pensions, subscriptions, and allowances; the stipends and bills of servants and tradesmen employed on behalf of the College; the Fellows' dinner in hall; the expenses connected with the management of the College; the cost of maintaining the chapel service, of obtaining books and other articles for the library, and of supplying the lecture-room; the quarterly detriments of graduate compounders; the temporary incumbrances on the respective estates; the dividends of the Master and Foundation Fellows; and other small miscellaneous expenses; and the unapplied surplus (if any) falls into various funds, such as the Domus, chapel, library, lecture-room, graduates' composition, building, advowson, and repair funds, and also a trust fund for extending the benefits of a particular foundation. The aggregate net income is not applied indiscriminately in providing for all these purposes, but in various distinct portions, severally answering their respective purposes.

Income of the Master,

The following is a statement of the particular sum received by the Master in each of the seven years ending at Michaelmas last (1851), out of the net income before estimated. This statement does not include the income arising from a living attached to his office by an Act of Parliament or the proceeds of certain property, which has been bequeathed by various benefactors, and of which, in practice, he has the exclusive management.

	£.	*s.*	*d.*
1851 . . .	419	11	5
1850 . . .	471	3	2
1849 . . .	536	9	11
1848 . . .	416	10	2
1847 . . .	451	10	0
1846 . . .	361	10	10
1845 . . .	356	9	6½
7)	3,013	5	0½
Average . .	430	9	3

and Fellows.

The following is a statement of the sum received by a Foundation Fellow, in each of the seven years before mentioned.

	£.	*s.*	*d.*
1851 . . .	252	6	11
1850 . . .	304	1	2
1849 . . .	368	5	4
1848 . . .	245	4	6
1847 . . .	260	15	4
1846 . . .	189	0	7
1845 . . .	186	9	6
7)	1,806	3	4
Average . .	258	0	5

In these two statements income-tax is supposed to be deducted. Each of the eight Senior Foundation Fellows received a small additional sum, varying in their respective cases, from 2*l.* to 7*l.* 0*s.* 3*d.*; or, if income-tax be deducted, from 1*l.* 18*s.* 10*d.* to 6*l.* 16*s.* 2*d.* In the statement of a Fellow's income, the rent of his rooms has been included.

There are no Foundation Scholars.

The Bye-Fellows.

The Bye-Fellows on the Parke, Ramsey, and Perne Foundations receive the following weekly sums, subject to deductions for non-residence exceeding three months in the year

	£.	*s.*	*d.*
Parke . . .	1	14	0
Ramsey . . .	0	5	1½
Perne . . .	0	4	7½

The Master and Fellows of St. Peter's College.

The Bye-Fellows on the Gisborne Foundation, established in 1824, receive each of them the sum of 70*l.* per annum, and are not subject to deductions for non-residence. Their Fellowships are not actually of that value, but the College has hitherto raised them annually to the standard above mentioned, out of the funds which would be otherwise wholly appropriated to the Master and Fellows.

Weekly sums paid to Scholars.

The Scholars on the several Bye-Foundations receive respectively sums varying from one shilling to five shillings and three half-pence per week, subject to deductions for non-residence; but the Scholars on the Gisborne Foundation receive 30*l.* per annum. Several Scholarships on different Foundations may be obtained by the same person.

The deductions for non-residence are paid to the Domus Fund. Some of the stipends on Supplemental or Bye-Foundations arise from estates which are administered by the general authorities of the College; others are charged upon property belonging to various individuals and public bodies. Almost all the Scholarships are fixed in yearly value by the terms of their respective Foundations.

The several Fellowships on two of the Bye-Foundations are also fixed in yearly value; those on the other two are not so fixed. A considerable increase has taken place, in modern times, in the annual rental of the estates belonging to one of the two latter Foundations; and a proportionate increase has accordingly been made in the yearly stipends of the Bye-Fellowships attached to it. No increase has taken place in the income produced by the other Foundations.

Exhibitions.

There are two Exhibitions at this College; one from the Company of Clothworkers in value about 25*l.* per annum, the other from the Company of Ironmongers, in value about 2*l.* 15*s.* per annum. The proceeds of the former are received by the Tutor, and distributed by him among deserving Scholars; those of the latter are paid by the Company to the Exhibitioner himself.

Expense of table in the College Hall, for Fellows,

The expense of the table in the College Hall for the Foundation Fellows is paid out of the income of the College. Bye-Fellows and other Members of the College admitted to the Fellows' table pay weekly sums on account of their portion of the expense. The expenses are on a limited scale, and there is no allowance for wine.

for Scholars,

The expense of the table in the College Hall for the scholars is paid by the scholars themselves; the amount of their Scholarships being paid to them quarterly through the Tutor.

Sizars.

There are four Sizars, to whom the following privileges are allowed. Each Sizar is permitted to dine with the other Undergraduates in Hall free from expense (except in the long vacation), and an opportunity is afforded to him of occupying low-rented rooms in College. One Sizarship is usually filled up every year; and, according to present practice, it is contended for by Freshmen only. One of the Sizars holds the office of Chapel Clerk, the emolument of which is variable, but generally about 20*l.* per annum. There are no Subsizars.

Expense of Repairs.

The average annual expense of keeping up and repairing the Collegiate buildings is about 251*l.* 2*s.* 2*d.* There is a special Building Fund, which seems to be reserved for extraordinary repairs, but may perhaps be applicable also to those of an ordinary kind. The average annual expense incurred by the repair of chancels of churches, in cases in which the College is the impropriator or patron, is about 8*l.* 17*s.* 6*d.*

Prizes.

The amount annually given as prizes or rewards for the encouragement of learning is about twenty guineas, but special rewards are sometimes given in addition to these.

Charities.

On an average of the last seven years, the prizes amount to 23*l.* 4*s.* 8*d.* per annum; account being taken of a special prize given in one of those years. The amount annually given as donations or subscriptions to charities and schools is at present 79*l.* 15*s.* 4*d.*; this amount includes only the ordinary donations or subscriptions; other donations are occasionally made.

The remainder of this question has been already answered in the foregoing statement.

Beneficial Leases.

9. No particular system is pursued in the College with the view of running out beneficial leases. It is usual on the expiration of the first accustomed interval to set a fine for the renewal; and if it be not accepted by the tenant the inclination is to run out the lease. Two beneficial leases have expired during the last fourteen years. The Master and Fellows did not on either of those occasions receive any compensation for the loss of the renewal fine. It is the practice to forego a fine altogether when the terms of renewal are not accepted by a tenant; and during the above mentioned period many fines have been so foregone. There are two or three leases in which the rent was so reserved as to increase prospectively; and such increase of rent would of course have its effect in diminishing the fines; but it has not been the practice of the Master and Fellows to stipulate, on the renewal of a beneficial lease, for an increase of the reserved rent. It is thought that the system of increasing the reserved rent would not, in this neighbourhood, be favourable to the leasing of property for building purposes.

Purchase of advowsons.

10. The College possesses a small fund for the purchase of advowsons; which may perhaps be also applicable to the augmentation of small livings in its patronage. It arose from a bequest of 100*l.*, which has been increased, since the year 1838, by three private benefactions from Members of the College. The fund so produced, together with the interest arising from it, is now represented by the sum of 499*l.* 11*s.* 7*d.*, 3 per cent. consols, and 33*l.* 10*s.* 6*d.* in cash. No purchases have yet been made.

Addition made to College Buildings.

11. A considerable addition was made to the Collegiate buildings in or about the year 1827, with a view of accommodating a larger number of Students. This addition consisted of the Gisborne Court, the funds for which were wholly derived from a benefaction made to the Master and Fellows, by the Rev. Francis Gisborne, a few years previously.

12. We are desirous of giving effect to the intentions of the Founders of Fellowships,

Scholarships, and Exhibitions, and of rendering the foundations in the highest degree beneficial. It has been, and will be, our aim to act in accordance with this desire; and any inconveniences which may from time to time occur to us will always receive our most attentive consideration. *The Master and Fellows of St. Peter's College.*

13. and 14. We are not of opinion that a change of the kind suggested is at all desirable with regard to any of the Scholarships at this College. In the case of those Scholarships, in the elections to which fit claimants from particular schools or localities have a preference, it is the practice to assign them, if there be no such claimants, to other deserving candidates.

St. Peter's College, 20th December, 1851. (Signed) H. W. COOKSON, *Master.*

St. Peter's College Library.

St. Peter's College, Cambridge, March 25th, 1851.

My Lord and Gentlemen,

I have the honour to forward my answers to questions which you have sent to me as Librarian of this College, and upon which you have been pleased to request me to furnish such information as I may be disposed to communicate. The replies are numbered according to the questions. *Rev. J. Cocker, M.A.*

1. Subject to regulations made from time to time by the Master and Fellows, the Library of this College is placed under the care of a Librarian, who is chosen annually from among the Fellows. He directs his attention to the arrangement, condition, and preservation of the books in the Library; makes out from time to time, for the approval of the Master and Senior Bursar or of a College Meeting, lists of the books which he desires to add to the collection; orders the books when approved, and afterwards classes and catalogues them; furnishes each person who makes default in returning books to the Library, within the time fixed by the College regulations, with a statement of the fines due from him, and delivers a statement to the Bursar, with a view to their recovery; makes application for the books not returned; and in other respects, directs his attention, generally, to matters connected with the good order and the management of the Library. There is no assistant Librarian. Appointment and Duties of the Librarian.

2. There is a manuscript Catalogue of the Library. The books are not, to any great extent, arranged in classes according to subjects; but they are partly so arranged; and all of them are placed in classes or compartments to which the Catalogue is adapted. The room in which the books are placed is well ventilated, and appears to me sufficient for the purpose. It is not fireproof. The bookcases are so arranged as to divide the Library into compartments; each compartment is distinguished by a letter; the shelves in each compartment are distinguished, respectively, by figures; and the books in each shelf are numbered consecutively; so that, in general, a book is very readily found by means of the Catalogue. Manuscript Catalogue. Arrangement of Books.

3. The funds now applied to the support of the Library, are a chamber-rent of 6*l.*; the Library fines, the interest arising from a sum of 461*l.* 15*s.* 7*d.* 3 per cent reduced annuities, a fee of 2*l.* each from newly elected Fellows and Bye-Fellows; and certain small quarterly payments, differing in amount, which are charged by the College to the Master, Fellows, resident Bye-Fellows, and Students: all of which funds have produced, on an average of the four years ending at Michaelmas last (1850), the yearly income of about 72*l.* The sum expended annually in the purchase and binding of books, on an average of the same four years, has been between 64*l.* and 65*l.*, which has been defrayed, together with some other payments on account of the Library, out of the above mentioned income. The Librarian has at present a yearly stipend of 3*l.* 6*s.* 8*d.*, which is derived from another source. The insurance of the books and the repair of the substantial fabric of the Library building are usually provided for by the College out of their general funds. Funds applied to the support of the Library. Librarian's Stipend.

4. There are nearly 6000 books and manuscripts in the Library. The sum of 300*l.* was left by Dr. Thomas Richardson about the year 1733, the interest being directed to be applied to the purchase of Greek and Latin books for the College Library. It is now represented by the sum of 389*l.* 3*s.* 11*d.*, 3 per cent reduced annuities, part of the above mentioned sum of 461*l.* 15*s.* 7*d.* like annuities. Some other pecuniary benefactions, and considerable donations of books, have also been made at various times by persons connected with the College. The Library contains some rare and valuable books and manuscripts; but I should hardly say that it contains many books or manuscripts of great rarity or value. The books chiefly belong to the Department of Divinity. There is a fair collection of classical books, and an extensive collection of works of Divinity; but, upon the whole, the Library has been deficient in its collection of modern and other books connected with the usual subjects of Academical instruction and study. Attempts have been made for some years past, and continue to be made to supply the deficiency. Number of Books and MSS. in the Library. Benefactions.

5. The Master and the Fellows have the privilege of entering the Library and taking out books. The College allows the same privilege to its resident graduates, of the degree of M.B., B.C.L., M.A., or higher degree, whose names are on the College boards. No other persons are allowed to take out books, or (except the Library-keeper) to enter the Library or remain there unless accompanied by the Master or one of the Foundation Fellows. The Students can in general obtain books from the Library, through the Master or some Foundation Fellow, who in that case will be responsible for their due return. Members of other Colleges and strangers are allowed by the College to enter the Library Privilege of entering the Library and borrowing Books. Admission of Strangers.

Rev. J. Cocker, M.A.

for purposes of special reference or research, if accompanied as above mentioned. For a more unrestricted access by them, it would be necessary to make a special application to the Master and Fellows, and obtain their permission. A printed copy of some regulations adopted by the College with respect to their Library is annexed to this paper.

I have the honour to be,
My Lord and Gentlemen,
Your obedient humble servant,

Her Majesty's Commissioners,
Cambridge University Commission.

(Signed) JOHN COCKER,
Librarian of St, Peter's College.

ST. PETER'S COLLEGE.

Regulations respecting the Library.

Regulations respecting the Library.

1. THAT the Master or any Fellow have the privilege of entering the Library and taking out books.

2. That any resident graduate of the College, of the degree of M.B., B.C.L., M.A., or higher degree, have the same privilege, provided his name be on the College Boards.

3. That no other person be allowed to take out books upon any account whatever: or (except the Library-Keeper) to enter the Library or remain there unless accompanied by the Master or one of the Foundation Fellows.

4. That no books be sent to or from the Library through any other person than the Library-Keeper.

5. That no one take any book out of the Library without first entering the title and class of it in a book to be kept for that purpose, and specifying the year and day of the month: on pain of forfeiting three guineas, or double the value of the book.

6. That all books be returned to the Library on or before the last day of Michaelmas Term, and on or before the division of Easter Term in each year, and written notice of the return, with the date of it, placed upon the Librarian's file: the penalty in default of such return to be 2*s.* for every folio or quarto, and 1*s.* for every book of less size: the penalty to be repeated every month until the book be returned, or another of the same edition and equal value placed in its room.

7. That the Librarian, on the day after that appointed for the return of the books, furnish each defaulter with an account of the fines due from him, and also deliver a statement of the same to the Bursar, in order that they may be recovered and carried to the credit of the Library account.

8. That no MS. belonging to the Lock-up classes be taken out of the Library without a College order.

9. That no other MS. be taken out except by the Master and Foundation Fellows, and then only in the presence of two of them, who shall give a written acknowledgment to the Librarian, the penalty in default thereof to be the same as is specified under Rule 6, to be paid by both the subscribing parties.

10. That when any book is added to the Library, it be properly classed and entered in the Catalogue by the Librarian.

11. That a key of the Library be furnished to the Master and each of the resident Foundation Fellows; and also one to the Library-Keeper, for the use of those who have the privilege of admission; and that in case of a Fellow going out of residence, the key in his possession be deposited with the Master.

12. That the College porter be at present the Library Keeper.

*** The above regulations were adopted December 22nd, 1842.

Rev. G. Ainslie, D.D., Master of Pembroke College.

Answers from the Rev. G. Ainslie, D.D., Master of Pembroke College.

Election of the Master.

1. The Election of the Master rests entirely with the Fellows. When a vacancy occurs, the Senior Fellow summons the rest, and on the fifth or sixth day after the major part have assembled in the University they proceed to vote. The votes are taken in Scrutiny, and the number of Scrutinies is unlimited. If the major part of the Fellows agree in any one, the Election is complete; but if they cannot agree before the third day, the Election devolves on the five Senior Fellows, according to seniority of standing in the College, a Bachelor of Divinity in this particular matter ranking before a Master of Arts, though his senior. The Fellows are required, under obligation of the oath, which they severally took when elected Fellows, of fidelity to the College and obedience to its Statutes, to elect that

Rev. G. Ainslie, D.D., Master of Pembroke College.

person whom they deem best qualified and most inclined to promote the study of Sacred Literature, and to forward the business of the College; provided that he be in Priest's Orders and of the degree of Master of Arts at least. If there is any one of the Fellows fit for the office, they are to prefer him, but if there is not, they may elect any one else under the same conditions.

Duties.

The Master elect is immediately sworn to discharge his office faithfully, and, as far as in him lies, to keep the Statutes inviolate and in force; and he is to continue in his office so long as he conducts himself properly in it.

He may not be absent from the College more than a month at a time in full term, except for sufficient cause, on pain of forfeiting his office.

The particular management of the Estates and Property of the College and the appointment of servants is entrusted to the Master and two of the Fellows holding the offices of Treasurer and Bursar; but they have to render to the whole Community an account of their receipts and expenses.

The general government of the College is vested in the Master and Fellows; yet so that the consent of the Master and the major part of the Fellows is sufficient for any corporate act. They have power also, except as to the statutes which respect the elections of Fellows, occasionally to allow an individual Fellow dispensation from the observance of a statute. The Master has a general authority in regard to discipline and punishment; but all grave charges are heard and determined by the whole Community. Those who hold offices in the College are especially enjoined to attend to the Master's directions in matters relating to their respective departments. Moreover, in the case of any Fellow being convicted of grave misconduct, the Master with the concurrence of two Fellows, whom the Fellows themselves are to select, has authority to inflict any punishment on the delinquent, even to expulsion from the College. This power is visitatorial, no appeal from the sentence being allowed.

The Master is, as it were, the Ordinary of the Chapel. He has the power of appointing one of the Fellows to be President of the College, or his *locum tenens*.

Stipend.

The Statutes do not assign him any certain stipend, emolument or advantage, though they assume that he has a Dwelling within the College, an allowance for Commons during residence and a Stipend. They direct that, after all just claims upon the Revenues of the College have been satisfied, and a fair portion set aside for repairing and sustaining the buildings, the surplus shall be appropriated at the discretion of the Master and Fellows to their stipends and maintenance, or to any other lawful purpose which may be considered to be for the advantage of the College; yet so that the Master, beside his stipend, shall receive the double of a Fellow's share.

Election of Fellows.

The Election of Fellows rests entirely with the Master and Fellows; and the mode of proceeding is as follows. The Fellows alone nominate. If after three or four nominations it appears on scrutiny that any person has been nominated by at least half of those who have nominated, the Master may propose him for election, but not else. The whole Community then vote. If the person so proposed fails of obtaining the votes of the major part of the whole Community and among them the votes of the Master and two of the eight senior Fellows, he is not elected, and the nominations begin afresh. But if he does obtain such votes, the Master forthwith pronounces him to be elected.

The Fellows are required, under obligation of the oath, which they severally took, when elected Fellows, of fidelity to the College and obedience to its Statutes, to nominate that person whom they firmly believe to be the most orderly, the best proficient in his studies, who is legitimate and unmarried, and has not been expelled from any College; provided that he has been admitted to the degree of Bachelor of Arts. It matters not of what nation or kingdom he may be; and a native of France, if a member either of the University of Cambridge or Oxford, is specially recommended. Moreover, the election may be made indifferently from the Students of either University.

Restrictions on Fellowships.

The Fellow elect is immediately sworn that he has not a life interest in revenues of any kind, the annual value of which in all exceeds twice the annual value of a Fellowship in the College. He is also sworn to resign his Fellowship after he has been by right of inheritance, or by virtue of any will or gift, a whole year in quiet possession of annual revenues of more than twice the annual value of a Fellowship. But if he has been presented by the College to one of their own Benefices, however small in value, he must resign his Fellowship within a year of his induction to that Benefice, unless, when presented to it, he obtained leave from the College to hold his Fellowship together with the Benefice. His Fellowship becomes void on his marriage. He must proceed to the Degree of Master of Arts at the regular time. He is further sworn to maintain fidelity to the College, and to observe its Statutes. He also makes profession of his resolution to keep the Christian Faith and rule of life.

If the number of Fellows exceeds twelve, six of them must be in Holy orders; if less than twelve, four must be in Holy orders; and when there is not the proper number, the Senior Lay Fellow must either take Holy orders or resign his Fellowship within a year, unless some Junior Fellow chooses to take Holy orders.

A Fellow may not be absent from the College more than fifteen days in all jointly or separately in full term, or out of term above one month, without the Master's leave, on pain of forfeiting his Fellowship; but provision is made against unreasonable refusal of such leave.

Duties.

No special duties or services are enjoined upon the Fellows distinct from those which pertain to the several offices which they may happen to fill in the College, as of the Dean who has the care of the Chapel and control over the Students, so far as respects their attendance there; the Chaplain who, alternately with the Dean, reads the Morning and

Rev. G. Ainslie, D.D., Master of Pembroke College.

Evening Service in the Chapel; the Lecturer who attends to the business relating to Degrees; the Treasurer who attends to the management of the Property of the College; and the Bursar, who superintends the domestic expenditure.

Each Fellow has an independent vote in the Election of the Master, a Fellow or a Scholar and for the most part on all matters of government.

Emoluments.

The remark made on the subject of Stipends, Emoluments and Advantages in the case of the Master is equally applicable in the case of a Fellow, whether holding any office or not: it is declared however that each Fellow shall have rooms in the College.

Election of Scholars.

The Election of the Scholars rests entirely with the Master and Fellows. They are to be elected for their capacity and diligence, and are to hold their Scholarships during the pleasure of the Master and Fellows. During residence they are to have an allowance for Commons, which bears a fixed proportion to the allowance, whatever that may be, which a Fellow has for Commons. A preference is to be shown them in the Election into Fellowships.

2. There is a Fellowship in the College, which, although of a separate and distinct foundation, is entitled to all the privileges and advantages pertaining to a Fellowship of the Original Foundation. It was founded together with three Scholarships in the year 1583 by Archbishop Grindal, and special Statutes were given. These Statutes direct that in

Restrictions.

Elections of the Scholars a preference shall be shown to natives of Cumberland and Westmoreland educated at St. Begh's school in Cumberland, and that in Elections of the Fellow a preference shall be given to the said Scholars. They further direct that in all other respects the Fellows and Scholars on this Foundation shall be governed by the ordinary College Statutes. Both the founding of the Fellowship and Scholarships and the enacting of these special Statutes were sanctioned by Royal Letters Patent in 1585.

Bye-Fellowships.

There are also two Bye Fellowships not belonging to the Foundation, the one founded by William Smart in 1598 with a preference for those holding the Scholarships which he founded at the same time, as will presently appear; the other founded by Bishop Lany in 1675. These two Fellowships are regarded as merely honorary. They are severally entitled to a small Stipend, by the terms of their respective Foundations.

The three Scholarships founded by Archbishop Grindal have already been partially noticed. They, like his Fellowship, are entitled to all the privileges and advantages pertaining to Scholarships of the Original Foundation, although they do not belong to it. At present therefore the allowance to each is 28*l.* a year.

There are also many other Scholarships and Exhibitions, not of the Foundation, established and given by various Benefactors, of which the following is a list.

Eight Scholarships, of which seven were founded by Thomas Watts, D.D. in 1571 and increased by Bishop Andrewes in 1626, and one by Thomas James in 1632, with a fixed allowance of 25*l.* to be divided amongst them. These eight Scholars are now allowed 104*l.* amongst them.

Six Scholarships, of which two were founded in 1598 by William Smart, the Founder of one of the Bye Fellowships, as before mentioned, and four founded in 1601 by Ralph Scrivener in compliance with the directions of the said William Smart's widow, all for Scholars from the Free Grammar School at Ipswich. The former were to have 3*l.* a year each, the latter 5*l.* each; but they are all allowed 5*l.* each.

Six Scholarships founded by the Rev. Charles Parkin, of which five are intended for Scholars from Merchant Tailors' School in London, and one for a Scholar from Bowes School in Yorkshire. The rules and conditions are set out in Orders made by the Court of Chancery, April 27, 1773, and June 26, 1776.

Merchant Taylors' School.

The Claimants from Merchant Taylors' School are required to have been there four years, and there is a preference for such as are superannuated, that is for those who having failed of being elected as Scholars of St John's College, Oxford, at the usual time of election, June 11, are already in the condition of superannuated Scholars, by reason of their being of such an age as that at the next annual election or, to speak more precisely, on the Monday after June 24 in the next year they will be nineteen, and therefore no longer eligible into that College.

Bowes School.

The Claimant from Bowes School in Yorkshire is required to have been there two years immediately before his Election, or at least immediately before he removed from thence to one of the Universities.

These several Scholars are under obligation to reside nine months in each year; but besides being oppressive, this regulation was found to have ill effects, and the College do not now exact a longer residence from them than from other Students. Provided that they continue to keep the ordinary residence, they may hold their Scholarships for seven years from their first admission.

All these six Scholars come recommended from their Schools, and are elected by the Master of the College, who, if there is no fit claimant, is at liberty to elect persons educated elsewhere.

Allowance to Scholars.

The allowance to each Scholar was originally 30*l.* By the continual investment of allowances not made the College has gradually augmented them to 50*l.* each.

One Scholarship founded by William Stuart, D.D., for another Scholar from Merchant Taylors' School. The rules and conditions for this Scholarship are also set out in an Order made by the Court of Chancery, June 19, 1777.

The claimant must have been at the school five years and have been superannuated on June 11, the day of election. This Scholarship, like Mr. Parkin's, is tenable for seven years from admission, if ordinary residence is kept.

The allowance was originally 36*l.* a year. The College has gradually augmented it to 80*l.* a year.

Rev. G. Ainslie, D.D., Master of Pembroke College.

One Exhibition founded by John Holmes in 1568 for a Scholar from Blackrode School in Lancashire. The property, from which the allowance arises, is vested in the Trustees of the School. The allowance is at present 70*l.* a year.

Exhibitions.

Another Exhibition founded by Mr. William Simon Warren, being the interest of 100*l.* to be allowed to the same Scholar. The College allows him 5*l.* a year.

An indefinite number of Exhibitions founded by William Moses, Serjeant-at Law, for Scholars from Christ's Hospital. The allowance to each was originally 14*l.* It has been gradually augmented to 50*l.*

One Exhibition founded by Roger Long, D.D. It is an annual allowance of 6*l.*, and is at the disposal of the Master.

Besides these there are several small annual allowances, namely,

One of 3*l.* 6*s.* 8*d.*, given by William Marshall.

Another of 3*l.* 6*s.* 8*d.*, given by Jane Coxe.

Another of 6*l.*, given by Amy Livesey and Thomas Hobbs.

Two of 4*l.*, given by Robert Mapletoft, D.D., which have been doubled.

The College do not consider that the enjoyment of one Scholarship or Exhibition precludes a deserving person from holding others on different Foundations.

Admission of Students.

3. The Statutes contain no regulations whatever respecting the admission of Students over and above the Members of the Foundation.

College Chapel.

4. The morning service in the Chapel is at half-past nine on Sundays, and seven on other days; the evening service is at six every day. The regulation for attendance is that it should be twice on Sundays and once on other days. It is not deemed advisable to convert attendance in Chapel into a punishment. In the calculation of a Student's Residence the College do not allow any day to be counted as kept, during which he has not either attended the service in the Chapel or been present in the College Hall at the usual hour of dinner.

Course of Study.

5. The subjects of the Mathematical Lectures given to the Students of the first year are Arithmetic, Euclid, Algebra and Trigonometry.

There are five Lectures weekly. There are also five Lectures weekly in Classics.

The subjects of the Mathematical Lectures, given to the Students of the second year, are Conic Sections, Analytical Geometry, the Differential and Integral Calculus and Mechanics.

There are four Lectures weekly. There are also in every week four Lectures in Classics and one in the Greek Testament.

The subjects of the Mathematical Lectures given to the Students of the third year are Newton, Dynamics, Optics, Hydrostatics and Astronomy.

There are four Lectures weekly. There is also in every week one Lecture in the Greek Testament.

Subjects for composition in Greek and Latin prose and verse are given out every week.

The course of instruction always has respect to the University Examinations.

The Students of the second year have preparatory Examinations by way of exercise for the University Previous Examination; and the Students of the fourth year by way of exercise for the Final Examination for Degrees.

Three Fellows, and no others, are employed in giving the College Lectures.

There is one and only one General Examination. It is in Mathematics, Classics and the Greek Testament, and is held yearly in the Easter Term. It is conducted by the resident Fellows, who all voluntarily lend their assistance.

Rewards.

Small Prizes in books are given, as honours, to those who stand highest in the Classes: but the substantial rewards are the Scholarships, into which the best proficients are elected immediately after the Examination. Of these Scholarships an account has been given in answer to the second Query.

Attendance at Lectures;

6. Every Student is expected to attend all the Lectures proper to his class; is called to account by the Tutor for non-attendance; and subject to punishment for neglect.

At Dinner.

Every Student is expected to dine daily in the College Hall. If irregular, he is called to account, and is amenable to punishment. The Rule (mentioned in the Answer to the fourth Query) which directs that, in the calculation of a Student's Residence, no day shall be reckoned, as kept, unless he has either attended the service in Chapel or been present in the College Hall at the usual hour of dinner, has its due influence.

Expenses.

7. The *necessary* Expenses of a Pensioner, from the time of his first entrance to that of taking the degree of Bachelor of Arts, is 258*l.*; and of a Sizar 218*l.*

8. Independently of any payment for Private Tuition, the *actual* average expenses of a Pensioner during the same period are 305*l.*; and of a Sizar 265*l.*

Poor Students.

9. The Exhibitions, as before set forth, constitute the main provision in the College for poor Students.

The College consolidate the smaller, which amount to 28*l.* 13*s.* 4*d.*, add 7*l.* 6*s.* 8*d.* to them, and divide them into three Exhibitions of 12*l.* each for Sizars.

The Scholars from Christ's Hospital are allowed Commons, when admitted as Sizars; but there is always a strong disposition on the part of the Scholars themselves to avoid this, and it is some time since any one from that School was so admitted.

The College have a Fund formed from allowances not given to any Scholar, out of which a deserving Sizar is sometimes rewarded.

10. I do not know any means of reducing the expenses of Residence in the College or of further restraining habits of extravagance and facilities of credit.

11. Before giving my opinions on this and the two following Queries I beg leave

Rev. G. Ainslie, D.D., Master of Pembroke College.

to state that those opinions have the concurrence of all the Resident Fellows, nine in number.

It is my opinion that it would be highly expedient to relieve the College from several Endowments, which, though intended for its advantage, are very much the contrary.

Removal of Restrictions on Fellowships, Scholarships, &c.

The Grindal Fellowship founded by Archbishop Grindal, himself Master of the College, is a great grievance to it.

The Foundress of the College gave the Master and Fellows a free, clear and uncontrolled choice in the election of Fellows, but the Archbishop has bound them to elect a native of Cumberland or Westmoreland educated in St. Begh's School in Cumberland. The consequence is that the College cannot reject a candidate of very ordinary talents and acquirements, whom they might and would reject, if he were a candidate for a Foundation Fellowship.

It has been mentioned that the Archbishop also founded three Scholarships; but Scholars rarely come from the School, perhaps never except in expectation of a vacancy of the Fellowship. The School therefore scarcely derives any benefit, and the College suffers.

Perhaps an equitable arrangement might be effected between the College and the Governors of the School in consistence with the intention of the Founder to benefit both parties.

I am also of opinion that it is injurious to the College to have so many Scholars from Merchant Tailors' School and Christ's Hospital as are necessarily attracted by the largeness of the allowances made to them.

Among other objections is the repugnance on one hand to having many of them as Fellows of the College at the same time, lest the College itself should come to be a kind of appendage to the Schools, while on the other hand there is an equal repugnance to rejecting them, if deserving.

The College being a small one, the number of Scholars admitted from these two Schools forms a considerable portion of the whole number of Students.

It would be a great advantage to the Schools, if by means of an equitable arrangement they could have the liberty of sending Scholars with considerable Allowances to other Colleges.

With respect to the election to or tenure of the Foundation Fellowships or Scholarships, I know of no change, which in my opinion would be expedient in the proper sense of the word.

12 and 13. It has already been stated that Scholars rarely come from St. Begh's, although the allowance to each is 28*l.* a year.

Ipswich Scholarships.

The allowance to an Ipswich Scholar being only 5*l.* a year, Scholars rarely come from that School. The Ipswich Scholarships must not however be therefore regarded as ineffective, since the College gives them, in addition to other Scholarships, to those who deserve further reward. Yet as regards the School, which, as well as the College, was an object of the favour of the Founders of these Scholarships, they are ineffective; and I am of opinion on that account that it would be expedient to consolidate all the six, which are virtually of one and the same Foundation. Nor should I object, if the consolidated Scholarship were augmented by the addition of the Bye Fellowship of the same Foundation.

Since the issuing of the Commission the College have had an application from the Managers of the School for the consolidation of the Ipswich Scholarships. Pending the Commission, the College have not deemed it respectful to the Queen to entertain the proposal. In default of an heir to the Foundress the Crown is their Visitor. The College feel and acknowledge their obligations to her Majesty for having in compliance with their petition graciously sanctioned and confirmed in the year 1844 a New Body of Statutes revised by themselves; and they rely upon the continuance of the same gracious favour in furtherance of their endeavours to render their College subservient to the ends for which it was founded.

Pembroke College, *April* 5, 1851. (Signed) GILBERT AINSLIE, *Master.*

The Master and Fellows of Pembroke College.

Answers from the Master and Fellows of Pembroke College.

As direct answers to the queries proposed will not afford a correct view of the present state of the College, the Master and Fellows conceive that they shall meet the object of Her Majesty's Commissioners better by adopting a different course of explanation. The last of their beneficial leases of land expired at Michaelmas, 1849. The termination therefore of all such leases, coupled with the fact that neither has any fine upon houses been received nor any money been borrowed in lieu of one during the last fourteen years, enables them to render a perfectly plain account of their revenues by a mere statement of heir income and expenditure for the year ending at Michaelmas last.

Gross Income of the College.

Query 1. Gross income of the College derived from lands for the year ending at Lady-day, 1851 :—

	£.	s.	d.
Rack rents	4,726	11	4
Manorial fines and quit rents . .	477	6	3
Rent charges	166	7	11
Coppice and timber	49	15	9
	£5,420	1	3

The Master and Fellows of Pembroke College.

Query 2. Gross income derived from houses during the same period :—

	£.	s.	d.
Rack rents	336	19	4
Reserved rents under beneficial leases .	41	6	0
	£378	5	4

Gross Income of the College.

Query 3. Gross income derived from Tithe rent charges during the same period . . . £3,009 6 4

Query 4.

Deductions, and Net Receipts.

	Gross Receipts.			Deductions.			Net Receipts.

Income Tax	0	11	5			
				18	19	10
Scholarships				1,046	10	0
				£10,008	12	9

Bishop Lany's Bye-fellowship is endow ed with the dividend on 252*l.* Old South Sea Annuities; the other, Mr. Smart's, with a fixed perpetual stipend of 12*l.* payable out of an estate conveyed by him to the College.

Emoluments attached to Scholarships and Exhibitions.

The Master has already rendered to the Commissioners a detailed account of the emoluments and conditions attached to the Scholarships and Exhibitions; the College therefore now limits itself to the additional inquiry respecting the sources from which the allowances are derived and the present value of the estates or property constituting the endowment.

Class 1. Of the six Foundation Scholars and the three Grindal Scholars each is entitled, under the College and Grindal statutes, to three quarters of the allowance to a Fellow for commons. The present allowance to each scholar is 28*l.* and it is paid out of the general funds of the College.

Class 2. Of the six Ipswich Scholars two are endowed with fixed perpetual allowances of 3*l.* each, payable out of the estate from which the stipend of Mr. Smart's Bye-fellow is derived. That estate is now let for 50*l.* a year, and the residue of the rent falls into the general funds of the College. The College however, which in default of claimants from Ipswich School is authorized and used to bestow these Scholarships on any deserving Students, allows each of these Scholars 2*l.* a year additional, merely to put them on an equal footing with the rest of the Ipswich Scholars: for the other four Scholars are endowed with fixed perpetual allowances of 5*l.* each, payable out of a rent-charge of 21*l.*, the gift of Mr. Scrivener and issuing from an estate, which does not belong to the College: the remaining 1*l.* falls into the general funds of the College.

As to the eight Greek Scholars, of whom the four senior receive 14*l.* each and the four junior 12*l.* each, the allowances to seven of them, namely those founded by Dr. Watts, are derived from the rent of an estate now let for 55*l.* a year, and from rent-charges amounting to 52*l.* 17*s.* Part of the allowances to the four senior Scholars consists of 10*s.* a piece specially given to them by Bishop Andrewes. The allowance to the remaining Scholar, who is by foundation placed precisely on the same footing with those of Dr. Watts, is derived from the rent of a house in London devised to the College by Mr. James and now let on a beneficial lease at the annual reserved rent of 8*l.* The College is allowing the lease to run out, and the term will expire in 1863. On a recent valuation, made for the purpose of sale under an Act of Parliament passed for "the Improvement of the City of London," this house was estimated at 40*l.* a year.

In cases of vacancy in this class of Scholarships the allowances are paid into a fund for the future augmentation of those Scholarships, from which the accumulations may have been specially derived.

Class 3. The allowances of 50*l.* each to Mr. Parkin's six scholars are derived from dividends on funded property in the hands of the College, the present yearly amount of which is 362*l.* 2*s.* 4*d.*

That of 80*l.* to Dr. Stuart's Scholar is from like property, the present yearly amount of which is 83*l.* 3*s.* 6*d.*

That of 5*l.* to the Blackrode Scholar is the dividend on 166*l.* 13*s.* 4*d.* Old South Sea Annuities.

Those of 50*l.* each to the Christ's Hospital Exhibitioners are derived partly from a certain proportion of the rents of estates, which is at the present time 154*l.* 19*s.* 7*d.* and partly from a like proportion of dividends on funded property, which proportion now is 229*l.* 5*s.* 3*d.*

In cases of vacancy in this class the surplus of each foundation is from time to time invested in Government Stock for the benefit of that particular Foundation, to which it belongs.

Class 4. The allowance of 6*l.* to Dr. Long's Scholar is the dividend on 200*l.* Bank Annuities. The Master always bestows it upon a Sizar.

Sizars.

The allowances to three Sizars are derived partly from several rent-charges amounting to 12*l.* 13*s.* 4*d.*, and paid to the College out of estates not belonging to it, and partly from a distinct rent-charge of 8*l.* directed to be equally divided between two scholars and payable out of an estate devised to the College by Dr. Mapletoft. The College allows 12*l.* to each of the three, the remainder being supplied from its general funds.

All the estates and property, from which the above mentioned stipends and allowances to the Bye-fellows, Scholars and Exhibitioners are drawn, are administered by the general authorities of the College. Those Scholarships, which are at the free disposal of the College, are invariably and strictly bestowed according to merit. And the same may be said of such of Mr. Parkin's scholarships, as are, in default of claimants from Merchant Tailors and Bowes Schools, at the free disposal of the Master.

When the value of any estate from which such stipend or allowance is payable, has in-

The Master and Fellows of Pembroke College.

creased, the stipend or allowance has also been proportionally increased, if such appeared to be the intention of the donor. In reply to Query 12 some remarks will be made respecting the Ipswich Bye-fellowship and Scholarships.

Expenses of Fellows' and Scholars' tables.

The expense of the Fellows' table in the College Hall, so far merely as respects commons, is defrayed out of the general income of the College. The Scholars have the same Table as the rest of the Students and pay for their commons, for which indeed, under the direction of the College Statutes, the pecuniary allowances of the Foundation Scholars are specially assigned.

The whole allowance made for the maintenance of Sizars is as stated under the head of Scholarships, Class 4. Sizars are not recognized at all in the College Statutes; nor is there in the College any order of Sub-sizars.

Expense of Repairs.

The average annual expense of keeping up and repairing the Collegiate buildings is 141*l.* 10*s.* 11*d.*

The College has a rapidly growing Building fund, and purpose to rebuild the whole edifice so soon as they have sufficient means.

The average annual expense incurred in repairing the chancels of churches, in cases in which the College is impropriator or patron, is 61*l.* 5*s.* 3*d.*

The remaining particulars of this Query have been already answered in the pecuniary Accounts above given.

Beneficial Leases.

Query 9. All beneficial leases granted by the College of land have been run out. In some cases, though not in all, the Master and Fellows borrowed money in lieu of fines. They borrowed it from their Building fund, for which they have regularly paid and continue to pay interest at the rate of four per cent. per annum; and they are also paying off the debt itself by annual instalments. They have only granted two beneficial leases of houses; the one of the house in London alluded to in the reply to Query 8, which is running out; the other of four houses adjoining the College site, which is also running out. The Master and Fellows have not in either case borrowed or divided any money in lieu of a fine, nor have they any intention to do so.

Purchase of Advowsons.

Query 10. The College has an incipient fund, founded by a gift in 1842, for augmenting the poorer livings in their patronage by means of the annual proceeds of the fund. The present amount of invested capital is 300*l.* Consols. The accumulations of interest are invested from time to time.

Query 11. No addition has been made to the Collegiate buildings in recent years.

Alterations respecting Scholarships, &c.

Query 12. In respect to the question whether there are any Fellowships, Scholarships, or Exhibitions, attached to the College, in the conditions or application of which the Master and Fellows would think it advantageous to obtain alterations or modifications by competent authority, with the view of giving greater effect to the intention of the Founders and rendering them more practically beneficial, the Commissioners will have observed that the Master was authorized by the resident Fellows to express their concurrence in the statement made by him, April 5, 1851, in reply to the Queries 11, 12, and 13, put to him Dec. 20, 1850: and that statement comprehends all that the College has to say in direct reply to this Query. It considers that any alterations to be made in conditions mutually affecting the College and any School in connexion with it, of necessity require the concurrent consent of both parties. An obvious scheme presented itself as respected the Ipswich Bye-Fellowship and Scholarships, which it was thought would be secure of meeting with the approbation of the managers of the Ipswich School; but any such scheme must of course be preceded by discussion and arrangement with them. If a competent authority existed for the settlement of the several matters touched upon in the part of the Master's statement here referred to, the College would gladly endeavour to effect an equitable and satisfactory settlement with the Trustees, Governors, and Managers of the several Schools, with which it has any connexion, without losing sight of the design of the benefactors, who established that connexion with the intent to benefit both parties. The Master and Fellows entertain no doubt that the alterations, which they themselves desire, would be at once for the advantage of the College, of the Schools, and of all immediately interested in their well-being.

Schools which have appropriated Scholarships and Exhibitions.

Query 13. The Schools, which have appropriated Scholarships or Exhibitions in the College, are at Ipswich, St. Begh's in Cumberland, Blackrode in Lancashire, and Bowes in Yorkshire, also those of Merchant Tailors and Christ's Hospital in London. The Master and Fellows consider that the expediency of extending the range of eligibility is a question rather for the Governors of the Schools than for themselves to pronounce an opinion upon. They may be allowed, however, to say that such an extension would scarcely remedy the inconveniences sustained by the College under the existing state of things, which inconveniences have been explained by the Master in the part of his reply before referred to under Query 12. The Fellows have already signified their concurrence in the opinion expressed by him that "it would be a great advantage to the Schools, if by means of an equitable arrangement they could have the liberty of sending Scholars with considerable allowances to other Colleges." The Grindal foundation, comprehending one Fellowship and three Scholarships, all on a par with those of the original foundation, would require a more matured and special arrangement.

Query 14. The College does not consider that any re-adjustment by special authority of the revenues of property intended for the maintenance of its Scholars and Exhibitioners is necessary.

On behalf of the College,

Pembroke College, March 24, 1852. (Signed) GILBERT AINSLIE, *Master.*

W. H. Brown, Esq. M.A.

Pembroke College Library.

Pembroke College, Cambridge, 20 *Oct.*, 1851.

Superintendence of the Library.

The care of the Library of Pembroke College, is, by the College Statutes, deputed to two Fellows, holding respectively the offices of Treasurer and Bursar, but more particularly to the latter, who is specially elected into the office of Librarian, an office which entails upon him the general supervision of the Library, and does not require towards its due performance the assistance of any subordinate officer.

The Catalogue.

The Catalogue is in manuscript, and contains an account of all the Books in the Library, arranged according to the alphabetical order of the authors' names, as far as this plan is practicable. The Books are marked each with three numbers, describing (1) the Class, (2) the Shelf, (3) the order on the Shelf of every Volume. These numbers are so registered against the titles of the Books in the Catalogue, that by reference to it any required Volume may be found with ease. The room is well ventilated, and sufficient for its purpose, but no portion of it is fire-proof.

Funds.

The Funds appropriated to the use of the Library, consist of special bequests (which have been made without conditions, with the exception of a bequest of 100*l.*, made a few years since for the purchase of Modern Books), together with the contribution of 1*l.* from every member of the College proceeding to the degree of M.A., and keeping his name on the Boards. These receipts being very small, and subject to fluctuation, the outlay is correspondingly so.

Number of Books.

The number of Books in the Library rather exceeds 10,000. It contains no MSS. of any great value, nor any such printed volumes, except the Florentine edition of Homer, (A.D. 1478).

It is provided with excellent editions of most of the standard works in the English language, in all departments of Literature; is well supplied with the older editions of the Latin and Greek authors, but is especially rich in works on Divinity. It contains very few Mathematical works of more modern date.

Admission.

The Library is open to the free use of the Master and Fellows, the Fellow-Commoners, and resident Masters in Arts; and also to the use of all Members of the College, in *statu pupillari*, upon application made by such Members to any resident Fellow. Members of other Colleges, and strangers, can gain access to the Library for the purposes of reference, through the same channel. It is, however, provided by the Statutes, that no Book shall be taken beyond the College, unless by special license, granted by the Master and majority of resident Fellows.

(Signed) WILLIAM HAIG BROWN, M.A., *Librarian.*

Rev. Benedict Chapman, D.D., Master of Gonville and Caius College.

Answers from the Rev. Benedict Chapman, D.D., Master of Gonville and Caius College.

Foundation of the College.

Gonville and Caius College was originally founded in 1348 by the Rev. Edmund Gonville, Rector of Terrington, in Norfolk, who, dying before he had fully executed his kind and liberal intention, left, it is said, a large sum of money to the Right Rev. Wm. Bateman, Bishop of Norwich, to perfect the foundation he had commenced. The bishop gave us a body of statutes for the government of the College.

The original intention was to have founded 20 Fellowships, but we have only three of the old foundation.

Gonville, a country rector, was a great promoter of sound learning and religious education, for, independent of Gonville Hall, he established one religious foundation at Rushworth, in Norfolk, and another at Ipswich. They were both dissolved, I believe, in the time of Henry VIII.; and, from Blomfield's "History of Norfolk," I learn that the estate at Rushworth was granted to the Earl of Surrey. It would have been better to have given it to his College of Gonville Hall, which was at that time very badly endowed.

Gonville must, I suspect, have been a learned as well as a good man, and moreover, a good judge of other persons' merits; for the first Master of Gonville Hall appointed by him was Mr. John Colton, a native of his own parish of Terrington, who afterwards justified his patron's appointment by succeeding by his talents to the Primacy, and afterwards to the Chancellorship of Ireland.

Our first foundation seems not to have been legally established, and therefore Dr. Caius, about 1554, procured a new charter. Between Bishop Bateman's founding the three Fellowships and Dr. Caius's foundation, six other Fellowships were founded by six different individuals. Dr. Caius confirmed all these nine Fellowships, and founded three more, and the Master and these 12 Fellows now constitute the present governing body of the College.

Statutes.

Bishop Bateman, in his statutes, gave the Master and a majority of the Fellows *the sole power* of governing and carrying on the concerns of the College. He gave the Master the power of expelling, or otherwise punishing, any Fellow who had been guilty of any offence, with the approbation of a majority of the Fellows; but if the Master was the offender, then two-thirds of the Fellows might appeal to the Chancellor of the University: but even this power was carefully controlled, as the Chancellor was to summon "duos Rectores Universitatis et duos Doctores Regentes," as his assessors; and the Master and *every member of the College is restricted from appealing to any court, either ecclesiastical or civil, without the express consent of the major part of the society.*

Dr. Caius gave us a body of statutes, which may be considered as supplemental to the bishop's, which he confirmed, and which seem to have had no legal force till they were so confirmed; and he seems studiously to have avoided all contradictions to the bishop's statutes. They were strictly additions, or supplemental statutes.

Rev. Benedict Chapman, D.D., Master of Gonville and Caius College.

The bishop had appointed no general visitors. The Chancellor's power had reference only to the Master's offences, or his appointment. Dr. Caius supplied this deficiency.

He appointed the Master of Corpus, the Master of Trinity Hall, and the Senior Doctor in Physic as our visitors; but then this appointment was quite consistent with the bishop's statutes, for he gave them no power to interfere till they were appealed to, with the consent of the Master and major part of the Fellows. They seem to have been constituted as a kind of *council to the College*, to give advice *when required, but not till then.*

Visitors.

As both sets of statutes, which it is my duty to obey, as far as the change of circumstances during 500 years will permit, *so strongly enjoin the Master and Fellows not to suffer any interference with our foundations and regulations by any authority whatever unasked;* and as I am informed that some of our most learned lawyers are of opinion that this Commission is "*not constitutional or legal, and that it is not such as the University or its members are bound to obey,*" I feel great reluctance to answer any of the questions which have been sent to me by the University Commissioners; but as Her Majesty has been advised to issue the Commission, as a loyal subject of Her Majesty, I return the following answers to the questions dated December 20, 1850, *out of an unfeigned respect to the Crown, under a strong and earnest protest against the exercise of such a power.*

Government of the College.

1. Gonville and Caius College is governed by the regulations of the two codes of statutes mentioned in the above preliminary remarks, as far as the changes which have taken place in the manners and habits of society, and the change in the mode of education during the long interval of 500 years, when the first statutes were given, will properly allow.

Election of the Master.

The Master is elected by a majority of the existing Fellows at the time of the vacancy of the Mastership; and if a majority cannot agree on an election within one month, the right of nomination, according to the conditions in the statutes, devolves on the Chancellor of the University. He may be a clergyman or a layman, and with the degree of M.A. at least, and one who is, or has been, a Fellow, and at least 30 years of age, and born in Norfolk, if a person so qualified for the office can be found, and if not, then one born in Suffolk. He vacates his office only by cession, or death, unless removed by proper authority.

Election of Fellows.

When a Fellowship is vacant it should be filled up within a month; for that purpose the Master calls the Fellows to a scrutiny. If a majority elect an individual, the Master must sanction his election, before he is pronounced to be elected; and if a majority do not agree on any person, then, after a month from the vacancy, the choice devolves on the Master. Fellows vacate their Fellowships by marriage, or at the end of a year after institution to an ecclesiastical benefice, or on being deposed by the Master, with the sanction of a majority of the Fellows. The statutable absence of the Master and Fellows, by Bishop Bateman's statutes, was only a month in the year. When Fellows mixed more in the world vacations were established, the duration of terms assigned, and the scholars were permitted to be absent during the vacations. The Fellows were allowed, by a College order, six weeks' additional absence in the summer half-year to the month allowed by the statute, and six weeks' more in the winter half-year; and those Fellows whose absence exceeded those allowances forfeited their share of the corn-rents. This was a proper alteration, occasioned by a change in the habits of the University; but in 1833 an order was made to extend the leave of absence to ten weeks in the winter half-year, and sixteen in the summer half-year, without forfeiting their share in the corn-rents, which, in my opinion, was a bad alteration, the former allowance being amply sufficient for recreation and change of scene. Provided there are resident Fellows enough to conduct the business of the College, more are not necessary, and the rest may be better employed in pursuing the studies and duties of their respective professions in the world; the Master, however, has the power to summon the Fellows into residence in College, when their services are required, and of course would do so.

Duties of Master and Fellows.

The duties of the Master and Fellows are to attend to the general interest of the College, the discipline and improvement, both in morals and learning, of the students, and all acts of the corporate body must be sanctioned by the Master and a majority of the Fellows.

Stipends.

The Master has a double stipend to that of the foundation Fellows, whose stipends vary very little one from another. We pay for our commons, and in some degree for our rooms, but those Fellows who keep a certain quantity of residence, instead of having commons allowed them, as is customary in many or most colleges, divide with the Master the corn-rents, which constitute a part of the reserved rents.

The stipends have kept increasing as the income of the College improved, which it necessarily must, independent of any advance in our rents, for we do not divide the surplus at the audit, after having paid all outgoings, as I have understood is the custom of some Colleges, but invest it, and the interest of such investments is then at the disposal of the Master and Fellows.

Restrictions on Fellowships.

There are some restrictions on some of the Fellowships as to places of birth and profession.

The three Fellows on the first foundation are unrestricted, as is generally considered, though Bishop Bateman, in one of his statutes, says, "in electione sociorum, scholares nostræ diocæsis preferantur."

The 4th. Is open to all counties, but must be in priest's orders.

The 5th. Is open to all counties, but must be in priest's orders.

The 6th. Must be born in the Norwich diocese, and in priest's orders.

The 7th. Unrestricted as to place of birth, but must be in priest's orders.

The 8th. Unrestricted as to place of birth, but must study either Theology or Medicine.

The 9th. Must he born in the Norwich diocese and in priest's orders.

The 10th, 11th, and 12th. Founded by Dr. Caius; two must study Medicine, and one Theology, and all must be natives of Norfolk.

The six Fellowships mentioned as having been founded between the time of Bishop Bateman and Dr. Caius, had separate estates left for their foundation. They were thrown into what the

Rev. Benedict Chapman, D.D., Master of Gonville and Caius College.

lawyers call "Hodge Podge," and made a common fund for the College, so that the value of the 12 Senior Fellowships vary but very little from each other.

2. Since Dr. Caius established the College by a new Charter, we have had many Bye-Fellowships, Scholarships and Exhibitions established, *and principally by members of the College, out of gratitude to the Society, in which they had received their education, and for many other benefits of the Foundation which had been enjoyed by them.*

Bye-Fellowships.

The first Bye-Fellowship was founded in 1559, during the Mastership of Dr. Caius, by *Dr. Wendy, President of the College,* and physician to Henry VIII., Edward VI., Philip and Mary, and Elizabeth; and whoever enjoys it must have been born in the Norwich diocese, and be in holy orders.

In 1586, Mrs. Frankland and William Saxey, her son, founded six Bye-Fellowships without any restrictions.

In 1635, Mr. Matthew Stokys, *Fellow of the College,* founded a Bye-Fellowship for one in priest's orders.

All the above are elected in the same manner as the 12 Foundation Fellows.

In 1615, Stephen Perse, Doctor in Physic, and *Fellow of the College, founded six Bye-Fellowships,* open, without restriction as to profession and place of birth, but with a preference in favour of his own scholars; these are elected by the Master and four senior Fellows.

In 1742, Mr. Wortley, *sometime Fellow of the College, and afterwards rector of Bratton Fleming, in Devonshire, in the patronage of the College,* founded three Bye-Fellowships; to one of these a native of North Devon, or the son of the rector of Bratton Fleming, wherever born, has a claim; another is confined to a native of Norfolk.

Scholarships.

We have numerous Scholarships, varying from 2*l.* to 60*l.*

The scholars are proposed by the Master, but the election afterwards is with the Fellows: they may reject the nomination of the Master.

Some of the scholars may be otherwise appointed, but very few, and of small value.

Exhibitions.

The Exhibitions are commonly held with Scholarships; some are in the gift of the Master, and others in that of the Master and Fellows.

Admission of Students.

3. The students are admitted by the Master under one of the Fellows, who is called the Tutor or Sponsor, and either after examination, or from a certificate from the Master under whom they are educated. The Tutor is Sponsor as to his debts to the College Steward and servants; the Fellow Commoners, whether Graduates or not, are admitted also by the Master, under a Sponsor, in the same manner as Pensioners; but their admission is signed by all the Senior Fellows in College, and any one of them may object to the admission of any individual.

Regulations of College Chapel.

4. That I might be accurate as to the questions in this article, I have referred to the Deans, under whose control this department of discipline is, who have returned me the following answers:—

1st. That divine service is performed daily in the College Chapel at half-past seven A.M., and at six P.M. On Sundays the morning service is at half-past nine; on Wednesdays and Fridays, at a quarter before eight.

In the vacations, there is not always daily service except during that portion of the long vacation in which Undergraduates are allowed to reside, and then there is daily morning service, and evening service on Sundays.

In the shorter vacations, the number of services has been regulated by the number in residence.

The regulation of the College is, that every Undergraduate should attend chapel once every day, and twice on Sundays; it is always rigidly enforced during the first year of residence; but it has not been the practice to enforce more than six weekly attendances on the Junior and Senior Sophs, though none are excused from double attendance on Sundays. About one-third of the Undergraduates do attend oftener than the College Regulations require.

Attendance at Dinner.

2nd. The Undergraduates are marked in the Hall; but the attendance at dinner is so very regular, that it scarcely ever occurs that any one is reprimanded on that score. Nevertheless, the marking is of use, as it may occasionally prevent an Undergraduate from running into expensive habits.

College gates closed.

3rd. The gates are shut at 10; any Undergraduate out frequently after that time, or once only after one A.M., would be called before the College authorities.

The above was signed by C. Eyres, Senior Dean, and J. M. Croker, Junior Dean.

5. That I might be accurate on the subjects in this article, I have referred it to the Tutor, who has enabled me to make the following statement:—

Course of instruction.

The yearly course of collegiate instruction is as follows;—

First as to classics and theology,—

The Freshmen are lectured and examined in one Greek and one Latin author, one of the Gospels, one or more of the Epistles, and in Scripture doctrine.

The *Junior Sophs* are lectured and examined in one Greek and one Latin author, one of the Gospels, one or more of the Epistles, Moral Philosophy, Scripture doctrine, and Paley's Evidences. The classical subjects are generally the same as those for the previous examination.

The *Senior Sophs* are lectured and examined in one or more of the Epistles; and those who are not candidates for honours, in the classical subjects for the ordinary B.A. degree.

Medical Students are directed in their studies by the Medical Lecturer.

The *Hebrew Lectures* are given by the Hebrew Lecturer: the class consists chiefly of those who have taken their B.A. degree.

There are classical lectures for practice in composition three times in each week during the three terms, for men of all years, and all degrees of proficiency.

Rev. Benedict Chapman, D.D., Master of Gonville and Caius College.

In Mathematics:—

Freshmen are lectured and examined in Euclid, Geometrical Conic Sections, Arithmetic, Algebra, Trigonometry, and Analytical Conic Sections.

Junior Sophs are lectured and examined in Differential and Integral Calculus, Statics, Theory of Equations, 1, 2, 3, &c. sections of Newton, Dynamics, and Geometry of three dimensions.

Senior Sophs are lectured and examined in Optics, Astronomy, Hydrostatics, and Dynamics.

The Questionists are examined twice a week during the October term in one or more of the subjects required in the Senate House examinations.

The enclosed printed paper has been sent to Students admitted for residence next year: a similar one has been sent each past year:—

"The following are the subjects of Lectures for Freshmen of the ensuing Academical year:—

"*Michaelmas Term.*—Euclid (Simpson's, or Potts'.) Demosthenis Leptines. St. Matthew's Gospel.

"*Lent Term.*—Algebra (Wood's, edited by Lund.) Virg. George III. IV. Epistle of St. Paul to the Romans. Christian Doctrine (Vol. II. of Tomline's Elements of Theology.)

"*Easter Term.*—Trigonometry (Hymers', or Snowball's). Conic Sections (Hymers', or O'Brien's Analytical, or Goodwin's Geometrical). Goodwin's Elementary Course is made an introduction to each subject.

"There are Classical Lectures, for practice in Composition, three times in the week through each Term.

"The Lectures will commence on Friday, October 17.

"There will be an Examination in the Classical and Theological subjects at the end of March, 1852, and in Mathematics at the beginning of the following June.

"*Gonville and Caius College, February*, 1851. CHARLES CLAYTON, *M.A., Tutor.*"

Lectures.

Those who are candidates for mathematical honours, whether of the second or third years, are lectured twice in the week in one or other of the mathematical subjects enumerated in the Cambridge University Calendar.

Eight persons are employed in giving College Lectures, seven of whom are Fellows; and the eighth has lately ceased to be a Fellow, but has consented to continue his Lectures for the present year, being resident in the town.

We have several Examinations of the Students during the course of the year.

Examinations.

The *Junior Sophs* and *Freshmen* are examined in Classics and Theology at the end of the Lent Term, when all are classed according to their respective merits. There are two prizes in books, to the amount of five and three guineas, given to the two best in each year; and if the second and third come very near, the Master has given a third prize, if recommended by the Examiners.

All the three years are examined in Mathematics at the division of the Easter Term, when prizes in books, to the same amount as for the Classical Examination, are given to the two best among the Junior Sophs, and also to the two best among the Freshmen.

There is an examination in Theology for the third year at the end of the Lent Term, and the division of the Easter Term, when prizes in books are given to those in the first class who may merit them.

There is an examination of the Junior Sophs in Moral Philosophy, at the division of the Easter Term, when to the first in order of merit the Master gives an Exhibition of 18*l.*

There is an examination in Anatomy and Physiology early in May by our two Medical Fellows, if in residence, when a Scholarship on Dr. Caius' Foundation is assigned to the individual who passes the best examination, provided it is a creditable one.

There is an examination in Chemistry about the same time, when the Chemical Exhibition, of the value of 20*l.*, is given to the best proficient in Chemistry to be held for a year, provided he has passed a creditable examination.

These examinations are all conducted by the Fellows of the College, and the vacant Scholarships are given to the students, according to the aggregate merits of the students at the Classical and Mathematical Examinations.

We have 14 Fellows resident in College, all of whom have either collegiate offices, are employed in public tuition, or have private pupils.

Attendance at College Lectures.

6. If students omit attendance at College Lectures, they are immediately sent for and reprimanded or punished (by imposition or otherwise), according to the nature of the offence. The next two Queries have been already answered in No. 4.

Expenses.

7. At page 39 of the University Calendar for 1850, the expenses for tuition, rooms, &c., are accurately stated at 35*l.* 2*s.* 4*d.*; to this sum must be added the commons out of the kitchens and the necessary requisites out of the butlery.

The following seem to be the usual expenses for a prudent man for himself per diem.; bread and butter for breakfast, 3½*d.*; meat and vegetables at dinner, and bread, 1*s.* 3*d.*; waiters, 1*d.*; total per diem. as necessary articles, 1*s.* 7½*d.*, for breakfast and dinner; if a student wishes for pudding or pastry, or cheese, or ale, he has to pay accordingly.

I see no possible means for reducing the above necessary expenses; indeed the cost to the College in having the above charges so reasonable is considerable, as the foundation pays the expenses of many things, such as the wages to the servants employed in the kitchen and buttery, things necessary for the table of the students in the halls, as linen, plate, knives, forks, dinner-plates and dishes, &c., and all kitchen utensils, coals, &c., and I do not see how the students can be fed at less expense.

8. The Tutor informs me, that many students go through their whole College course for 300*l.* or 400*l.*, including every expense except that for private tuition.

Poor Scholars.

9. There is a general preference given to poor scholars in our statutes, but it is *cæteris*

Rev. Benedict Chapman, D.D., Master of Gonville and Caius College.

paribus; and as we give our scholarships according to merit, as shown at the two annual examinations, the poor scholars are but little if at all benefited by that preference. Dr. Belward, Master of the College, who died in 1803, left 10 shares in the Grand Junction Canal, which at one time paid good dividends to the College: we were to pay the dividends to a distant relation during her life, and after her death, which occurred in 1842, he charged the dividends with the payment of 56*l.* a-year to four poor scholars born in Norfolk, and 4*l.* to other objects, and the excess, above 60*l.*, was to go to increase the Master's stipend. I received the excess, above 60*l.*, for four half-years, and then the excess vanished; and now the dividends are not sufficient to pay each scholar 14*l.* a-year, as was intended. They are in the gift of the Master, and I have been in doubt whether I shall reduce the number or the value of them; in disposing of them, I have been guided by the wants, having also some reference to the moral and studious habits of the individuals. I have suggested some regulations respecting them, which in time will, I trust, raise them up again to 14*l.*, and even increase them above that sum.

Extravagance.

10. From what has been already stated, it may be inferred that I see no possible means for reducing the *necessary* expenses of a College residence. The further restraining of habits of extravagance and facilities of credit, I fear is not practicable but by an Act of the Legislature. Our Tutor, in his observations to me, says, that "University legislation on the subject will be found inoperative," and I am fully inclined to think so. There is a decree of the Vice-Chancellor and Heads of Colleges, February 11, 1847, to discommune every tradesman who suffered a student to incur a debt exceeding 5*l.* without giving notice to the Tutor of his College at the end of the quarter: the Bishop of Chester is aware of this, as he was probably one of the Heads who signed it. There are objections against this plan, in my opinion, and I fear it has little effect, though it is occasionally put it force. Over those tradesmen whose bills the Tutors take in and pay, they have full power; *but if their bills are not taken in with the view of being paid by them*, I hardly see the propriety of insisting on their being sent in.

Perhaps it may be useful to the Commissioners for me to state two instances of abuse in tradesmen giving very dishonest credit.

While I was Tutor of Caius College, I had a bill sent me by the guardian of one of my pupils for things furnished him by a saddler in Cambridge to the amount, if I recollect right—and it is about 40 years since, I suspect—of upwards of 80*l.*, though he had never kept a horse: I strongly urged him not to pay it, as it must have been known to the tradesman that the gentleman had never kept a horse. There were several saddles, a dozen pair of spurs, and numerous whips of all kinds. They were bills of that kind which I never took in for my pupils, as being for what was unnecessary. The guardian did not take my advice, but paid it, and probably through me; in which case I have no doubt I gave the saddler a pretty strong reproof for what appeared to me an act of gross dishonesty.

Since I have been Master of Caius College, a poor clergyman who had been educated here 46 years since, and whom I remembered, wrote to complain of the difficulty he was involved in by the extravagance of his son, who had taken his degree previous to my returning to College on being elected Master. A wine-merchant had allowed him to run up a bill to the amount of 130*l.* in his three years, without, I think, ever having insisted on any payment whatever from him. I advised him not to pay a shilling of the bill, as it was not for necessaries; but it turned out that the son had paid 30*l.*, and after he was of age had acknowledged the debt by giving a promissory note to pay the 100*l.*, and a writ was threatened by an attorney here, which occasioned the father's letter to me. The son had married with this debt hanging over him, had then one child, with little if any more income than that of a curacy, to maintain himself and family. The father proposed to pay the 100*l.* by instalments in four years, to which the wine-merchant strongly objected. I told him he ought to think himself very fortunate if he got it in that manner, for his conduct was most disgraceful to him in continuing to give him credit for so long a period; that he must do as he thought best, but that if the writ were issued, the case should be laid before the Heads of Colleges. He at last consented, and about two years after I saw an advertisement in a county paper, stating that the father had assigned over his effects to an attorney for the benefit of his creditors; I then thought it right to inform the wine-merchant of this, so I sent for him to inquire whether he had received any of the instalments, and he told me he had not. I had heard that the son had been living in this neighbourhood in great distress with a wife and large family; and while I was drawing up the above statement, I received a letter from a clergyman stating that this unhappy young man had been for a long time in the most wretched state of poverty, with a wife and nine children; that he was about to go to Australia with all his family, and that his kind neighbours, to whom he must have been a perfect stranger I should think when he first went there, were endeavouring, by the gift of clothes and money, to send them out; and I have been requested to assist in this charitable object.

This readiness to give credit is most disgraceful to some of the Cambridge tradesmen, and the respectable ones complain of the injury it occasions them, for in consequence of the students not being able to get credit for things above 5*l.* value, without the account being sent in to the Tutor, there is a set of tailors, &c., from London who regularly come down, I am informed, for orders, who will give credit if those who live here will not.

How these great evils can be prevented I cannot well see; a youth under age is not responsible for his debts, nor his father, I believe, except for necessaries. The promissory note for 100*l.* I have mentioned is no better than a fraud, and ought to be made illegal, for it is on such chances, and the high prices charged, that tradesmen rely. They sometimes bring actions against parents for their children's debts incurred at the University; and I have seen charges from a judge reported, which appeared to me as an encouragement to their giving improper credit, and verdicts were given consequently, by a willing jury, in favour of the tradesman.

Removal of restric-

11. It is my most decided opinion that nothing will justify the removing of appropriations,

limitations, or restrictions now affecting elections into Fellowships, Scholarships, or Exhibitions in my College but the impossibility of carrying them into effect. We stand in the situation of executors of the wills of our founders, and have been sworn to act accordingly: for instance, Dr. Caius directed that two Fellows on his foundation should be physicians and one in holy orders, and all born in the county of Norfolk, no very confined limits; and that, if we had not members so qualified in our own College to hold them, we should look for them in any other College, and that the directions given in all bye foundations should be strictly attended to. *Rev. Benedict Chapman, D. D., Master of Gonville and Caius College.* — tions on Fellowships, &c.

12. I am not aware of any Scholarships that have become ineffective through want of claimants.

13. Some of our bye Fellowships are inadequate to the maintenance of a Fellow, but as they are held commonly, *though not necessarily*, as introductory to a foundation Fellowship, at a time of life when young men are able to obtain an increase of income by other means, it would be highly disadvantageous to the society to have the number diminished in order to increase their income.

Between my ceasing to be Fellow and being elected Master of the College, there was a consolidation of some of the smaller Scholarships, which I should have objected to had I been Master at the time. The plan was afterwards modified, at my suggestion, but I should have preferred their remaining separated, as originally founded.

Archbishop Parker gave the College 60*l.* 13*s.* 4*d.*, to found a Scholarship, and one was founded with the annual stipend of 3*l.* 0*s.* 8*d.* It requires three or four such Scholarships to make even a decent stipend; and, in my judgment, they were of more service to the College when separate. I know that parents are always gratified by their sons having a Scholarship, however small may be the amount. If a founder told me that he intended leaving 100*l.* a-year for scholars, and asked me whether it should be for one or more, I should certainly advise that it should be for five or ten, and I should prefer the latter. Two or three only would contend for the 100*l.* a-year, whereas, perhaps three or more would contend for each of the ten as they became vacant in succession, and thus give a stimulus to a greater number of students.

(Signed) BENEDICT CHAPMAN, D.D.,
Master of Gonville and Caius College.

Gonville and Caius College Library.

1. The Library is under the care of a Librarian who is appointed from among the Fellows by the Master. There is a statute which directs that he should take care that the books should neither be lost nor injured; and he is in other respects to be governed by College orders. One of the scholars is an assistant Librarian, who assists the principal Librarian when requisite. The Librarian.

There is no regular attendance of the Librarians, as the Master and Fellows have always ready access to the Library; and if any of the scholars wish for any books out of the Library, they may have them by application to any Fellow, or to the Librarians, in whose presence, and under whose name they must be taken out.

2. There is a Manuscript Catalogue, but its contents have been lately transferred to an interleaved copy of the printed Bodleian Library Catalogue. Catalogue.

The books are arranged in classes, and the Library is well ventilated by having windows opposite to each other, opening to the east and west; but it is not now of sufficient dimensions, and unfortunately there is no possibility of enlarging it; there is no part of it fireproof. The books have all class marks, and are easily found.

3. We have had many bequests and gifts of books; Mr. Moore, formerly Fellow of the College, gave us a great collection of choice manuscripts, and we are indebted to a Mr. Knight for the county visitations. We are necessarily limited as to the purchase of new books from the want of room to put them in. Mr. Fairclough gave the College 3*l.* a year for buying books; and a certain part of the admission fees are appropriated by the College to the Library; the average amount from that source for the last seven years has been nearly 27*l.* The expenses of the Library cannot well be ascertained, as the bookseller's bills entered in the Bursar's account-book will not inform us, as they contain many other articles besides what probably belong to the Library; except the two sources of income above mentioned, the Library depends on the general funds of the College, commonly called the College Chest. Bequests. Expenses.

4. The number of printed books may be about 14,300; the number of manuscript volumes, 700; we have lately printed a very excellent Catalogue of our manuscripts, arranged by our late Librarian, the Rev. John James Smith, assisted by our present Librarian, the Rev. W. R. Collett; the heraldic visitations of some of the counties are considered as very valuable; we have printed another Catalogue of the early printed books in our Library; this was compiled by our present Librarian, the Rev. W. R. Collett, and the two Catalogues have occasioned the College considerable expense, as copies have been liberally given of both Catalogues to all public Libraries known to us in Oxford, London, Dublin, and some of the Scotch Universities; and they are open to the public generally by purchase. Number of Books and MSS.

Dr. Legge, who succeeded to the Mastership on the resignation of Dr. Caius, gave us a valuable collection of civil law books; and being peculiarly a medical College, we have of course a collection of medical books; but as before observed, we are limited in our purchases of modern books by the want of room in our Library.

5. The Library is accessible to the different members of the College through the Admission.

Rev. Benedict Chapman, D.D., Master of Gonville and Caius College.

Fellows and Librarians. The members of other Colleges may have access through the same means for "the purposes of special reference or research."

I will enclose a printed statement of the rules and regulations for the MSS. and locked-up classes in our Library, under art. 5 of it. Mr. Archdeacon Hale some little time since had three folio volumes of MSS. sent to him at the Charter House, having previously given a bond for 90*l.* to return them uninjured; they have since been returned, and his bond restored to him. The members of the Heralds' College have occasionally applied to me for information respecting the county visitations we possess, and have come down to inspect them, when every facility was given them for research consistent with the printed rules that shall be enclosed with these remarks.

(Signed) BENEDICT CHAPMAN, D.D.,
Master of Gonville and Caius College, Cambridge.

Extracts from the Rules and Regulations for the MSS. and locked-up classes in Caius College Library.

2. No person whose name is not on the College Boards, and who is not known to the Librarian, shall be allowed to inspect or transcribe from any manuscript whatever, unless he either obtains a written permission from the Master or some one of the Senior Fellows, or is accompanied by one of them, who by signing his name shall witness the person's signature in the book kept for that purpose.

3. No person who is not a Fellow of the College shall be allowed to transcribe from any manuscript but in the presence of the Master, one of the Senior Fellows, or the Librarian, or one of the Fellows acting as his deputy.

5. No manuscript whatever shall be taken out of the Library without a written permission from the Master and two Senior Fellows, or from three Senior Fellows, nor (unless the MS. be required by a Fellow of the College for his sole use) without a bond given by the borrowers to the College to return it uninjured within a certain time to be specified in the permission under a penalty to be named by the Librarian, which shall in no case be less than 20*l.*

6. No MS. which is illuminated, or which contains original letters or genealogical or heraldic papers, shall be taken out of the Library on any account whatever.

9. Every volume taken out from the MSS. and locked-up classes shall be returned on quarter days under the penalty of five shillings..... the penalty to be repeated every fortnight until the volume shall be returned.

T. C. Geldart, Esq., M.A., Master of Trinity Hall.

Answers from T. C. Geldart, Esq., M.A., Master of Trinity Hall.

Foundation of the College.

The King's Charter for the founding of this College bears date November 20, an. 24 Ed. III., A.D. 1350.

The Literæ Fundationis bear date Jan. 15, 1350. They were confirmed by the Bishop of Ely Jan. 20, 1350, and by the Chancellor of the University of Cambridge Jan. 21, 1350.

From these it appears that William Bateman, Bishop of Norwich, proceeded to found—"Unum perpetuum Collegium Scholarium Juris Canonici et Civilis,—ad cultusque divini ac Scientiæ Canonicæ et Civilis, Universitatis que Cantabrigiensis augmentum necnon ad commodum, regimen et directionem reipublicæ et specialiter dictæ nostræ ecclesiæ nostræque diœceseos Norvicensis."

The Statutes which Bishop Bateman gave to the College bear date June 1st, 1352, were confirmed by the Archbishop of Canterbury Dec. 1st, 1352, and afterwards by the University of Cambridge, Dec. 9th, 1352.

Bishop Bateman afterwards added an explanatory Statute concerning elections, &c., bearing date August 14th, 1354.

He designed (as appears by the Statutes) to have founded a Master and 20 Fellows (Canonistæ and Legistæ), besides two or three Scholars, but dying before he had completed his designed foundation (A.D. 1355), left what was thought sufficient only for the maintenance of a Master, three Fellows, and two Scholars.

The Founder's Statutes for the government of the College (with which, up to the time of the Reformation, the practice corresponded in all particulars) give the following directions respecting the Head, Fellows, and Scholars of the Foundation.

The Head.

The Head.

Mode of Appointment, Qualifications for, and Restrictions upon Elections.—In case of vacancy by death, resignation, or otherwise, an election of a new Master is to be made by the Fellows within a month's time.

The Fellows are to proceed to the election by scrutiny, and the consent of the major part of them is required.

If the vacancy occurs in Term time the resident Fellows are to wait for those absent from College for ten days from the time of vacancy. If the vacancy occurs during vacation, the resident Fellows are to wait for the absent for the remainder of the vacation, and further for ten days after the commencement of Term.

The Fellows are directed to elect one of their own body, if such person may be considered as fit for the Mastership, and provided also that he be a Doctor or Bachelor in Canon or Civil Law, "Vel etiam Magister in Artibus famosus."

Otherwise the Fellows may elect any other person studying in the University out of the College, under the same restrictions as to degree. *T. C. Geldart, Esq., M.A., Master of Trinity Hall.*

It is declared that the Chancellor of the University shall not have any power to dispute the election of the Master made by the Fellows, and that he shall, "absque causæ cognitione," approve of the person so elected.

But if the election be not made within the month, then the appointment of a Master devolves to the Chancellor, subject to the like restrictions as to degree,

The Master is to declare, as soon as he is elected, whether he will be Legista or Canonista, and he is to continue in the line in which he has taken his Doctorate.

Fellows.

Mode of Appointment.—In case of a Fellowship becoming vacant by death, resignation, or otherwise, a free election is to be made within a month, by consent of the major part of the Master and Fellows. Fellows.

The Master's vote not necessarily forming one of such major part.

After the lapse of a month, if no election be made, the right of appointment devolves for that time to the Master.

The same restrictions are made as to the time to be allowed to the absent Fellows to come into the College in case of the vacancy occurring in or out of Term time, as in the case of the Master.

Qualifications and Restrictions upon Election.—The number of Fellows was to be twenty, (but owing to the death of the Founder before he had completed his endowments, only two Fellowships were founded)—of these ten at least were to be Legistæ, and seven at least to be Canonistæ, so that if at any time the Legistæ change their study to that of Canon Law there shall not be more than ten Canonistæ at most, and, in want of Canonist Fellows, thirteen Legistæ at most. Qualifications and restrictions.

If a vacancy occur of a Legista there is to be elected a Bachelor of Civil Law, or one who has studied the same for three years, a Master of Arts, or a Bachelor of Arts, within one year, if necessary, as M.A.

If a vacancy occur of a Canonista, then, if there be not seven Presbyter Canonists in College, any one of the Legista Fellows who may wish to study Canon Law, and become Presbyter may be elected into the vacant place.

Otherwise any other person may be chosen from Cambridge or any other University, under the same restrictions as above.

If there be seven Presbyter Canonists in College, then either a Legist or Canonist may be elected into the vacancy, as shall appear best to the major part of the College, unless one of the Legists be desirous to change to Canonist, in which case he is to be admitted Canonist, provided the limit fixed upon the number of the Canonists allow this.

In election to Fellowships preference is to be given—

(1.) To Scholars of the College.
(2.) To Scholars of the Hall of Annunciation.
(3.) To Scholars from the Norwich diocese.
(4.) To Scholars from the University of Cambridge or any other University.

Preference is to be given, *cæteris paribus*, to the poorer before the richer.

The Canonist Fellows were required to go into Holy Orders within one year of the day of their admission to a Canonist Fellowship.

Special clerical duties are assigned to the Presbyter Fellows:—

Certain restrictions are imposed respecting the Fellows incepting *in utroque jure*, and the continuing of Doctors *in utroque jure*.

Fellows may, if Doctor in any Faculty, hold any preferment, "*sine curâ*," not exceeding 10*l.* in yearly value.

If they be not Doctors they must not hold preferment exceeding 10 marks in yearly value.

Those who hold preferment greater than this must vacate their Fellowships in one year; but the Master may hold any church preferment whatever. Religious observances according to the ritual of that time are enjoined.

Stipends, Emoluments, and Advantages.—The Literæ Fundationis mention that the Founder intended to endow the College with such revenues as might enable the "*personas Collegii*" to advance in the science "*utriusque juris*," and to obtain in all future time the necessaries of life. Stipends, emoluments, and advantages.

By the Statutes a stipend of 10 marks per annum is assigned to the Custos, 8 marks to such of the Fellows as are in Priests' orders, and 7 marks per annum to the rest.

Small sums of money are likewise to be distributed on certain feast days. Most of the benefactors enjoin a like distribution, generally at Christmas or on the Feast of the Epiphany.

There is no restriction as to the time of tenure, or as to the income with which a Fellowship may be held.

Fellows are not to be so entirely occupied in pleading causes as to be prevented studying Law, Civil or Canon. They are to act as Counsel for the Bishops of Norwich, "*pro competenti salario*."

The Statutes contain provisions for the removal of the Master and Fellows in case of their becoming unfit for or unworthy of their office.

Length of Residence required of Masters and Fellows.—The Statutes direct that a Fellow shall not, without the consent of the Master, and that the Master shall not, without the consent of two "Sanior aut Senior" Fellows, remain a night out of College. Leave of absence is not to be refused when reasonable cause is given; nor in granting such leave of absence, Residence required of Master and Fellows.

T. C. Geldart, Esq., M.A., Master of Trinity Hall.

especially in vacation times, is too great difficulty to be interposed; but neither the Master nor any Fellow is to be absent, except during the usual vacations for more than one month in each year, "nisi pro negotiis Collegii, aut aliis propriis causis necessariis."

Scholars.

Scholars.

According to the Founder's Additional Statute two of the scholars (de minori formâ) were to be elected as soon as convenient, and the number was to be increased to seven when the College had sufficient means. They were to study Civil Law and to perform the following duties:—

Duties.

1. To read the Sacred Scriptures in mensâ.
2. To minister to the Presbyter Fellows in Chapel.
3. To wait at table in Hall.

They were to have no voice in elections, and they are bound to the observance of the Statutes of the College in the same manner as the rest of the Society.

Election.

No restrictions are laid down with respect to their election.

For the performance of the above duties the scholars were to receive "pro omnibus necessariis" three marks per annum, but had no share in the bounties distributed on the feast days.

Simon Dalling, A.D. 1453, gave to the College certain lands and tenements, to found therewith two Canonist Fellows and one Scholar, to be (under certain regulations) nominated by himself during his own life time, and to be associated in perpetuity with the Fellows of the Foundation.

According to special Statutes, made by the Master and Fellows, and given in the College books, the mode of election (in case of vacancy) is, after Simon Dalling's death, to be the same as that prescribed in the Founder's Statutes. Certain religious duties are to be performed by the two Fellows and Scholars on this Foundation. The anniversary is to be kept and certain sums are to be paid to the Master and Fellows present.

Robert Goodknape, A.D. 1508, gave certain lands and tenements to the College, to found and maintain with the proceeds one Fellow, to be in Priest's Orders, according to the special Statutes, framed by the Master and Fellows, of the date 1508, A.D., and given in the College books.

The Fellow on Goodknape's Foundation is to have perfectly equal right with every other Fellow and Priest, and is to be bound to observe the Founder's Statutes.

He is to be maintained out of the proceeds of Goodknape's benefaction, and if at any future time these diminish in consequence of fire or any other misfortune, a less stipend is to be assigned, so that the College be not prejudiced.

Walter Hewke, by will, dated A.D 1518, gives certain tenements in Cambridge to the Master and Fellows on condition that they maintain one perpetual Priest Secular, who is to have all manner of profits, rights, and vantages in the said College as any other Canonist, Priest, and Fellow hath or shall have in time to come—yearly in all things.

He is also to bear all manner of suffrages, prayers, and charges, as other Fellows (Canonist Priests) of the said College do or shall do.

He is to study Civil or Canon Law or both to the intent that he may proceed to the Doctorate.

The election (in case of vacancy) is to be made by the Master and major part of the Fellows, and preference is to be given to Scholars of the College (before all other), who must be of five years study in the Canon or Civil Law or Arts.

Mr. Spicer gave to the College 83*l.* 6*s.* 8*d.* to maintain therewith one Scholar, who is to be chosen by the Master and Fellows.

1st. From the school of Cokefield.
2nd. From Clare Hall, Ikkylington, Hyngston.
3rd. From Catherine Hall.

The Scholar is to have as much as any other Scholar, and 6*s.* 8*d.*, and his lectures freely above all other.

To the above effect there is an indenture made between the Master and Fellows and Mr. Spicer.

Richard Nicke, Bishop of Norwich, A.D. 1557, gave certain property to the College sufficient to maintain three Fellows, of which one was to be Civilistæ, two were to be Canonistæ, who were to proceed to Priest's Orders within one year from the day of their admission.

Also two Scholars.

In case of vacancies election is to be made of new Fellows or Scholars by consent of the major part of the Fellows, within one month from the time of vacancy, otherwise the election is to devolve to the Master.

Choice is to be made of persons who shall appear fit "tam moribus quam scientiâ," but no other restriction is imposed.

The anniversary of Bishop Nicke is to be celebrated, and on that day certain payments are to be made to his own Fellows and Scholars.

In the Statutes given by Bishop Nicke mention is made at great length of the specific duties which are to be performed by his Fellows and Scholars.

They are to attend chapel regularly, and to perform Church Services, and read the prayers according to the custom of the Church.

Laurence Moptyd, A.D. 1558, gave to the College 60*l.* for the founding of one Scholarship.

T. C. Geldart. Esq., M.A., Master of Trinity Hall.

The Scholar to be one from the diocese of Norwich, and brought up by the space of two years at least in the common schools of Ipswich or Bury.

To be allowed 2*l.* 13*s.* 4*d.* per annum, with all other commodities that other Scholars enjoy.

Scholars.

The Decretum Erectionis, by the Master and Fellows of the College, bears date June 18, 1558.

Gabriel Dunne, A.D. 1560, left to the College 120*l.*, with which the Master and Fellows, according to the Decretum Erectionis, dated January 30, 1560, founded one Scholarship. The Scholar to have 12*d.* per week, and all other emoluments which other Scholars of the House have.

Dr. Hervey, A.D. 1562, gave to the College certain lands to support two Scholars.

Each Scholar to have 1*s.* per week, together with all other emoluments which the rest of the Scholars enjoy.

The Ordinatio Fundationis, by the Master and Fellows, bears date December 20, 1562.

Dr. Busby, A.D. 1577, left to the College 53*l.* for the maintenance of two poor Scholars from Suffolk, to receive each 6*d.* per week, to be preferred (cæteris paribus) before all other Scholars to the Foundation Scholarships "de minori formâ." The order of the Master and Fellows concerning this Foundation bears date October 1, 1577.

The College, May 21, 1581, founded a supernumerary Fellowship.

It appears that the income of the College had so increased as to be considered sufficient to increase the number of the Fellows, in accordance with a Statute of the Founder, entitled "De numero augendo."

No Deed of Foundation can be found.

William Mowse, A.D. 1586, gave by will to the College the sum of 400*l.*, to buy lands of the yearly value of 20*l.*, to be settled on Trinity Hall, for the maintenance of as many Fellows and Scholars as, according to the rate of Fellowships and Scholarships then, 20*l.* would maintain.

The College founded accordingly one Fellowship and one Scholarship. No Deed of Foundation can be found.

Archbishop Parker gave to the College 60*l.* 13*s.* 4*d.* for the founding of one Scholarship for the study of the Civil Law. Such Scholar to have yearly 3*l.* 0*s.* 8*d.*, or 1*s.* 2*d.* per week. To be chosen from his own Scholars at Corpus Christi College, and from Norwich school (if any of these scholars so will) according to an indenture, dated 9 Eliz., June 24.

No deduction to be made from the above yearly salary for his chamber or domestical reading.

Dr. Allen, by will, dated 1730, gave the reversion of an estate (Assington) to found two Scholarships of 10*l.* per annum, more or less. In election to these Scholarships, when vacant, preference is to be given—

1. To Founder's (Dr. Allen) nearest kindred.
2. To Scholars from Richmond School, in Yorkshire.
3. To Scholars from any other school in Yorkshire.
4. To Scholars from Diocese of Norwich.
5. To Scholars from town or county of Cambridge.

The College came into possession of this property in 1781, and the Scholarships were then established.

Dr. Chetwode, A.D. 1734, gave 150*l.* to the College to found a Scholarship for the due attendance of a Scholar in taking care of the chapel.

A.D. 1704, Mrs. Oxenden, widow of Dr. Oxenden, in compliance with his intentions, gave 150*l.* to found a Scholarship, to be held by a Scholar of the College, in addition to any other Scholarship, and preference is to be given, first to a Kentish clergyman's son, then to the sons of clergymen in general.

Supplemental or Bye Fellowship.

Bye-Fellowships.

In the year 1821 Horatio Goodbehere left to the College, subject to a life interest, funded property producing nearly 100*l.* per annum, for the purpose of founding a Fellowship, in such terms as they might think best.

On coming into possession of the property in the year 1849, the Society thought that the efficiency and well-being of the College would be best promoted by making this a Clerical Fellowship, and requiring residence for the greater part of each Term.

It must be filled up within six months of a vacancy, or the appointment lapses to the Master.

Any Graduate in Arts may be elected, or Student in Civil Law who has performed the exercises for the LL.B. degree.

If a layman be elected, he must take Orders within a year.

The Goodbehere Fellow is also, when resident, allowed rooms rent free, and a payment of 2*s.* per diem.

Changes of Practice.—Head and Fellows.

Changes of Practice —Head and Fellows

In the year 1405 the commons of the Fellows were increased from 1*s.* to 1*s.* 6*d.* per week by a faculty from Bishop Arundel.

In the 37th year of the reign of Henry VIII. the College was visited by Archbishop Parker and others, by whom a Declaratio Status Collegii was drawn up.

According to this it appears that the various Fellows were Presbyters, Canonistæ, and

T. C. Geldart, Esq., M.A., Master of Trinity Hall.

Changes of Practice. —Head and Fellows.

Legistæ, according to the injunctions of the several Founders. The annual money payments were all regulated by the Statutes of Bishop Bateman.

At this period the granting of Degrees in Canon Law and its public study were prohibited by the King: by this means all the injunctions in our Statutes referring to the Canonistæ became impracticable.

The Canonist combined the characters of priest and lawyer, and the profession having ceased to exist which admitted such combination, it became necessary for the Society to decide what the Canonist Fellows were to become.

Henceforth, with the exception of two Presbyters, they became Legistæ or Civilistæ, though in the time of Queen Mary the Canonistæ reappear.

Our earliest perfect register of Fellows commences with the year 1557. It begins with a list of eight Fellows with their professions, Canonistæ or Legistæ, assigned, but after this we hear nothing more of Canonistæ; this agrees with the supposition that they only reappeared during the time of Queen Mary. Henry VIIIth's Acts, with respect to the Canon Law, were repealed by Queen Mary, and re-enacted in the first year of Elizabeth.

From the proceedings of the Commission under Bishop Ridley, we find also that in 1549 great inconvenience was sustained from the want of Civilians. It is stated that the abolition of the study of Canon Law had affected the faculty of Civil Law, and that sufficient Civilians could not be obtained to attend embassies; an attempt was in consequence made to unite some other Colleges to Trinity Hall, but this failed.

An Act of Parliament was obtained (probably through the influence of Archbishop Parker) in the first year of Elizabeth, confirming the title of the College to its possessions against "all cavillation."

It would appear that at the time this Act was obtained, the change with respect to the Canonistæ had taken place, and this Act must have seemed to the College and to Archbishop Parker, who visited Cambridge some years after and founded a Scholarship at Trinity Hall, as setting the matter at rest.

About this time the College obtained a lease of Mountjoy House, in Doctors Commons, probably as a residence for the Civilians, all legal business being gradually transferred to London.

The designation Civilista is occasionally appended to the names of the Fellows after 1557, and sometimes that of Presbyter.

The practice from the time of the accession of Queen Elizabeth to the present day, does not seem to have varied materially.

Present Practice.—Head and Fellows.

Present Practice.— Head and Fellows.

At present the mode of appointment, the qualification for and restrictions upon election of the Master and Fellows, are precisely in accordance with the Statutes.

The late Master, and many of his predecessors, have held judicial appointments at Doctors' Commons.

Of the twelve Foundation Fellows, ten are laymen and generally engaged in practice at the Bar, or as Advocates in Doctors' Commons, two are in orders and are the Tutors of the College.

The Master and Foundation Fellows regularly assemble in College at Christmas time, when the College accounts are audited, and business relating to the College and its estates is transacted. Special meetings also take place when necessary.

Each Fellow must in turn take the office of Bursar, and he is then necessarily resident at certain seasons.

The two Foundation Fellows in orders are regularly in residence, as is also the Goodbehere Fellow. One of the lay Fellows is resident, and acts as Law Lecturer.

The other lay Fellows, except at the times aforesaid, are not resident.

The Statutes contain no restriction as to the time of holding the Fellowships, but according to practice they become vacated by marriage or resignation (of which there are several instances), or by taking Church preferment beyond the value prescribed by the Statutes.

The Master receives the same stipend as each of the Fellows, and also certain allowances and benefactions of small aggregate value.

Each Fellow has received for some years past, and now receives, a stipend of 150*l.* a year.

The Master and Fellows, when in residence, receive an additional allowance of 2*s.* a day.

The two Tutors, besides this allowance of 2*s.* a day have their rooms rent free.

The Goodbehere Fellow receives the same emolument in his capacity of Assistant Tutor.

A Latin Oration is delivered annually at the commemoration of the Founder and Benefactors by each of the Fellows in turn, for which he receives 3*l.* 6*s.* 8*d.*, and a like sum is paid to each of the Fellows present at Commemoration and the Feast of the Epiphany.

Scholarships, &c.

Scholarships, &c.

In the Declaratio Status Collegii made in the reign of Henry VIII., the Scholarships are denoted by the names of their respective Founders, and the stipends of the Scholars are of the amount stated in the Deeds of Foundation, that is to say, 10*d.* or 1*s.* a week. In the registers of admissions to Scholarships up to about the year 1610, the particular Foundation, and the value, which was then also 1*s.* or 10*d.* per week, is specified; after this we have no further mention of the value, and the Foundation is rarely stated. The last specification is that of a Scholar from Norwich with Archbishop Parker's Scholarship, which was then of more value than the others, as a money payment was made to it. This occurs about 1635. After this the allowances seem to have been equalized, and it is no longer possible to assign all the Scholarships severally to their particular Founders.

T. C. Geldart, Esq., M.A., Master of Trinity Hall.

In 1791 all the Scholars received 2*s.* per week during residence, and 7*s.* 6*d.* at Christmas without distinction.

The emoluments were then increased to 5*s.* 3*d.* per week, and the Christmas payment was abolished, they remained thus till the year 1828, when they were further raised to 4 guineas per term, and two sums of 20*l.* were assigned annually to the most deserving.

Scholarships, &c.

In the year 1833 three of the Scholarships were raised to 20*l.* per annum.

There are 16 Scholarships, including the two founded by Dr. Allen. Some of the Scholarships were, in the year 1840, largely augmented, and the arrangements then made still exist.

	£.	*s.*	*d.*
Three were raised to the annual value of . .	52	10	0
Three ,, ,, . .	31	10	0
The eight remaining ones continued to be worth .	12	12	0

The 20*l.* rewards were then abolished.

One of the First Class of Scholarships and one of the Second Class are awarded annually to the Students who obtain the first and second places respectively in the College Examinations of the first year, and some of the 12*l.* 12*s.* Scholarships, the number depending upon the vacancies and the merits of the candidates, are awarded to those who come next in order of merit,

Scholarships of the latter class may also be obtained in the second year.

Dr. Allen's Scholarships.

The two Scholarships on Dr. Allen's Foundation remain distinct. Their value was, A.D. 1781, when the College obtained possession of the estate, 10*l.* per annum. It was afterwards raised to 12*l.* 12*s.*, and is now 18*l.* per annum. They are given away at the same time as the other Scholarships. The order of preference enjoined by the will of Dr. Allen is observed, but no claimant is elected unless his attainments be respectable.

Dr. Allen's Scholarships.

Chetwoode and Oxenden Exhibition.

The interest of the money bequeathed by Dr. Chetwoode and Sir George Oxenden, for the purpose, together with a small money payment, and an allowance for commons from the College, make up an Exhibition, to which the duties of Chapel Clerk are attached; but many of the services required of him by the wills of the founders are dispensed with. This office, the whole value of which is about 30*l.* per annum, is disposed of yearly, and is given to one of the more distinguished of those who obtain Scholarships at the end of the first year. In compliance with the will of Sir George Oxenden, a certain preference is given to the sons of clergymen,

Chetwoode and Oxenden Exhibition.

Duration of Tenure.

The Scholarships are all tenable from the time of election until the period when the holder would in the ordinary course proceed to the degree of B.A. Thus, if obtained at the end of the first year, as usual, the emoluments are receivable for two years and one term.

Duration of tenure of Scholarships.

Law Studentships.

In the year 1849 the Society, in order to promote the purposes of the Foundation, established some Law Studentships to assist meritorious and distinguished Students of the College, who, having completed the usual residence for a B.A. or LL.B. Degree, are prosecuting their studies with a view to practising at the Bar or as Advocates at Doctors' Commons.

Law Studentships.

These Studentships are of the annual value of 50*l.*, and are tenable, according to circumstances, for two or three years. It is intended that one shall be at the disposition of the College in each year.

Graduates in Arts and such Students in Civil Law as have performed the exercises requisite for the Degree of LL.B., are eligible to those Studentships in the conferring of which the Society is guided by the places of the candidates in any of the four University Triposes, in the Classes of the Professor of Laws, and by any University or College distinctions they may have obtained.

(3.) Bishop Bateman, in his original Statutes, does not mention Scholarships, nor does he make provision for any Scholars (except in his additional or Explanatory Statute, dated A.D. 1354). He directs that there shall be 21 Fellows, of whom one shall be Master, and that no person shall be admitted to make any continuous stay with them without the unanimous consent of all the Fellows, nor can any person remain longer than is allowed by the like consent. The words of the Statute in this respect are—"Nullusque alius non Socius Collegii ad faciendam cum eis moram per aliquos dies continuam admittatur absque omnium Sociorum assensu concordi, nec cum eis ulterius moram faciat quam de omnium unanimi sociorum voluntate procedat."

Bishop Bateman's Statutes do not, except as aforesaid, allude to the admission of any persons or Students over and above the Members of the Foundation. The same observation applies to the Heads of Foundation of the several benefactors.

According to the present practice, Noblemen, Fellow Commoners, Pensioners and Ten-year Men are admitted on the Boards of the College, and previously to the admission of any person it is required that he should produce a testimonial from an M.A. or LL.B. of Oxford or Cambridge to the effect that he is well conducted and of sufficient attainments to enter on the ordinary course of University instruction.

T. C. Geldart, Esq., M.A., Master of Trinity Hall.

Law Studentships.

(4.) Divine service is performed twice a day during full term time. The morning service is at half past 7 o'clock, the evening service is at half past 5 o'clock. On Sundays the morning service is at 9 o'clock, the evening service is at 6 o'clock. Members of the college in *statu pupillari* are required to attend twice on Sundays, and once on every other day of the week.

Neglect of these duties is met by expostulation or admonition. A Student so offending would also incur certain fixed penalties, and in the case of continued irregularity severer measures would be taken.

(5.) The course of instruction given at this College is regulated with a view to afford the best preparation for the Public Examinations of the University.

The number and character of the lectures are adapted as much as possible to the wants of the different classes of Students, so as to obviate the necessity of their having recourse to the assistance of a Private Tutor.

Any Student can also obtain from the Tutors advice and assistance as to his private reading.

The lectures in Classics and Divinity are given upon those subjects which are fixed by the University for the previous Examination and that for the ordinary B.A. Degree.

Such Students as desire it are exercised in Classical Composition.

The lectures in Mathematics and Natural Philosophy comprise the subjects which are required for the Mathematical Tripos, as well as those an acquaintance with which is expected from the Candidates for an Ordinary Degree.

(1.) The number of Fellows employed in giving College Lectures is four, viz.:—

The two Clerical Fellows on the original and engrafted Foundations, who are the Tutors.

The Clerical fellow on the Goodbehere Foundation, who is Assistant Tutor.

A Lay Fellow, who gives Lectures and Examinations in Civil Law and the theoretical part of the Common Law.

(2.) The number of College General Examinations is at present two in the course of each year. The subjects of them are the same as those of the College Lectures.

The first Examination takes place at the end of the Lent Term, before the commencement of the previous Examination, and is attended by the Students of the first and second year only. It comprises subjects in Divinity and Classical Literature, chosen as above stated, some Elementary Mathematics, and Classical Composition. It is conducted by the Fellows who are in residence, partly *vivâ voce*, partly by printed papers. It occupies three days.

The second Examination takes place at the end of the Easter Term. It is attended by the different classes of Students of all years, excepting such as having passed their second Lent College Examination have declared their intention of proceeding in Laws, and who are in attendance on the Lectures of the Regius Professor of Laws and those of the College Law Lecturer.

The Candidates for Mathematical Honours of the second and third years are then examined in the subjects on which College Lectures have been given during the three previous terms.

A paper, consisting chiefly of Problems and Examples in the whole range of the subjects usually read is also given.

The Students of the first year are examined in Euclid, Books I.—VI., and Book XI. to prop. 21, Algebra and Trigonometry, together with one classical subject on which they have been lectured. Some Latin Composition is likewise introduced.

Candidates for the ordinary Degree of the third year are examined in the Latin subject appointed for their Degree, and in elementary Mathematics.

This examination lasts two days.

Students who are in attendance on the Lectures of the Regius Professor of Laws undergo an examination in Law and History in the Easter Term, the subjects being chosen with regard to the lectures of the Professors, and a prize is awarded to the best proficient.

Rewards, &c.

Rewards, &c.

(3.) The Scholarships, and the Exhibition, with the Law Studentships, and ultimately the Fellowships, are the chief rewards for proficiency, and in addition, prizes in books to the amount of 5*l.* 5*s.* and 3*l.* 3*s.* are awarded to the two most distinguished Students both of the first and second year at the College Examinations.

A prize of value 3*l.* 3*s.* may also be obtained by candidates for Mathematical Honours in their second and third years.

Prizes are also given both to Students of the second and third years for the best Latin and English Essays upon certain subjects proposed.

Attendance on Lectures, &c.

Attendance on Lectures, &c.

(6.) All Students are required during the first five terms of their academical course, to attend five Classical Lectures, and from four to six Mathematical Lectures every week.

They have opportunities of attending some of the Lecturers on certain evenings in the week, either for instruction in composition or to obtain assistance in any mathematical subject they may be reading more advanced than that in which the lectures are given, but such attendance is optional.

During the fifth term of their residence Students have to attend two examinations weekly in the Divinity subjects required for the previous examination by the University.

After the fifth term candidates for Mathematical Honours have to attend a lecture every day or every other day.

Candidates for the ordinary B.A. Degree attend three lectures weekly in elementary

T. C. Geldart, Esq., M.A., Master of Trinity Hall.

Mathematics and Natural Philosophy during their sixth, seventh, and eighth terms. (By the new University regulations they will then be engaged with professional lectures and examinations.)

In their ninth term they attend three Classical Lectures weekly in addition to the Mathematical Lectures.

In their tenth term they have to attend examinations twice a week in the whole range of subjects required for their degree, and their performances are reviewed by the Lecturers.

Students who declare their intention of proceeding in Law after their previous examination, are consigned to the charge of the College Law Lecturer, whose lectures and examinations they attend.

Any who fail to comply with the above regulations incur admonition and more serious punishment if the offence be repeated.

Attendance in Hall.

Attendance in Hall.

Undergraduates are expected to be present at dinner in Hall every day. Any one frequently absenting himself would incur the censure of the authorities, and some part of the time he had resided might not be counted towards his term.

Undergraduates are required, under certain penalties, to be within the College or in their licensed lodgings before 10 o'clock at night. Any serious breach of this regulation is visited specially with punishment at the discretion of the Master and Fellows.

Regulations of Discipline as to the Expenses of the Student.

Discipline as to Expenses, &c.

At this College no Tradesmen's Bills privately incurred by the Student are paid by the Tutors. But a list of the amounts of the same, when above 5*l.*, is forwarded to the parents, that they may be aware of the expenses of their sons. Many bills of less amount are likewise forwarded.

The Tutors impress upon the parents the importance of seeing that these bills are regularly discharged.

If any bill is of extravagant amount the attention of the parent is specially called to it.

The tradesmen are obliged to send in their accounts quarterly when above 5*l.*, and in case of any infraction of this rule, a tradesman is liable to be discommuned, the effect of which is, that all Undergraduates are forbidden to deal with him. This regulation is strictly enforced, and is found to work well.

Undergraduates are also frequently advised to settle their bills at the end of the quarter.

Any Undergraduate having a large amount of bills unpaid, is not allowed by the College to take his Degree until they are paid.

A tradesman would be liable to be discommuned if he took any legal proceedings against a person *in statu pupillari* without first endeavouring to obtain a settlement by sending notice of his claims to the Tutor.

Nothing can be furnished to any Undergraduate in private from the College Cook, when he has an account with him which has been outstanding more than one quarter.

Undergraduates are required to send written orders to the Cook specifying exactly what they require, which orders are delivered to the Tutor at the end of the quarter.

No considerable entertainment can be given without a special order to the Cook from one of the Tutors.

Necessary Expenses of a Fellow Commoner and Pensioner.

(7.) The necessary expenses of a Fellow Commoner and Pensioner, comprising College tuition, rooms, rent, meals, and attendants, the quarterly payments to the College and University, coals, washing, and all other incidental expenses, are on an average as follows :—

	£.	*s.*	*d.*	
For Fellow Commoners . .	90	0	0	per annum.
,, Pensioners . . .	65	6	1	,,

The items of the latter account are for 25 weeks residence, namely :—

	£.	*s.*	*d.*
Dinners in Hall, 10*s.* 6*d.* } per week . . .	20	8	4
Breakfast and tea, 5*s.* 10*d.* }			
Rent of rooms, which includes the expenses of papering, painting, taxes, &c.	12	0	0
Coals	3	15	3
Attendance	6	7	0
College and University payments and detriments . .	7	7	6
Laundress	5	8	0
Tuition	10	0	0
Total	£65	6	1

The Entrance Fee is 4*l.* for every Fellow Commoner.
,, ,, is 3*l.* for every Pensioner.
The College Fee for the B.A. Degree is 2*l.* for all classes.
The Fees payable to the Government and the University upon Matriculation and Degree are the same at all Colleges.

(8.) The actual average expenses of a Fellow Commoner, as shown by the College accounts, inclusive of wine in the Combination-room, and occasionally in Hall, together with the wine which Fellow Commoners are allowed the privilege of obtaining from the College cellars for use in their own rooms, amount to 144*l.* 14*s.* 1*d.*

T. C. Geldart, Esq. M.A., Master of Trinity Hall.

Expenses.

The average expenses of the six pensioners, who have resided the full academical year, and whose bills are the smallest, amount to 77*l.* 12*s.* 6*d.*

The like average in the case of the six whose bills are the highest, is 93*l.* 15*s.*

These averages include expenses arising under all the heads mentioned above, together with the extra bills of the cook and butler, or a portion of them, not exceeding 6*l.* and 3*l.* respectively, per Term, for Fellow Commoners, 4*l.* and 2*l.* for Pensioners; such amounts being included in the College bills. The above averages do not include the grocer's bill for tea, sugar, candles, &c., which varies from 5*l.* to 9*l.* per annum; nor the booksellers, or any expenses for clothing. They do not include any allowance for private tutors; the proportion of men at this College who have recourse to private tuition for their assistance is not large.

If a Student live with his family in Cambridge his College accounts amount to about 34*l.* per annum.

The Tutors have reason to believe that the whole annual sum of money spent by a Student at this College in Cambridge ranges (for a Pensioner from 150*l.* to 200*l.*) but this amount does not include the expense of keeping a horse, and no Undergraduate is allowed to keep one unless his parent or guardian signify his permission to the Tutors.

Poor Scholars.

(9.) There is no provision in this College for the maintenance of poor students beyond the Scholarships and Exhibition which has been already mentioned.

(10.) The price of commons, &c., is dependant upon that of provisions, and therefore has of late decreased; every exertion is made by the Steward to keep the necessary expenses as low as possible, but as they are now at the same level as Collegiate establishments in cheaper parts of the country, it is not likely that any considerable reduction can be made.

Extravagance.

The University measures enacted some years ago have been, to a certain extent, useful in restraining habits of extravagance.

It is, however, a subject of regret to the authorities of the College that the tradesmen of the town cannot be generally induced to comply, "*bonâ fide*," with the University rule, which requires them to send in to the Tutors quarterly notice of the bills which have been incurred by the Students.

There is a difficulty in obtaining compliance with this rule by tradesmen, who may be considered as local tradesmen, more especially in the case of livery stable keepers and fruiterers.

This difficulty is still further increased in the case of London tradesmen (especially tailors), who, since the establishment of railroads, have opened branch shops in the University.

The power of discommuning tradesmen is not sufficient to enforce observance of this rule, and the result is that the Tutors are unable to ascertain and check so fully as is desirable the expenses of their pupils.

Some legislative enactment is desirable for the purpose of "further restraining habits of extravagance and facilities of credit."

Various modes might be suggested to effect this object.

Limitations on Scholarships.

(11.) The only limitations here existing are those attached to the Allen Scholarships, and these are so wide that no practical inconvenience has been felt.

The College has always felt aggrieved at its members being debarred from becoming candidates for the Scholarships founded by Dr. Bell; even if there ever should have been any ground for such exclusion, it exists no longer, and the advantages which the Oxenden Exhibition offers to the sons of clergymen is neutralized from this College, being excepted from sharing in the benefaction of Dr. Bell.

(12.) No Scholarships have become ineffective through default of claimants. The same number exists as were founded, and they are given away according to merit.

(13.) Many of the Scholarships have been so far augmented as to furnish a considerable help towards maintenance, and it is not thought necessary to have recourse to any consolidation.

New Statutes.

Within the last fifty years the Society has frequently entertained the idea of obtaining new Statutes in conformity with their practice.

The great impediment has been the impression that the remodelling of the University Statutes, more especially those with respect to the Civil Law, would make alterations with which our new Statutes might prove incompatible; and that any proceedings on our part would be premature while changes in the general constitution of the University, and in the regulations of the Faculty, to which so many of our Statutes refer, were in contemplation.

Sent on behalf of the Master and Fellows of Trinity Hall,

(Signed) T. C. GELDART, *Master.*

June 14, 1852. WILLIAM MARSH, *Bursar and Tutor.*

Answers from the Master and Fellows of Trinity Hall.

The Master and Fellows of Trinity Hall.

Question 1.—In consequence of the system adopted by the Society at the beginning of the year 1844 (*vide* explanation given in Question 9), for running out its beneficial leases, the gross yearly income derived from estates in land cannot be correctly estimated by taking an average of the last seven years.

Taking an average of the six years preceding the year ending 1843, the gross yearly income received from landed estates was 2,286*l.* 14*s.* 10*d.*, consisting of the following items :— Gross yearly Income of the College, derived from Landed Estates.

	£.	s.	d.
Fines on renewal	364	0	0
Rack-rents	587	10	0
Reserved rents in money and corn	1,250	0	0
Quit rents	1	16	7
Rent-charges	13	13	4
Land Tax redeemed	52	19	4
Gravel pits	16	15	7
Total	£2,286	14	10

In the year 1847, a beneficial lease of a large tithe rent-charge expired (*vide* Answer to Question 3), and at the same time the vicarage glebe farm previously let on beneficial lease, was let at rack rent.

The gross yearly income of the landed estates on an average of the last five years (excluding the above-mentioned rectorial tithe rent-charge), was 2,072*l.* 16*s.* 6*d.*, consisting of the following items :—

	£.	s.	d.
Rack rents	819	10	0
Reserved rents in corn and money	1,149	0	0
Quit rents	1	15	6
Rent-charges	13	13	0
Land Tax redeemed	52	17	0
Timber	3	12	0
Copyhold fines	5	12	0
Gravel	26	17	0
Total	£2,072	16	6

The Society having ceased to take fines on renewal since 1844, this sum of 2,072*l.* 16*s.* 6*d.* does not, of course represent correctly, the *actual* gross income arising from land. Fines.

According to the new system adopted, it will take a period of about 25 years from this time to run out all the beneficial leases.

The gross annual income will then (as calculated by the last valuations of the several landed estates), amount to about 3,530*l.*

This amount is exclusive of a second rectorial tithe rent-charge which forms part of the reserved rents mentioned above (*vide* Question 3).

The estates on beneficial leases were all originally let for the term of 21 years.

Question 2.—For the same reasons as given in Question 1, the gross yearly income of the College as derived from houses cannot be correctly estimated on an average of the last 14 years. Gross yearly Income derived from Houses.

On an average of six years previous to 1843, the gross yearly income was 85*l.* 13*s.* 8*d.*, consisting of—

	£.	s.	d.
Reserved rents	23	3	8
Fines on renewal	62	10	0
Total	£85	13	8

On an average of the last seven years the yearly income was 22*l.* 3*s.* 8*d.*

No fines having been taken during these seven years, the *actual* annual value of the College house property cannot be correctly estimated from the latter average of seven years.

The gross annual value as taken from the last valuations made upon the house property will (when all the beneficial leases have expired), amount to 515*l.*

The houses have all been let on 40 years' leases, and if these be renewed upon the system explained in Question 9, it will take about 50 years from the present time before they will all have expired.

Question 3.—The College is lay impropriator of two parishes. A beneficial lease of the rectorial tithes of one of these expired in 1847, and the gross annual income on an average of the last five years was 923*l.* 8*s.* 11*d.* Tithes.

The other tithe rent-charge is still under a beneficial lease, and is included in the annual income obtained in Question 1, both on the average of six years before 1843 and on that of five years from 1847 to 1851.

The Master and Fellows of Trinity Hall.

The gross yearly value of this second rent-charge is commuted at 400*l.*

The whole yearly income derived from tithe will, at the expiration of the second beneficial lease, be 1,223*l.*

Gross yearly Income of the College, on the expiration of all the beneficial Leases.

The gross yearly value of the whole College property when all the beneficial leases have run out, will amount to—

	£.	s.	d.
Landed estates	3,530	0	0
House property	515	0	0
Two tithe rent-charges	1,223	0	0
Total	£5,268	0	0

Deductions.

Question 4.—1. The gross income from land on an average of the last five years being 2,072*l.*, the deductions which must be made to give the corresponding net income, are—

	£.	s.	d.
Rent-charges	16	5	0
Land tax	3	18	8
Income tax	53	17	2
Draining expenses	40	10	9
Repairs of farm buildings	173	0	0
Law expenses	30	0	0
Tithe commutations	20	0	0
Agency and Valuations	19	10	0
Enclosures	28	0	0
Total	£385	1	7

Corresponding net income on land, 1,686*l.* 18*s.* 5*d.*

2. No deductions have to be made from the gross income of house property except Income tax, 1*l.* 10*s.* 2*d.*

	£.	s.	d.
Gross income	22	3	8
Income tax	1	10	2
Net Income	£20	13	6

3. Gross income from tithe rent-charge on the average of the last five years is 923*l.* 8*s.* 11*d.*; deductions are—

	£.	s.	d.
Glebe farm let Tithe free	29	17	0
Expenses and commission for collecting, &c.	27	16	1
Poor, Highway rates, Land, and Income tax	200	0	0
	257	3	1
Net income	666	5	10
Stipend of a perpetual curate	80	0	0
Total	£586	5	0

Question 5.—The yearly income derived from funded property is 144*l.* 13*s.* 9*d.*

Income derived from Room-rents, Fees, &c.

	£.	s.	d.
Question 6.—The yearly income from Room-rents is	505	0	0
Admission and Degree fees	169	0	0
Fines	37	0	0
College seal	3	0	0
Plate money	40	0	0
Total	£754	0	0

In the amount of room-rents is included not only rent for the unfurnished rooms but a certain payment made by each occupier for tenants' repairs, all of which, such as papering, painting, repairing stoves, as well as cleaning of chimneys and staircases, and payments for taxes, are defrayed by the College.

Yearly payment by every member on the Boards.

Besides the sources of income enumerated above, there is a payment of 3*l.* per annum made to the College by every member on the Boards. Out of this payment are defrayed the paving rates and University Library rates, and the surplus goes towards the salaries of College officers and servants.

There is also a charge upon all members in residence, which is applied to meet the general expenses of the College establishment, such as lighting, buttery, kitchen, hall tables, linen, and the wages to servants. &c., &c.

Gross Income, and its application.

Questions 7 and 8.—The following table gives an accurate analysis of the present gross income of the College, as arising from all sources, and exhibits in what manner and to what purposes it is applied:—

RECEIPTS.	£.	s.	d.	£.	s.	d.
Estates in Land:—						
Rack Rent	819	10	0

The Master and Fellows of Trinity Hall.

Grossyearly Income and its application

The Master and Fellows of Trinity Hall.

Question 8.—By a custom of the College of very long standing, and which appears to be in each case in accordance with the intentions of the respective founders, all the proceeds arising from estates or money left for the endowment of supplemental Fellowships, Scholarships, or Exhibitions, have* (with the exceptions hereafter stated), been paid into the general funds of the College, and administered by the general authorities.

Such Fellows and Scholars seem also to have been put at once upon the same footing in all respects as the Fellows and Scholars upon the original Foundation.

In the year 1581 there being a considerable increase in the funds of the College, the Society founded *a Supernumerary Fellowship* in accordance with Bishop Bateman's Statute "De numero augendo." The whole number of Fellowships was thus made up to twelve, enjoying the same privileges and emoluments. Since that time, as the College property has increased in value, the several payments to all parties beneficially interested have been augmented proportionally.

The Scholarships (it may be remarked) being originally endowed by *money* bequests or by small specific sums payable out of the estates devised to the College, have benefited most by this proportionate distribution.

The amount of dividend received by the Master and each of the Fellows is 150*l.* a-year.

Number and value of Scholarships.

The Scholarships, as now increased, consist of fourteen, as founded by different benefactors, viz. :—

Three of the First Class of 50 guineas a-year.
Three of the Second Class of 30 guineas a-year.
Eight of the Third Class of 12 guineas a-year.

N.B.—Full particulars relating to the Foundations of the different Fellowships and Scholarships, whether foundation, engrafted, or supplemental; and also to the subsequent modifications and increase from the general funds of the College have been given in the answers to the former list of queries sent to the Master of the College.

The Law Studentships (as also described in those answers) were founded by the College at Christmas, 1849, and amount to 50*l.* a year each, and will be paid out of the general funds of the College.

Expenses of the Hall Tables.

The expenses of the Hall Tables are wholly defrayed, as incurred, by the individual Fellows and Scholars.

There is, however, an allowance termed "Coucher," made to the Master and each Fellow when in residence, which amounts to 2*s.* per diem, and exactly covers the expense of Hall Commons.

The old allowances to Scholars are no longer kept distinct, but are included in the increased annual amounts of the Scholarships.

Chapel Clerkship.

The Chapel Clerkship was in former times held by a Sizar, and was given away to poor Students, and was tenable for three years of residence.

Certain menial offices connected with the care of the Chapel and the duty of marking the Students were imposed upon the Chapel Clerk. These have been long since transferred to servants of the College, and the office and its emoluments are given away annually to a Scholar of the College, according to merit, with a certain preference to the poorer over the richer.

Sizars.

The term of Sizar has been discontinued altogether, though Hall Commons are still allowed to the Chapel Clerk out of the funds of the College. No other provision is made at this College for the maintenance of Sizars or Subsizars.

Festival allowances.

The Festival allowances consist of amounts of 6*l.* 13*s.* 4*d.* paid to the Master and each of the Fellows, and of 4*s.* to each Scholar present in Chapel on the Commemoration day, as specially provided for under Dr. Eden's Will.

Building Fund.

There is no special Building Fund at this College. The annual expense of repairs, taken as above, on an average of 14 years, includes the papering, painting, &c., of the rooms occupied by the Undergraduates. The room-rents, amounting as above to 505*l.*, include these items as well as all tenants' repairs, which are done by the College.

There are only two cases in which the College is impropriator. In one of these it has let the tithes and glebe on a beneficial lease, which is not yet expired, and the lessee covenants to keep the chancel of the parish Church in repair. In the other case the expense of the chancel repairs have amounted during the last five years to 6*l.* 1*s.* 7*d.* The College pays a certain sum for the insurance of the chancel of St. Edward's, in Cambridge, and has from time to time repaired it, as also the chancels of the different churches of which it has the patronage. The expense thus incurred may be stated, on an average, to be

Charities.

A sum of 12*l.* 17*s.* 8*d.* (included in Pensions and Contributions) is given away every year to charities and schools in Cambridge.

Large donations have been made of late years towards the support of parish schools and charities on the application of the Incumbents of parishes in which the College is impropriator, patron, or owner of land.

---

* The exceptions above alluded to, of *supplemental* foundations which are kept distinct from the rest are—

1. *The Goodbehere Fellowship*, derived from the interest of funded property. Rooms rent free, and commons are allowed from the general funds of the College.
2. *Dr. Allen's two Scholarships*, now amounting to 18*l.* a-year each.
3. *Chetwode and Oxenden Exhibition*, amounting to about 30*l.* per annum, derived partly from a legacy of 13*l.* 1*s.*, and partly from the general funds of the College. The duties of Chapel Clerk are attached to it.

The Master and Fellows of Trinity Hall.

Question 9.—The custom at this College of renewing leases at a low reserved rent, and on receiving a renewal fine, which had dated from times of great antiquity, was entirely discontinued in the year 1843-44.

Renewal of Leases.

Up to the year 1800 it appears to have been the practice here, as elsewhere, to increase the renewal fines, without increasing the renewed rent, whether the value of the estate had increased or not.

About that year, and in subsequent years, large amounts were taken out of the fines paid on renewal to redeem the land-tax in several of the College estates.

About the year 1825 the College commenced the system of increasing the reserved rents and making corresponding diminution in the fines on renewing leases of their landed estates. A considerable decrease of the burden which had accrued on the landed property was thus effected in the course of subsequent years.

Notwithstanding this, the whole burden remaining upon that property arising from the system of granting beneficial leases, was in the year 1843 estimated at a sum not less than 20,000*l.*

Beneficial Leases.

At the Christmas audit, 1843, the Society came to the determination of discontinuing the fine system, and gradually running out their beneficial leases, according to the following scheme:—

That renewal of leases should be offered to College tenants on condition—

1. That the tenant in each case should consent to pay an increased reserved rent, without fine, such rent being calculated according to the value of his then beneficial interest.
2. That this increase of reserved rent should commence immediately on the granting of the fresh term, and not (as had been formerly the custom) at the end of the then unexpired term.

The payment thus made by the tenant for his fresh term was thus spread over the whole period of the new lease, and the College thereby derived a smaller *immediate* benefit instead of a large prospective one.

The College having no funds of its own to meet the deficiency arising from the cessation of fines on renewal of leases adopted the course as above described, in order that it might facilitate its object with borrowing as small a loan as possible. The amount of fines which might have been set by the Society at Christmas, 1843, was about 6,000*l.* A sum of 1,100*l.* only was divided among the Master and Fellows, and the future amount of dividend was at the same time fixed on a calculation of what they had been receiving on an average of the previous 21 years.

Considerable margin was allowed for any reduction of rents that was likely to follow from the alteration of the corn laws: and, notwithstanding the diminution of rents which has since ensued, in consequence of the low price of wheat, there is great reason to trust that in the course of about 20 to 25 years from this date the whole burden on the landed property, which had arisen from the fine system, will have been removed, and the College will then reap the full benefit which may thus arise from running out its beneficial leases.

House property.

The above remarks relate, in some measure, also to the house property. As, however, the houses have been let on leases of 40 years, it will take a longer time to run out the beneficial leases on them than on the *landed* estates. It has not yet been definitely decided whether or not it will be advisable to run out the beneficial leases on houses *entirely*.

In consequence of the great proportion which the cost for repairs of houses bears to the annual rent derived from them, it may be politic to retain a small fine in order to facilitate the management of this kind of property.

Purchase of Advowsons.

Question 10.—The College does not possess any fund for purchasing advowsons or augmenting its small livings.

The stipend of a perpetual curacy is paid out of the general funds.

During the last 20 years large sums have been paid out of the general income towards repairing and rebuilding the parsonage houses on its small livings, in accordance with the Statutes of the Founder.

In one or two instances sums have been contributed from the same source to funds which have been raised in the parishes where the College has preferment towards providing additional *resident* curates.

The sum of 40*l.* (as given above) represents the amount of these subscriptions as taken on an average of 10 years.

Additional College buildings.

Question 11.—Additional College buildings, to the extent of six sets of rooms, were erected in 1823, at a cost of 1,200*l.*; this sum was raised by loan, but has long since been paid off out of the general income of the College. At the same time the Master's lodge was enlarged and improved, at the expense of the then Master. College offices have also been taken down and replaced within the last 20 years, at an expense of 1,200*l.*, which has been also paid out of the general revenue.

In February last an accidental fire destroyed seven sets of rooms in the front part of the College, and it is intended to rebuild the front on a plan which will afford better and additional sets of rooms. This will involve considerable expense beyond the sum allowed by the Fire Insurance Office, which is of course limited to the mere cost of restoring the buildings destroyed to the same state that they were in previously.

Sent on behalf of the Master and Fellows of Trinity Hall,

(Signed) WILLIAM MARSH,
(*Bursar.*)

June 14, 1852.

Rev. J. Pulling, B.D., Master of Corpus Christi College.

Answers from the Rev. J. Pulling, B.D., Master of Corpus Christi College.

I beg to send a copy of the Statutes by which the College of Corpus Christi is now governed; with a few remarks on some of the Statutes.

Statutes.

Statute II.—The College now consists of

Master and Fellows.

1. One Master (Magister sive Custos)
2. Twelve Fellows (Sorii sive Scholares) viz., eight, on the original Foundation, two must be natives of Norfolk, two Norwich Scholars on Archbishop Parker's Foundation.
3. Eight Scholars (Scholastici) on the original Foundation, six Sizars (pauperes): one Sacellista or Chapel Clerk.

Statute XII.—The Fellows are chosen from those Scholars or Students who excel in the University and College Examinations; Scholars being preferred. (Statute xxx.)

Fellowships are vacated.

1. By a Fellow not taking Orders within three years, according to Interpretation (Page 20) of 16th Statute.
2. By his not proceeding to B.D. Degree within eight years (according to 12th Statute.)
3. By Ecclesiastical Preferment (19th Statute.)
4. By accession to property equal in value to a Fellowship (19th Statute.)
5. By marriage.

Statute XV.—The Master is usually resident in College, at least from October to May inclusive.

The same may be said of the resident Fellows.

But License of non-residence is granted to those Fellows, who, their services not being yet required, or required no longer in College, can find useful employment for their abilities elsewhere.

The Residence of Scholars is not enforced during the Vacations; but they are frequently resident during both the Christmas and the Summer Vacations.

Statute XVIII. The Surplus is divided into 14 shares, of which the Master has two, and the Fellows one share each.

Statute XIX.—See remarks above on Statute XII.

Statute XXVI—XXVIII.—To the Dean belongs the care and supervision of the moral and religious conduct of the Students.

The prælector examines them in preparation for the University Examinations.

And the general tuition of the College is entrusted to the Tutor, Assistant-Tutors and Lecturers.

Scholars.

Statute XXIX, XXX.—Eight Scholars have about 17*l.* a-year each. Six Sizars pay only a small sum annually for Tuition and Commons.

Question 2.—A correct account of the Scholarships and Exhibitions connected with the College is given in the Cambridge University Calendar.

Two Fellowships were founded by Archbishop Parker, 1569, appropriated to the Norwich Scholars.

Two new Fellowships were founded at the same time by the College, which are appropriated to natives of Norfolk.

Fellows on these Foundations have the same Emoluments and Privileges as those on the original Foundation.

Admission of Students.

Question 3.—I am not aware of any Regulations prescribed by the Statutes concerning the admission of Students.

In practice, Students are admitted on the recommendation of a Graduate of the University.

Question 4.—Divine Service is performed in the College Chapel daily at half past seven in the morning and six in the evening. All Students are required to attend twice on Sundays, and at least five times besides during the week.

Tuition.

Question 5.—Five Fellows are generally engaged in the College Tuition. The Students of the first year are prepared by Lectures in Classics and Mathematics for the College Examination in June.

Those of the second year are prepared for the (University) Previous Examination in the Lent Term; and are also lectured in Classics, Mathematics, and Theology for the College Examinations in the Easter Term.

Those of the third year who are Candidates for Honors are lectured in Classics and Mathematics, the rest in the subjects of the B. A. Examination.

The College Examination takes place at the division of the Easter Term.

The subjects in which the Students are examined, are those upon which they have been lectured during the preceding year, and the rewards of proficiency are the various Scholarships and Exhibitions in the gift of the Master and Fellows.

Lectures.

Question 6. *Lectures.*—Students in their first year are required to attend ten Lectures a-week in Classics and Mathematics. After their first year they attend from five to eight Lectures weekly, according to the Class to which they belong.

Hall.—The presence of Students is not required as a matter of discipline excepting on Sunday.

Gates.—Students are expected to be in their Lodging or in College before ten o'clock. The names of those who remain out after that hour, are given in to the Dean the next morning, whose duty it is to check frequent or great irregularity.

Expenses.

Expenses.—The Tutor of the Student and the College Authorities are acquainted with

his mode of living, and the expenses which he is incurring, and restrain him according to circumstances.

Rev. J. Lilley, B.D., Master of Corpus Christi College.

Necessary Expense of Pensioners and Sizars.

Necessary expenses of Pensioners and Sizars.

The Residence of Students is usually according to the following scheme:—

Question 7.—I. 1st year. He is admitted of the College at Midsummer, comes into Residence in October, and resides one Term (Michaelmas).

II. 2nd year. Resides three Terms,—Lent, Easter, and Michaelmas.
3rd year. The same.
4th year. The same.

III. 5th year. Resides part of one Term, and passes B.A. Examination.

A Student's expenses may thus be divided into three parts:

I. Those of the first half-year, from Midsummer to Christmas.
II. His Annual Expenses for three years.
III. Those of his last Term, including B.A. Fees.

My Estimate of the necessary expenses of a Pensioner, comprising Tuition, Rent, Meals, Attendants, Fees, &c., from time of entrance to that of taking the first degree, is—

I. For first half-year	£ 65 13 0
II. For three years 65*l.* 8*s.* 6*d.* × 3	196 5 6
III. For last Term	4 17 6
Estimate of Expenses of a Pensioner	£266 16 0

For a Sizar's Expenses, deduct from the above amount 20*l.* a year for three years.

Estimate of Expenses of a Sizar	£206 16 0

Particulars of preceding Estimate.

Particulars of preceding Estimate.

I. Expense of first half-year from Midsummer to Christmas:—		
Caution Money	£15	0 0
College Admission Fees	2	3 0
University Matriculation Fees	5	10 0
Expense of Furnishing Rooms	21	0 0
One-third Annual Expenses calculated in II.	22	0 0
	£65	13 0
II. Annual Expenses for three years:—		
Tuition	£10	0 0
Rent 7*l.* to 17*l.* (say on an average)	12	0 0
Attendance in Rooms	4	10 0
Other Attendance	3	0 0
Payments to College	8	12 6
Expense of Living, including Meals, Coals, Laundress, and all other necessaries, for 26 weeks, at 1*l.* 1*s.* per week	27	6 0
	£65	8 6
III. Additional Expense for last Term:—		
Rent and Tuition	£6	10 0
College Payment and Attendance	4	10 0
Fees for B.A. Degree	13	1 6
Expenses for five or six weeks	6	6 0
	30	7 6
Deduct Caution Money £15 0 0		
And Half of Furniture Money 10 10 0		
	25	10 0
	£4	17 6

Actual Average Expenses of Pensioners and Sizars.

Actual average expenses of Pensioners and Sizars.

Question 8.—I give the actual Expenses of five Students for the first half-year, and also for the first of the succeeding three years:—

A. is a Pensioner of Average Expenditure.
B. „ Economical.
C. „ Expensive.
M. and N. are Sizars and Economical.

No allowance for Private Tuition is included.

A. 1. Caution and Matriculation	£20	10 0
Other Expenses of first half-year	45	13 5
	£66	3 5
2. Expense of Lent Term	£22	2 2
„ Easter Term	34	7 7
„ Michaelmas Term	29	4 0
	£85	13 9

Rev. J. Pulling, B.D., Master of Corpus Christi College.

Actual average expenses of Pensioners and Sizars.

B. 1.	Caution and Matriculation	£20 10 0
	Other Expenses of first half-year	35 14 1
		£56 4 1
2.	Expense of Lent Term	£18 2 1
„	Easter Term	19 14 2
„	Michaelmas Term	22 19 8
		£60 15 11
C. 1.	Expenses of first half-year unknown, suppose 90*l.*	
2.	Expense of Lent Term of second year	£38 12 4
„	Easter „	34 13 7
„	Michaelmas „	52 10 8
		£125 16 7
M. (Sizar) 1.	Caution and Matriculation	£11 5 0
	Expenses of first half-year	35 0 0
		£46 5 0
2.	Expense of Lent Term of second year	£12 16 7
„	Easter	12 6 5
„	Michaelmas	15 4 10
		£40 7 10

[This Student holds a Scholarship for which 16*l.* 7*s.* must be deducted,—reducing his Annual Expenses to 24*l.* 0*s.* 10*d.*]

N. (Sizar) 1.	Caution and Matriculation	£11 5 0
	Expenses of half-year	28 18 6
		£40 3 6
2.	Expenses of Lent Term	£14 18 1
„	Easter Term	12 1 10
„	Michaelmas	18 3 0
		£45 2 11

[This Student holds a Scholarship, for which 21*l.* 12*s.* must be deducted,—reducing his Annual Expenditure to 23*l.* 10*s.* 11*d.*]

Sizarships and Scholarships.

Question 9.—There are six Sizarships, and numerous Scholarships.

A Sizarship (as appears from the last Paper) reduces a Student's expenses to 40*l* per annum.

A Scholarship, in addition, reduces it again to 24*l.* per annum.

And he may obtain an additional Scholarship in his second year, which will reduce his annual expenses for the second and third years to 10*l.* only.

Two Sizarships, and about seven such Scholarships, as are here supposed, are given to the Students of any one year.

Other smaller Scholarships may also be added.

Expenses.

Question 10.—I am not prepared to suggest any plan for diminishing the expenses of a College residence, unless it were thought expedient to shorten the time, so that Students should pass their B.A. examination at the end of three, instead of three and a half years.

This, I think, would be in many respects a desirable change. Besides considerably diminishing the total expense of a University education, it would put an end to much idleness (with its evil consequences, dissipation, and extravagance), and also enable the Colleges to accommodate a larger number of Students within their walls. With regard to habits of extravagance, I do not think they can be further restrained by regulations. What is economy in one man is extravagance in another. Vigilance on the part of the College Officers, and especially the Tutor, free communication with his Pupils, and frequent correspondence with their parents or guardians, seems to be the legitimate and most effectual means for checking habits of extravagance and dissipation.

Appropriation of Scholarships, &c.

Question 11.—The appropriation of Scholarships to particular schools and localities does, in my opinion, afford an encouragement to learning in those places; and I think that more good is on the whole thus produced, than if such appropriations were entirely done away. And all the possible evils of appropriations seem to be wholly removed when (as is the case with our Scholarships and Exhibitions generally) it is in the power of the Master and Fellows to bestow them upon other Students in default of eligible claimants, of the name, school, or district.

Question 12.—No: the College having the power, just now alluded to.

Question 13.—This consolidation would *not*, in my opinion, be advantageous.

The most valuable Scholarships are given to those Students (Sizars or Pensioners) who excel in the first year Examination. If these Scholars continue to be meritorious, other smaller Scholarships are added at the two succeeding Examinations.

Thus, we are enabled to encourage and reward perseverance, and to make a distinction between those Students who systematically pursue a course of study, and those who relax their efforts after the First Examination. *Rev. J. Pulling, B.D., Master of Corpus Christi College.*

I am not aware of any change of this kind which would enable us to afford a more substantial help towards maintenance or a better reward for merit.

Our present system seems to possess all the advantages of consolidation, without the evil which might arise from our not having the power of making a distinction after the first year between the diligent and the idle.

Corpus Christi College Library.

Dear Sir, *Corpus College, Cambridge, 21 July.*

In reply to certain queries which I received in February last, I beg to send a few words on the subject of our College Library.

I am, dear sir,
Yours very faithfully
(Signed) J. PULLING.

The Rev. W. H. Bateson, Secretary.

1. The Library of Corpus Christi College is under the care of a Librarian who expends about 30*l.* per annum in the purchase and binding of books, and in the purchase especially of such books as are connected with the usual subjects of Academical study; and such as students generally would not be likely to have on their own shelves. The Librarian.

The books are chiefly Theological and Classical works, and are arranged as far as possible in classes, but the works of any *Author* may be found by consulting the manuscript Catalogue.

The well-known valuable manuscript Library of Archbishop Parker is preserved in this College; of which there is a printed Catalogue.

2. The printed Library consists of about 4,500 volumes. Number of Volumes.

It is not open to strangers, who can only be admitted by some one entrusted with a key.

Students of the College can visit the Library if accompanied by the Under-Librarian, and to remove any work to their own roooms, must obtain an order from the Master or one of the Fellows. Admission.

(Signed) J. PULLING.

Answers from the Rev. Richard Okes, D.D., Provost of King's College.

The Rev. R. Okes, D.D., Provost of King's College.

List of Queries dated *December 14th*, 1850.

Answer.—The questions contained in this paper have entire reference to subjects on which I cannot presume to express an opinion.

List of Queries, dated *December 20th*, 1850.

Answer 1.—The head of King's College in this University, called the Provost, is appointed by election, in which each Fellow of the College has a vote. Appointment of the Head.

The qualifications for the office are, besides those of good repute, morals, knowledge and discretion, that the person to be appointed be at least thirty years of age, a Priest in Holy Orders, a Doctor or Bachelor in Divinity, or a Doctor in Canon Law, a subject of the sovereign of England, and born in one of the counties of England, either an actual Fellow, or one who has been a Fellow, and has voided his Fellowship for a lawful and honourable reason. Qualifications.

The conditions of tenure are such as are usual in an office of this kind, a proper performance of the duties enjoined. The duration of tenure is for life. Tenure of Office.

The residence required may be best expressed by mention of the absence permitted, viz., sixty days in each year, besides such occasions of necessary absence upon College business as may and do occur in the course of the year, or of urgent necessity, the existence of which is to be decided by a majority of the Senior Fellows. Residence required

The duties and services enjoined upon the Provost of King's are like, and not less than, those of any other Head of a College. They have been much increased from time to time since the foundation of the College by the addition of labours belonging to several examinations and trusts, of which the Provost of King's has been apppointed to take a share. Duties enjoined.

The Provost is pre-eminent in the College, and presides over all the members of the College, and has the government, direction, and correction of them, according to the ordinances of the Founder. His power extends over all matters, in which the College and its interests are concerned, and in nearly all cases his assent is necessary and indispensable. Powers.

The stipends, emoluments, and advantages of the Provost, are regulated in accordance with the spirit of the College Statutes, approximating, as nearly as possible, to the relative value of provisions and money at the period of the foundation.

The Fellows are created by election. Election of Fellows.

When a Scholar has completed his three years of probation, he is either elected a Fellow,

The Rev. R. Okes, D.D., Provost of King's College.

or must quit the College. The election is by the Provost, or, in his absence, the Vice Provost, and a majority of the Fellows present.

A Fellow continues to hold his Fellowship during life, unless he marries, or is instituted to a benefice, or voluntarily resigns his Fellowship, or is expelled from the College for reasons defined by the Statutes. In the case of institution to a benefice, he has a year of grace allowed him from the date of his institution, but the other reasons for voidance remain in force notwithstanding.

The residence of a Fellow, as required by the Statutes, is the same as that of the Provost. But, owing to the change of times and circumstances, our Visitors have sanctioned and approved of a relaxation of that rule, and residence of non-official Graduates of the College is now only enforced for some special reason by order of the Provost. The duties or services enjoined upon a Fellow, are, a necessity to serve any office in College to which he may have been duly elected, to make progress in study, to obey the Provost in all things lawful, and generally to be obedient to the Statutes. His powers are, a vote at certain elections and in certain College matters, and an appeal to the Visitor in case of a grievance. His stipends, emoluments, and advantages may be defined by the definition already employed in the case of the Provost.

Scholarships.

The Scholars come off to the foundation of King's from the foundation of Eton College, and from none other, by Statute. They are elected annually at Eton, after an examination

Eton College.

by the Provosts of the two Colleges of King's and Eton, by the Vice-Provost and head Master of Eton, and two Fellows of King's of the degree of M A., who are appointed for the purpose at the annual meeting at King's for the election of officers.

The election of Scholars of Eton to supply the vacancies occurring at King's College, takes place at Eton, at a certain time arranged by the two Provosts within a period prescribed by the Statutes. The electors are sworn before they enter upon the duties of xamination, and the names of the candidates elected, are placed upon two indentures in the order in which they are nominated, and elected by the electors.

As vacancies occur at King's College, they are supplied within a month at the farthest, by the Scholars of Eton, who come off in the order in which they stand on the indenture, unless by death or some legitimate cause, the Scholar next on the indenture is superseded or withdrawn from Eton. The average number of vacancies annually occurring is four-and-a-half, the number of Scholars, therefore, at King's seldom exceeds fourteen.

Exhibitions, &c.

2. There is no supplemental or bye-foundation at King's College, nor any Exhibition connected with it.

Admission of Students.

3. There are no regulations at this time in use for the admission of Students over and above the members of the foundation. The statutes forbid the admission of strangers "ad onus Collegii," but noblemen and fellow-commoners have, in former years, even within the last century, been admitted, paying to the general fund of "Domus," as they would have done at any other College.

Divine Service.

4. Divine Service is performed in the College chapel twice daily during the Term, and on Christmas day, and on Sundays during the vacations, and in the Easter vacation, until after Tuesday in Easter week. During the Term the scholars are required to attend morning service, at least, in the chapel every day, both services every Sunday and Saint's day, and afternoon service on the Vigils and on Saturdays.

Lectures.

5. On every day, except Sundays and Saints' days, there are two lectures given to the scholars, one classical, the other either mathematical or theological, all of them more or less bearing upon the examinations of the University.

There are three lecturers, none of them at this time Fellows of the College, but two of them late Fellows of their respective Colleges, the third an actual Fellow of his College.

Examinations.

There are examinations in the College, at the beginning and end of the Easter Term, annually, conducted by some member of the College, assisted by the lecturers.

Prizes.

Prizes of books are given for proficiency in these examinations, and other prizes of money to a considerable amount, are awarded, partly by this test, partly by a consideration of character.

Attendance on Lectures.

6. All the scholars regularly attend all the lectures, or are punished, except in cases of sickness, or other sufficient reason for their absence.

The lectures begin and end with the Term, even in the summer, with the exception of two or three days at the beginning of the Term, and the same number at the close of Term, on which days either declamations are recited, or the Statutes of the College read.

Attendance at Dinner.

Every Scholar regularly attends dinner in hall, or is liable to punishment. The College gates are locked at 10 P.M. No Scholar is permitted to go out after that hour, and any Undergraduate who comes in after that hour is reported to the Provost on the following morning. No member of the College is allowed to reside in lodgings. Each Scholar takes care of his own expenses.

7 & 8 are not applicable to the members of King's College.

Rooms.

9. Every Scholar has his rooms, commons in hall, a certain allowance from the bread and beer butteries during residence, and his tuition free of expense; and a share of the general dividends, with certain quarterly payments and other money allowances.

Extravagance.

10. This question, as is evident from the last answer, is partly inapplicable to the members of King's College. Where habits of extravagance have occured, they have found in process of time their own cure. No facilities of credit are given within the College; those that exist without, however tangible by any Academical enactment, are, in my judgment, not to be suppressed by any legislation, so long as there is imprudence in youth, cupidity in tradesmen, and indifference in parents and guardians.

11. I am of opinion that it would be very inexpedient to remove any of the appropria-

The Rev. R. Okes, D.D., Provost of King's College.

Opinion respecting Restrictions on Fellowships, &c.

tions, limitations, or restrictions now affecting the election to, or tenure of, the Fellowships or Scholarships in this College. The Act of Uniformity has sufficiently removed the superstitious ordinances necessarily found in Statutes made in the fifteenth century: and there is nothing in the other parts of the Founder's injunctions, which impedes the present generation from fulfilling with a safe conscience, the "Mens et Institutio Fundatoris," which was the maintenance of true religion with sound learning.

12. Already answered in the answer to query 1.

13. It would not, in my opinion, be advantageous in the case of King's College to consolidate any of the Fellowships or Scholarships of the College.

List of Queries dated 18*th February* 1851.

The queries in this list are, for the most part, inapplicable to the members of King's College. Some few which are applicable have been already answered in the answers to the list bearing date December 20th, 1850. Many of the queries in this list have relation to matters, upon which, from my present slight experience, I should not be justified in expressing an opinion.

List of Queries bearing date 18*th February*, 1851, in relation to the College Library.

The College Library.

1. The library of this College is placed under the care of a Librarian, one of the Fellows of the College. His duties are the general superintendence of the Library as prescribed by the Statutes of the College. He has an Assistant Librarian who attends from 10 A.M., to 2 P.M. daily, except on Sundays, Christmas Day, and Good Friday.

Catalogue.

2. The catalogue is partly a printed one, and partly MS. The books are arranged in classes; the building in which they are placed is well ventilated and sufficient for its purpose; it is fire-proof. The class, shelf, and number on the shelf, are marked both on the outside and inside of each volume, and correspondently placed in the catalogue to the title of the book, which is recorded in alphabetical order.

Number of Volumes and MSS.

4. The number of volumes in the College library is nearly 10,000. The principal bequests were those of the late Jacob Bryant, Esq., Drs. Roger Goade and G. Thackeray, late Provosts. The library contains several books of great rarity; no great amount of MSS., except Oriental. The books of the library belong to the departments of divinity, classical and general literature.

Description of Books.

Of late years the attention of the College library authorities has been principally given to a supply of modern and other books connected with the usual subjects of academical instruction and study.

5. The library is accessible to every member of the College, from the Provost to the Junior Scholar, not only during the hours of attendance by the Assistant Librarian, but at other times if there be need. Members of other Colleges and strangers are allowed access to the library for purposes of special reference or research, if attended by the Assistant Librarian or some member of the College.

List of Queries bearing date 15*th May*, 1851.

Answer: Although the subject matter of the queries contained in this list is kindred to my previous calling in life, I decline, from want of experience in the recent history of the University, to express any opinion in answer to the queries herein propounded.

King's College, Cambridge,
April 19th, 1852.

(Signed) RICHARD OKES,
Provost.

Answers from the Provost and Fellows of King's College.

The Provost and Fellows of King's College.

College Income.

1. The College arrears and rents, including land, tithes and rentcharge, rents of houses, quit and composition rents, and rents of underwood and game, have amounted on an average of seven years, viz., from 1845 to 1851 inclusive, to the following sums:—

Arrears and Rents.

	£.	s.	d.
1845 . . .	18,697	11	9
1846 . . .	17,292	2	10

Ditto at Rackrent	153	0	0	187	0	0
Sale of Timber and other Annual and Accidental Proceeds .	855	4	6	2,255	18	6
Fines on renewal of beneficial Leases of Land and Houses .	4,890	7	8	1,287	0	0
Manorial Fines	911	13	10	353	17	6
Gross Income . . . £	21,319	1	11	25,703	8	2

The year 1836 has been chosen, because it was the last year brought to account before the Tithe Commutation began to take effect. About that time also the College determined to take the tithe rent-charge into their own hands, and many of the leases have expired since that date.

House Property.

2. The present gross yearly income of the College derived from houses, amounts to 431*l.* 14*s.* 9*d.* Of this sum, 244*l.* 14*s.* 9*d.* consists of reserved rents, and 187*l.* of rack-rents.

During the last 14 years the variation in the reserved rents has not exceeded a few shillings.

Tithe-rent Charges.

3. The gross amount of the College tithe rent-charge was by the Commutation set at 10,394*l.* 19*s.* 10*d.*

This rent-charge, with the exception of 682*l.* not then in the hands of the College, is included in the rack rents of 1851. When the tithes were leased out beneficially, they increased the amount taken in fines upon the renewal of leases, but in many cases no

addition was made to the reserved rents. Some portion also of the rent-charge let at rack-rent is included in the rents of farms, where it happens that the lands and tithes are both the property of the College. The present full annual value of the rent-charge cannot, therefore, be given separately. *The Provost and Fellows of King's College.*

The College dues, exclusive of arrears on account of tithe rent-charge, were, in 1851, 9,470*l.* 1*s.* 2*d.* College Dues.

4. The gross and net income of the College, on an average of the last seven years brought to account, may be given thus :— Gross and Net Income.

Years.	Gross.	Deductions.	Net.
	£. s. d.	£. s. d.	£. s. d.
1845	22,111 11 11	2,605 0 1	19,506 11 10
1846	32,419 1 6	3,855 18 8	28,563 2 10
1847	26,302 5 10	4,764 5 0	21,538 0 10
1848	23,689 16 2	3,457 9 7	20,232 6 7
1849	22,634 18 11	3,424 19 4	19,209 19 7
1850	25,879 8 10	4,503 18 6	21,375 10 4
1851	25,717 11 1	4,237 3 10	21,480 7 3
	7)178,754 14 3	26,848 15 0	151,905 19 3
	25,536 7 9	3,835 10 8	21,700 17 0
Deduct also Rates and Taxes on College Buildings, on average of 7 years . .		182 6 10	182 6 10
	£	4,017 17 6	21,518 10 2

The deductions, which constitute the difference between the gross and net income, are: 1. Sums allowed to tenants for land tax, insurance, and permanent improvements in buildings, draining, &c. &c. 2. The rates on the tithe rent-charge and expense of collecting it, including also charges for repairs of chancels, and, in some instances, fixed payments to incumbents, stall-wages, and procurations. 3. The property tax. 4. The expense of felling timber and the management of woods. Deductions.

5. The present gross income of the College arising from funded property is—

	£.	s.	d.
From Government securities . .	790	0	2
From appropriated estates in land .	531	0	0
Total . .	£1,321	0	2

As the whole of the above income is appropriated to specified purposes, it is always brought to account separately, and is not included in the before-given averages.

6. No rents are charged on the rooms in College, as they are, at present, assigned to Members of the Foundation only. Room Rents.

The Degree Fees are trifling, and do not, on an average, amount to above 12*l.* or 15*l.* *per annum.* Degree Fees.

There is not any source of revenue to the College not included in the foregoing answers.

7. To the *net* general income for the year 1851, as given in answer to question 4, the *net* funded property of the College is to be added, viz.— Funded Property.

	£.	s.	d.	
To	21,480	7	3	Net general income,
Add	766	19	4	Interest (less by the Property Tax) of funds appropriated to specified purposes.
	481	15	3	Net rents.
	£22,729	1	10	which is the total aggregate net income of the College arising from all sources.

Total aggregate net Income arising from all sources.

The gross income from the funds, and the rest of the College property, is shown in the answers to questions 4 and 5.

8. On an average of seven years, viz., from 1845 to 1851 inclusive, eight and a half dividends to— Application of the Net Income.

	£.	s.	d.	
The Provost of	90	0	0	each.
A Senior Fellow	30	0	0	
An M.A. Fellow	20	0	0	
A B.A. Fellow	13	6	8	
An Undergraduate Fellow . .	8	17	9	
A Scholar	3	0	0	

have been paid annually.

This system of dividends was established with the approval of the Visitor, and by the

The Provost and Fellows of King's College.

unanimous consent of the Provost and Fellows, in December, 1648. In awarding the several payments, regard was had to the statutable portion, which each Member of the College had before received.

Income of the different Members of the College..

The income of the different Members of the College averaged annually from 1845 to 1851, in the following proportions :—

	To the Provost.	A Senior Fellow.	An M.A. Fellow.	A B.A. Fellow.	An Undergraduate Fellow.	A Scholar.
	£. s. d.	£. s. d.	£. s. d.	£. s. d.	£. s. d.	£. s. d.
8½ Dividends. .	765 0 0	255 0 0	170 0 0	113 6 8	75 11 1	25 10 0
4 Quarterages .	367 0 8	10 5 0	4 5 0	2 18 4	2 8 4	1 5 0
Other customary payments . .	57 19 7	5 3 3	1 6 0	1 0 0	1 0 0	0 9 0
£	1,190 0 3	270 8 3	175 11 0	117 5 0	78 19 5	27 4 0

Other small sums, of which the average aggregate amount is about 130*l.*, are divided in the same proportion amongst the Fellows present at the College sealings.

Also a small allowance, averaging from 15*l.* to 20*l.*, is distributed to the *resident* Members of the College, in lieu of Feasts.

The income of the Conduct, Morning Reader, Organist, Lay Clerks, and Choristers, will be given under the head of "Expense of the Chapel."

[The next three sections of question 8 are not applicable to the constitution of this Society.]

It will be seen from the above statement that the payments made to each party beneficially interested must increase in the same ratio as the divisible money.

Expense of table.

The expense of the table in the College Hall for the Fellows, and of that for the Scholars, is defrayed out of the general income of the College, and neither wholly nor in part by the individual Fellows and Scholars. The allowance for Commons to the resident Corporate Members of the College is sufficient, as regards themselves personally. Resident Fellows and Scholars have, besides the Commons for dinner in hall, a certain allowance weekly at the bread and beer butteries.

The Statutes of the College make no provision for Sizars or Sub-Sizars, or for the maintenance of Students, who are not on the Foundation.

College Chapel expenses.

The annual expense of the College Chapel, on an average of seven years, viz., from 1845 to 1851 inclusive, has been—

	£. s. d.	£. s. d.
1. *Repairs and Embellishment* :—		
From General Income of College . . .	215 4 6	
„ Chapel Funds	211 11 11	
		426 16 5
2. *The Conduct* :—		
8½ Dividends, at 9*l.* each	76 10 0	
4 Quarterages	60 0 0	
		136 10 0
3. *The Morning Reader*	. .	63 0 0
4. *The Organist* :—		
8½ Dividends, at 3*l.* each	25 10 0	
4 Quarterages	89 5 0	
Other customary Payments.	1 4 7	
		115 19 0
5. *Lay Clerks* :—		
8 in number at 45*l.* each	360 0 0	
Allowance for Feasts	5 0 0	
		365 0 0
6. *The Chapel Clerk*	. .	14 8 8
7. *The Choristers* (16 in number) :—		
4 Quarterages, including a portion of their Allowance for Clothes	31 18 8	
Feast Money, Gowns, Books, &c. . . .	22 14 11	
Commons, &c., at 4*l.* 5*s.* 10*d.* per week, exclusive of Feasts	224 3 4	
Allowance from "Funds"	13 19 4	
Schoolmaster	52 10 0	
		345 6 3
Total		£1,467 0 4

Other incidental expenses, such as pensions and gratuities to Lay Clerks and chapel servants, &c., &c., might be added.

The Provost and Fellows of King's College.

The average annual expense of the repairs of the Collegiate buildings and walks, exclusive of the Chapel, is 492*l.* 5*s.*

Building Fund.

The College have a small Building Fund, not hitherto used for repairs, which has accumulated upon the residue of a legacy bequathed to them in 1785 for the purpose of completing their long contemplated new buildings. The amount of the fund will be given under the account of the College Funded Property.

The average annual expense of repairing chancels has hitherto been inconsiderable, inasmuch as, when the College tithes or rent-charge were granted under lease, the lessees were bound by covenants to execute all requisite repairs. Now that the bulk of the rectorial rent-charge is in the hands of the College, this item of expense will probably be much increased.

Annual amount of Prizes and Rewards.

The present annual amount of prizes and rewards for the encouragement of learning and good conduct is 215*l.* 18*s.* 4*d.* This sum is distributed amongst the scholars on the Foundation, and is, for the most part, the produce of funds and benefactions. The *annual* subscriptions to charities and schools, exclusive of pensions, amounts to 172*l.* 3*s.*, and donations for similar charitable purposes, *not annual*, to 97*l.* 11*s.* 9*d.*, the latter being taken on an average of the last seven years.

Other particular purposes to which the College Income is applied.

The other particular purposes, to which the College income is applied, are included in the statements which follow:—

	Gross Rental.			Amount of Stock.		
	£.	*s.*	*d.*	£.	*s.*	*d.*
Fund for College Library, Books, and Librarian's Salary	83	0	0	2,267	14	4
Legacy to 50 Junior Fellows and Scholars	38	0	0	1,327	17	2
Scholars' Prize Money, &c.	81	0	0	3,692	19	8
Choristers				451	14	1
Advowson Funds	90	0	0	5,558	9	9
Legacy for New Buildings				1,465	4	2
General College purposes	239	0	0	1,494	3	3
Chapel Funds				5,696	14	6
Fund for the increase of the Divinity Lecturer's Stipend				1,116	15	0
Stock for purchasing Land				1,304	9	4
Fund accumulating for a Statue of the Founder, and for a Fountain				1,902	5	3
£	531	0	0	26,278	6	6

688*l.* 3*s.* 1*d.* of the stock are invested in the 3½ per cents., the remainder in 3 per cents.

Expenditure of the General Income of the College in 1851.

The expenditure of the general income of the College in 1851 may be thus divided:—

				£.	*s.*	*d.*
Gross income				25,717	11	1
Deductions as before specified				4,237	3	10
				£ 21,480	7	3
Ditto rates and taxes on College buildings, exclusive of rates and taxes payable to the University				159	13	11
	£.	*s.*	*d.*			
Expense of Commons	2,105	8	11			
Pensions, salaries, and wages, including quarterages and payments to *Statutable** officers	2,319	9	1			
Necessary Expenses:—						
Tradesmen's bills, University taxes, &c.	1,973	8	9			
Fees and gratuities, including also salaries of *Non-Statutable*† officers and College *Curates*‡	1,936	7	4			
Nine dividends, including a vote of 30*l.* with each dividend to the General College Purpose Fund, and 20*l.* with each dividend to the Chapel Funds	12,272	0	0			
Balance in hand for the present year	713	19	3			
£	21,320	13	4	21,320	13	4

* There are seven Statutable Officers of the College, who, in addition to their dividends, receive the following salaries, viz.:—

	£.	*s.*	*d.*
The Vice-Provost	105	0	0
One Dean of Divinity	52	10	0
Two Deans of Arts (each)	42	0	0
Three Bursars (each)	73	10	0

‡ The annual salaries of Curates provided by the College as Tithe Impropriators amount to 565*l.*

The Provost and Fellows of King's College.

9. From a comparison of the rents of the years 1836 and 1851, as given in answer to question 1, it will be seen that many beneficial leases of estates and tithes must have been suffered to run out in the interval between those two years.

Beneficial Leases.

The College have not adhered to any *fixed* system (their determination with respect to the tithes and rent-charge being excepted) with the view of running out such leases. They have, however, on many occasions, been content to forego the receipt of fines in order to improve their regular income; nor have they, during the last 35 or 40 years, taken any compensation for the loss by non-renewal.

The reserved rents under unexpired beneficial leases have, since 1836, remained the same; nor has it been the custom of the College to make any alterations in them previous to that date, except for the purpose of adding the land-tax, when redeemed.

Advowson Fund.

10. Since the year 1800, the College have purchased from their Advowson Funds the following livings, viz.—1. Chalton cum Clanfield, in Hampshire; 2. Ewhurst, in Sussex; 3. Gressenhall, in Norfolk; and 4. Woodton, in Norfolk. The fund has not hitherto been deemed applicable to the augmentation or division of livings. Hence it has happened that heavy expenses have, in the course of the last seven or eight years, been defrayed from the general income of the College.

Collegiate Buildings.

11. This Society's most recently erected Collegiate buildings were completed in 1828. The College were then possessed of building funds sufficient for the purpose.

Answers to 12, 13, and 14, if these Questions be at all applicable to the constitution of this Society, have already been sent among the answers to the list of queries bearing date December 20th, 1850.

(Signed) RICH. OKES, *Provost.*

Joshua King, Esq., LL.D.

From Joshua King, Esq., LL.D., President of Queens' College.

My Lord, *Queens' Lodge, Cambridge, December* 31, 1850.

In consequence of the very infirm state of my health, I am sorry to say that it is utterly impossible for me to comply with your Lordship's letter. As soon, however, as it arrived, I sent it to our Vice-President, Mr. Dalton, requesting him that he would kindly do his best to answer it, which he promised to do. I saw him on Saturday, when he informed me that he had not yet done it, but hoped to do it very shortly.

I have the honour to be, my Lord,
Your Lordship's most obedient servant,

The Right Rev. the Lord Bishop of Chester. (Signed) JOSHUA KING.

Rev. J. E. Dalton, B.D., Vice-President of Queens' College.

Answers from the Rev. J. E. Dalton, B.D.; Vice-President of Queens' College, on behalf of the President.

My Lord, *Queens' College, Cambridge, January* 2, 1851.

The President of Queen's College not being able, on account of the state of his health, to answer the questions put by the Cambridge University Commission, I have at his desire undertaken to give answers, which are written below; leaving it to him subsequently to alter or add, as he pleases. There are certain questions, viz., 10, 11, and 13, which require individual opinion; and feeling that one person could not answer these for another, I have felt constrained to leave them open.

I am your Lordship's obedient and humble servant,

To the Right Rev. the Lord Bishop of Chester. (Signed) JAMES EDWARD DALTON.

Statutes.

1. The Statutes governing the College are the printed Statutes, which are in the Public Library, as reformed in the year 1559; together with certain emendations and alterations made by a Royal Letter of Queen Victoria, in the first year of Her reign.

Headship.

The Head must be a Divine; and at the least have attained the degree of Bachelor of Divinity: he is elected by the Fellows.

No person can be elected a Fellow under the degree of Bachelor of Arts.

Fellowships.

Each Fellow must be elected by the President and Fellows of the Society.

No person is eligible to a Fellowship, or may retain his Fellowship, excepting the Vice-President, or one of the five Senior Divines, who is possessed of real property to the amount, as at present understood, of one hundred and twenty pounds per annum; also the possession of a living of above ten pounds value in the Queens' books requires resignation of Fellowship.

Two Fellows are allowed to retain their Fellowships, if proceeding to degrees—the one in Medicine and the other in Law: in all other cases, Fellows must proceed to the Master of Arts degree at the appointed time; and within two years after must be in Holy Orders; unless, in a particular case, the Society should be willing to defer the entering into orders for a limited period.

All Clerical Fellows are bound to proceed to the degree of Bachelor of Divinity within nine years after the degree of Master of Arts.

Twelve of the Fellows are required to be in Priest's orders.

Deviations from the above rules have in some cases been authorized by Royal dispensation.

It has been customary for the Society to give leave of absence to Fellows desiring to live away from Cambridge.

The emoluments of Fellows vary slightly according to their respective degrees: resident

Fellows receive their commons in Hall free; the non-resident Fellows enjoy their share of all that is divided which accrues from College properties (except a small sum left especially for Fellows in residence during a certain week in the year.) They do not, for the most part, share what may be derived from other sources. *Rev. J. E. Dalton, B.D., Vice-President of Queens' College.*

The Scholarships have been on two occasions consolidated by the College. At the present time— Scholarships.

Five are given annually to Students at the end of their first year; those being selected who have excelled at the yearly Examination: value each 15*l.*, without diminution; tenable for three years.

Two Scholarships are given also to the two best Students in the Examination at the end of the second year: value 40*l.* each, without diminution; tenable for two years.

At the end of the third year the two best proficients at the Examination are removed to Scholarships of the value of 50*l.*: without diminution; tenable for one year.

The duty of the Scholars is to read the lessons for the day in the College chapel.

Occasionally donations are made by the College of 10*l.* or 15*l.*, according to merit, to individuals excelling in the College Examinations.

2. One Bye-Fellowship, called Edwards' Fellowship, is perfectly unrestricted: entitles to rooms and commons. Election is by the President and Fellows. Bye-Fellowship.

One Librarianship, value 15*l.* per annum; in the gift of the President: he occasionally attends in the Library. Librarianship.

Two Chapel-clerkships, in the gift of the President: value 5*s.* 11*d.* per week during residence, and commons. They act as clerks and markers in chapel. The Chapel-clerkships are sometimes called Sedgwick Scholarships: these may be claimed in some particular cases. The person who can claim is appointed scholar; and the College makes up the difference, continuing the payment to the Chapel-clerks. Chapel-clerkships.

Also a Scholarship founded in 1840, value 12*l.*: at present in the gift of the founder.

3. They are admitted by the President, on recommendation of the Tutor, after examination, or of some Master of Arts of the University, who, having examined, gives a certificate of qualification. Admission of Students.

4. Twice each day during Term: the morning service on week days at half-past seven, the evening service at six. On the Lord's day, during the present year, the morning service is at a quarter past nine; the evening service at a quarter to six. The Pensioners and Sizars are required to attend seven times during each week, except during their last Term, when but four times attendance is required. Fellow Commoners and Bachelors of Arts are required to attend four times each week. Attendance is enforced twice on the Lord's day, except in cases where Undergraduates are married, and their wives or families are resident in Cambridge. Divine Service.

5. During the October Term, the first year are lectured in Euclid daily, and also on some classical subject daily. Course of Instruction.

The second year have lectures in Differential and Integral Calculus daily. Lectures on a classical subject twice during the week. A lecture on Paley's Evidences and Ecclesiastical History, once during the week.

The third year, two lectures in the higher branches of Mathematics daily. Those who are not candidates for Mathematical honours are lectured in Mathematics (Algebra and Arithmetic) three times during the week, and are lectured on a classical subject on three days during the week.

The fourth year, if candidates for honours, are examined twice during the week. Those who are not candidates for honours are examined thrice a-week by the Prælector.

During the Lent Term, the first year are lectured on Algebra by the Sadlerian Lecturer daily, and on a classical subject daily.

The second year are lectured on Mechanics daily, and on a classical subject during three days of the week.

The third year, who are candidates for honours, are lectured in Dynamics daily. Those who are not candidates for honours, in Mechanics, during three days of the week; and also on a classical subject during three days of the week.

During the Easter Term, the first year are lectured in Trigonometry daily, and in a clasical subject daily.

The second year, who are candidates for honours, in Newton and Geometry of three dimensions daily: all are lectured in a classical subject daily.

The third year, who are candidates for honours, on Astronomy daily. Those who are not candidates for honours, on a classical subject, during three days in the week: also in Ecclesiastical History during three days in the week.

These Lectures have all direct reference to the University Examinations. The classical subjects for University Examinations are the subjects of the Lectures for those Students who will be examined in them.

The present Tutor occasionally lectures.

Two Fellows are employed as Mathematical Lecturers.

A Classical Lecturer is employed from another College.

The Sadlerian Lecturer is at this time a College Lecturer; one of those mentioned above.

It is the duty of the Prælector to examine the candidates for the B.A. degree: he is not required to examine Undergraduates about to enter the previous Examination, the Tutor or Lecturer just now doing this.

There is one College Examination during the year, in May; conducted by the Tutors and Lecturers.

In addition to the Scholarships which are the rewards of proficiency, there are two prizes of five guineas each to the best proficient in Mathematics of the second and third year. Prizes.

Rev. J. E. Dalton, B.D. Vice-President of Queens' College.

There are also two prizes of five guineas each for the best English and Latin essay, on subjects given by the Dean.

There is also a prize of ten guineas for the best sermon written by a Bachelor of Arts: the subject is given by the President.

A prize also, instituted by the Rev. T. P. White in 1842, for a commencing Bachelor who has taken the highest degree if among the first four Wranglers, or first four on the Classical Tripos. The annual value is of 30*l.* In some particular cases the accumulations are given to the successful candidate.

Attendance at Lectures.

6. Attendance is required and enforced.

In the Mathematical Lectures, when Students are not sufficiently advanced to profit by particular Lectures, discretion is used by the Lecturer as to enforcing or not enforcing attendance.

Attendance at Dinner.

Occasionally attendance at dinner on certain fixed days is required by special notice given. A general observance of attendance is also maintained by the Tutor.

Students are reported to the Tutor if not in their rooms at ten o'clock in summer, at half-past nine o'clock in winter, if in College; at ten o'clock if in lodgings.

Regulations of Discipline and Expenses.

The exercise of discipline is left with the Tutor.

The regulation of the expenses of Students is left with the Tutor in connexion with the parents.

7. The College charges are:—

	Fellow-Commoner. £. s. d.	Pensioner. £. s. d.	Sizar. £. s. d.
Caution-money (returned)	25 0 0	15 0 0	10 0 0
And at the same time (not returned) for plate	17 0 0		
After entrance, till coming into residence, Tutor, per quarter	5 0 0	2 10 0	0 15 0
And also the quarterly payment to Bursar:			
Fees on admission	1 1 8	0 11 8	0 5 0
Average rent of rooms	14 0 0	12 0 0	11 0 0
Bed-maker and shoe-cleaner, per quarter, during residence	1 4 0	1 0 0	1 0 0
	0 8 0	0 8 0	0 8 0
Weekly bill, including payment to the cook, during residence	1 18 3 and 2*s.* for cook	0 14 6 and 6*d.* for cook	0 14 6 and 6*d.* for cook
Quarterly payments—Christmas	0 18 4	0 14 10	0 6 9
Lady-day	1 3 10	0 17 10	0 7 11
Midsummer	0 17 10	0 13 10	0 5 11
Michaelmas	0 15 10	0 11 10	0 3 11
Tuition, per quarter	5 0 0	2 10 0	0 15 0
Fees for B.A. degree	5 9 6	5 9 6	5 9 6
Fees at a Bye-Term	10 9 6	10 9 6	10 9 6

A Pensioner with great frugality has been known to maintain himself, and to pay all expenses to the taking of his degree, for 400*l.*, not including private tuition.

A Sizar might probably, with great frugality, finish the same with from 320*l.* to 350*l.*

Several of the Fellow-Commoners in this College have been married men; as in this case they generally lived with their wives and families, and they were not compelled to pay College expenses for more than what was just the major part of each Term, the sums expended by them in the College have not been great.

The following are the College bills of a Pensioner for two years who has lived with his friends in Cambridge; but has, as regards College, spent while keeping Terms much the same as other Pensioners:—

	For 1849. £. s. d.	For 1850. £. s. d.
Bill to Lady-day	12 6 3	11 19 10
Midsummer	11 0 0	11 19 1
Michaelmas	3 2 10	3 3 10
Christmas	13 9 11	14 1 0

8. The majority of our Fellow-Commoners have spent little more than Pensioners.

A Fellow-Commoner of some station in society might consider an allowance of 300*l.* a-year sufficient for his maintenance and expenses, exclusive of private tuition.

Pensioners are generally allowed from 150*l.* to 250*l.* annually by their parents, exclusive of sums for private tuition.

An allowance of from 120*l.* per annum to 150*l.*, would be considered as sufficient for a Sizar.

Poor Scholars.

9. There is a certain sum left to assist poor Scholars, given at the discretion of the President, averaging annually about 45*l.*

10. I am not aware of any.

From the Rev. J. E. Dalton, B.D., Vice-President of Queens' College, on behalf of the President and Fellows.

My Lord, *Cambridge, Queens' College, December* 12, 1851.

I enclose the answers prepared by Queens' College to the questions of the University Commission.

The meeting which in the last instance received and adopted the answers returned, not consisting of a full majority of the whole body, I was desired to state that, "With respect to the twelfth and fourteenth questions, there not being a majority of the Society present, it was not considered possible to return an answer to them." *Rev. J. E. Dalton, B.D., Vice-President of Queens' College.*

I am,
Your Lordship's obedient and humble Servant,
(Signed) J. E. DALTON,
To the Right Rev. the Lord Bishop of Chester. *Vice-President of Queens' College.*

---

1. The average gross income of our College for the last seven years, derived from estates in land, is 4,560*l.* 6*s.* 2¾*d.* Average gross Income of the College.

The components of this income are:—
(1.) Rack rents, 1,849*l.* 18*s.* 8½*d.*
(2.) Reserved ditto, 1,483*l.* 17*s.* 4$\frac{3}{8}$*d.*
(3.) Fines on renewals, 896*l.* 17*s.* 1½*d.*
(4.) Manorial fines, 128*l.* 9*s.* 11¼*d.*
(5.) Quit rents, 52*l.* 1*s.* 0½*d.*
(6.) Timber, 149*l.* 2*s.*

2. The gross yearly income derived from houses, on an average of the last seven years, is 188*l.* 17*s.* 8½*d.*

The College has no property let upon building leases.

3. None.

4. The deductions are 738*l.* 14*s.* 11*d.* Deductions.
(1.) The expense of collecting, 70*l.*
(2.) Repairs of farm buildings, 241*l.* 5*s.* 10*d.*
(3.) Drainage of farms, 21*l.* 9*s.* 1*d.*
(4.) Interest on debt, 406*l.*

The debt was chiefly incurred for enclosing, and is being paid off by annual instalments.

5. The yearly income, derived from funded property, is 32*l.* 10*s.* 1*d.* Funded Property.
That derived from bank stock, 38*l.* 18*s.* 7*d.*
That derived from shares in Gas Company, 8*l.* 5*s.* 1*d.*

6. The average amount of income, derived from rent of rooms, is 275*l.* 7*s.* 2*d.* Room Rents.
The amount derived from fees paid by members of the College, 243*l.* 5*s.* 3*d.* Fees.

7. The total gross income amounts to 5,347*l.* 0*s.* 1¼*d.* Total gross and net Income.
The total net income amounts to 4,244*l.* 4*s.* 9¼*d.*

8. The average yearly sum received by the President is 608*l.* 13*s.* 4¾*d.* President's stipend, &c.
The average income of a non-resident Fellow is 145*l.* 6*s.* 3*d.*
Each resident Fellow receives, in addition, about 30*s.* a-week during residence.
The average annual amount paid to Scholars is 375*l.*
There are eleven Scholarships of 15*l.* per annum, two of 40*l.*, and two of 50*l.*
There are other Scholarships, which are in the gift of the President.
Extra Scholarships are occasionally granted by the Society.
There is one Bye-Fellow, whose emoluments consist in a right to rooms and commons.

There is an Exhibition called Sandys', the value of which is, the dividend upon 352*l.* 2*s.* 8*d.* consols; this Exhibition is in the gift of the Rev. John Sandys.

The Commons of the Chapel Clerks, and part of the expenses of the Fellows' table, are paid by the College. College Table.

The average annual expense of keeping up, repairing, and restoring the Collegiate buildings, is 339*l.* 19*s.* Expense of repairs of Buildings.

There is no special building fund.

The average annual expense of repairing chancels is 24*l.* 1*s.* 5½*d.*

The annual amount given in prizes is 36*l.* 15*s.* Prizes.

There is also an annual prize of 30*l.*, founded by the Rev. T. P. White.

In addition, extra prizes are given, varying in amount from year to year.

The average annual amount to parish schools is 19*l.* 14*s.* 7*d.* Charities.

The average annual amount to almswomen is 78*l.* 10*s.* 2*d.*

9. Beneficial leases have expired since 1842, the gross increase of whose annual rentals amounts to 460*l.* Beneficial Leases.

The College in two instances advanced two-thirds of the fine to then existing Society, and has been repaid by annual instalments extending over the periods of the respective leases.

Four other leases are now being allowed to run out without any compensation to the President, and those Fellows who would have been entitled to the fines in case of the renewals having been granted, and thus calculating interest at 4 per cent., the interest of the College in the property thus leased has already been increased by 1,700*l.*

During the last fourteen years, by a diminution of the fines, the Society has been enabled toincrease the annual corn-rents in seven leases by 33 quarters of wheat, and 26 quarters of malt.

10. In 1779, the College received from the executor of the Rev. Mr. Hughes, formerly Vice-President of the College, the sum of 317*l.* in money, and 2,400*l.* Consolidated British Annuities, the proceeds of which were to be applied to certain divinity prizes, and to the augmentation of livings. The amount laid out in the augmentation of livings since 1800 is 1,381*l.* Purchase of Advowsons.

In 1835 the living of Bowbrickhill was purchased for the sum of 2,300*l.*, including the expenses of transfer.

Rev. J. E. Dalton, B.D., Vice-President of Queens' College.

Queens' College Library.

The Librarian.

1. It is placed under the care of a Librarian. He is considered as a scholar; his duties are to see that all books taken out of the Library are returned at an appointed time each half-year.

The Librarian generally attends at the library once or twice a week to give out books to different Undergraduates of the College who have orders for those books from the Fellows. He is considered as bound to give out books upon these orders; but his attendance at special times, although now customary, is yet voluntary.

In 1674, Thomas Clarke, M.A. Fellow of the College, and Rector of Maningford Abbots, Wiltshire, gave an estate for the increase of the Library, and for a Librarian, who is to be one of his scholars. This was an estate at Everleigh, Wiltshire, (since exchanged for one at Kingston, Cambridgeshire,) out of which his four scholarships, and three pounds to the College, are first to be paid.

Catalogues.

2. There is both a printed and a manuscript Catalogue of the Library.

Care of the Books.

For the most part the books are not arranged in classes. The room is tolerably ventilated; and is now, by an addition made a few years ago, sufficient for its purpose. The library is parted off from the contiguous building by a party wall, built expressly to defend it from fire: it joins on the other side with the chapel; the chapel again is divided from the rest of the College by party walls.

The Catalogue is well arranged, although the books are not. Its arrangement was made by Mr. Hartwell Horne, and is the same with that of the catalogue to the British Museum. A The Catalogue has also connected with it an alphabetical list of the books.

Library Fund.

3. The fund above mentioned under answer 1. Each Fellow on admission to his fellowship pays also three pounds to the Library fund; also each Fellow Commoner pays two pounds. There is a rent charge also of eight pounds per annum payable, called Sheppey rents; an annuity which appears to have been left by Dr. John Davenant, in 1626.

	£.	s.	d.
In 1845 was expended upon books and binding	75	0	0
In 1846 ,, ,,	106	11	0
In 1847 ,, ,,	21	15	4
In 1848 ,, ,,	73	10	6
In 1849 ,, ,,	87	18	0
In 1850 ,, ,,	64	2	6

Very considerable sums have been laid out for the increase of accommodation, in addition to the above; and also for the fabric of the Library.

Number of Books.

4. The books are supposed to be some where near about five and twenty thousand; the manuscripts about fifty. The number of benefactors is large; see a list on vellum in the Library F. IV. 22. Marmaduke Lumley, D.D. Bishop of Lincoln and Chancellor of the University, gave A.D. 1448, two hundred and twenty pounds to the fabric, and many books.

In 1652, John Smith, M.A. Fellow left the Library about six hundred volumes.

In 1747, William Sedgwick, B.D. President of this College, left his books, consisting of about thirteen hundred volumes, as an heir loom to the lodge.

In 1777, David Hughes, B.D. Fellow and Vice President of the College, left about two thousand volumes, including a very valuable collection of Tracts.

In 1820, Isaac Milner, D.D. late President of the College, Dean of Carlisle, and Lucasian Professor in this University, left by will more than three thousand volumes; this collection is particularly rich in works on the Reformation, and in mathematical treatises of that date.

T. P. White, late Fellow, has since made several additions by gift; he gave a large number of translations of the Bible, or parts of it, into different modern languages. The manuscripts are not believed to be of any very great value. Many of the books are valuable. The library is rich in theological works.

It is tolerably supplied with modern books connected with the usual subjects of academical instruction and study.

Admission.

5. The library is accessible to the President, Fellows, and Librarian. Other members of the College obtain books by means of the President and Fellows; Undergraduates occasionally obtain books by application to individual Fellows: but it is generally the case that they are referred to the College Tutors, who obtain for them from the Library the books which they need.

Any members of other Colleges or strangers are always allowed by the Fellows admission and opportunity of research; they are admitted however only on the responsibility of the President or a Fellow.

SIR, *Queens' College, Cambridge, March 6th, 1851.*

The President of Queens' College desired me to draw up the above answers to the inquiries of the Cambridge University Commission. I have read them over to him, and they have his approval.

I am
Your obedient servant,
(Signed) JAMES EDWARD DALTON,
Vice-President.

To the Rev. W. H. Bateson.

Answers from the Rev. H. Philpott, D.D., Master of St. Catharine Hall.

Rev. H. Philpott, D.D., Master of St. Catharine Hall.

MY DEAR LORD, *Catharine Lodge, Cambridge, November* 24, 1851.

I HAVE the honour to send, for the information of your Lordship and the other Commissioners appointed by Her Majesty to Inquire into the State, Discipline, Studies, and Revenues of the University and Colleges of Cambridge, a copy of the Statutes of my College, Statutes. and the answers to certain questions proposed by the Commissioners.

It is my duty, at the same time, to request your Lordship to communicate to Her Majesty's Commissioners the copy, which I enclose, of the Order made by my College on the 22nd instant.

I am, my dear Lord,

Your Lordship's very faithful servant,

(Signed) H. PHILPOTT.

The Right Rev. the Lord Bishop of Chester.

November 22, 1851.

Communications having been received from the Commissioners appointed by Her Majesty to Inquire into the State, Discipline, Studies, and Revenues of the University and Colleges of Cambridge, requesting information and answers to questions proposed by them, it was agreed by the Master and major part of the Fellows (the minority desiring that no answers whatever should be sent) that such answers should be returned as shall be agreed upon by the Master and Fellows, and that the answers should be sent, accompanied by the following declaration by way of protest.

1. That the College of St. Catharine the Virgin was founded by the private munificence of Robert Woodlarke, D.D., (who obtained a Royal Charter for the purpose,) to the praise, glory, and honour of our Lord Jesus Christ, for the service of his Church, the administration of the word of God, and the advancement of knowledge in Theology, Philosophy, and other learning; and that the said College is governed by Statutes by him provided for that purpose.

2. That no power, other than the Visitor of the College acting in the manner appointed by law, has authority to require answers to questions respecting the affairs of the College.

3. That the College itself is competent to decide upon the desirableness or necessity of introducing changes or modifications into its system of administration, and has long possessed the power, subject to the authority afore-mentioned, of carrying such changes or modifications into effect; and we therefore feel bound respectfully to protest against any violation of its established customs and privileges.

4. That we are induced to return the said answers, solely because we desire, as far as our duty will permit, to protect the College (whose interests we are bound to serve and defend to the utmost of our power) from the injurious effect of partial statements and ignorant misrepresentations.

Answers to Questions proposed in a Paper dated February 18, 1851.

1. The Statutes of the College do not make any mention of the office of Librarian; for many Librarian. years, however, a small salary has been paid to a Librarian. Upon the foundation of the Conduct Fellowship, by Mr. Holway, in 1695, it was agreed by the Master and Fellows, that the Conduct Fellow should "have the advantage of keeping the Library of the College," and since that time the salary of the Librarian has been always paid to the Conduct Fellow.

There are no written regulations defining the duties or authority of the Conduct Fellow in Duties. this part of his office.

Dr. Thomas Sherlock, Bishop of London, and formerly Master of the College, bequeathed Bequest. divers lands, &c., to the Master and Fellows to found a Scholarship to go with the Library-keeper's place, and he directed that the said Library-keeper should be subject to such rules as should be appointed by the Master and Fellows, and approved by the Regius Professor of Divinity, and the Master of St. John's College for the time being. Certain rules and orders were accordingly made, April 26, 1762, prescribing, among other things, that the Scholar should attend in the Library daily, from 10 to 12 o'clock, during Term time, excepting Sundays and holidays, and every Monday, Wednesday, and Friday, for the same hours during the vacations.

It has not been thought necessary, of late years, to enforce this order, and the attendance of the Scholar Librarian is only required at such times and for such purposes as the Master and Fellows may from time to time direct.

2. A catalogue of the books in the Library was printed in 1771, and it has been kept complete Catalogue. up to the present time by MS. additions on interleaved pages. There is also a MS. class catalogue, describing the books contained on the several shelves of the Library.

The books are not arranged in classes according to subject matter, it being found impossible to make that arrangement satisfactorily in a Library which is receiving continual additions.

The room in which the books are placed is amply large for the purpose, and it is light and Apartments. well ventilated: no part of it is fire-proof.

The books are arranged on shelves and in compartments, in the same manner as the books in the University Library, each compartment being designated by a letter of the alphabet, and the several shelves by corresponding numbers. Each book is marked, both on the title page and on the back, with the letter of its compartment, the number of its shelf, and the number of the place which it occupies on the shelf. The same marks being entered in the catalogue opposite to the title of the book, there is no difficulty in finding it at once from the catalogue.

3. The rent of a small close at Over, in Cambridgeshire, is applied to the use of the Library. Library Fund.

Dr. Sherlock bequeathed in 1758 divers lands, &c., at Congeston in the county of Leicester,

Rev. H. Philpott. D.D., Master of St. Catharine Hall.

to the Master and Fellows to found a Scholarship to go with the Library-keeper's place, and for other purposes, which being accomplished, he directed that the remainder of the rents and profits of the estate should be applied to the purchase of new books, to the repairs of the Library, and keeping the room sweet and clean.

The average annual sum expended in the purchase and binding of books during the last seven years has been 61*l.* 12*s.* 10*d.*

Number of volumes.

4. The number of volumes of books and MSS. in the Library is about 7660.

The founder of the College gave 86 books, a catalogue of which is preserved in the College Register. Presents of books have been also given to the College from time to time by members of the Society and other benefactors. Dr. Sherlock, Bishop of London, bequeathed to the College his "library of books, excepting such books, either in English or French, as his wife should choose for herself." The books of this donation formed a very useful and valuable collection, particularly in the department of Theology.

There are not many books in the Library of great rarity or value. It is well supplied with books of Ecclesiastical and Theological literature. Considerable additions have been made of late years to the collection of modern books, and of books connected with the usual subjects of academical instruction and study.

Admission.

5. The Master and every Fellow of the College has a key of the Library for access to it at all times, it being understood among them that the Library is not to be entered by candle-light. They are allowed to take books out of the Library to their own rooms, without restriction as to the number taken, but in every case the title and class-marks of the book are entered under his own name by the person taking it in a book provided for the purpose.

Other members of the College have access to the Library through the Master or any of the Fellows, and are allowed the use of books taken out on the responsibility of the Master or Fellow giving such permission.

Members of other Colleges or strangers are, also, allowed access to the Library, if accompanied by the Master or one of the Fellows.

Answers to Questions proposed in a Paper dated December 20th, 1850.

I.—(A). The Head of the College.

The Regulations of the Statutes

Appointment of the Head.

He is to be elected within five days after the vacancy of the office by the votes of a majority of the Fellows then present in the University.

He is to be of unblemished character, well approved in manner of life and habits, strong in learning and in the practical use and knowledge of business; he must also have taken the degree of Doctor or Bachelor in Divinity, and be thirty years old at least.

He must not hold any ecclesiastical office or benefice, which requires residence by oath, together with the Mastership.

No particular length of residence is prescribed.

The object of the foundation of the College is described to be for the praise, glory, and honour of our Lord Jesus Christ, the advantage of his church, and the administration of the holy word of God, and for increasing the knowledge of divinity, philosophy, and other arts in the University of Cambridge, and accordingly the Master is directed, in common with the Fellows and other members of the College, to devote himself to the best studies, and to all piety.

It is, moreover, the duty of the Head to preside over and govern the Fellows and other members of the College according to the Statutes, to correct and punish offenders, to attend to the management of the College lands and property of whatever kind, to maintain and keep all such property, and all the surplus income which may at any time accrue, and dispose of it in the way which shall be most for the advantage of the College, and to prosecute and defend in his own name all pleas in every Court respecting persons or property in which the College is concerned.

The consent of the Master is made necessary for the election of a Fellow, for the admission of Students not on the foundation, for the appointment of the Steward or Receiver (the only College officer named in the Statutes except the President or Vice-Master who is to be nominated absolutely by the Master), and in general for every act of the Society. It is directed also that the College Seal should not be put to any deed except in the presence of the Master, or with his consent expressed in writing.

Stipend.

It is directed that the Master should receive a stipend of 6*l.* a-year by four equal quarterly payments, and 8*d.* a-week for his servant. He is also to have the use of the chief chamber over the Hall, and of another chamber between the chief chamber and the Library.

Present practice.

The present Practice.—The annual stipend of 6*l.* is still paid to the Master, together with an additional stipend of 1*l.* upon account of Commemorations.

The Master also receives a yearly dividend from the net amount of the rents of certain estates, called Fellowship Estates, the whole of that net amount being divided among the Master and six Fellows, and the Master receiving a share which bears to the share of each Fellow the proportion of 6 to 5.

He receives also the surplus remaining from the rent of a farm at Guilden Morden, in the county of Cambridge (which the College holds by lease on lives from the See of Ely), after deducting stipends paid to the Conduct Fellow, to the Vicar of Guilden Morden, and to certain Scholars, as also the reserved rent paid to the Bishop of Ely, and an annual rent also reserved by the College for the expense of renewing the lease, together with other payments.

The Master also enjoys the office of a Canonry at Norwich, which was permanently attached to the Mastership by the Act 13 Anne, c. 6. *Rev H. Philpott, D.D., Master of St. Catharine Hall.*

The Master also receives an annual stipend of 5*l.* from the rents of certain estates left to the College by Mrs. Ramsden for founding Fellowships and Scholarships and for other purposes; and a small yearly allowance out of the surplus income of those estates.

The allowance made to the Master for his servant was fixed at 45*l.* a-year by a decree of the Court of Chancery, dated August 8, 1807.

(B.) The Fellows of the College.

The Regulations of the Statutes.

Election of Fellows.

It is directed that the election of a Fellow should be made by the votes of the Master, and of the major part of the Fellows; or by the votes of the Master and of half the number of Fellows, if the votes of the Fellows should be divided into two equal numbers. If, however, after scrutinies continued for three days, no one person should have the votes of the Master and major part, or of the Master and half the number of Fellows, the election is then to be made by the Master and two of the Fellows, chosen for that purpose by the major part of the Fellows, in such manner that the person for whom the Master and one of the said two Fellows vote shall be deemed to be elected.

Restrictions.

The person elected Fellow is required to be a native of England, and a Master or Bachelor of Arts. There must not be more than two Fellows at any time natives of one and the same county, and among persons so qualified those are to be chosen who are most distinguished for learning, knowledge, and good behaviour.

No Fellow is to be permitted to take a Degree in any Faculty except Arts or Divinity. Three of the whole number of Fellows must be in Holy Orders, viz., two in Priest's orders, and one in Deacon's, and whenever a vacancy occurs by the cession of one of the Fellows in orders, the Senior Fellow, who is not in such orders, must take them in the course of one year (unless a Junior does of his own accord), or he vacates his Fellowship. A Fellow is also to be removed from his Fellowship if he be convicted before the Master and Fellows by the evidence of competent witnesses, or by his own confession, of any of the crimes of heresy, simony, perjury, theft, adultery, incest, violent assault upon the Master or a Fellow, or of any other great crime; or if he shall have engaged in any unlawful contract or conspiracy against the interest of the College, or have aided and abetted any such attempts. A Fellow is also to be removed from his Fellowship if he absent himself from College for more than sixty days in the year, except on account of the illness of himself or his parents, or some other good and lawful cause to be approved by the Master. A Fellow is also required to vacate his Fellowship if he comes into possession of any patrimony, inheritance, or real property of greater value than 10 marks a-year on the average; or if he obtains any ecclesiastical office or benefice which requires residence or involves the cure of souls, or which, not requiring residence nor involving the cure of souls, is worth more than 10 marks a-year on the average: and in every such case the Fellowship is to become vacant at the end of one year after obtaining possession of such property or benefice.

No Fellow is to go more than four miles out of the University, or to spend the night in Cambridge or its suburbs without the leave of the Master, nor to be absent from College more than sixty days in the year, except on account of the illness of himself or his parents, or some other good and lawful cause to be approved by the Master.

The object of the foundation of the College being described to be for the promotion of learning and piety, the Fellows are directed to devote themselves to the best studies and to all piety. They are required, moreover, to prepare themselves to take Degrees in Arts and Divinity according to the custom of the University, and to hold a theological or philosophical disputation for two whole hours once every week in full term, each Fellow (Doctors excepted) taking his turn in opposing and answering. One of the Fellows is to hold the office of President by the appointment of the Master, and perform all the duties of the Master in his absence, except in matters of importance. One Fellow also, annually elected, is to hold the office of Steward or Receiver, the duty of such officer being to receive the revenues of the College, to take care that all necessary repairs be made at the proper time, and to buy the requisite materials. Some Master of Arts or Fellow in Priest's orders is required also to treat and explain a common place out of the Holy Scriptures once in every week.

The consent of the major part of the Fellows is required for all acts of the Society.

Emoluments.

Each of the Fellows is allowed, for commons and other necessaries, 5*l.* yearly, to be paid in four equal quarterly sums. The stipend of the President is fixed to be 6*s.* 8*d.* a-year, and the stipend of the Steward or Receiver, 40*s.* The Fellows are also allowed the use of chambers in College, according to the appointment of the Master.

Present Practice.

The present Practice.—The theological and philosophical disputations of the Fellows have been long discontinued in accordance with the changes in the method and subjects of study which have taken place in the University. The common places out of Holy Scripture, treated weekly by Masters of Arts or Priest Fellows, have been also discontinued, and sermons are now preached by the Master or one of the Fellows twice every Term at the times of celebration of the Holy Communion; a sermon is also preached by the Master on each of the festivals of Christmas Day, Easter Day, and Whitsunday: a sermon is also preached by one of the Fellows on the day after the end of every Term.

The annual stipend of 5*l.* is still paid to each Fellow, together with an additional stipend of 13*s.* 4*d.* upon account of Commemorations. Each Fellow also receives a yearly dividend from the net amount of the rents of certain estates, called Fellowship Estates, being a sixth part of the residue of that amount after deducting the dividend paid to the Master. Each Fellow also receives a small annual allowance from the surplus income of Mrs. Ramsden's estate.

The stipends of the President and Receiver have been increased of late years in considera-

Rev. H. Philpott, D.D., Master of St. Catharine Hall.

tion of the alteration in the value of money, and of the increased duties discharged by those officers.

(C.)—The Scholars.

Scholarships.

Mention is made in the Statutes of one boy or Scholar to be appointed to read some portion of the Bible, assigned by the Master, every day during dinner, and who is to be called Bibliotista, or Biblicus, but no provision is made for his maintenance or education. No other Scholars are mentioned.

The present Practice.—No person is now employed to read the Bible during dinner.

2.—(A.) Fellowships of Bye Foundation.

(1.) *The Frankland Fellowship.*

Frankland Fellowship.

The nomination and election of the Fellow is to be with the Master and Fellows of the College, yet still so as they may have a careful regard to the recommendation of the mayor and aldermen of Coventry.

The Fellow is to be sent to the College out of the Free Grammar School in Coventry.

He is to have rooms in College rent free, and a fixed stipend of 20*l.* a-year.

An augmentation of the stipend of the Frankland Fellow was made by the Rev. Matthew Scrivener, vicar of Haslingfield in the county of Cambridge, who directs that the Fellow should be paid an additional stipend of 20 marks yearly, but that if he shall be found to have discontinued, and not to have been couchant above 90 days in the year in the College, whether with leave or without leave, he shall be incapable of the additional salary for that year wherein he so discontinues.

The present Practice.—It was decided by Lord Chancellor Brougham, July 5, 1831, on appeal to him as Visitor, that a Candidate presenting himself out of the Free Grammar School in Coventry could not claim election unless he gave satisfactory proof, upon examination, that he was duly qualified in learning. In default of duly qualified candidates from Coventry School, the practice has been to elect persons who have been educated at other schools.

The clear annual income derived from Mr. Frankland's estate being divided between the Fellow and the Scholar of the same Foundation, the Fellow is allowed to receive two-thirds of that income and the Scholar to receive one-third, such being the relative proportions of the stipends fixed by Mr. Frankland.

(2.) *The Conduct Fellowship*

Conduct Fellowship.

was founded partly by the Rev. Moses Holway, of Michaelstow, Cornwall, and partly by the Master and Fellows of the College.

The Fellow is to be elected out of the fittest and best qualified persons in the College, but the persons related in consanguinity to Mr. Holway then in the College, and according to the nearness of such relation (if any such there shall at such times of election be), to be always preferred. In default of such relations of Mr. Holway, the Fellow to be elected shall from time to time be one of certain Scholars in the College of the same Foundation, late of Eton School, if any such shall then be in the College capable, and if there shall be no such Scholar, then one of certain other Scholars, also of the same Foundation, late of Merchant Tailors' School, if capable.

The Fellow is required constantly to do the office of a Chaplain or Conduct—he is also to keep the Library of the College.

His stipend is fixed at 26*l.* a-year, with a chamber rent free; and he is also to have the advantage of the Library-keeper's place.

The present Practice.—In default of the relations of Mr. Holway, and of scholars from Eton, or Merchant Tailors' School, persons not having such qualifications have been elected, or the duties have been performed and the stipend received by one of the other Fellows of the College.

The Conduct Fellow now receives the salary of 26*l.* above mentioned, together with an additional salary paid by order of the Master and Fellows.

(3.) *The Six Skerne Fellowships.*

Skerne Fellowships.

It is directed by the Rules and Orders of the Foundation that the Fellows should be elected after due notice in writing publicly fixed on the gates of the University Schools, and after examination of the candidates by the Master and the Fellows of the Old Foundation and the Fellows of the Skirne Foundation jointly, the Fellows voting first in order of seniority and the Master voting and declaring the election last, his vote being reckoned but as the single vote of one of the Fellows. The candidate who has the greatest number of votes is to be declared duly elected, even though such number be not a majority of the whole number of votes—and if two or more candidates have each the same number of votes greater than the number of votes given for any other candidate, the Vice-Chancellor or his Deputy is to have the casting vote.

It is directed further that in regard of the Foundress having been born in Yorkshire, where her ancestors had been long settled, and of the estates by which her Foundation is to be maintained lying for the greatest part in that county, the best qualified men born in the county of York should be preferred, and principally those who, being Yorkshiremen, have been educated at the Grammar School of Fockerby, in the parish of Adlingfleet, in the West Riding of Yorkshire; provided that those who claim a preference upon account of this school bring a certificate duly attested that they have been *bonâ fide* educated there full three years at least in some part of the time of their education, and provided also they be duly qualified for their

learning and morals. Preference is directed to be given, in the next place, to natives of the county of Lincoln; and in default of candidates fitly qualified from either of these two counties, the election is to be open, and persons born in any county of England or Wales may be elected. *Rev. H. Philpott, D.D., Master of St. Catharine Hall.*

Qualifications.

It is further directed that no person should be chosen Fellow unless he be Bachelor of Arts complete, Bachelor of Laws, Bachelor of Medicine, or Master of Arts, having taken his degree regularly in the University of Cambridge; also that no person should be elected after he has attained the age of 24 years complete, nor any one who has a real estate in possession or held in trust for him, the annual profits of which exceed the clear value of 50*l.* a-year. Moreover, the persons elected are to be such as shall appear upon examination to be the best learned, being also approved for sound religion, piety, virtue, peaceable disposition, and good life and conversation.

Restrictions

If any of the Fellows marry or accept any living or Ecclesiastical preferment of any value whatever above 20 miles distance from Cambridge, his Fellowship is to be declared vacant, but so that he shall be allowed a year of Grace from the time of his having quiet possession—a Fellow may, however, hold any preferment together with his Fellowship within 20 miles of Cambridge, the value of which does not exceed 20*l.* a-year in the King's book. A Fellowship is also to be forfeited if the Fellow be convicted of any enormous crime, in like manner as the College Statutes order.

Stipends.

The Fellows are entitled to the full year's profit of their Fellowships if they reside six calendar months, the time to be computed from Michaelmas to Michaelmas: if they reside less than six calendar months in the year, they are entitled to the full profits only during the time of their actual residence, and for every week in which they are absent they forfeit the sum of 16*s.* 8*d.* There is no other condition respecting residence.

Duties.

The Fellows of this Foundation are required to be subject in all things to the rules, orders, statutes, and discipline of the College, and are to be obliged in their turn to perform all College and University Exercises. It is directed, also, that the Fellows should make a Latin speech before dinner on the day of the Annual Examination of the Scholars of this Foundation: the subject to be the usefulness of learning and of public charities given to encourage and promote it: the First Fellow to begin, and so in order downward, the Senior Fellow who has not made this speech being called upon to make it. Every Bachelor Fellow is also required to take his turn in order of seniority with the other Bachelors on this Foundation in making a Latin oration in the College Chapel on the third Friday of every Term. One of the Fellows of this Foundation is also required to accompany the Bursar in visiting the estates, such visit being made once in every five years, to see that the houses, barns, and buildings, the woods and fences and lands be kept in good order, according to the covenants of the leases.

Each of the Fellows has a vote, together with the Master and the Fellows of the old Foundation, in the election of the Fellows and Scholars of this Foundation.

The clear annual allowance to each Fellow, who resides not less than six calendar months in the year, is 52*l.* If the Fellow does not reside for six calendar months in the year, he is to receive the full stipend of 1*l.* a-week for every week of actual residence, and 3*s.* 4*d.* for every week in which he shall be absent. The Fellows are also allowed to have lodgings in College rent free.

Present practice.

The present Practice.—By a decree of the Court of Chancery, dated December 16, 1845, candidates for Fellowships on this Foundation may be elected whose age does not exceed 28 years.

The Latin speeches on the day of the Annual Examination, and on the third Friday of every Term, have been discontinued.

In addition to the stipend fixed by "the Rules and Orders," every Fellow is allowed out of the surplus income of the estates a further stipend, paid without any deduction made for non-residence. Every non-resident Fellow is, also, allowed a sum for the rent of his rooms which are occupied by some other person.

(B.) Scholarships and Exhibitions.

(1.) *The Bible Clerkship.*

Scholarships and Exhibitions.

The Scholar was to be nominated by the Founder, from time to time, during his life, and after his death to be elected by the Master and Fellows of the College.

The election is to be made of some person born in Londisdale, or in one of the counties of Lancaster, York, or Westmoreland, if such a person can be found in the University who can read elegantly and has some knowledge of singing.

The Scholar is to continue to hold his office till he be admitted to Priest's Orders, or take the degree of Master of Arts.

Bible Clerk.

He is to read the Holy Bible in College at fitting and accustomed times, as the manner is in other Colleges in the University, and to wait upon the Master and Fellows at dinner-time.

His stipend for commons is fixed to be 8*d.* a-week, and he is to be provided with a fitting and convenient chamber.

Present Practice.

The present Practice.—The annual stipend of 1*l.* 14*s.* 8*d.* is now paid to the person who holds the office of Chapel Clerk, the duties appointed by the Founder of the Bible Clerkship having been discontinued, and the lessons in chapel being read in the daily service by all the Undergraduates in Order.

Rev. H. Philpott, D.D., Master of St. Catharine Hall.

(2.) *Mrs. Payne's Two Scholarships.*

Payne's Scholarships.

The only direction is that each of the two Scholars should receive an annual stipend of five marks.

The present Practice.—The whole stipend of 10 marks, or 6*l.* 13*s.* 4*d.*, is now paid to one Scholar, who is also allowed to hold other small Scholarships, to the amount of 21*l.* in all.

(3.) *Sir John Claypoole's Two Scholarships.*

Claypoole's Scholarships.

One of the two Scholarships is to be filled, from time to time, at the nomination of Sir John Claypoole, during his life, provided that the Scholar so nominated shall be found by the Master and Fellows fit and capable thereof, and that the acceptance of such nomination be not against the statutes of the University, nor the customs, statutes, and privileges of the College.

The Scholars are to receive, to be equally divided between them, the sum of 5*l.* 6*s.* 8*d.* yearly out of the rent of certain lodgings or chambers in the College, commonly called the new building. If, however, the said chambers should not at any time produce so much rent, the Scholars are to have no further allowance than the rent will afford.

The present Practice.—The whole stipend of 5*l.* 6*s.* 8*d.* is now paid to one Scholar, who is allowed also to receive the stipends of other small Scholarships, to the amount of 21*l.* a-year in all.

(4.) *Lady Cocket's Scholarship.*

Lady Cocket's Scholarship.

A stipend of 4*l.* a-year has been paid to a Scholar, called Lady Cocket's Scholar, since the year 1630, but there is no document in the possession of the College giving an account of its foundation or prescribing regulations respecting it.

The stipend is now paid annually to a Scholar, who is allowed to receive the stipends of other small Scholarships also to the amount of 21*l.* a-year in all.

(5.) *Dr. Gostlin's Six Scholarships.*

Dr. Gostlin's Scholarships.

It is directed that six Scholars of Catharine Hall should receive 4*l.* each yearly for ever. Each of the Scholars of this foundation, attending the annual commemoration of the Founder, is also to receive 2*s.*

The annual stipend of 12*l.* is now paid to each of two Scholars.

(6.) *The Master's Sizarship.*

The Master's Sizarship.

An annual stipend of 4*l.*, called the stipend of Dr. Sibbes' Scholarship, has been paid to a Scholar, called the Master's Sizar, since 1637. There is no deed of foundation or document prescribing regulations for the Scholarship.

Dr. Thomas Sherlock, Bishop of London, and formerly Master of the College, bequeathed certain lands to the Master and Fellows, upon trust, to pay and apply the clear rents and profits thereof (excepting timber) as an addition to the Scholarship usually given to the Master's Sizar, no regulations being prescribed by him respecting the Scholarship.

The present Practice.—The Sizar is appointed by the Master, and holds the office till he is of standing for the Degree of Bachelor of Arts. No duties or services whatever are performed.

The Sizar receives the annual stipend of 4*l.* as Dr. Sibbes' Scholar, and also the clear rents and profits of the estate.

(7.) *Mr. Spurstow's Scholarship.*

Spurstow's Scholarship.

The Scholar was to be chosen by Mr. William Spurstow, Master of the College, during hi life.

The stipend is fixed to be 5*l.* a-year.

The present Practice.—The Scholar is elected by the Master and Fellows, and is allowed to retain the Scholarship till he is of standing for the Degree of Bachelor of Arts.

He is allowed to receive, also, the stipends of other small Scholarships, to the amount of 21*l.* a-year in all.

(8.) *Lady Barnardiston's Three Scholarships.*

Lady Barnardiston's Scholarships.

The election of the Scholars is to be made by the Master and Fellows of the College, or the greater number of them.

The Scholars are to be such that their parents are not well able to bring them up and to maintain them in the University, and that their sufficiency in learning and honest condition of life and conversation shall be approved and allowed by the Master and Fellows. Preference is to be shown in the election to persons of the kindred of the Foundress, in the first instance; in default of such persons, preference is to be given in the election for one of the Scholarships to a native of the parish of Witham, in Essex, and in the elections for the two other Scholarships to persons educated at Christ's Hospital, in London; in default of such persons, again, preference is to be given in the elections for all the Scholarships to persons of the name or kindred of Sir Thomas Barnardiston, the husband of the Foundress: provided that in all these cases the persons to be elected shall be members of the College, and properly qualified as regards poverty of estate, sufficiency of learning, and honesty of life and conversation. In default of all such persons, to whom preference is to be given in the elections, the Master and Fellows are directed to choose such Members of the College as they shall out of their religious care think most fit both for their learning and honest conversation.

Rev. H. Philpott, D.D., Master of St. Catharine Hall.

The Scholars are to retain their Scholarships until they shall be of seven years' standing from the date of their admission into the University, or shall have had time, according to their several course and order, to take the Degree of Master of Arts.

The three Scholars are to share equally the whole yearly rents and profits of land to be purchased with the sum of 400*l.*, after the decease of the Foundress.

The present Practice.—The land purchased by the executors of the Foundress, and conveyed to the College, having been sold in 1801 for the redemption of the land-tax charged upon other College property, each of the three Scholars now receives a clear annual stipend of 20*l.* 14*s.* 4*d.*

(9.) *Mrs. Stafford's Four Scholarships.*

Mrs. Stafford's Scholarships.

The Scholars are to be nominated and appointed by the Master of the College.

They are described as "Poor Scholars of St. Catharine's Hall, in the University of Cambridge, that shall study divinity, and carry themselves soberly and religiously."

The Scholars are to hold their Scholarships until they take the Degree of M.A., or depart from the College and continue absent for the space of a quarter of a year or more, without the licence of the Master.

Each of the four Scholars is to receive 5*l.* a-year.

The present Practice.—The Scholars on this foundation are now elected by the Master and Fellows at the usual time of electing Scholars, and the whole stipend of 20*l.* is paid to one Scholar.

(10.) *Mr. Hobbs' Scholarships.*

Hobbs' Scholarships.

During the continuance of a certain lease mentioned in the will of the Founder the Scholars are to be chosen by them that have the interest of that lease, and by and with the consent of the Master of the College. After the expiration of the lease, the election is directed to be made from time to time by the freeholders of the cottages and lands, granted by the said lease, for the time being for evermore with the like consent of the Master of the College.

The Scholars are to be "honest, hopeful, poor Scholars, Students in the University of Cambridge, viz., in Catharine Hall and Emmanuel College, or one of them, being also of sober and Christian conversation." The sons of godly poor ministers, painful in the work of the Lord, are to be especially respected before others, and a priority of respect in election of the said Scholars is to be had to Catharine Hall, if any such shall be there to be had and elected, especially as long as Dr. Sibbs should continue Master of the Hall.

The maintenance of the Scholars is to be continued as long as in the discretion of the electors shall be thought needful.

The rents, issues, and profits of the cottages and lands, after the deduction of certain payments directed to be made, are assigned for and towards the maintenance of two or three honest hopeful poor Scholars in Catharine Hall, and Emmannuel College, or one of them, a preference being given to Students in Catharine Hall, especially during the Mastership of Dr. Sibbs.

The present Practice.—The freehold of the cottages and lands being now vested in the Master and Fellows of Catharine Hall, the election of such Scholars as are members of Catharine Hall is made by the Master and Fellows at the same time with the election of other Scholars after the annual College examination in June.

The Scholars are allowed to keep their Scholarships until they take the degree of Bachelor of Arts.

An annual stipend of 4*l.* is paid to Emmanuel College, and the remainder of the rents, after the other payments made, is divided among two or more Scholars. The sums paid to four Scholars last year amounted to 40*l.*

(11.) *Mr. Skerne's Eight Scholarships.*

Skerne's Scholarships.

The Scholars are to be chosen, nominated, and appointed by the Master and Fellows for the time being.

Certain lands, described in the will of Mr. Skerne, are appropriated to the foundation of four of the Scholarships, and the executors of the Founder are directed out of his personal estate to lay out so much money for the purchase of lands of inheritance for ever as shall maintain the other four Scholarships.

The present Practice.—The clear annual income of the whole estate is now divided equally among all the eight Scholars. The stipend of each Scholar last year was 18*l.*

(12.) *Mr. Cartwright's Scholarships.*

Cartwright's Scholarships.

The appointment of the Scholars is to be made by Mr. Cartwright, or his heirs, by note in writing, under his or their hands and seals, and attested by two or more credible witnesses.

The payments to each Scholar are to be made during the space of eight years and not longer, if he so long continue a member of the College and behave himself soberly, and submit to the orders of the College.

The foundation being made for one, two, or three Scholarships, the whole annual payment is fixed at 12*l.*, in such manner that while there is only one Scholar, the whole sum of 12*l.* is to be paid to him; when there are two Scholars, each of them is to receive 6*l.* a-year; and when there are three Scholars, each of them is to receive 4*l.* a-year.

The present Practice.—No appointment of a Scholar has been made by Mr. Cartwright's heirs for many years, but the College has paid the sum of 12*l.* a-year to a Scholar elected at the same time with the other Scholars by the Master and Fellows of the College.

Rev. H. Philpott, D.D., Master of St. Catharine Hall.

Frankland's Scholarship.

(13.) *Mr. Frankland's Scholarship.*

The nomination and election of the Scholar is to be with the Master and Fellows of the College, yet still so as they have a good regard to the recommendation of the Minister and Schoolmaster of Tamworth.

The Scholar is required to be sent to the College out of the Free Grammar School in Tamworth.

The stipend is fixed to be 10*l.* a-year, and the Scholar is to have a chamber in College rent free.

The present Practice.—In default of duly-qualified Candidates from the Free Grammar School in Tamworth, the election is made by the Master and Fellows out of persons educated at other schools.

The stipend paid to the Scholar is one-third of the whole clear annual income derived from the estate, as mentioned already under the head of the *Frankland Fellowship*.

(14.) *Mr. Holway's Two Scholarships.*

Holway's Scholarships.

The Scholars are to be taken from Eton School in the county of Bucks, and Merchant Tailors' School in London, each of them having been a Scholar a year in such respective school as he is of, before he shall be removed and taken into the College. They are to be elected out of the fittest and best-qualified persons in the College; but the persons related in consanguinity to Mr. Holway then in the College, and according to the nearness of such relation (if any such there shall at such time of election be), to be always preferred.

The stipend of each Scholar is fixed at 6*l.* a-year; and the Scholars are to have a preference over other candidates in the election of the Conduct Fellow.

The present Practice.—No candidates from the schools mentioned have presented themselves for these Scholarships for many years, and no other persons have been elected, provision having been made by the founder for the disposal of the residue of the rents of the estate, as stated in page 3.

(15.) *Mrs. Ramsden's Ten Scholarships, called Skerne's Scholarships.*

Mrs. Ramsden's Scholarships.

The election of the Scholars is directed to be made in the same manner and order as the election of the Fellows of this foundation, excepting that the vote of the Master or President or Senior Fellow present shall decide the election in case of an equality of votes for two or more candidates in the same manner as the vote of the Vice-Chancellor or his deputy is allowed to decide in electing the Fellows.

The Scholars are to be Yorkshiremen, and preference is to be given, as in the case of the Fellows, to persons who have been educated three years in Fockerby School. If no Yorkshiremen nor Lincolnshiremen duly qualified appear as candidates, then the election may be of such as have been educated in any school or born in any county of England or Wales.

The Scholarships are tenable till the Scholars shall have taken the degree of Master of Arts, or have become of seven years' standing, even though they do not take the degree of Master of Arts. The Scholars are required also to take the degree of B.A., L.L.B., or M.B., when of sufficient standing.

If the Scholars do not reside the whole of every Term in the year while they are Undergraduates, and the major part of every Term after they have taken their Bachelors' degree, they are to forfeit the sum of 5*s.* for every week of absence. But if they keep the whole of every Term while they are Undergraduates, and the major part of every Term when they are Bachelors, no deduction is to be made from their stipends on account of absence during any other part of the year.

The Scholars are required to perform all College exercises and duties in their turns as others of like standing in the College do. Every Undergraduate Scholar, also, is directed to make a theme every week in Term time upon some subject, to be given out by the Master or Senior Fellows presiding in the Hall at dinner on the Monday; and the Scholars are to bring in their themes on the Wednesday following at dinner to the Fellows' table, such themes being written alternately one week in Greek and the next week in Latin. The Bachelor Scholars are directed to make an oration in Latin in the College chapel immediately after evening service on the third Friday in every Term, such oration to be a quarter of an hour long, and the subject of it to be given out by the Master or Senior Fellow in College at least a fortnight before the time of delivery; the Senior Bachelor on this foundation, whether Fellow or Scholar, taking the first turn, and the other Bachelors succeeding in order till the whole number shall have performed the exercise, when the Senior Bachelor shall be called on again to perform it, and so on in order, provided, however, that the same person be not called on twice within the same year. Moreover, all the Scholars are directed to attend an examination in certain specified Greek and Latin classical authors, to be held on the last Thursday in June, before the Vice-Chancellor, the Public Orator, and the Greek Professor, and every Scholar is to make an exercise for that day, either in verse or prose, on a subject to be given out 10 days before by the Master or President or Senior Fellow in College.

The Scholars are to have chambers in College rent free, and each of them is to receive a clear stipend of 15*l.* a-year, subject, however, to a deduction of 5*s.* for every week of absence, in case the Scholar, if an Undergraduate, shall not have resided the whole of every Term, or, if a Bachelor, the major part of every Term in the year.

The present Practice.—The terminal orations of the Bachelor Scholars have been discontinued, and the Undergraduate Scholars are obliged only to write a theme in Latin once in

every Term. The annual examination, also, is now held on the last Thursday, or last Thursday but one in May, when both the Scholars and the Examiners are in usual course of residence. *Rev. H. Philpott, D.D., Master of St. Catharine Hall.*

In addition to the stipend fixed by Mrs. Ramsden's "Rules and Orders," every Scholar is allowed out of the surplus income of the estate an annual payment of 20*l.*, subject to the deduction of 6*s.* 8*d.* a-week for absence from College, to be calculated in the same way as the deduction of 5*s.* a-week from the original stipend; but Undergraduate Scholars who reside the major part of every Term in the year are allowed their full stipends without any deduction in the quarter from Midsummer to Michaelmas.

(16.) *Bishop Sherlock's Librarian.*

Sherlock's Librarian.

The Librarian is to be elected within three months after a vacancy, by the Regius Professor of Divinity, the Master of St. John's College, and the Master of Catharine Hall. If no election be made within three months after the vacancy, the Librarian is to be appointed for that turn by the Provost of King's College.

The person to be elected must be of two years' standing or more in some College, and must have given proof of his sobriety and industry, but under the degree of Master of Arts. The electors are not confined in their choice to the members of one College only, but may take a person out of the University at large, whenever they think that the so doing will best answer the purpose of the foundation; but the Scholar chosen must in all cases be admitted a member of Catharine Hall.

The office is tenable for the full term of eight years after admission.

The Librarian is to be subject to such rules as shall be appointed by the Master and Fellows of the College, with the approval of the Regius Professor of Divinity and the Master of St. John's College for the time being.

The stipend is fixed to be 20*l.* a-year; and the Librarian is also to have a chamber in College rent free.

The present practice is in conformity with these regulations.

Admission of Students.

3. It is directed by the Statutes that if any Pensioner, Student in Arts or Divinity, shall be pleased to reside in the College, with the consent of the Master and Fellows, he shall bear the burden of his own expenses, both for commons and lodgings. Such persons, moreover, if admitted to the Fellows' table, shall be obliged to take part in opposing and answering in disputations in their proper order with the Fellows. Masters of Arts are required, also, to take their turns with the Fellows, who are in Priests' Orders, in the weekly treatment of common places out of Holy Scripture.

Students, respecting whom satisfactory certificates are presented that they are duly qualified, both as to moral character and learning, are now admitted by the Master and Tutors, and allowed to reside and keep terms either in College rooms or in licensed lodgings, as Fellow-Commoners, Pensioners, or Sizars; and such Students are allowed to proceed to degrees in Law or Medicine, as well as in Arts or Divinity. No Student, however, is admitted who has been a member of another College in the University, if he has resided more than three Terms in that College.

Divine Service.

4. Divine Service is performed in the College chapel twice every day during Term time; on Sundays at 9½ in the morning and at 5½ in the afternoon, and on other days at 7½ in the morning and at 5½ in the afternoon.

Students are required to attend the service twice on Sunday and once on every other day of the week.

Course of Study.

5. The course of Collegiate instruction given to the Students, and its relation to the public examinations of the University, are represented by the following Schedule:—

(1.) *Michaelmas Term.*

Students of the first year.

A portion of some classical Greek author. Variable. (Xenophon's Hellenics in 1850.)	For the College Examination in the Easter Term following.
Euclid's Elements	For College Examination.

Students of the second year.

A portion of some Greek or Latin author. Variable. (The Apology and Crito of Plato, 1850.)	For University Previous Examination in Lent Term following.
Pure Mathematics	For Mathematical Tripos Examination.

Students of the third year.

A portion of some Greek or Latin author. Variable. (Thucydides, book vi., 1850.)	Examination for ordinary B.A. Degree.
Natural Philosophy	Mathematical Tripos Examination.

(2.) *The Lent Term.*

Students of the first year.

A portion of some classical Latin author. Variable. (Cicero pro Milone, 1851.)	College Examination in the Easter Term following.
Arithmetic and Algebra	College Examination.

Rev. H. Philpott, D.D., Master of St. Catharine Hall.

Students of the second year.

A portion of some Greek or Latin author. Variable. (Horace Ars Poetica, 1851.)	University Previous Examination at the end of the Term.
Natural Philosophy	Mathematical Tripos Examination.

Students of the third year.

A portion of some Greek or Latin author. Variable. (Virgil, Æneid 6, 1851.)	Examination for ordinary B.A. Degree.
Mechanics	Examination for ordinary B.A. Degree.
Natural Philosophy	Mathematical Tripos Examination.

(3.) *The Easter Term.*

Students of the first year.

Trigonometry	For College and University Examinations.

Students of the second year,

Pure Mathematics	For Mathematical Tripos Examination.

Students of the third year.

Natural Philosophy	For Mathematical Tripos Examination.
A portion of the Greek Testament (Epistle to the Colossians, and the two Epistles of St. Peter, 1851.)	Examination for the ordinary B.A. Degree.

Students of the first, second, and third years.

A portion of the Greek Testament. Variable. (Hebrews, ch. vii.-xiii., 1851.)	College Examination.

There are also paper examinations in the Michaelmas and Lent Terms on the Theological and Moral subjects fixed for the previous examination, and the examination for the ordinary B.A. degree.

Two Fellows of the College, who have been appointed Tutors, and two Assistant Tutors, are constantly employed in giving College lectures.

Examinations.

A general examination of all the Students in the College is held once every year, about the time of division of the Easter Term; the Students are then examined in the subjects of their respective lectures for the year past. The questions proposed, and the passages selected for translation, are printed, and the translations and answers given in writing, a fixed time being assigned to each printed paper. The names of the Students in each year are arranged after the examination in lists or classes, according to their relative merits.

An examination of the Scholars on Mrs. Ramsden s foundation is also held once a-year, on the last Thursday or last Thursday but one in May, when they are examined, *vivâ voce*, in Greek and Latin Classics by the Vice-Chancellor, the Public Orator, and the Greek Professor.

Rewards.

All the College Scholarships, except those of Mrs. Ramsden's foundation, are given as they become vacant to the Students who distinguish themselves most in the general annual examination, regard being also had to character and conduct, and to the pecuniary circumstances of the Students. Two prizes, of 3*l.* each, in books, are also given at the same time to the Students of the first and second years who have passed the best examination in Classics; and two prizes, of 2*l.* each, in books, to the Students of the same years who have passed the best examination in Mathematics. A prize of 5*l.*, in books, is also given to the Student of any year who writes the best three Latin essays on assigned subjects during the year, one being written in every Term. A prize of 1*l.*, in books, is also given to the Student of any year who passes the best examination in the Greek Testament at the general annual examination. A Divinity prize, called the Corrie Prize, has also been lately instituted, being the interest of Government stock purchased by 166*l.* 6*s.* 4*d.*, but the regulations for the disposal of it have not yet been determined by the Master and Fellows. A prize of 5*l.*, in books, is given to the Scholar on Mrs. Ramsden's foundation who passes the best examination in Classics before the Vice-Chancellor, the Public Orator, and the Greek Professor.

Attendance at Lectures and Dinner.

6. Every person is required to attend the lectures proper to Students of his class and standgin, unless he can give satisfactory reasons to the Tutors for his absence.

Every Student is also required to attend the dinner in the College hall during his time of residence.

College gates closed.

The College gates are shut every morning at 10 o'clock, and all Students coming into College, or into their licensed lodgings, after that hour, are reported to the Master and the Tutors. A fine of 6*d.* is paid to the College porter by every Student who comes into College or into his lodgings after 10 o'clock.

The College cook is directed not to supply a dinner or supper to any Student without the leave of the Tutors.

7.

Rev. H. Philpott, D.D., Master of St. Catharine Hall.

College Fees and Expenses.

	Nobleman. £.	*s.*	*d.*	Fellow Commoner. £.	*s.*	*d.*	Pensioner. £.	*s.*	*d.*	Sizar. £.	*s.*	*d.*
College Admission Fees	1	10	0	0	15	0	0	7	6	0	4	6
Caution Money, which is returned when the name is taken off the Boards	50	0	0	25	0	0	15	0	0	10	0	0
Matriculation Fee	16	0	0	11	0	0	5	10	0	1	5	0
Tuition for the Year	40	0	0	20	0	0	10	0	0	3	0	0
Quarterly Payments to the College and College Officers	0	12	6	0	12	6	0	6	0	0	4	0
Paving Tax, for the Year	0	6	0	0	6	0	0	6	0	0	6	0
Library Tax, for the Year	0	6	0	0	6	0	0	6	0	..		

Rent of rooms.

The rent of rooms in College varies from 5*l.* to 10*l.* a-year.

Scholars who have rooms rent-free pay 10*s.* a-quarter for internal repairs of rooms.

Dinner.

The dinner in hall is charged 14*s.* a-week to every person.

Servants.

Attendants in College are paid 1*l.* 18*s.* for each of three quarters, and 7*s.* for the fourth quarter of the year.

Every member also pays 9½*d.* a-week during residence to the College servants.

Every member of the College pays a share of the expenses of the kitchen and buttery, called Detrimenta, the amount of which last year was 8*s.* 4*d.* to each person.

Combination Room.

Noblemen and Fellow-Commoners also pay their share of the expenses of the Combination Room, the amount of which last year was 1*l.* 16*s.* 3*d.*, to every person who resided more than half of every quarter.

Fees.

The fees paid on taking the Degree of Bachelor of Arts are—

	£.	*s.*	*d.*
To the College and College officers	4	2	0
To the University chest and officers	4	17	6
The Government tax and Registrary	3	3	0

Poor Students.

9. The offices of Chapel Clerk and Master's Sizar are given for assistance to poor Students, who would otherwise have little or no means of bearing the expense of residence at the University. These offices are bestowed by the Master of the College; and the value of the one is 11*l.* a-year, with rooms rent-free, and free commons in hall during residence; and the value of the other is 42*l.* a-year, with rooms in College rent-free.

Regard, also, is had in general to the pecuniary circumstances of the Students in the bestowal of the College Scholarships.

Reduction of expenses.

10. I do not think that it is practicable to reduce the *necessary* expenses of living in College, if regard be had to the habits of those classes of society to which Students usually belong.

Credit.

The existing regulations of the University require that tradesmen should send notice of the amount of every debt, exceeding 5*l.*, contracted by a person in *statu pupillari*, to his College Tutor at the end of every quarter; and compliance with this rule is enforced upon the tradesmen by the punishment of discommuning. The College Tutor is thus continually made acquainted with the habits of his Pupils, so far as regards their dealings with tradesmen in Cambridge, and is in a position to take measures to restrain extravagance by remonstrance with his Pupils or their friends, or by the exercise of College discipline and authority.

Restraint on extravagance.

The University having no direct control over tradesmen who do not live at Cambridge, it has been found difficult to restrain the facilities of credit given to Students by persons who live in London and elsewhere; and extravagance may be indulged by dealing with such persons which escapes the notice of the College authorities. I am inclined to think that something might be done to restrain such extravagance, if it were regarded as an academical offence, to be punished by suspension of degree, by rustication, or otherwise, for a person in *statu pupillari* to contract debts with tradesmen who do not live in Cambridge, during his time of residence, without the knowledge and consent of his College Tutor.

Holway's Scholarships.

12. It has been stated, under the head of Mr. Holway's Scholarships, that no Scholars have been elected on that foundation for many years, in consequence of the failure of candidates from Eton and Merchant Tailors' Schools.

Rewards.

13. It has been the practice of the College for many years to give two or more Scholarships of small amount to the same person, so as to make the assistance thus afforded to Students more effectual, and a better reward for merit.

At the present time the following Scholarships, viz.—

	£.	*s.*	*d.*
Mrs. Payne's (two)	6	13	4
Sir John Claypoole's (two)	5	6	8
Lady Cocket's	4	0	0
Mr. Spurstow's	5	0	0

are given to one and the same person, making together an annual payment of 21*l.*

Dr. Gostlin's six Scholarships, also, are given to two Scholars, each of whom thus receives a stipend of 12*l.* a-year.

And Mrs. Stafford's four Scholarships, amounting together to 20*l.* a-year, are given all to one Scholar,

Rev. J. Cartmell, D.D., Master of Christ's College.

From the Rev. J. Cartmell, D.D., Master of Christ's College.

Foundation of Christ's College.

Christ's College, (into which was merged an earlier College, called God's House,) as founded A.D. 1505 by the Lady Margaret, Countess of Richmond and Derby, Mother of King Henry VII., consisted of a *Master*, *twelve Fellows*, and *forty-seven Scholars*.

King Edward VI. added *one Fellowship* and *three Scholarships*, A.D. 1552.

Sir John Finch and Sir Thomas Baines also founded *two Fellowships* and *two Scholarships*, A.D. 1683.

The Foundress, the Lady Margaret, gave the Statutes, by which the College is at present governed.

The additional Fellows and Scholars are subject to these Statutes, except in particulars which will be hereafter mentioned.

Statutes.

The Statutes were accepted and subscribed by the first Master, and the three first Fellows, who had been Master and Fellows of God's House, October 3, 1506.

At the beginning of the Statutes is this dedication of the Foundation:—

"Ad Honorem Christi Jesu, et Fidei ejus incrementum."

The Master.

1. Mode of appointment.

By the Statutes:—

Election of the Head according to Statutes.

The duty of electing the Master is assigned to the Fellows of the College; and the election must commence on the *eleventh* day after the vacancy of the office is known to the Senior Fellow in residence.

Each of the fifteen Fellows has a vote, if he be present at the election; and the major part of the whole number of Fellows existing must agree in choosing one person, otherwise they cannot complete an election.

If the votes of the Electors are equally divided between *two*, then the Chancellor of the University, or in his absence the Vice-Chancellor, having called to his assistance the two Senior Doctors of Divinity then residing within the University, or—if two Doctors cannot be had—Senior Bachelors of Divinity, and with the assent of one of them, shall appoint one of the two, who had the same number of votes, to be the Master.

If the votes of the Electors be distributed amongst *more* than two, and if, within ten days from that on which the Election commenced, the major part of the Fellows then existing cannot agree upon *one*, then the Chancellor or Vice-Chancellor, with the assent of one of the two Doctors or Bachelors of Divinity, as aforesaid, may at his discretion appoint to the office of Master a person whom he shall deem to be qualified, according to the description given in the Statutes.

Present practice.

According to the present practice:—

The mode of electing the Master is the same as that prescribed in the Statutes, with the exception of a religious service directed to be performed, but now contrary to law.

2. Qualifications for, and restrictions upon, election to the Office.

By the Statutes:—

None is to be elected Master, except he be a Doctor or Bachelor in Divinity, or at least one who, having taken the Degree of Master of Arts, has given himself to the study of Theology. He must be one whom the Fellows have reason to hope will administer the domestic affairs of the College with fidelity, industry, and diligent care; will observe the Statutes; and will defend and take care of the goods, lands, possessions, liberties, privileges, and every right of the College to the utmost of his power.

If any one of the Fellows seems to be qualified according to the foregoing description, the Electors are solemnly enjoined to choose him.

If not, then, as a second range of choice, they are to look for one thus qualified amongst such as have been Fellows and Members of the College. And if, in the second class, a fit person according to the description of the Statutes cannot be found, then the Electors are, in the last resort, authorised to seek for one duly qualified in the University at large.

The practice for a long series of years, when the office of Master has become vacant, has been, to elect one of the then existing Fellows.

3. The conditions and duration of Tenure.

By the Statutes:—

Tenure of office.

The Tenure of the Mastership is for life. If, however, the Master be convicted, before the Visitor, of negligence in performing the duties of his office, of immorality, or of other offences enumerated in the Statutes, chap. 22, then the Visitor may, after certain formalities, remove him.

The Mastership may be held with two, but not more, Benefices with cure of souls; but with any number, not having cure of souls.

The Master may, if he pleases, resign his office, and (unless he possess a Benefice or Pension, or Patrimony, whereby he may be adequately supported,) take the position of a Fellow, and in that case, he is to be exempted from the Scholastic exercises prescribed to the other Fellows, and to be honoured by them as the Senior.

The present practice is in this respect conformable to the Statutes.

4. The length of residence required.

By the Statutes:—

Length of residence required by Statutes.

The Master may not ordinarily be absent, except on College business, for more than one month in each quarter of a year, but for urgent causes, and necessary business of the College, he may be absent for a longer period, and so long as necessity requires; only in such cases it is charged upon his conscience not to disguise or excuse his absence on the pretext of the affairs of the College, unless they truly require it. If he is hindered from

returning by sickness or violent detention, this must be proved before the Chancellor or Vice-Chancellor and two Senior Doctors (or Bachelors) of Divinity, and approved by the Chancellor or Vice-Chancellor and one of them. *Rev. J. Cartmell, D.D., Master of Christ's College.*

In other cases of necessary absence of the Master, the reason for which he may be unwilling to disclose, it is sufficient for him to swear before the Chancellor or Vice-Chancellor and the major part of the Fellows, that he had a most necessary and urgent cause of absence, and he may then take from the next quarter of the year so many days as are necessary to make up not more than two months in one half year.

The present practice:—

For the 18 years during which the present Master has been a Member of Christ's College, the Master for the time being has virtually kept the residence prescribed in the Statutes. Present practice.

5. The duties or services enjoined.

By the Statutes:—

To the Master is assigned the duty and power of administering the whole property, revenues, and domestic affairs of the College, according to the Statutes and Ordinances of the Foundress. Duties according to Statutes.

But he cannot institute or defend any lawsuit in the name of the College; or alienate or demise any of the College property; or grant to any one an office, fee, or pension out of the revenues of the College; or confer presentation to a Living in the College patronage; or do any act by which the reputation or interests of the College may be put in peril; without first calling the Fellows together and obtaining the assent of the major part of them.

Whatever he does with the assent of the major part of the Fellows, provided it be not repugnant to the Statutes and Ordinances of the Foundress, is to be held ratified and confirmed.

Twice a year, within one month after Easter and one month after Michaelmas, the Master is to hold an *Audit*, of which three days notice must be given to the Fellows, and at which a majority, at least, of the Fellows must be present; and to render to them a true and faithful account of his administration of the College property and revenues; of the sums he has expended; of the sums he has received; what the College owes; what is owing to it; that the Fellows may clearly understand the condition of the College.

On Festivals he is to take part in the performance of Divine Service in the Chapel.

The present practice is entirely conformable to the Statutes in these particulars. Present practice.

It may be here observed that the twelve Fellows of the Foundress and King Edward's Fellow, only, have a voice in the disposal of the College property; so that in questions relating thereto, the Master's acts require the assent of the major part of these thirteen. But in proceedings relating to Livings in the College patronage, and to the general interests of the College, the Master must have the assent of the major part of the whole fifteen Fellows.

6. The powers given.

By the Statutes:—

To the Master is assigned authority over the Fellows and Scholars, of directing, ruling, punishing, removing them. Powers given to the Master by Statutes.

But he must exercise his powers of grave punishment and of expulsion in the presence of the two Deans; and a Fellow or Scholar so punished or expelled may appeal, on the ground of undue severity, to the Chancellor or Vice-Chancellor, and two Senior Doctors or Bachelors of Divinity, who are to hear an account of the proceeding from the Deans. The Chancellor, or Vice-Chancellor, if he thinks the Fellow or Scholar in question has a just cause of appeal, may, within a fortnight but not afterwards, with the assent of one of the Doctors or Bachelors of Divinity, order the Master to redress the grievance.

The Master is directed to encourage and treat with kindness the diligent and studious, and always to prefer such, so far as he can: *cæteris paribus*, he is to prefer the Seniors according to admission, in all things pertaining to the College or University, which may produce to them emolument or honour; in the disposal of offices, domestic or public; in presentations to Churches and Benefices; and in the assignment of chambers within the College.

The Master's authority in administering the property, revenues, and general affairs of the College has already been described.

At the Audit, if the Fellows are not satisfied with the accounts rendered by the Master, they may appeal to the Chancellor, or Vice-Chancellor, as in the last case, who, with the assent of one of the two Senior Doctors or Bachelors of Divinity, may reform what is amiss, according to his discretion.

The present practice is conformable to the Statutes in these particulars. Present practice.

7. The Stipend, Emoluments, and Advantages assigned. Emoluments assigned by Statutes.

By the Statutes:—

The Master is to receive annually 6*l.* 13*s.* 4*d.* *as a stipend*, and 20*s.* *pro vestura*.

He and the Fellows, are to dine and sup at one table in the Hall; and he is to receive 12*d.* weekly, during his residence, *pro communis*.

He is to have a servant to attend upon him, for whom is to be paid 7*d.* weekly, *pro communis*, during his residence.

In 6 Edward VI., probably when the new Fellow and Scholars were added, the Master's stipend was increased to 8*l.* annually.

By the present practice:—

The Master receives annually 8*l.* as a stipend, and 20*s.* *pro vestura*. Present practice.

He also receives 1*l.* 11*s.* weekly during residence, and 8*l.* 10*s.* annually for his servant.

In addition to these payments, the Master receives two-fifteenths of the net profits of certain Estates, given to the College by the Foundress and other Benefactors; a deduction

Rev. J. Cartmell, D.D., Master of Christ's College.

being first made from the annual rent of each Estate for the general purposes of the College.

From the rents given for the Foundation of Sir John Finch and Sir Thomas Baines, the Master was to receive 50*l.* a year. But by the imposition of the land tax, and the loss of a small portion of the rents, his share is now reduced to 41*l.* 17*s.* 9*d.*

He also receives 10*l.* a year from the bequest of Mr. Tancred.

The Fellows.

The Fellows on the Original Foundation.

1. Mode of appointment.

Mode of Election.

According to the Statutes:—

A Fellow is to be elected by the Master and Fellows.

On some day within one month after a vacancy is known to the Master, he is required to call the Fellows together, and to admonish them respecting the nomination of such persons for election to the vacant Fellowship, as the Statutes describe.

The Election is to take place on the fourth day after this meeting, and the names of the persons proposed for Election must be submitted (by one or more of the Fellows) in writing to the Master, at least two days before the Election. No one whose name is not thus submitted to the Master by one of the Fellows can be elected.

The reason for this proceeding is, "quo possit haberi diligentior inquisitio per Magistrum et Socios de moribus, conversatione, et aptitudine uniuscujusque, ad quod quemque eorum obligamus in vim juramenti sui." Stat. Chap. 27.

The major part of the Master and all the Fellows existing must agree in the choice of one person. If the major part cannot agree upon one within three days after the commencement of the Election, then the Chancellor or Vice-Chancellor, with the assent of one of the two Senior Doctors or Bachelors of Divinity—as in the case of the Election of the Master—may appoint one of the persons nominated.

The present practice is conformable to the Statutes in these particulars.

Qualifications.

2. The qualifications for, or restrictions upon, Election.

By the Statutes:—

The Fellows are to be chosen from the Scholars, if that can be conveniently done; if not, from others within the University: provided always that they be chosen from the more virtuous, more learned, and poorer sort.

At the time of Election they must be Masters of Arts; or at least Bachelors of Arts, of whom there is good hope that they will in time become learned and virtuous men.

They must also be Priests; or at least must become so within one year after admission, on pain of deprivation.

Not more than two, not Priests, are to be Fellows at the same time.

Of Candidates, who are in other respects equal, those who have poor friends and have the more need are to be preferred.

Of the following nine Counties there must always be six Fellows,—

Northumberland,	Richmondshire,*
Durham,	Lancashire,
Westmoreland,	Derbyshire,
Cumberland,	Nottinghamshire.
Yorkshire,	

Of these nine Counties, or of any other County in England, there cannot be more than one Fellow at the same time.

By the last chapter of the Statutes, persons born in districts where the College property is situated are to have a preference, the preceding directions being also complied with.

These directions of the Statutes have been modified by interpretations of the Visitor in the following particulars:—

January 14, 1806.

A Fellow, if twenty-four years old, or upwards, at the time of his admission, must obtain Priest's Orders within one year after his admission, or lose his Fellowship: if under that age, he must obtain Priest's Orders within one year of his attaining it, or lose his Fellowship.

April 17, 1696.

There cannot be *more than six* Fellows of the nine northern Counties.

The present practice is conformable to the directions of the Statutes thus modified.

3. The conditions and duration of Tenure.

By the Statutes:—

Tenure of Fellowships.

A Fellowship may be held for life; but if a Fellow be convicted, before the Master, of certain grave offences,† then the Master is authorised and required to expel him. If of

---

* In the Statute, the Foundress says: "Richmondiam vero cum suis adjacentibus, cujus et nos gerimus nuncupationem, tanquam privatum ab Eboracensi comitatum debere accipi volumus, et ex utroque comitatu socium aliquem electum iri." Stat. chap. 26.

There is in Yorkshire, round the borough of Richmond, a defined district called the Honour of Richmond, which for this purpose is regarded as Richmondshire.

† Si quis Scholarium Sociorum de hæresi, læsâ majestate, simoniâ, usurâ, perjurio coram judice commisso, furto notabili, homicidio voluntario, incestu, adulterio seu fornicatione manifestis, aut super aliquo crimine consimili legitimé convictus fuerit coram Magistro, aut ejus Locum Tenente, tunc per eundem Magistrum, sive ejus Locum Tenentem, duobus Decanis ad se accitis, a dicto Collegio prorsus amoveatur, tanquam membrum pestilens et cæteris valde perniciosum. Stat. chap. 4.

Rev. J. Cartmell, D.D., Master of Christ's College.

certain minor offences,* then the Master may admonish and correct him; and if after three admonitions he do not amend, then he is to be expelled. He is allowed however to appeal to the Chancellor of the University or Vice-Chancellor, against the Master's sentence, as has been already described.

If a Fellow acquires a Patrimony, a free Chapel, a Pension, or a Benefice without cure of souls, of which the annual value exceeds ten marks; or any Benefice whatever with cure of souls;† then, after one year's peaceable possession of it, he is to receive no further emolument from his Fellowship.

A Patrimony, a free Chapel, a Pension, a Benefice without cure, or any other income, of less annual value than ten marks, may be held with a Fellowship.

By interpretations of the Visitor, the foregoing rules are modified as follows:

January 3, 1677. The above recited sources of emolument must yield an income *certain for life;* or the holding of them does not forfeit a Fellowship.

November 2, 1622. The value of a benefice is to be estimated by taking the sum at which it is rated in the King's Book of first fruits, and deducting therefrom all ordinary annual charges, as for tenths, pensions, synodals, procurations, &c.; the net surplus is its annual value.

October 10, 1682. Any one of the Fellows of the College may hold any living cum curâ animarum together with his Fellowship, that is under ten marks per annum, (which is interpreted to be according to the value in the King's Books, when all constant and necessary expenses are deducted; viz. tenths, pensions, synodals, and procurations) and that not only for one year, but so long as he lives, anything to the contrary in the said statute notwithstanding, because the only reason to the contrary there recited, viz. of praying *satisfactorie* for the soul of the Foundress (being a part of the superstition of the Church of Rome), is now abolished by the statute laws of the realm of England.

Queen Elizabeth's Visitors granted to the five senior preachers licence to hold, with their Fellowships, livings of not greater annual value than 20*l.* as registered in the King's Books, and distant not more than twenty miles from Cambridge.

By interpretations of the Visitor the 20*l.* is to be estimated as the ten marks in the last case; and in 1793 the Visitor determined that the distance from Cambridge might be extended to thirty miles of eight furlongs each.

The present practice of the College agrees with the foregoing statement.

Celibacy.

By the Statutes of the University, if a Fellow of a College marries, he forfeits his Fellowship.

4. The length of Residence required.

Residence required.

According to the Statutes:—

A Fellow is required generally to reside in College. He may however be absent 20 days in a year; and with the Master's permission 30 days in addition to these; and in further addition, with the permission of the Master and major part of the Fellows, 30 days more.

But if his absence be prolonged beyond this, unless he be hindered from returning by severe sickness or violent detention (which must afterwards be proved to and approved by the Master and major part of the Fellows) he is to lose his Fellowship.

Even when properly absent, if the Master and major part of the Fellows think the interests or honour of the College require his return, he must return when summoned, or be deprived. Not more than four of the Fellows may be absent at the same time.

By interpretations of the Visitor—

A Fellow may be absent for the whole or any part of his year of grace; *i. e.* for that year during which he may hold his Fellowship after he has obtained peaceable possession of preferment or emolument of greater annual value than ten marks.

He may be absent, whilst taking possession of any preferment or emolument given to him; or whilst prosecuting any law suit for obtaining peaceable possession of the same.

He may be absent, if appointed domestic chaplain to the Lord Chancellor of England, or to any Privy Counsellor, whilst his personal services are required in the family of his patron: or if intrusted by any of the same persons with the transaction of public business, which necessarily requires his absence from the College, he may be absent so long as that necessity continues.

(The Visitor says that such causes of absence may be considered "violent detention.")

He may be absent, if intrusted with public business of the University by the Senate or Chancellor, so long as such business requires his absence.

Present practice.

According to the present practice of the College, which is sanctioned by long continued custom, the rules of the Statutes prescribing a limited period of absence to the Fellows are not generally observed.

5. The Duties or Services enjoined.

Duties according to Statutes.

According to the Statutes:—

The Fellows are, each in order, to perform Divine Service in the Chapel daily.

---

* Si rixator fuerit, si percussor, seditiosus, nocturnus deambulator, vagabundus in die, aut vehementer negligens in his agendis, ad quæ per Statuta Collegii obligatur, sive in divinorum officiorum celebratione, seu in disputationum observatione, tunc ad discretionem Magistri aut ejus Locum tenentis corrigatur; si que sic emendatus fuerit, bene res successit; alioquin si tertio admonitus se non emendaverit, tanquam insanabile membrum a cæteris omnino separetur. Stat. chap. 4.

† The reason given by the Foundress for this restriction is, "quoniam pro nobis satisfactorie orar cupimus eisdem (sociis)." And she goes on to say, "Si ... salario (quovis) quod satisfactoriam orationem pro aliis expostulat, donatus fuerit, tunc pari modo post annum integrum illorum omnium emolumentorum erit expers. Stat. chap. 33.

Rev. J. Cartmell, D.D., Master of Christ's College.

On the principal festivals, the Master himself is to officiate.

A series of masses for the several days of the week is prescribed.

They are directed to pray *satisfactorie* for the soul of the Foundress, and for those of others mentioned.

The Foundress emphatically commends to them Theology *tanquam metam studiorum suorum;* and to prepare them for this, she wishes them to study and be initiated in Philosophy and other liberal sciences, according to the custom of the University.

She directs that every week they shall hold in the chapel two disputations, one in Philosophy, the other in Theology; in which each Fellow in turn shall be Respondent and Opponent.

She also wishes them to attend and take part in the Scholastic Exercises of the University, as the University Statutes require, and to ascend from Degree to Degree.

According to the oath to be taken by a Fellow elect before his admission, the Fellows are not to proceed to a Degree in any faculty, except Philosophy and Theology.

The Fellows are bound to undertake the following College offices:

The Office of *Lector*, of *Senior Dean*, of *Junior Dean*, of *Steward*, of *Custos Cistæ*, of *Locum Tenens* in the absence of the Master.

By the present practice:—

Present practice.

The duty of performing the daily Service in the Chapel is assigned to the Fellows in turn, each for a week. But they are permitted, for a money payment, to delegate this duty, if they think proper, to the Junior Dean.

The Popish Services are of course discontinued, having become at the Reformation contrary to the law of the land.

The disputations in Chapel are discontinued, but the Fellows in turn, during the latter half of each Term, so long as the Students are resident, preach every Monday morning a short discourse, called a *Common Place*, on a Moral or Religious subject.

The three Senior Fellows also preach in turn at a Service performed in the Chapel on the day after the division of every Term, at which the names of the Benefactors of the College are recited, and their munificence commemorated.

It is permitted to them to delegate the Common Places and the Commemoration Sermons to the Junior Dean, for a money payment.

The Fellows always proceed to the Degree of Master of Arts at the proper time; but, with several exceptions from time to time, they have not generally proceeded to any higher degree.

The Fellows on the Lady Margaret's Foundation never proceed to any Degree, except those of Master of Arts, Bachelor of Divinity, Doctor of Divinity.

The Fellows undertake the above-named College Offices; to each of which, with the exception of the Locum Tenens, it is the practice to appoint once a year.

The Master appoints a Locum Tenens when necessary.

6. The Powers given:

Powers given to Fellows.

All, or nearly all the Powers given to the Fellows (*e. g.*, with respect to the Elections of the Master, Fellows, and Scholars, and with respect to authorizing and confirming the acts of the Master) are described in different parts of this Statement.

The Master, and a major part of the Fellows are to elect the Lector, and the Senior and Junior Deans.

Emoluments according to Statutes.

In all these particulars the present practice is conformable to the Statutes.

7. The Stipends, Emoluments, and Advantages assigned.

By the Statutes:—

To each Fellow who is a Sacerdos, is assigned an annual *Stipend* of 2*l.* 13*s.* 4*d.*, payable quarterly.

If a Bachelor of Divinity, his annual stipend is 3*l.*; and if a Doctor of Divinity, 3*l.* 6*s.* 8*d.*

He is to receive 13*s.* 4*d.* annually *pro vestura*, and 12*d.* weekly during residence, *pro communis*.

The Master is to assign to the Fellows chambers in College, which they are to occupy, two and two together, except in the case of a Doctor, who may have a chamber to himself.

The services of a *Barbitonsor*, and a *Lotrix*, are to be provided for the Master, Fellows, and Scholars, at the expense of the College. The Barbitonsor is to receive quarterly 5*s.*, and the Lotrix 13*s.* 4*d.*

If a Fellow is not a Sacerdos, he is to be content with the payments *pro vestura*, and *pro communis*, and with the services of the Barbitonsor and Lotrix, without any other emolument.

In 6 Edward VI. probably when the new Fellow and Scholars were added, the annual stipend of each Fellow was increased to 4*l.*

Present practice.

According to the present practice:—

To each Fellow on the Foundations of the Lady Margaret and of King Edward VI., is paid an annual stipend of 4*l.*; and no difference is made, whether or not he is a Sacerdos.

If a Bachelor of Divinity, his annual stipend is increased by 6*s.* 8*d.*; and if a Doctor of Divinity, by 13*s.* 4*d.*

He receives 13*s.* 4*d.* annually *pro vestura:* and 15*s.* 6*d.* weekly during residence.

In addition to these payments, he also receives one-fifteenth of the net profits of certain Estates, given to the College by the Foundress and other Benefactors; a deduction being first made from the annual rent of each Estate for the general purposes of the College.

He receives 5*l.* a-year from the bequest of Mr. Tancred.

The sum of 88*l.* a-year, also from the bequest of Mr. Tancred, is divided amongst the Fellows and the resident Scholars; each Fellow receiving a double share.

To every Fellow the Master assigns a separate set of rooms in College, the Seniors being preferred according to the Statute. *Rev. J. Cartmell, D.D., Master of Christ's College.*

The Scholars on the Original Foundation.

Scholars.

1. Mode of appointment.

According to the Statutes:—

The mode of electing the Scholars is to be the same as that of electing the Fellows.

By the present practice:—

An Election of Scholars is held yearly in the Easter Term immediately after the College Examination, on a day appointed by the Master.

The notice of four days, and the nomination and form of Election prescribed in the Statutes, are strictly adhered to.

2. The qualifications for, or restrictions upon, Election.

According to the Statutes:—

Election of Scholars.

The Election of Scholars is to be made from those youths, who are the more virtuous, apt, and distinguished, who are of tried talent and hopeful; not Bachelors of Arts, nor in Holy Orders; who can speak the Latin tongue, and understand it when spoken; who have proposed to themselves (to pursue) the liberal sciences and the study of Theology; and (to seek) the sacred Priesthood: *idoneique ad minus ad legendam sophistriam:* the poor in the first instance, provided they be equal in other respects, are to be preferred: on which account the Foundress wishes Candidates born in the following counties to be preferred, viz.:—

Northumberland,	Richmondshire,
Durham,	Lancashire,
Westmoreland,	Derbyshire,
Cumberland,	Nottinghamshire.
Yorkshire,	

Of these nine Counties (of which also there must be six Fellows) she wishes that there be always 23 Scholars and no more.

There are not to be more than three Scholars of the same County *totius Angliæ* at the same time.

According to the present practice:—

The Scholars are elected from those Undergraduate Students of the College, who are of good conduct, and acquit themselves with most credit in the College Examinations.

There have not been usually so many as 23 Scholars of the foregoing nine Counties, from a want of properly qualified Candidates.

The restriction that there shall not be more than three Scholars of the same County at the same time, is carefully observed.

3. The conditions and duration of Tenure.

According to the Statutes:—

Tenure of Scholarship.

If a Scholar acquires from any source an annual income of more than eight marks, or *any* Benefice with cure of souls attached, then after one year's peaceable possession he is to lose his Scholarship.

He is not to retain his Scholarship after he is of standing to proceed to the Degree of Master of Arts; and he must proceed to the Degrees of Bachelor of Arts and Master of Arts at the proper time.

If an annual stipend of 10*l.* be offered to him, he is to go forth and teach Grammar in any part of England.

The last provision is now obsolete; in other respects the present practice is generally conformable to the Statutes.

A Scholar is not allowed to proceed in any other faculty except in Arts.

If a Scholar be convicted before the Master, of any of the offences described in page 19, the mode of proceeding is precisely the same as with a Fellow.

4. The length of Residence required.

According to the Statutes:—

Residence required.

The Scholars are not to be absent from the College for a whole day or night without the permission of the Master or his Locum Tenens; and not more than 20 days in each year, without just and necessary cause, to be approved by the Master and the major part of the Fellows.

According to the present practice:—

Present practice.

The Scholars are not required to reside longer than the other Students of the College.

By the University Statutes, Candidates for the Degree of Bachelor of Arts are required to reside at least during the major part of each of ten Academical Terms. And the Students of the College are required to reside, not only during the major part of each of these Terms, but so long as lectures are given.

Before a Student can leave the College, he must obtain written permission from the Tutor and one of the Deans.

5. The Duties or Services enjoined. Duties of Scholars.

According to the Statutes:—

The Services of the Scholars are limited as follows:—

Ten, according to their time and order, are each week to serve on Festival days, at the Divine Offices in the Chapel, Priests being excepted.

Two others are to set in order the High Altar, and to take care of the Vestments.

Seven are, in like manner, to attend upon the Fellows' and Scholars' tables in the Hall, in prandiis, et cœnis et biberiis.

An eighth is to read the Bible aloud in the Hall at the time of dinner.

Rev. J. Cartmell, D.D., Master of Christ's College.

The Foundress directs that the Master and Fellows shall require of the Scholars no other services except these.

At all other times they are to be at liberty, and are exhorted, to pursue their studies and the liberal sciences; in order that they may be prepared at the proper time to obtain Academical Degrees.

They are to attend the Lectures and other Scholastic Exercises, both within the College and in the Public Schools of the University.

Six of the Scholars, whom the Master and two Deans shall deem most fit, are to be taught the rudiments of Grammar, in which they are also permitted to take the first Degree; in order that they may be prepared to go forth into any part of England to teach Grammar, as has been before described.

According to the present practice:—

The only services required of the resident Scholars are, to read in turn the Lessons at Divine Service in the Chapel, and the Grace before and after dinner in the Hall.

With respect to the general course of instruction and duty, and the rules of discipline, there is no distinction made between the Scholars and the other Students of the College.

6. The Powers given.

Salaries.

No remark is required on this head.

7. The Stipends, Emoluments, and Advantages assigned.

By the Statutes:—

Each Scholar, during his residence, is to have sevenpence a week paid to the Steward on his behalf *pro communis*.

If the Commons cost more than the whole sum thus paid, the Scholars are to make up the difference themselves: if, on the contrary, the cost be less, the Scholars are to receive the difference.

Chambers.

They are to occupy, two and two together, such chambers as the Master shall assign to them: and to participate in the services of a Barbitonsor and a Lotor (or Lotrix) provided at the expense of the College.

According to the present practice:—

Each Scholar, during his residence, receives fifteen shillings weekly.

He pays for his Commons, and for the services of a laundress.

To each Scholar is assigned a separate set of rooms, for which he pays rent on the same scale as the other Students of the College.

King Edw. VI.'s Foundation.

The Fellow and Scholars on the Foundation of King Edward VI.

King Edward VI. added, in the year 1552, to the Lady Margaret's Foundation, one Fellowship and three Scholarships.

His wishes are expressed in the Deed of Gift as follows:—

"Volumus ac per presentes declaramus quod dictus Magister ac Socii et Scholares dicti Collegii Christi in Cant: et successores sui in perpetuum de cætero sustinebunt unum Socium et tres Scholares in dicto Collegio ultra numerum Sociorum et Scholarium ibidem eis præscriptum sustinendum per et juxta ordinationes fundationis ejusdem Collegii eisdem modo et formâ et cum talibus et consimilibus stipendiis prout alii Socii et Scholares illius Collegii ibidem sustinentur, et sustineri debeantur per et juxta ordinationes fundationis ipsius Collegii."

In the year 1581, a question having arisen whether King Edward's Fellowship ought to be restricted as to Counties in the same manner as the Lady Margaret's Fellowships, the Visitor (the Vice-Chancellor), with two Assessors, made the following statement.

"Nos verò diligenter considerantes non solum verba illius fundationis, quæ potius ad modum, quo alii socii ejusdem Collegii sustentantur, plane referuntur, quam ad aliquam Patriæ, vel Comitatus rationem in illius socii electione habendam (cujus nulla in eâdem fundatione mentio facta sit) verum etiam locupletissimis vestris Testimoniis certiores facti de consuetudine Collegii vestri à primâ illius sodalitii fundatione in hodiernum usque diem, semper aut per majorem partem a vobis observatâ (quæ optima legis interpres dici solet) in quo Collegio Bini semper ex eodem illo Comitatu admittebantur ratione et privilegio illius regiæ fundationis."

The Visitor then proceeded to declare:—

"Quod licebit deinceps Magistro et Sociis illius Collegii virum doctrinæ, egestatis, aut pietatis titulis insignitum, in Socium per excellentissimum illum Principem fundatum, nullâ Comitatûs illius ratione habitâ, in quo sit oriundus, eligere; sive solus sit ex uno aliquo Comitatu, sive alius quispiam antea Socius ex illo Comitatu in prædicto Collegio reperiatur."

A complaint having been made in 1584 touching the same subject to Lord Burghley, then Chancellor of the University, he submitted the question to the Archbishop of Canterbury, and Doctors Goodman, Aubrey, and Cosen, who strongly impugned the foregoing decision; and gave it as their opinion that King Edward's Fellow was bound by all the Statutes, Laws, and Ordinances of the Foundress. Lord Burghley approved of the opinion of the Archbishop and his colleagues.

But notwithstanding this, the usage of the College seems to have been what the practice is now: viz. to allow King Edward's Fellow to be of the same County as any other Fellow of the College, and to continue a Layman.

There are instances of King Edward's Fellow proceeding to Degrees in other Faculties besides Arts and Divinity.

In all other respects, King Edward's Fellow is assumed to be subject to the Statutes of

the Foundress, and to be entitled to the same stipend, emoluments, and advantages, as one of the Fellows of the original Foundation. *Rev. J. Cartmell, D.D., Master of Christ's College.*

In like manner, King Edward's three Scholarships are understood to be free from all restrictions as to Counties; but in other respects the Scholars are subject to the Statutes and enjoy the same advantages as the Scholars of the Foundress.

The mode of election to King Edward's Fellowship and Scholarships is the same as to those of the original Foundation.

The Fellows and Scholars on the Foundation of Sir JOHN FINCH *and* Sir THOMAS BAINES.

In 1683, Sir John Finch and Sir Thomas Baines founded two Fellowships and two Scholarships. Foundation of Sir J. Finch and Sir T Baines.

1. Mode of appointment to these Fellowships and Scholarships.

Upon all vacancies on this Foundation, the Master and Fellows of the preceding Foundations and the surviving Fellows of this Foundation are "to elect in like manner as they do elect to the old Foundation."

2. The qualifications for, or restrictions upon, Election.

The qualifications for Election are generally the same as for the Fellows and Scholars of the old Foundation; but "if any one of the kindred of Sir John Finch and Sir Thomas Baines do stand for either of these Fellowships or Scholarships, then, *cæteris paribus*, i. e. if they be well qualified with learning and manners, they shall be preferred and elected before others."

"These two Fellowships and two Scholarships shall not be limited to any Counties northern or southern, but to all England; nor shall the Fellows and Scholars be obliged to be of divers Counties; but if two persons of the same County be thought worthy, they may be elected, notwithstanding the Statutes of the old Foundation to the contrary, to the Fellowships and Scholarships."

3. The conditions and duration of Tenure:—

"The Fellows (and Scholars) of this new Foundation shall be tied to the observance of all the Statutes of Christ's College, as fully as the Fellows (and Scholars) of the old Foundation," excepting in "the particulars" expressly "specified."

"The two Fellows shall not be obliged to profess Divinity, and enter into Holy Orders, but it shall be lawful for them or either of them to profess Physic, Law, or Divinity, accordingly as they themselves be inclined or think fit. But whilst both or either of them profess Divinity, they shall be incapable of holding any Living with their Fellowships above 50*l.* per annum value at the extended rent, and not to be estimated after the rates in the King's Book of First Fruits."

4. The length of Residence required:—

"It being advantageous to the study of the Civil Law, and more to that of Physic, to travel; any of this Foundation which shall profess Law or Physic, shall have the liberty to travel out of his Majesty's dominions for three years, during which time they shall enjoy their full revenue of 60*l.* per annum; but they shall not be permitted to travel any longer than the said three years, without leave had from the Master, and two thirds of the Fellows in writing, and under the College seal.

"The two Fellows of this new Foundation shall be obliged to residence in the College during their stay in England, in the same manner and form that the Fellows of the old Foundation are by the Statutes of the College obliged to reside, and under the same penalties."

5. The Duties or Services enjoined.

These will appear from the preceding statements.

6. The Powers given:—

The Fellows of this new Foundation have votes in all elections of the Master, Fellows, and Scholars; in all presentations to livings; in the choice of all Preachers, Lecturers, and College Officers; and in all other cases not expressly excepted.

But in the disposal of the property, revenues, or other emoluments of the old Foundation, they have no voice, nor are they in any way whatsoever concerned.

7. The Stipends, Emoluments, and Advantages assigned:—

According to the grant of Sir John Finch and Sir Thomas Baines,

The Fellows were to receive . . .	each £60 a-year
And the Scholars	,, £12 ,,

But by the imposition of the Land Tax, and the loss of a small portion of the Rents,

The Fellows now receive only . . .	£50 5*s.* 6*d.* each
And the Scholars	£10 1*s.* 0*d.* ,,

The revenue of the Fellows and Scholars of this new Foundation is kept separate, and distinctly settled and determined to them alone, and they have no part of any revenue or other emolument settled upon or belonging to the old Foundation.

But, according to the terms of the grant, the Fellows are to have chambers allotted to them in like manner as to the Fellows of the old Foundation; and they have as good a title to all manner of places, privileges, prerogatives, and preferments, both in the College and University and any where else, where the old Foundation is concerned, as any Member of the old Foundation.

The present practice is conformable to the preceding statement.

With respect, however, to the residence of the Fellows, no greater strictness is observed than with respect to the residence of the Fellows on the preceding Foundations.

It may here be remarked with reference to *all* the Fellows of the College, that their

Rev. J. Cartmell, D.D., Master of Christ's College.

seniority is determined by their *first* admission as Fellows, whatever be the Foundation upon which they are elected; and that consequently a Fellow may be elected from one Foundation to another without any alteration in his place relatively to the other Fellows.

Additional Scholarships.

In addition to the Scholarships already mentioned,

Berkeley Scholarship.

1. *Sir Maurice Berkeley, Knight*, agreed with the College, 7 Hen. VIII., that he and his heirs should have the nomination from time to time for ever of one Scholar of the County of Gloucester, to be a Scholar of the College.

Within a month after a vacancy, notice is to be given to Sir Maurice, or his heirs; who thereupon within a limited time shall present a fit person, learned in grammar, ready to read *sovestry*.

The person so presented is to have the same advantages as any other Scholar of the College.

In particular cases the College is not required to give notice; but may choose any according to the Statutes of the College.

Patynson Scholarship.

2. *Dr. Thomas Patynson, Clerk*, agreed with the College, 36 Hen. VIII., that, he during his life, and afterwards, the Dean and Chapter of Durham, shall nominate a Scholar, who shall be kept at the charge of the College over the full number of Scholars then founded or to be founded; and the County of the Scholar may have the full number of Scholars appointed by the Statutes besides him.

The Scholar must be 16 years old; born in the County of Northumberland; or in default of such person, in the Diocese of Durham; or in default of such person, in any other place.

He is to have his grammar competently, intending to be a Priest, and so actually to be at the lawful age. (Certain Popish duties are prescribed to him, which are now contrary to law).

If the Dean and Chapter do not nominate within one month, after notice given within two months of the vacancy; then the College is to nominate such person as is before appointed.

Exhibitions and Scholarships not incorporated, but connected with the College.

Otway's Scholarship

(1.) *Dr. Otway*, Bishop of Ossory, in Ireland, founded *three* Scholarships of 7*l.* a year each, for Scholars from Kirkby Lonsdale School, or, in default of such, from Sedbergh School, with preference, *cæteris paribus*, to those of the name of Otway, and of the township of Middleton.

Dame Drury's Exhibitions.

(2.) *Diana, Lady Drury*, of Pinkney Hall, Norfolk, gave *four-fifths* of the profits of certain lands, &c., to be equally divided into *two* Exhibitions, and paid to *two* such Students of Christ's College, as the Master and Fellows, or the major part of them, shall think most deserving as to Christian morality and good learning.

With a preference, *cæteris paribus*, to such as have been brought up in one of the free Schools of Scarning, Holt, Swaffham, and Norwich.

Tenable till the quarter day next before the Student is of sufficient standing to take the Degree of M.A., or L.L.B., or M.B., in whichever faculty he purposes to graduate.

If the Student be chosen Fellow, the Exhibition to cease immediately.

But the Students are not prevented from becoming Scholars of the House, or from accepting any other places of profit in the College towards their better support and maintenance.

The Students to reside eight calendar months in the year, unless such residence shall be dispensed with by the Master and Fellows, on account of sickness or some other just and reasonable cause.

The present value of *each* Studentship is about 30*l.* a year.

Bunting Scholarships.

(3.) *Mr. Richard Bunting* gave 15*l.* a year for *three* Scholars to be like those of the Foundation.

With preference, 1. to the Parish of South Creake.
,, 2. to the Parish of North Creake.
,, 3. to the Parish of Burnham Westgate.
,, 4. to the County of Norfolk.

in default of such, to any deserving poor Scholar.

Bequest of Jenens.

(4.) *The Reverend Thomas Jenens* left certain lands, tenements, &c., to the College; the profits to be distributed yearly at the discretion of the Master and Fellows, special regard being had to Essex men, if there be any of poor estate in the College.

The yearly profits of Mr. Jenens' bequest are at present about 19*l.*

Widdrington's Exhibitions.

(5.) *The Reverend Dr. Widdrington* founded *four* Exhibitions of 5*l.* *a year* each.

The Master and four of the Senior Fellows, according to admission, of the Lady Margaret's original number in the name of the whole Society, are to elect *four* of the Lady Margaret's Scholars, whom they find to be the most promising and best grounded in Greek and Latin, and approved to be so in the judgment of the Lady Margaret's Professor, and the Public Orator.

Each of the Scholars so elected, to receive 5*l.* for one year only; unless by their good conduct and progress in learning, they are deemed by the Electors worthy of being continued.

Each Exhibition to cease when the Scholar is of sufficient standing to commence M.A.

Petyt's Bequest.

(6.) *Mr. William Petyt* bequeathed 200*l.* to be laid out by his executor, Mr. Sylvester Petyt, with the advice of the Master and Fellows of Christ's College, in such manner as should be thought best for the augmentation of the maintenance of such poor Scholars as

shall be entered of the College; with preference to Scholars from the free Grammar School of Skipton in Craven, Yorkshire. *Rev. J. Cartmell, D.D., Master of Christ's College.*

Certain lands were purchased by the College with the knowledge and approval of Mr. Sylvester Petyt; the share of the profits of which, belonging to Mr. William Petyt's benefaction, amounts to about 18*l.* 10*s.* a year.

(7.) *The Reverend Dr. Hawford, formerly Master of the College*, gave a small rent charge to the College, out of which he directed to be paid 3*l.* to three Scholars, natives of Northamptonshire; in default of such, natives of Leicestershire; in default of such, natives of Suffolk. Hawford's Bequest.

They are to be of the poorest and most toward in learning, whether Scholars of the Foundation or not.

By the imposition of the land tax, Dr. Hawford's bequest to these Students is now reduced to 2*l.* 8*s.* yearly.

(8.) *Sir Walter Mildmay* gave to the College a rent charge out of which 2*l.* a year is to be paid to each of *six* Students, not Fellows, who shall be continually resident and of the poorest sort, so as they be apt to learning. Mildmay's Bequest.

Of the six, one to be born in Essex, and another in Northamptonshire, if there be any meet for the same.

The Scholars to be nominated by the Founder's heirs, so that they be sufficiently instructed in grammar: the sufficiency to be judged and allowed by the Master and major part of the Fellows.

Notice of vacancies to be given to Sir Walter Mildmay's heirs within one month; and if they do not nominate within four months, the appointment, for that vacancy, devolves to the College.

The Scholars to retain their Stipends, as long as they remain in College, except they proceed to the Degree of M.A., or be preferred to Fellowships.

(9.) *Mr. Philip Rawlins, of London*, gave certain directions in his will, in consequence of which a Scholarship of 3*l.* a-year was founded in the College. According to Mr. Rawlins' will, Rawlins' Bequest.

The Scholar to be a native of Suffolk; in default of such, to be a native of Norfolk; in default of such, at the discretion of the Master and Fellows.

If the Scholar takes the Degree of B.A. in his fourth year, he shall continue three other whole years. If he will be a Priest, he may continue until he have some better promotion.

(10.) *The Reverend Richard Carr* bequeathed certain lands &c. to the College, out of the profits of which he directed that there should be paid for *eight* Scholarships, 5*l.* a year each, and for *two* Fellowships, 13*l.* 6*s.* 8*d.* a year each. Carr's Bequest.

The Scholars to be elected from the Free School of Giggleswick by the Feoffees, the Chief Schoolmaster, the Church Wardens of the Parish.

The Electors to make choice only of such Scholars as were either born in the Parish of Giggleswick, and whose parents were inhabitants of the said Parish when the said Scholars were born; or were connected with the Testator by certain degrees of relationship and lines of descent.

The Electors to choose of the poorer sort, although they be not altogether so well learned as other Scholars who have richer friends, provided they be fit for the University.

The Scholars to retain their Scholarships, till they are of sufficient standing to commence M.A., if they should so long continue Students in the College.

The Fellows to be elected by the Master and Fellows out of those who hold, or have held, the aforesaid Scholarships; and none other to be capable of them. The Fellows to retain their Fellowships no longer than they are of sufficient standing to become B.D.

(11.) *Mr. Robert Broadbanke* gave to the Master and Fellows certain Tenements to establish a Scholarship, upon condition that they bring up one Scholar in the said Scholarship of the Town of Huntingdon, if there be any meet for the same. Broadbanke's Bequest.

The present value of the Scholarship is 20*l.* a year.

(12.) *The Reverend Thomas Wilson* bequeathed to the College the sum of 200*l.* to be employed towards the maintenance of *three* Scholars to be elected by the Master and Fellows out of the Free School in Kirkby Lonsdale, until they shall attain to the Degree of M.A., they continuing to reside in the College during the said Term. Wilson's Bequest.

Mr. Wilson's Executor laid out this sum in the purchase of certain lands, &c.

The profits of the same are to be applied to the maintenance of three Scholars from Kirkby Lonsdale School.

The present value of the Scholarships is about 20*l. a year each.* Tancred's Bequest.

(13.) *Christopher Tancred of Whixley Hall, in the County of York, Esquire*, gave certain Tenements to the Master and Fellows in trust that they and their Successors should apply the yearly profits of the same for ever, as an *Exhibition for some young Student in the said College*, whilst he continues an Undergraduate in the same. With preference,

1. To one born in Newmarket.
2. To one born in the County of Cambridge.

In default of either of these, then to such person from time to time as by the Master and Fellows should be thought expedient.

The present value of the Exhibition is about 40*l.* a year.

(14.) *The Reverend Christopher Clarke* granted certain lands &c. to the College, to the intent that *an Exhibition of* 10*l. per annum* without any deduction should be paid to a Student of the College, such as the Master and four Seniors, or the major part of them, shall think most deserving as to morality and learning. Clarke's Bequest.

A Student born in Norfolk or Norwich, and brought up in the Free School of Norwich, to have the preference.

Rev. J. Cartmell, D.D., Master of Christ's College.

He may retain the Exhibition till he is of sufficient standing to be M.A., upon condition that after he is B.A. he reside nine calendar months every year.

If the Student is elected Fellow, the Exhibition is to cease; but he is not to be debarred from holding a Scholarship of the House, or any other place of profit.

Petyt's Bequest.

(15.) *Mr. Sylvester Petyt* directed that there should be paid to the College the yearly sum of *Twenty Pounds*, without any deduction, for *three Scholars* of the Free Grammar School of Skipton; to be equally divided amongst them.

In default of three such Scholars, or one or two of them, the unclaimed Exhibitions to be bestowed on some such other poor Scholar or Scholars of the College, as the Master and Fellows shall think fit; until claimants from Skipton School shall be admitted of the College.

Harvey'sScholarship

(16.) *John Harvey of Thurleigh in Bedfordshire, Esquire*, founded a Scholarship. To be given towards the maintenance of some poor Scholar of Christ's College, born at Thurleigh. In default of such, then to some poor Scholar of the College born in the County of Bedford. In default of such, then whom the Master shall appoint.

No person to receive the Exhibition for more than four years after his first admission; and no M.A. to be capable of receiving it.

The present value of the Exhibition is about 9*l.* a year.

Laughton's Bequest.

(17.) *The Reverend Thomas Laughton, B D., formerly Fellow of the College,* gave a Rent Charge of 3*l.* 6*s.* 8*d.* yearly, to found a Scholarship.

The Scholar not to be a Scholar of the House; to receive 1*s.* 3*d.* weekly until he may take the Degree of M.A., and the surplusage 1*s.* 8*d.* at the end of each year.

The Scholar to attend for an hour every day in the College Library, and to make a double catalogue of the Books, &c.

He is to be allowed the same advantages as the Scholars of the House.

He may be absent six weeks in the year upon leave of the Master; and not longer without some cause to be allowed by the Master and greater part of the Fellows.

He is to be a native of Thorpe Arnold. In default of such, a native of the County of Lincoln.

He is to enjoy all the profits and privileges of a Scholar of the House, notwithstanding there being three Scholars born in the same County as himself.

Risley's Scholarship.

(18.) *The Reverend Richard Risley* founded a Scholarship.

The Scholar to be appointed by the heirs male of John Risley, or in default of them, by the heirs male of James Risley; or in default of them, by certain Feoffees mentioned in Mr. Risley's Indenture.

The Scholar to be of the surname or kindred of Risley. In default of such, to be born in the County of Lancaster.

He may retain his Exhibition for ten years, if he so long continue his studies within the University.

The present value of this Scholarship is about 30*l.* a year.

Risley's poor Scholars.

(19.) *Mr. Risley* also agreed with the Master and Fellows of the College, that after his death they should pay 1*l.* per annum to each of *two* poor Scholars.

The two Scholars to be chosen by the Master and major part of the Fellows out of the Scholars of the College; to be natives of Lancashire; in default of such, of any other County; such as shall be thought most apt, and likest to proceed in learning and also intend to be Priests.

The Scholars, remaining in College, shall retain the Exhibitions till they are Masters of Arts, or beneficed.

Ward's Scholarships.

(20.) *Dr. Seth Ward, Lord Bishop of Sarum*, founded four Scholarships, to be called the Buntingford Scholarships of his Foundation.

The Scholars to be capable of all preferments equally with those of the original Foundation.

Each Scholar to receive 12*l.* a year without any abatement, unless the revenue of the lands &c. given be less than 48*l.* a year; in which case each shall be abated proportionally.

The profits during a vacancy to be reserved for the Successor.

The allowance of any Scholar absent without leave of the Master to cease during such absence, and to be divided amongst those resident.

The scholars to retain their Scholarships until they are of standing to take the Degree of M.A., and, having taken that Degree at the usual time, to enjoy the profits of the Scholarships to the end of one year after; even though they become Fellows.

The Scholarships are appropriated to persons born in Hertfordshire, and educated in some free or licensed School in that County; with preference, cæteris paribus, to those educated in the Grammar School of Buntingford; and of them, to such as have been born in the Parish of Aspeden or the town of Buntingford.

Notice of each vacancy is to be given to the Master of Buntingford School, who may present to the College a Scholar born in Hertfordshire and educated in that School; and the College finding the person so presented fit, shall admit him, and from the time of his admission shall allow him the profits of the Exhibition, and within one month after such admission, shall further admit him Scholar of the House.

If there be no fit person in the School, certain inquiries are directed to be made in the University and at the other Schools of the County for fit persons.

If no persons shall offer, or offering shall not be found capable in respect of learning or other qualifications, then the Master and Fellows are to elect, out of the Students of the College, such as they shall judge to be most deserving.

Plume's Bequest.

(21.) *The Reverend Dr. Plume* gave 100*l.* to the College on condition that they should

allow an annual exhibition of 6*l.* towards the maintenance of one Scholar educated at Maldon; in default of such, to one educated at Chelmsford; and in default of both, to one educated at Brentwood; or in any part of the County of Essex. *Rev. J. Cartmell, D.D., Master of Christ's College.*

(22.) *Mrs. Beridge of Kensington* gave to the College 100*l.* for the promotion of Scholarships. 4*l.* a year is paid to a deserving Student as Mrs. Beridge's Scholarship. Mrs Beridge's Scholarships.

(23.) *Christopher Tancred, of Whixley Hall, in the County of York, Esquire,* founded *four* Divinity Studentships. Tancred's Divinity Studentships.

The Governors and Trustees of Tancred's Charities, viz.:

The Master of Christ's College,
The Master of Caius College,
The President of the College of Physicians,
The Treasurer of Lincoln's Inn,
The Master of the Charter House,
The Governor of Chelsea Hospital,
The Governor of Greenwich Hospital.

are the Electors to these Studentships.

The Elections are to be held at Lincoln's Inn, and to be made by the major part of the foregoing Electors. Each Election is to take place within 28 days of a vacancy.

A Student when admitted to the Charity, must be 16 years of age or more; a native of Great Britain; of the Religion of the Church of England; of such low abilities (or pecuniary means) as not to be capable of obtaining a University Education without the assistance of such Charity; and he is to be educated in the study of Divinity at Christ's College.

He may hold his Studentship until he takes the degree of Bachelor of Arts, and three years after, but no longer.

By order of the Governors—

A Student, when elected, must be less than 22 years of age.

He must reside in Christ's College six lunar months in each year.

And he must take the Degree of Bachelor of Arts, as soon as he is of proper standing.

The present annual income of each Student is 107*l.* 8*s.*

Regulations for the Admission of Students, over and above the Members of the Foundation. Admission of Students.

By the Statutes:—

"Nemo alius, ut Pensionarius, admittatur ad convivendum et conversandum in dicto Collegio nisi qui Testimonio Magistri et Majoris partis Sociorum probatæ vitæ et inviolatæ famæ fuerit; quique aut Scholaribus Sociis aut Discipulis in moribus probis excolendis, Actibus Scholasticis exercitandis, et divinis officiis celebrandis, se conformaturum promiserit atque id quidem juramento, priusquam intra dictum Collegium admittatur."

According to the present practice:—

A Candidate for admission must present to the Tutor a certificate from some Graduate of Cambridge or Oxford, stating that he is properly qualified by attainments and character to be admitted. The Master, or his Locum Tenens, and the Fellows in College then signify in writing that they are content A. B. should be admitted—after which his name is placed on the College Boards.

If a Member of another College applies for admission he must produce a certificate from the Master, Tutor, Dean, and Prælector of his College, stating that, during his residence, he has conducted himself to their satisfaction, and that he has their permission to remove.

Divine Service in the College Chapel.

Divine Service is performed twice daily in the College Chapel—on Sundays at half past nine in the morning and six in the evening; on other days at half past seven in the morning and six in the evening. Divine service.

During the Long Vacation there is Service twice on Sunday, but on other days in the morning only.

The Communion is administered six times in the course of the year, viz., on Christmas-day, Easter-day, and Whitsunday, and on a Sunday near to the middle of each Academical Term—on each of which days a sermon is preached.

The Students in residence are required to attend Divine Service twice on Sunday, and six times in the week besides. It is hoped that each Student will attend *once at least* every day.

A Candidate for Holy Orders applying to the Master and Fellows for the usual College Testimonial must have received the Communion in the College Chapel once at least during each year of his residence.

Collegiate Instruction and Examinations.

1. A Candidate for the Degree of Bachelor of Arts is required by the University Statutes to reside during the major part of each of ten Terms, and usually commences his residence in the Michaelmas Term. Collegiate instruction and examinations.

During the three Terms of his first Academical year the subjects of his College Lectures are Euclid, Algebra, Plane Trigonometry, portions of some Greek and some Latin Classical Author, and one of the Gospels in Greek.

In the second and third years the subjects of Mathematical Lecture are Conic Sections; the Differential and Integral Calculus; the Elements of Mechanics, comprising Statics and Dynamics; Newton's 'Principia,' Book I., Sections 1, 2, 3, 9, 11; Optics; Hydrostatics; and Plane Astronomy—which comprise the greatest part of the subjects in the *University Examination for Mathematical Honours.*

Rev. J. Cartmell, D.D., Master of Christ's College.

Collegiate instruction and examinations.

There are usually two classes of Mathematical Lectures in the second and third years—one for the higher, and one for the less advanced, candidates for Mathematical Honours.

In the Michaelmas Term of his last year a candidate for Mathematical Honours is practised in Examinations twice a week.

Besides these, during every Term in the second and third years, those Students who are Candidates for the *University Voluntary Classical Examination* are lectured in a series of Classical subjects, so arranged as to afford the opportunity of giving them effective assistance in their course of reading.

In the two first Terms of the second year Lectures are given preparatory to the *University Previous Examination*, which a Student must pass at the end of the Lent Term of his second year.

And after the Previous Examination, Lectures are given daily during every Term for the remainder of the Academical course in the subjects prescribed for an ordinary B.A. Degree—which all the Students of the College, Candidates for an Ordinary Degree, are required to attend.

Besides these, Lectures are occasionally given in such portions of the writings of the Early Fathers, as may be assigned for the *Voluntary Theological Examination.*

2. The number of Fellows employed in giving the College Lectures is *five.*

3. There is an Elementary Examination for the first year at Christmas in Euclid, Arithmetic, Elementary Algebra, and the Classical subject of Lecture of the preceding Term; but the principal College Examination takes place immediately after the division of the Easter Term in each year.

It is mainly conducted by those Fellows of the College who are engaged in the Tuition.

The Students are examined according to their years of standing.

Those of the first year are examined in their subjects of Lecture; and are classed according to the aggregate merits of each in those subjects.

In the second and third years, the candidates for Mathematical Honours, for Classical Honours, and for an ordinary Degree, are examined and classed separately.

All the Students in the second year are examined by the Master in one of the Gospels in Greek.

There is a Voluntary Examination for the second and third years in the elements of the *Hebrew Language.*

The questions of Examination are required to be answered in writing.

Rewards.

4. The rewards for proficiency.

To the first Student in the first year
" " in Mathematics in the second year
" " in Classics
" " in Mathematics in the third year
" " in Classics

} A Prize of books of the value of three guineas is given.

and to the second of each of these classes a Prize of books of the value of two guineas is given.

Two Fellows of the College have recently given 100*l.* each; the interest to be awarded in two Prizes for proficiency, one in Theological learning, the other in the Hebrew language.

In the Michaelmas Term of every year, two Prizes of books of the value of 3*l.* each are given for the best composition exercises in Latin Prose and Verse; for which any Undergraduate of the College may be a Candidate.

Similar prizes are given in the Lent Term.

In addition to these Prizes, the order of merit in the annual Examinations determines the elections to College Scholarships, and the awarding of the several Exhibitions and Scholarships, of which the Master and Fellows have the disposal.

Dr. Beilby Porteus, late Lord Bishop of London, in 1807 munificently transferred to the College the sum of 1200*l.* in Government stock; the interest of which is to be expended in the purchase of three gold medals, to be contended for annually by the Students of the College in the following order:—One Medal of 15 guineas for the best Latin Dissertation on some evidence of Christianity; another of 15 guineas for the best English Composition on some Moral precept of the Gospel; and one of 10 guineas to the most distinct and graceful reader in, and regular attendant at, Chapel.

Regulations of Discipline.

Regulations of Discipline.

1. Every Student of the College is required to attend the Lectures appointed for him. Neglect of this duty is noticed and reproved by the Lecturer, and, if persevered in, is reported to the Master.

2. No formal rule is made for enforcing the attendance of Students at the dinner in the College Hall. It is, however, understood that habitual absence is considered by the authorities as inconsistent with regularity, good order, and moderate expenditure; and, if observed, will be reprehended.

3. By the Statutes, and according to present practice, from Michaelmas to Lady Day the College Gates are closed at nine o'clock in the evening, and from Lady Day to Michaelmas at ten o'clock; after which, no Student living in College can go out without written permission from the Master or one of the Fellows.

Lodgings licensed for Students are closed at 10 o'clock all the year.

Those Students who come in after the closing of the College Gates, or of their lodgings are reported to the Master.

Rev. J. Cartmell, D.D., Master of Christ's College.

4. The principal Regulations of discipline as to the expenses of Students are the following:—

Parties.

(1.) A Student cannot give in his College rooms or licensed lodging a dinner party, a supper party, or other large and expensive entertainment, without written permission from the Tutor.

Debts.

(2.) The debt which a Student can incur with the College cook is thus limited: the Tutor does not enter in the quarterly account of any Student for the cook's bill, a sum exceeding 6*l.* If the Student owes to the cook a larger sum than this, 6*l.* only is entered, and the balance is carried on to the next quarter; and if the sum due at one time exceeds 20*l.*, the cook is forbidden to supply to that Student any more articles in his rooms until the whole arrear is paid.

Tradesmen's bills.

(3.) The Tutor of the College receives from certain appointed Tradesmen of Cambridge (one at least of each class supplying such articles as a Student ordinarily requires) the bills incurred by his Pupils, which he charges quarterly, with the several payments due to the College, to the parent or guardian of each Student; and these are required to be discharged within a limited time.

By a Regulation of the Vice-Chancellor and Heads of Colleges, every tradesman of Cambridge is required, on pain of discommuning, to send to the Tutors of Colleges, at the end of each quarter, a list of all bills due from their respective Pupils, which exceed 5*l.* The Tutor of Christ's College submits the bills thus sent to him, every quarter, to the parents or guardians of his Pupils.

Estimate of the necessary Expenses of the several Classes of Students.

Necessary expenses.

The following are offered as approximate estimates of the *necessary* expenses of the several classes of Students, comprising the particulars mentioned.

The Student is assumed to reside in each Academical Term; and, upon the whole, 26 weeks in the year.

Rent of rooms.

It may be premised that in Christ's College, there are 71 sets of rooms, the rental of which is as follows:—

38	at	16*l.*	a-year
20	„	14*l.*	„
4	„	11*l.*	„
1	„	8*l.*	„
7	„	4*l.*	„ (Attics.)
1	Free		

If a proper Sizar inhabits one of the Attics, he pays 1*l.* 10*s.* a-year for rent.

Annual expenses for a Nobleman.

Actual Expenses of Students.

Instead of giving an estimate of the *actual* average expenses of persons in the several classes of Students, I have, in a subjoined table, drawn out from the Tutor's Books the total expenses of each of 104 Students of Christ's College, from first admission until proceeding to their first Degree. Actual expenses of Students.

The first column gives, in each case, the total of all the bills charged to the Students up to the Quarter-day next following his first Degree.

Each sum includes Admission fees, Matriculation fees, College and University Degree fees, but not Caution Money, nor any charge for private Tuition.

It also includes all College charges of every description, and such bills of the appointed Tradesmen as the Student was not furnished by his parents or friends with the means of paying within a short time after they were incurred.

Every Student, who proceeds regularly to the Degree of Bachelor of Arts, resides the major part of each of ten Terms, and completes his degree in the eleventh Term from that of his first residence. I have set down each Student admitted to his Degree in January, as residing during the eleventh Term. Residence required.

In the second column, I have set down the sums received by each Student from Scholarships, Exhibitions, and other sources of that kind; and thus the third column shows the actual net expense (exclusive of private Tuition) of each at the University, from the time of entrance until that of the first Degree, so far as it came under the knowledge of the College Tutor.

If residence during a Long Vacation were reckoned as for a Term, the actual average annual expense of all the Students might easily be obtained.

It may, however, be observed with respect to the value of such an average, that the total expenses of the several Students differ very widely, according to the condition in life, and the habits of frugality, or the reverse of each.

All, or nearly all, the Students of the College who proceeded *regularly* to their respective Degrees, in the years 1843-1849 inclusive, and completed the whole of their residence at the College are included in the lists.

The other Students of the same standing, either from some cause proceeded irregularly, or *migrated* (as the phrase is) during their course from another College.

Their cases, however, would not show any features different from those enumerated.

Provision made in the College for the Assistance of Poor Students.

There are constantly *four* Sizars in the College, and occasionally more, who dine after the Fellows, receive 4*l.* a year each, and have the advantages of paying according to a reduced scale of College charges, as described in page 384. Poor Students.

The ordinary rule of the Master and Fellows is to select the Sizars from those Students of the College who have resided some little time, and who seem by their good conduct, condition and circumstances in life, and acquirements, considered together, to be pointed out as most deserving of the bounty of the College.

Occasionally, a Student who has been recommended to the Master and Fellows by a late Fellow or by some one well known to them as possessing more than ordinary ability, and as wanting money or friends to defray the expenses of a Pensioner, has been received as a supernumerary Sizar.

In disposing of several of the Exhibitions, regard is directed especially to be had to Students of limited pecuniary means.

Practicability of reducing the Expenses of College Residence, and of further restraining Habits of Extravagance, and Facilities of Credit.

I am of opinion that the *necessary* College and University expenses of a Student are now fixed on a moderate scale, and that it is not practicable, very materially, to reduce them. Reduction of expenses and restraint on extravagance.

I also think that the subjoined Table shows that habits of extravagance and needless expense were, in the interval specified, very unusual amongst the Students of this College.

At the same time I must add that cases have occasionally come to my knowledge, indicating on the part of some, though very few Students reckless and most reprehensible expenditure, which, for the well-being both of such Students themselves and of their companions, required to be peremptorily checked and put down.

But it is very difficult to suggest any *general* rules which will effectually restrain expensive habits. If a Student is discovered to indulge them, he ought to be remonstrated with

* When a student's name is taken off the Boards, his Caution Money is returned.

Rev. J. Cartmell, D.D., Master of Christ's College.

and warned by the College authorities, and if they are not at once abandoned, he ought to be removed from the College.

Recommendations.

I venture to make a few observations on the subject of General Rules, more stringent than those we now have, to be applicable to all Students.

In framing such rules it must be borne in mind what is the condition in which Students come to the University; and what the extent of control, to which it is possible or desirable for the College authorities to subject them.

A Student entering the University has at least reached the age bordering on manhood, and has thus outgrown the system of constant supervision and control, beneficially exercised upon him at home or at school during his earlier years. The rules, to which he is required to submit whilst here, must be such as a generous and high-spirited man can cheerfully observe, without any feeling of humiliation or of restraint unsuitable to his years. To require him to show himself at frequent periods of the day, to allow the privacy of his rooms to be broken in upon by a College Officer, to prescribe to him fixed hours of study or of recreation, or to prevent him entirely from receiving his friends at a temperate meal, would be inapplicable to his age, and would much impair the advantage arising from residence at the University, considered as a course of discipline.

Discipline.

It is generally assumed that the discipline imposed by the College and University upon a Student ought to be something intermediate between the control to which he was subject whilst a boy, and the absolute freedom which awaits him when he enters the world.

On this account the principal and most effectual restraints which we can impose are of a *moral* kind. We endeavour to make a Student feel that to a certain extent he is his own master, that his conduct must be governed within such limits, as it soon must be absolutely, by his own sense of duty and responsibility, and that the estimation in which he will be held depends entirely upon himself.

Our rules of discipline, and the degree of attainment absolutely required, are fixed according to the same principle. It is enjoined that a Student should attend the daily Service in Chapel, the daily Lecture; that he should not keep unseasonable hours at night, and the like; but he is free to dispose of several hours of each day as he thinks right. So also the amount of attainment required of all is so moderate as to be within the reach of nearly every Student of ordinary capacity and diligence. The pursuit of all the higher and more difficult branches of study is entirely voluntary.

And I think the advantages of this limited freedom so great, in forming habits of self-dependence and forethought, in training a young man to be guided by his own sense of duty, not merely by the will of another, and in educating all his higher and nobler powers, that I would not have it curtailed, even with the chance of more stringently restraining the weak-minded.

But although it seems to me inexpedient to subject our Students to stricter rules than those we now have, I am far from underrating the almost incalculable evils of extravagant habits amongst any class of them, however small. On the contrary, as I have before said, I think that a Student persisting in habits so pernicious ought to be summarily removed.

Credit.

And it is well worthy of careful consideration whether the power of indulgence may not be put further out of reach, by diminishing the facility with which Students can obtain credit, or raise money on personal security.

The greatest evil with which we have to contend arises from the latter more than the former.

Tradesmen.

I think that, for the Tradesmen recognised by the Tutors, and for all persons whose credit and respectability of character would be damaged by *discommuning*, the regulations now imposed are generally sufficient to prevent an undue amount of credit being extended to the Students.

Money lenders.

But the case is very different with respect to money lenders, and the agents they employ, usually some of the lowest class of tradesmen.

There are certain persons resident in Cambridge and elsewhere, moving apparently in a respectable station in life, who systematically carry on the disreputable and disgraceful occupation of lending money on personal security, and at an enormous rate of interest, to young men of weak resolution and principle.

The lures which persons of this class hold out to tempt a youth with ready money; the extortionate terms which they obtain from him in the promises for future payment; and the means which they use to enforce their iniquitous demands, so soon as he has attained any position where exposure would bring upon him disgrace and ruin; are, unhappily, too well known in the world to need description.

The authorities of the University have much difficulty in dealing with such cases; for, from their nature, detection can take place but seldom; and when it does, the proof is generally only sufficient to convict the agent who conducted the negotiation, not the principal who supplied the money,—and the agents are not of a station to feel sufficiently the effect of the severest penalty which the Vice-Chancellor and Heads of Colleges can inflict, viz., discommuning.

I have thought it right to describe this evil—the greatest which exists amongst us, inasmuch as it affords the present means of pursuing almost every other,—which we share with society at large, and cannot entirely put down.

I am not prepared to suggest a remedy for it; but I should be most thankful to have one pointed out.

Appropriations, Limitations, or Restrictions, now affecting the Fellowships, or Scholarships, or Exhibitions in the College.

Rev. J. Cartmell, D.D., Master of Christ's College.

I. I am of opinion that the change of times and circumstances renders it expedient to remove several of the limitations and restrictions now affecting the election to, and tenure of, the Fellowships and Scholarships of the Lady Margaret's Foundation.

Removal of Restrictions on Fellowships and Scholarships.

1. The Fellowships.

a. It may fairly be assumed that the restriction allowing only one Fellow of the same County at the same time was imposed, that persons of any one particular locality might never obtain predominance in the College, or be enabled continually to elect their kindred, friends, and neighbours, and that the object of giving six Fellows to the nine northern Counties was to secure to a part of the kingdom, at the time of the foundation the poorest and most thinly populated, a due share of advantage.

The elections being now made under the control of public opinion, and governed by the attainments and Academical distinctions of the Candidates, there does not seem to be any sufficient reason for continuing thus to narrow the range of choice; and I think, therefore, that the means of usefulness of the College would be very largely increased, if the restrictions as to Counties were entirely removed, and if any one of the Queen's subjects, possessing the other qualifications, were capable of being elected.

b. I think also that the interval allowed for filling up a vacancy of a Fellowship, viz., one month after it is known to the Master, is too short for the purpose. The interests of the College would be better served by extending this to a year, or by having a fixed period in each year, one month from Easter for example, within which elections to vacant Fellowships must be made.

c. It is also desirable that a Fellow should have a longer period than one year for obtaining Priest's Orders. I think that this might fairly be extended to five years.

d. The great change which has taken place in the nature of property and the value of money, since the Lady Margaret's day, seems to point out some change and extension of the limit of annual income, which a Fellow may possess with his Fellowship.

It would seem not unreasonable to require that the limitation should affect income derived from any source whatever, provided it be permanent, and that the extreme amount allowed should bear a fixed ratio to the average value (take, for instance, for each year the average of the preceding seven) of a Fellowship.

2. The Scholarships.

For similar reasons I think that the restrictions affecting the Counties of Candidates for Scholarships might, with great advantage, be removed; and that any of the Queen's subjects, possessing the other qualifications, might be capable of being elected, without any reference also to their future professions.

It seems, too, quite unnecessary to impose upon the Scholars any limitation as to the amount of annual income which they may possess with their Scholarships.

II. Except with reference to the limitation of Counties, the same observations will apply to the Fellow and Scholars of King Edward VI., and to those of Sir John Finch and Sir Thomas Baines.

I think, however, that the privileges of laymen to hold the Fellowships on both these Foundations ought to be preserved, as well as the preference given in the Statutes of Sir John Finch and Sir Thomas Baines to the kindred of the Founders.

III. The Scholarships and Exhibitions given to the College, but not incorporated with it.

Exhibitions.

When a Benefactor has confined his Scholarships or Exhibitions to Students born in particular localities, or educated at particular schools, I think that, in disposing of his bounty, the range of choice ought in the first instance to be strictly limited to Students possessing the qualifications described by him, and election made from such Students, if any be found fit as to learning and moral character, without admitting any other Candidate.

But if none of the Benefactor's description offer, or if, of those offering, none be found fit, then I think the emoluments may properly be bestowed upon other deserving Studeuts of the College.

Default of Claimants to Appropriated Scholarships and Exhibitions.

Default of claimants to Scholarships, &c.

In several instances Scholarships and Exhibitions given to the College, and limited to Students born in particular localities, or educated at particular schools, have seldom had claimants possessing the qualifications described.

Consolidation of Fellowships, Scholarships, or Exhibitions.

Consolidation of Fellowships, &c.

I am of opinion that it would not be desirable to consolidate any of the Fellowships and Scholarships of the Lady Margaret's Foundation; or of the Foundations of King Edward VI.; or of that of Sir John Finch and Sir Thomas Baines.

With respect to the Exhibitions, the Master and Fellows have now the power, in most instances, of giving two or more of different Foundations to the same Student, if they think him sufficiently deserving; so that any further consolidation would seem to be both unnecessary and disadvantageous.

(Signed) JAMES CARTMELL,
Master of Christ's College.

E of actual Total Expenses of 104 Students of Christ's College who proceeded regularly to their First Degree in the Years 1843-49 inclusive; so far as those Expenses came under the knowledge of the College Tutors.

*** All the Students in the following Lists, where no Degree is mentioned, proceeded to the Degree of B.A.

Rank.	——	Total of Bills charged to each Student from the time of entrance until that of First Degree.	Scholarships, Exhibitions, &c., allowed to each.	Actual Net Expense of each Student from the time of Entrance until that of First Degree.	REMARKS.

Answers from the Master and Fellows of Christ's College.

The Master and Fellows of Christ's College.

The yearly Income of the College derived from Estates of Land.

Gross and net yearly Income derived from estates of land.

On an average of seven years ended at Michaelmas, 1851:—

	£.	s.	d.
The gross yearly income of the College derived from estates of land has been	5,721	12	6
And the net yearly Income	5,358	4	3

This is made up as follows:—

	Gross Income. £.	s.	d.	Net Income. £.	s.	d.
Rack rents	1,436	6	8	1,268	10	9
Reserved rents under beneficial leases	1,866	19	6	1,801	5	6
Fines for the renewal of leases	2,129	2	8	2,024	18	4
Manorial fines and quit rents	71	19	9	65	19	9
Rent charges	144	4	4	126	17	3
Other proceeds	72	19	7	70	12	8
Total	£5,721	12	6	5,358	4	3

Deductions.

The deductions which constitute the difference between gross and net income are—

In rack-rents; property tax, in some cases land tax, quit rents, insurance of farm-buildings in case of fire, repairs and improvements of buildings, expense of draining-tiles, &c.

In reserved rents under beneficial leases; property tax, county rate paid by the College for one of the estates, and tenths and synodals for another.

In manorial fines and quit-rents, and rent charges; property tax, land tax, and expenses of collection. In other proceeds; property tax.

The Master and Fellows of Christ's College.

The yearly Income of the College derived from Houses.

On an average of the fourteen years ended at Michaelmas, 1851:—

Gross and net yearly Income derived from houses.

	£.	s.	d.
The gross yearly income of the College derived from houses has been	147	2	3
And the net yearly income	142	17	0

This is made up as follows:—

	Gross Income. £.	s.	d.	Net Income. £.	s.	d.
Rack rents	87	17	5	85	7	9
Reserved rents under beneficial leases	14	0	0	13	10	3
Fines for the renewal of leases	16	5	8	15	15	6
Other proceeds	28	19	2	28	3	6
Total	£147	2	3	142	17	0

Deductions.

The principal deduction which makes the difference between gross and net income is property tax.

It may be here stated that some dwelling-houses and stables, adjacent to the College, are held of Jesus College under a 40 years' beneficial lease. The dwellings are occupied by the principal College servants, and the stables are used for the purposes of the College.

The rental of this property is not included in the above sum, inasmuch as it does not make part of the net income of the College; the renewal fine, reserved rent, rates and taxes, repairs, interest of money expended in erecting the buildings, &c., constituting a countervailing charge upon the College.

The yearly Income of the College derived from Tithe Rent Charges.

Gross and net yearly Income derived from Tithe Rent Charges.

The amount of this branch of the College income is given on an average of the two years ended at Michaelmas, 1851, inasmuch as during that interval the commutation in one instance was completed; and in another, the beneficial lease, under which the rent charge was demised, expired.

On an average of the two years ended at Michaelmas, 1851:—

	£.	s.	d.
The gross yearly income of the College derived from Tithe rent charges has been	1,694	16	5
And the net yearly Income	1,102	14	3

This is made up as follows:—

	Gross Income. £.	s.	d.	Net Income. £.	s.	d.
Tithe rent charges not under beneficial leases	1,583	7	9	1,033	5	7
Tithe rent charge under a beneficial lease	111	8	8	69	8	8
Total	£1,694	16	5	1,102	14	3

The deductions which constitute the difference between gross and net income, are property tax, parochial rates, expenses of collection, stipends to two curates, allowances to two vicars, synodals, ordinary repairs of chancels, &c.

Funded Property and Exchequer Bills.

Funded Property and Exchequer Bills.

	£.	s.	d.
The income derived from this source in the year 1851 was	95	16	10

No distinction is here made between gross and net income, inasmuch as property tax, the only deduction, is taken off before the interest is paid.

Rent of rooms, Fees, &c.

Rent of Rooms in the College; Fees and Charges paid by Members of the College.

The income thus derived is as follows:—

	£.	s.	d.
Rent of rooms	690	13	9
Fees and charges paid by Members of the College	443	4	11
Gross income	1,133	18	8
Deduct Property Tax	33	1	5
Net income	£1,100	17	3

Income derived from other sources not included in the foregoing Statements.

Income derived from other sources.

The income of the Foundation of Sir John Finch and Sir Thomas Baines consists of fee farm rents, originally sold by the Crown; the sum expended in the purchase, on behalf of the Founders, was 4000*l.*

	£.	s.	d.
The gross yearly income is	222	8	9
And the net	162	10	9

The Master and Fellows of Christ's College.

The deductions which constitute the difference between gross and net income are property tax, land tax, expenses of collection. A small portion of the rents is lost.

Christopher Tancred, Esq., gave 10*l.* a-year to the Master, and 5*l.* a-year to each of the thirteen Fellows on the Old Foundation.

Income derived from other sources.

He also gave 88*l.* a-year to be divided amongst the Fellows and Scholars of the Old Foundation, each Fellow having a double share.

These sums are paid half-yearly by the Tancred Governors, without deduction.

The income thus derived is—

	£.	s.	d.
To the Master and Fellows	75	0	0
To the Fellows and Scholars	88	0	0
Total	£163	0	0

Total aggregate of Gross and Net Income arising from all sources.

Total Aggregate of Gross and Net Income respectively, arising from all sources.

	Gross Income. £.	s.	d.	Net Income. £.	s.	d.

Distribution and application of the Net Income of the College.

Distribution and Application of the Net Income of the College.

I. The yearly sums received respectively by (1) the Master, (2) the Fellows, and (3) the Scholars on the Foundation.

The Master.

(1.) The Master.

On an average of the last seven years, the Master's yearly income has been—

	£.	s.	d.
From the Foundation revenues	667	15	7
From the revenues of Sir John Finch's and Sir Thomas Baines' Foundation	41	17	9
From Mr. Tancred's benefaction	10	0	0
	719	13	4
The Master also receives 1*l.* 11*s.* weekly during his residence; this, on an average of the last seven years, has produced to him	73	10	3
Making his total yearly income	£793	3	7

The Fellows.

(2.) The Fellows on the Foundation.

On an average of the last seven years, the yearly income of each of the Fellows on the Foundation has been—

	£.	s.	d.
From the Foundation revenues	321	15	2
From Mr. Tancred's benefaction	8	14	6
	£330	9	8

In addition to this, each Foundation Fellow receives 15*s.* 6*d.* weekly during residence.

On an average of the last seven years, the yearly sum distributed amongst the Fellows as residence money has been 254*l.* 1*s.* 9*d.*

The Scholars.

(3.) The Scholars on the Foundation.

Each Foundation Scholar receives 15*s.* weekly during residence.

He also receives, as has been before mentioned, a single share of Mr. Tancred's benefaction* to the Fellows and Scholars.

* A Scholar who is a Tancred Student, does not receive this.

The Master and Fellows of Christ's College.

On an average of the last seven years, the yearly sum distributed amongst the Foundation Scholars as residence money has been 524*l.* 13*s.* 6*d.*; and from Mr. Tancred's benefaction 38*l.* 4*s.* 1*d.*

Distribution of the net Income of the College.

II. The Foundation of Sir John Finch and Sir Thomas Baines.

As has been already stated, the income of this Foundation arises from fee farm rents, originally sold by the Crown.

The net yearly income, 162*l.* 10*s.* 9*d.*, is thus distributed :—

	£.	s.	d.
To the Master	41	17	9
To each of the two Fellows 50*l.* 5*s.* 6*d.*, making	100	11	0
To each of the two Scholars 10*l.* 1*s.*, making .	20	2	0
	£ 162	10	9

III. The Exhibitions.

Exhibitions.

(1.) *Dr. Otway,* Bishop of Ossory in Ireland, founded three Scholarships of 7*l.* a year each, for Scholars from Kirkby Lonsdale School, and in default of such, for Scholars from Sedbergh School; with preference, *cæteris paribus*, to those of the name of Otway, and of the township of Middleton.

In 1851, the net proceeds of the estate, out of which these Scholarships are paid, amounted to 21*l.* 3*s.* 7*d.*

(2.) *Lady Drury*, of Pinkney Hall, Norfolk, gave two estates to the College, the profits of which are to be divided into five equal parts; one of these parts to the use of the College, the remaining four parts to be equally divided into two Exhibitions and paid to *two* Students of Christ's College, whom the Master and Fellows shall think most deserving as to Christian morality and good learning; with preference, *cæteris paribus*, to such as have been brought up in one of the free schools of Scarning, Holt, Swaffham, and Norwich. In 1851, the net proceeds of the two estates amounted to 78*l.* 18*s.* 6*d.*

(3.) *Mr. Richard Bunting* left 15*l.* a year to be divided amongst *three* Scholars, with preference, first, to the parish of South Creeke, second, to that of North Creeke, third, to that of Burnham Westgate, fourth, to the county of Norfolk; and in default of such, to any deserving poor scholar. This sum is payable out of a Tithe rent charge, which Mr. Bunting left to the College.

(4.) *The Reverend Thomas Jenens* left to the College certain lands and tenements, the net profits to be distributed yearly at the discretion of the Master and Fellows, special regard being had to Essex men, if there be any of poor estate in the College.

In 1851 the net proceeds amounted to 19*l.* 18*s.* 4*d.*

(5.) *The Reverend Dr. Widdrington* founded *four* exhibitions of 5*l.* a year each.

The exhibitions are paid out of the profits of an estate of land, which was purchased with money left partly by Dr. Widdrington, and partly by Mr. William Petyt.

In 1851, the net proceeds of the estate were 85*l.* 2*s.* 3*d.*

After the uses of Dr. Widdrington's will are served, the surplus of his benefaction is to be given for the benefit of the Master and Foundation Fellows, provided they continue stedfast in the profession of the Protestant religion.

(6.) *Mr. William Petyt* bequeathed 200*l.* to be laid out in such manner as should be thought best for the augmentation of the maintenance of such poor scholars as shall be entered of the College, with preference to scholars from the free grammar school of Skipton in Craven, Yorkshire. This sum, added to Dr. Widdrington's bequest, and a small sum belonging to the College, was laid out (with the approval of Mr. Sylvester Petyt, Mr. William Petyt's brother and executor) in the purchase of an estate of land, as was stated in (5.)

Rather less than two-ninths of the net proceeds of the estate belong to Mr. William Petyt's bequest.

(7.) *The Reverend Dr. Hawford*, formerly Master of the College, by his will gave to the College a rent charge of 8*l.* a year, out of which he directed 3*l.* to be distributed amongst *three* scholars, natives of Northamptonshire; in default of such, natives of Leicestershire; in default of such, natives of Suffolk.

By the imposition of the Land Tax, the rent charge is reduced to 6*l.* 8*s.* yearly, and, therefore, the share of the scholars to 2*l.* 8*s.*

(8.) *Sir Walter Mildmay* gave to the College a rent charge of 20*l.* a year, out of which he directed 2*l.* a year to be paid to each of *six* scholars. Of the *six*, one to be born in Essex, and another in Northamptonshire, if there be any meet for the same.

(9.) *Mr. Philip Rawlins, of London*, founded a Scholarship of 3*l.* a year.

The scholar to be a native of Suffolk; in default of such, of Norfolk; in default of such, at the discretion of the Master and Fellows.

No property seems to have been purchased for this Scholarship, but, from ancient times, it has been charged upon a reserved rent of 4*l.* a year.

(10.) *The Reverend Richard Carr* bequeathed three estates of land to the College, out of the profits of which he directed that there should be paid for *eight* Scholarships 5*l.* a year each, and for *two* Fellowships 13*l.* 6*s.* 8*d.* each.

The Scholars to be elected from the free grammar school of Giggleswick, by the Feoffees of the School, the Chief Schoolmaster, and the Churchwardens of the Parish. *The Master and Fellows of Christ's College.*

The Fellows to be elected by the Master and Fellows out of those who hold or have held the aforesaid Scholarships, and none other to be capable of them.

The Fellows to retain their Fellowships until ten years after the degree of Bachelor of Arts. Exhibitions.

After these payments to the Fellows and Scholars, the overplus to be for the benefit of the College, or to be distributed amongst poor Sizars, at the discretion of the Master and Fellows.

In 1851, the aggregate net proceeds of the estates were 92*l.* 14*s.* 8*d.*

(11.) *Mr. Robert Broadbanke* gave to the Master and Fellows certain small tenements, to establish a Scholarship, upon condition that they bring up one Scholar in the said Scholarship of the town of Huntingdon, if there be any meet for the same.

The tenements are let upon a forty years beneficial lease, the net reserved rent being 4*l.* 17*s.* 1*d.*

The last fine received upon renewal of the lease, amounted to 221*l.* 7*s.*

The scholar is paid 20*l.* a year.

(12.) *The Reverend Thomas Wilson* bequeathed to the College 200*l.*, to be employed towards the maintenance of *three* scholars, to be elected by the Master and Fellows out of the free grammar school of Kirkby Lonsdale.

Mr. Wilson's executor laid out this sum in the purchase of an estate of land, which is now in possession of the College.

In 1851, the net proceeds of the estate were 65*l.* 1*s.*

(13.) *Christopher Tancred, Esq.*, gave a tenement in Newmarket to the Master and Fellows, in trust that they and their successors should apply the yearly profits of the same for ever, as an Exhibition for some young student in the said College, whilst he continues an Undergraduate in the same, with preference, first, to one born in Newmarket, second, to one born in the county of Cambridge; and, in default of either of them, then to such person from time to time as by the Master and Fellows should be thought expedient.

In 1851, the net proceeds were 40*l.* 15*s.* 6*d.*

(14.) *The Reverend Christopher Clarke* granted an estate of land to the College, to the intent that an exhibition of 10*l.* per annum should be paid to a student of the College.

One born in Norfolk or Norwich, and brought up at the free school of Norwich, to have the preference.

The remainder of the profits of the estate to be employed for the general uses of the College.

In 1851, the net proceeds amounted to 29*l.* 2*s.* 6*d.*

(15.) *Mr. Sylvester Petyt* by his Will directed that there should be paid to the College the year sum of 20*l.*, to be equally divided amongst *three* scholars of the free grammar School of Skipton.

In default of such scholars, or one or two of them, the unclaimed Exhibition or Exhibitions, to be bestowed on some such other poor scholar or scholars of the College, as the Master and Fellows shall think fit, until claimants from Skipton school shall be admitted of the College. The sum of 20*l.* is paid to the College annually by Mr. Sylvester Petyt's trustees.

(16.) *John Harvey, Esq.* founded a Scholarship, to which are appropiated the profits of a small estate of land. The profits to be given towards the maintenance of some poor scholar of the College born at Thurleigh in Bedfordshire; in default of such, to one born in Bedfordshire; in default of such, then whom the Master shall appoint.

In 1851, the net proceeds were 9*l.* 11*s.* 11*d.*

(17.) *The Reverend Thomas Laughton* gave a rent charge of 3*l.* 6*s.* 8*d.* to found a Scholarship. The scholar *not* to be a scholar of the College; to be a native of Thorpe Arnold in Lincolnshire, or, in default of such, of Lincolnshire.

He is required to attend one hour exery day in the College Library, to make a double catalogue of the books, &c. He is to receive 1*s.* 3*d.* weekly, and the surplusage 1*s.* 8*d.* at the end of the year.

(18.) *The Reverend Richard Risley* granted an estate of land, the profits of which are to be distributed as follows:—$\frac{7}{13}$ to a scholar in Christ's College, $\frac{6}{13}$ to the poor of two parishes.

The scholar to be of the surname or kindred of Risley; or in default of such, to be born in the county of Lancaster.

In 1851, the net proceeds of the estate were 56*l.* 4*s.* 11*d.*

(19.) *Mr. Risley* also founded *two* other Scholarships; the scholars to be natives of Lancashire; or in default of such, of any other county.

By agreement between the College and Mr. Risley, these two scholars receive 1*l.* each from the College funds.

(20.) *Dr. Seth Ward, Lord Bishop of Sarum*, founded *four* Scholarships; which are appropriated to persons born in Hertfordshire, and educated in some free and licensed school in that county; with preference, *cæteris paribus*, to those educated in the grammar school of Buntingford; and of them, to such as have been born in the parish of Aspeden or the town of Buntingford.

In the event of there not being fit persons offering as candidates for these Scholarships, then the Master and Fellows to elect out of the students of the College such as they shall judge most deserving.

The Master and Fellows of Christ's College.

The revenues of this benefaction arise partly from an estate of land and partly from fee farm rents.

	£.	s.	d.
In 1851, the net proceeds of the estate were . .	96	11	8
And the fee farm rents produce	17	3	0
Making the revenue .	£113	14	8

Exhibitions.

Each scholar is to receive 12*l.* a-year; and the surplus after paying the scholars, is to be divided equally between the Master of Buntingford School and the College.

(21.) *The Reverend Dr. Plume* gave 100*l.* to the College, on condition that they should allow an annual Exhibition of 6*l.*, towards the maintenance of one scholar educated at Maldon; in default of such, to one educated at Chelmsford; in default of both, to one educated at Brentwood or in any part of Essex.

Dr. Plume's gift does not appear to have been invested, so that it is not now represented by any property. The Exhibition is paid out of the general funds of the College.

(22.) *Mrs. Beridge of Kensington* gave to the College 100*l.* for the promotion of Scholarships

This sum does not appear to have been invested; but 4*l.* a-year is now paid to some deserving student out of the College funds, as Mrs. Beridge's Scholarship.

In those cases where estates have been left for the endowment of any of the Exhibitions and Scholarships, such estates are administered by the Master and Foundation Fellows of the College, in the same manner as the estates of the original foundation.

IV. The Table in the College Hall.

The Table in the College Hall.

Towards the expense of the Fellows' table in the College Hall, the College contributes 50*l.* a-year. The remaining expense is defrayed by the individual Fellows and other members of the table.

No contribution is made towards the expense of the Scholars' table, each Scholar being supposed to pay his share out of the residence money allowed to him.

V. The Sizars.

The Sizars.

The Statutes of the College do not make provision for Sizars or Subsizars, but there are constantly four Sizars of the College and occasionally more. The Sizars dine after the Fellows, and thus obtain their dinner free; they receive 4*l.** a year each; and have the advantage of paying according to a reduced scale of College and University charges.

VI. The Expense of keeping up and repairing the Collegiate Buildings.

Expense of repairing Collegiate Buildings.

On an average of the last seven years the annual expense of keeping up and repairing the Collegiate buildings has been 496*l.* 17*s.* 10*d.*

To this must be added the expense of keeping up the College garden;—a special fund, which is included in the statement of the net income of the College, is set apart for this purpose.

On an average of the last three years the annual expense has been 111*l.* 2*s.* 6*d.*

There is no special building fund.

VII. Repair of the Chancels of Churches, where the College is Impropriator.

For the last seven years these have been trifling, and have been paid each year out of the gross proceeds of the respective impropriations, thus making an item in the difference between gross and net income.

VIII. (1), Prizes or Rewards for the Encouragement of Learning in the College; and (2), Donations or Subscriptions to Charities and Schools.

Prizes or Rewards for the encouragement of Learning.

(1). Prizes or rewards for the encouragement of learning in the College.

The annual amount spent in prizes of books is 38*l.* 5*s.*

Dr. Porteus, Lord Bishop of London, gave to the College funded property to the amount of 1200*l.*; the interest, which is included in the net income of the College, to be expended in the purchase of three gold medals, to be contended for annually by the Students of the College.

The cost of the medals is usually 40*l.* 15*s.*

Charities.

(2). Donations or subscriptions to charities and schools.

On an average of the last seven years the yearly amount of subscriptions or donations to schools and charities has been 94*l.* 0*s.* 5*d.*

IX. Other Purposes to which the income of the College is applied.

Other purposes to which the income of the College is applied.

The following may be mentioned:—

1. Wages of servants; miscellaneous expenses for the chapel, hall, &c.; examination

* The payment to the Sizars is contributed by the resident Members of the Fellows' table for the time being. It was originally remuneration for waiting at the Fellows' table. This service is no longer exacted, but the allowance to the Sizars is continued.

papers, stationery, insurance of Collegiate buildings in case of fire, assessed taxes, legal expenses, land agent's expenses, &c. *The Master and Fellows of Christ's College.*

2. Small stipends, which have been left for a Hebrew lecturer, a Greek lecturer, and various preachers.

3. The College fees on degrees, amounting, on an average, to 101*l.* 19*s.* 5*d.* yearly, are set apart to form a plate and library fund. Other purposes to which the Income of the College is applied.

For the last few years the fund has been allowed to accumulate, with the view of making some considerable improvements in the College library.

4. In order to form a fund for building parsonage houses on two small livings, where the College is the impropriator, and of which it has the patronage, the Master and Fellows set apart 90*l.* a year, out of the annual proceeds of the two Tithe rent charges.

5. The College has contributed largely towards the expense of building new parsonage houses on livings of which it has the patronage.

It has also contributed towards the expense of rebuilding and repairing churches in parishes or districts where it has property, and to objects of general utility, both in the parish within which it stands, and in the town of Cambridge generally.

On an average of the last seven years, the annual expense to the College on these accounts has been 97*l.* 2*s.* 10*d.*

Beneficial Leases.

Since the year 1830, three beneficial leases of estates of land, or of tithes, belonging to the College, have expired. Beneficial Leases.

Also the reserved rents of four other estates have been prospectively increased, and the renewal fine in each case proportionally diminished. For two of the estates, the reserved rents have been increased twice, and for the other two, once.

In no case either where the lease has been run out and the fine entirely lost, or where the reserved rent has been increased and the fine proportionably diminished, have the Master and Fellows received any compensation for such loss or diminution.

According to the present practice of the College in renewing beneficial leases, every fine, after having been calculated according to the existing reserved rent, is either diminished by a certain per centage and the reserved rent proportionally increased, such increase to begin with the term added to the lease; or, the whole amount of the fine being received, the same per centage is deducted before any division amongst the Master and Fellows is made, and the sum thus obtained is set apart to form a fund which may be applied either to assist in increasing other reserved rents, or to improve generally that part of the College property, of which the rental is divided amongst the Society.

The purchase of Advowsons, and the augmentation of small Livings in the patronage of the College.

The College possesses no special permanent fund for the purchase of advowsons, or the augmentation of small livings in its patronage; but, since the year 1800, two advowsons have been acquired, and assistance of one kind or another has been rendered to all the small livings. Purchase of Advowsons.

In the year 1807, an advowson was purchased out of the funds of the College chest. It was very desirable to obtain the patronage of this living, inasmuch as the College already possessed half the rectorial tithes with a portion of the glebe.

About eleven years ago a second advowson was purchased; the Fellows of the College having, during the eight previous years, voluntarily given up a portion of their dividends to form a fund (out of which the purchase was made) for the purpose of improving the College patronage.

With respect to the small livings in the College patronage:—In one case where it is the duty of the College to provide a stipendiary Curate, there being no Vicar, the Master and Fellows, by a voluntary sacrifice, accumulated a sum with which a parsonage house has been built. They have also increased the stipend of the Curate, and the College has contributed liberally towards repairing the church and school.

In another case where there is a Vicar, the College contributed towards building a parsonage, and lent a sum of money, without interest, for the purpose of repairing some tenements belonging to the Vicar. The ancient payment to the Vicar has also been augmented.

In a third case, where there is a Vicar, the College makes an allowance towards the expense of a Curate.

And in two other cases, the Master and Fellows have for some time past, set apart 90*l.* a year, as before stated, for the purpose of raising a fund wherewith to build parsonage houses.

Moreover, in all these cases of small livings, the College contributes liberally towards the maintenance of the parochial school.

It may here be stated that four other livings of larger value, in the College patronage, have been materially improved by the bounty of the College.

In each of the livings alluded to, the Incumbent has received a lease (for twenty-one years, or for his tenure of the living if sooner terminated) of tithes or other College property in his parish. In one case the rent reserved to the College is less than one-fifth of the value of the property, and in the other cases it is little more than nominal.

It is hoped, that if the duration of the tenure of any one of the present Incumbents

The Master and Fellows of Christ's College.

exceeds the term of his lease, the Society for the time being will grant to him a new lease on the same advantageous terms, so that the arrangement made at the commencement of his incumbency may continue to its close.

Addition to the Collegiate Buildings.

Addition to Collegiate Buildings.

About twenty-eight years ago, a new building was erected within the College walls, containing rooms for twenty one Students, in addition to the Students previously accommodated.

This building cost 7439*l.*, of which 986*l.* was contributed, in voluntary subscriptions, by the then Master and Fellows: 6000*l.* was borrowed of the Government Commissioners for public works; and the remainder was taken out of the general funds of the College.

The debt thus contracted to the Government has been entirely paid off.

Restriction on Election to Fellowships and Scholarships.

Restrictions on Fellowships and Scholarships.

The Master and a majority of the Fellows, are of opinion that the present restrictions, with respect to counties, of the Fellowships and Scholarships of the Lady Margaret's Foundation hinder the usefulness of the College, and that it would be most advantageous to have such restrictions removed, provided the same were done by competent authority.

They are also of opinion that inconvenience arises from the shortness of the period (one month after the vacancy is known to the Master) within which every Fellowship of the College must be filled up; and that the interests of the College would be better served, if a somewhat longer, though limited, interval were allowed to the Society to make their election.

The Exhibitions limited to particular Schools or Localities.

Exhibitions limited to particular Schools.

With respect to the Exhibitions limited to particular schools or localities, the Master and a majority of the Fellows are of opinion that, if fit candidates present themselves from such schools or localities, the wishes and directions of the respective benefactors ought to be fully carried out; but that, in default of such candidates, the emoluments may, with propriety and great advantage, be bestowed upon other deserving Students of the College.

(Signed) JAMES CARTMELL,
Master of Christ's College.

(On behalf of the Master and Fellows of Christ's College.)

Rev. R. Tatham, D.D., Master of St. John's College.

Answers from the Rev. R. Tatham, D.D., Master of St. John's College.

My Lord, *St. John's College, Cambridge, June* 13, 1851.

I received from the Commissioners for inquiring into the State of the University of Cambridge and the Colleges thereof a list of queries relating to St. John's College, to which they invite my attention, with a request that they may be furnished with such information in reply as I may be disposed to communicate.

Before addressing myself to the questions proposed, I beg leave to state that—the Lord Bishop of Ely having been appointed by the Statutes Visitor of St. John's College—on this and on other grounds I feel called upon respectfully but firmly to deny that any legal obligation is imposed upon me by the Royal Commission to answer the queries of the Commissioners: nevertheless, while protesting against the right of the Commissioners to enforce compliance with their requirements, I am willing—from sentiments of loyal and dutiful respect to our Gracious Sovereign, and in the confidence that Her Majesty will not give her Royal sanction to any measures which may infringe upon the rights and privileges, or be in any manner prejudicial to the interests and well-being of my College—to give information on the subjects of inquiry in so far as is consistent with my duty to the society of which I am the head.

I have, &c.,

The Lord Bishop of Chester. (Signed) R. TATHAM.

Election of Head and Fellows.

1. The appointment of the Master is vested in the Fellows.—Stat. Cap. 2.

The Fellows and scholars of the Foundation are elected by the Master and eight senior Fellows.—Cap. 13, 15.

The qualifications required in the Master are, that he be a person of good life and conversation—that he be in Priest's orders, a Doctor or at least a Bachelor in Divinity, and not less than 30 years old.—Cap. 1.

The qualifications for election to Fellowships are good morals and learning, and the degree of Bachelor of Arts at the least. The candidate for a Fellowship must be a native of England or Wales, or a person whose father or mother was born in England or Wales.—Cap. 12, 13.

Scholarships.

The candidates for Scholarships must be of good morals and disposition, well grounded in grammar and in Greek and Latin, and natives of England or Wales; they must not be Bachelors of Arts or in holy orders.—Stat. Cap. 15.

Restrictions on Fellowships.

The Fellowships of the Foundation are tenable for life; but become void in default of

Rev. R. Tatham, D.D., Master of St. John's College.

proceeding regularly to the degrees of Master of Arts and Bachelor in Divinity, and of entering into Priest's orders within six years from the degree of Master of Arts; but two Fellows on the Law line and two on the Physic line are exempted from the restriction as to holy orders and the B.D. degree.

A Fellowship is vacated by marriage, or by the acquisition of property or preferment exceeding a specified amount, and also by election to a Mastership or Fellowship in another College.—Cap. 24, 28.

Restrictions on Scholarships.

A scholar may hold his Scholarship till he is of standing for the degree of M.A.; but he vacates it by marriage, or by the acquisition of property or preferment.—Cap. 28.

Leave of absence.

The Statutes allow to the Master an absence of five months in the year, to each Fellow eighty days, and to each scholar forty days, in addition to the summer vacation; and the Master and senior Fellows have the power of extending the time of absence.—Cap. 3, 27.

Duties of Fellows.

Every Fellow is required, in his turn, to discharge the duties of sublector, lector, and examinator, and, if in holy orders, to perform divine service in the College chapel. He is also bound to take upon him any College office which may be assigned to him by the Master and Seniors.—Cap. 9.

Government of the College.

The government of the College is in the Master and eight senior Fellows. The deans, lecturers, and examiners have power to enforce discipline, and to compel the students to attend at chapel, lectures, and examinations.—Cap. 6, 9, 10.

Stipends, emoluments, and advantages assigned to the Master, Fellows, and Scholars.

The stipends, emoluments, and advantages assigned to the Master, Fellows, and Scholars by the original Statutes are small in amount; they continue to be paid, and have been augmented from time to time.—Cap. 29, 33, 34, 37.

The emoluments of the Master, upon an average of the last seven years, have been,

From the foundation, about . . . . . £ 960 per annum.
From the benefactions of former Masters, about . . £ 200 per annum.

The Master has, moreover, the option of any one of four livings given to the College by Lord Keeper Williams, Archbishop of York; and the late Sir Isaac Pennington left an annuity of 200*l.* to the Master, contingent upon his holding the Rectory of Freshwater, one of Archbishop Williams's four livings.

The emoluments of each of the eight senior Fellows have amounted, on an average of the last seven years,

To about . . . . . £ 210 a-year.
The emoluments of a junior Fellow to about . . £ 140 a-year.

In addition to this the Fellows have allowances for room-rent, varying from 10*l.* to 32*l.* a-year, according to their standing and degree.

The allowance for room-rent to each scholar is 6*l.* a-year. The resident Fellows and Scholars have, moreover, weekly allowances from the rents reserved in corn under the 18th Elizabeth, cap. 6.

Two-thirds of the said corn-rents are assigned to the Master, Fellows, and certain statutable servants, and one-third to the Scholars; these sums, with certain additions from other sources, are severally applied week by week; the former to the use of the Master, the Fellows in residence, and servants; the latter to the use of the Scholars in residence.

On an average of ten years, these sums have amounted respectively to 1,640*l.* and 665*l.* per annum. The emoluments to each Fellow and scholar from this source vary from week to week with the numbers in residence.

The present practice, as to the particulars enumerated in Question 1, is conformable with ancient usage, and with the regulations of the Statutes.—Cap. 29, 33, 34, 37.

2. The above answers are generally applicable to the supplemental Foundations. The qualifications for and restrictions upon election to such supplemental Foundations are given in the printed book sent herewith, which also contains an account of the exhibitions not incorporated, but connected with the College. Copies of the rules and ordinances of Mr. Platt's and Mr. Webster's Foundations are also sent, together with a printed copy of the College Statutes.

Admission of Students.

3. Students over and above the members of the Foundation are admitted in conformity with the regulations prescribed in Cap. 20 of the Statutes. The Head-Lecturer and Deans ascertain and certify to the Master the qualification of the candidate for admission; and, if the Master be satisfied of the candidate's fitness, his name is entered in the College Register.

Divine Service.

4. Divine service is performed in the College chapel daily throughout the year, at 7 o'clock in the morning, and 6 in the evening. On Sundays the services are at 9¼ in the morning, and at 5¼ in the evening.

The students are required to attend chapel nine times in the week, and a small fine is prescribed by Statute for every absence from the service. The Deans have authority to to enforce regular attendance and proper behaviour by suitable admonitions and punishments. —Stat. Cap. 6.

Course of instruction.

5. The course of Collegiate instruction given to the students embraces Greek, Latin, Hebrew, Mathematics, Natural and Moral Philosophy, Logic, and Theology; and it is adjusted to the public examinations of the University.—Stat. Cap. 9, 17.

Ten Fellows are employed in giving the College lectures. There are three College examinations in each year—two general in all the subjects of the lectures, and one confined to classical literature. The two general examinations are conducted by four Examiners elected annually, assisted by the Sadlerian Lecturer. The classical examination is conducted by the Tutors and Lecturers.—Stat. Cap. 10.

Prizes.

Prize-books to the value of 140*l.* or 150*l.* a-year are given to the students who acquit themselves with credit at the College examinations.

Rev. R. Tatham, D.D., Master of St. John's College.

6. All undergraduates are required to attend at the College lectures in their respective years, and are punishable by the several lecturers for absence or negligence. Grave cases of neglect are reported to the Master and seniors, and visited with suitable punishment.—Stat. Cap. 9.

Attendance on Lectures.

Attendance at the dinner in the College Hall is required on five days in every week.

College gates closed.

The students are required to be within the College or in their licensed lodgings at 10 o'clock at night, and are not allowed to go out after that hour. The names of those who come in after 10 o'clock are entered in a book by the Porter and reported to the Deans and Tutors.—Cap. 44.

Control exercised over the expenses of Students.

Control is exercised over the expenses of students by means of the following decree of the Vice-Chancellor and Heads of Colleges:—

"That every tradesman or dealer, with whom any person in *statu pupillari* shall contract a debt exceeding the sum of five pounds, shall be required to send notice of the same at the end of every quarter to the College Tutor of the person so indebted, on pain of being punished by discommuning or otherwise, as to the Vice-Chancellor and Heads of Colleges shall seem fit."

Tradesmen's bills for necessary articles, to a certain limited amount in each case, are received by the Tutors and entered in the quarterly bills, which are transmitted to the parents or guardians of the pupils.

Expenses of First Degree.

7. The necessary expenses of the several classes of students from the time of entrance to that of taking the first degree may be estimated as follows:—Nobleman, 650*l.*; Fellow Commoner, 485*l.*; Pensioner, 355*l.*; Sizar, 220*l.*

8. It is difficult to give an accurate answer to this question. The actual expenses of a diligent and prudent student in each of the same classes need not exceed the following estimate:—Nobleman, 1,400*l.*; Fellow Commoner, 1,050*l.*; Pensioner, 630*l.*; Sizar, 280*l.*

The actual expenses of many persons in each of these classes fall considerably below this estimate.

No allowance for private tuition is included in this estimate.

Poor Students.

9. In this College there are nine sizars and forty-five sub-sizars. For the former a dinner is gratuitously provided every day; and the table of the latter is, in good measure, supplied from the commons which remain from the tables of the Fellows.

About 200*l.* a-year, under the name of Sizars' *Præter*, is distributed amongst the most deserving of the sizars and sub-sizars. They are also eligible, in common with the scholars and pensioners, to the exhibitions which the College has at its disposal. These exhibitions vary in value from a few shillings up to 40*l.* a-year each, and amount altogether to about 1,600*l.* a-year.

The charges for attendants, fees, and other like incidents are considerably less to sizars and sub-sizars than to the other classes of students.

Expenses.

10. The necessary expenses of College residence are very moderate, and cannot, I think, be reduced.

Extravagance.

The regulations in force for restraining habits of extravagance and facilities of credit are stringent, and, as respects tradesmen in Cambridge, produce a beneficial effect.

Restrictions on Fellowships, &c.

11. I do not think it would be expedient to remove any of the limitations affecting Fellowships, Scholarships, or Exhibitions in St. John's College.

12. Vacant scholarships and exhibitions are invariably filled up: and if a case occur in which there is no strict claimant to a scholarship or exhibition, it is given to the most worthy.

13. In my opinion, it would not be advantageous to consolidate two or more Fellowships, Scholarships, or Exhibitions together. The College, by means of its exhibitions, has the power of affording substantial help towards maintenance, and of amply rewarding merit. Examples are not wanting in this College of meritorious students who have passed through their undergraduateship with scarcely any expense to their friends.

(Signed) R. TATHAM.

The Master, Fellows, and Scholars of St. John's College.

Answers of the Master, Fellows, and Scholars of St. John's College.

My Lord and Gentlemen, *St. John's College, Cambridge, Feb.* 9, 1852.

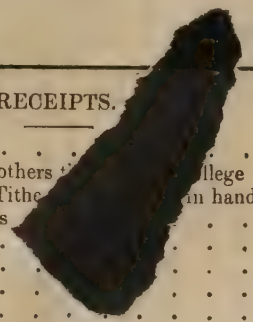
The enquiries relating to the revenues of this College bearing date 5th Nov. 1851, and addressed to the Master, Fellows, and Scholars of the College, have been taken into consideration by the Master and Seniors; and although a feeling of dissatisfaction has been expressed with respect to some of the questions—they have commissioned me to give such information on the matters enquired into, as I may deem to be fitting, and at the same time respectfully to renew on their behalf the protest (not necessary to be here repeated) which accompanied my answers to the former list of queries addressed to me by the Commissioners for Inquiring into the State of the University of Cambridge and the Colleges thereof, on the 20th day of December, 1850.

I have the honour to be,
My Lord and Gentlemen,
Your most obedient humble Servant,

To the Cambridge University Commissioners.

(Signed) R. TATHAM, *Master.*

The annexed Schedule will show in what manner and to what purposes the net income of the College is applied.



RECEIPTS.	£.	s.	d.	
Rent Charges	134	18	3	
Exhibition Funds paid by others [illegible]llege	340	12	4

Dividends to Master and Fellows	8,006	17	9
Mr. Platt's Foundation	916	18	4
Surplus	258	1	7
£	26,166	14	11

* The actual amount of gross room rents, is 4,344*l.*, but the Master and Fellows have allowances for room rent amounting to about 1,180*l.*, and the Scholars to about 600*l.*, thus reducing the actual rent accruing to the College to the sum mentioned in the Schedule.

N.B. During the past seven years there has been received for working coals under land belonging to the College 724*l.* 3*s.* 3*d.* which sum has been treated as capital, and invested for the permanent advantage of the College.

† This sum is considerably in excess of the ordinary expenditure under this head, in consequence of unusual expenses having been incurred during the period for which the average is taken.

(Signed) R. TATHAM.

The Master, Fellows, and Scholars of St. John's College.

Amount and application of the Income of the College.

The Master, Fellows, and Scholars of St. John's College.

Distribution and application of the Net Income of the College.

The yearly sum received by the Master on an average of the last seven years, has been
From the Foundation, about £960
From the benefactions of former Masters, about 200
The sum received by each of the eight senior Fellows, about . . . 210
,, ,, by each junior Fellow, about 140
in addition to which each Fellow has an allowance for room rent, varying from 32*l.* to 10*l.* a-year, according to his standing and degree.

The allowance to each Scholar for room rent, is six pounds a-year. The Fellows and Scholars have moreover whilst in residence weekly allowances from the rents reserved in corn under the 18th Eliz. c. 6.

The emoluments from this source cannot be stated, inasmuch as they vary not only from year to year with the price of corn, but also from week to week, according to the number of Fellows and Scholars respectively in residence.

The larger payments to the eight senior Fellows and the inequality of the allowance for room rent to different Fellows rest partly upon Statute and partly upon ancient usage.

The above answer applies to all the supplemental Foundations as distinguished from those of Bye-Foundation, and to all the supplemental Scholarships, excepting one Foundation hereafter to be noticed.

In these several supplemental Foundations, the same emoluments and privileges were stipulated for as were enjoyed by the Fellows and Scholars on the original Foundation, with the addition of small fixed payments to certain supplemental Fellows and Scholars, which they continue to receive.

Out of 21 Fellowships and 65 Scholarships thus added to the original Foundation, 19 Fellowships and 38 Scholarships were provided for by payment of specific sums of money, the particular investments of which are not accurately known; one Fellowship and two Scholarships were endowed by a leasehold estate, which has been alienated, and the purchase money applied to the redemption of land tax charged on various College estates. For the remaining Fellowship and 19 Scholarships were given lands or houses, with the addition, in certain cases, of sums of money, and six Scholarships were endowed by small rent charges. The contracts thus made with the Sub-Founders have produced results of an opposite character, some beneficial and others detrimental to the College.

The Foundation for Scholarships endowed by Sarah Duchess of Somerset is governed by a different rule. By an Indenture dated July 12th, 1682, the Duchess gave land at March, in the Isle of Ely, for the maintenance of five Scholars, to each of whom she assigned a specific sum per week, together with chambers and caps and gowns, which emoluments they have continued to enjoy to the present time; and by a second Indenture, dated March 12th, 1697, the executors of the Duchess, in conformity with her will, conveyed the Manor of Wootton Rivers for the maintenance of a further number of Scholars, who are to have the same allowances as the five Scholars before endowed by her; and directed that one additional Scholar should be chosen at the first settlement, and others elected as the rents improved. The number of Scholars on this Foundation is now thirteen. The said Indenture further directed that when the lease of a certain farm in the Manor of Wootton Rivers fell in, six additional Scholars should be elected, who should have for their allowances and maintenance the rent of the said farm, and that none of the other Somerset Scholars should have any part thereof, nor they with the others. The six Scholars were accordingly elected when the lease expired in the year 1735, and the same number has since been maintained. The allowance to each of these six Scholars was at the first establishment 10*s.* a-week to each, and it has since been increased to 15*s.*

The printed book previously sent to the Commissioners, and the supplement attached to it contain an account of the several supplemental Foundations for Fellows, Scholars, and Exhibitioners, and also of the Bye-Foundations of William Platt, Esq., and the Rev. James Webster.

The Statutes of the College direct (cap. 42) that a fourth part at the least of the revenue and possessions given for the maintenance of supplemental Foundations shall be reserved for the use of the College. This rule has been generally but not universally acted upon. These revenues are administered by the general authorities of the College.

Expense of the Hall Table.

In the case of Exhibitions the terms prescribed by the several Founde[illegible] the amount of the payments made to the Exhibitioners; and it has been the [illegible]llege Authorities to carry the intentions of the donors into full effect.

In the case of the Fellows, the expense of the table in [illegible] ordinary days, is defrayed out of the Master and Fellows' share of [illegible] corn under the Act of the 18th Elizabeth, c. 6; the residue of wh[illegible] week by week amongst the Master, the Fellows in residence, and certain s[illegible] when any entertainment is provided exceeding the ordinary fare, which is of ra[illegible]rrence, the expense is defrayed out of the general funds of the College.

In the case of the Scholars, their share of the corn money is distributed week by week among those in residence, and they are severally charged for their dinner commons.

Sizars.

No provision is made in the Statutes for the maintenance of Sizars or Subsizars, nor is there otherwise any obligation upon the College to admit more than nine Sizars, who are provided for by the benefactions of Dr. Dowman and Mr. Highlord; nevertheless, there are in this College 45 Subsizars, who enjoy the advantages already stated to the Commissioners in answer to their former enquiries.

Repair of Buildings.

Every member of the College pays a small sum under the name of detriments, the average annual amount of which has been for the last seven years about 2400*l.* This sum

The Master, Fellows, and Scholars of St. John's College.

is applied by the junior Bursar in the payment of wages, cost of utensils, fuel, gas, stationery, furniture of the hall, and the ordinary repairs of the Collegiate buildings. The latter item may be stated at about 500*l.* per annum. Extraordinary repairs are defrayed out of the general income of the College, there being no special building fund. The average annual expense for the repairs of chancels of churches has been about 30*l.* for the last seven years, there being four chancels repaired by the College and three others which the lessees, by their covenants, are bound to repair; the expense incurred by the lessees on this account is not known to us. The cost of prize books to the College is about 150*l.* per annum, in addition to which there are books given to the value of 32*l.* on account of the donations of special benefactors. At the annual audit, after all claims have been satisfied, and a competent sum, at the discretion of the Master and Seniors, has been set apart for repairs and other contingencies, the surplus money is divided amongst the Master and Fellows as directed by the Statutes, cap. 37.

Beneficial Leases.

9. For several years past the College has been desirous of increasing the number of its estates on rack rent, and with this view whenever a lessee has been unwilling to renew at the proper time and on the usual terms, no second offer was made to him, and the lease was suffered to run out. By this means several beneficial leases have expired within recent years, and the demised estates have, in all cases, been relet on terms of rack rent. The regular income of the College having thus been augmented, the Master and Fellows have of late felt themselves in a position to decline to accept fines for the renewal of beneficial leases of landed property, excepting in a single instance, in which the lessee had embarked a very large sum in the improvement of the estate. The Master and Fellows have not sought for or received any compensation for the loss of the renewal fines.

Purchase of Advowsons.

10. The College possesses a fund for the purchase of advowsons, the present annual value of which may be stated at about 560*l.* During the period referred to in the question three advowsons have been purchased. Grants of 500*l.* and 400*l.* respectively have been made for the improvement of two small livings in the patronage of the College, and annuities have been granted for several years to a vicar and a curate, whose stipends would otherwise have been insufficient. It may also be mentioned that the rectorial tithes of two parishes (in which the vicarages are in the patronage of the College) the commuted annual value of which is 549*l.* 11*s.* (viz., 140*l.* 1*s.* and 409*l.* 10*s.*) together with the rectorial glebe, have been for many years past granted by lease to the vicars at nominal rents, by way of additional endowment.

New Collegiate Buildings.

11. In the year 1826 the College commenced, and in 1830 completed, the erection of a new court, containing 105 sets of rooms, and united to the older buildings of the College by a covered bridge over the river. The cost of these buildings was 77,878*l.* 0*s.* 2*d.* At the commencement of the work the College had in hand 10,023*l.* 18*s.* 11*d.* applicable to the purpose, and received in gifts from various late and actual members of its body sums amounting to 6,695*l.* In October, 1826, a loan was contracted with the Exchequer Bill Commissioners for the sum of 40,000*l.*, and, when the building approached completion, the College having been compelled to commence immediately the payment of the half-yearly instalments of principal and interest, it became necessary to contract a further loan with the Government of 25,000*l.*, and subsequently additional sums were borrowed for this purpose from other parties.

These debts have now been in a great measure liquidated, the present sum due from the College on this account being 13,369*l.* 16*s.* 7*d.*

12, 13, 14. In reply to these questions I beg leave to refer the Commissioners to the answers returned to similar questions in the list of queries addressed to the Master on the 20th of December, 1850.

(Signed) R. TATHAM.

St. John's College Library.

Rev. R. Tatham, D.D., Master of St. John's College.

The Librarian.

1. The Library of St. John's College is placed under the superintendence of one of the Fellows who is called the Librarian. His duties consist in superintendence and in making regulations in such cases as are are not specified in the "Rules of the Library," a copy of which is annexed to this communication. His authority rests on the orders of the Master and Seniors expressed in the said rules. There is a Sub-Librarian, who is generally a Scholar of the College and a Graduate of the University. He attends at the Library in accordance with the said rules.

Catalogue.

2. In the Library there is a Catalogue of the books. A descriptive Catalogue of the MSS. and of some of the scarcer books was prepared by the Rev. Morgan Cowie, formerly a Fellow of the College. This Catalogue was printed by the Cambridge Antiquarian Society. The books are generally but not strictly arranged according to their subjects; a strict arrangement having been impracticable owing to the manner in which the collection has been formed. Some libraries, more recently bequeathed, have been retained in a collected form. The room is well ventilated and sufficient for its purpose, but no part of it is fire-proof. Any book in the Library can readily be found by means of the "class-marks" which are given in the Catalogue. Each volume has three class-marks,

(1) *One or more letters* denoting the compartment,
(2) *A number* denoting the shelf,
(3) *A number* denoting the part of the shelf in which the volume is placed.

Rev. R. Tatham, D.D., Master of St. John's College.

Support of the Library.

3. Each Foundation Fellow on his election pays 2*l.* 3*s.* 4*d.* for the support of the Library. With the exception of this payment, which on an average of years amounts to 8*l.* 13*s.* 4*d.* per annum, no fund is appropriated to the Library. The other Members of the College make no payment to the Library. The salary of the Librarian, 8*l.*, and the salary of the Sub-Librarian, 40*l.*, together with the partial insurance of the books, the sums spent in the repairs of the building and other incidental expenses, are defrayed out of the general funds of the College. About 30*l.* per annum is spent in purchasing and binding books.

Number of Volumes and MSS.

4. The number of volumes is about 26,000; of these about 400 are manuscript. The collection has been formed almost entirely by presents and bequests made by Members and Fellows of the College. A list of some of the contributions is annexed. No special conditions have been attached to the donations and bequests. Many of the books and MSS. are of great rarity and value, and are consulted from time to time by literary men, some of whom have travelled great distances for the purpose. The Theological Department is the most comprehensive. There is also a rich collection of Tracts of great historical and literary importance. The Library is not well supplied with books of Modern Literature, but at the same time it cannot be said to be defective in those books which relate to the usual branches of Academical instruction and study. The Library proves of great service to the Society.

Admission.

5. The persons who have access to the Library for consulting books between 9 and 12 A.M. are mentioned in Rule 4. Any other Member of the College is allowed access provided he have the sanction of a Fellow; and books can be borrowed from the Library by means of written orders signed by a Fellow; the Fellow in these instances being responsible for the safety and return of the books. Every facility, consistent with a due regard to the safety of the books, is afforded to Strangers wishing to use the Library for purposes of special reference and research.

(Signed) R. TATHAM, *Master.*

Rules of the Library.

Rules of the Library.

Ordered by the Master and Seniors,—

1. That the Library be kept open from 9 A.M. to Noon.
2. That during these hours the Sub-Librarian be in the Library and give his diligent attention to the safety and good order of the books or whatever belongs to the Library, the condition of the binding of the books, of their titles, class-marks, &c., and do report to the Librarian from time to time the state of the Library.
3. That the books be returned to the Library at the same times as to the University Library under the same penalties in case of non-return.
4. That no person not being a Fellow or a Master of Arts of the College have access to the Library unless accompanied by one of the Fellows or by an M.A., LL.B., or M.B. of the College.
5. That the Sub-Librarian do carefully execute the instructions which he may receive from the Librarian, and on occasion of his absence do appoint a deputy with the sanction of the Librarian.

Librarian's Instructions.

That the Sub-Librarian do see that the windows of the Library are shut before leaving it.

That he be careful to place the guard on the fire-place when he leaves the Library.

Contributions to the Library.

Contributions to the Library.

The Library, before the time of Lord Keeper Williams, Bishop of Lincoln, was very small. Amongst the benefactors mentioned by Baker in his Manuscript History of the College, there are James Pilkington, Master of the College, and afterwards Bishop of Durham; Leonard Pilkington, Master of the College, and Regius Professor of Divinity; and Mildred Lady Burghley.

After the present building was erected the collection was increased by several contributions. Since that time there have been many donations and bequests. The following is a list of the more important Contributions:—

	£.	s.	d.
Henry Wriothesley, Earl of Southampton, gave books to the value of	360	0	0
John Carey, Baron Hunsdon, gave	100	0	0
Thomas Morton, Fellow of the College, afterwards Bishop of Durham, gave	400	0	0
Valentine Carey, Fellow, afterwards Bishop of Exeter, gave Law Books to the value of	50	0	0
David Dolben, Fellow, afterwards Bishop of Bangor	20	0	0
Sir Robert Heath gave Books to the value of	20	0	0
John Collins, M.D., Fellow, Regius Professor of Physic, bequeathed his Medical Books and	100	0	0
Abdias Ashton, B.D., Fellow	66	13	4

Rev. R. Tatham, D.D., Master of St. John's College.

Contributions to the Library.

	£.	s.	d.
Henry Alvey, B.D., Fellow, gave some books, and upwards of	40	0	0
Thomas Spell, B.D., Fellow	50	0	0
Timothy Hutton, B.D., Fellow, bequeathed	20	16	0
Jeremiah Holt, 10 MSS., and	20	0	0
Richard Holdsworth, D.D., Fellow, afterwards Master of Emanuel College	50	0	0
Edward Benlowes, books to the value of	50	0	0
Robert Metcalfe, D.D., Fellow, Regius Professor of Hebrew	100	0	0
Sir Thomas Dawes	40	0	0
Joseph Thurston, B.D., Fellow	50	0	0
John Hacket, Fellow, afterwards Bishop of Lichfield and Coventry	50	0	0
Thomas Fothergill, B.D., Fellow	50	0	0
Joshua Ireland, M.A., Fellow, bequeathed his library and	100	0	0
John Green, Fellow, afterwards Bishop of Lincoln	50	0	0
Roger Kay, M.A., Fellow	100	0	0
Thomas Smoult, D.D., Fellow	100	0	0
Thomas Thurlin, D.D., Fellow	300	0	0
William Arnold, D.D., Fellow	50	0	0
J. Mainwaring, B.D., Fellow, Margaret Professor	150	0	0
Sir Souldern Lawrence, Fellow, one of the Justices of the King's Bench, bequeathed his Law Books and	100	0	0
Mr. Justice Littledale	200	0	0

Amongst those who have given or bequeathed Books may be mentioned:—

Thomas Wriothesley, Earl of Southampton, who gave 162 volumes of MSS.
Francis Dee, Bishop of Peterborough, who bequeathed such of his books as were not in the Library.
Richard Sibbs, D.D., Fellow, afterwards Master of St. Catharine's Hall, a number of Theological Works.
Thomas Bendish, 50 books.
Edward Lightfoot, Fellow, his library.
Ambrose Gilbert, a great number of books.
Robert Mason, Fellow, Law Books.
Samuel Howlett, Fellow, about 80 volumes.
Peter Gunning, Master of the College, afterwards Bishop of Ely, his library.
Humphrey Gower, D.D., Master of the College, a great number of books.
Thomas Baker, B.D., the well-known Antiquary, some MSS. and such of his Books as were not in the Library.
Matthew Prior, Fellow, several volumes.
John Newcome, D.D., Master of the College, a collection of rare books.
Sir Isaac Pennington, Fellow, Regius Professor of Physic, a considerable collection.
Thomas Gisborne, M.D., Fellow, President of the College of Physicians, a considerable collection.
Joseph Taylor, B.D., Fellow, 360 volumes.
James Wood, D.D., Master of the College, and Dean of Ely, 4400 volumes.
Thomas Catton, B.D., Fellow.
Thomas Whytehead, M. A., Fellow.

Answers from the Rev. Edward Warter, M.A., President and Fellow of Magdalene College.

Rev. E. Warter, M.A. President of Magdalene College.

February 6, 1851.

To Her Majesty's Commissioners for inquiring into the State of the University of Cambridge.

My Lord and Gentlemen,

In reply to a series of questions forwarded to the Master of this College on December 20th, 1850, which, from the state of his health, have been put into my hands, as President, to answer—

Statutes.

I beg in the first instance, and as an answer in some degree to the first question, to forward you a copy of our College Statutes, on which I would make a few remarks before I proceed to explain our present practice in relation to the principal regulations therein contained. You will observe that certain parts of many of the Statutes are included in brackets, inasmuch as they were added at a later period. The charter for the foundation of St. Mary Magdalene College on the old site of Buckingham College was granted to the Lord Chancellor Audley in 1542. The Statutes were not compiled till after his death, by his executors, A.D. 1553-54, and the portions included in brackets were probably added (see the letter of the Duke of Norfolk in the beginning of this book) about 1564, during the mastership of Dr. Kelke.

If this be really the history of them, a question naturally arises whether they have any right to constitute a part of the Foundation Statutes of this College. In my own opinion they ought not to be looked upon as such, having been introduced from a misinterpretation of the words of the charter commencing with "Et toties quoties officium alicujus sociorum," &c., and ending with "statuendos;" the heirs and successors of Lord

Rev. E. Warter, M.A., President of Magdalene College.

Audley in after times understanding *faciendos* (which clearly meant only "to be made *once for all*") as "*de tempore in tempus faciendos.*" And, independently of this argument, the way in which many of them are introduced out of place goes far to prove that they are, at any rate, interpolations. However, the visitors have claimed such power down to a very recent date; neither have they apparently been resisted (if at all), at any rate, with any success. The object of these additions would seem in almost every case to be to strengthen the hands of the master; and one can readily understand the introduction of them. *My* object in entering on this subject is merely to explain in some degree what might otherwise appear obscure. As a matter of practice, the presence or absence of the above would make little difference, for so long as the College has the advantage of so liberal, kind, and worthy a head as the present Dean of Windsor, no member of the College would, I am satisfied, think the subject worth investigation.

Revision of the Statutes.

For myself I have only to remark that it has been a source of much regret that the College has not been induced to revise its Statutes according to present practice—a course adopted by several of the colleges in this University.

I suggested the propriety of adopting this step some years ago, but the visitor, as I was given to understand by the master, thought it more advisable to leave them as they were. Since that time, however, I believe that he has altered his views; and had it not been for the continued indisposition of the Dean of Windsor, some steps would have been already taken for their revision under the authority of the Crown.

Appointment of the Head, Fellows, and Scholars.

And now, to reply more particularly to Question 1, I will observe that—*the mode of appointment*, as respects the Head, the Fellows, and the Scholars, is in conformity with the above Statutes, although the scholars appear to be mentioned by anticipation, as there was no provision made for a scholar by the founder.

And here it may be well to explain an apparent anomaly as to the number of the foundation fellows. The charter directs that there should be eight fellows, and yet the ninth Statute says, "Præfectus et socii *sint septem numero*," with a further limitation, and power given to the master and fellows not to fill up all these, in case the funds of the College should not hereafter prove sufficient to support them all; and this will prove to have been the case, when the history of the Foundation estate is referred to hereafter. The two fellows alluded to in Statute XXVIII. were "the Hugh Dennis' alias King's Fellows," a bye-foundation, but as old as the Statutes, and therefore mentioned therein. In enumerating the bye-foundations, in reply to Question 2, I shall give their date and history.

The Qualifications for and Restrictions upon election *now-a-days* are according to the Statutes.

β. *The qualifications for and restrictions upon election now-a-days* are according to the Statutes.

γ. So also are the conditions and duration of tenure.

δ. The length of residence has been curtailed, although the foundation fellows are, except under especial leave from the master, required to reside the major part of each term, being generally engaged in the management or tuition of the College.

ε. The duties or services enjoined by the original Statutes are of course *not* in conformity with the present practice, inasmuch as what were the duties of the whole body have here, as in all other colleges, been delegated to individuals.

Stipends.

The last point of inquiry in Question 1 will require that I should write at somewhat greater length—I mean as to the stipends. emoluments, and advantages of the foundation.

The foundation estate of Lord Audley consisted of the impropriate parsonage of St. Catherine Cree Church, in London, and also a considerable part of the city anciently called Covent Garden Christ Church.

In 1574 the College was foolishly induced (and, indeed, contrary to their Statutes) to alienate the latter portion of this property (which would have been at the present day of enormous value) to one Benedict Spinola, an Italian merchant living then in London. "He" (as the old account of the matter runs), "finding the premises to be undervalued, and leases for a long term of years, at so low a rent as 20*l.* per annum, and knowing the said leases to be void in law, being made against the fundamental Statutes of the College, and devising which way to get the inheritance of the great garden to himself, did practise with the then master and fellows; and thereupon by indentures it was agreed and covenanted that they should alien and grant the said great garden to the Queen in fee for 15*l.* yearly rent, and that he should procure the premises to be recovered to him under the great seal of England, and that, reserving to himself, his heirs, and assigns for ever the said garden in fee-farm for the yearly rent of 15*l.*, he should regrant and assure to them and their successors the parsonage discharged and saved harmless of all charges and incumbrances had, made, or done by him, his heirs and assigns." I need not quote more on the subject. The College lost a valuable property, which in after times, during the mastership of Dr. Goch, they in vain attempted to recover (A.D. 1606), as also in the reign of Charles II., and the whole amount of income which the College derives now from the foundation estates is 165*l.*—the value of Cree Church being 150*l.*, and the annual payment from Covent Garden 15*l.*

Various bye-foundations were from time to time established, properties being left to the College on the condition that they should make certain fixed payments to the fellows and scholars of the several foundations, out of the estates so left; of these a list will be given in reply to Question 2. The gross income of the College from these sources, together with the rents of rooms and fixed college payments, last year amounted to about

Rev. E. Warter, M.A., President of Magdalene College.

4130*l.*; the payments made out of this sum for stipends, the establishment expenses of the College, and fixed allowances to the bye-fellows, made up about 2440*l.*, leaving 1690*l.* to be divided into six portions—two for the master, and one for each of the four foundation fellows. This, however, is a very high dividend, and much above the average of former years, while the reductions we have agreed to make in the rents of the past year will much reduce future dividends, which will perhaps range between 240*l.* and 250*l.* Dr. Peckard (a former master) left a property to the College, including the bye-fellows on Sir Christopher Wray's foundation (which will be mentioned under Question 2), as equal sharers in the proceeds thereof. A fixed dividend of 50*l.* each is derived from this source—the master receiving (as also in the former case) two dividends. In addition to these sources of income, each foundation fellow has his rooms rent-free, and an allowance of some 28*l.* per annum for commons, the master receiving twice that sum on the same account.

There are other sources of emolument attached to the mastership, including the interest on a sum of money derived from the sale of a living formerly held by the head of the College, which I cannot give in detail.

I have thus endeavoured to answer the first question as clearly as I presume to be necessary, unless the Commissioners should wish for further information thereupon.

Bye-Fellowships.

2. The bye fellowships are *thirteen* in number, and were founded in the following order. In the year 1543 two fellowships, entitled Hugh Dennis' (alias King's) Fellows. This foundation was, therefore, prior to the giving of the Statutes to the College by the executors of the Lord Audley, its history being as follows:—Hugh Dennis, Esq., gave a yearly allowance to the Priory of Sheene, where he was buried, for the finding of two priests to pray for ever for his soul; the said priory being legally dissolved, the heir of Hugh Dennis procured an Act of Parliament that himself should enjoy all the lands, and that, in lieu of finding two priests, there should be 20*l.* per annum given to Magdalene College out of the manor of Purleigh; to pay 20 nobles a-piece yearly to two fellows to be nominated by the king and his successors.

During the reigns of Queen Elizabeth and King James I. they were disposed of commonly by mandate; but the College has exercised the right of appointment in modern times. The payment from the manor of Purleigh is still made, and the fellows receive 6*l.* 13*s.* 4*d.* each per annum, to which some addition has been generally made from time to time from what is called the Dongworth Augmentation, proceeding out of a bequest made in 1775 by one Margaret Dongworth, of Old Elvet, Durham, spinster; under *such* circumstances the fellowships are worth about 21*l.* 11*s.* 9*d.* each. Thus the fellows now became six in number.

Sir C. Wray's Fellowships.

In 1587 Sir Christopher Wray *founded by indenture two fellowships*, making the number eight. They were to amount to 6*l.* 13*s.* 4*d.* each, payable out of the parsonage of Garnthorpe, which Sir Christopher Wray gave to the College for that and other purposes. These two fellows were to have the use and preferment of two of the middle chambers in that part of the College which was built by Sir Christopher, and two of the upper chambers for their pupils, the pupils paying 10*s.* a year each to the College for the same. They were likewise to study divinity within three years after they commenced Masters of Arts, or else to lose their fellowships.

The property so left has of late years become of much greater value, and the foundation fellows have their incomes largely increased thereby, as also has the master of the College.

The fellows on this foundation have ever been looked upon by the College as deserving greater privileges, in gratitude to Sir C. Wray for his great liberality towards it; and under this feeling Dr. Peckard admitted them to an equal share with the foundation in the property bequeathed by him, and a portion of the Dongworth augmentation has frequently been enjoyed by them, so that, with a right to rooms rent-free, they have received in money from 56*l.* 13*s.* 4*d.* to 71*l.* 11*s.* 7*d.* per year, with an allowance of 1*s.* per day for commons during residence.

In 1592 Sir Christopher by will founded a third fellowship, allowing a pension of 6*l.* 13*s.* 4*d.* for ever out of his estate at Nubell, and thus the college consisted of nine fellows. "Of late times," say our old records, "it has prevailed to call the fellowship 'the Lady Anne Wray's,' who was wife to Sir Christopher. She founded scholarships, but no fellowship at all."

It still continues to be called "the Lady Anne Wray's fellowship," and consists only of the fixed payment above mentioned, which indeed for many years the college was unable to enforce.

The Spendluff Fellowship.

In 1594 Mr. Spendluff founded what we now call "the Spendluff fellowship," but wha was at the first called "Alford quinquennial fellowship."

This fellowship by the express provision of its founder was to be quinquennial; the fellow to be constantly chosen out of the scholars sent from Alford school, and his stipend by Mr. Spendluff's grant to be 8*l.* per annum. The estate, out of which this fixed payment was to be made, is likewise bound to pay the sum of twenty pounds of lawful English money to the preacher at Alford. It is now worth somewhat more than 400*l.* per annum.

This foundation increased the number of fellows to ten.

Lady Warwick's Fellowship.

In 1625 Frances Countess of Warwick, daughter of Sir Christopher Wray, founded what is now called "the Lady Warwick's fellowship." She gave the manor-house of Auckborough and certain lands for the increase of the college rents and revenues, and likewise for the payment of 5*l.* per annum to her fellow and the support of two scholars (as will be seen hereafter). The income arising out of this estate is almost all enjoyed by the

Rev. E. Warter, M.A., President of Magdalene College.

fellow and two scholars. This fellowship is now worth 50*l.* per annum. By this foundation the number of fellows was increased to eleven.

Dr. Goch's Fellowships.

In 1639 Dr. Goch's two fellowships were founded. He, by will dated 1624, left 12*l.* a year for each; but the annuity failed very soon, having been paid but one year, and the fellows of his foundation have been from that time only *titular* or *nominal* fellows, although they have been admitted to certain small advantages and privileges by the college from time to time, and promoted to other foundations from the above. The number of fellows thus became thirteen

Smith's Fellowships.

In 1638 Mr. John Smith, long fellow and president of the college, did by his last will and testament found two fellowships of 22*l.* 10*s.* each per annum, but no such sum appears to have been paid to them even at the first appointment in 1640.

The conditions expressed in the will are—

1. That the master have but one vote and a casting vote in the election of these two fellows.
2. That every fellow of his foundation be lawful minister within three years from his admission, or lose his fellowship.
3. That he proceed to his B.D. degree at the time allowed by the University.

The property left by Mr. Smith to the college for this purpose consisted of a small farm at Long Stanton, and three publichouses in Cambridge; but certain scholarships founded by him, and hereafter to be mentioned, were to be paid out of the latter. The college now pays either fellow 40*l.* per annum.

The number of fellows now amounted to fifteen.

Drury's Fellowship.

In 1698 Mr. Drue Drury, of Ridlesworth Hall in Norfolk, gave by will the impropriate parsonage of Steeple Ashton in Wiltshire, valued at 120*l.* a year, to Magdalene College, after the decease of Mr. Robert Wake, for the maintenance of a fellow for ever. The conditions are as follow:—

1. The fellow chosen into it must be a *gentleman's* son—chosen by the master *singly*.
2. He must be of the county of Norfolk.
3. A new commenced Bachelor of Arts.
4. Designed for *Holy Orders*.
5. From any college in the University, if there be none in Magdalene so qualified.
6. He is to hold it nine years *and no longer*.
7. He is to spend some good part of the nine years in travelling and visiting foreign parts, and the fellowship to be accordingly called the Norfolk Travelling Fellowship.

The net value of this fellowship is now from 270*l.* to 290*l.* per annum.

This made the number of fellows sixteen.

Dr. Millington's Fellowships.

In 1724 A.D. Dr. Millington, by his will bearing date 1724, in addition to four scholarships (which will be hereafter mentioned) founded a fellowship, not to commence till forty years after the deed of settlement (bearing date the same year as his will), that is 1764. Such fellowship to be open only to students from Shrewsbury school.

A new scheme for the regulation of this charity was obtained in 1817. The value of the fellowship is fixed by this scheme at 126*l.* per annum; and whenever the funds will allow of it, a second fellowship of like value is to be founded, of which there is a very early prospect. This last foundation made up the present number of fellows, viz. 17.

Scholarships and Exhibitions.

The number of scholarships and exhibitions, either incorporated or connected with the college, is forty-nine. Of these a list is briefly given in the Cambridge Calendar, with their value attached, but which contains one error, viz., that Sir Christopher Wray's seven small scholarships are quoted as one, and the amount should be 24*l.*

The founder gave nothing for scholars, but they existed on bye-foundations from the year 1543, when Mr. Hughes, Chancellor of Bangor, gave to the College lands and tenements in Wales to found a scholar, to be called "Mr. Hughes' scholar," who should receive four marks a year by quarterly payments.

The scholar to be nominated by Mr. Hughes during his life, and afterwards by the master and fellows, out of Mr. Hughes' kindred, if any such there be, or in defect thereof any one born in the Isle of Anglesey, or in default of such any one born in Carnarvonshire, or next Denbighshire, or next any part of Wales, or, lastly, any part of the king's dominions. The master and fellows are to elect a scholar within a quarter of a year after a vacancy, or forfeit 20*s.* to the Dean and Chapter of Bangor *toties quoties* for every such omission. I believe the last direction has not been very strictly conformed to.

In 1587 Sir Christopher Wray founded seven scholarships,—four to be called Sir C. Wray's scholarships, and receive 3*l.* 6*s.* 8*d.* per annum; two to be called the scholars of Sir Thomas Parkinsor, who should also receive 3*l.* 6*s.* 8*d.* each per annum; and one scholar, to be called the scholar of Edmond Gryndal (late Archbishop of Canterbury), of 4*l.* per annum.

The residue of his estate, after paying the two fellows and seven scholars, he directs to go to the master and foundation fellows towards the charge of the College and maintenance of lectures there.

Rev. E. Warter, M.A., President of Magdalene College.

Scholarships and Exhibitions.

The Dean and Chapter of Lincoln, with the concurrence of the heirs of Sir C. Wray, are empowered to nominate to the six scholarships out of Kyrton school, in Lincolnshire, or next from Lincoln school. If the Dean and Chapter neglect to nominate after due notice given by the College, then in three months the master and fellows may choose any poor scholars out of the College, or in defect thereof out of St. Peter's.

The strict observance of these directions has long fallen into disuse, and the election to the above scholarships has been open, probably because the schools failed to supply scholars.

About the same date (1591) Lady Anne Wray gave to the College lands lying in Saltfleet haven, to allow two scholars of her foundation 20 nobles per annum between them, or 3*l.* 6*s.* 8*d.* each.

In 1594 Mr. Spendluff (in addition to his fellowship) founded two scholarships of 4*l.* per annum each, to be paid out of the same estate as the fellowship. They are to be recommended to the College from Alford School by the schoolmaster and governors of Alford; and if none be recommended, the College is to choose others, the poorest they have in college: these are only tenable for five years.

In 1591 Mr. Roberts gave an annuity of 10*l.* per annum for the maintenance of three scholars, to have 3*l.* 6*s.* 8*d.* each; to be chosen from the town of Beccles in Suffolk, or else out of the hundred of Wangford in Suffolk, or, in defect, whence the master and fellows think proper.

In 1624 Frances Countess of Warwick (out of the property already mentioned) founded two scholarships of 6*l.* each. (These have since that time been increased by the college to 25*l.* each.) They are to be nominated by the Countess and her *heirs for ever* out of the school of *Market Rasen*, or, in default thereof, out of any other school in Lincolnshire. These conditions have apparently been overlooked for many years, and the scholarships given to the most meritorious youths in the college.

In 1638 Mr. John Smith (the founder of the fellowships which bear his name) also gave property for the maintenance of six scholars, each to receive 4*l.* per annum. The conditions being—that the master should only have one vote in the election, except a casting vote upon an equality; and that students from the free school of Winchester should be preferred cæteris paribus.

In 1656 Mr. Wm. Holmes, upholsterer in Exeter, gave to the burgesses of Wisbech 400*l.* to be laid out in lands for the yearly maintenance of two poor scholars, to be chosen from Wisbech school by the capital burgesses, and allowed 10*l.* per annum each for their support in Magdalene College. For many years only one scholar has been sent up from Wisbech, but I believe that some steps are about to be taken for the better regulating of this charity. The payment at present made to the only scholar in residence is little short of 100*l.* per annum; but it would appear that they have an accumulation of funds never contemplated by the testator, and which never would have existed had his will been faithfully carried out.

In 1679 Dr. Duport founded four scholarships of 4*l.* per annum, leaving the college a small estate at Quy, in Cambridgeshire, out of which they were to be paid, as also a sum of 10*l.* annually to Peterborough school.

In 1721 the Reverend Thomas Millner, Vicar of Boxhill, in the county of Sussex, by will bearing date September 5, 1721, and as corrected by a codicil bearing date September 5, 1722, gave to the college 1000*l.* after the death of his sister (Mrs. Mary Millner), to be paid within 12 months after her decease, and within three years after that date to be laid out in a purchase of land for the founding of three scholarships, to be called the "Millner Scholarships," open to the schools of Heversham in Westmorland, Halifax in Yorkshire, and Leeds in the same county.

In 1736 Mrs. Millner died and left 200*l.* to the college, to make the number of scholarships four, pursuant to the original design of Mr. Millner, before he annexed a codicil. If Magdalene College does not observe the conditions, or misapplies the funds, they shall forfeit the whole to St. John's College.

These scholarships are now worth 77*l.* each.

In 1724 Dr. Millington (the founder of the fellowship) gave also four exhibitions appropriated to youths from Shrewsbury school. By the new scheme of 1817 they are fixed at 63*l.* each, and, in default of Shrewsbury men, are open to the whole college.

In 1734 Mr. J. Millington left by will two scholarships (to bear his name) of 20*l.* each, appropriated to youths born in Frankwell, and educated in the first instance at the hospital in that parish, and afterwards at the free grammar school in Shrewsbury. These have for some time become ineffective through default of properly qualified claimants; but a new scheme is at present being carried out, which will benefit both the town of Shrewsbury and Magdalene College: it is proposed to make them 40*l.* each per annum.

In 1760 the Reverend Mr. Groom, Vicar of Childerdish in Essex, left the college a rent-charge of 30*l.* per annum, to be divided into three exhibitions of 10*l.* each, which are to be given to sizars, sons of clergymen, and to those of Essex in preference to others.

In 1797 Dr. Peckard founded two scholarships, to be called the "Ferrars Scholarships," of 52*l.* 5*s.* each, perfectly open.

In 1832 the college founded a third scholarship of the same value; so that one might be vacant each year.—And

In 1835 the college founded a scholarship of 41*l.* per annum, tenable for three years, and appropriated to King's College, London. This has been since opened by the College

Rev. E. Warter, M.A., President of Magdalene College.

to Eton also. I should add, that there are exhibitions open to boys from Shrewsbury school, which may be taken either to St. John's or Magdalene, and are often held by youths who afterwards obtain scholarships at the College. Such is a brief summary of the different exhibitions and scholarships connected with Magdalene College.

Admission of Students.

Question 3.—The regulations respecting the admission of students over and above the members of the foundation—as prescribed by the statutes and observed in practice?

This question does not apply to our body, there being no regulations on the subject, or limit as to members. The tutor admits pupils with the approval of the master, according to present practice.

Divine Service.

Question 4, as to the College chapel service, I beg to state that divine service is performed at 8 A.M. and 4.30 P.M., on each day of the week except on Sunday, when the morning service is at 9.30 A.M., and the afternoon service at 4.30 P.M.

Undergraduates are required to attend both morning and evening service on the Sunday, under a penalty of losing the week, and six times during the remainder of the week, as a *minimum*.

The nobleman and fellow-commoner pay 2*s.* for each absence on a Sunday in addition to the loss of a week (mentioned above), and 4*d.* for each absence during the week.

The pensioner and sizar 2*d.* in the first case and 3*d.* in the second.

Course of Study.

5th Question.—The course of collegiate instruction given to the student is that adapted to the honour and ordinary degrees of the University.

The *mathematical lectures* are fixed for each term of the three years (as at other colleges), so as to include the different subjects for the honour men, and so also for the ordinary degrees. The *classical lectures* are for the first two terms indefinite (but fixed from year to year); for the remainder of the three years they include the subjects for the previous examination and the ordinary degree. Independent of the classical lecture for each year, I have always given a voluntary classical lecture for the honour men of the different years three days a week, and a composition lecture on four or five days also. Under the head of classical lectures are included those on the Gospels and Epistles, which are given in two out of the three terms of each year, and involve the reading of certain other collateral books, such as Bishop Marsh's Lectures, Bishop Middleton on the Article, &c. The four foundation or other four fellows are employed in giving the College lectures, while all take part in the general examination in May.

The two *principal* examinations in the year are in February and May. The former is for scholarships, and consists only of classical subjects, and one in divinity (changed from year to year). The *latter* is on the subjects on which the students of each year have been lectured during the three previous terms, taking place at the division of the Easter Term. There is also an examination *of the freshmen* at the end of the Michaelmas term both in the classical and mathematical subjects of the term, although they are not then classed, as also of the second-year men in the subjects for the previous examination. The candidates for both degrees are examined twice a week during the Michaelmas term previous to their final examination.

The two principal examinations are conducted by the whole of the fellows, amongst whom the subjects are distributed—the others by the lecturer in each department. Both classical and mathematical prizes are given for proficiency to the freshmen; mathematical only to the junior and senior sophs. There are also prizes for Latin and English essays; and for the best reader in chapel.

Attendance on Lectures.

Question 6.—As regards the attendance of the several classes of students at the college lecture—

1. The *freshman* is expected to attend one lecture in mathematics and one in classics each day.

The *junior soph*, one lecture only if a candidate for mathematical honours; if for classical also, two.

The *senior soph* the same, unless he be a candidate for an ordinary degree, and then he has but one lecture each day; and the same remark applies to the second year.

Irregularity of attendance on the part of the pupils is visited either with the loss of weeks, or the penalty of being confined to early gates.

Attendance at Dinner.

2. Every pupil was formerly marked each day in hall, and a note kept of his attendance; but the alteration made some years ago at this college in the quality of the dinner (whereby, for 2*s.* per head, either fish or soup, meat, and pastry are provided) has rendered *this unnecessary*, as the men rarely absent themselves. Any case of constant absence would of course be noticed.

College gates closed

3. All students, unless gated by way of punishment at an earlier hour, are required to be within their college, or in their licensed lodgings, by 10 o'clock P.M.

Fines.

Any nobleman or fellow commoner, coming into college between 10 and 11, is fined 2*d.*; between 11 and 12, 4*d.*; between 12 and 1, 2*s.*; after 1, 2*s.* 6*d.*; and after 2, 3*s.*

Any pensioner or sizar coming in after 10 and before 11, is fined 1*d.*; after 11 and before 12, 2*d.*; after 12 and before 1, 1*s.* 4*d*; after 1 A.M., 1*s.* 6*d*; and after 2 A.M., 2*s.* 6*d.*

Any pupil who is constantly out after 10 subjects himself to a reprimand from the tutor, and whatever punishment he may think fit; and any pupil out after 1 A.M. loses a week *ipso facto*. Later hours are more severely visited by the college.

Rev. E. Warter, M.A., President of Magdalene College.

Expenses.

4. The college has always found great difficulty in carrying out the regulations of discipline as regards the expenses of the undergraduates; and whether the rule of recognising tradesmen's bills in the college account is on the whole desirable, I am after many years' experience unable to decide, as much may be said pro and con. However, the practice of the college is to admit in each term's bill, *after* the necessary expenses, a limited list of tradesmen's bills, to the following amount in each case:—

	£.	s.	d.
Bookseller	10	0	0
Cook	10	0	0
Tailor	7	0	0
Grocer	5	0	0
Draper	3	0	0
Shoemaker	3	0	0
Druggist	3	0	0
Sempstress	2	10	0
Horsekeeper	2	0	0
Hairdresser	1	10	0

I believe, *up to a recent date*, there was no advantage in this rule, as the tradesman in each case kept back a large amount at the request of the pupil; and thus he might incur a great amount of debt without the knowledge of the tutor; but since by the recent rule all local tradesmen *are obliged* to make a quarterly return of all debts incurred with them beyond 5*l.*, the evil *has in part* been remedied, although the University, with the best intention, has still only *benefited* the London tradesmen at the expense of the local ones, for the former now flock here and take orders to a fearful extent, inasmuch as the young men can incur such debts without a possibility of being found out by their tutors; and this is an evil which *nothing but an especial* Act of Parliament for the two Universities can remedy, and which I trust to see eventually passed, making all debts contracted by young men either here or at Oxford, in statu pupillari (whether of age or otherwise), irrecoverable.

A weekly paper is sent to each member of the College from the butler with his account of bread, beer, butter, and cheese in each week, and a similar one is delivered by the College cook, stating the *necessary* expenses of the table, and likewise such as need not have been incurred.

No dinners or suppers are allowed in the College except with an order from one of the tutors.

The compulsory return now made by every tradesman (including horse-dealers) has certainly enabled a tutor to prevent much mischief which used to arise, as a tutor can now more readily discover the first outbreak of his pupil, and perhaps save him from going utterly wrong.

College Bills.

Question 7.—College bills are with us divided into three parts, to correspond with the terms, and not into four quarters.

A Nobleman's necessary payments.

A nobleman's *necessary* payments are as follows:—

	£.	s.	d.
Introduction on admission	5	10	0
College servants' fees	1	0	0
	£6	10	0

For the week:

	£.	s.	d.
Buttery bills (on average)	0	8	3
Commons and coals (ditto)	0	17	0
Gyp	0	2	6
	£1	7	9

For the term:

Detriments, combinations, lamps	3	2	8
Payment to sizars	2	16	0
Living fund	0	13	4
Extra commons at fellows' table	4	0	0
Lecturer and catechist	0	10	8
Utensils, cook, and caterer	1	8	6
Chamber-rent	8	13	4
Bedmaker	2	2	0
Laundress	2	2	0
Tuition	13	6	8
Porter for waiting in hall	0	10	0
Cook for use of china	0	5	0
	£39	10	2

Rev. E. Warter, M.A., President of Magdalene College.

For the year (that is at the end of the Easter term annually) a nobleman is also charged—

	£.	s.	d.
Income	1	0	0
(Town) paving and lighting	0	4	6
Scavenger	0	6	0
(University) library	0	6	0
Tablecloth	0	0	4
	£1	16	10

Coals were charged to all at the rate of 2*s.* per sack, but are now reduced.

His chapel and gate fines have been already mentioned under Question 6.

A Fellow-commoner's necessary expenses.

the *necessary payments* of a fellow-commoner are as follows:—

	£.	s.	d.
Introduction on admission	2	15	0
College servants' fees	0	10	0
	£3	5	0
For the week:			
Buttery bills (on average)	0	8	3
Commons and coals (ditto)	0	17	0
Gyp	0	2	6
	£1	7	9
For the term:			
Detriments, combination, and lamps	3	2	8
Payment to sizars	1	8	0
Living fund	0	13	4
Extra commons at fellows's table	4	0	0
Lecturer and catechist	0	10	8
Utensils, cook, and caterer	1	8	6
Chamber-rent	6	13	4
Bed-maker	2	2	0
Laundress	2	2	0
Tuition	6	13	4
Porter for waiting	0	10	0
Cook for use of china	0	5	0
	£29	8	10

For the year (that is at end of Easter term annually):—

	£.	s.	d.
Income	1	0	0
(Town) paving and lighting	0	4	6
Scavenger	0	6	0
(University) library	0	6	0
Tablecloth	0	0	4
	£1	16	10

His chapel and gate fines have been already mentioned under Question 6.

Both the nobleman and fellow-commoner pay their share of the wine at the dinner-table, and join the party in the Combination Room or not afterwards as they please. Their wine bill for the term is from 3*l.* to 5*l.* on the average.

A Pensioner's necessary expenses.

The necessary payments of a pensioner are as follows:—

	£.	s.	d.
On admission	1	7	6
College servants' fees	0	4	0
	£1	11	6
For the week:			
Buttery bill (on average)	0	8	3
Commons and coals (ditto)	0	17	0
Gyp	0	2	6
	£1	7	9
For the term:			
Detriments	2	0	0
Lamps	0	2	0
Living fund	0	13	4
Lecturer and catechist	0	8	0
Utensils and cook	0	10	8
Carried Forward	£3	14	0

	£.	s.	d.
Brought Forward	3	14	0
Plate fund	0	3	4*
Caterer	0	9	2
Chamber-rent, £5, or	3	6	8
Bedmaker	2	2	0
Laundress	1	15	0
Tuition	3	6	8
Porter for waiting	0	10	0
Cook for china	0	5	0
	£15	11	10
For the year:			
Income	1	0	0
(Town) paving and lighting	0	4	6
Scavenger	0	3	6
(University) library	0	6	0
Table-cloth	0	0	4
	£1	14	4

The chapel and gate fines of the pensioner have been already mentioned under Question 6.

Supposing, therefore, the pensioner to reside eight weeks each term (which is above the average, except where men are candidates for honours), his term's bill will (as far as *necessary* expenses go) amount to about 27*l.* It may at first sight appear strange that the charge for commons is the same for nobleman, fellow commoner, and pensioner (see *weekly* expenses); but the fact of the dinner *being improved* for the pensioners (as stated in reply to Question 6), and made for the most part similar to that of the fellows and fellow-commoners, will explain the case.

I may here remark that the pensioners are allowed (by giving due notice) to bring a friend into the hall; and this has reduced the number of dinners in private rooms to a great extent.

A Sizar's necessary expenses.

The necessary payments of a sizar are as follows:—

	£.	s.	d.
On admission	0	15	0
Fees to college servants	0	3	0
	£0	18	0
For the week:			
Buttery bill (on average)	0	8	3
Gyp to clean shoes, &c.	0	1	6
	£0	9	9
For the term:			
Detriments	1	6	8
Lecturer and catechist	0	2	0
Rent of rooms	1	6	8
Bedmaker	2	2	0
Laundress	1	15	0
Tuition	1	6	8
Porter for waiting in hall	0	10	0
Cook for china	0	5	0
	£8	14	0
For the year:			
Paving and lighting	0	4	6
Tables	0	0	4
	£0	4	10

The sizars pay nothing for commons, but were up to a recent period charged for coals at 2*s.* per sack, as other members of the College.

They receive a certain small payment each term, which varies with the number of noblemen or fellow-commoners.

The number of sizars is at present limited to four, and the appointment is claimed by

* The pensioners' table being now amply provided with silver, it is proposed to drop this, or convert it into a subscription to the College library, to which the undergraduates have access.

Rev. E. Warter, M.A., President of Magdalene College.

the master. Certain small sums were left under wills at different times for the assistance of sizars, as well as poor scholars, but most of them appear to have been lost to the College in some way or other.

Average expenses.

Question 8.—This question is somewhat hard to answer in general terms, but may by a subdivision be replied to somewhat more easily. I should say, then, that the *average expense* of *a steady reading man* as a pensioner for *the three academical terms*, *including* the ordinary amount of tradesmen's bills, taken in by the tutor, and *excluding* private tuition (which with *that class* in this College is, I am glad to say, as far as the classical department goes, not very general), is about 100*l.* per annum, or 33*l.* 6*s.* 8*d.* per term. The *average* expense *of the pensioners generally* under the above-mentioned circumstances is about 44*l.*; of fellow-commoners, 69*l.*; and of nobleman, 95*l.*, for each term.

The expenses of a sizar depend much on the state of the College as regards the number of noblemen and fellow-commoners, inasmuch as they contribute a fixed payment to the sizars; but their average yearly expenses may be perhaps put down at £54, excluding private tuition, and including small tradesmen's bills, as before stated. All our scholarships are open to sizars, so that it not unfrequently happens that the tutor has to pay a balance to the pupil instead of the pupil to the tutor.

Poor Students.

Question 9.—There is but one *direct source*, with the exception of the scholarships and exhibitions already mentioned, whence any maintenance or assistance can be obtained for poor scholars, and that is the Pepysian benefaction of 50*l.* per annum, derived from the publication of 'Pepys' Diary,' and by the generosity of the present visitor bestowed upon the College with a provision that it should be in the master's gift. He (the master) gives it away from year to year, with the advice of the tutors, whom he always consults, to the most deserving of the poor scholars.

Reduction of expenses.

Question 10.—I much doubt whether any great reduction can be made in the expenses of a College residence, although this remark would have been far from true some twenty years ago. Perhaps my own College might somewhat reduce its *fixed payments*, but not to any important extent.

Undoubtedly much may be done by the *University on one point*, by legislating for the abolition (to a great extent at any rate) of the private tuition system, but my opinions on this subject I shall reserve for my reply to the Questions of the Commissioners issued February 18, 1851.

Extravagance.

As regards the restraining habits of extravagance and facilities of credit, I believe the University has left no reasonable means untried in her attempts to put a check *on the latter*; although, as I have already remarked, these efforts have in some cases signally failed, and only thrown the pupil into the hands of London money-lenders and London tradesmen, against whom the authorities here cannot, as far as I am aware, pass an availing enactment. Habits of extravagance are unfortunately very generally brought up with young men both *from home* and *our great public schools*; for the former of which parents have to thank themselves to a great extent, and I trust the day is not far distant when we shall see the expenses of the *latter* reduced to a great extent, either by the force of public opinion or some more direct means. It is no longer to be tolerated, in my humble opinion, that the necessary expenses of a public school should exceed those of a young man at a more advanced age at the University, though such is at this moment the case. The root of the evil lies too deep for the University to remedy, use what efforts she may, and must be directly struck at. Principiis obsta.

I believe it is only due both to the Heads of Colleges and the tutors generally to state that they have, both individually and collectively, been for some years past using their best exertions to restrain both habits of extravagance and facilities of credit. Of one thing I am satisfied, that the Cambridge tradesmen are now visited with as great severity as is in any way consistent with good feeling, or, I may in some sense say, the liberty of the subject.

Removal of restrictions on Fellowships, &c.

Question 11.—It is my own private opinion that great advantage might be derived in many colleges by the removal of certain appropriations, limitations, and restrictions which now affect the tenure of certain fellowships, scholarships, and exhibitions belonging thereto, and especially so in my own College. As long as the schools from which scholars are sent up to the College continue to flourish, there can of course be no wish on the part of any one to see vested rights interfered with; but where from circumstances such places have fallen away, and the supply all but ceased, I for one should, I confess, be very glad if legitimate means were provided for making the exhibitions in such cases available for the public and other schools throughout the country. I consider that what are called the Millner scholarships at this College (above described) are an instance where the limitations might now be extended, if not removed, as on the average the three schools do not supply candidates enough to fill up the scholarships. The same remark will apply to the Norfolk travelling fellowship (already described). This, although nearly the best fellowship in the College, is now comparatively of small benefit to the College, from the restrictions placed upon it, while the purposes for which it was founded can be no longer said to exist.

Scholarships unclaimed.

Question 12.—Many of the appropriated scholarships at this College have been for years *without claimants*, but the extension clauses contained in almost all of them have enabled the College to treat them as open scholarships. The two exhibitions, however, on Mr. James Millington's foundation form an exception; but (as I have already stated)

a new scheme is in progress, by which, when carried out, they will not only be doubled in value, but made sufficiently open to be never without abundant claimants.

Rev. E. Warter, M.A., President of Magdalene College.

Question 13.—I am hardly prepared to say that I can recommend the consolidation of any of our *smaller fellowships*, provided such step could be effected by competent authority; for although two of them are valueless, and others very poor, they are very useful as stepping-stones for those who may not have an *immediate* chance of being elected into something better. They furnish a title for orders, and give a certain status to young fellows, who remain in residence, and take private pupils, as things stand at present; and should any such views as I entertain be hereafter adopted in regard to private tuition, they would be still very useful, having a fresh source of income provided for them.

Consolidation of Fellowships.

Again, I have known many instances where they have proved very useful to *non*-resident members, both in the securing of pupils for them, and the obtaining of orders, if they happened to be resident in foreign countries.

On the other hand, I consider the consolidating of certain small scholarships under competent authority would be most desirable; in the *absence of which authority*, we have ourselves continually united together those founded by the same individual.

Consolidation of Scholarships.

Magdalene College Library.

Rev. M. Bright, M.A.

My Lord and Gentlemen,

I beg to make the following remarks in reply to the list of queries sent to the Librarian of Magdalene College, and I hope to be excused if I do not exactly confine myself to answering the questions. There are three libraries in Magdalene College: the original, or Foundation Library, chiefly valuable for its books on divinity; the Peckard collection, left by the will of Dr. Peckard, Master of the College 1785; and the Pepysian Library. The Peckard Collection was united with the Foundation Library by a college order in the year 1834, and the united library placed under the care of a librarian, who is one of the fellows of the college. Since then the library has been newly arranged, and a manuscript catalogue has been made. A fire is constantly kept up during the daytime, and under certain conditions undergraduates are admitted to the use of the library. Keys are given to those of them who are deserving, and who are desirous of the privilege, and they are allowed in the daytime to sit and read there. This is a privilege, which is found to be of great benefit, and of which the undergraduates gladly avail themselves.

Magdalene College Library.

There are no funds appropriated to the support of the library, but the college has of late bought such books as might be serviceable to a classical student, such as Greek and Latin Lexicons, Thirlwall's History of Greece, Arnold's History of Rome, &c. &c.; and it is proposed to appropriate to the library, a fund hitherto applied to the purchase of plate.

Support of Library.

The Pepysian Library was left to the college, after the death of his nephew John Jackson, by Samuel Pepys, Secretary to the Admiralty in the reigns of Charles II. and James II. By his will the library was ordered to be continued in its present form, and no other books mixed therein, and to be in the new building in the second court of Magdalene College, in a room wholly and solely appropriated thereto, and called by the name of Bibliotheca Pepysiana. This library is to be under the sole power and custody of the Master of the College for the time being, who is not to convey any of the books to any other place except to his own lodge, nor there to have more than ten of them at a time. If these covenants are not fulfilled, the library is to be forfeited to Trinity College, subject to the like possession and use.

The Pepysian Library.

Pepys's wishes were strictly complied with. His books were deposited in Magdalene College, in the new building, in the second court, and in the same bookcases, eleven in number, which held them when in his own house. Some years after, the Master obtained the consent of the then Fellows (as far as was in their power) that the Pepysian Library should be removed to an apartment in the Master's Lodge, and an order was obtained from the Master and Seniors of Trinity sanctioning the removal, of which the following is a copy:—

"*May* 6, 1833.

"Agreed by the Master and Seniors, that the consent of the College be given to the removal of the books, &c., of the Pepysian Library from their present situation in Magdalene College to an apartment in the Master's Lodge of the same College.

Chr. Wordsworth, M.C."

In conformity with this permission the Pepysian Library was subsequently removed to an apartment in the Master's new lodge.

The Library is very valuable, especially in its collection of early printed books by Caxton, Wynkyn de Worde, Richard Pynson, &c., and for a collection of old Ballads in five folio volumes. There are also valuable documents and papers connected with the English Navy, and the original manuscript of Pepys' Diary in shorthand.

To this Library no person, whether a member of the University or a stranger, is allowed to have access, except in the presence either of the Master of the College, or of one of the four Foundation Fellows.

I have the honour to be,
My Lord and Gentlemen,
Your obedient servant,

Magdalene College, May 26, 1851. (Signed) MYNORS BRIGHT.

Rev. W. Whewell, D.D., Master of Trinity College.

Answers from the Rev. W. Whewell, D.D., Master of Trinity College.

My Lord, *Trinity Lodge, Cambridge, January* 6, 1851.

I have had the honour of receiving from your Lordship, on the part of the Cambridge University Commission, a list of Queries, with a request for such information in reply as I may be disposed to communicate.

Statutes.

These Queries refer to various regulations respecting the members of this College, and to the practices which there prevail; which regulations and practices are determined by the Statutes of the College, or by Orders made by the authorities of the College in pursuance of the Statutes, and in virtue of the constitution of the College.

I conceive that such regulations and practices as are thus inquired into cannot be established in any other manner than that which has hitherto prevailed, without a violation of all previously-existing law relative to the College, and a complete disturbance of its beneficial working. I conceive, moreover, that the ordinary authorities of the College are not in any degree bound to render to any other authority, except to the Visitor exercising his office according to the Statutes and usages belonging thereto, any account of the regulations which they make, the practices which they establish or allow, or their proceedings in the administration of the College. If, therefore, it be intended to found upon the information now applied for any attempts to alter the regulations or practices of the College by any external authority, I must beforehand protest against any such attempt, as contrary to the legal and constitutional rights of the College, destructive of its independence, and inconsistent with its useful and beneficial influence.

I may add, further, that the College is entitled to assume that the Queen, as the supreme authority by which the Statues are confirmed, is satisfied with the Statutes of the College as they now exist; inasmuch as these Statutes, entirely revised and corrected, have within a very few years been confirmed by Her Majesty, on the usual and necessary application of the College; and the regulations and practices of the College are carefully framed in accordance with the Statutes by the College authorities, on whom that office statutably falls.

If the apprehension of such an illegal and unconstitutional interference with the rights of the College as has been referred to were removed, the College has no reason, nor do I believe it would have any wish, that any part of the information now applied for by the Commissioners should be withheld from them.

In the trust, therefore, that, through a continuance of that kindness and consideration which we have already experienced from Her Majesty, as well as from Her Predecessors, we shall be protected from all such infringement of our rights, I will make some remarks in reply to the List of Queries forwarded by your Lordship.

Appointment of Head, &c.

The first question may be answered by reference to the College Statutes, of which a copy is herewith sent, the practice of the College being conformable to the Statutes. The following chapters are those which principally bear upon the points inquired of by the Commissioners:—

Cap. II. De Magistri Officio.
Cap. III. De Seniorum Numero et Officio.
Cap. X. De Officiariorum et Lectorum et Seniorum et Concionatorum Electione.
Cap. XII. De Sociorum Electione.
Cap. XIII. De Discipulorum Electione.
Cap. XXII. De Exitu ex Academiâ et copiâ exeundi petendâ.
Cap. XLIII. De Commeatu Stipendiis et Liberatura omnium qui Collegii sumptibus aluntur et sustentantur.

Question 2. All the additional Fellowships and Scholarships have been put on the same footing as the Foundation ones.

Admission of Students.

Question 3. See in the Statutes Cap. XIV., De Pensionariis. In practice 135 Pensioners are admitted every year. The public buildings and general arrangements of the College will not allow a greater number.

Divine Service.

Question 4. There is service in the chapel of the College every day, morning and evening (except that the evening service is sometimes omitted during the long vacation).

The sacrament is administered once (at least) every Term, and also at Christmas, Easter, and Whitsuntide.

The Students are required to attend at the service once at least every day, and twice on the Sunday.

Default of attendance is noticed by remonstrance from the Deans, and by constraints and "impositions," or tasks imposed by them. If this does not suffice, the Tutor is referred to; and if his interference is ineffectual, the defaulter is brought before the Master or the Seniors; and, if obstinate in his fault, is rusticated or otherwise removed, his parents or guardians being apprised first of his danger.

Collegiate instruction.

5. Collegiate instruction, and College Lectures, and Examinations.

6. The regulations of discipline as to the attendance of the several classes of Students at the College Lectures.

The Students are required to attend the College Lectures every day, each in his respective Division. The Freshmen attend two lectures a day, one in a classical and one in a mathematical subject; and, generally speaking, all the Freshmen on each side, that is all the pupils of each Tutor, about 45 in number, are lectured together during the first two terms. It is conceived that there is a great advantage, at the outset of their College career, in having a considerable number of the students of the same standing lectured together. In the subjects of the lectures they have had time to prepare themselves before they came to College, and generally have been prepared by their previous teachers; so that for a time, at least, all

Rev. W. Whewell, D.D., Master of Trinity College.

can go on together; and during this time, the less advanced learn, not only by what the Lecturer delivers, but by the performances of their abler fellow-students, and each person's character and reputation are brought before the others, the lecture being accompanied by a *vivâ voce* examination. The lecture being upon *given subjects*, previously announced, in which an examination is to be held at the end of the year, this public and simultaneous teaching is less impeded by differences of attainment in the different students than a preparation for a general examination would be; and the advantages of this mode of teaching in other respects are very great. Indeed, mere private preparations for examinations, with or without private Tutors, cannot with any propriety be called *teaching*.

In the third Term, however, and in the succeeding Terms, the different progress previously made by different students makes it difficult to teach them together in the lecture-room; and it is usual to separate students of the same standing into different Divisions, according to their proficiency. These Divisions are arranged, and their subjects selected, so as to engage every student in a preparation either for the College Examinations, or for the University Examinations, or for both.

Sometimes, in the third year of the Student's residence, his attendance on College Lectures is in part dispensed with, on condition of his attending the Lectures of some of the University Professors. Now that the University requires attendance at the Lectures of the University Professors, this practice may be expected to increase.

Prizes.

There are, in this College, Examinations at the end of the first, second, and third year of residence; and also an Examination at the end of the first Term of the second year. Those who obtain a place in the first class at each of these Examinations receive a prize of books, publicly bestowed in the College Hall, on the Commemoration Day.

Besides these prizes for attainments in Classics and Mathematics, there are given to the students of the second and third years, prizes for proficiency in the Greek Testament, as shown in the General Annual Examinations; five prizes of 5*l.* to the former year, and five prizes of 7*l.* to the latter: also two other prizes of 15 guineas each have been founded by the friends of the late Archdeacon Dealtry, for proficiency in the Greek Testament.

There are also three prizes for English Declamations by the Students of the third year; two prizes for Latin Declamations; a prize for an English essay; three prizes for Latin verse for the Undergraduates in general; a prize for an English essay by the Bachelors; the Wrangham Prize Medals, for perpetual superiority, with the motto ἀιὲν ἀριστεύειν, and other prizes for good conduct, and other merits.

These prizes have been instituted at various periods, partly by the College, and partly by friends of the College.

Staff of Lecturers and Examiners.

The number of the Fellows of the College employed in giving the College Lectures is commonly 12, or, as at present, 13.

The number of the Fellows engaged in the College Examinations every year is nine, some of whom (two or three) are also Lecturers. These Examiners vary from year to year.

Examinations.

The Examinations are conducted mainly upon paper; but there are *vivâ voce* examinations in Euclid, Mechanics, and in some of the Greek and Latin subjects.

Besides the preparation made in the Lectures for the "Previous Examination" of the University, and for the Final Examination for A.B., there is an Examination of the "Questionists," who are candidates for Mathematical honours in all the branches of Mathematics in succession, in the Term preceding the University Examination.

Attendance on lectures.

By the "Regulations of discipline as to the attendance of Students at the College Lectures," it is presumed that the mode of dealing with non-attendance is meant. Such faults are generally, in the first place, noticed by remonstrance from the Lecturer, and by "impositions" or tasks imposed by him. If this does not suffice, the Tutor is referred to, as having more weight with the students in general. If his remonstrances are insufficient, the offender is brought before the Master, or the Seniors, and, if obstinate, is rusticated or otherwise removed, his parents being apprised first of his danger.

Course of studies.

Herewith is sent a printed statement of the College "Course of Studies," which is habitually put in the hands of the students or their friends.*

6. Regulations of discipline as to the hour of the evening at which students are required to be within the College or their licensed lodgings?

College gates closed. Lodging-houses.

Students are required to be in College or in their lodgings by 10 o'clock in the evening. If reported (by the College Porter or by the lodging-house keeper) as coming in later, they are demonstrated with by the Dean according to the case; always when they come in after 12, and when their late hours are habitual. They are punished for such faults by restraints (to gates) or impositions; and, if the offences be grave or obstinate, by being brought before the Master or the Seniors, and removed, their parents or friends being first apprized of their danger.

Lodging-house keepers making false returns have their licences taken from them.

Attendance at dinner.

As to the Attendance at the Dinner in the College Hall.—Students are required to dine at least five times every week (including Sunday), in the College-hall. Those who do not do so lose the week. They cannot "keep their term" without doing this for above half the Calendar Term, which is commonly a very large portion of the actual residence for the term, as required by the College.

College expenses.

As to the Expenses of the Students.—The principal opening for expense within the College is the bills of the College cook, which may be large if the student be luxurious or too hospitable. These expenses are restrained by various regulations. A student is only allowed to incur a cook's bill of 12*s.* in one day, and this only once or twice a-week. For any larger entertainment he must have a note of permission from his Tutor.

* This Statement already appears in Dr. Whewell's Evidence on Expenses and Tuition, p. 208.

Rev. W. Whewell, D.D., Master of Trinity College.

The "buttery bills," which include the "Commons" in the Hall, as well as bread, butter, beer, &c., are sent every week to each student.

As to expenses incurred out of the College, all the ordinary tradesmen's bills (not including wine-merchants' and fruiterers' bills), may be sent to the Tutor, being first approved by the student himself; and if sent, are by him reported to the friends of the student, and payment made through the hands of the Tutor. I conceive that this process acts, to a great extent, as a check upon extravagance on the part of the student and extortion on the part of the tradesmen. It makes it necessary for the tradesmen to have a good character in the eyes of the Tutor, and for the student to take care that his bills will bear the eyes of his friends.

Debt.

But students may often contract bills which either do not come within the College rule, or are purposely kept back from the Tutor. This is the great source of extravagant expense, and is very difficult to control by any rule made by Colleges. The University has lately made a salutary rule that every Cambridge tradesman or dealer with whom any student contracts a debt shall report the amount to the Tutor at the end of every term (even though it should not be within the class of "bills taken in by the Tutor"), and shall be discommoned if he do not do so.

10. The practicability of *further* restraining extravagance.

Restraints upon extravagance.

The University regulation just mentioned has already been carried into execution in some cases, though, of course, where both the student and the tradesmen wish to conceal the debt, it is difficult to obtain evidence to act upon. The regulation has been complained of by Cambridge tradesmen as driving their customers to deal with London tradesmen; but it is plain that this can only take place when both the tradesman and his student-customer are willing to conceal his debts from the student's friends. If the regulation be vigilantly acted on in every case which presents itself, I have no doubt that it will in a few years produce a very decided effect in discouraging expensiveness in students and facility of credit in Cambridge tradesmen. There is some difficulty, however, in acting on the regulation, not only on account of the difficulty of procuring evidence, but also because the consent of a majority of the Heads of Colleges is requisite, or is held to be requisite, in order to "discommon" an offending tradesman. It might be worth considering whether the application of the regulation might not be made possible without this condition, often, from various causes, difficult to obtain.

In the way of further modes of discouraging expense, it may be suggested that the cook's bills, as well as the buttery bills, should be sent every week to each student. This would be a warning to him, if he were expensive. It is done at some Colleges.

Again, it might very reasonably be ordered that no student should keep more than one horse. This is sufficient for exercise; more implies hunting or racing.

Parents.

But the main hope of controlling the expensiveness of our young men must depend upon the hearty co-operation of their parents and guardians, and this we can by no means reckon upon in all cases; not even in all cases where they utter very loud complaints of this expensiveness. They are not often willing that their sons should punish the tradesmen by pleading their minority, nor that the payment of the tradesmen should be made to depend upon his not being facile in giving credit to the young men.

Public school.

Moreover, the great expensiveness which is become habitual at most of our public schools makes it improbable that the students should take up frugal habits when they come to the University.

Private tuition.

One source of considerable expense would be removed if private tuition were restrained within narrow limits. At present most of the students have private tutors during the greater part of the time that they are here, at an expense of from 40 to 60 guineas a-year. It would much improve the influence of our Cambridge education upon the minds of the students if they were not commonly allowed to have private tutors, especially during the latter part of their undergraduateship, for the dependence on private tutors enfeebles the mind and depraves the habits of study; and the private tutor's instructions having for their object merely the student's success in a coming examination, without the more general or dignified tone which public teaching naturally assumes, lower the character of our teaching; and as the Examiners, for the most part, alternate the employment of examining with that of private tuition, this lowered character affects the examinations. The repression or limitation of private tuition would, therefore, be no necessary loss in the way of intellectual discipline, but the contrary: but private tuition can only be repressed by some general measure; for so long as it is permitted, students are not willing to relinquish it, since to do so would be likely to make them fail, when examined against those who have had private tutors. It would not be difficult for the University to repress private tuition. It has done so in former times, and even at present there exists an unrepealed "grace" prohibiting private tuition in the last half-year of the student's undergraduateship. But this grace is ineffective, not having any working clause; such, for instance, as might be supplied by requiring the student, or his Tutor, to declare, on his becoming a candidate for an honour, that he has not had a private tutor within the prohibited time; indeed the existence of this grace appears to be ignored in the University.

If, however, it be inquired whether the University is likely to pass an effective grace repressing the practice of private tuition, I may say that I do not think that such a result is probable. A great number of members of the Senate are engaged in the practice; many others approve of it: probably the sympathy of the students themselves, so far as that has any weight, would be against any change which would require them to exert their own minds more and depend on others less; so that I fear we can hardly look for any material improvement in this respect to proceed from the University itself.

I must add, that I do not see how any external authority can interfere with any prospect of advantage in such a matter as this; though I think the result would be beneficial, in the way

of improving our education, as well as diminishing the expenses of our students, I do not see how it is to be attained. *Rev. W. Whewell, D.D., Master of Trinity College.*

Perhaps it may be said that we ought to improve the College lectures, so that private tuition shall not be needed, or shall be less needed; but to this the answer is, that it would not be by *improving* but by *spoiling* College lectures that they would tend most to supersede private tuition. It would be by trying, through College lectures, to enable students to pass their examinations without understanding their subjects; by leaving out in the lectures all that interests active, exact, and comprehensive minds; all that makes the knowledge acquired at College a matter of common understanding and common interest to those who have had their education there, and by giving to each person only such technicalities as he could master with the least effort. And however far we were to go in making our College lectures approach to private tuition, still, so long as they retained any of the merits of College lectures, they would not content the ordinary pupil so well as ordinary private tuition; to which must be added, that the pupil values more what he has to himself, what he pays for himself, or what is given to him in a familiar and companionable tone, without any restraint from the presence of others; so that I do not think we can make College lectures supersede private tuition, by attracting the pupils from the private tutors. College lectures.

It may be said, perhaps, that we ought to make the examinations such that private tuition of the low kind which has been described shall not supply an adequate preparation for them; but to this we reply, *first*, that if such a modification of examinations as should produce this effect were possible, it is not likely that the examinations will, for the present, be so modified, seeing that a great part of the Examiners are also private tutors: and we reply, *secondly*, that it is not possible so to modify examinations that it shall not be a good calculation for a student who aims merely at success in the examination to prepare himself for it by habitual and constant and servile dependence upon an experienced private tutor, if such a mode of preparation be permitted. Examinations.

I began to speak of this subject as a matter of expense, but if I may here pursue it with reference to its other defects, which are made the subjects of inquiry also, I may add my very decided opinion that no system of education which is governed entirely, or even mainly, by examinations occupying short times with long intervening intervals, can ever be otherwise than, a bad mental discipline. Intellectual education requires that the mind should be habitually employed in the acquisition of knowledge, with a certain considerable degree of clear insight and independent activity. This is universally promoted by the daily teaching of the lecture-room, with the sympathy and interest that the mutual action of various minds produces; it is not necessarily or greatly promoted by the prospect of an examination. It is true, however, that in the lecture-room, according to the *present* habitual temper of Englishmen (for I do not think it was always so, nor need be always so), many students would be inert and idle, and these may be stimulated by the hope of honour, or the fear of disgrace, in an examination; and undoubtedly College examinations, or University examinations, since their institution (for both are of recent date), have been accompanied with great activity in College and University studies on the part of many, and with some exertion on the part even of the most idle, when the fear of disgrace has been applied to produce this effect. But the influence of our English University education would be utterly degraded, if examinations and their consequences were to supersede the influence of the College lecture-rooms; or if College lecture-rooms were to attempt to make their claim to respect and regard depend solely upon their being the successful rivals of private tutors in preparing students for University examinations.

9. Provision made in this College for poor students.

There are sixteen Sizarships; Sub-sizars (candidates for these Sizarships), are admitted without limit, and are placed "on the foundation," as Sizars, according to merit. The payments made by Sizars are smaller than by others, and their allowances such, that if they are economical they may live for little more. All the Exhibitions belonging to the College are divided among the resident Sizars. Poor Students.

11, 12, 13. In these questions mention is made of removing limitations, &c., affecting the tenure of Fellowships and Scholarships, as if it were intended to found, upon the answers to the questions, some measure of change effected by some external authority. With regard to any such intentions I must beg leave to make the same remark which I have made before, that they cannot be carried into effect without infringing the rights and privileges of this College and of the members thereof, and that I do not acknowledge that any such Commission as the present one can make itself instrumental in furthering such intentions without transgressing the laws by which this College has hitherto been governed, as well as destroying the independence and extinguishing the beneficial influence of the College. If there be any limitations such as those here spoken of, which may be removed with advantage to the College and to its course of education, the College can, without external assistance unknown to its laws, obtain the removal of these limitations, as it has frequently done, both in ancient and in recent times. Any such change originating in any quarter except the College itself, must be looked upon not as a regular but as a revolutionary proceeding. Restrictions on Fellowships, &c.

With reference to these questions in particular, I may remark, that the only restriction affecting the election of Scholars and Fellows belonging to this College is, that every year, at least, three of the Scholars are elected from Westminster School, if so many candidates are found fit. Whether it would be expedient or desirable that this rule should be modified I need not here state, since, as I have said, it would be most inexpedient and undesirable that any attempt at such a modification should be made by external authority, and any necessary modification may be made by a regular course of proceeding.

With reference to Question 12, I may reply, that I am not aware of any such cases in this College.

Rev. W. Whewell, D.D., Master of Trinity College.

With reference to Question 13, I may reply, that in all the cases in which it appeared to be advantageous to consolidate Exhibitions and the like, the College has already done so

I may possibly have a few words more to offer on the subject of the queries here referred to; in the mean time

I have the honour to be, my Lord,

Your very faithful and obedient servant,

The Lord Bishop of Chester. (Signed) W. WHEWELL.

My Lord, *Trinity College, Cambridge, February* 10, 1851.

Although, as I have already taken the liberty of saying in my communications to your Lordship on the subject of the regulations by which this University and the Colleges thereof are governed, I do not see how such regulations can be modified by any external authority, and accordingly protest against any such exercise of external authority; yet with regard to regulations respecting the expenses of students here, I conceive that the effect of such regulations may be strengthened by an expression of opinion on the part of persons who, as is the case with your Lordship, are well acquainted with the habits and laws of the University, and are designated as persons in whom Her Majesty has confidence with reference to inquiries into such matters.

Expenses.

I have accordingly not hesitated to forward to your Lordship a statement with which I have been furnished by one of the Tutors of this College relating to the expenses of undergraduates, both the expenses incurred annually, the expenses which occur once during each student's residence, and also an average of that which, in consequence of the difference of the habits and the wealth of different students, scarcely admits of being presented as an average, and the expenses of the pupils so far as they come under the eye of the Tutor.

Difficulty of restraining extravagance.

I may mention at the same time what I have before referred to, the extreme difficulty which exists in bringing the amount of the expenditure of the pupil under the eye of the Tutor, inasmuch as the Cambridge tradesmen naturally hold back their reports to the Tutors, except the University rule be enforced so as to compel them to send them in; and (at least as they state), if they refuse to give credit to the students, London tradesmen are on the watch to take advantage of the customers thus left open to them.

Practice of the Courts of Law in London.

I may mention also that this matter has not been without difficulties arising from the practice of the Courts of Law in London. It will, I presume, be allowed that, when tradesmen have supplied one of our pupils with expensive luxuries while he is under age, his parents and friends are not only excusable if they plead his minority, but are to be commended for using a salutary law for its proper ends. I have been informed that in a case in which this was done, a poor curate with a small income having thus resisted a demand made upon his son for wine and spirits supplied him while at College, the Judge in his decision declared that wine for the entertainment of a student's friends was to be considered as a necessary in his College life

* The Sizars receive annual allowances in money to the amount of about 20*l*.

† The caution money is repaid to the student when his name is removed from the College Boards.

N.B.—The expenses of living are calculated for a residence of 25 weeks. Those who can take honorary degrees are exempted from one year's residence.

(without regard, it would seem, to the means of the person who was to pay), and in consequence adjudged that the parent should pay.*

Rev. W. Whewell, D.D., Master of Trinity College.

I may add another remark: some unnecessary expense is incurred by several of the students who from various motives do really dine, habitually and constantly, elsewhere than in the College Hall, when they are *in Commons*, and therefore pay for two dinners. The dinner in the College Hall is attempted to be made, and is, I believe really made, very satisfactory and comfortable for all persons who are not very exacting; and therefore it appears to be very reasonable, in the way of checking expense, to require that the students should not habitually dine at some other place while paying for their dinner in the Hall; and that this requirement should not be set aside merely because the student and his parents or guardians are careless of the additional expense.

Attendance at dinner.

I have, &c.,

To the Lord Bishop of Chester. (Signed) W. WHEWELL.

Answers of the Master, Fellows, and Scholars of Trinity College.

The Master, Fellows, and Scholars of Trinity College.

(Along with a Statement and Schedule drawn up by the Bursar).

My Lord, *Trinity College, Cambridge, Dec.* 15, 1851

The Master and Fellows of this College have taken into their consideration the inquiries concerning the revenues of the College, which have been addressed to them, on the part of the Cambridge University Commission, of which your Lordship is the head, in a letter dated November 5, 1851. Your Lordship will not be surprised to be told that they have had great difficulty in satisfying themselves how far it is consistent with their duty as trustees of the property of the College, to furnish details concerning the particulars and management of that property to a body which, as they are advised, has not, and as they understand, does not claim to have a legal right to compel such information.

But they have been extremely desirous of treating the application of the Commission in the most respectful manner; and they have been led to think that it will not be improper for them to furnish to the Commissioners such general information on the subjects inquired into, as will, they trust, satisfy them. They have the less hesitation in taking this course, inasmuch as they have no wish, and no reason to wish, to conceal from any authorized and candid inquirer the sources, amount, management, and distribution of their revenues; with which, indeed, they are aware that several of the Commissioners, are, of their own knowledge, well acquainted. And they are especially encouraged in making this communication by a confident persuasion that Her Majesty, who has already repeatedly and in various ways, shown her gracious favour to the College, will not permit the information thus furnished to the Commission to be made in any way subservient to any proceedings which shall inflict damage upon those interests of the College, which, by the appointment of her predecessors, expressly sanctioned by herself, the Master and Fellows are bound, by the most solemn obligations, to assert and defend to the utmost of their power.

At the same time that the Master and Fellows are desirous to show respect and confidence towards the Commission, they cannot conceal from themselves that both the appointment of such a Commission, and the list of inquiries now sent to them, may naturally, without any undue sensitiveness in their minds, excite dissatisfaction on the part of the College. For we cannot avoid making the reflection that hitherto College property has never been made the subject of inquiry by any extraneous authority, except when malversation, or abuse of some kind was alleged against the existing holders of it. And though we are not aware that the slightest insinuation of this kind has been uttered against us in any responsible quarter, the mere fact of such inquiries appears to imply a disposition to ascribe faults to the existing state of things,—which, if it could assume any distinct shape in which our duty allowed us to deal with it, we are confident we could prove to be entirely unfounded.

Notwithstanding these grounds of dissatisfaction, which we cannot but feel, we have a confident belief that the report of the Commission will be such as not to supply any occasion or pretext for interference with the affairs of the College from any external quarter. We do not doubt of receiving this justice at the hands of the Commissioners, for we believe that they are aware, several of them, of their own knowledge, how little foundation there is for any of the blame which some of their inquiries seem to imply; and in order that they may have at hand the means of thus doing us justice, we will make a few remarks, in addition to the answers which we have given to their questions.

We remark that the property of the College has been and is administered in strict accordance with the Statutes by which the College has been governed ever since its foundation; in which administration we and our predecessors have never been disturbed by external interference;—not even in the violent times in which the church and the monarchy were overthrown. Further;—these Statutes have very recently been entirely revised, and have in their revised form received the sanction and signature of Her present Most Gracious Majesty, acting by the advice of her Ministers. In this revision care was taken to remedy

Management of the College Property.

* More recently still, a verdict of a Cambridge jury, given in the County Court, decided that a bill against an undergraduate for *four* gold rings, *four* gold pencilcases, a watch and chain (his father having already given him one), was almost entirely for necessaries, in spite of the remonstrances of his father, who pleaded his son's minority. It is obvious that such an administration of the law leaves an unfortunate parent destitute of all protection against an extravagant boy and unscrupulous tradesman.

The Master, Fellows, and Scholars of Trinity College.

such defects as had arisen in the directions given by the Statutes for the administration of the College properties. We have consequently hitherto conceived that we had the express sanction of Her Majesty and her Ministers in our present mode of carrying on the business of the College; and that we might depend on their protection so long as we continued to have a legal claim to it by adhering to the laws thus laid down for us.

We may add that we have not only carefully administered the College property according to our Statutes, applying it to purposes for which it was given to the College, and guarding it from loss and waste, but that we have also laboured to improve its value, by increasing the reserved rents, adding to the buildings, and other like measures. In the cases in which the income of the existing Master and Fellows has thus been diminished by the loss of renewal fines, they have not received any compensation from any fund whatever. In

Building Fund.

cases in which new buildings and extensive repairs have been undertaken by the College, the expenses thus incurred for the future benefit of the College, have been defrayed out of the income of the present Master and Fellows, except in such cases as building a new quadrangle to the College, and new College lecture rooms.

Improvement of the value of small Livings.

We have also, on the occasion of the increase of the rents of the College rooms, arising from the new quadrangle, established a fund for the improvement of the value of our small livings, and for building and improving residences upon them, which is working in a most beneficial manner in many of the places under our patronage. We have, in addition to this, contributed freely to the establishment of new prizes in the College, to the increase of the incomes of vicars and curates, to the erection and support of schools, the repair and building of churches, and other modes of promoting religion and education, especially in the localities in which the College has property; and when there has been especial occasion, we have in more than one instance, provided the means of endowing new livings.

We are persuaded that the Commissioners will agree with us that these objects are of the highest value, and that they would not and could not be attended to in the like liberal manner if, by some measure out of the ordinary course of English law and justice, the independent administration of the College property by the Master and Fellows were to be interfered with by extraneous authority.

Trusting that we may depend upon such convictions as these, on the part of the Commissioners, we beg leave, respectfully, but most earnestly, to express our hope that the Report of the Commission will be such as to convey the like convictions to others.

Having made these remarks, we have only to add, that the accompanying papers, drawn up by the Bursar of the College, along with the Schedule thereto annexed, will supply answers to most of the inquiries sent by the Commissioners, so far as they are applicable to this College.

And we beg leave to subscribe ourselves,

My Lord, your very faithful and obedient humble servants,

(Signed on the part of the Master and Fellows) W. WHEWELL, M. C.

To the Lord Bishop of Chester.

SCHEDULE.

TRINITY COLLEGE, CAMBRIDGE.

RECEIPTS (on an average of ten years ending at Michaelmas 1851).	£.	s.	d.	£.	s.	d.
Income from Lands, Tithe Rent Charges, Houses, Rooms in College; whether in Rack Rents or in Reserved Rents under Beneficial Leases, viz.,—

Trinity College, 17*th Dec.* 1851.

(Signed) FRAS. MARTIN, *Bursar.*

The Master, Fellows, and Scholars of Trinity College.

Amount and application of the Income of the College.

The Master, Fellows, and Scholars of Trinity College.

1. To insure a fair average value, the income and expenditure of the College is given for ten years rather than seven, as appears in the Schedule sent with these remarks and answers.

House Property.

2. The gross yearly income of the College derived from houses, on an average of the last fourteen years, is 916*l.* 12*s.* 1*d.*, of which 177*l.* 4*s.* 3*d.* is from houses under beneficial leases, the rest from houses on rack-rent. The whole of the property in houses has been let at rack-rent for above twenty years, except three houses in London, and one of small value in Cambridge, the lease of which will expire in 1852, and one in York, the lease of which expired in 1840.

Funded Property.

5. The College has but little funded property, except what constitutes the "Pigott Fund," and the "Compounder's Fund," which are both kept quite distinct from the general corporate funds of the College. The College has Exchequer Bills occasionally, as a temporary investment.

Rent of Rooms.

6. The yearly rent of the rooms in College, estimated at a full value, is 5,457*l.* The resident Fellows, Chaplains, and Librarian are, however entitled to rooms free of rent; and the non-resident Fellows to the old rents of certain sets of rooms each, according to his standing, as money payments, amounting in the whole to 250*l.* on an average.

The Master also is entitled to the rent of certain rooms (64*l.*)

The resident Scholars and Sizars also are entitled to rooms free of rent; and one fourth part of the rent of rooms in King's Court (640*l.* 10*s.*) is carried to a fund for improving the small Livings in the patronage of the Society; and the rent (229*l.*) of certain other rooms, built by private benefactors, is appropriated to the use of the library. The resident Scholars (average number 42) have an allowance of 24*l.* each, and the 16 Sizars of 18*l.* each, in lieu of having a set of rooms free of rent, and the "room rents" are charged with the amount of those allowances. Also the building debt is in course of liquidation at the rate of 450*l.* per annum for principal, and interest at 4 per cent on the sum remaining due. After all these payments and allowances are made, the *net* sum brought to the College funds, as rent of rooms, is, on an average of the last ten years, 1390*l.* A reduction (from 10 to 20 per cent.) of the rents of the rooms occupied by the Students will take place very shortly.

Expenses of resident Undergraduates.

The resident Undergraduates of the College are subject to such charges only as are fairly calculated to meet the expenses created by themselves, and an accurate detailed statement of the expences and charges incurred is sent to each of them weekly.

Non-resident Bachelors of Arts.

The non-resident Bachelors of Arts pay to the College fees amounting to 4*s.* 5*d.*, and the Masters of Arts fees amounting to 6*s.* 10*d.* per quarter. No other sums are paid by its Members to the College, except fees on admission and on taking the M.A. and other higher degrees. The above quarterly payments from Masters of Arts (together with the dues to the University and town) are usually compounded for by the payment of a single sum of 25*l.* in lieu of all further payments: and such compositions are invested by the College in a fund called the "Compounders' Fund," out of which the charges, which would otherwise be paid by those Members of the College who have compounded, are defrayed. All Masters of Arts who retain their names on the College Boards have access, free of expense, to the table in the College Hall, when occasionally visiting the University.

Also all resident Members pay from 3*s.* to 1*s.* 6*d.* per quarter to the College Library, and have the privilege of access to it, and of taking out six volumes at a time.

Distribution of the excess of receipts above expenditure.

8. After all expenses of maintaining the College and carrying out its various objects, as stated in the Schedule, have been discharged, the excess of receipts above expenditure remains to be divided, at the discretion of the Master and Seniors, amongst the Master, Fellows, Chaplains, and Librarian, in the following way:—

	£.	s.	d.	
To the Master	75	0	0	
To the 8 Seniors (25*l.* each) . . .	200	0	0	
To the 9th and 10th Fellows (20*l.* each) .	40	0	0	
To the next 6 Fellows (17*l.* each) . .	102	0	0	
To (say) 35 Major Fellows (12*l.* 10*s.* each)	437	10	0	
To (say) 10 Minor Fellows, 4 Chaplains, and 1 Librarian (5*l.* each) .	70	0	0	variable.
	£924	10	0	

The two latter items vary slightly from year to year, because the number of Major and Minor Fellows vary. The sum of all the items (924*l.* 10*s.*) is called the modulus for the year, and the money divided, in the above proportions, is always some multiple of the modulus. The multiple has, in the last ten years, varied from 16 to 20, the average being $18\frac{8}{10}$; supposing it to be 18, the sum divided would be 16,641*l.*; the average sum really divided is (see the Schedule), 16,679*l.* 19*s.* It may be well to mention that the average multiple of the modulus for the last 35 years is 17^{33}; so that the average dividend for the last 10 years is little greater than that for the last 35 years. The amount of rents and fines has increased, but the expenses, created chiefly by demands for improvements on our estates, and large contributions to charitable objects, has prevented any great increase in the *divisible* revenues of the College.

The emoluments of a Fellow.

The emoluments of a Fellow consist of—

1. His dividend, determined as above.
2. Dining in Hall free of expense (wine excepted).

3. Liberatura et Stipendium, 4*l.* 6*s.* 8*d.*
4. 7*s.* a-week during residence (deducted by the Steward from his Bill).
5. Having a set of rooms free from rent; or if non-resident, receiving the *old* rent of a set of rooms.

The Master, Fellows, and Scholars of Trinity College.

Pecuniary advantages of a Scholar.

The pecuniary advantages of a Scholar are,

	£.	s.	d.
Dining in Hall, free of expense (say for 30 weeks) .	17	0	0
3*s.* per week during residence ditto. . .	4	10	0
Liberatura et Stipendium.	1	6	8
Residence money (which is more than the usual rent of a Scholar's rooms)	24	0	0
	£46	16	8

If a Scholar resides more than thirty weeks in the year, as is generally the case, he has, for each additional week, advantages equivalent to about 14*s.* 3*d.* more.

There are no Bye-Fellowships. All the Scholarships have equal rights and privileges, except that the pecuniary value of one founded by Mr. Newman (originally as an Exhibition), is confined to the net rent of the estates which formed its endowment. The number of the Scholarships is 72, three of which have been founded lately; the last of them in consequence of a legacy of 900*l.* from the Rev. John Brown, late Senior Fellow. The Statutes of the College give the Master and Seniors the power of creating new Scholarships, on the same footing and with the same privileges as the others, "ex aliorum Benefactorum fundatione."

Number of Scholarships.

The Exhibitions of the College are as follows:—

Five founded by Mr. Perry, and endowed with an estate for Scholars from St. Paul's School, present yearly value 13*l.* each; and one founded by the Rev. R. B. Podmore, value 26*l.* 8*s.* 10*d.*, being the interest of stock in the 3 per cent. Consols. Also various consolidated Exhibitions and Benefactions, amounting to 136*l.*, are divided amongst the sixteen Sizars.

Exhibitions.

The trust estates possessed by the College are all let at rack rent. They consist of Mr. Perry's estate at Tendring (rent 70*l.*); an estate at Longsdon, appropriated to the Jacksonian Professor and Botanic Gardener (rent 190*l.*); two small estates forming the endowment of Mr. Newman's Scholar (rent 61*l.*); and an estate at Middleton, in Yorkshire (rent 180*l.*), the proceeds of which are divided (as the founder directs) amongst certain local charities, the College Library, and the Westminster scholars. The portion divided amongst the Westminster Scholars is 69*l.* 12*s.*, and is in addition to the advantages stated above, which are common to all Scholars.

Trust estates.

The accounts of the Trust estates are audited and kept entirely distinct from that of the general estates of the College, and all parties beneficially interested in them have their several payments increased proportionally, when the value of the estates is increased.

The expense of the table in the College Hall for the Fellows is defrayed entirely (except wine) out of the general income of the College. The same is the case with the Scholars' table, except a small charge for vegetables, which, by a recent order of the Master and Seniors, will henceforth be defrayed by the College.

Expense of the Table in the College Hall.

There are sixteen Sizars, who are entitled to dine after the Fellows free of expense. The pecuniary advantages of a Sizar, are:—

Pecuniary advantages of a Sizarship.

	£	s.	d.
Dining in Hall, free of expense (say for 30 weeks) .	17	0	0
3*s.* per week during residence do. . .	4	10	0
And 4*d.* per week for the whole year	0	17	4
Residence money (which is 6*l.* more than the usual rent of his rooms)	18	0	0
Liberatura	0	6	8
Share of consolidated Exhibitions	8	10	0
	£49	4	0

If a Sizar reside more than thirty weeks in the year, as many do, he has, for each additional week, advantages equivalent to about 14*s.* 3*d.* more. A Sizar receives also from his Tutor an allowance, arising from the payments of Noblemen and Fellow-Commoners, which usually amounts to from 3*l.* to 10*l.* a year.

The Sub-Sizars are not on the Foundation, and receive no pecuniary advantages from the College: they succeed to the place of Sizars in order of merit, as vacancies occur.

The College has no special building fund, and all repairs are paid out of the general Funds.

Building Fund.

The most valued distinction which the College has in its power to award, and the most effective in affording a stimulus of exertion to the Students, is a Foundation Scholarship, of which the average number filled up every year, out of the most deserving candidates in their second and third year's residence, is between fifteen and sixteen, besides two or three elected from Westminster School. Second to this is the distinction of being placed in the first class at the College annual examinations. The pecuniary amount of the prize

Rewards for the encouragement of learning.

The Master, Fellows, and Scholars of Trinity College.

adjudged to such place is not large, but the honour and privilege of having the College arms indented on the back of a set of books (though only a portion of their cost is defrayed by the College) is such that probably no important end would be answered by increasing it. The annual prizes and rewards for the encouragement of learning are correctly stated in the Cambridge Calendar for 1851. Their amount is 293*l.*

Beneficial Leases.

9. The College has run out many of its beneficial leases during the last twenty years. The Master and Fellows did not receive any compensation for the loss of the renewal fine. In renewing leases, a large diminution has very frequently been made in the fine, in order to obtain an increase of reserved rent during the years added to the then existing term.

Purchase of Advowsons.

10. The College does not possess any fund for the purchase of advowsons. It has, however, a fund called "the Pigott Fund," created in the year 1811, in consequence of a gift of 12,000*l.* from the Rev. John Pigott, late Fellow of the College, the proceeds of which are applied to increase the value of poor Vicarages, in places where the College is Patron and Impropriator, and where it has large property. The choice of the particular Vicarages to be augmented was left to the discretion of the Master and Seniors, with the condition that they should have in view the making not fewer than four such Vicarages, of the gross annual value and income of 600*l.* at the least. This munificent gift was invested in the 3 per cent. reduced annuities, and the interest, when unapplied, has been continually invested, so that the accumulated amount of stock at this time is 41,300*l.* Also two other sums of 200*l.* and 500*l.* have been given to the fund, and are invested in the same stock.

Augmentation of small Livings.

The following Vicarages have been augmented from the dividends:—

The Vicarage of		Hitchin,	with	£ 300	per annum	since	1822
„	„	Ware	„	200	„	„	1833
„	„	Masham	„	200	„	„	1834
„	„	Kendal	„	150	„	„	1846

And, by careful management, the College trusts to be enabled in course of time to augment several other Vicarages from this fund.

The Vicarage and Domus Fund.

Another fund, also kept quite distinct from the general funds of the College, has been established by the College, called "the Vicarage and Domus Fund," and is maintained by the appropriation of one fourth part of the rents of the rooms in the King's Court (640*l.* 10*s.*) and by the dividends of 1000*l.* stock in the 3 per cent. Consols, given by Mr. Brodrick in 1843. Since the year 1826 more than 16,000*l.* has been applied from this fund towards building and improving Vicarage houses, and augmenting the small Livings of the College in various ways, chiefly through Queen Anne's Bounty and other Church Societies.

It may be not improper to add that there is no object which the College has had more at heart during late years, than that of improving the value of its small Livings, so as to render them acceptable to some one of the Fellows; by which means the succession to Fellowships is made more rapid, and the number of elections more adequate to the increased and increasing number of deserving Candidates. Two Vicarages have very lately been increased each by 100*l.*, and a third by 280*l.*, a-year, out of the general funds of the College, and a fourth by 100*l.*, out of the Vicarage and Domus Fund, in order to insure their being taken by a Fellow; and large sums have been frequently given towards the endowment of other Livings. Arrangements also have been made to divide two large Vicarages into separate Livings, with such income to each as will, at the next vacancy, secure their acceptance by Fellows; this sacrifice of income (not less than from 700*l.* to 800*l.* per annum), the College has been able to make by running out two leases, those of Gainford and Blyth rectories. It has also been agreed to augment a third Vicarage from its present value of about 200*l.* to 600*l.* a year at the next vacancy.

And by proceeding in this manner, as cases occur and the funds of the College admit, it is hoped that the Ecclesiastical Patronage of the College will be made more extensively subservient to the ends for which it was given, and meet the demand which is very generally made throughout the country on corporate bodies like that of Trinity College, who derive much of their revenues from Impropriate Tithes.

Addition to College Buildings.

11. A great addition was made to the Collegiate buildings in the years 1823-25, when a new court, containing 112 sets of rooms, was erected. The cost of the building was 50,444*l.*, of which 12,358*l.* was supplied by voluntary contributions (including 1,000*l.* from His Majesty King George IV., and 2,000*l.* from the corporate funds of the College), and 37,000*l.* was borrowed from the Exchequer Loan Office. This debt was paid off to the Exchequer Office in 1841 by means of borrowing 9,000*l.* from the "Compounders Fund," to be repaid to that fund, with interest, in 20 years. So that in ten years time the whole debt will be liquidated.

(Signed) FRANCIS MARTIN, *Bursar.*

Trinity College, 17*th December*, 1851.

Trinity College Library.

Rev. W. Whewell, D.D., Master of Trinity College.

My Lord, *Trinity Lodge, Cambridge, March* 27, 1851.

I have received, with the date "Cambridge University Commission, February 18, 1851," a list of queries respecting the Library of this College and its management. I must beg leave to remark, as I have done upon other subjects with regard to which similar lists of queries have been sent to me, that the Library of the College is supported, watched over, and managed according to rules made by the College authorities and administered by the College officers; and that I am not aware that any other persons have any right to interfere in this matter. I will, however, protesting against all such interference as contrary to law, reason, and the interests of those who have access to the Library, offer to your Lordship a few memoranda relative to some of the points referred to in the queries.

College Library. The Library is under the care of the Librarian under whom is a Library Keeper. Their duties are determined by the foundation of the offices, and by rules made by the College, and are, of course, the usual duties of Librarians, to preserve the Books, record new additions to the Library, books taken out, and books returned, and to see that persons entering the Library do no harm. The Library is open every day from 11 to 3.

Catalogue. 2. The Catalogue is the Bodleian printed Catalogues (the old and new one) with MS. corrections and additions. A few classes according to order of subjects have been established among the books, but I cannot say that the whole collection has been so classed. The room is well ventilated, and I suppose nearly fire-proof, and by adding and altering shelves, is as yet sufficient. The arrangement of the books is by Class (that is, compartment of the building), Shelf, and Number; which arrangement is adequate, and convenient for reference.

Admission. 5. The Library is accessible to all the members of the College, to take out of the room a certain number of books; to the Undergraduates, on bringing a note from their Tutor. Any persons not of the College wishing to consult the Library for special purposes usually apply to Fellows of the College, and find access without difficulty.

Number of Books and MSS. 4. The number of books in the Library of this College is, I believe, about 35,000. The number of manuscripts I suppose may be from one to two thousand. Some of the MSS. are of considerable value, especially some of the Anglo-Saxon ones. The Library is well supplied with modern and other books connected with the usual subjects of academical instruction and study, especially Classics, Mathematics, English History, and the history of the English Language.

Begging your Lordship to excuse the imperfection of the above replies, I have the honour to be,

Your very faithful and obedient servant,

The Lord Bishop of Chester. (Signed) W. WHEWELL

Answers from the Rev. G. Archdall, D.D., Master of Emmanuel College.

Rev. G. Archdall. D.D.

Foundation of the College. 1. Emmanuel College was founded A.D. 1584, by Sir Walter Mildmay, Chancellor of the Exchequer to Queen Elizabeth, "to be a nursery of Divines for the maintenance of the true Protestant Religion, against Popery and all other heresies whatsoever."

Election of the Master. The Master is elected by a majority of the twelve foundation Fellows. He must be born an Englishman, at least 30 years of age; six years in priest's orders; 14 years a member of the University. If the Society does not contain within itself a member so qualified, they may have recourse, first to Christ's College, and then to the University at large. The Master is elected for life, but removable for misconduct. He cannot be absent more than five months in each year, except in cases of sickness, or other "*violenta detentio.*" The stipends of the Master and Fellows are regulated by the statute "*de stipendiis,*" which gives the power of increasing, from time to time, according to the state of the College, under the following clause:—"Hæc stipendia augenda esse volumus, quandocunque ad hoc satis auctæ sint Collegii facultates." At the present time, the Master's stipend under the statute, is 600*l.*, and that of the Fellows is 150*l.* each. The proportion of four to one being regulated by the statute. But there are, besides, special bequests and appropriations, out of particular estates left for the purpose, which increase the Master's income, so that it has averaged during the last seven years nearly 1000*l.* per annum.

Number and Election of Fellows. 2. There are 12 Fellows on the foundation: they are elected by a majority of the Master and Fellows. But there are also two fellowships and two scholarships founded by Sir Wolstan Dixie, A.D. 1592. These are expressly appropriated to his own kin, or to scholars who have been educated at the Grammar School of Market Bosworth, and nominated by the representative of Sir W. Dixie; their yearly stipends are regulated by a decree of the Court of Chancery. There is also one Fellowship founded in 1721 by Mr. Gillingham; the holder of it is elected in the same manner as the Fellows on the old foundation; but his stipend arises from an estate given by Mr. Gillingham, and is of the value of about 100*l.* per annum. All the Fellowships, except the two Dixie Fellowships, are open to all England.

Admission of Students. 3. Students are admitted by the consent of the Master and Fellows, on a certificate from some Master of Arts, that they are respectably qualified for admission.

Divine Service. 4. Divine service according to the Liturgy of the Church of England, is performed in the College Chapel every day in Term time, at half-past seven in the morning, in summer, and at eight in winter, and in the evening at six. Students are required to attend the service twice on Sundays, and at least once on the other days: the Dean has power to enforce attendance.

Rev. G. Archdall, D.D., Master of Emmanuel College.

Collegiate instruction.

5. Collegiate instruction is given in Mathematics and Natural Philosophy, from the rudiments to the higher branches read in the University. Selected portions of classical authors form the subjects for classical lectures. The Greek Testament, and elements of Divinity are also introduced into the collegiate course; and in all the above subjects the students are instructed chiefly with reference to the public examinations. Four of the Fellows are employed in giving this instruction, and they deliver generally two lectures a-day each. A general examination is held at the division of the Easter Term, and is conducted by questions on paper and *vivâ voce*, in the subjects upon which the lectures have been given in the course of the academical year. Three of the Fellows are appointed for the purpose of conducting the examination. Prizes of books are given to those students, two or more in each year, who stand highest in the examination; also, two prizes of books are given for Latin or English essays. A piece of plate is given, of the value of 18*l.* to the student who ranks highest in the Mathematical Tripos. And to the student who ranks highest in the Classical Tripos, a prize of books to the value of 12*l.* is given, if he be in the first class, but of 6*l.*, if he be in the second class.

Attendance on Lectures.

College gates closed.

6. The Fellows who are lecturers, have authority to enforce the regular attendance of their pupils. And the tutors enforce regularity of attendance in Hall. The College gates are closed at nine in the evening in winter, and at ten in the summer, after which hours no undergraduate can go out, without a written permission from one of the tutors or the Dean. But they are admittted at all hours of the night, when their names are entered by the porter on a list kept for that purpose, and submitted to the Master and the tutor, every morning. The regulation applies to all students residing in lodgings.

Expenses.

7 and 8. For a Fellow-Commoner, the average unavoidable expense appears to be about 80*l.* per annum, and their average actual expenditure, about 130*l.*, or 160*l.* For a Pensioner, the average is not under 65*l.*, nor above 90*l.* For a Sizar, not under 35*l.*, nor above 48*l.* In these estimates, private tuition is not included.

Poor scholars.

9. The average amount for the last five years, of payments made in each year, for the support of poor scholars and students in Emanuel College, appears by the Bursar's books to be about 980*l.*

Check to extravagance.

10. We scarcely see how it is possible to reduce the necessary expenses of College residence, or to check, further than has already been done by the University, the facilities given by tradesmen, or the habits of extravagance imported into the University by the Undergraduates, at their first entrance.

Restrictions on Fellowships, &c.

11. It is not our opinion, that it would be expedient to remove or alter any of the appropriations, limitations, or restrictions now affecting the election to, or tenure of, any of the fellowships, scholarships, or exhibitions in this College.

Scholarships.

12. No scholarships or exhibitions have become ineffective.

13. In our opinion, no advantage would be gained by consolidating scholarships or exhibitions, or in any way interfering with the present system; the Master and Fellows having competent authority to confer one or more upon any deserving candidate, where one alone would be of little value to the holder.

(Signed) GEORGE ARCHDALL,
Master of Emmanuel College.

The Master, Fellows, and Scholars of Emmanuel College.

Answers of the Master, Fellows, and Scholars from Emmanuel College.

Gross yearly Income of the College arising from land.

1. The gross yearly income of the College arising from estates in land, on an average of the last seven years, amounts to 2,454*l.* 14*s.* 6*d.*

	£.	s.	d.	
This consists of . .	2,266	6	5	Rack rents.
	45	14	3	Reserved rents.
	28	7	8	Manorial fines.
	30	15	10	Quit rents.
	58	13	4	Rent charges.
	24	17	0	Wood.

There are now no fines for the renewal of beneficial leases, all such leases in regard to land having expired.

House Property.

2. The gross yearly income from houses on an average of the last fourteen years amounts to 1,502*l.* 17*s.* 4*d.*

	£.	s.	d.	
This consists of	893	11	5	Rack rents.
	341	9	9	Reserved rents.
	267	16	2	Renewal fines.

Tithe Rent Charges.

3. The gross yearly income arising from Tithe Rent charges, on an average of the last seven years amounts to 174*l.* 5*s.* 2*d.*

4. The net amount of income derived from

	£.	s.	d.
Land, is	2,171	9	1
Houses	1,350	2	0
Tithes	141	3	7

Deductions.

The deductions consist of rates, taxes, drainage, repairs, commission, insurance, &c.

Funded Property.

5. The yearly amount of income from funded property, on an average of the last seven years, is 617*l.* 11*s.* 8*d.*

The Master, Fellows, and Scholars of Emmanuel College.

Rent of Rooms, Fees, &c.

6. The yearly amount of income on the same average from—

	£.	s.	d.
College rooms is	967	16	0
Regular payments from various sources .	122	7	10
Fees	320	11	7
Absencies, vacancies, and surplus balances .	314	6	8

Total Gross and Net Income.

7. The total aggregate of gross income is . . . 6,516 16 3
,, ,, net ,, . . . 6,005 8 5

Application of the Net Income.

8. The net income is applied to the payment of the stipends of the Master, Fellows, Scholars, Sizars, and Officers of the College, the Fellows' commons in Hall, College servants, Tradesmen's bills, Rent charges, and other fixed payments to which the College is liable, according to the terms on which different gifts or bequests have been made to the College, repairs, &c.

	£.	s.	d.
The yearly sum received by the Master on an average of the last seven years is	955	6	1
,, ,, Senior Seniorum . . .	238	18	4
,, ,, A Senior Fellow . . .	227	5	4
,, ,, A Middle Fellow . . .	207	5	0
,, ,, A Junior Fellow . . .	189	0	4

A Fellow not in priests' orders receives 24*l.* 5*s.* 5*d.*, a year less on the same average.

The annual sum received by a Foundation Scholar as such is 52*l.* 13*s.* 2*d.*, on the same average, and the average number of such Scholars 14. (the number not being fixed by the Statutes).

The inequalities in the above payments arise from the specific purposes for which different sums have been given or bequeathed to the College.

Fellowship founded by Mr. Gillingham.

There is one Fellowship founded by Mr. Gillingham, the possessor of which receives a dividend of 89*l.* 7*s.* 6*d.*, according to an average of the last seven years, arising out of a distinct estate, but in most other respects he is on an equality with the Foundation Fellows. The annual income of this property on an average of the last seven years, amounts to 101*l.* 7*s.* 6*d.*, and consists of 90*l.* from land, and 11*l.* 7*s.* 6*d.* from the funds.

Bequest of Sir W. Dixie.

Sir Wolstan Dixie, Kt., Alderman of the city of London, bequeathed, A.D. 1592, 600*l.* to the College, to purchase lands of the clear annual value of 30*l.*, for the purpose of founding two Fellowships and two Scholarships, to be filled up by the Skinners' Company in London. An estate was accordingly purchased, and the Skinners' Company refusing the trust, a decree was made in Chancery in the reign of King James the First, which gave the nomination to the Founder's heirs, and an indenture made in the same reign confirmed this decree. After much litigation between the College and the Dixie representative, a new decree was issued A.D. 1700, by Sir Nathan Wright, Lord Keeper.

The Dixie Fellowships.

By this decree the Fellowships are to be increased to 30*l.* a-year each, and the Scholarships to 10*l.* a-year each, and when the funds will admit, two new Scholarships are to be made of 10*l.* a-year each, and then the future surplus is to be applied to the purchase of advowsons, to which first a Dixie Fellow, if qualified, is to be nominated, the none of the Foundation Fellows, and so alternately.

The alternate nomination to these livings is vested in the heir of the Founder, the College having no power to refuse the nomination, either in this case, or in the case of a Scholarship or a Fellowship.

Restrictions on these Fellowships and Scholarships.

Candidates for these Scholarships and Fellowships must be related to the Founder, or have been educated at Market Bosworth School.

The annual value of the estate on an average of the last seven years, is 417*l.* 2*s.* 6*d.*

There are at present two Fellows and four Scholars, whose stipends are in accordance with the sums fixed by the decree of 1700.

Scholarships and Exhibitions on separate Foundations.

The College possesses the following Scholarships and Exhibitions on separate Foundations.

Ten founded by Mr. Francis Ash, of 10*l.* a year each, with a preference—1st, to founder's kin; 2nd, to the grammar schools of Derby or Ashby-de-la-Zouch. The net annual value of the estate (left in trust for various additional purposes) out of which they are payable, is about 380*l.*

Two founded by the Rev. I. Brown, now 15*s.* a week each during residence, with a preference to King's School, Canterbury, or any school in Kent. The net annual value of the property (also left in trust for various additional purposes) out of which they are payable, is about 340*l.*

Four founded by the Rev. R. Johnson, Archdeacon of Leicester, of 24*l.* a year each, with a preference to Uppingham and Oakham Schools and to clergymen's sons. The annual income of this foundation, issuing out of an estate as an annuity, is 104*l.* 7*s.* 4*d.*

Five founded by Dr. Thorpe, originally 10*l.* a year each, for the encouragement and support of young students in divinity. The scholars on this foundation now receive 30*l.* a year each, payable out of an estate in land, the net income of which, on an average of the last seven years, is 191*l.* 5*s.* 6*d.*

In addition to the above there are several small Scholarships and Exhibitions, amounting altogether to about 130*l.* a year.

The average annual sum paid by the College in Scholarships and Exhibitions, is about 1000*l.* altogether.

Out of the proceeds of the estates or funds, with which the Scholarships and Exhibitions

The Master, Fellows, and Scholars of Emmanuel College.

on separate foundations are endowed, about 300*l.* a year are paid to the general funds of the College, in virtue of the terms of their respective foundations.

The estates are administered by the general authorities of the College, with the exception of that out of which the Johnson Exhibitions are payable. When the value of the estates has increased, the several payments to all parties interested have been increased proportionally.

Expense of the Table in the College Hall.

The expense of the table in Hall for the Foundation Fellows is partially defrayed out of the general funds of the College.

Sizars.

The Statutes make no provision towards the maintenance of Sizars beyond "Emolumenta ad judicium Magistri et majoris partis sociorum." There are now four Sizars, who receive what is equivalent to about 40*l.* a year each.

Building Fund.

The average annual expense of keeping up and repairing the Collegiate buildings is about 500*l.* There is no special building fund. There has been no expense recently incurred by the repair of the chancels of churches. About 40*l.* a year are given as prizes and rewards for the encouragement of learning.

Donations to charities and schools.

Various sums are given as donations to charities and schools, but although the College subscribes annually, in some cases, it is the general practice to give donations instead. Besides the above purposes to which the income of the College is applied, large sums are occasionally laid out in the repairing of farm buildings.

Beneficial Leases.

9. All beneficial leases in the case of land, as stated in 1, have been allowed to run out. The last expired about four years ago. Some beneficial leases of houses have also been allowed to run out, in cases where considerable prospective advantages were likely to accrue to the College. The Master and Fellows received no immediate compensation for the loss of the renewal fines.

Augmentation of small Livings.

10. The College possesses no fund for the augmentation of small livings. It possesses the surplus income of the Dixie property, alluded to in 8, which, on an average of the last seven years, amounts to about 300*l.* a year.

Since 1800 there have been purchased with such funds the advowsons of four livings.

Addition to Collegiate Buildings.

11. In the year 1825 the Collegiate buildings were extended by the addition of a new court capable of accommodating 20 Students;—the expense was defrayed out of the College funds.

(Signed) GEORGE ARCHDALL, *Master.*

Rev. G. Archdall, D.D.

Emmanuel College Library.

Emmanuel College Library.

1. We have a Librarian, but he has no assistant. He has the general care of the Library, but his office is not prescribed by the statutes.

Catalogue.

2. We have the printed Bodleian Catalogue; the books arranged in classes. The room is well warmed, aired, and ventilated.

Fund.

3. About 50*l.* a-year.

Number of Volumes and MSS.

4. About 17,000 volumes. Dr. Houldsworth, a former Master of the College, and Archbishop Sancroft, also Master, left their books to the College. We have a few valuable manuscripts.

Admission.

5. The Library is accessible to the students with the presence of the Librarian or one of the Fellows.

(Signed) GEORGE ARCHDALL, *Master.*

Rev. R. Phelps, D.D., Master of Sidney College.

Answers from the Rev. R. Phelps, D.D., Master of Sidney College.

My Lord Bishop and Gentlemen, *Sidney College, July* 10, 1851.

In reply to the paper of questions relating to the College over which I preside, and which paper is dated 20th December, 1850, I beg leave to submit to you the following statements, which I hope will be found sufficient for the objects proposed by the Commission.

I have the honour to remain,
My Lord Bishop and Gentlemen,
Your obedient, humble servant,

To the Cambridge University Commissioners. (Signed) ROBERT PHELPS.

Election of the Master.

1. The statutes of Sidney College direct, that, when a vacancy occurs in the Mastership, an election of a new Master shall take place on the seventh day after the vacancy has become known to the Fellows in residence. The election is made after a prescribed form, and determined by a majority of votes of the Fellows. They are required to elect a member of their existing society, if there be one, in their judgment qualified, by his character and attainments, for the office; otherwise they may elect from those who have been Fellows of the College. And in case no one of those is deemed fit, they may elect from the Fellows of Trinity College, or,

Election of Fellows.

finally, from the whole University of Cambridge. The Master is required to proceed to the degree of Doctor of Divinity. The Foundation Fellows of the College are elected by the votes of the Master and Fellows, after an examination in Hebrew, Greek, Latin, and General Physics. The candidates are required to be British subjects: they must be at least Bachelors of Arts. They are to be chosen from the scholars of the College if any be found qualified;

Restrictions.

otherwise from other studious members of the College, or from the members of any other College, provided they have studied six years in the University, and be properly qualified in character and attainments. All the Fellows are required to take priest's orders within three

N.B.—By the term "statutes" I mean the statutes as modified by the recognitions which will be found at the end of the copy which, in compliance with the request of the Commissioners, I sent some time ago.

Rev. R. Phelps, D.D., Master of Sidney College.

years of their election, and to proceed to the degree of Batchelor of Divinity at the earliest time the University allows.

The Mastership would be vacated should the Master accept a living with cure of souls more than 20 miles from Cambridge. A Foundation Fellowship would become vacant if the holder of it should obtain possession of a patrimony, free chapel, annuity, or simple benefice, exceeding in value 20*l.* a-year; or if he be admitted and instituted to a benefice of any value whatever with cure of souls. Also the Master or Fellows are liable to deprivation and expulsion for bad conduct. The Statutes assign no other cause of limit to the duration of tenure of the Mastership or a Foundation Fellowship.

Scholarships.

The form of election of the Foundation Scholars is directed to be similar to that of the Foundation Fellows. The qualities which the Statutes recognise as claims for preference in condidates for scholarships are poverty, good character, aptness, good natural abilities, and proficiency. They are required to be undergraduates, and not yet in holy orders; but proposing to themselves the ministry of the Church as their future profession. Natives of Kent and Rutland, and in all cases the *poorer candidates* (*cæteris paribus*), are to be preferred. The tenure of a Foundation Scholarship terminates at the usual time of taking the degree of Master of Arts.

Leave of absence.

The Statutes seem to have contemplated that all the members of the College would generally be in residence. They enjoin that the Master shall not be absent more than six months in each year, except on College business. They may be construed to admit of the four senior Fellows (two at a time) having each six months, and the other Fellows each three months of absence in the year, subject to the approval and consent of the Master and major part of the Fellows.

The scholars, by the Statutes, are not allowed to be absent more than 40 days in a year, without assigning sufficient reason, to be approved by the Master and Fellows.

The practice for many years, as regards residence, has been, that so many at least of the Fellows as are necessary for conducting the business of the College remain in residence; and the others either obtain employment as curates or teachers in schools, or remain in College pursuing their own private studies. The scholars are allowed to absent themselves during the vacations or not, as they think proper. Many of them generally reside in College the whole summer, pursuing their studies. The law of residence observed in the case of the Master is strictly according to the Statutes.

Duties of the Master.

The office of the Master is to exercise a general surveillance and government over all the members of the College; and to see to the administration of all its affairs according to its Statutes. In some cases his authority is sole, in others he cannot act without the consent of the major part of the Fellows. He is required to preach in the College chapel, and administer the Sacrament of the Lord's Supper at least once in each term. He also takes part in all examinations.

Duties of the Fellows.

The duties assigned by the Statutes to the Fellows relate, in some measure, to a system of academical and collegiate exercises now no longer in use. The general system of the University was that of disputations in the public schools; and the Statutes of Sidney College prescribe the practice of similar disputations in the College chapel, by way of preparation for public exercises. The Fellows, Scholars, and other students, all took part in these College disputations according to their turns. The Fellows were likewise employed in the offices of Dean, Seneschal, and Lecturer, to each of which there has always been an annual election up to the present time. The duties of these officers are laid down in the Statutes, and agree very nearly with the present practice.

Another kind of duty asssigned to the Fellows was that of Tutor, but more in the sense of watching over the habits and morals of the students than in regulating their studies or giving them instruction. The system of discipline and management described in the Statutes seems to imply that the students came to reside at the University at an earlier age than they now do. Authority is given to the Master to limit the number of pupils to the several Fellows as tutors.

Relation between the tutor and pupil.

The present practice in this College, as regards the relation of tutor and pupil, is in accordance with that which has been adopted throughout the University. The Master appoints one of the Fellows (in large Colleges, more than one), to be the tutor, and one or more others to be assistant tutors. The former, besides taking a prominent part in the daily lectures, gives especial attention to the expenses of the students. From him they receive all their College bills, and generally also those of such tradesmen as supply them with articles of necessary use. This may be supposed to give the tutor an opportunity of checking extravagance on the one hand and imposition on the other. The duty of the assistant tutor is to take part in the daily lectures given to the students. The tutor receives from each student (pensioner) 10*l.* a-year, and he pays to the assistant tutor a suitable stipend.

Master's stipend.

The Statutes assign to the Master a stipend of 20*l.* a-year, 2*s.* a-week for commons, and 1*l.* 6*s.* 8*d.* a-year as a stipend for a servant.

Fellow's stipend.

To each Fellow they assign a stipend of 1*l.* a-year; 2*s.* a-week during residence for commons, and 1*l.* a-year for robes (*vestitura*). To each scholar they assign 1*s.* a-week during residence for commons. Some small augmentations to the stipends of the Master and Fellows were made by private founders.

The Dean, who is one of the Fellows chosen annually on the 1st of October, has by the Statutes a stipend of 2*l.* 3*s.* 4*d.*

Lecturer.

The Lecturer, or Prælector, was to be appointed by the Master and Fellows, and could not decline the office without incurring the forfeiture of his Fellowship. It was his duty to assemble the students in the College Hall, and hear and examine them for the space of an hour each day in such subjects as the Master prescribed. He might be assisted, if necessary, by Sub-lecturers. It was also his duty to be present, and to moderate at the scholastic disputations

Rev. R. Phelps, D.D., Master of Sidney College.

and all exercises. The Sub-lecturers were to be chosen from the Fellows (if possible), or from M.A's. or B.A's., not Fellows.

Lecturer's stipend.

The Lecturer was to receive, by way of stipend, 2*l.* 13*s.* 4*d.* per annum, besides other emoluments (not defined), to be assigned to him by the Master and Fellows. The Sub-lecturers were to be paid by the Lecturer out of his stipend and emoluments such portion as to the Master and major part of the Fellows seemed proper.

Present stipends of College staff.

The official stipends of the Master and other College officers, have been altered from time to time. At present they are as follow:—

The Master as Master and Bursar, about 440*l.* a-year; the Dean, about 70*l.* a-year; the Lecturer, about 60*l.* a-year; Seneschal, about 40*l.* a-year. The allowance of the Scholars has been increased from 1*s.* a-week to 7*s.* a-week.

The surplus revenue, after paying the wages of College servants, defraying costs of repairs, &c., has, from the time of the foundation of the College, been divided between the Master and Fellows, two parts to the Master, and one to each Fellow. The average value of the dividend per annum for the last 20 years is 178*l.*

Bye-Fellowships and Scholarships.

2. There are two Fellowships and two Scholarships founded by Mr. Blundell. The scholars are nominated from Mr. Blundell's school at Tiverton, in Devonshire, by the feoffees of the said school, and, if found properly qualified by character and attainments, succeed, according to seniority, to the Blundell Fellowships. The Fellows and scholars are subject to the same statutes and regulations, and entitled to the same powers, privileges, and enjoyments, both of dividend and official emoluments, as the Fellows and Scholars of the Foundation, except that the term of tenure of each Fellowship expires at the end of ten years from the time of taking the degree of Master of Arts.

Edward Montague, Esq., founded two scholarships of 6*l.* a-year each, with preference to natives of the counties of Northampton and Sussex.

A Fellowship was founded by Mr. Leonard Smith, citizen of London, the nomination to which is vested in the warden and company of Fishmongers, and is tenable for six years. The holder of this Fellowship enjoys the same powers, privileges, and advantages, both of dividends and official emoluments, as the Fellows of the original foundation.

Sir John Hart bequeathed, out of a rent-charge, 10*l.* a-year to each of two Masters of Arts who should be Fellows of the College. And the College seems afterwards to have agreed with one of Sir J. Hart's descendants, that on his paying to the College the sum of 200*l.*, the said two Fellows should participate in dividends and all other advantages of the foundation. And accordingly the rent-charge being still paid, Sir J. Hart's Fellows are, in every respect, as the Foundation Fellows.

John Freeston, Esq., provided in his will that 25*l.* a-year should be purchased to found a Fellowship of 10*l.* a-year; two scholarships of 5*l.* a-year each, and 5*l.* a-year to the College. Scholars of Mr. Freeston's name and kin, also of Normanby, Wakefield, Pomfret, and Rotherham Schools, in the county of York, in their order, have the preference; then those born in the West Riding, or, lastly, in Yorkshire. The present value of Mr. Freeston's Fellowship is 52*l.* per annum, and that of each scholarship, 26*l.*

Mr. Paul Micklethwaite gave to the College a tenement in Cambridge to found two scholarships of 5*l.* a-year each, the overplus, if any, of rent or profit to go to the College for ever.

Mr. Robert Johnson founded four exhibitions for four students to be chosen by the Master and four senior Fellows, and to be tenable for four years only, with preference to any students who, being at the time of election members of the College, happen to have been educated, for the one whole year at least immediately preceding their admission to the College, at either of the Free Grammar Schools of Oakham or Uppingham; provided, however, that they be good scholars, of honest conversation, and stand in need of maintenance. The present value of these exhibitions is about 24*l.* a-year each.

Sir Francis Clark left an estate for founding four Fellowships and eight Scholarships, for natives of Bedfordshire, and for increasing the Scholarships of the Foundation. The Fellows were to have 13*l.* 6*s.* 8*d.* per annum each, and rooms rent free, and the privilege of voting in the elections of Fellows and Scholars on Sir F. Clark's Foundation. The four senior Scholars were to have each 6*l.* 13*s.* 4*d.* per annum, and the four juniors each 5*l.* per annum. Also each two of the Scholars were to have a chamber rent free and one of the four Fellows for their tutor, gratis. The estate was charged with 30*l.* a-year for increasing the Scholarships of the College, and with 10*l.* a-year for the poor of a neighbouring parish, which have always been paid. If the rent ever came to exceed the sum required for the foregoing payments, it was further provided that the surplus should go first to augment the four Fellowships until those should be equal in value to the Fellowships of the foundation. The value of the Fellowships at present is about 80*l.* a-year each, and as this is not equal to that of the Foundation Fellowships, the senior Scholarships remain 6*l.* 13*s.* 4*d.*, and the junior Scholarships 5*l.* per annum each.

Mr. Samuel Taylor bequeathed an estate to found a Mathematical Lectureship in the College. The present value of the Lectureship is, from this estate, 140*l.* a-year. The Lecturer also receives 30*l.* a-year from the Taylor Exhibition Fund. It was provided by the testator that in case any money should be raised out of the estate from any coal or other mine upon it, such money should be invested, and the produce applied, first in making good any deficiency in the rent of the estate caused by working such mines, and then to the assistance of one or more students in Mathematics in the College. Accordingly, mines of iron and coal having been discovered, and the College conceiving that they had not power to dispose of the proceeds in the manner which, in their judgment, would most promote the objects indicated in Mr. Taylor's will, application was made to Parliament, and powers obtained to grant a lease of the mineral property, and, out of the money so raised to purchase land for the founding of

Exhibitions, to build and fit up apartments and lecture-rooms for the Exhibitioners, to establish a Mathematical Library, and to pay 30*l.* a-year to the Taylor Lecturer as an increase of his stipend. Accordingly six Exhibitions of 50*l.* a-year each have been founded, rooms have been prepared for the Exhibitioners, and a lecture-room provided; also the Taylor Library is gradually increasing and becoming of great use in the College, the students being allowed the use of the books under regulations administered by a librarian. *Rev. R. Phelps, D.D., Master of Sidney College.*

Two Exhibitions of 12*l.* a-year each were founded by Mr. Barcroft for orphans or sons of clergymen of the Church of England.

Mr. Yeomans bequeathed a small estate for the benefit of three scholars of Bedfordshire, who should be scholars of the College, to each 8*l.* per annum.

The Rev. Thomas Lovett founded two Exhibitions, present value about 40*l.* a-year each, for sons of clergymen of the Church of England, such clergymen to have graduated at Oxford or Cambridge. The candidates for these Exhibitions are required to promise and engage to enter into Deacon's orders at the age of 23 years; also preference is to be given to candidates who have been educated at Grantham or Oakham schools.

The College is also joint owner with Trinity College, Oxford, of property bequeathed by F. Combe, Esq., in 1641, which, according to the directions of the will, is let to a descendant of Mr. Combe at a third under its value, and the rents of which are by the will, made applicable to educate, in piety and learning, certain descendants of certain relations of Mr. Combe, designated in the will. The annual amount of rent which this property now pays to this College is 152*l.* 17*s.* 2*d.*, liable to one-third of the usual claims upon property in land.

3. The Statutes direct that there be admitted to reside in College, as pensioners, such only as have led an honest life, and are of unblemished reputation, and who, before they are admitted, promise faithfully, in the presence of the Master, that they will be conformable to what is required both of the Fellows and Scholars in cultivating good habits, celebrating Divine Worship, and practising scholastic exercises, and that they will obey the statutes and regulations of the College; and no pensioner is to be allowed to reside in the College longer than he continues to pursue diligently the studies assigned to his order or class, and to meet the approbation of the Master: also no one is to be admitted a pensioner who holds a benefice with cure of souls, or who cannot have a sleeping apartment in College. The pensioners are to be lodged four in a room, but the Master may, for sufficient reason, in any particular case, allow a room to be occupied by two only. Admission of Students.

The amount of rent to be paid for rooms is left entirely to the discretion of the Master. Room-rents.

The principal departure made in present practice from the foregoing statute is, that married students are allowed to lodge out in the town, and that to each student in College is assigned a study and a bedroom.

4. Divine Service is performed in the College Chapel morning and evening daily, at the hours of 8h A.M. (9h. 30m. A M., on Sundays), and 5h. 30 P.M. The students are expected to attend at least once a day, and twice on Sundays. Divine Service.

A sermon is preached at least once in every term by the Master, and on each of the great Festivals of the Church by some one of the Fellows: and upon all these occasions the Sacrament of the Lord's Supper is administered to all who feel disposed to receive it, no compulsion being exercised in this respect towards the students. Omission of attendance is, however, very rare.

During the season of Lent a course of lectures is read at morning chapel by the Dean.

5. The course of Collegiate instruction given to the students is as follows:— Course of Collegiate instruction.

Students in their first year are required to attend—
- One lecture on Mathematics daily, the course for the year comprising—
  - Euclid's Elements of Geometry.
  - Arithmetic and Algebra.
  - Trigonometry.
- One lecture in Classics, on alternate days, comprising during the year—
  - One Greek subject.
  - One Latin subject.
  - One lecture a week on Composition.
- One lecture in Divinity on alternate days, the subjects during this first year being the Gospels in Greek and Evidences of Religion.

Students in their second year are required to attend—
- One lecture in Mathematics daily, the course for the year being—
  - Algebra.
  - The Geometry of the Conic Sections.
  - Mechanics.
  - Part of Newton's Principia.
  - Differential and Integral Calculus.
- Classics and Divinity similar to the first year.

Students in their third year have—
- One lecture in Mathematics daily, the course being—
  - Dynamics, with Newton's Principia.
  - Optics.
  - Hydrostatics.
  - Astronomy.
- Classics and Divinity as before; the parts of the Greek Testament being, for this year, the Acts of the Apostles and the Epistles.

Students in the one term of their fourth year, which occurs before the Examination for the

Rev. R. Phelps, D.D., Master of Sidney College.

B.A. degree, are not required to attend any lectures; but they have occasional Examinations in College.

Lectures in the Mathematics are given by the Taylor Mathematical Lecturer, the Tutor of the College, the Sadleirian Lecturer, and, if necessary, by the Assistant Tutor also.

The Classical Lectures are delivered by the Tutor or Assistant Tutor.

The Divinity Lectures are the province of the Prælector.

Examinations.

There are two general Examinations of all the Students in each year. One at the end of the Michaelmas Term, the other at the division of the Easter Term. These examinations are conducted by the various Lecturers by means of printed questions, the Students being assembled in the College Hall from 9 A.M. to 12H. 30M. P.M., and from 5H. 30M. P.M. to 8H. 30M. P.M. on each of the three or four days of the Examination. Also, during the same period, the Master and Fellows being assembled in an adjoining room, the Students are examined by them *vivâ voce* in all the three branches of their studies—Mathematics, Classics, and Divinity.

Prizes.

After the Examination, the Students of each year are arranged in classes, according to merit, and the list of the classes thus settled is suspended in the Hall. The Taylor Exhibitions and others which happen to be vacant are filled up immediately after the Annual Examination, which takes place at the division of the Easter Term, the emoluments of the same being estimated to commence from the preceding Lady-day, at which the vacancy generally occurs.

Prizes are also at the same time assigned to the Students of each year who have distinguished themselves in the Examination. The sums due from any Exhibitions, which, for want of candidates of sufficient merit, have been, *pro tempore*, kept open, are in this manner distributed in prizes to the best candidates for such Exhibitions. The College also gives prizes in money or books to those who have distinguished themselves in Classics, in Mathematics, and in Divinity, in the said Examination, and likewise to those who during the foregoing year have composed the best Latin and English themes, and to the best readers in chapel. A prize also of 10*l.* is given in January to the commencing Bachelor of Arts whose name appears highest on the Mathematical Tripos.

The relation which the foregoing system bears to the Public Examinations of the University consists simply in this: that it has in view the preparation of Students for those Examinations by which the University ascertains the fitness of candidates for the first degree in Arts, and according to which it bestows certain of its honours; and also, in some measure, for that Examination which the University has of late years given to Students in Divinity, and the passing of which by candidates for Holy Orders is now generally required by bishops.

But I ought further to state that our Collegiate System, as I have briefly described it, undergoes some modification in working, in order to meet the requirements of two classes of students, viz. those who are candidates for honours, and those who aim only at an ordinary degree in Arts.

With the departments of learning to which I have hitherto been alluding, the relation of our collegiate system to the Public Examinations of the University may be said to end. For this College being essentially a Theological Institution (and, I may add, a Protestant foundation) has no provision whatever for promoting the *special studies* of the other learned faculties. Such, therefore, of our Students as desire to proceed in Law or Medicine (for we are not prohibited from admitting Students who resort to the University with either of those objects) are dependent for instruction on the public teaching of the Professors.

Attendance on Lectures.

6. The Students are peremptorily required to attend the Lectures assigned to their year and class; and no difficulty is experienced in enforcing such attendance, an admonition from the Tutor being found sufficient to correct any tendency to negligence in this respect.

Dinner.

The Students are also expected to appear at dinner in Hall daily, and indeed they rarely absent themselves. They are not allowed to have dinner in their own rooms for more than two friends without the special consent of the Tutor. Also the cook is prohibited from allowing any Student to incur a bill exceeding 7*l.* 10*s.* in any one quarter for viands supplied to him at his rooms.

Gates closed.

The College gates are closed at nine o'clock, and no Student can go out of college after that hour without the permission of the Tutor or the Dean. The night-porter keeps a book in which he enters the names of such Students as are admitted into College after the gates are closed, and marks the hours of their respective admissions. This book is seen daily by the Master and the Dean. And in case any Student appears to have been out *unusually late,* or is *often* out at all after the hour for closing the gates, he is admonished, and, if necessary, punished by being confined within the walls of the College for a stated period.

Discipline as to Students' expenses.

With regard to "Regulations of discipline as to students' expenses," I have already mentioned the rules which limit their expenditure with the College cook. Those rules are found to be a very effective check upon extravagance of that kind. Another important regulation is, that every student receives from the College butler a weekly bill containing a statement of every item with which he has been charged during the week, and the amount of his expenditure from the beginning of the quarter up to the current week. This not only calls his attention continually to the rate of his expenditure, but is a security against mistakes or undue charges. Over all expenses incurred with the College or its establishment we have a perfect control; indeed, I consider myself responsible, as Master, for the fairness and reasonableness of all these expenses, and for the prevention, as regards them, of any blamable excess whatever; but, with regard to expenses incurred out of College, whether with the tradesmen of Cambridge or with those of London, through travelling agents, the case is altogether different, and I am of opinion that over them our control is very limited and imperfect. The Tutor and others, more especially

Parents.

parents and guardians of young men coming to the University, may effect something in

this matter by their counsel. The Tutor also may, and does, make it his business, to recommend such tradesmen as he thinks most favourably of. It is also his duty to call the attention of his pupils to any tendency to extravagance which comes before him through the tradesmen's bills, and to admonish them, or, if necessary, to communicate with their friends, on the subject. Further, the Vice-Chancellor and Heads of Colleges have, from time to time, passed some salutary decrees respecting Cambridge tradesmen and dealers, whereby the Tutors of Colleges are somewhat assisted in this duty of controlling the expenses of their pupils; still, if a young man at the University is determined on a course of extravagance, I am afraid he finds no insuperable difficulty in the pursuit. Cambridge is a large town, and it is hardly necessary for me to point out that there must be many ways in which a young man, with the disposition I have alluded to, may easily gratify his inclination for extravagance at the expense of 20 or 30 years of embarrassment, in spite of advice, and in spite of all the restraints that seem practicable. It is true that, in a small College, like this, where all the students are by the statutes resident within the walls, no career of glaring extravagance, in the ordinary sense, can be long unobserved. Excessive expenditure of many kinds, and of any length of continuance, is thus rendered impossible; but this remark does not apply to every kind of expensive habit. It is, however, some satisfaction to those who are best acquainted with University life to know, and I trust it may be some satisfaction to others to be informed, that, notwithstanding the parade which has been made of a few cases of late years, the bad cases of extravagance at the Universities are extremely rare; so rare, that, upon the whole, I confess I should be sorry to see any greater degree of restraint attempted than that which is already exercised; for I am of opinion that one of the most important lessons which a man has to learn is self-reliance, and that the development of this quality demands, at least, the gradual and judicious relaxation of certain kinds of restraints, as he passes through the successive stages of his educational career.

Rev. R. Phelps. D.D., Master of Sidney College.

7. The necessary expenses of a Pensioner at this College I estimate at about 70*l.* per annum, exclusive only of bills for articles of wearing apparel and grocery, which, for obvious reasons, cannot be included in a general estimate of *necessary* expenses.

Necessary expenses of a Pensioner;

To this must be added 17*l.* 17*s.* for the following fees, which are, of course, not annual expenses, but paid once in the period from admission to the B.A. degree.

	£.	s.	d.
College Fees—			
Admission	0	11	6
B.A. degree	3	15	0
University Fees, including the tax to the Government—			
Matriculation	5	10	0
B.A. degree	8	0	6
	£17	17	0

The necessary expenses of a Sizar at this College are about 50*l.* per annum, and of a Fellow-Commoner about 90*l.*, exclusive of fees and of bills as above.

of a Sizar and Fellow-Commoner.

It is easy to see, therefore, that a Pensioner or a Sizar, of moderate abilities, with industry and good conduct, may reduce his expenditure to a mere trifle; and, indeed, such is the fact in a great many instances every year.

I may further remark, that in the foregoing estimates I have by no means taken the examples of least expense. Many students at this College bring their necessary expenses considerably within the 70*l.*

8. It would be exceedingly difficult to make any satisfactory reply to Question 8. A *bonâ fide* average taken from the Tutor's books would be altogether delusive, for the following reason, that while the account for one student contains the whole of his tradesmen's bills, the account for another contains none of such bills, and that for a third a part, more or less. One student will have no bills at all, but pay for everything ready money; and I believe the Tutors of Colleges generally would much rejoice if this were the practice in all cases; another will pay his own bills monthly or quarterly, and so on: if, however, the average be taken on the College expenses, *i. e.*, what I have called necessary expenses, together with such additions as a student has the option of incurring by the add tion of small luxuries to his dinner in hall (the dinner without such augmentation consisting simply of meat, vegetables, bread, and beer), and by occasional orders on the cook and butler, limited, as I have before described, I believe that in this College at the present time (I say at the present time, because there is some difference between the present habits of students in this respect, and those of students twenty or thirty years ago, as the *cooks and butlers* of Colleges are most ready to testify) an average so taken would not exceed by 5*l.* a-year the sum which I have named as my estimate of necessary expenses.

Actual average expenses.

In the foregoing I have made no allusion to the expense of private tuition. I may have some remark to make on it in replying to another set of the Commissioners' questions. I will only here observe that, considering the small number of students for which this College is calculated, the sufficiency of the staff of teachers, and the order of students for the most part resorting to the College, it is my deliberate opinion, that there are almost no cases in which private tuition is absolutely necessary, and very few in which it can be at all considered so on any ground whatever.

Private tuition.

9. The whole provision of this College, in all its foundations, may fairly be considered

Poor students.

Rev. R. Phelps. D.D., Master of Sidney College.

as provision for the maintenance and assistance of poor scholars. No one can hold a Fellowship who is not a poor man. The degree of poverty of the candidates, as far as it can be known, is always taken account of in elections to scholarships and exhibitions. A poor student who holds a Taylor and Johnson's exhibition with a scholarship and prizes—not at all an uncommon case, receives more per annum than his total expenditure amounts to.

Poor Students.

There is nothing in the statutes which renders the admission of Sizars obligatory. For many years their admission was refused. Of late, however, it has been the practice to admit four Sizars; and if there be more applicants than vacancies the claims are settled by an examination. Those who are thus admitted Sizars, besides the advantage of lower fees to the University in matriculation and the B.A. degree, have considerable benefit in regard to College expenses, fees, and tuition.

College expenses.

10. According to my experience the expenses of College residence are in most cases small. It is in the power of the student, by a strict economy, to live as cheaply in College as he could anywhere. He has the advantage of low rent, he may economise to any degree in the furniture of his rooms, and he is supplied with plain wholesome provisions at the market price. In no place, that I know of, could he have the services of an ordinary household establishment at a lower rate than he has them in College. Moreover, there is room, within certain limits, for the exercise of economy and self-denial in College life as in any other condition. To narrow those limits would in my opinion be very injudicious.

Credit.

With regard to credit given to students by tradesmen, by wine merchants, by horse-dealers, and livery stable keepers, I would have it limited by every possible means. The University authorities and Tutors of Colleges do what they can to discourage and prohibit such credit; but I cannot help thinking that more may generally be effected by parents and guardians. The decrees of the Vice-Chancellor and Heads of Colleges now in force make any extensive system of credit impossible, except in cases of violation of those decrees by mutual agreement of students and dealers; and against this I know of no remedy, short of the absolute prohibition of the use of wine and horses which, I apprehend, no one would think either reasonable or desirable.

Restrictions on Benefactions.

11. On the subject of this question, I am not disposed to offer any opinion, further than the general one, that I think benefactions intrusted to Colleges and similar institutions are in every respect better if unrestricted than if limited to particular families or districts.

12, 13. And I beg leave to add that, in my opinion, no difficulty needing such correction *ab extra* as that suggested by the Commissioners in 12 and 13 occurs in respect of the benefactions of Sidney College.

The Master and Fellows of Sidney College.

Answers from the Master and Fellows of Sidney College.

In reply to the questions submitted to the Master and Fellows of Sidney College, respecting the revenues of the same, they beg leave to make to the Commissioners the following statement:—

Management of the College property.

The property of Sidney College, both that of the original Foundation, and that given by subsequent Founders and Benefactors, is all let at rack-rent, with the exception of a small amount of house property in the town of Cambridge; and of this latter the reserved rents have been made a large portion of the real annual value of the premises. Consequently no inequality of income can be said to be due to fines. The same may be remarked with respect to the produce of timber, there being little on the property, and none having been sold except in the case of farms, on which expensive improvements have been in progress, and with a view to meet in part the expences so incurred.

Gross annual amount of Income from all sources.

The College possesses no property in tithes.

	£.	s.	d.
	per annum.		
The present gross annual amount of all rents and other sources of College income is	3,498	7	8
Ditto of the property left by Sir F. Clark, and appropriated to Students from Beds	405	0	0
Ditto of the property left by Mr. Yeomans, and appropriated to Students from Beds	26	0	0
Ditto of the property left by Mr. Freestone, and appropriated to Students from Yorkshire	135	0	0
Ditto of the property left by Mr Combe, and applicable for the benefit of certain descendants of certain of his relations	157	9	0
Ditto of Archdeacon Johnson's Exhibition Estate	104	7	4
Ditto of the Lovett's Exhibition Estate	80	4	0
Ditto of the Mathematical Lectureship Estate	117	8	6
Ditto of the Mathematical Exhibition Estate	869	0	4

Application of the Income.

The annual expenditure consists of payments for—
Land tax and Property tax.
Insurance of Farm buildings.

The Master and Fellows of Sidney College.

Repairs and rebuilding of Farm buildings and painting of the same periodically.
Gradual rebuilding of labourers' cottages on the larger estates.
Drainage and other improvements in all the farms.
Agents, Surveyors, Lawyers &c.
Contributions in aid of Churches, Schools, and all such charities as are considered to have reasonable claims on property in land.
Repairs of all College buildings.
Insurance of the same.
Support of the College Library.
Stipends to College officers.
Salaries to College servant.
Statutable allowances to the Master Fellows and Scholars.
Scholarships, Exhibitions, and Prizes.
Taxes, rates and various expenses of the establishment.

Purchase of Advowsons.

The College has an advowson fund consiting of a legacy of 1000*l.* (*i.e.* 900*l.* clear of duty) left for that object, and of certain sums voted to it by the College from its general funds in hand, arising chiefly from the composition paid of late years, by Masters of Arts in lieu of the annual expense of keeping their names on the boards. The whole annual income of this fund is at present applied in augmentation of a small living which was given the College a few years ago.

The College Library.

There is no special fund for the College Library, nor any statutable provision for its maintenance or management. Most of the books have been bequeathed to the College. Fellows on their election, and all who proceed to the degree of B.D., or D.D., pay a fee for the support of the Library. The College also pays a stipend to a Librarian, and votes sums of money from time to time, out of its general funds for the purchase of books. The Library (as well as the Chapel), has been for the last seven or eight years warmed by hot water. It is now thoroughly dry, well ventilated, and in good condition.

(Signed)

ROBERT PHELPS, D.D.

(*On the part of the Master and Fellows*).

Answers from the Rev. Thomas Worsley, M.A., Master of Downing College.

Rev. Thos. Worsley. M.A., Master of Downing College.

My Lord, *Downing Lodge, June 6th,* 1851.

Statutes.

In compliance with the request contained in your Lordship's letter of the 14th ult. I have the honour to forward herewith a printed copy of the Charter and Statutes of Downing College, together with the short-hand writer's Report at length of the judgment* delivered by the Lord Chancellor as its visitor, and by his Assessors the Master of the Rolls and the Vice-Chancellor, on Mr. Power's Petition of Appeal. The Charter and Statutes will place before the Commissioners, first the fundamental laws of the College, second the actual body of its Statutes, and the degree in which their validity is limited, during the present unfinished state of the buildings, and before the remaining thirteen Fellows have been nominated by the Crown: third, the distinct and permanent provision contained in the charter for making such changes in the laws by which their Society is governed, as may from time to time become expedient.

To this portion of the Charter I deem it my duty to solicit the special attention of the Commissioners. Its terms are the following:

Charter respecting visitatorial power.

"And we do by these presents, for us, our heirs and successors, authorize and empower the Lord Archbishop of Canterbury, the Lord Archbishop of York, and the Masters of St. John's College and Clare Hall aforesaid, and of the said intended College to be called Downing College, for the time being, or the major part of them (at the request of the Master, Professors and five senior Fellows of the said College, for the time being, to be signified in writing under their respective hands), from time to time, to revoke, repeal, change, augment, alter or make new, all, every, or any of the said statutes, laws, rules, ordinances, and constitutions, as to them or the major part of them shall seem meet and expedient; but so, nevertheless, that the same be not repugnant or contrary to this our Charter, or to the said will of the said Sir George Downing, or to the laws and statutes of this our realm; and all and singular which statutes, laws, rules, ordinances, and constitutions, so to be framed and made as aforesaid, we do, for us, our heirs and successors, charge and command to be strictly and inviolably observed, kept, and performed, from time to time; so long as they shall respectively remain in full vigour and effect, under the penalties to be thereby or therein inflicted or contained." (Charter p. 17.)

It may indeed be doubted whether the two Archbishops and the three heads of houses,

---

* Aug. 7, 1851. Having now gone through the several lists of queries, I have found it necessary to send the judgment referred to in extenso;—the extracts made from it being sufficient to illustrate my answers.

Rev. Thos. Worsley, M.A., Master of Downing College.

Doubt as to its exercise under present circumstances.

in whom this important power is by the Charter vested, would be authorized to exercise it, before the completion of the buildings, and the consequent nomination of the remaining thirteen Fellows; inasmuch as they are formally empowered to do so, at the request of the Master, Professors, and *five* senior Fellows; whereas the whole society, as at present constituted, consists of the Master, Professors, and only *three* Fellows. But whether a unanimous requisition from the whole existing society would or would not suffice to put in motion the parties invested with these high powers (who are also Electors to the Mastership* and to the Professorships), it is at all events abundantly clear that, so soon as the buildings are complete, this provision for requisite changes will become no less available than it is ample. And, since the debt incurred by erecting the present buildings has now for some time been liquidated, and the Building Fund, under the direction of the Court of Chancery, is yearly accumulating, no very long time can elapse before the completion of the College will bring this provision of its Charter into undoubted efficiency. And as the College is endowed by its Founder and by its Charter with this very peculiar, large and permanent provision for effecting all requisite modifications of its laws, in addition to the ordinary powers of its visitor; so, during its present intermediate condition, before the completion of its buildings and the nomination of its remaining thirteen Fellows, it is subjected, not merely to the general authority of the Lord Chancellor, as its appointed visitor, but to the more immediate superintendence and control of the same high functionary, as he is head of the Court of Chancery.

This superintendence, based on the fact that the College property is still in Chancery, —the suit by which a decree was obtained authorizing its Foundation, never having been terminated—involved the direct management of the College estates, under a receiver appointed by the Court, up to a late period. And although the receiver was discharged, and the College admitted conditionally to the management of its property, so soon as there was a Resident Body and Bursar for the fulfilment of this office, the College and its property have remained, and will remain until the buildings and the number of Fellows are complete, under a direct superintendence and control of the Court, not only with reference to the Building Fund, but to other matters relating to the administration of the College and to the management and improvement of its estates.

These circumstances, with regard to the permanent as well as to the actual condition of Downing College, will be illustrated by the accompanying documents and statements, and will of themselves be allowed to constitute a very peculiar and exceptional status. This peculiarity is enhanced by the fact that the Charter of the College dates from no earlier a period than A.D. 1800, and that its Statutes, so far from being antiquated or obsolete, are five years later in date; and, so far from having had a fair trial, have not yet, in virtue of their own enactments, become valid as a body.

Having briefly noticed these peculiarities in the constitution and actual status of the College, I will now proceed to the list of Queries, sent to me by your Lordship on the 20th of December, and numbered from 1 to 13.

Statutes as to the election, &c., of the Head and Fellows.

I. The regulations of our actual Body of Statutes as to the several particulars mentioned in Query 1, respecting the Head, will be found in the printed copy of the Charter and Statutes sent herewith: 1, as to his *Election*, Stat. p. 44, with marg. ref. to Charter. 2, as to his *Tenure of Office*, p. 45. with marg. ref. to Charter. 3, as to his *Residence*, p. 46. 4, as to the *Powers given him*; and 5, as to the *Duties or Services* enjoined on him, p. 43. 6, as to his *Emoluments*, Charter, p. 25. Respecting the Professors, as to the same particulars, in pp. 47, 48, and 49, with marg. refs. to Charter, and in Charter, p. 25.

In the above particulars, the present practice is, to the best of my knowledge, conformable to the Charter and Statutes: though whether it is exactly so with regard to the number of Professors' lectures given during the last Academic year, I am not quite certain. Some modifications of the number were then introduced, in order to bring the Downing Professors into more effectual relation with the general professorial Staff in the University; but my impression is, that the number, as there agreed on, was larger than that required by the Statutes. The Professors themselves, who were most ready in forwarding to the utmost of their power the efforts now being made to increase the efficiency of the professorial body, will be able to give more exact information on this point.

It will be observed that the Statute, as to the residence of the Head and the Professors, is not yet in force. The present Professors, however, generally reside considerably more than the statutable period. With regard to the Mastership, I have, since my appointment in 1837, always resided more than the Academic year; and, during the last six years, (as holding the University office of Christian Advocate, which requires such Residence) I have also kept every Term in each year.

Respecting the *Fellows*, the regulations as to the same particulars, will be found in Statutes, pp. 50-57, with marg. refs. to Charter, and in Charter, p. 25.

Fellowships.

In consequence of the College having been opened for the admission of Students, under the sanction of the Court of Chancery, before the completion of the Buildings, and the consequent nomination by the Crown of the remaining 13 Fellows, it has become impossible to conform the present practice, as to the Election, Period of Commencement, and Determination, &c., of Fellowships, to the Statutes, as fully as in the case of the Head and Professors. These Elections being, in the actual state of the College, limited to the filling-up of vacancies in the three Fellowships to which the Crown originally nominated,

* The Master being here of course excepted.

cannot for example take place at the times of year directed by the Statutes; as such a delay would not seldom involve their lapsing to the visitor, under the general direction with regard to such lapses contained in the Charter, p. 22. *Rev. Thos. Worsley, M.A., Master of Downing College.*

It will be seen also (in p. 53), that by the authority of the Statutes themselves, "the regulations contained in these Statutes respecting the election of Fellows, and the Period of Commencement and Determination of their Fellowships, shall not be in force till after the erection of the necessary Buildings, and the nomination of the remaining 13 Fellows, according to the Charter; but that after that time the regulations contained in the Statutes, with respect to the Determination of Fellowships, shall apply to the Fellows then or before that time elected or nominated, as well as to the Fellows who shall be elected at all future times." Fellowships.

So far as it was thus absolved from conformity with the letter of these regulations, the Society has endeavoured to guide itself by their spirit, in filling up the vacancies which from time to time have occurred in the three existing Fellowships.

Since the opening of the College for the admission of Students, this has been done partly by free competition in Classics, Mathematics, Moral Philosophy, and the Evidences of Christianity, Metaphysics, and Logic, partly by selection, from among candidates similarly qualified, of persons whose academic distinctions and testimonials to character, pointed them out as fittest to supply those Tutorial, &c., offices in the College, which its opening had called into existence.

The degree in which it was advisable to follow out to the uttermost the provisions of the Statutes as to the election of Fellows, even though they had not yet come into operation; or to modify those requirements with reference to the well-being of the College in its actual or *intermediate* condition, is a question on which some differences of opinion have from time to time existed among its governing Members.

I think, however, I am justified in affirming that the predominant feeling, both in the College and in the University, has coincided with my own strong and unvaried conviction that two out of the three Fellowships already constituted should, in the present state of the College, be filled up with strict reference to its academic requirements, and to their fitness, by character and attainments, for the various College Offices of Tutors, Classical and Mathematical Lecturers, Chaplains, Deans, &c. And though this principle has not invariably been acted on, it has so, for the most part: And the College enjoys at present the valuable academic services of two out of its three Fellows, who both reside, and very ably discharge these various offices.

With regard to this matter of the Election of Fellows during the present or intermediate condition of the College, I would beg to refer your Lordship and the Commissioners to the judgment of the Lord Chancellor as its visitor (assisted by the Master of the Rolls and the Vice-Chancellor) on Mr. Power's Petition of Appeal, against my Election to the Mastership. His Lordship's words bearing on this question are as follows: "The 5th Statute relates to the Election of Fellows, and it prescribes the qualifications for Clerical and Lay Fellowships, and the duration of the Fellowships. It provides for the mode of declaring the vacancy whether of a Clerical, or Lay Fellow; it refers to the previous rules for the Election of Scholars, which were not to take place until after the buildings were completed, and it declares that the regulations respecting the Election of Fellows, and the period of commencement, and determination, of the Fellowships, shall not be in force, till after the erection of the buildings, and the nomination of the remaining 13 Fellows; but that after that time, the regulations respecting the determination of the Fellowships, shall apply to the Fellows then, or before that time elected, or nominated, as well as to those who shall be elected at any future time. This appears to be the only passage, which alludes to the election or nomination of Fellows, between the date of this Charter, and the completion of the buildings; and both the Charter, and Statutes are silent, as to the mode in which intermediate vacancies are to be filled. But the Statutes in terms, and the Charter by necessary implication, confine all the rules and regulations as to the qualification of Fellows, and the mode of electing them, to such vacancies as may occur after the completion of the College, and the appointment of the whole 16 Fellows by the Crown. The Master, Professors, and three Fellows were in the mean time to constitute a Corporation. The power of keeping their number up, and thereby preserving the existence of the Corporation must be implied; but where is the necessity of importing into the Elections for this purpose, all or any of the qualifications and rules which are in terms confined to Elections to take place after the completion of the College? The provisions of the Charter, and the Statutes, as to the state and power of the Corporation before the completion of the College are extremely defective; but I strongly incline to think that the true construction is, that in the absence of any provision for that purpose the Corporation possessed the implied power of renewing their members as they were originally constituted, and that without the restrictions and regulations prescribed in Elections to take place after the Corporation should have been completed."—Lord Chancellor's Judgment, pp. 33—35.

Respecting the Scholars.—The buildings not being complete, nor the remaining thirteen Fellows nominated by the Crown, no Scholars have as yet been elected, in accordance with Stat. p. 40. Scholarships.

2. The College has no Fellowships, Scholarships, or Exhibitions, such as are mentioned in this question.

3. These regulations are contained in Stat. p. 73. The College, in its present unfinished state, is the only one in Cambridge which possesses no Scholarships, Exhibitions, Prizes,

Rev. Thos. Worsley, M.A., Master of Downing College.

Scholarships, Exhibitions, and Prizes.

or other Endowments or Emoluments for Undergraduates; and its three actual Fellowships have hitherto been regarded as open to Candidates, properly qualified, from any College in Oxford as well as in Cambridge: Downing, therefore, stands alone as unendowed, for any purposes of attraction to Undergraduates, among the several Colleges which constitute the University, all of which are more or less richly endowed. Under these circumstances the number of Undergraduates has been very small, specially that of Pensioners; so that, before my appointment to the Mastership, it was thought advisable by the Society to raise the very small number of Pensioners then on the boards to the rank of Fellow Commoners: nor have I seen reason to alter this arrangement, though very considerable reductions have since that time been made in the Fellow-Commoners' expenses, at the suggestion, or with the concurrence, of the College Tutors. Under these circumstances the present practice is that the Master and Tutors should satisfy themselves of the fitness of applicants for admission by such Testimonials and Examination as in each case they may think sufficient.

Divine Service.

4. The Statute regarding Divine Service is not, in the present condition of the College, in force, nor is the College Chapel yet built. A sufficient room was, however, at the opening of the College for Students, set apart and fitted up for this purpose. The present practice is that the full Morning Service is performed on the week-days every morning at eight o'clock, with the exception of Wednesdays and Fridays, when only the Litany is read; on Sundays in the morning at eight, in the evening at six o'clock. Attendance is required on the part of the Undergraduates on Sunday morning and evening and four mornings in the week.

College tuition.

5. The questions from 5 to 10, involving more or less of Tutorial details, I have submitted them to both the College Tutors;—their answers, in which I agree, are as follows:—

5. The College, not having any Prize, Exhibition, Scholarship, or Fellowship, to offer as a reward for studies pursued with a view to Classical or Mathematical Honours, has generally confined itself to Lectures preparatory to the pass Examinations of the University, giving, with the Theological subjects, such further information as may be available for the new (voluntary) Theological Examination. Individual Students, however, have, from time to time, received instruction of a more advanced character, both in Mathematics and Classics. A scheme was drawn up by the Tutors a few years ago, and generally approved by the governing Members of the Society,—1st, For encouraging Students to apply themselves during the two or three first years of their residence in laying a solid foundation of moderate extent in Classics, Mathematics, and Moral Philosophy; and 2nd, For encouraging studies more immediately connected with Law and Medecine in the 3rd and 4th years from matriculation. To carry out this scheme, it was felt that some Prizes or Exhibitions were requisite, but the College was advised by Counsel that it was not competent for the Court of Chancery to grant money from the Fund in Court for such a purpose, and for that reason this design was abandoned.

5. (2.) There are only two resident Fellows, both so employed.

Examinations.

5. (3.) From the small number of Students, and the absence of all rewards for proficiency, frequent private Examinations in the Tutors' rooms have been found more available than College Examinations of a more formal character, at stated times.

6. The class is small, the benefit to individual Students, consequently, greater; the attendance generally very regular; personal remonstrance is found sufficient in case of neglect.

Dinner.

6. (2.) In regard to Hall, the table is very well served, at a moderate charge. With certain limitations Undergraduates can invite their friends to dinner. At *the present time* economical considerations suffice to secure regular attendance.

Gates closed.

6. (3.) The College gates are closed at 10 P.M., and a small fine is paid by those who come in between ten and twelve, at which hour Students are expected to be within the College walls. There are seldom any Students, except married men, resident in licensed lodgings.

Lodgings.

College expenses.

7. The Undergraduates are all Fellow-Commoners; their necessary expenses for tuition, room-rents, meals, wine, dessert, coals, attendants, &c., are about 110*l.* a year. The amount of an Undergraduate's bills in a year is generally (altogether) from 130*l.* to 140*l.* There are a few exceptional cases of Students who are in the habit of giving private dinner-parties; in these cases a year's bills will amount to 180*l.* or 200*l.*

Within the last ten or fifteen years a decrease of from one-third to one-half has taken place in the general expenditure of Students of this College.

In the above estimate the expense of private tuition is not included, being seldom required by our Students.

Fees.

University and College Fees fall somewhat heavily on Fellow-Commoners at the time of their admission, when 11*l.* is paid by them to the University, on Matriculation, and 10*l.* to the College, for the purchase of plate, of which the Fellow-Commoners have the use.

Library.

The College has lately determined to apply part of this fund to the formation of a Library.

9. No such endowments.

10. With respect to Downing College, we have little to say under this head.

11, 12, and 13. Do not apply to Downing College.

Correspondence between the Master of Downing College and the Secretary to the Commission respecting the Questions addressed by the Commissioners to the Master, Professor, Fellows and Scholars of the College.

The Master, Professors, and Scholars of Downing College.

Downing College, Dec. 5th, 1851.

Rev. Sir,

In reply to your communication of the 5th of November, ult. addressed to the Master, Professors, and Fellows of Downing College, I beg to state that having furnished each of the resident Professors and Fellows with a copy of that communication, and having subsequently called a College meeting to consider it, I have been requested by the Society to draw the attention of the Commissioners to the peculiar condition of the College with reference to the questions contained in that communication.

In answer to former questions from the Commissioners I have explained generally the control which the Lord Chancellor as Visitor on behalf of the Crown (Charter p. 31, Stat. p. 44, &c.) exercises over the College. What I chiefly refer to at present is the further control which as head of the Court of Chancery he exercises over the College property and its administration.

Control which the Lord Chancellor exercises over the College property and its administration.

His right to exercise this control is based partly on the fact that the suit in Chancery by which a decree was obtained against the heirs at law of Sir George Downing authorizing the foundation of the College has never yet been terminated; and partly on the following provision contained in p. 25 of the Charter: "And we do hereby further will, declare, and direct, that out of the revenues of the said College there shall be, in the first place, set apart so much as shall be necessary to be applied in erecting proper buildings for the said College, together with any other funds applicable for that purpose, *under the direction of our said Court of Chancery;* and when such buildings shall be completed *to the satisfaction of our said Court,* or *a proper fund shall be set apart under the order of our said Court, for that purpose,* the Master, Professors, and Fellows of the said College shall receive, by and out of the remainder of such revenues, if sufficient for that purpose, after defraying all other necessary expenses and disbursements, the stipends following: that is to say, the yearly stipend to the Master of the said College shall be 600*l.*; and the yearly stipend to each of the Professors of the said College, 200*l.*; and the yearly stipend to each of the Fellows of the said College, 100*l.*; but if there be any deficiency in the revenues of the said College, in that case the said several stipends shall abate in proportion; and if there shall at any time be any surplus of such revenues, after payment of the above stipends and other disbursements, the same shall accumulate for the benefit of the said College; or shall be from time to time paid, applied, and disposed of in such manner as the Master, Professors, and Fellows of the said College for the time being or the major part of them, shall order, direct, or appoint. And it is our will and pleasure that no payment shall be made in respect of any such stipends as aforesaid, until the expense of the buildings proper for the said College shall be fully provided for, by setting apart sufficient funds for that purpose, *in such manner as our said Court of Chancery shall direct.*"

These to the best of my belief are the principal grounds on which the Court of Chancery has, from the date of the decree authorizing the foundation of the College up to the present time, exercised a direct and paramount superintendence and control over the College property. And although, as I have already stated in answer to former questions of the Commissioners, the Receiver under the Court of Chancery was discharged soon after the nomination by the Crown of a Master, two Professors and three Fellows; and the Society, so constituted in part, was admitted to a limited control over the College property; this control was and is still strictly subordinated to that of the Lord Chancellor, not only as Visitor of the College, but also and more especially as Head of the Court of Chancery, and as possessing in that capacity the power, under the Charter, of decreeing from time to time, what amount of the College revenues shall be set apart for the building fund.

Under these circumstances it has been thought advisable by the Master, Professors, and Fellows of Downing College, in the first place, to lay distinctly before the Commissioners, and to request their special attention to, the grounds and the nature of that large and peculiar authority which is thus vested in the Lord Chancellor, and which has been actually exercised by him, from the founding of the College up to the present time; inasmuch as it appears to the Society to be doubtful whether the Commissioners, when clearly aware of these peculiarities in the actual status of Downing College, will still feel it their duty to address to the Master, Professors, and Fellows of that College the questions contained in their communication of November 5th, 1851.

With all deference to the decision of the Commissioners on this point, I beg to subscribe myself, on behalf of the Society of Downing College, and with every feeling of respect on their part and on my own for the Commissioners,

Reverend Sir,

Your obedient servant,

To the Reverend the Secretary of the Cambridge University Commission.

(Signed) T. WORSLEY, M. C.

P. S. I beg further to state that the following entry was this day made in the College Minute Book.

Extract from the College Minute Book.

"At a College meeting held December 5th, 1851 (present the Master, Professor Fisher, Professor Amos, Mr. Frere, and Mr. Sykes, Fellows) for the purpose of taking into consideration the questions bearing date November 5th, 1851, addressed by the Cambridge

The Master, Professors, Fellows, and Scholars of Downing College.

University Commissioners to the Master, Professors, and Fellows of Downing College, it was* resolved that the following reply, submitted by the Master for the consideration of the Society, be sent to the Commissioners." (Copy of the above reply.)

Letter from the Secretary of the Commission to the Master, Professors, &c., of Downing College.

Cambridge University Commission,
Downing street, 18th Dec. 1851.

GENTLEMEN,

THE Commissioners beg to acknowledge the receipt of your letter of the 5th instant. They would be most unwilling to propose any questions to your Society which might appear in any manner to interfere with the superintending authority of the Court of Chancery over the funds of your College, but they respectfully submit to the consideration of yourself and the members of your Society the following questions; in the hope that they may be regarded by you as admitting of answers without any such interference and without any inconvenience or prejudice to the College.

I have the honour to be, Gentlemen,
Your most obedient servant,

(Signed) W. H. BATESON, *Secretary.*

To the Master, Professors, Fellows, and Scholars of Downing College.

A. What is the gross yearly income of the College, on an average of the last seven years; distinguishing in your return the different sources from which it is derived.

B. The corresponding net income.

C. The deductions constituting the difference between the gross and net income.

D. The annual expenditure of the College in the same number of years; distinguishing it under its several heads.

E. The purpose to which the surplus income is applied.

F. If accumulated as a building fund, what is the present amount of accumulation?

G. Do the Master, Professors, and Fellows, enjoy any emoluments beyond the respective stipends assigned to them in the Charter; and if so, of what nature and value?

Downing Lodge, Cambridge,
March 10, 1852.

REVEREND AND DEAR SIR,

IN reply to your communication of the 18th of December, 1851, I beg to state that on the 2nd January, being our annual Audit day, I submitted that communication to a meeting of all the six Members of the existing corporate Society of this College, and that the following Entries were then made with reference to it in the College Minute Book:—

" *Resolved*—

Resolutions with regard to the Questions proposed.

" That answers be returned to the above questions, in accordance with the request of the Commissioners, conveyed in the above letter—that the Bursar be requested to draw up, and lay before the Society a rough draft of such answers.

" That it is not expedient at this late stage of our communication at least, to repeat the protest already made by the Master, in his letter to the Commissioners dated May 28th, 1851, in which he formally and expressly reserves to himself the right of declining to answer any or all of the questions proposed, in so far as such a reservation might be necessary to maintain unimpaired whatever powers and privileges he is invested with as Master of the College, whether by its own Charter and Statutes, or by those of the University, or by the law of the land."

" The Master and Mr. Sykes were of opinion that it was expedient to repeat this protest."

And I beg further to state that at a College meeting held March 8, 1852. The following Entries were made in the College Minute Book.

" A rough draft of the replies to the modified queries sent by the University Commissioners to the Master, Professors, and Fellows of the College, on the 18th of December last, and numbered A, B, C, &c., in the Minutes of the last College Meeting, having been read by the Master to the Members present, and having been corrected and finally approved,"

" *Resolved*,—That the Bursar be instructed to furnish a copy of the replies so corrected and approved to the Master, for transmission to the Commissioners, and to retain another copy among the Bursarial Documents."

Having this morning received the copy in question, I have the honour herewith to transmit it accordingly.

And I am, Reverend and dear Sir,
Yours very faithfully,

(Signed) T. WORSLEY.

---

* " Mr. Frere did not concur."

Answers from the Master, Professors, Fellows, and Scholars of Downing College, to the Questions of the Commissioners, dated 18th December, 1851, and numbered A, B, C, &c.

PRELIMINARY STATEMENT RESPECTING THE ESTATES OF DOWNING COLLEGE.

The Master, Professors, Fellows, and Scholars of Downing College.

Management of the Estates.

To explain the true position of the estate it appears requisite to premise that, when the College received its charter in the year 1800, and succeeded to the possession of Sir George Downing's landed estate, that property had been for more than 30 years under the control of the parties who were in adverse possession, and were upholding their claim against the College by a suit in Chancery. Under their hands the timber was cut down, improvements were suspended, the repairs done were of the most scanty nature, and when new buildings were imperatively called for, they were erected so as to be removable at pleasure.

The principal estate consists of strong clay land, every acre of which requires drainage, but in 1800 scarcely a field, if any, had been drained. There was no hard road within one or two miles of the verge of the estate. The land was chiefly in poor pasture, divided into small farms, occupied by tenants little superior to the common labourers in capital or intelligence. A considerable portion of the grass land has since been broken up, and the meagre buildings, which just sufficed for a poor dairy farm, proved quite inadequate for substantial arable holdings. The farm houses were all built with lath and plaster walls; the labourers' cottages were mere mud hovels, sometimes erected by themselves upon the waste.

This statement will show that the College has had greater difficulties to contend with, and been called upon for larger outlays than those which fall upon the owners of well-conditioned estates; whilst for many years the amount paid annually into the Court of Chancery, on account of the Building Liquidation Fund, left a residue which (after paying the fixed stipends of the members) barely sufficed to execute the necessary repairs.

(It should be stated here, that since the year 1800 not less than 60,000*l.* has been expended, under the sanction of the Court of Chancery, on the erection of the College buildings; the whole of this sum, with interest, was charged on the College estates, and was not entirely paid off till the year 1843.)

For the last 25 years substantial improvements have gradually been introduced; the main foundation having been laid by the opening of a turnpike road through the estate, a work to which the College contributed largely; new farm-houses, cottages, and farm-buildings have been erected; substantial tenants introduced; the land drained, though chiefly at present with wood and other perishable materials; to these improvements, and to these alone, the present well-being of the estate is due. Every farm on the College estates is now let at a fair rent, subject, since last year, to a moderate abatement, averaging on the whole not quite 10 per cent. on the entire rental. Only one change of tenancy has taken place recently, and that not of an unsatisfactory nature; whilst in the immediate neighbourhood some thousands of acres of similar poor stiff clay land have been thrown on the hands of the landlords within this last year.

On application to the Court of Chancery in the year 1849, the sum of 720*l.* was ordered to be set apart annually to form an Estate Improvement Fund, of which a separate account is rendered to the Court.

In 1851, in consequence of the abatement in the rents, leave was given by the Court to reduce, for the space of three years, the sum annually paid into the Building Fund from 1,800*l.* to 1,200*l.*

It is evident that, from change of circumstances, an estimate based on the average of the last seven years, will not accurately represent the future prospects of the College in several particulars.

The gross rental has been abated to the amount of 600*l.* and upwards on the rent of the year 1850; the average therefore is taken on six years of unabated and one year of abated rent; there is no immediate prospect of the rents returning to their former standard: the average, therefore, will in this respect give an over estimate of the rental.

On the other hand, now that the cost of new buildings will be defrayed out of a separate Estate Improvement Fund, the charge on the common fund for new buildings, repairs, &c., will be less than that shown by the average.

The following scheme will, therefore, probably show the future financial position of the College more simply and more accurately than it can be gathered from the details of the expenditure of the past seven years.

The Master, Professors, Fellows, and Scholars of Downing College.

Future financial condition of the College.

Expenditure.	£.		Income.	£.	
1. *Outgoings on Estate.*					
Tithe, rent-charges, rents, &c.	890		Gross Income on average of seven years	7,240	
Rates, taxes, and insurance	330		Deduct for abatements	600	
Repairs	700				6,640
Labour, wood, and miscellaneous	200				
Land Steward	160				
Estate Improvement Fund	720				
		3,000			
2. *Expenses of Domus.*					
Stipends of members, servants, &c.	1,860				
Rates, taxes, &c.	200				
Repairs	220				
Miscellaneous	160				
		2,440			
Building Fund reduced for three years to		1,200			
Total estimated Expenditure		£6,640	Estimated Gross Income		£6,640

When the foundation shall be completed by the addition of 13 Fellows and 6 Scholars to the present members (viz., a Master, 2 Professors, and 3 Fellows), it seems evident that the College Estates will be barely adequate to maintain the entire foundation as at present contemplated. This view naturally suggests the policy of putting the estate into thoroughly good condition before that time arrives, by erecting buildings of a substantial character, and by effecting permanent drainage where practicable.

It appears to us that no more exact or satisfactory answer can be returned to the questions addressed to the College in detail, than by continuing up to Michaelmas, 1850 (the period to which the accounts were last audited), a schedule prepared a few years ago by a professional accountant for the Court of Chancery, its form being only so far modified as to show *separately* the outgoings on the Estate and the expenditure on the Domus.

ESTATE ACCOUNT.

	Receipts. Rents.	Receipts. Casual Profits.	Gross Income of Estate.	Payments. Rents, Tithes, and other outgoings charged on the Estate.	Payments. Rates, Taxes, and Insurance.	Payments. Analysis of the Accounts from Michaelmas 1843, to Michaelmas, 1850.

The Master, Professors, Fellows, and Scholars of Downing College.

Present income compared with that of the years 1834, 1835, and 1836.

If the present income of the estate be compared with that of the years 1834, 1835, and 1836, a period when the prices of corn were nearly as low as those which have lately prevailed, it will appear that—

In 1834 the nominal rent was	£6,534,	the abatements	£728
In 1835 „ „	6,475	„	898
In 1836 „ „	6,411	„	948

So that the actual income payable in 1850 (with the existing abatements) shows an excess over 1834 of . . . £646
„ „ 1835 of . . . 875
„ „ 1836 of . . . 989

It may be observed that the gross income of the College was—

In 1800	£4,467
In 1811 it had risen to	6,751
In 1850 (after abatements) it amounted to .	6,452

Question A.—What is the gross yearly income of the College on an average of the last seven years, distinguishing in your return the different sources from which it is derived?

	£.	s.	d.
Rack rents	6,714	12	0
Fee farm rents	271	4	0
Casual profits from sale of timber, manorial fines, &c. .	41	2	0
House and garden rents in Cambridge	53	0	0
College rooms, fees, &c.	159	19	0

Total Gross Income.

Total gross income . . . £7,239 17 0

Question B.—What is the corresponding net income?
The corresponding net income is,—

	£.	s.	d.
From Estate	4,304	8	0
From Domus	213	0	0

Total Net Income.

Total net income . . £4,517 8 0

Deductions constituting the difference between the gross and net Income.

Question C.—What are the deductions constituting the difference between the gross and net income?

		£.	s.	d.
Tithe rent charges, rent of land hired, and other small charges on the land	nearly	937	4	0
Income, drainages, and other taxes, fire insurance	„	339	2	0
New buildings, repairs and improvements .	„	1,033	1	0
Manors, woods, and game expenses . .	„	119	19	0
Drainage	„	20	12	0
Valuations on relettings	„	7	11	0
Miscellaneous payments, including charities, to the amount of about 40*l.*, and land steward's poundage at 2½ per cent	„	264	18	0
		£2,722	7	0

Annual Expenditure of the College.

Question D.—What is the annual expenditure of the College on the same average of years, distinguishing it under its several heads?

		£.	s.	d.
Poor rates, assessed and income tax for Domus .	nearly	193	11	0
Repairs of domus	„	303	10	0
Miscellaneous payments	„	175	2	0
Salaries of members, and servants, and commons	„	1,742	15	0
		£2,414	18	0

Application of surplus Income.

Question E.—What are the purposes to which the surplus income is applied?
Previously to the year 1849 the surplus income was applied solely to the building fund;

—in that year an estate improvement fund was set apart: for the next three years the surplus income will be thus appropriated, viz.:— *The Master, Professors, Fellows, and Scholars of Downing College.*

Application of surplus Income.

	£.	s.	d.
To building fund . . .	1,200	0	0
To estate improvement fund .	720	0	0
	£1,920	0	0

Question F.—If accumulated as a building fund, what is the present amount of accumulation? Building Fund.

On the 9th of January, 1852, the amount of the building fund was—

£.	s.	d.	
14,686	2	5	Three per Cent. Consols.
213	17	4	(being the January dividend on the above stock) cash.
Since that date 600	0	0	has been paid to that fund.

The sum required to complete the buildings according to the plan approved by the Court of Chancery, would probably amount to nearly 40,000*l.*

Question G.—Do the Master, Professors and Fellows enjoy any emoluments or advantages beyond the respective stipends assigned to them in the Charter, and if so of what nature and value? Emoluments and advantages enjoyed by the Master, Professors, and Fellows, beyond the stipends assigned to them.

Each member of the College enjoys the several sums named in the Statutes, p. 76, as commons during residence, viz.:—

	s.	d.	
The Master	5	0	a day.
Each of the Professors . .	3	6	„
Each of the Fellows . .	2	6	„

The expense of the Fellows' table in the College Hall, which is in excess of this allowance, is defrayed by the Fellows themselves, except on audit days.

The Master and each of the Professors enjoy, in right of their respective offices, a lodge, garden and paddock; and each of the resident Fellows enjoys a set of rooms rent free, and has the use of a paddock.

There are also the several offices of Bursar, Dean, and Steward, and two Chaplaincies, which are held as under:—

The Master, Chaplain		50	0	0	per annum
Mr. Frere, one of the resident Fellows	Bursar	50	0	0	„
	Dean	25	0	0	„
Mr. Sykes, the other resident Fellow	Chaplain	50	0	0	„
	Steward	33	6	8	„

The two resident Fellows last named, receive as Tutors the sum payable for tuition by each undergraduate according to the regulations of the University.

With respect to the inquiry in Question 8, of the Circular bearing date November 5, 1851, as to the amount annually given as prizes or rewards for the encouragement of learning in the College, we beg to state that at present there is neither Scholarship, Exhibition, prize, or reward of any kind, for the encouragement of learning in the College. Rewards for the encouragement of learning.

Question 12 *in the Circular of November* 5, 1851.— Are there any Fellowships, Scholarships or Exhibitions attached to your College, in the conditions or application of which you would think it advantageous to obtain alterations or modifications by competent authority, &c.?

In regard to Scholarships or Exhibitions, a statement has been already made, under the answer to No. 5 of the questions dated December 20, 1850, (see the Master's letter of June 6, 1851,) showing the anxiety felt by the majority of the members of the College for the institution of certain Exhibitions for the special encouragement of Students in Law and Medicine, and stating the difficulties which stand in the way of the proposal.

We are still of opinion that in order to render the College, during the interval to elapse before the completion of the foundation, that efficient place of education which we desire, some such rewards and encouragements for learning are highly expedient, if not indispensable.

CAMBRIDGE UNIVERSITY COMMISSION.

MISCELLANEOUS EVIDENCE.

Memorial from Three Fellows of Gonville and Caius College

Memorial from Three Fellows of Gonville and Caius.

To the Cambridge University Commission.

My Lord and Gentlemen, *February* 1852.

As Senior Fellows of Gonville and Caius College we have had laid before us a list of questions proposed by you to the College, among which are the following:

1. Are there any Fellowships, Scholarships, or Exhibitions attached to your College in the condition or application of which you would think it advantageous to obtain alterations or modifications by competent authority with the view of giving greater effect to the intention of the Founder, and rendering them more practically beneficial; if so, specify the cases and the nature of the present inconvenience and the proposed remedy.

2. State particularly whether in the case of any Exhibitions limited to particular schools or localities it would, in your opinion, be expedient from the deficiency of fit claimants to extend the range of eligibility.

3. Are there any cases in which it appears to you that more effectual provision ought to be made for the maintenance of Scholars and Exhibitioners by means of a re-adjustment in the distribution of the revenues of property intended for this purpose.

The College, as a body, not having returned any answer to the questions you have proposed, we, as Senior Fellows of the College, having had long experience of the serious evils that result from the restrictions on the tenure of the Mastership, and of many of the Fellowships, Scholarships, and Exhibitions, and having long earnestly desired to see them remedied, feel it our duty respectfully to call your attention to the following facts.

1. The Mastership, according to the interpretation that has been frequently given to the Statutes by the Fellows, is confined to men born in Norfolk. We deem it very prejudicial that the highest post in the College, and one which is invested with great authority and influence should be thus restricted, and we think it very desirable that the Fellows should have the power of placing at their head from amongst all who are or have been Fellows, the person whom they consider, by his ability and character, most deserving of that honour, and most likely to maintain the reputation of the College.

2. Of the twelve Senior Fellowships, three are confined to men born in the county of Norfolk, and two others to men born in the Norwich diocese, and these five Fellowships are still further restricted, three to divinity, and two to physic.

The evils resulting from these restrictions are very great. In consequence of the Divinity Fellowships being restricted one to Norfolk, and two others to the Diocese of Norwich, young men from these localities are often advanced intothe seniority over the heads of men who have obtained higher University honours, and are many years senior to them in the College, and by reason of this earlier admission into the list of Seniors they have been hitherto considered to have a prior claim to College and University offices, and to College livings.

As these favoured Fellows obtain College livings, other Norfolk men succeed them in the list of Seniors, so that Fellows from other counties have sometimes a series of men of less standing than themselves passed over their heads.

It will thus be seen that the Norfolk Divinity Fellows not only get the Fellowships restricted to them, but also an undue share of College and University offices and of the College livings.

These evils have been introduced subsequently to the time of Dr. Caius, and do not appear to have been in any way contemplated by him.

With respect to the two Senior Fellowships restricted to Norfolk, and also to physic, there are evils of a different kind.

Few men now graduate in physic at Cambridge; the number of Norfolk men who so graduate is consequently very small, and it is very seldom that one of these obtains a University distinction that would entitle him to an open Fellowship in the College.

The restriction therefore must sometimes compel the College to elect into the body of Senior Fellows (which body, with the Master, has the sole management of the College) young men who otherwise would not be entitled to a Fellowship at all, while at the same time, men of other counties who have taken most distinguished honours have commonly to wait ten or twelve years after their election as Fellows before they have any voice or authority whatever in College matters. It will easily be seen that the direct tendency of this restriction is to lower the general character of the Fellowships, and to entrust the management of the College to men, who neither by their standing nor degree have obtained the confidence of the College.

We are desirous, therefore, that all these injurious restrictions should be abolished.

3. The three Fellowships founded by Mr. Wortley are all restricted; one to men born in Norfolk, one to men born in a small district in Devonshire, one to persons of the name of the Founder. These restrictions, though partially modified by the terms on which the benefaction was accepted, compel the College occasionally to elect men into these Fellowships whose degree does not come up to the College standard, and this even when there are men of the highest University distinction waiting for a Fellowship.

Memorial from Three Fellows of Gonville and Caius.

We are very desirous that these narrow restrictions should be abolished, and the Fellowships thrown open to men of all counties.

4. Another Fellowship, the Wendy Fellowship, has been recently considered to be restricted to Norfolk men and Divines. It is now vacant, and there is no person in the College eligible to it. It must therefore remain vacant, although at the present time we have a Senior Wrangler and other men with high degrees waiting for Fellowships.

5. There are numerous restrictions of the same kind to the tenure of some of the Scholarships and Exhibitions of the College, the consequence of which is, that it becomes imperative either to keep these endowments vacant or to confer them on Undergraduates, who have not by their attainments, industry, or general conduct, earned such advantages, and this to the exclusion of others whose superior qualities and limited means render them most deserving.

6. Another circumstance to which we beg to call your attention is the inequality of the Fellowships in emolument and privileges. The Junior Fellowships are, with one exception, very poor, and do not entitle their possessors to any voice in College matters, not even in the management of the property from which their own stipends are derived.

This we consider a serious evil, and one which calls for removal. The Junior Fellowships are seventeen in number, and the seniority is not attained, excepting by Norfolk men, in less than ten or twelve years. We are, from our own experience, strongly impressed with the conviction that the utility of these endowments would be very greatly increased if the stipends were somewhat larger, and the Fellows consequently were more assisted in their several callings at an early period of their career.

We believe that it would be a great benefit to the College if, gradually and without prejudice to the interests of existing Fellows, the different benefactions were incorporated, and the Fellowships made more nearly equal.

Our desire, then, briefly is to see all the restrictions abolished, and the different benefactions incorporated, so that in the appointment to the offices of Master, Fellow, and Scholar, regard should be had to merit only.

We think it right to state that these objects are not to be looked upon as modern innovations. They are fully provided for in the original Statutes given to the College by Bishop Bateman in 1353, which, for their liberal and wise regulations, are still deserving of much admiration. In these Statutes the following directions are given for the choice of Master and Fellows.

"Volumus insuper quod in omni electione, præfectione et ordinatione custodis et sociorum in posterum faciendâ, omnis affectio singularis, conspiratio et partialitas excludatur, ut sic simpliciter melior et pro Collegio utilior, quantum eis Deus in conscientia ministraverit, eligatur."

The College was originally founded for a Master and four Fellows, who might be of any county or any profession, and provision was made for incorporating with the original Fellowships any others that might afterwards be founded from the augmented funds of the College, or from the liberality of future benefactors. The following is the clause by which this is provided :—

"Item statuimus et ordinamus quod quandocunq dictum. Collegium habuerit ex nostra aut aliorum fidelium largitione aut ex ejusdem Collegii emptione sufficientem seu habundantem ad hoc excrescentiam reddituum annuorum perpetuorum teneatur sociorum pro tempore numerum juxta dictam reddituum annuorum perpetuorum excrescentiam ampliare; super quo custodis et sociorum qui pro tempore fuerint sub juramento prestito coram Deo conscientiam oneramus."

The restrictions and divisions of which we complain, and which we believe to be so injurious to the College, have been most of them introduced under Statutes supposed to have been given by Dr. Caius in 1572. The charter granted to this benefactor, however, expressly restrained him from making any Statutes contrary to those of Bishop Bateman.

What we desire, therefore, is little more than to restore the wise and liberal provisions of our original Statutes, so that in the election of Master, Fellows, and Scholars, no favour or partiality shall be shown to any class of persons, but that the choice shall be determined by merit only, or as it is expressed in the original Statutes, that "omnis affectio et partialitas excludatur, ut sic simpliciter melior et pro Collegio utilior eligatur."

We have the honour to be, my Lord and Gentlemen,

Your obedient servants,

(Signed) GEORGE BUDD, M.D.
JOHN TOZER, M. A.
J. T. WALKER, M. A.

The following communication was received from C. C. Babington, Esq., of St. John's College :—

Botanic Garden and Museum.

C. C. Babington, Esq.

The Botanic garden is now in a very efficient state, as far as such plants as will stand the climate are concerned. It contains a rich and well-named collection of trees, shrubs, and herbaceous plants, which is so arranged on the "Natural System" of De Candolle, as to be easily studied by those who desire to obtain a knowledge of botany. Much use is made of it for that purpose by Undergraduates, and several of the Senior Members of the University have also obtained a practical acquaintance with Botany by its means.

Information concerning the extent of ground occupied, and the application of its several parts, has doubtless been already given to the Commission, but it may be allowable to remark that there is a large adjoining space which forms part of the ground purchased for the garden and may be used in any future extension of it.

The formation of this garden has been a matter of considerable difficulty, owing to Dr. Walker's endowment not producing even a sufficient annual sum to meet the necessary current expenses of labour and attendance.

The Commissioners will probably have learned from a statement of the University accounts, that the sums which could be spared from the general funds were small, and that therefore but slow progress could be made with the works for the garden. With the exception of buildings, the garden has now been nearly completed by means of money obtained in small sums from the University Chest, and it is thought that all (with the same exception) that remains to be done may be effected by means of one or at most two similar grants. The houses necessary for the proper cultivation of the collection of tender plants which the garden now possesses, but without admitting of much addition being made to it, have, I believe, been estimated to cost at least 5,000*l.*, and such a suite of plant-houses as the garden ought to include might possibly be built for 2,000*l.* or 3,000*l.* in addition to that sum. A house also is necessary as a residence for the Curator, and several smaller buildings must ultimately be provided to complete the garden. It is manifest from the state of the income of the University, that there are no ordinary means by which such sums as those mentioned above can be raised, and it has long been proposed to endeavour to form a building fund by the voluntary subscriptions of those who take an interest in the garden as a means of promoting the general efficiency of the University.

In addition to the buildings requisite for the garden itself it is greatly to be wished that a lecture-room for the Botanical Professor, and one or more rooms to be used as a Museum, should be erected in connection with the Curator's house. The botanical collection is now preserved in a very inconvenient and in other respects improper room adjoining the site of the old garden. It is obliged to be packed away into the smallest possible space, and is thus nearly useless. Even if the present room could be made more appropriate it seems nearly impossible to render the Herbarium useful as long as there is no qualified person to take charge of it. During the absence of the Professor it may be considered as permanently closed to botanists, and when he is at Cambridge his time is so much occupied with the duties of his office that he cannot be expected to act also as Curator of the Museum. He deserves great credit for what he has done towards the arrangement, preservation, and indeed formation of the Herbarium, for his predecessor had allowed the old collection to fall totally to ruin. The Herbarium, although not very extensive, is of considerable value, and ought to be removed to a good airy room in or near to the garden. It is believed that there is reason to hope that a very considerable addition will be made to the Herbarium by the liberality of a gentleman whom I do not consider myself at liberty to name, and then the want of a good room and efficient attendant will become even more pressing than it is now.

The Professor has made a great many dissections of plants for the use of students, which would be most valuable to them if they could be made easily and safely accessible. He has also collected a small museum of objects of botanical interest, which is to a great extent useless from the same cause. These collections and preparations should be removed to the garden and placed in a room adjoining the proposed Lecture-room and the Herbarium.

There are a few old books belonging to the Botanical Museum which are now of no use there and might well be transferred to the University Library; the modern books which are required by the Curator of the Garden being provided in their place.

The disposal of the site of the old garden is directed by an Act of Parliament (passed in 1831), to be regulated by the Senate, in which body as the Legislature of the University, the Trust estate and its management is vested. It might appear that the produce of the sale of this land is available for the purpose of completing the garden, but it seems undesirable that that site, placed as it is in the middle of the town, should be alienated; and, as it is not the free property of the University but forms part of the Garden-trust estate, it might perhaps be wisely transferred from the trust and placed at the disposal of the Senate, that body undertaking to supply such a sum annually as may be required to meet the current expenses of the garden. That sum is now about 250*l.* a-year, and is paid by an annual vote of the Senate.

The land would then be available as a site for the Lecture-rooms, Museums, Laboratory, &c., which are even now so much wanted, and which the extension of the studies contemplated by the New Scientific Tripos will probably soon make absolutely requisite.

I do not see any mode except the subscription mentioned above; by which the money required for the erection of the houses in the garden can be obtained. That this fund should be raised as soon as possible is desirable for several reasons. 1st. Because the old plant-houses are in a ruinous condition, and thus cause a heavy annual expense in keeping them from falling. 2nd. These houses are so constructed as to be very bad habitations for plants. 3rd. By causing two establishments to be kept up they prevent the most use being made of the time and labour of the men employed, and consume much of the valuable time of the Curator in passing from one to the other—a distance of about half a mile. *C. C. Babington, Esq.*

As the University has expended a large sum in the formation of the garden, must provide one still larger, and will afterwards have to assist in its permanent support, it seems desirable that the present Board of "Managers and Governors" should be enlarged by the addition of two or three persons to be elected by the Senate and to hold their seats for a limited period. The present Board consists wholly of "*ex officio*," members who do not, therefore, necessarily take any especial interest in the garden.

It also seems desirable that an annual statement of the mode in which the funds appropriated to the use of the garden, either belonging to the trust-estate, or granted by the Senate, have been expended, should be laid before the University at the time when the Vice-Chancellor's balance-sheet is distributed to the resident members of the Senate.

Such a regulation might indeed be well extended to all property held in trust for academic purposes, either by the University itself or by special Trustees.

Museum of Zoology.

It is probably known to but few persons that there are extensive zoological collections in the possession of the University, consisting chiefly of the whole Ornithological Museum of Mr. Swainson, the celebrated naturalist, which was purchased of him by subscription some years since. There is also a large and valuable collection of birds made by Capt. F. P. Blackwood, R.N. in the Eastern Archipelago; and a small but peculiarly excellent collection, formed by Mr. H. C. Rothery, of St. John's College, in French Guiana; these were presented to the University severally by those gentlemen. The want of a place in which to exhibit these specimens has totally prevented their being made of use; and they are now chiefly packed up in boxes, and quite inaccessible to Students.

The Cambridge Philosophical Society possesses a Zoological Museum, containing a very perfect suit of the birds of Britain; a fine set of the fishes of China, collected and given by the Rev. G. Vachell; a collection of fishes made at Madeira, by the Rev. R. T. Lowe, and presented by him; Mr. Darwin's entire collection of several hundred species of fish, collected during the voyage of H.M.S. Beagle; a tolerably good collection of British insects; Mr. J. F. Stephens's entire collection of British shells; a collection of birds' eggs; a collection to illustrate the local fauna of Cambridgeshire; and many other specimens obtained from various sources. If these collections were combined with those belonging to the University, and the whole placed in a proper building, and under efficient superintendence they, would form a nucleus, and more than a nucleus, for a Zoological Museum.

As I conceive it to be allowed that a Zoological Museum is desirable, it is not necessary to enter upon that question.

Antiquities and Coins.

In the University Library, the Fitzwilliam Museum, and the Libraries of several of the colleges, there are various interesting remains of antiquity, and valuable collections of coins and medals. They are, for the most part, carefully locked up, and the keys placed in the care of the higher authorities of the several bodies. Some of the cabinets have not been opened for many years, and their contents are only known generally, as no catalogues exist. Where some of them have been hurriedly examined, they have been found to include specimens of very considerable interest and value. It is desirable that these collections should be catalogued, and the lists thus obtained combined into one, and published; by this means they might be made useful even, if it should not be found desirable or possible to remove them to one place and combine them into one collection.

The Cambridge Antiquarian Society has for some years devoted a considerable portion of its small funds to the purchase of such antiquities as have been found in the county of Cambridge, and its neighbourhood, and has thus formed a valuable, although small, museum. Should a general Museum of Antiquities be formed in the University it is highly probable that this collection would be at once placed in it either as a deposit or donation, as might be found to be most desirable, and in accordance with the wishes of the University and Society.

Lay Fellows.

In St. John's College there are 53 Foundation Fellowships; only four of these Fellows are allowed to omit taking the B.D. degree, and are therefore required to take Holy Orders. Those four are also restricted to the pursuit, by two of them of Medicine, and two of Law: in each case having *really* to follow these professions. These arrangements exclude persons who may desire to pursue the study of science and to remain laymen. I beg leave to suggest that there should be at *least four other Fellows* allowed, at the option of the Master and Seniors, to continue laymen and retain their Fellowships, provided it be shown to the satisfaction of the Master and Seniors that they are really making some branch of science their serious study with a view to its advancement.

In Trinity College I believe that only two out of 60 Fellows can continue laymen and

C. C. Babington, Esq.

retain their Fellowships. It will be found that in some of the small Colleges the proportion is still less, even if any such permission can be obtained.

Appropriated Fellowships.

In some Colleges the Fellowships are not allowed to be given to more than one or two of the same county, or are divided between the north and south of England. Some cannot elect any person a Fellow who is a native of Scotland or Ireland (or any other country except England and Wales) unless one of his parents was born in England. This seems to be a very undesirable and useless restriction at the present day, having resulted from a fear of the natives of a county or district accumulating all the Fellowships upon their fellow countrymen. The restriction to England arises from the kingdom having been almost confined to that country at the date of the foundation of the College.

I venture to suggest that all such restrictions to county, district, or kingdom, should be done away; and that any British subject be made eligible to any of the Fellowships: all persons who will take the oath of allegiance being considered as such.

University Library.

The University Library is supported chiefly by the annual subscription of each person whose name is on the boards, of 6*s.*, amounting in the whole to probably about 2,000*l.* From some blunder the income tax has been paid upon this sum annually, ever since that tax was imposed: as this sum does not arise from property, but is the private subscription of those who are members of the University, it seems clear that it is not liable to the tax any more than the subscriptions to any charitable or scientific institution are liable. The tax has therefore been paid in error, and an appeal ought to be made to the Commissioners of Income Tax to have it remitted, and the sum improperly paid refunded.

I trust that the University Commission will take such notice of this as may lead to the recovery of so large a sum and so much annual income to the Library which is in great want of it.

It may be remarked on the subject of the Library that it is highly desirable that the question concerning the legality of the Library-tax should be set at rest, and that the amount of it should be increased, say to 1*l.* per annum from each person.

It is also desirable that the government of the Library should be placed in the hands of a responsible body—the present ex-officio Syndicate being very inefficient. I would suggest a small Syndicate, such as is described below under the head of Permanent Syndicates, as likely to be the best plan to adopt.

Syndicates.

I do not know if it is by law or only by custom that the Vice Chancellor is always the Convener and Chairman of all Syndicates, but may venture to suggest that the existence of such a law or custom is attended with much inconvenience. The Vice Chancellor is always overwhelmed with business, and has therefore very little time to devote to the subject submitted to any individual Syndicate, from which it results that the time of the meetings is frequently occupied with preparing the business rather than its discussion: thus much time is lost. I beg leave to suggest that in the Grace appointing any Syndicate it should be stated that some person named (not usually the Vice Chancellor) is to be its Convener and Chairman. If desirable such person might always be one of the Heads of Colleges, or an Officer of the University.

Permanent Syndicates.

It seems desirable that Syndicates, such as those appointed to superintend the Pitt Press and the Library, should be required to report their proceedings, at least annually, to the Senate. They should be changeable bodies, constituted so that the Syndic who has been the longest elected should be removed from the body annually and another member of the Senate selected to supply his place.

It also seems desirable that the selection of the person to be recommended to the Senate for election should be one of the duties of the Syndicate, and be intimated to the Senate in a Report attested by the signatures of a majority of the Syndics.

University Bursar.

All men of business who chance to become acquainted with the fact that the funds of the University are administered, and the accounts of them kept, by an officer who has so many other duties to perform as the Vice Chancellor, and who only holds office for one year, express their astonishment that such a plan could have been continued until the present time. I do not know during what length of time this plan has been followed, but the annual appointment of "three keepers of the chest" shows that it was not the intention of the Statutes.

In my opinion the sooner it is put an end to the better it will be for the University. I would then propose that a paid officer (to be called perhaps *University Bursar*) be appointed to have charge of the property and funds in the same manner as the Bursar of a College is entrusted by it, and that a small permanent Syndicate (consisting of not more than five members, and renewable according to the mode recommended under the head of Permanent Syndicates) be appointed to consult with him upon all matters of importance, and to report to the Senate whenever the vote of that body is required upon any business concerning the funds or property. This Syndicate, in conjunction with the Bursar, to prepare a balance sheet of the annual receipts and payments of the University, which, having been examined with its vouchers by the

University Auditors, and signed with their names as correct, should be presented to the Senate at the next following Congregation, and printed and circulated amongst the resident members of the Senate. *C. C. Babington, Esq.*

It is my opinion, and that I have reason to believe of many others, that such a plan as this would cause a very considerable annual saving to the University by the constant attention of a permanent officer, the examination of contracts, bills, &c. Doubtless his salary would, in a few years, be well repaid by the improved condition of the funds.

The Bursar should perhaps be appointed for a limited period, say five years, but be eligible for re-election until he attains the age of 60 years. The form of re-election should be obligatory.

Taxation.

The Senate should have the power of legally enforcing the payment of any tax that it may please to impose upon the members of the University, or any class of them. The want of this power deprives us of the means of carrying out many desirable improvements.

Tax on Degrees, &c.

It is to be hoped that the Royal Commission will take into consideration the tax now paid on Matriculation and Degrees.

It seems hard that we should be taxed and other academic bodies paid by the State.

Professors.

My long residence in the University, and pursuit of studies which are not taught in the Colleges, has made me see plainly the necessity that exists that the Professors should be required to make the University their usual place of residence. A Professor can do far more for the advancement of his science amongst our Students by being on the spot at all times than can ever be effected by his coming here for a few weeks in the year to deliver a course of lectures. My experience has shown me that Undergraduates who desire to study a science are with difficulty led to consult a private M.A., but will without scruple apply to a resident Professor.

It will doubtless be justly said that the pay of many of the Professors is far too small for their support, and perhaps added that therefore they cannot be expected to reside in Cambridge.

Doubtless the payments are often very small, but nevertheless I am of opinion that men may usually be found who will worthily hold the Professorships and reside in Cambridge. I think that more good is done by a resident Professor, who has the wish to promote a knowledge of his science, than by one who only comes to lecture, even although the former may be far less eminent, and not be possessed of nearly so intimate a knowledge of his subject as the latter.

The recent appointments to some Professorships has directed attention to the fact that it is far from desirable for a Professor (with some few exceptions) to be ex-officio required to examine for classical distinctions. I have found that the point considered as of most interest by many members of the Senate was not the qualification of the candidate to teach the subject of which he desired to be Professor, but his knowledge of classical literature by which he might be an efficient examiner for Scholarships, &c.

I would venture to suggest that the time is past when the existence of such ex-officio Examiners was useful, and that it is now desirable that they should be relieved from this duty and Examiners expressly appointed by the Senate in each case.

CHARLES C. BABINGTON.

St. John's College, 14 *July*, 1852.

Memorial of the College of Preceptors.

The respectful Memorial of the Council of the College of Preceptors, to the Royal Commission for the University of Cambridge.

The Council of the College of Preceptors beg most respectfully to memorialize the present Commission of Inquiry, on the behalf of the University of Cambridge, on what they, the Council of the said College, both on their own behalf and on the behalf of the body whose interests it is their province to superintend and direct, conceive to be most needful to be established in the University of Cambridge especially, viz., the authorization of a matriculation examination to be satisfactorily passed by every Student of the University, before he be allowed to reside in *Statu pupillari*, or to keep terms. Your Memorialists, from their individual experience, and from what they deem inseparable from the best interests of learning and religion, conceive that it is highly important to the well-being of society that the studies of all academical persons should be previously directed by the influence of the University, through the appointing, from time to time, of certain subjects of examination necessary for admission into the University, to be well studied and comprehended before residence be allowed. Your Memorialists are necessarily aware, that at present many young men resort to the Universities almost without any previous mental training, so that they are neither able to benefit by the Lectures of their respective Tutors in the different Colleges, nor can they attend with adequate advantage to themselves the public Lectures of the various public Professors of the University: this is a circumstance which must be deplored: whilst no doubt the Royal Commissioners themselves are fully aware of the evil stated, and anxious to advise some means whereby it may be either removed, or at least *Memorial of the College of Preceptors.*

Memorial of the College of Preceptors.

considerably abated; now your Memorialists would respectfully suggest, that nothing can be more calculated to ensure a proper use of time and opportunity previous to admittance into the University, as well as to render University residence beneficial to the individual and creditable to the Academic Body, than a previous examination in subjects appointed, with due regard to the capabilities of youth, and the interests of the University itself.

In the present state of things, the loss of time and money, in far too many instances—to say nothing of reputation—is fearful; this is a subject on which your Memorialists are unwilling to dwell, because they are fully aware that the University authorities are most solicitous thaa Students should mispend neither their own time nor their parents' bounty; but such being the case, your Memorialists are anxious that only properly-qualified persons should be permitted an opportunity of enjoying the many advantages of *Alma Mater*; were this done by the intervention of a matriculation examination, the churches, the professions, the country at large would be almost instantly benefited; for persons not duly qualified for their professions, whether of the Church, or School, or Bar, are ever the most pretending and obtrusive, and thus they prey upon the unwary, to the great detriment of society, and try to perpetuate evils which ought certainly to be remedied. Besides, the Universities ought to be the grand source from which should issue innumerable currents of learning and solid attainments into every grade of society. Books on Classical and Mathematical learning are now within the reach of every one, and every person of even moderate leisure ought to aim at mental culture; this point cannot be denied. Now your Memorialists cannot help thinking, that if the University of Cambridge would but insist upon a certain amount of Classical learning, to be tested by experienced examiners previous to residence, the effect would be great in all superior schools; there would be certainty of aim; there would be an object always in view; and thus the frequent indifference of youth would be stimulated of necessity. Your Memorialists would also beg to suggest, that a certain amount of elementary Mathematics should likewise be insisted on, and that, too, in connexion with History, and other collateral subjects needful for the understanding of any writer, whether sacred or profane. Were the University of Cambridge to adopt this course, her influence over all the schools of the empire would be amazingly increased; further, there would arise greater uniformity of study in every place of sound learning and religious education. Truth is ever the same, and why should it not be sought after by pursuing the same methods, and aspiring by similar ascents? Similarity of pursuit is, in fact, necessary where the object is the same; and an entrance examination would greatly tend to achieve so desirable a result.

It is well known that the generality of youth are unwilling to get up, so as to comprehend either arithmetic or algebra, or Euclid; but a matriculation examination would have a great tendency to overcome this youthful reluctance, by the operation of the law of necessity, and thus the labours of the faithful and enlightened instructor would be agreeably expedited, both at school and in the University.

By way of meeting an objection, your Memorialists would further beg to observe, that the separate Colleges need not suspect their individual interests would be materially interfered with, seeing young men could be admitted of their several Colleges just as they are at present; whilst they were not permitted to reside, until they had passed an examination of fitness for entering upon a new career of learning and diligence. In fine, your Memorialists hope they may be pardoned for thus expressing their sentiments on a point on which they cannot but feel themselves most interested, since learning, religion, national well-being, and the due observance of the Laws are necessarily bound up in the education of the youth of the Empire, whether that education be made to bear upon the youth of the highest, or middle, or even lowest grade in society.

May the admission of very high University authority be no longer sustained to the unmerited disparagement of the University, viz.—That a large portion of her Students are so void of previous mental training, that they are not capable of thought, and thereby of profiting by the Lectures of the tutors and professors. *Salvete.*

S. FREEMAN, *President of Council.*
R. WILSON, D.D., *Dean of the College.*
JOHN PARKER, *Secretary.*

CAMBRIDGE UNIVERSITY COMMISSION.

APPENDIX.

Deed of Foundation for Sir Thomas Adams' Professorship of Arabic.

Addit. MSS., 5810, *(Cole, Vol. IX.)*, *pp.* 196—198.

Fundatio muneris Lectoris Arabici per Thomam Adams, Baronettum, in Universitate Cantabrigiensi, cum Statutis.

Appendix.

Deed of Foundation for Sir T. Adams' Professorship of Arabic.

Omnibus Christi fidelibus ad quos hoc Scriptum pervenerit, Thomas Adams, miles et Baronettus, Civitatisq; Londinensis Aldermannus, Salutem in Dño sempiternam. Sciatis quod Ego prædictus Thomas Adams ex propenso in Academiam Cantabr et in Rem literariam affectu, unacum Gulielmo Adams, Armigero, Filio meo et Hærede apparente, unum annualem Redditum Quadraginta Librarum, bonæ et legalis monetæ Angliæ in annuum Professoris seu Lectoris Linguæ Arabicæ in dicta Academia Stipendium vel Salarium exeunt de Domo Dominicali de Chawreth alias Chawrey Horreis, Stabulis, Ædificijs, et Structuris, Atriis, Gardinis et Pomarijs eidem spectant et unâ petia terræ eidem adjungent, Continent per estimacoñ quatuordecim acras, et uno Campo vocat Chawrey, Halle Feild continent per Estimacón 20 acras, uno magno Campo vocat Millfield cont p estimacõem 40 acras, uno Prato cum Arbusto lupulato eidem adjung̃ continent insimul 7 acras per estimacõem, uno alio Prato vocat Le Ley Meadow cont per estimacõem 4 acras, uno campo vocato Crawley Feild cont p estimacõem 28 acras, uno Clauso Pasturæ vocato Oxwick cont p estim̃ 10 acras, uno pratõ voc̃ Oxwick Mead cont p estim̃ 4 acras, et uno alio Prato voc̃ Moore Ox Meadow cont p estim̃ 7 acras, et una pecia Terræ boscalis voc̃ Le Ley Spring cont p estimacõem 1 acram et dimidium acræ, omnia quæ quidem præmissa jacentia et existentia in Parochia de Broxted in Comitatu Essexiæ, dimissa sunt ad Firmam per prædictũ Thomam Adams Militem et Baronettum, per nomen Thomæ Adams Armigeri, cuidam Roberto Salmon per Indenturã gerentẽ Datã 7.^mo. Previous to this Foundation, His Majesty sent the following Letter to the Universit which they answered by the Address inserted immediately after.

The King's Letter about founding a Professorship of Modern History

George R.

Trusty and well-beloved, we greet you well. We being greatly desirous to favour and encourage our two Universities, those antient and laudable nurseries of Piety and Learning, and to enable them more effectually to answer the end of their institution, by sending forth constant supplies of learned and able men, to serve the Public both in Church and State; and having observed that no encouragement or provision has hitherto been made, in either of the said Universities, for the study of Modern History or Modern Languages, the knowledge of which is highly necessary towards compleatly qualifying the youth committed to their care, for several stations both in Church and State, to which they may be called; and having seriously weighed the prejudice that has accrued to the said Universities from this defect, persons of foreign nations being often employed in the education and tuition of youth, both at home and in their travels, and great numbers of the young nobility and gentry being either sent abroad directly from schole, or taken away from the Universities before the course of their studies can be there compleated, and opportunities frequently lost to the Crown of employing and encouraging members of the two Universities, by conferring on them such employments, both at home and abroad, as necessarily require a competent skill in writing and speaking the modern languages:

Letter from the King to the Vice-Chancellor about founding a Professorship of Modern History.

In order, therefore, to remedy those and the like inconveniences, We have determined to appoint two persons of sober conversation and prudent conduct, of the Degree of Master of Arts, or LL.B., or of some higher Degree in one of the said Universities, skilled in Modern History

Letter from the King to the Vice-Chancellor about founding a Professorship of Modern History.

and in the knowledge of modern languages, to be nominated by Us, to be our Professors of Modern History, one for the University of Cambridge, and the other for that of Oxford, who shall be obliged to read Lectures in the Public Schools, at such times as shall be hereafter appointed.

And We have further determined, that each of the said Professors shall have a stipend of 400*l.* per annum, and out of the said stipend shall be obliged to maintain, with sufficient salaries, in the University where he shall be established, two persons at least well qualified to teach and instruct in writing and teaching the said languages; which said Teachers shall be under the direction of the Professors respectively, and shall be obliged to instruct gratis, in the modern languages, 20 Scholars of each University, to be nominated by Us, and each Scholar so nominated shall be obliged to learn two at least of the said languages; both the Professors and Teachers taking especial care that the times and hours for the instructing and teaching the said Scholars be so ordered as not to interfere with those appointed for their academical studies; which Professors and Teachers shall also be obliged, once every year, to transmit an attested account of the progress made by each Scholar committed to their care, to our Principal Secretaries of State, to be laid before Us, that we may encourage the diligence and application of such among them as shall have qualified themselves for our service, by giving them suitable employments, either at home or abroad, as occasion shall offer.

And Our Royal will and pleasure is, that you forthwith, upon the receipt hereof, call a Congregation, in order to communicate these our Royal intentions to the University. And so We bid you farewell.

Given at our Court at St. James's, the Sixteenth day of May, 1724, in the Tenth year of Our reign.

By His Majesty's Command, TOWNSEND.

To our trusty and well-beloved the Vice-Chancellor of our University of Cambridge, to be communicated to the Senate there.

[See the original, inter Archiv. Acad. xiii. 49.]

The humble Address of the Chancellor, Masters, and Scholars of the University of Cambridge, in answer to the foregoing Article.

MOST GRACIOUS SOVEREIGN,

Address of the Chancellor, Masters, and Scholars of the University of Cambridge in answer to the foregoing Article.

WE, Your Majesty's most dutifull and loyal subjects, the Chancellor, Masters, and Scholars of your University of Cambridge, having been honoured with Your Majesty's Royal Letter, which has been read to us in full Senate, intimating your gracious and princely intentions of establishing both in this, and your other University, a new Professorship of Modern History and Modern Languages, with an appointment so ample as well-nigh to equall the stipends of all our other Professors put together, beg leave to approach your sacred person with the sincerest assurances of duty, loyalty, and gratitude, which such unparalleled munificence requires.

Your Majesty, like a common Father, that is watchfull for the wellfare of his Children, has wisely observed where our greatest defect lay, and where your relief could be most seasonably applied. We have for many years with grief observed, and may now with assurance venture to speak out our grievance, since Your Majesty has been pleased to enter so far into our cause as to join in the same complaint, that foreign Tutors have had so large a share in the education of our youth of quality, both at home and in their travels; and we are thoroughly sensible that the reason why they have been so employed in preference to men of far superior learning of our own country, has been the want of proper helps towards the attaining those accomplishments in our Universities, for which Your Majesty is now making so honourable provision. But we are now firmly persuaded, that when Your Majesty's noble design shall have taken effect, when there shall be a sufficient number of Academical persons, well versed in the knowledge of foreign Courts, and well instructed in their respective languages; when a familiarity with the living tongues shall be superadded to that of the dead ones; when the solid learning of antiquity shall be adorned and set off with a skilfull habit of conversing in the languages that now flourish, and both be accompanied with English probity, our nobility and gentry will then be under no temptation of sending for persons from foreign countries, to be entrusted with the education of their children; that the appearance of an English gentleman in the Courts of Europe, with a Governor of his own nation, will not be so rare and uncommon as it has hitherto been; and that your two Universities, thus refined and made more compleatly serviceable to the education of youth, by Your Majesty's most judicious and well-directed as well as liberal benefaction, will be able to furnish you with a constant supply of persons every way qualified for the management of such weighty affairs and negotiations as Your Majesty's occasions may require.

We most heartily beseech the Almighty to prosper this and all your great and glorious undertakings; that you may long live and reign, 'till you have received the fullest conviction that your Royal purpose has not been frustrated; but that this new Institution has proved (as your Princely wisdom intended it should) a real and national blessing.

Permit us farther, most gracious Sovereign, to testify our gratefull sense of two other distinguishing marks of your Princely favour so lately conferred on your two Universities; the charging your revenue with new salaries appropriated to 12 parsons, chosen out of each, as preachers in your Chapel of Whitehall, and your generous resolution of entitling to a share of such benefices as are within your Royal patronage, on the members of the two Universities. We scarce had time to congratulate one another on occasion of the two last-mentioned favours, when they were followed by that new and accumulated instance of your goodness, the erection of a new Professorship.

In return for such repeated obligations, we shall not fail to put up our incessant prayers to

God for the preservation of Your Majesty and your Royal family, and shall always endeavour to contribute in the best manner we are able to the tranquillity, peace, and good order of your Government.

Given at the University of Cambridge, in full Senate, the Nineteenth day of May, 1724.

Address of the Chancellor, Masters, and Scholars of the University of Cambridge in answer to the foregoing Article.

Mr. Harris's Appointment to the said Professorship.

GEORGE R.

GEORGE, by the Grace of God King of Great Britain, France. and Ireland, Defender of the Faith, &c., to all to whom these Presents shall come, Greeting: Whereas we have received a good report of the abilities, loyalty, prudent conduct, and sober conversation of our trusty and well-beloved Samuel Harris, Master of Arts, and We, being full satisfied thereof, have therefore nominated, constituted, and appointed, and do by these Presents nominate, constitute, and appoint him the said Samuel Harris to be our Professor of Modern History in our said University; to have, hold, exercise, and enjoy the said office for and during one whole year, to be computed from the day of his admission to the same by the Vice-Chancellor of our said University, with all rights, privileges, salaries, fees, profits, and advantages to the said office belonging or in anywise appertaining; and the said Samuel Harris is hereby required to do, execute, and perform all such acts, duties, matters, and things as are contained in the rules, statutes, and ordinances which We have thought fit to give relating thereto, by Letters-Patent under our Great Seal of Great Britain, bearing date at Westminster, the 28 September last past; And also to observe and follow such further rules and directions as We shall think proper to give under Our Signet and Royal Sign Manual, for his conduct in the due discharge of the said office of Our Professor of Modern History in Our University of Cambridge aforesaid, and for the further improvement of Our said Royal Constitution.

Mr. Harris's Appointment to the Professorship.

Given at Our Court at Kensington, the Twentieth day of October, 1724, in the Eleventh year of our Reign.

By His Majesty's Command, TOWNSEND.

[Taken from the original under Seal, and the King's own hand, viz., his name, by Mr. Baker. See his MS., vol. 30, p. 389.]

Samuel Harris, M.A., admissus Professor, October 26, 1724, per Doctorem Snape, Procan.—*Idem, Ibid.*

A Letter from Lord Townsend to the Vice-Chancellor, with the Patent for the Professorship of Modern History.

To the Rev. the Vice-Chancellor
of the University of Cambridge.

SIR, *Anno* 1724, 22 *October.*

THE King having, according to his Royal intentions, lately specified to your University, ordered a Patent to be passed for founding a Professorship for Modern History there, it is with the utmost pleasure that I now send you the instrument under the Great Seal.

Letter from Lord Townsend to the Vice-Chancellor, with the Patent for the Professorship of Modern History.

I make no question but that this instance of His Majesty's royal favour to your University will be highly acceptable to all the members of it, and meet with those returns of duty, loyalty, and affection, which it deserves from that seat of piety and learning. The King has always had it at heart, not only to protect and countenance his Universities, but also to give them some distinguishing marks of his great tenderness and concern for promoting their welfare. And I am persuaded you will be all very sensible that His Majesty, by founding a Professorship in each University for Modern History, and giving encouragement to the learning of modern languages, has not only put means into your hands of becoming more serviceable to the Public in several stations of importance, but also by his peculiar care in taking the young Students bred up under his Professors into his more immediate Royal inspection, has made it the concern of the Crown to encourage in an especial manner those, who by their application and diligence shall render themselves worthy of being advanced.

His Majesty, who has opened a new field to his two Universities, hopes that they will make a right use of his goodness to them, and that it will raise such a laudable spirit of emulation as will very much redound both to the advantage of the particular members, and to the credit and honour of the Universities in general.

I am, Sir,
Your most humble servant,

Whitehall, 22 *Oct.* 1724. TOWNSEND.

[From the Grace-Book of the University.]

The Answer of the University to Lord Townsend's Letter.

To the Right Hon. the Lord Viscount Townsend,
one of His Majesty's Principal Secretaries of State.

MY LORD,

YOUR Lordship having been pleased to accompany His Majesty's late Foundation of a Professorship in Modern History with a Letter from yourself, of the greatest civility and good-

The Answer of the University to Lord Townsend's Letter.

The Answer of the University to Lord Townsend's Letter.

ness to us, we beg leave so far to trespass upon your Lordship's time as to acknowledge the gratefull sense the University has of it.

Amongst the many advantages that must necessarily be the fruit of His Majesty's royal favour and bounty to us, we cannot but with the highest satisfaction observe, that a very great and considerable part of our English youth will, for the future, receive the whole of their education at home, and be bred up in the knowledge of our Constitution and love of their country, who before, for want of this provision, were obliged to repair to foreign Universities, which, neither for strictness of discipline nor good learning, we hope ever could or will be compared to these Royal and religious Foundations.

As we are very sensible His Majesty is pleased to distinguish his happy reign over us by acts of particular goodness to ourselves, and by a way unthought of by his Royal predecessors, we beg leave to repeat to your Lordship our profession of an inviolable duty and affection to his sacred Person and Government, which we rather do at this time, as believing that our profession of loyalty and duty to His Majesty is a way of returning our thanks to your Lordship in particular, that will be, of all others, the most pleasing and agreeable to yourself.

My Lord, we cannot but with the greatest pleasure consider that, among the many noble views your Lordship has daily before you, promoting and perpetuating the welfare of your country, your Lordship is pleased to allow so considerable a portion of your time and thoughts to the advancement of learning, and the prosperity of the two Universities.

Such plans as these cannot but endare your Lordship's name to all true lovers of their country and we beg leave to assure your Lordship of the utmost concurrence, on our parts, to second all these your Lordsbip's great intentions, and that we will leave nothing undone which is in our power, that the pleasure with which your Lordship sent us His Majesty's last Royal favour may receive a constant increase from the happy effects and growing successes of it.

We are, my Lord,
Your Lordship's most obliged and most obedient humble servants,
The Vice-Chancellor and the Senate of the
Cambridge, Nov. 23, 1724. University of Cambridge.

[Grace-Book of the University.]

Appointment of 15 *Scholars for studying Modern History.*

George R.

Appointment of 15 Scholars for studying Modern History.

George, by the Grace of God King of Great Britain, &c., to all to whom these Presents shall come, Greeting: We having received a good testimony of the proficiency in learning and good morals of John Redman, Charles Trimnel, and William Batty, of King's College; Walter Titley, John Snow, William Sandys, Pierson Lloyd, Samuel Edwards, and Peter Mallortie, of Trinity College; William Everard, Nathaniel Bacon, and Morley Unwin, of Queen's College; John Morgan, of St. John's College; Alexander Inglis, of Trinity Hall; and William Nash, of Peter House, in our University of Cambridge; do, by these Presents, nominate and appoint them to be 15 of our 20 Scholars for the studying of Modern History, and the learning of modern languages, in our said University. And We do hereby require them, the said John Redman, &c., to be obedient to our Professor of Modern History, and to the Teachers of modern languages in our University aforesaid, and likewise to do and perform all and singular the duties, matters, and things, which are directed to be done and performed by the Statutes and Ordinances relating thereunto, contained in our Royal Letters-Patent bearing date the 28 day of September last past: And this shall be, as well to our Professor of Modern History in our said University for the time being, as to all others whom it may concern, a sufficient warrant for receiving and admitting them, the said J. Redman, &c., to be 15 of our 20 Scholars aforesaid, and for instructing them in Modern History and modern languages, pursuant to the intent of our Royal Letters-Patent abovementioned.

Given at Our Court at St. James's, the Twenty-seventh day of February, 1724-5, in the Eleventh year of our Reign.

By His Majesty's Command, Townsend.

A like Instrument for John Dale, of King's College, Simon Patrick, of Catherine Hall, Staunton Degge, Isaac Hawkins, and John Clarke, of Trinity College, 31 May, 1725.

Extracted from the Registry of the Prerogative Court of Canterbury.

In the Will of Dame Mary Sadleir, (Wife of Sr Edwine Sadleir, Baronet,) deceased, dated 25th September, 1701, is as follows:—

Extract from the Will of Lady Sadleir about founding Algebra Lectureships.

And my further will is that my debts by me oweing at the time of my decease and my funerall charges, and the legacies hereby or hereinbefore by me devised or bequeathed, shall be first paid and satisfied by my said Executors before any of the Algibræ Lectures, Colledge of Phisitians, or Royal Society at Gresham Colledge Lectures be settled on them or any of them, notwithstanding the time or times hereinbefore for that purpose mencõned, limitted, or appointed for settling the same. And whereas my good friend, Mr. William Rous, one of my Executors hereinbefore named, hath as my Trustee acted and transacted severall great concerns for me and in my Estate, I doe hereby declare that all accompts are settled and evened between us to this day. And therefore I doe hereby, for me, my Executors and Administrators,

remise, release, and for ever quitt and acquitt him, his executors or administrators, of and from all manner of action or actions, cause or causes of actions, claimes, demands, and accompts whatsoever which I now have or hereafter may or can have against him or them, from the beginning of the world to the date of this my last Will. And I doe hereby heartily and really thanke him for his great trouble, care, and paines he hath had from and by me herein. And lastly, for that whereas in this my Will aforemencõned I have directed and appointed severall Lectures of Algibræ to be erected in the University of Cambridge; and I have given to and for their maintenance my Mannor, Lands, and Woods at Kimpson, in the County of Southton; as alsoe my moyety of Netham Tythes and Copyhold Estate at Pilehill, both also in the said County of Southton; and my Tavern known by the name of the Globe in Little Eastcheape, London. And for that whereas I have given and bequeathed severall annuityes for lives to be paid out of the said mannors of Kimpson and also the said Globe Taverne for the life of my said husband Sr Edwine Sadleir, which may for some time hinder the aforesaid Lectures to that number, that hereafter when the lives are extinct and dead, the said Estate may be able to maintain, and considering that before all the said lives may be expired, my said Executors may be all dead, and likewise to prevent long trouble to my Executors and also further charge to my Estate by the necessity, in case of death of the survivors nominateing new Trustees, Therefore I desire my Executors (any thing in this my Will to the contrary notwithstanding) or any two of them, if one shall be dead, at the expiracõn of the eighteene months aforemencõned in this my Will after my decease, for the beginning of the setting up of some of the said Algibræ Lectures, to erect or cause to be erected soe many Lectures on such Colledges as they shall see fitting for the present, which being done I then desire them to settle the severall Estates before given on such persons or Heads of Colledges and their successors as they shall on diligent enquiry thinke best for the future performance and perfecting my said intention. And they to whom the said Estates shall be conveyed unto are desired to increase the number of the said Lectures as the lives shall happen to dye and be extinct. And my earnest request and desire is that those persons to whom these Estates shall be conveyed doe punctually and without trouble pay the annuityes to the severall persons to whom I have devised the same free from all charges and taxes or other abatements or incumbrances whatsoever.

Extract from the Will of Lady Sadleir about founding Algebra Lectureships.

The first Schedule annexed to the said Will is as follows:—

The Instrument mencõned in the Will of me, Dame Mary Sadleir, the Relict of Dr. William Cronne and Daughter of John Lorimer, Esq., deceased, Alderman of the City of London, for the settling of the Algibræ Lectures on several Colledges in the University of Cambridge.

The true intent and meaning of these Lectures are for the full and clear explicacõn and teaching that part of Mathematical knowledge commonly called Algibraie or the method or rule of contemplating quantities generall with particular application and use of it in Arithmetick and Geometry, either according to the method of D Cartes or any other of those who have best improved it since.

What these Algibræ Lectures are.

The persons to read the said Lectures shall be at least of the Degree of Batchelor of Artes, of honest life and conversation, very well seeing and knowing in these parts of the Mathematics above mencõned.

Of the persons to read the said Lectures.

In each present respective Colledge (excepting always that of which the public Professor of the Mathematics is), and when a new public Professor shall be chosen of a College where one of these Lectures is, it shall be transferred to that of which the former Professor was, the Master and Fellowes shall meet together within eight dayes after notice that the settlement for these Lectures is made and finished; and afterwards within the same time after notice of the Lecture's place being void, either by death or otherwayes, and every one of the persons there met shall have freedome to nominate one of the same Colledge whom he in his conscience shall thinke fitt and qualyfyed as abovesaid, without favour or affection as he will answer it to God Almighty, and not betray the good end and intent of these Lectures. And if the persons soe nominated shall be above two, then by the ballot or otherwise they shall be reduced to two; and if there be not two of the same Colledge fitt to be nominated, then any of the nominators may name one or more of any other Colledge, provided after their election they remove and become of that Colledge in which they are to read.

Who shall nominate the said Reader, and how.

The persons nominated and agreed on to stand for Readers shall, in the presence of two of the Heads of the University, be carefully, strictly, and openly examined concerning their skill and sufficiency in the science they are to read and explaine, by the public Professor of the Mathematicks in the said University. And he whom the said Professor shall think and declare from his conscience most fit and able to performe the duty of the said Lecture effectually, shall be the person chosen to read it accordingly, and enjoy the salary and profitts to the same belonging. And it shall be required of him at the same time he is appointed to read the Lecture to make a solemn promise as in the presence of God, that he will carefully discharge and perform whatever is required in the method and orders for setling the said Lecture; and this promise shall be made in the presence of the Master and Fellowes of the Colledge who are to appoint him Reader of the said Lecture, whom the public Professor after the examinacõn aforesaid shall report most able and fitt for it.

Examinacõn of them who stand for Readers, and his promise that is to read it.

The duty of the said Lecturer shall be to explaine and teach the said science of Algibræ, and shew the use of it in Geometry and Arithmetick, and to render the same as clear and intelligible to every one of his audience as he can. To which end the said Lecture shall be read publickly in the Colledge Hall, in the Latine tongue during the time of one whole hour, from ten of the clock to eleaven in the forenoon, and the same day in the afternoon shall during the

The duty of the Reader and manner of reading the Lecture.

Extract from the Will of Lady Sadleir about founding Algebra Lectureships.

same time from three of the clock be more familiarly discoursed of and explained over againe, and doubts concerning any part of it be resolved in the Lecturer's own chamber, to be open on purpose at that time to all of the same Colledge that will come; and of both these hours of reading and explayning over again the said Lectures notice shall be given by ringing the Colledge bell. And those Lectures shall be to be read in the forenoone and further to be explained in the afternoon once aweeke; the which weekes and particular dayes of reading shall be those which the Masters and Fellowes of each particular College shall agree upon and appoint as most convenient, provided twelve severall Lectures be read in the forenoon and further explained in the afternoon, as before exprest on soe many severall weekes within the space of one yeare.

The penalty of not reading.

And for every time the said Lecture shall not be actually read in the morning and explained in the afternoon as aforesaid, either by the Reader himselfe, or in case of such sickness as in the judgment of able Phisitians doth make him incapable to perform it, which is the only excuse that ever shall be allowed, and that noe longer than one month, without substituting one other, or by some other able man, to be approved by the public Professor, and who shall for every Lecture receive the same money that would have been due to the Reader himself, there shall be deducted out of his salary each audit day so many proporc̃onable sum̃es due for each Lecture as there were Lectures omitted, of which respective omissions notice shall be then given by the Master or some of the Fellowes of the same College of which he is. The which money shall be given to some one or more Students of that Colledge, according to the discretion of the Master, especially such as love these studies. And if five omissions have been made (except as before) the Reader shall forfeit and lose his place.

The Lecturer to present three Lectures to the Colledge Library.

The Lecturer, or his substitute, shall each audit day deliver in three (or more if he please) of the six Lectures read the foregoing halfe yeare, fairely written, to be kept in the Colledge Library for the use of all such as may resort thither, or to be printed if he consent to it, and till they are so delivered he shall not receive that halfe yeare's stipend.

Noe Reader to continue more than ten yeares.

Noe person chosen to read the said Lecture shall enjoy this place longer than ten whole yeares; nor shall the public Professor of Mathematics ever be one.

To forfeit his place if debauch'd.

If any Reader shall be found guilty of any heynous crime or be of scandalous life, he shall be turned out of his place and another chosen in his room, unless there shall appear very great and sufficient reason to believe an amendment.

Interpritac̃on of any thing doubtfull.

If any doubt shall hereafter arise concerning the true meaning of any thing herein exprest, it shall be interpreted by the Trustees in that sence that may be the most advantageous for the fullest and most effectuall promoting the said Lectures.

The salary of each Lecturer.

Each Lecturer shall receive for his salary yearly twenty pounds, but to Emanuel Colledge Lecturer shall be allowed thirty pounds per annum, and to be first erected to be paid on the audit day, according to the limitac̃ons above menc̃oned, out of the rents and profitts of the Estates I have in my Will for that purpose given, and to erect soe many as the said Estates will hold out to doe, none exceeding twenty pounds as above, only Emanuel Colledge, some incident charges hereafter following being first deducted.

The Trustees of these Lectures.

There shall be every year two audit dayes, one within two months at the farthest after Lady Day, and the other within the same time after Michaelmas Day. On which dayes the Vice-Chancellor and Heads of the respective Colledges being mett together shall take an accompt of the due execuc̃on and performance of the matters and things aforesaid, if they are desired to be or hereby are to be Trustees for these Lectures. Likewise one of the public Readers by turns shall once in every year, at the most seasonable time for travelling, be obliged to take a view of all the Estate given for these Lectures, in the company of the Bursar, and make a report of the condic̃on all things are in to the Trustees, and this under the penalty of loosing one halfe yeare's salary if they refuse it in their turns unless for very good cause to be approved by the Trustees. The Boursers shall allsoe succeed one another yearly by turns under the same penalty. The said Trustees shall choose and appoint one of the aforesaid Readers as Bourser or Rent Gatherer accomptable to themselves (if the Estate for these uses given be settled and vested in the University), alloweing him out of the said rents five pounds per annum, to be paid half yearly when he brings in his accompts on the audite day or as they thinke fitt, not exceeding five pounds per annum. They shall likewise on each audit day allow and pay to the public Professor of the Mathematics ten shillings as a present for his care and pains for every person he examined, the halfe yeare aforegoing. They shall also out of the said rents on each audit day take for a decent refreshment of a dinner for themselves as they shall in discretion think fit, not exceeding five pounds.

And the Vice-Chancellor, just before the payment of the Lecturers' salaries, in the presence of the Heads of the University, and the public Professor, shall make a short discourse exhorting all then present to discharge their trust and duty with care and good conscience. It being hoped these studys of Algibræ which Peter Ramus long since complained were unhappily wanting in our European schooles and Universityes, now cultivated by the excellent witts of the University, will be much for the glory of Almighty God and the good of the Nation. Amen.

An addition which I further add to this my Instrument for the Algibra Lectures:

Since the making of the abovesaid Instrument on my further consideration of the severall parts thereof, and on further informac̃on and advice, I doe order that that part which relates to the choice of a Lecturer be altered as followeth, viz^{t}:

That in the choice of a Lecturer it shall not be done by all the Fellowes, but only by the Master, Vice-Master, Senior Deane, and Senior Lecturer of each Colledge, and they to nominate two, and the two so nominated by a majority of them to be examined by the Mathematical Professor, in presence of two Heads of Colledges to be named by the Trustees, and

the person whom the said Professor shall thinke and nominate to be most deserving to read these Lectures shall have it. And that the Vice-Chancellor for the time being shall for ever be a Trustee if my Executors shall thinke it fitting to settle the said Estates on or in the Members of the University.

Extract from the Will of Lady Sadler about founding Algebra Lectureships.

And if it shall be thought convenient instead of two audit days every year, I doe order but one; but this I leave as indifferent, and desire it may in future time be either one or two, as shall be best for the good management of the Estates belonging or to belong to the said Lectures.

And as to the travelling Lecturer, I order his charges to be paid out of the common stock what shall be thought convenient by the Trustees for his and his attendant's charges.

And if any thing in these Instruments shall hereafter be found doubtfull or not practicable, I do order my Executors, with the advice of those persons they shall think good to consult with, to explaine what is dubious or alterable, or what is necessary further for the good and better establishment of the said Lectures for ever. And what my Executors shall therein do or alter, I hereby order to be confirmed and to be binding to the persons concerned for ever.

Founded by Dame Mary Sadleir, Relict of Dr. William Cronne and Daughter of John Lorymer, Esq.

Chas. Dyneley, John Iggulden, W. D. Gostling, } *Deputy Registers.*

Orders concerning the Algebra Lectures founded by the Lady Sadler.

Orders concerning Lady Sadler's Algebra Lectures.

I. That the government, ordering, and direction of the said Lectures, and the several matters thereto belonging, subject nevertheless to the rules and orders herein contained, shall now, and at all times hereafter be and continue in the Vice-Chancellor of the said University of Cambridge for the time being, and his successors Vice-Chancellors of the said University, and in the present Masters or Heads of the several Colleges of the said University hereinafter mentioned; that is to say, the Master of Emanuel College, the Provost of King's College, the Master of St. John's College, the Master of Sidney College, the Master of Trinity College, the Master of Jesus College, the Master of Pembroke Hall, the Master of Queen's College, and the Master of St. Peter's College, and in their Successors, being Masters or Heads of the said several Colleges respectively, and that they shall meet for that purpose at such times and places as the Vice-Chancellor of the said University for the time being, or the said Master of Emmanuel College, or any two others of the said Governors shall from time to time direct or appoint.

II. That upon every occasion of meeting, due notice of the time and place thereof shall be given or left in writing at the said several Colleges for the respective Governors or Directors, at least by the space of twenty-four hours before every such meeting. All matters debated and transacted shall be carried and affirmed by the votes of the major part of them then present, so as they be not fewer than *three*, and shall be entered in some book or books to be kept for that purpose in Emmanuel College. And that in case the said *William Rous* shall, during his life, think fit to be present at any of the said meetings, then he to have a like vote and place there as Governor.

III. That the true end, intent, and meaning of these Lectures, is for the full and clear explicating and teaching the principles of the *Mathematicks*, and chiefly that part thereof called *Algebra*. And that from and after the 29th day of September, which will be in the year of our Lord 1710, the said Lectures shall commence and be settled in Emmanuel College and King's College in the said University; and that such person or persons being of the said Colleges as the said *William Rous* shall by any writing under his hand appoint, shall be the first or modern Lecturer or Lecturers or Instructors of the said science in the said respective Colleges. And that, as the lives shall fall and the estate be increased, the like Lectures shall begin and be settled in St. John's College, Sidney College, Trinity College, Jesus College, Pembroke Hall, Queen's College, and St. Peter's College, one after the other, in order as they are herein placed; the first named to be always preferred in course before the subsequent Colleges, and so remain for ever; subject nevertheless to the rules and directions herein mentioned.

IV. That if the said lands and premises shall at any time hereafter arise to a greater value, by increase of rent or profits of the woods or underwoods than will pay the Lecturers of the said several Colleges before-named, their respective yearly salaries, free of all charges except *Parliamentary* taxes, (of which each of the Lecturers is to bear his proportionable part), that then the said Governors and Directors for the time being, at the time of such increase, shall

Orders concerning Lady Sadler's Algebra Lectures.

and may settle and establish other Lectures of the like nature, subject to the rules and orders hereby agreed on, in such other Colleges of the said University as they shall judge most proper.

V. That the persons to be chosen Lecturers or Instructors shall be at least of the Degree of Batchelors of Arts, of honest life and conversation, and skilful in the several parts of the *Mathematicks*, to continue from their election for the space of *ten* years, or till their death, resignation, or removal from their respective College or Colleges, or other discharges as are hereafter mentioned, if the same shall sooner happen.

VI. That from time to time as the said Lectures shall begin, and be settled in any of the other Colleges before-named, and not at present provided for, then such person and persons being of the said College and Colleges as the said *William Rous*, shall at any time during his life, by any writing under his hand, nominate and appoint for that purpose, shall be the first Lecturer and Lecturers in every such College or Colleges, to continue as aforesaid; and in default of such nomination and appointment, then the said Governors for the time being, or the major part of them, shall and may at a meeting to be had for that purpose, nominate such first Lecturer and Lecturers, to continue as aforesaid, each College to be taken in course in the order before set down, and not otherwise.

VII. That at all times, on the expiration of the said term of *ten* years, or notice of the death, resignation, removal, or discharge of any such Lecturer or Lecturers, now, or at any time coming, to be chosen, elected, or named for the purposes aforesaid, the said *William Rous*, during his life, and after his decease, the Provost, Master, or Head of such College and Colleges wherein such vacancies shall be, or in his absence, his Deputy, shall always, within *fourteen* days then next and immediately following, elect and choose one or more person or persons of the said College the best qualified for the said Lecture; or if there be none of the said College fit to be nominated, then one or more of any other College, provided that, in case of election, the person so chosen remove and become of that College wherein the said Lecture is to be read; which person and persons so named shall, within *twenty-one* days after the said nomination, be carefully, strictly and openly examined touching his and their skill and sufficiency in the said science, by the *Public Professors* of the *Mathematicks* or *Astronomy* of the said University, or *one* of them, or by such other person or persons qualified in the said science, (as the Governors and Directors for the time being, or any *three* of them, shall call to their assistance), in the presence of *three* or more of the said Governors; and such of them as shall, upon such Examination, appear to the said Governors for the time being, then present, or the major part of them, to be most fit and able, shall be declared Lecturer, and enjoy the salary and profits thereunto belonging.

VIII. That such Professors, or other person or persons so to be chosen to examine, as aforesaid, for every Examination shall have and receive of the person so chosen the sum of *ten shillings* for his trouble and attendance therein.

IX. That such person so chosen shall before any Lecture read, in the presence of the said Governors for the time being (or any *three* of them) make and subscribe a solemn promise, in writing, to be prepared for that purpose, that he will diligently and carefully perform his duty in the said Lecture, and observe the several orders and directions in these presents established for that purpose.

X. That the duty of the said Lecturer shall be to explain and teach the principles of the *Mathematicks*, and chiefly that part thereof called *Algebra*, in as clear and intelligible a method as possible; and to that end every such Lecturer shall, at least *once* in each of the *three Terms* commonly holden in the said University, on such days as shall be appointed to him, hold a Public Reading in the hall of his respective College, in the *Latin tongue* (or otherwise as the said Governors, or any *three* of them shall direct), by the space of one whole hour from *nine to ten* of the clock in the forenoon, and also the same day in the afternoon in his own chamber, to be open for that purpose during the space of one hour, from *one to two* of the clock, more familiarly discourse of and explain the same again to all of the said College who shall then attend there, and resolve the doubts arising, or which shall then be proposed to him in relation thereto; of both which hours notice shall be given by ringing of the College bell.

XI. That the Provost, Master, or Head of each College, or his Deputy in his absence, shall the first day in every Term fix and appoint the several days as well for holding the said Lecture as teaching the said science for that Term; which appointment shall be put into writing, and one fair copy thereof set up in the public hall of each College, and one other copy delivered to the Vice-Chancellor of the said University for the time being; and the Lecturers for the respective Colleges are to take notice of the day so appointed, and to perform their duties thereon, on the penalties hereinafter mentioned.

XII. That every Lecturer shall twice in each week, on the days appointed to him for that purpose, during the whole continuance of each of the said *three* University Terms, according to the computation therein used, (save such week wherein the said Lecture shall be read as aforesaid), by the space of one hour or more, from *nine to ten* of the clock, at his chambers, teach and instruct in the said science all such Students of the same College as shall repair to him for that purpose, and therein shall behave himself affably and courteously, and not deter or discourage any from coming to him on any account or pretence whatsoever.

XIII. That, upon failure of reading the said Lectures or of attending the teaching and instructing the said Students as aforesaid, by the space of *two* whole Terms, in any of the Colleges wherein the said Lectures are, or shall be erected or settled, such College or Colleges permitting, suffering, or conniving at such failure, without discharging such Lecturer offending therein, and electing a new one in manner aforesaid, shall from thenceforth and immediately forfeit and lose the benefit, privilege, and advantage of the said Lecture, and of the continuance thereof any longer in such College or Colleges, and the allowance, salary, and profit belonging

thereto shall from thenceforth utterly cease and determine; and in such case the said Governors for the time being shall and may, within one month next ensuing the end of the said *two Terms* (at a meeting to be had for that purpose) settle the said Lecture in some other College of the said University, as they shall think fit, subject to the rules, orders, and directions herein: and if all the Colleges before-named shall not be provided for, then the first of such Colleges, in the order aforesaid, shall have the said Lecture so ceased and determined. Orders Concerning Lady Sadler's Algebra Lectures.

XIV. That for every time the said Lecture shall not be actually read in the morning, and explained in the afternoon, or that due attendance shall not be given for teaching the said science as aforesaid, except in case of real sickness and disability, certified under the hand of some practising Doctor in Physick, or of some extraordinary occasion, to be allowed of by the Master, Provost, or Head of each respective College under his hand, (which are the only excuses that shall be ever allowed), there shall be deducted out of the salary of each Lecturer offending therein on every audit day for each Lecture omitted, the sum of *forty shillings*, and for every day wherein he shall not give due attendance for instructing the said Students, the sum of *ten shillings*, the said sums so forfeited to go and be disposed of to *one* or *more* of the poor Scholars loving the said study, at the discretion of the said Governors then present (or the major part of them), and if omission shall have been made herein by the space of one whole *Term*, (except in case of sickness or extraordinary occasion allowed of as aforesaid), each Lecturer so offending shall from thenceforth immediately forfeit and lose his place, and be for ever incapable to be named or chosen again to the same Lecture, either in that or any other College in the said University on any account or pretence whatsoever.

XV. That in case of real sickness or extraordinary occasion testified as aforesaid (and not otherwise) every such Lecturer may substitute in his place some other able person, to be approved by the public Professors of the *Mathematicks* or *Astronomy* of the said University, or one of them; or in default of them, by any other person or persons skilful in the *Mathematicks*, to be testified under his or their hand or hands to the Provost, Master, or Head of such respective College or Colleges, or his Deputy; which person shall receive for every Lecture and Teaching the same money as would have been due to the Lecturer himself; and in default of such substitution, in case the said sickness or disability shall continue, so as that the Lecture and times of teaching shall be omitted by the space of one month, then such Lecturer shall from thenceforth lose his place and all the benefit thereof or thereby.

XVI. That by and out of the said Estate and the profits thereof there shall be paid and allowed to the said Lecturer in *Emmanuel College thirty pounds per annum*, and to the several Lecturers in the said other Colleges wherein the same is or shall be settled, *twenty pounds per annum* a-piece, to be paid on the audit-day in each year, subject nevertheless to their respective proportions of the *Parliamentary taxes* and other necessary charges to which the Estate is or may be liable, and other limitations as aforesaid. And so as every such Lecturer shall, before the audit-day, deliver and give in two copies fairly written of two such Lectures as aforementioned, read by him in the foregoing year, to the Vice-Chancellor for the time being, or to the Master of Emmanuel College, to be shown to the Governors present at such Audit; one of which copies shall be deposited by the Vice-Chancellor in the University Library, and the other in the Library of the respective College wherein he shall be Lecturer, and do then also produce a certificate under the hand of the Master or his Deputy, signifying the number of the said Lectures by him read, and of the attendance by him given for teaching the said science in the foregoing year, to the end it may be known what omissions have been made therein or otherwise, and in default of either of the matters aforesaid, the said year's salary to be forfeited, and to go and be paid to and amongst the other Lecturers not offending therein, share and share alike.

XVII. That in case any of the said Lecturers during the time of their continuance in the said place shall happen to be chosen one of the public Professors of the *Mathematicks* or *Astronomy* for the said University, and shall accept thereof, then the place of such Lecturer, from and immediately after such acceptance, shall be, and is hereby declared to be void, and another Lecturer shall be chosen thereto in the manner hereinbefore appointed.

XVIII. That if any of the said Lecturers shall prove of ill life and conversation, or guilty of any notorious crime, immorality, or of maintaining or defending any doctrines or opinions contrary to the religion of the Church of England as by law established, then in any of the said cases, the Master or Head of such College in which he shall be Lecturer as aforesaid, or his Deputy, or in their default, the said Governors, or any *three* of them to be assembled for that purpose, shall and may discharge such person of and from his place and office of Lecturer, and another shall be chosen in his room in the manner aforesaid.

XIX. That for the better management of the manor, lands, and premises devised as aforesaid, the said Governors and their successors shall and may from time to time appoint such person and persons as they, or the major part of them, shall think proper to be receiver of the rents, issues, and profits of the said premises, and to take care of the said woods, and to transact their affairs in the said County of *Southampton*, or elsewhere, and also one of the said Governors or Lecturers, or other fit person to be *Treasurer* or *Bursar* of the said profits. But so as such *Treasurer* or *Bursar* and *Receiver* respectively do and shall give good security unto the said Governors or any *three* of them, by bond or otherwise, in penalty of *two hundred pounds* at the least, for his duly accounting for and paying from time to time the said rents, issues, and profits to the Governors herein mentioned, for the uses and purposes hereby directed, and no other.

XX. That the said Governors shall yearly, within the space of two months next after the 29th of September in each year, or at such other time or times in the year as any *three* of them shall agree on and appoint, and thereof give notice to the parties concerned, meet together at *Emmanuel* College on a day to be appointed by the Vice-Chancellor of the said University

Orders Concerning Lady Sadler's Algebra Lectures.

or the Master of *Emmanuel* College for the time being, to take the account and audit of the said *Receiver* and *Treasurer*, and to pay the said Lecturers their respective salaries and allowance, and all other charges hereby directed to be paid, and to hear and determine all matters relating to the said Lectures and Estate, according to the rules and directions hereby given, and to see the same effectually paid and performed according to the true intent hereof.

XXI. That at every audit these rules, orders, and directions shall be distinctly read in presence of the said Governors, and that there shall be allowed out of the said Estate a sum not exceeding *four pounds* for a dinner and all other charges of the said day.

XXII. That the deeds, evidences, and writings relating to the said Estate, shall from time to time be kept and deposited in the library of *Emmanuel* College, in an iron chest with three locks thereto, the keys whereof shall be and remain one of them in the hands of the Vice-Chancellor of the said University for the time being, one other in the hands of the Master of *Emmanuel* College, and the third in the hands of the Provost of King's College, and their Successors.

XXIII. That the several Governors to whom the said Estate shall be conveyed for the uses aforesaid be the present Master or Head of *Emmanuel* College, the Provost of King's College, the Master of St. John's College, the Master of Sidney College, the Master of Trinity College, the Master of Jesus College, the Master of Pembroke Hall, the Master of Queen's College, and the Master of St. Peter's College; and that when and so often as they shall be reduced by death to *five* or *three*, that then the survivors shall convey the same to the succeeding Heads of the said several Colleges, so that the said number of *Trustees* may always be kept of the number of *nine* at the least.

XXIV. That in case any of the family, kindred, or relations of the said Dr. *William Croone** shall happen to be of any of the said Colleges afore-named, or of any College in the said University wherein any of the said Lectures before-mentioned shall then be erected or settled, in pursuance of these presents, and shall upon examination be found fitly qualified for the reading and performing the said Lecture, then such person or persons to be preferred before any other to such vacant Lecture, and shall be elected and chosen thereto by the said *Trustees*, and shall hold and enjoy the same and all the profits, benefits, and advantages thereto belonging, subject to the orders, rules, and directions hereinbefore contained, as the other Lecturers are to do by virtue hereof.

That these several orders be fairly written or printed, and being put into a frame, be hung up in the several libraries of the respective Colleges wherein the said Lectures are to be read.

(*In Dorso.*)—Lady Sadler was the relict of Dr. Croone, who was Fellow of Emmanuel College, and desired her to settle these Algebra Lectures at her death; which she did by Mr. Wm. Rouse, Apothecary, in London, her executor. But we have nothing of Sir Edwin Sadler, whom she married, nor do we know where to apply to for information.

These 'Orders' are in the Cole Collection of MSS. in the British Museum, No. 6209, f. 18, entitled "*Letters of Learned Men to Professor Ward.*"

Copy of the last Will of Will^M. Worts, Esq^R.

[*Addit. MSS. Mus. Brit.*, 5810, *pp.* 189—192.]

Will of W. Worts, Esq.

In the Name of God, Amen. I William Worts, of Cambridge, in the County of Cambridge, Esqr., being of a perfect, sound, and disposing Mind and Memory, doe make this my last Will and Testament, in manner and Form following:

In the first place I commit my Soul to Almighty God, humbly hopeing for Salvation through the infinite Mercy of God, and Merits and Mediation of Jesus Christ my Redeemer; and my Body to be decently buried by my Executrix hereafter named. I give and bequeath to Carolina Banson, the Wife of John Banson of Meesden in the county of Hartford, an annuity of 30*l.* a-year during her life, in case she survives her said Husband, and not otherwise, to be paid her by my Executrix, by the proportion of 7*l.* 10*s.* every Quarter day following, viz.: on the Feast of the Annunciation of the Blessed Virgin Mary, the Feast of St. John the Baptist, St. Michael the Archangel, and St. Thomas the Apostle; the first payment thereof to commence on such of the said Quarter-days next succeeding the death of her said Husband: and all the said Payments to be made constantly at the place and the residence of the said Carolina Banson: and I charge all my arable Lands, late in the tenure or occupation of the Widow Chapman of Landbeche in the said County of Cambridge, with the said Annuity, that in case of failure in the payment thereof, it shall and may be lawfull for the said Carolina Banson to enter upon, possess and enjoy the said lands as if originally devised to her for her life. Item, I give and bequeath to Elizabeth Saville, the Wife of Saville of Langley in the County of Essex, an Annuity of 20*l.* a-year during her life, in case she survives her said Husband, to be paid by my Executrix, at the usual place of her abode, by 5*l.* on each of the Quarter days, before mentioned, the first payment thereof to be on such of the said Quarter days as shall next succeed the death of her said Husband: and I charge with the said Annuity all those my Pasture Grounds, with the Messuage, Tenement and Sheep-Walk, with the Appurtenances, late in the tenure or occupation of the said Widow Chapman, and that it may and shall be lawfull for the said Eliz. Saville, in case of failure in the payment of the said Annuity,

* First husband of the Lady Sadler, by whose advice she founded these Lectures. (On a label pasted in the margin).

to enter upon, possess and enjoy the said Messuage, Pasture, Tenement, and Sheep-Walk, with their Appurtenances during her life, as if they were so originally devised to her. Item, I give and bequeath to my Cousin Smith, the wife of John Smith of Wivelingham in the County of Cambridge, the like Annuity of 20*l.* a-year during her life, to be paid her by my Executrix, in such manner and form as the aforesaid Annuity to Eliz. Saville; and I charge with the said Annuity to my said Cousin Smith, all those my Arable Lands now in the tenure or occupation of John Penny of Landbeche aforesaid, so that in case of failure in the payment of the said Annuity, it shall and may be lawfull for my said Cousin Smith, to enter upon, possess, and enjoy the said Lands dureing her life, as if originally so devised to her. Item, I give and bequeath to my old Maid, Margaret Brett, 20*l.*, to be paid six months after my death. Item, I give and bequeath to Anne Garrett, Bedmaker of King's College in Cambridge, an Annuity of 5*l.* a-year dureing her life, to be paid Quarterly by my Executrix, by equal portions on the 4 Quarter days herein before mentioned, the first payment thereof to become due and payable on such of the said days as shall next happen after the said Anne Garrett shall be of the age of threescore years; and I will and appoint that my Executrix give her a Bond of 200*l.* within a month after my decease, for the security of the payment of the said Annuity. Item, I give and bequeath unto the said Margaret Brett, over and above the 20*l.* already given her, an Annuity of 20*l.* for her life, in case she survives her Husband Henry Brett, of Cambridge aforesaid, Barber, to be paid by my Executrix, in manner and form like that bequeathed to Elizabeth Saville; and I charge with the said Annuity my Messuage, Pasture-Ground and Sheep-Walk, with the Appurtenances, now in the occupation of John Penny aforesaid of Landbeche, so that in case of failure of the payment thereof, it shall and may be lawful for the said Margaret Brett, to enter upon and enjoy the Premises hereby charged with the payment thereof, as if they had been originally devised to her for her life. Item, I give and bequeath all those my Messuages, Lands, Tenements, and Hereditaments, with their Appurtenances, now in the tenure or occupation of Michael Walker of Landbeche aforesaid, both Freehold and Copyhold, to my Aunt Daye, for and dureing the term of her natural life, chargeable nevertheless with the payment of 30*l.* a-year to my Aunt Elizabeth Reeves, to be paid her by my Aunt Daye, during the life of the said Anne Daye, the first payment thereof to be be made on Michaelmas day after my Decease; and in case of failure of payment of the said 30*l.* a-year in manner aforesaid, it shall and may be lawful for the said Elizabeth Reeves to enter into the said Messuage, Lands, and Premises, now in the tenure or occupation of the said Mich. Walker, and them to hold, to take, and enjoy the Profits thereof to her own use, as if they had been originally devised to her for her life; and in case the said Elizabeth Reeves shall survive the said Anne Daye, then I give and bequeath the said Messuage, Lands, and Premises, now in the tenure or occupation of the said Mich. Walker, to the said Elizabeth Reeves, for and during the term of her natural life. Item, I give and bequeath to my Uncle, Mr. Robert Daye, of Thurlow in the County of Suffolk, Apothecary, an Annuity of 20*l.* a-year during his life, to be paid by my Executrix quarterly, by equal portions, in such manner and form, as the Annuity hereinbefore bequeathed to Eliz. Saville, is appointed to be paid, except that the first payment hereof is to commence on such of the said Quarter days as shall first happen after my death: and I do also appoint my Executrix within three months after my death, to give the said Robert Daye a Bond in the penall sum of 400*l.* for the due payment of the said Annuity to him bequeathed. Item, I give and bequeath to the two youngest sons of my Uncle, Robert Daye aforesaid, the sum of 50*l.* a-piece, to bind them out Apprentices: and I will and appoint, and give 100*l.* a-piece afterwards to set them up withal, if they behave themselves as well as they ought to do, in their Apprenticeships; and I will and appoint that my Executrix have the sole disposal of them therein. Item, I give and bequeath to my said Aunt Reeves, over and above what is herein already given to her, the sum of 20*l.* to buy her mourning, and to be paid her within a month after my decease: and she shall have the choice of any Piece of my Plate, or any of my Rings, to keep in remembrance of me. Item, I give to my Cousin Christian Hutton the sum of 20*l.* Item, I give to my Godson, Wm. Banson of Langley, 10*l.* Item, I give to Dr. Penrice of Trinity Hall in Cambridge, the sum of 100*l.* for his great civility to me, and care in my affairs. Item, I give unto my servant Mary Foreham, the sum of 20*l.* Item, to Jane Smee, and Richard Challis, my other two servants, the sum of 5*l.* a piece. Item, I will and appoint, that my Executrix prove this my last Will and Testament in the Vice-Chancellor's Court of the University of Cambridge, within a month after my decease, and that she there and then deliver in upon oath, a true and perfect particular and valuation of all the Lands, Moneys, Bonds, Mortgages, and Debts owing to me from private persons, and from the Exchequer. And as for my real Estate in Landbeche herein before not disposed of, with my two houses in King's College Lane, I also give and devise the same to my said Aunt Daye, for and during the term of her natural life, subject nevertheless to, and charged with the Annuities or Rent-charges hereinbefore devised. And I also will and appoint that my said Aunt Anne Daye shall every year, during her life, by equal quarterly payments, pay the sum of 30*l.*, without any deduction of Taxes by Parliament or otherwise, to the use of the poor children, which now are or shall hereafter be taught in the several schooles in Cambridge aforesaid, commonly called The Charity Schools, lately set up chiefly by the care of the pious and learned Mr. Whiston, the first payment to be made on such of the Quarter days abovementioned, as shall next happen after my death: the said payment, and all the subsequent payments to be made to the person, who, for the time being, collects the subscriptions to the said Schools, and the said 30*l.* a-year, to be applied in the same manner as the money collected from the said subscriptions is, and shall be applied. And from and after the decease of the said Anne Daye, and as to what is before given to my Aunt Reeves, in case she survives my said Aunt Daye, in such case as to that, after the decease also of my said Aunt Reeves, then

Will of W. Worts, Esq.

I give, devise, and bequeath all my Manors, Messuages, Lands, Tenements, and Hereditaments in Landbeche aforesaid, and also my two houses in King's College Lane, to Dr. Roderick, Provost of King's College; Dr. Bentley, Master of Trinity College; Dr. James, Master of Queen's College; Dr. Covell, Master of Christ's College; and Sir John Ellis, Master of Gonville and Caius College in Cambridge; and their Heirs and Assigns for ever; nevertheless upon such special trust and confidence in them reposed, as shall be herein declared after concerning the same. Item, I give and bequeath unto the said four Doctors and Sir John Ellis, the sum of 3,000*l.*, to be paid them by my Executrix, within six months after my death, in ready-money, or by assignment to them of any of my Mortgages, Tallies, or Orders or in any other manner as to them shall seem good and effectual payment; upon such special trust and confidence nevertheless reposed in them as shall be hereinafter declared concerning the same: That is to say, as for and concerning the said 3,000*l.* upon this special trust and confidence, That the said four Doctors and Sir John Ellis, or the survivors of them, or the Executors or Administrators of the survivor of them, out of the Interest Money and Improvement made thereof, shall, in the first place, pay or cause to be paid unto my said Aunt Anne Daye every year during her natural life the sum of 150*l.* at two payments in the year, that is to say, on the Feast of the Annunciation of the Blessed Virgin Mary, and on the Feast of St. Michael the Archangel, by equal portions, the first payment thereof to be made on such of the said Feasts as shall next happen after I have been dead a full year: and from and after the decease of my said Aunt Daye, then, as well concerning my real Estate in Landbeche and King's College Lane, and also my personal Estate, which I have devised to the four Doctors and Sir John Ellis, and the Trusts thereof, I do hereby declare and appoint, That they, or the survivors of them, or the Executors or Administrators of the survivor of them, so long as the said Charity Schools shall endure and be kept up in any reputation, shall, in the first place, constantly pay the said sum of 30*l.* a year to their use, in such manner as my said Aunt Anne Daye is herein before appointed to pay the same; and also all the Annuities herein before by me given that shall remain due and payable after the death of my said Aunt Anne Daye, except those that I have obliged my said Aunt to give bond for. In the next place I appoint and desire that the annual income both of my said Lands and Money and the Improvement thereof, be managed to the best advantage till the sum of 1,900*l.* be raised therefrom, with which I desire that with all convenient speed after the same is so raised, Galleries be built in Great St. Mary's Church in Cambridge, for the use of the Batchelors of Arts and Undergraduates in the University, that they may the more decently and conveniently hear the Sermon. And when these Galleries are finished, I appoint and desire, as soon as another 1,500*l.* can be raised out of the annual income of my said Lands and Money, and the Improvements thereof, that it may be applied to the making a Calcey or Causeway from Emmanuel College to Hogmagog, *alias* Gogmagog Hills; and I desire, if there be occasion, that an Act of Parliament may be procured for the making and securing that Road; and that when it is finished, I desire that 40*l.* a year be laid aside for the maintenance and repairs of that and the said Galleries in St. Mary's Church, and expended from time to time as there shall be occasion, in such proportions to each as the Trustees or major part of them shall think fit; and as soon as the said Galleries are finished, I further appoint and desire, That there be allowed annual Pensions of 100*l.* a year each to two young Batchelors of Arts, who shall be sent into foreign countries soon after they have taken that Degree, and shall continue there for the space of three years, but be obliged to take different roads, as they shall be appointed by the said Trustees, or the major part of them. They shall each of them likewise be obliged to write once in a month a letter in Latin to the Vice-Chancellor of the said University, who shall communicate them to the Regent-House, and leave them fairly written to be lodged in the Public Library among the MSS. there. In those letters they shall give an account to the University of the religion, learning, laws, politicks, customs, manners, and rarities, natural and artificial, which they shall find worth observing in the countries through which they pass. They shall be chosen out of two different Colleges: they shall begin with King's and Trinity, each of which shall present two young Gentlemen to the Congregation, which shall choose one out of each of the two Colleges. The rest of the Colleges shall take it by turns to present in the same manner in the order as they do for the choice of Proctors, as often as there shall be occasion to supply the place of them, or either of them, by reason of death or return into their own country: And my Will is, that these Pensions shall be continued but for the space of three years. The Master in every College shall present, and at the presentation of them shall be obliged to take the following Oath, which shall be read to him by the Senior Proctor in the Regent House, before the University, at a Congregation:—

Dabis fidem almæ Matri Academiæ, quod tu probè noveris religionem, mores, et doctrinam juvenum, quos modò præsentasti, et eos sanè dignos existimas, quos foras emittat Alma Mater; Sic te Deus adjuvet.

The residue and overplus of what I have given to the said four Doctors and Sir John Ellis, after these things are performed, and all reasonable expenses have been allowed for the management of all matters relating to this my Will, I desire may be applied to the use of the University Library. And my further Will and desire is that when any two or more of the Trustees shall be dead, then the surviving Trustee shall assign and convey all the said Lands and Moneys remaining in them, by virtue of this my Will, to some person or persons, and their heirs, to the use of them the surviving Trustees, and of some other fit persons such as they shall choose or name to be Trustees with them, to make up the number of five, and of their heirs for ever, upon trust for the further performance of this my last Will and Testament. And then my Will is, that the old and new Trustees, and the survivors of them, shall, to all intents and purposes have the same power and authority, and be in the place of my said

Trustees, Dr. Roderick, Dr. Bentley, Dr. James, Dr. Covell, and Sir John Ellis, as if they were all living: and that from time to time, as often as there shall be occasion, the surviving Trustees, two or more of their number being dead, shall take the like course as aforesaid, to make up the said number with other fit persons, who shall successively for ever have the same power and authority to perform this my Will. Lastly, I give all the Money in the purses for the poor, to make up what is lost from St. Mary's Parish, in my Grandfather Daye's gift. All the rest and residue of my Goods, Chattels, and personal Estate whatsoever herein before not disposed of, my debts, legacies, and funeral charges being first paid, I give and bequeath to my said Aunt Anne Daye, to her own proper use; and I make her the full and sole Executrix of this my last Will and Testament; hereby revoking all former Wills and Testaments by me at any time heretofore made, publishing and declaring this to be my last Will and Testament. In witness whereof, I have to this my Will, consisting of five sheets of paper, set my hand to every sheet, and my hand and seal to the last sheet thereof, the one and twentieth day of June, in the eighth year of the reign of our Sovereign Lady Anne, by the Grace of God of Great Britain, France, and Ireland, Queen, Defender of the Faith, &c., and in the year of our Lord God 1709. Will of W. Worts, Esq.

WILLIAM WORTS.

Signed, sealed, published, and declared by the within-named WILLIAM WORTS to be his last Will and Testament, in the presence of us, who all subscribed our names as Witnesses thereto in his presence.

Proved in the Vice-Chancellor's Court of the University of Cambridge, 10 Aug., 1709.

Memorandum.—The original Will was delivered again to the Executrix, according to the Vice-Chancellor's Decree, to be proved in the Prerogative Court of Canterbury.

MR. TANCRED'S BENEFACTION TO CHRIST'S AND CAIUS COLLEGES, &c.

[Cole's MSS., Brit. Museum, 5820, ff. 1506-1546.]

Mr. Tancred's Deed of Settlement.

WHEREAS by a Settlement or Indenture of Lease and Release, bearing date respectively the 1 and 2 days of June, 1721, made between Christopher Tancred, of Whixley, in the county of York, Esq., of the one part, and the Rev. Josiah Cockshut, Thomas Cartwright, and Benjamin Dowse, Clerks, Fellows of Christ's College, Cambridge, of the other part, the said Christopher Tancred, for and in consideration of the affection which he bore to his Manor-house of Whixley (the place of his own birth, and seat of himself and family for a long series of time), and being desirous that his estate there, so compact in its situation, and so commodious by the improvements made at the expense and industry of himself and ancestors, should never be dismembered by a distribution amongst heirs females, but that the same should be enjoyed by the heirs male of his own body, as long as any such should be, by which the said estate would be kept entire, both in his name and blood; and upon failure of such issue male, should be vested in the Trustees therein after named, for the use, &c., in consideration of Ten Shillings unto the said Josiah Cockshut, &c., did grant, &c., and to their Heirs, all the Manor and Manor House, &c., together with the rectory of Whixley aforesaid, and the right of patronage or perpetual Advowson of the said Parish Church, &c., with all other lands, tenements, hereditaments, &c. (in full form), to hold, &c., to the uses and for the purposes therein mentioned (that is to say), to the use of the said Christopher Tancred, for his life, and immediately after his death to the use of the first and every other son of his body, lawfully begotten, successively, and the heirs male of their respective bodies: And in default of such issue, for the use of the Master of Christ's College in Cambridge; the Master of Gonville and Caius College in Cambridge; the President of the College of Physicians, London; the Treasurer of the Society of Lincoln's Inn, London; the Master of the Charter House or Sutton's Hospital, London; the Governor of the Royal Hospital of Chelsea in the County of Middlesex; and the Governor of the Royal Hospital of Greenwich, in the County of Kent, and their Successors to the said places for ever, upon trust and confidence, that they should, out of the yearly rents and profits of the said Manor and hereditaments, pay, or cause to be paid, yearly for ever, by equal payments, half-yearly, viz., at the Feast of Pentecost and St. Martin the B., in winter, 50*l.* apiece to 12 young persons of 16 years of age, or more, when admitted to the said charity (natives of Great Britain, of the religion of the Church of England, and of such low abilities as not to be capable of obtaining the education directed by the said Settlement without the assistance of such a charity as is thereby given), 4 of which said 12 persons should be educated in the study of Divinity in Tancred's Benefaction to Christ's and Caius Colleges.

Tancred's Benefaction to Christ's and Caius Colleges.

Christ's College in Cambridge, and 4 other of them in the study of Physic, at Gonville and Caius College in Cambridge, and 4 other of them in the study of the Common Law at Lincoln's Inn, London. Which said sums of 50*l.* yearly apiece should be paid to the said 12 persons till they should have taken their respective Degrees of B.A., M.B., and Barrister of Common Law; and also 3 years after they should (*i. e.* shall) have taken such Degrees as aforesaid, and no longer; and that the said 12 persons should ever be styled Tancred's Students. And the first election of the said 12 persons, and as often as any vacancy or vacancies should happen in the said number, should be made by the Trustees aforesaid, and their Successors, or the major part of them, within 28 days after the said Charity should take effect, or that the whole number, or any part of the said Students should afterwards become vacant; and which said Trustees and their Successors should assemble in the Common Dining Hall in Lincoln's Inn for that purpose, and cause each respective election of any of the said 12 Students to be registered in a book, to be kept amongst the Records of the said Society. And upon this further trust and confidence also, that the said Master of Christ's College, the said Master of Gonville, &c., and their Successors, as aforesaid, should, out of the yearly profits, &c., of the said Manor and Hereditaments, cause to be paid yearly for ever, by equal payments, half-yearly, at the said 2 Feasts above-mentioned, 20*l.* apiece to 12 decayed and necessitated Gentlemen, Clergymen, Commission Land Officers, or Sea Officers, of 50 years of age or more, when admitted to the said Charity (natives of Great Britain, and of the religion of the Church of England); which said 12 persons should for ever reside in Whixley Manor House, in the method therein mentioned, viz.: The said Trustees and their Successors, as aforesaid, should, from time to time, hire a cook to reside in the said Manor House of Whixley, and should allow to such cook a yearly sum not exceeding 8*l.*, for the board of each of the said 12 persons, and should pay and allow a yearly sum not exceeding 3*l.* apiece to three maid servants, who should attend upon the said 12 persons in the said Manor House; and which said sums for board and servants should be deducted equally out of their respective sums of 20*l.* a year; and that such of the said 12 persons as should refuse to reside in the said Manor House of Whixley, should be incapable of receiving the said Charity, and another person or persons should be chosen in the room of such as should refuse. And that the said Manor House, immediately after the said Charity should take effect, should be ever styled Tancred's Hospital, and the said 12 persons, Tancred's Pensioners. Elections to be made of these in the same place and manner as before prescribed for the Students. And upon this further trust and confidence, that the said Trustees and their successors, as aforesaid, should, out of the yearly rents and profits of the said Manor, &c., pay or cause to be paid, by equal payments, half-yearly, at the said 2 Feasts, 10*l.* yearly for ever, to the Master, and 5*l.* yearly for ever to each of the 13 Fellows of Christ's College in Cambridge, upon the Foundation of Margaret, Countess of Richmond, and King Edward the C., as a perpetual augmentation to the respective Mastership and Fellowships of the said College. And upon this further trust and confidence also, that the said Trustees, &c., should yearly appoint one of the 4 Students in Divinity at Xt's College in Cambridge, one of the other 4 Students in Physic at Caius College in Cambridge, and one other of the 4 Students in the Common Law in Lincoln's Inn, London, upon the anniversary of the death of the said C. Tancred, to make speeches in Latin in the Public Halls of the said 2 Colleges, and Hall of Lincoln's Inn aforesaid, in perpetual remembrance of the said Charity. And upon this further trust and confidence also, that the said Trustees shall, out of the yearly rents, &c., pay, &c., yearly for ever, by equal and half-yearly payments, at the 2 Feasts aforesaid, 10*l.* to the Curate of the Parish of Whixley aforesaid, for which said yearly salary of 10*l.* the said Curate shall every morning and evening at 6 o'clock read prayers to the said 12 pensioners in the chapel of Whixley Manor House aforesaid, and should also yearly preach a sermon in the said chapel on the anniversary of the death of the said Chr. Tancred, in perpetual remembrance of the said Charity. And upon this further trust and confidence, that the said Trustees, &c., or the major part of them, should, from time to time, appoint a fit person to collect the whole of the yearly rents, &c., and discharge all the yearly payments therein mentioned, free from all deductions whatsoever. The said person to give security, and to have 10*l.* a-year. And if any surplus of the said rents, by reason of improvements or otherwise, should remain after all the said payments were fully discharged, the same should be equally divided amongst the said Students and Pensioners. And upon this further trust and confidence, that the said Trustees, &c., should, out of the yearly rents, &c., for ever maintain and keep in good repair the Manor House of Whixley aforesaid, and all the outbuildings to the same belonging, and that none of the aforesaid buildings should be pulled down, or in any respect altered, or any new buildings erected, and that the park or paddock of Whixley aforesaid, should be for ever upheld of a stock of 40 fallow deer kept therein.

End of the Deed of Settlement.

N.B.—As these extracts are taken from the recital in the Act of Parliament, some difference is naturally made in the auxiliaries *should, shall*, &c., for which allowance must be made.

And whereas the said Christopher Tancred made his last Will and Testament, bearing date the 20th May, 1746, and after reciting the above Deed, &c., he thereby gave and devised all his lands and hereditaments, of what nature soever, situate in Green Hamerton, Mynskip, and Aldborough, in the county of York (the two latter places not mentioned in the Deed of Settlement), to the Trustees before mentioned, to be vested, with the Trust of the said Manor and Rectory of Whixley, and the premises comprised in the said recited Settlement, and to their Successors for ever, who should yearly pay, &c., all the yearly profits

of the said lands, &c., (above taxes and all necessary outgoings) in equal proportions, to the said 12 Students and the said 12 Pensioners, desiring that the said Trustees, &c., for ever would uphold the stone wall which he had finished round his park at Whixley, and for ever keep the stock of 40 deer, as mentioned in the Settlement. Tancred's Benefaction to Christ's and Caius Colleges.

By the same Will he also bequeathed all his furniture belonging to his mansion seat at Whixley to the Master of Christ's College and the other Trustees, in trust, that they should cause the said furniture to remain in the said mansion-house, and be applied to the sole use of the said 12 Pensioners, and that such parts should be allotted to each Pensioner as to the said Trustees should be thought expedient. And he willed and declared that, if the late Act of Parliament for preventing the disposition of lands, whereby the same became unalienable, should any way impede the lands and hereditaments hereby devised to the said 12 Students, &c., from taking effect, then, and in such case, he devised and gave all and singular the said lands, &c., not limited by the said Settlement, to the 13 Fellows of Christ's College, and to the Fellows of Gonville and Caius College, in Cambridge, and to the Scholars of both the said Colleges, each Fellow to have a double share yearly of the said rents, &c., to every Scholar of each of the said 2 Colleges. And he gave and devised to the Master and Fellows of Christ's College aforesaid all that Freehold Messuage or Tenement, situate in Newmarket, in the county of Cambridge, bought of John Ricard, yeoman, in trust, that they and their Successors should apply the yearly profits, &c., for ever, as an Exhibition for some young Student in the said College, whilst he should continue an Undergraduate in the same. And his Will was, that if there should be any Student in the said College born in Newmarket aforesaid, then he to have the preference; and, if none such, then one born in the county of Cambridge; but in default of both, then as the Master and Fellows should judge expedient. And in default of his making any new appointment, then he appointed the Master of Christ's College for the time being his executor, and the said Master and 13 Fellows, in being at the time of the said Testator's death, residuary legatees.

N.B.—He had appointed Elizabeth Tottingham, his housekeeper, his executrix and residuary legatee, in case she survived him; but she died, as is afterwards specified, in the Testator's lifetime.

So far the Will, which, as is recited, soon after the death of the said Testator, was proved in the Prerogative Court of York, by Hugh Thomas, D.D., Master of Christ's College, in Cambridge, appointed executor thereof, on the contingency of the death of Elizabeth Tottingham.

And the said Christopher Tancred, it is set forth, died on or about the 21st August, 1754, without issue of his body, leaving his 5 sisters, Cath. Tancred, Dor. Lambert, A. Tancred, Eliz. Dobson, and Ursula Tancred, his heirs at law.

Decree in Chancery.

And whereas, by a Decree made in the same cause (Dr. Thomas and other Trustees, Complainants, against the aforementioned heirs at law, Defendants), made 8 Nov., 1757, it was ordered and decreed that the said Indenture of Lease and Release should be established, and the trusts thereof performed; and it was declared that the said Will of the said Christopher Tancred was well proved, and that the devise therein of the additional lands, &c., for the benefit of 12 Pensioners and 4 Students in Law was void by the Statute of Mortmain, and that the said Testator did not intend to devise lands and hereditaments to any of the Fellows and Scholars mentioned in the Will, in their natural capacities. And it was further declared that the residue of the devises and trusts in the said Testator's Will, and in particular the devise of the Freehold Tenement in Newmarket, &c., were good limitations and appointments for the charitable purposes therein mentioned. And it was ordered and decreed that the same should be established and carried into execution. And by a subsequent Order of the said Court, made in the same cause, Nov. 1, 1758, it was declared that the tithes of Mynskip, which the said Christopher Tancred, at the time of his death, held by lease for 21 years, from the Dean and Chapter of York, were to be considered as well devised, together with the Messuage and Croft there, to the Trustees appointed by the said Testator's Settlement, and referred to by his said Will, and should be applied in the same manner with the other Trust Estates devised to them.

Act of Parliament.

And whereas, tho' it appears to have been the intent of the said Christopher Tancred that his manor, &c., should be vested in the said Master of Christ's College (and the other Trustees recited by their respective titles) in perpetuity for the charitable uses and purposes aforementioned, yet it is apprehended that the conveyance directed by the said Decree to be made, cannot properly and effectually be made to them for that purpose, in regard that they and their successors in their several offices, &c., being neither a body politic or corporate, are incapable of taking or holding such estates, &c. And as several of the directions given by the said Will, &c., are defective, &c., Be it enacted, &c. That the Masters of Christ's College and Gonville and Caius College (and the other Trustees by office) respectively, for the time being, &c., shall be, and they are hereby declared and adjudged to be, one Body Corporate and Politic in deed and name, by the title, &c., of the "*Governors and Trustees of Tancred's Charities,*" and by that name, &c., shall have perpetual succession and a Common Seal, with power to change, &c., the same, &c.; and that they and their Successors shall be able and capable in law to have, hold, &c., all and every the said Manor, Hereditaments, &c. (Except the Advowson of the Church of Whixley, which the Court of Chancery was of opinion, though for what reason is not assigned, did not pass by the said Deeds and Will), to and for the charitable uses, &c., mentioned in the said Settlement, Will, and Decree

Tancred's Benefaction to Christ's and Caius Colleges.

here before recited, subject, &c. to the Provisoes, &c. hereinafter expressed and declared. And the said Trustees are empowered and required to meet together in the Common Dining Hall of Lincoln's Inn, on 20 May, 1762, between the hours of 10 and 12 in the forenoon, for putting this Act in execution, and may adjourn themselves from time to time, and meet and assemble together by adjournment or otherwise, at the same or any other place, for the purposes of this present Act, &c. And also shall and may appoint a proper person to be their Clerk, and allow him such salary, &c., as the major part of the said Trustees shall from time to time think proper. The said Trustees are also empowered to alter the allowance made to the Steward or Receiver in the Settlement, and to allow him such a salary as to them shall seem reasonable. And also that it shall and may be lawful for the said Governors, or the major part of them, from time to time, by instrument or writing under their Common Seal, to make &c., such Rules, Orders, Provisions, and Directions (as well for the election of Students and Pensioners, as for the removal or discharge of any such Student or Pensioner, for reasonable cause, as also for the better conduct, government, &c,, of the said Charities, and the several objects thereof), as to the said Governors, or the major part of them, shall from time to time seem proper, requisite, and expedient.

And whereas it is apprehended that the yearly rents. &c., will fall short and be deficient to answer the several Pensions, &c., now it is hereby further enacted, That it shall and may be lawful for the said Trustees to dispark the said park, and to sell and dispose of the stock of deer, and to convert the ground into arable, &c., anything in the said Settlement or Will notwithstanding.

And whereas " the yearly pension or stipend of 10*l.*, appointed by the said Settlement to be paid to the Curate of Whixley, is not equivalent to the duty thereby required, and the several yearly sums to which the wages of the cook and maid-servants, directed to be kept in the said hospital, are restrained, will be found insufficient, and the said Christopher Tancred hath not, by his Settlement, made any appointment for their board, license is given to the Trustees to make such allowance as from time to time shall be found necessary."

And whereas, " by a Decree in Chancery it was declared that the additional Bequest in the Will was prevented from taking effect, with regard to the 12 Pensioners and 4 Students in Law, by the Statute of Mortmain, and the provisional bequest to the Fellows and Scholars of Xt.'s and Caius Colleges, was adjudicated to be a good limitation, &c. And forasmuch as it would be inconvenient, &c., for the said Governors to apportion, &c., and pay the several shares of the profits or rents of the said lands into the proper hands of the several Fellows, &c., it shall be sufficient for the said Trustees or Governors to divide such shares of the rents, &c., as shall by this means become due to the Fellows and Scholars of the said 2 Colleges into 2 equal shares, and pay the same into the hands of the Bursars of the said 2 Colleges respectively, for the benefit of the said Fellows and Scholars."

And whereas " the anniversary of the death of the said Christopher Tancred happens at a time not so proper for the commemoration speeches directed to be made, viz., the 21st August, leave is given to the Master and Fellows of Xt.'s and Caius College annually to appoint the said respective speeches in Latin to be made on 28 October, or on such other day as the said Master and Fellows of each of the said Colleges respectively shall appoint. And the Treasurer of Lincoln's Inn may appoint one of the said 4 Students there to make a Latin speech in the Public Dining Hall of the said Society on the 2 February, or on such other day as such Treasurer shall think fit to appoint, in perpetual remembrance of the said Charity, instead of such speech directed to be made on the said anniversary of the Testator's death."

" And be it further enacted, that the expenses and charges of the passing the present Act of Parliament, and all other necessary and incident expenses and charges, which the said Governors have been, and they and their Successors at any time hereafter, shall or may be put unto, by reason of the trust hereby, or by the said Settlement or Will reposed and vested in them, shall be defrayed and paid out of the said trust estate.

Nothing herein to prejudice the Annuities of 20*l.* apiece, yearly given by the Will of Christopher Tancred, the father of the said Christopher Tancred, unto his Daughters therein named, for their respective lives, or any of them, or any remedies or powers of recovering the same.

" Provided also, that nothing in this Act contained shall give, or be construed to give, any greater force, effect, or duration to the Settlement and Will of the said Christopher Tancred, or the Charities thereby intended to be established, to the prejudice of any right which the Heirs at Law now have, or hereafter may have, to the said manor, lands, &c., in the said Settlement or Will contained ; but that the said Heirs at Law shall be at liberty to assert their right to all or any part thereof, by such legal ways and means, and have the benefit of the same objections to the said Settlement and Will, and the said Charities, or the duration thereof, as they could or might have had in case the said Trustees had never been incorporated, and as if this Act had never been made."

INDEX

TO

REPORT

OF

HER MAJESTY'S COMMISSIONERS

APPOINTED TO INQUIRE INTO

THE STATE, DISCIPLINE, STUDIES, AND REVENUES

OF THE

UNIVERSITY AND COLLEGES

OF

CAMBRIDGE.

Ordered, by The House of Commons, *to be Printed,*
20 *August* 1853.

1017.

I N D E X.

[*N. B.*—In this Index the Figures following the words *Rep.*, *Corr.*, *Ev.* and *App.* refer to the Pages of the Report, Correspondence, Evidence, and Appendix respectively; the Report extending from *p.* 1 to *p.* 203; and the Correspondence, Evidence and Appendix, from *p.* 1 to *p.* 474.]

A.

ACCOUNTS OF THE UNIVERSITY. Complaints formerly made of the state of the University finances not being known to its members, *Rep. p.* 141——This grievance now redressed, and a summary of the accounts annually printed and circulated, *ib.*——Grace of 14 May 1851, providing for an annual audit and circulation of the accounts, *ib.*——Audit of the accounts annually performed; auditors appointed, *The Vice-Chancellor* (*Okes*), *Ev. p.* 17——The present system of keeping the accounts by the Vice-chancellor is satisfactory; no occasion for any permanent officer in the capacity of bursar, *ib.*

See also *Audit of Accounts*. *Vice-Chancellor of the University*, 3.

Acts. Number of Acts required by the Elizabethan statutes to be kept by candidates for the several degrees compared with the actual practice, viz.: Bachelor of Arts, *Ainslie, Ev. p.* 23. 26——Bachelor of Laws, *Rep. p.* 33; *Ainslie, Ev. p.* 28——Bachelor of Physic, *Rep. p.* 35; *Ainslie, Ev. p.* 23. 28; *Haviland, Ev. p.* 81——Master of Arts, *Ainslie, Ev. p.* 24. 29——Bachelor in Divinity, *Rep. p.* 30; *Ainslie, Ev. p.* 24. 29——Doctor in Divinity, *Rep. p.* 30; *Ainslie, Ev. p.* 24. 29——Doctor of Law, *Rep. p.* 34; *Ainslie, Ev. p.* 25. 30; *Maine, Ev. p.* 78——Doctor of Physic, *Rep. p.* 36; *Ainslie, Ev. p.* 25. 30; *Haviland, Ev. p.* 81; *Fisher, Ev. p.* 127——Modifications proposed by the syndicate for the revision of the statutes, *Rep. p.* 36, 37——Fee paid on keeping an Act, *Ainslie, Ev. p.* 34.

Acts of Parliament. Trinity Hall and Gonville Hall are the only societies which have obtained Acts of Parliament to confirm their corporate rights and character, *Rep. p.* 179.

Adams' Prize. Particulars as to this prize, *Rep. p.* 24; *Ainslie, Ev. p.* 27; *Philpott, Ev. p.* 265; *Stokes, Ev. p.* 267 *e*——Operation of the Adams' prize, *Goodwin, Ev. p.* 238——The effect of the Adams' prize, lately instituted, should be awaited before determining on the establishment of special prizes for mathematics, subsequent to the B.A. degree, *Philpott, Ev. p.* 262, 263.

Adams', Sir Thomas, Professorship of Arabic. Date of foundation of this professorship, *Rep. p.* 56——Original stipend; augmentation thereof in 1841; its present amount, *p.* 56. 73——No return has been received to the queries addressed by the Commissioners to the present professor, *p.* 56——Paucity of students attending the lectures, *ib.*——Deed of foundation of the professorship, *App. p.* 456.

Addenbrooke's Hospital. Course of clinical lectures given at the hospital by the Linacre professor of medicine, *Rep. p.* 48——Opportunities furnished at this institution for the study of medicine, *Fisher, Ev. p.* 129. 131——The university has no power to appoint any person to a surgeoncy in Addenbrooke's Hospital, *p.* 131.

Admission of Students. General mode of admission into a college, *Rep. p.* 20——State of preparation attained to by students entering the University, *Hopkins, Ev. p.* 245.

Queries circulated by the Commissioners respecting the admission of students over and above the members of the foundation in the several colleges and halls, *Ev. p.* 302——Answers thereto from the following, viz.: St. Peter's College, *Cookson, Ev. p.* 308——Pembroke College, *Ainslie, Ev. p.* 319——Gonville and Caius College, *Chapman, Ev. p.* 326——Trinity Hall, *Geldart, Ev. p.* 335——Corpus Christi College, *Pulling, Ev. p.* 344——King's College, *Okes, Ev. p.* 348——Queen's College, *Dalton, Ev. p.* 355——St. Catharine Hall, *Philpott, Ev. p.* 367——Christ's College, *Cartmell, Ev. p.* 381——St. John's

Report, 1852—*continued.*

Admission of Students—continued.

John's College, *Tatham, Ev. p.* 397——Magdalene College, *Warter, Ev. p.* 408——Trinity College, *Whewell, Ev. p.* 414——Emmanuel College, *Archdall, Ev. p.* 425——Sidney Sussex College, *Phelps, Ev. p.* 431——Downing College, *Worsley, Ev. p.* 437, 438.

See also *Declarations. Matriculation Examination. Previous Examination,* 3.

Advowsons. Queries circulated by the Commissioners as to the funds possessed by the colleges for the purchase of advowsons, or the augmentation of small livings in its patronage, *Ev. p.* 304——Answers thereto from the following colleges and halls, viz.: St. Peter's College, *p.* 314——Pembroke College, *p.* 323——Trinity Hall, *p.* 343——King's College, *p.* 354——Queen's College, *p.* 357——Christ's College, *p.* 395——St. John's College, *p.* 401——Trinity College, *p.* 424——Emmanuel College, *p.* 428——Sidney Sussex College, *p.* 435.

Affirmations. See *Oaths.*

Agriculture. Want of lectures in scientific agriculture, especially as connected with chemistry, *Amos, Ev. p.* 124.

Ainslie, Rev. Gilbert, d.d., Master of Pembroke College. (Analysis of his Answers to Queries.)

[1. *Queries as to the Studies of the University :*]

Statement of the residence, studies, exercises, and examinations for degrees, *as prescribed by the statutes* 12 Eliz., viz.: Proceedings for the degree of Bachelor of Arts, *Ev. p.* 22——Bachelor of Law, *p.* 23——Bachelor of Physic, *ib.*——Master of Arts, *ib.*——Bachelor in Divinity, *p.* 24 —— Doctor in Divinity, *ib.*——Doctor of Law, *p.* 25——Doctor of Physic, *ib.*

Comparison of the *present actual practice* with the preceding statement; viz.: Proceedings for the degree of Bachelor of Arts, *Ev. p.* 25-27——Bachelor of Law, *p.* 28——Bachelor of Physic, *ib.*——Master of Arts, *p.* 29——Bachelor in Divinity, *ib.*——Doctor in Divinity, *ib.*——Doctor of Law, *p.* 30——Doctor of Physic, *ib.*

Provision made by the University for the maintenance of good order and discipline among the students, *Ev. p.* 30——Office of proctor, *p.* 31.——Academical punishments, *ib.*——Restrictions on undue credit, *ib.*——The power of the Vice-Chancellor over students has been very much interfered with by recent Acts of Parliament, *ib.*——Control exercised over lodging houses, *p.* 32——Constitutional authority which Masters of Arts, and those of higher degree, have over students, *ib.*

Number of examiners appointed to conduct the previous examination; mode of nomination, *Ev. p.* 32——The like in regard to the final examination; number of examiners in each tripos, and remuneration, *ib.*

Table of fees paid on matriculation, *Ev. p.* 32——Fees paid on admission to degrees, *p.* 33——Fees paid by noblemen on certain degrees, *ib.*——Fees paid on admission to degrees by Royal mandate, *p.* 34——Fees paid to professors, *ib.*——Additional fee paid by compounders, *ib.*——Fees paid for exercises, *ib.*——Cautions for exercises, *ib.*——Condition upon which a caution is accepted, *ib.*——Contributions levied on each college towards paving and lighting the town; and for the purchase of books for the University library, *ib.*

[2. *Queries respecting the Colleges :*]

Mode of election of the master of Pembroke College; nature of oath taken by him; condition upon which he holds office; duties assigned to him, *Ev. p.* 316, 317——Particulars as to the government of the college, *ib.*——The master is the ordinary of the chapel; he may appoint a president of the college, or *locum tenens, ib.*——Provision made in the statutes for his stipend, *ib.*

Procedure adopted in the election of fellows; restriction appertaining to fellowships; limitations as to their absence from college; the duties of the fellows are such as are attached to the college offices which they may hold; each fellow has an independent vote in the election of the master, or fellow, or scholar, and also in other matters; manner in which the statutes provide for their stipend, *Ev. p.* 317, 318.

Particulars respecting the election of scholars, *Ev. p.* 318——Bye fellowships, and conditions annexed thereto, *ib.*——List of scholarships and exhibitions, together with the allowances and restrictions annexed thereto, *p.* 318, 319——There are no regulations in the statutes as to the admission of students over and above the members of the foundation, *p.* 319——Hours of service in the chapel; the computation of a student's residence in the college excludes the days when he either was not at chapel, or present in the hall at dinner hour, *ib.*

Subjects embraced in the college lectures; they always have reference to the University examinations; preparatory examinations; fellows alone give the college lectures, *Ev. p.* 319——Only one general examination is held, and that is at Easter; subjects of it; prizes, *ib.*——Attendance of students at lectures and dinner, *ib.*——Necessary expenses, and actual

Report, 1852—*continued.*

Ainslie, Rev. Gilbert, D.D., Master of Pembroke College. (Analysis, &c.)—*continued.*

[2. *Queries respecting the Colleges*]—continued.

actual expenses of a pensioner, and of a sizar, *Ev. p.* 319——The exhibitions are the main provision for poor students, the college to consolidate the smaller ones; commons are allowed to Christ's Hospital scholars when admitted as sizars; deserving sizars are sometimes rewarded from a fund formed from allowances not given to any scholar, *ib.*

No means of reducing the expenses of residence in the college, or of further restraining habits of extravagance, *Ev. p.* 319——Modifications required in the conditions of eligibility; appertaining to the Grindal fellowship, and in the encouragement at present give nfor the resort of scholars from Christ's Hospital and the Merchant Tailors' School to this college; no change is needed in the election to or tenure of the foundation fellowship or scholarships, *p.* 319, 320——Statement as to the Ipswich scholarships, *p.* 320.

Ainslie, Dr. The Commissioners have received every assistance they could desire from Dr. Ainslie in the whole prosecution of their inquiry, *Rep. p.* 44. 186——Letter from Dr. Ainslie, dated 13 November 1850, in answer to circular of the Commissioners, of 30 October 1850, *Corr. p.* 3——Further letter from, dated 9 December 1850, offering any information that the Commissioners may desire, *p.* 4.

Airy, Mr. Value of his labours during the period of his presiding over the University observatory, *Rep. p.* 59——Date of his appointment to the Plumian Professorship of Astronomy; subjects on which he lectured, *Challis, Ev. p.* 104——The income of the Plumian Professorship of Astronomy augmented in consequence of his representations, *p.* 105——System of astronomical observations commenced at the Observatory in 1828, by Mr. Airy, *p.* 106.——*See* also *Observatory, The.*

Albert, H. R. H., Prince. Copy of answer, dated 6 November 1850, returned by His Royal Highness, to address presented by the Commissioners, *Rep. p.* 1.

Alconsfield (*Stafford*). Fellowships at St. John's College open to natives of, *Rep. p.* 160.

Aldermen of Cambridge. Oath administered to by the University; recommended to be abolished, *Rep. p.* 6, 7; *Ev. p.* 36.

Ale Licences. Prescriptive right claimed by the Vice-chancellor of licensing alehouses in the town, and the village of Chesterton, *Rep. p.* 7——The magistrates of the borough have also assumed the same power since the passing of the Municipal Corporations Act; inconveniences arising therefrom, *ib.*—— Recommendations of the Commissioners on the subject, *p.* 8——Effect of certain recent Acts of Parliament in lessening the power of the Vice-chancellor over victuallers or alehouse keepers, *Ainslie, Ev. p.* 31——Statement in memorial of the town council relative to the authority exercised by the University authorities in regard to alehouse and wine licences, *Ev. p.* 37——Remarks of the syndicate appointed by the senate to consider the foregoing, *p.* 42. ——*See* also *Wine Licences.*

Alford School (*Lincoln*). Scholarships on Spendluff's foundation at Magdalen College' open to students from, *Warton, Ev. p.* 407.

Alford, Viscount. Mineralogical collection presented to the University by, *Rep. p.* 123; *Miller, Ev. p.* 133.

Algebra. Particulars as to the Sadlerian lectureships founded for the teaching of algebra, *Rep. p.* 68. 73——Extract from the will of Lady Sadleir, founding the algebra lectureships, with other papers, *App. p.* 462–468.

Allegiance and Supremacy, Oaths of. All candidates for degrees are obliged by Act of Parliament to take, *Rep. p.* 44.

Allen, Dr. Scholarships at Trinity Hall founded by; annual value thereof, *Rep. p.* 187; *Geldart, Ev. p.* 333. 335.

Allen, Dr., Bishop of Ely. Course pursued by, in regard to filling up certain fellowships at St. John's and Jesus Colleges, vested in him *ex officio*, as Bishop of Ely, *Rep. p.* 168.

Almanacs. Annual amount paid to the University by the Government, consequent on the loss of the privilege of printing almanacs; mode in which this sum is disposed of, *Rep. p.* 137; *Syndics of the Press, Ev. p.* 20.

Alterations in the Cambridge System. Queries circulated by the Commissioners relative to the changes to be recommended in the present collegiate or academical system affecting the welfare of the students, and the conduct of their education, *Ev. p.* 141——Answers to the foregoing, by the following, suggesting improvements or alterations, viz.: Dr. Archdall, master of Emmanuel College, *p.* 142——Rev. J. W. Blakesley, late fellow and tutor of Trinity College, *p.* 151, 152——Rev. J. Cooper, fellow and tutor of Trinity College, *p.* 155——Rev. J. R. Crowfoot, late fellow of Gonville and Caius College, *p.* 158——Rev. W. M. Gunson, fellow and tutor of Christ's College, *p.* 165——Rev. J. Hildyard, late fellow and tutor of Christ's College, *p.* 167——Rev. Arthur M. Hoare, fellow

Report, 1852—*continued.*

Alterations in the Cambridge System—continued.

of St. John's College, *Ev. p.* 168——Rev. H. H. Hughes, late tutor of St. John's College, *p.* 169——Rev. H. Latham, fellow and tutor of Trinity Hall, *p.* 173——Rev. C. Merivale, late fellow and tutor of St. John's College, *p.* 175, 176——Rev. J. N. Peill, fellow and tutor of Queen's College, *p.* 179——Rev. J. J. Smith, late fellow and tutor of Gonville and Caius College, *p.* 190, 191——Rev. C. A. Swainson, fellow and tutor of Christ's College, *p.* 196——Rev. A. H. Wratislaw, fellow and tutor of Christ's College, *p.* 216, 217.——*See* also *Board for Carrying out Reforms in the University.*

Alvey, Henry. Books given by, to the library of St. John's College, *Tatham, Ev. p.* 403.

Amos, Andrew, M.A., Downing Professor of Law. (Analysis of his Answers to Queries.)

[*Queries respecting the Professorships:*]

Emoluments of the professorship, *Ev. p.* 122, 123——Requirements of the statutes, *ib.*——Duties voluntarily performed, *ib.*——Probable effect of the moral science tripos, in increasing the number of law students, *ib.*——Circumstances which discourage law studies at the University, *p.* 123, 124——Suggestions for a re-arrangement of the present system of education and academical residence at the University, *p.* 123.

Expediency of establishing lectures on medical jurisprudence, *Ev. p.* 124——Importance of promoting the study of English literature, *ib.*——The importance of philological studies has been over-rated, *ib.*——Want of lectures on scientific agriculture, *ib.* Futility of classical studies being pursued by compulsion after a certain age, *ib.*——Want of better provision for professors, *ib.*——Suggestions for promoting the study, *p.* 124, 125.

Amos, Professor. Number of lectures annually delivered by, as Downing Professor of the Laws of England, *Rep. p.* 65——His complaints of the little attention paid to the study of English law, *p.* 65, 66——Remarks of the Commissioners thereon, *p.* 66.

Amusements of Students. The amusements of boating and cricket playing in Easter term now amount to a serious evil, *Archdall, Ev. p.* 142——A considerable portion of the expenses of students arises from their amusements; means of control suggested, *Whewell, Ev. p.* 205.——*See* also *Pleasure Grounds.*

Anatomical Lecture Room. Its size and capacity for lecturing, *Rep. p.* 119; *Stokes, Ev. p.* 97, 98.

Anatomical Museum. Particulars as to this museum, *Rep. p.* 60——Present condition and requirements of the museum, *p.* 119——Capacity of the lecture-room, *ib.*——Dissecting-rooms, *p.* 120——Courses of lectures delivered, *ib.*——Means for advancing the study of zoology, *ib.*——Cost and date of erection of the building containing the anatomical collection, *ib.*——Date of purchase and cost of the several portions of the collection, *p.* 121——Amount of the curator's salary, *ib.*——Long-continued personal labour bestowed by Dr. Clark on the museum, *ib.*——Extent to which students have access to it, *ib.*——Contents and general character of the museum, *Clark, Ev. p.* 109——Funds allowed by the University for the maintenance of the museum, *ib.*——Liberal expenditure from the university funds in adding to the anatomical museum, *ib.*——Opportunities of dissection afforded to the students, *ib.*

Anatomy. General condition of the study at this university; means by which it may be advanced, *Clark, Ev. p.* 110——Means possessed by the University of teaching morbid anatomy, *Fisher, Ev. p.* 131.

Anatomy, Professorship of:

1. *Foundation, Duties, &c. of this Professorship.*
2. *Recommendations in regard thereto.*

1. *Foundation, Duties, &c. of this Professorship:*

Period and origin of foundation of this professorship, *Rep. p.* 60——Amount of stipend, *ib.*——Duties; are defined by no statutes, *ib.*——Anatomical museum formed under the auspices of the present professor, *ib.*——Augmentation of the duties by a recent arrangement, *ib.*——Recommendations of the present professor, Dr. Clark; limit that should be placed upon minute teaching, *p.* 60, 61——Present amount and sources of income of the professorship, *p.* 73.

Period of foundation of this professorship, *Clark, Ev. p.* 107——When the first professor was appointed there was no similar establishment in London or Edinburgh, *p.* 108——Duties originally annexed to the professorship; duties now actually performed, *ib.*——No original endowment; stipend subsequently procured from the Crown; other sources of emolument, *p.* 108, 109——Present annual value of the office, *p.* 109——Mode and conditions of appointment of the professor, *ib.*——No residence is attached, *ib.*——How far the duties of the professor are capable of being modified; in what any change should consist, *ib.*

2. *Recommendations*

Report, 1852—*continued.*

Anatomy, Professorship of—continued.

2. *Recommendations in regard thereto:*

New professorship recommended, *Rep. p.* 102——The task of lecturing on human anatomy, and also on zoonomy, and comparative anatomy, should not devolve on one person, *Fisher, Ev. p.* 130——Suggestion for the appointment of an assistant professor of anatomy or a lecturer on human anatomy, *p.* 130, 131.

See also *Natural Sciences Tripos.*

Ancient History. Proposition for the constitution and endowment of a professorship of ancient history, *Merivale, Ev. p.* 176.

Ancient Philosophy. Suggestion for the establishment of a new professorship of ancient philosophy, *Merivale, Ev. p.* 176.

Andrewes, Bishop. Scholarships at Pembroke College augmented by, in 1626, *Ainslie, Ev. p.* 318; *Master and Fellows of Pembroke College, Ev. p.* 322.

Anglesey, Isle of. Hughes' scholarship at Magdalene College open to natives of, *Warter, Ev. p.* 406.

Ansted, Professor. Specimens presented by, to the Woodwardian Museum, *Sedgwick, Ev. p.* 118.

Antiquities, Museum of. Materials existing in the University for forming a museum of antiquities and coins, *Babington, Ev. p.* 451.

Apparatus. The astronomical instruments attached to the Plumian professorship are few and small; there are no funds for the purchase or maintenance of apparatus, *Challis, Ev. p.* 105——The foundation of a complete cabinet of physical apparatus would promote a taste for experimental philosophy, *p.* 107——Collection of apparatus belonging to the Lowndes' professor of astronomy, *Peacock, Ev. p.* 122——No apparatus attached to the professorship of mineralogy; the instruments used are the private property of the professor, *Miller, Ev. p.* 133——Disadvantages resulting from this deficiency, *p.* 134.

See also *Laboratories and Apparatus.*

Appropriated Fellowships. See *Fellowships.* *Schools.*

Appropriations to Schools. Remarks on the appropriations to schools having claims to particular fellowships and scholarships at different colleges, *Rep. p.* 184——The substitution of exhibitions to be conferred by the authorities of the school in lieu of the existing claims to fellowships and scholarships recommended, *ib.*——Manner in which such a scheme of commutation should be carried out, considered; an authority capable of dealing with this class of appropriations suggested to be constituted, *p.* 184, 185.

Arabic. Particulars as to Sir T. Adams and the Lord Almoner's professorships of Arabic, *Rep. p.* 56——Paucity of students attending the lectures, *ib.*——Remarks on the means by which the sphere of usefulness of these professorships might be enlarged, *ib.*——Desirableness of encouraging the study of Arabic as auxiliary to that of Hebrew, *Mill, Ev. p.* 91——Date of foundation of the Lord Almoner's professorship of Arabic; duties and salary of the office, *Robinson, Ev. p.* 92——Small number of students attending the Lord Almoner's professor's lectures, *ib.*——The establishment of Arabic scholarships suggested as a means of increasing the number, *ib.*——Deed of foundation of Sir T. Adams' professorship of Arabic, *App. p.* 456.

See also *Adams', Sir Thomas, Professorship of Arabic.* *Lord Almoner's Professorship of Arabic.*

Archæology. Particulars as to the Disney professorship of archæology, *Rep. p.* 67, 68. 73.

Archdall, Rev. G., d.d., Master of Emmanuel College. (Analysis of his Answers to Queries:)

[1. *Queries as to Expenses and Tuition:*]

Difficulty of diminishing the college expenses, *Ev. p.* 142——No further check can apparently be imposed on tradesmen giving credit; suggestion nevertheless offered, *ib.*——Terms for private tuition; most students engage private tutors, *ib.*——Several distinguished men are permanently occupied as private tutors, *ib.*——The aid of a private tutor is rarely dispensed with, *ib.*——Reason of the repeal of the Grace of 1781 restricting private tuition; its re-enactment not advisable, *ib.*——Poor students are assisted as they may merit it; a college for them alone would not answer, *ib.*

The college or University examinations do not trespass on independent studies by their frequency, *Ev. p.* 142——No examination at this college previous to the admission of students, *ib.*——No alteration in the existing collegiate system necessary for securing the best tutors and professors, *ib.*——There is no deficiency in the staff of tutors, &c., at this college, *ib.*——The Easter term might advantageously be lengthened, and the studies better enforced, *ib.*——Students are not allowed to reside in college in the vacation, but a few do in their lodgings; reading parties are beneficial in their results, *ib.*——Many students live in lodgings; rules enforced in regard to them, *ib.*——A general improvement and more stringent enforcement of college discipline, the only change requisite in the existing system, *ib.*

Report, 1852—*continued.*

Archdall, Rev. G., D. D, Master of Emmanuel College. (Analysis, &c.)—*continued.*

[2. *Queries as to the Colleges :*]

Period of foundation, and name of founder of Emmanuel College, *Ev. p.* 425—— Manner of election of the master; qualifications required in him; tenure of office; absence permitted from college; regulation of stipend, *ib.*——Number of foundation and bye fellowships and other particulars as to same, *ib.*——Mode of admission of students, *ib.* ——Hours of Divine service in the college chapel, and attendance required thereat, *ib.* ——Course of instruction at this college; fellows engaged therein; prizes given, *p.* 426 ——Attendance enforced at the college lectures, and in the hall at dinner hour; hour of closing the college gates at night, *ib.*

Average annual unavoidable expense, exclusive of private tuition of the different classes of students, *Ev. p.* 426——Average annual amount of payments for the support of poor scholars and students at this college, *ib.*——Impossibility of further reducing the necessary expenses of college residence, or restraining credit and extravagance, *ib.*—— Inexpediency of removing or altering any of the conditions now attached to the fellowships, &c., *ib.*——No scholarships or exhibitions have become ineffective from want of claimants, *ib.*——No advantage would arise from a consolidation of the scholarships or exhibitions, *ib.*

[3. *Queries as to the College Libraries :*]

The college library has a librarian who has the general care of the library, *Ev. p.* 428 ——Catalogue in use; arrangement of the books, *ib.*——Fund applicable to the purposes of the library, *ib.*——Number of books; benefactors thereto, *ib.*——Conditions on which accessible, *ib.*

Archdall, Dr. Letter from, dated 8 November 1850, in answer to circular of the Commissioners of 30 October, *Corr. p.* 7.

Aristotle. The Dialectics of Aristotle have now ceased to be a special subject of study, *Ainslie, Ev. p.* 26.

ARLETT, REV. H., M.A., SENIOR FELLOW, AND LATE TUTOR OF PEMBROKE COLLEGE. (Analysis of his Answers to Queries.)

[*Expenses and Tuition :*]

No latitude for a reduction of the expenses at this college; average amount thereof, *Ev. p.* 142, 143——No certain check can be imposed on the system of tradesmen giving credit; salutary effect of the bills being taken in by tutors, *p.* 143——Distribution and subjects of the lectures, *p.* 143, 144——Private tuition interferes with and discourages the efforts of the college tutors, *p.* 144——Terms for private tutors; candidates for a common degree do not necessarily require one, *ib.*——System of instruction followed by private tutors; general practice of students in regard to this mode of preparing for degrees or honours, *ib.*——Private college arrangements are to be preferred to any Grace or enactment for discouraging private tuition, *ib.*

No provision at this college for poor students on the ground of poverty only; the establishment of a college exclusively for poor students is not likely to be productive of beneficial results; opportunities afforded to poor but clever students under existing circumstances, *Ev. p.* 144, 145——Subjects and periods of examinations, *p.* 145——An admission examination would be of questionable utility, *ib.*——Objections to any arrangement which would retain the distinguished men at the University, who are now sent into public life, *p.* 146——The number of students at the University since 1825 has remained stationary; suggestions by which their number might be increased, *ib.*

At this college the present staff of tutors, &c. is sufficient, *Ev. p.* 146——The substitution of nine for ten terms would be an advantage, *ib.*——Not advisable to shorten the vacations, *ib.*——Extent to which reading parties obtain, *ib.*——Temptations to a worse kind of dissipation are greater at Cambridge than elsewhere, *ib.*——Rules respecting lodging-houses, and extent to which they are kept, *ib.*——No alteration in the present collegiate or academical system is to be recommended, *ib.*

Report, 1852—*continued.*

Babington, C. C., St. John's College. (Analysis of Communication, &c.)—*continued.*

the payment of income-tax thereon, *Ev. p.* 452——Objections to the Vice-chancellor being convener and chairman of all syndicates, *ib.*——Changes suggested in the constitution of the permanent syndicates, *ib.*——Also in regard to the office of University bursar, *ib.* ——Want of power in the senate to enforce the payment of taxes, *p.* 453——Unfairness of the tax on degrees, *ib.*——Necessity for requiring professors to make the University their usual place of residence, *ib.*

Bachelor of Arts, Degree of:

1. *Course of Study, &c., prescribed before proceeding to this Degree.*
2. *Fees Payable.*
3. *Questions circulated by the Commissioners.*
4. *Privilege possessed by King's College.*

1. *Course of Study, &c., prescribed before proceeding to this Degree:*

Course of study and residence prescribed by the statutes of Elizabeth for this degree, *Rep. p.* 20——Considerable modifications which the practice of the University has undergone; present regulations, *ib.*——Two public examinations; at what period of a student's residence held, *ib.*——Subjects of the first or "previous" examination, *ib.*—— And of the second or final examination, *p.* 20-22——Lectures required to be attended, *p.* 21——Board of mathematical studies, *p.* 22——The classical tripos, *p.* 22, 23 ——Mathematical and classical prizes, *p.* 23, 24——Recent extension of the course of study, *p.* 24——The moral sciences tripos, *ib. p.* 25——The natural sciences tripos, *p.* 25, 26——Additions still required to the general range of study, *ib. p.* 26——Voluntary theological examination, *ib.*——Proposal for a re-arrangement of the course of study for the degree of B. A., *p.* 27–29.

Oath formerly enforced before admission to this degree; an equivalent affirmation, and promise is now taken, *Rep. p.* 38——Statement of the residence, studies, exercises, and examinations prescribed by the Elizabethan statutes for this degree, *Ainslie, Ev. p.* 22 —— Comparison with the present actual practice, *p.* 25 —— Table showing the number of degrees of this grade conferred in the years 1800. 1810. 1820, and 1830, and in each of the years 1840 to 1850, distinguishing the several colleges, *Romilly, Ev. p.* 67–70.

2. *Fees payable:*

Scale of fees payable by Bachelors of Arts for college tuition, *Rep. p.* 82——Statement of fees paid on admission to this degree, *Ainslie, Ev. p.* 33——Amount of stamp duty paid to Government on this degree, *Romilly, Ev. p.* 63.

3. *Questions circulated by the Commissioners:*

Questions circulated by the Commissioners relative to the reduction of terms required for the degree of B. A., *Ev. p.* 141——Answers to the foregoing by the following, viz.: Dr. Archdall, master of Emmanuel College, *p.* 142——Rev. H. Arlett, senior fellow, and late tutor of Pembroke College, *p.* 146——Rev. J. W. Blakesley, late fellow and tutor of Trinity College, *p.* 150——Rev. J. Cooper, fellow and tutor of Trinity College, *p.* 154—— Rev. R. W. Evans, late fellow and tutor of Trinity College, *p.* 159——Rev. J. A. Frere, fellow of Trinity College, *p.* 161——Rev. W. M. Gunson, fellow and tutor of Christ's College, *p.* 164——Rev. J. Hildyard, late fellow and tutor of Christ's College, *p.* 166—— Rev. Arthur M. Hoare, fellow of St. John's College, *p.* 168——Rev. H. H. Hughes, late tutor of St. John's College, *p.* 169——Rev. H. Latham, fellow and tutor of Trinity Hall, *p.* 172——Rev. C. Merivale, late fellow and tutor of St. John's College, *p.* 175——Rev. J. G. Mould, fellow and tutor of Corpus Christi College, *p.* 177——Rev. J. N. Peill, fellow and tutor of Queen's College, *p.* 179——Dr. Philpott, master of Catharine Hall, *p.* 183, 184——Rev. Joseph Shaw, senior fellow of Christ's College, *p.* 186——Rev. J. J. Smith, late fellow and tutor of Gonville and Caius College, *p.* 190——Rev. J. Smith, fellow of Christ's College, *p.* 192——Rev. C. A. Swainson, fellow and tutor of Christ's College, *p.* 195——Rev. W. H. Thompson, fellow and tutor of Trinity College, *p.* 200 —— Rev. E. Warter, fellow and tutor of Magdalene College, *p.* 203——Dr. Whewell, master of Trinity College, *p.* 207——Rev. T. Worsley, master of Downing College, *p.* 212 Rev. A. H. Wratislaw, fellow and tutor of Christ's College, *p.* 215, 216.

4. *Privilege possessed by King's College:*

Ancient prescriptive privilege possessed by students of King's College of being admitted to the B. A. degree without undergoing examination; the privilege has been surrendered by the society, *Rep. p.* 29. 173.

Bachelor of Divinity, Degree of:

Residence, studies, exercises, and examinations presented by the Elizabethan statutes for this degree; comparison with the present actual practice, *Rep. p.* 30; *Ainslie, Ev. p.* 24. 29; *Jeremie, Ev. p.* 76—— Table showing the number of degrees of this grade conferred in the years 1800, 1810, 1820, and 1830, and in each of the years 1840 to 1850, distinguishing the several colleges, *Romilly, Ev. p.* 67–70.

Interval

Report, 1852—*continued.*

Bachelor of Divinity, Degree of—continued.

Interval placed between this and the degree of D. D., *Rep. p.* 30——Inexpediency of changing the exercises required for the degree, *Jeremie, Ev. p.* 76.

Statement of fees paid on admission to this degree, *Ainslie, Ev. p.* 33——Cautions exacted in taking the degree, *p.* 34——Amount of stamp duty paid to Government, *Romilly, Ev. p.* 63.

The degree of B. D. is an essential requisite to a fellowship in several of the colleges; recommendation that the rule be no longer enforced, *Rep. p.* 170——The B. D. degree has ceased to be a mark of superior theological knowledge; causes of this declension; means by which the reputation of the degree might be raised, *p.* 170, 171—— The degree is of no value whatever as denoting proficiency in divinity, *Wratislaw, Ev. p.* 216.

See also *Ten-year Men.*

Bachelor of Laws, Degree of:

Requirements of the statutes for the attainment of this degree, *Rep. p.* 33——Modifications in the present practice, *ib.*——Examinations undergone, *ib.*——Lectures expected to have been attended, *ib.*——Scholarships and prizes open to students in this faculty, *p.* 33, 34——Statement of the residence, studies, exercises, and examinations prescribed by the Elizabethan statutes for this degree; comparison with the present actual practice, *Ainslie, Ev. p.* 23. 28; *Maine, Ev. p.* 78——Table showing the number of degrees of this grade conferred in the years 1800, 1810, 1820 and 1830, and in each of the years 1840 to 1850, distinguishing the several colleges, *Romilly, Ev. p.* 67–70.

Statement of fees paid on admission to this degree, *Ainslie, Ev. p.* 33——Cautions exacted, *p.* 34——Amount of stamp duty paid to Government, *Romilly, Ev. p.* 63.

Bachelor of Medicine, Degree of:

Particulars of the residence, studies, exercises, and examinations prescribed by the Elizabethan statutes for this degree, and of the present actual practice, *Rep. p.* 35; *Ainslie, Ev. p.* 23–28; *Haviland, Ev. p.* 81; *Fisher, Ev. p.* 126, 127——Average annual number of M. B. degrees granted, *Rep. p.* 92——Table showing the number of degrees of this grade conferred in the years 1800, 1810, 1820 and 1830, and in each of the years 1840 to 1850, distinguishing the several colleges, *Romilly, Ev. p.* 67–70.

Statement of fees paid on admission to this degree, *Ainslie, Ev. p.* 33; *Fisher, Ev. p.* 127——Cautions exacted on taking the degree, *Ainslie, Ev. p.* 34——Amount of stamp duty paid to Government on this degree, *Romilly, Ev. p.* 63.

Important changes introduced at the instance of Dr. Haviland in the requirements for this degree, *Rep. p.* 92——Alterations in the qualifications for this degree suggested, *Bond, Ev. p.* 85——The time required for this degree too long, and the general academical qualifications too limited, *Fisher, Ev. p.* 126——Proposed re-arrangement of the course of study, and probation for this degree, *p.* 131, 132.

Bachelor of Music, Degree of:

Conditions for attaining this degree, *Rep p.* 37——Fee payable on taking the degree, *Ainslie, Ev. p.* 33; *Walmisley, Ev. p.* 136——Amount of stamp duty paid to Government, *Romilly, Ev. p.* 63——Table showing the number of degrees of this grade conferred in the years 1800, 1810, 1820 and 1830; and in each of the years 1840 to 1850, distinguishing the several colleges, *p.* 67–70.

Bacon, Lord. Passages from his works, relating to the principles upon which the emoluments of professors in the University should be regulated, quoted, *Rep. p.* 102.

Bailey, John. Fellowship at St. John's College, founded by, in 18 Henry VIII., *Rep. p.* 162.

Baines, Sir Thomas. Fellowship at Christ's College, founded by, *Rep. p.* 160; *Cartmell, Ev. p.* 377——Scholarship at the same college also founded by, *Rep. p.* 189; *Cartmell, Ev. p.* 377.

Baker, Thomas, (formerly Fellow of St. John's College). Collection of antiquarian researches (MSS.), given by, to the University library, *Power, Ev. p.* 56——Books given by, to the library of St. John's College, *Tatham, Ev. p.* 403.

Balsham (Cambridge). Land in this parish annexed to the Plumian professorship, *Challis, Ev. p.* 104, 105——Fellowships at St. Peter's College open to natives of, *Cookson, Ev. p.* 308.

Balsham, Hugo de, Bishop of Ely. Founder of St. Peter's College; date of the letters patent, *Rep. p.* 143.

Banks, Rev. Samuel. Specimens presented by, to the Woodwardian Museum, *Sedgwick, Ev. p.* 118.

Report, 1852—*continued.*

Bar, The. Importance of improving the faculty of civil law, which forms so direct a bond of union between the University and the Bar, *Rep. p.* 35——Causes of the small number of law students at the University, *Amos, Ev. p.* 123——The usage once so general of a University training for the Bar, is rapidly discontinuing, *p.* 124.

Barcroft, Mr. Exhibitions at Sidney Sussex, College, founded by; annual value, *Phelps, Ev. p.* 431.

Barnaby Lecturers or Lectores Ordinarii. Particulars as to these readerships; by whom founded, and date, *Rep. p.* 48——Stipends, how paid and from what sources derived, *p.* 48-73——Are only nominal appointments, *p.* 48——Suggestion for the suppression of the inconsiderable payments at present attached to these offices, *p.* 87.

Barnardiston, Lady. Scholarships at St. Catharine Hall, founded by; annual value, *Philpott, Ev. p.* 364, 365.

Baronets. By a letter of Charles II. in 1679 the University is authorised to confer the degree of M.A. on a baronet without compliance with the usual forms, *Ainslie, Ev. p.* 29.

Barristers. See *Bar, The.*

Basevi, Mr. Particulars as to his designs for the Fitzwilliam Museum buildings, *Rep. p.* 125——Succeeded by Mr. Cockerill, *ib.*

Bateman, William, Bishop of Norwich. Foundation of Trinity Hall by; objects of that foundation, and particulars connected therewith, *Rep. p.* 178 *et seq.*——Scholarships at Trinity Hall, founded by, *p.* 187——Estates left for the foundation of six fellowships of Gonville and Caius College between the time of Bishop Bateman and Dr. Caius, *Chapman, Ev. p.* 325——Restriction on the fellowships, *ib.*——No provision for scholarships at Trinity Hall in the original statutes of Bishop Bateman (except in the explanatory statute of 1354), *Geldart, Ev. p.* 335.——Supernumerary fellowship founded in 1851 by the society, in accordance with the Bateman statutes, *Masters and Fellows of Trinity Hall, Ev. p.* 342——Provision made for the choice of master and fellows in the statutes of Bishop Bateman given to Gonville and Caius College in 1353, *Ev. p.* 449.

Battie Scholarship. Particulars as to this scholarship, *Rep. p.* 24——Date of foundation of this scholarship; its present annual value, *Wratislaw Ev. p.* 299.

Beatson, Rev. B. W., M.A., Fellow of Pembroke College. (Analysis of his Answers to Queries.)

[*Queries as to Classical Studies and Examinations:*]

Subjects of the classical examinations for medals, University scholarships, and the classical tripos; for the two former, original compositions are admitted, for the latter they are excluded, *Ev. p.* 277——The classical tripos was established in 1824, and the examination extended over four days; in 1836 it was changed to five days, and in 1850 to six days; mode of procedure; conditions required in candidates; the number of candidates has increased, *ib.*

Objection to any change in the constitution of the Boards which conduct the classical examinations; the working of the Mathematical Board must be ascertained before applying a similar Board to classical subjects; extent to which the objects proposed by such a Board are already secured, *Ev. p.* 277——No necessity for specifying the books embraced in the classical course of study and examination, *ib.*——The present length of the examination papers, as compared with the time allotted to them, is unobjectionable, *ib.*——Suggestion for opening the classical tripos to all classes of the ordinary degree, *ib.*——Other recommendations, *ib.*

Beccles (Suffolk). Roberts' scholarships at Magdalene College open to natives of, *Warter, Ev. p.* 407.

Bedells. Mode of appointment and number of these officers; their duties, *Rep. p.* 11, 12——Annual amount derived by the three bedells from fees on degrees, *Rep. p.* 138; *Romilly, Ev. p.* 64.

Bedfordshire. Scholarship at Caius College, on the foundation of Dr. Caius, open to natives of, *Rep. p.* 186——Scholarship at Christ's College, on Harvey's foundation, open to a native of; present annual value thereof, *Cartmell, Ev. p.* 380; *Master and Fellows of Christ's College, Ev. p.* 393.

Fellowships and scholarships at Sidney Sussex College, on Sir F. Clark's foundation, restricted to natives of, *Rep. p.* 195; *Phelps, Ev. p.* 430——Scholarships at the same college, on Yeoman's foundation, restricted to natives of, *Phelps, Ev. p.* 431.

Begh's, St., Grammar School. Fellowship at Pembroke College, founded by Archbishop Parker, restricted to natives of Cumberland and Westmorland, educated at, *Rep. p.* 157——Scholarships at Pembroke College, similarly appropriated, *Rep. p.* 186; *Ainslie, Ev.*

Report, 1852—*continued.*

Begh's, St., Grammar School—continued.

Ev. p. 318——Scholars rarely come from St. Begh's school to this college, *Ainslie, Ev. p.* 320.

Bell Scholarships. Particulars as to these scholarships, *Rep. p.* 24——These scholarships are confined to freshmen, sons of clergymen; year when first given, *Wratislaw, Ev. p.* 299——Complaint made by Trinity Hall of being debarred from becoming candidates for the scholarships, *Geldart, Ev. p.* 338.

Belles Lettres. Neglect of the Belles Lettres, particularly as regards the language and literature of England; the importance of the study of the classical languages greatly over-rated, *Amos, Ev. p.* 124.

Belward, Dr. Bequest by, to Gonville and Caius College, for four poor scholars, *Chapman, Ev. p.* 328.

Bendish, Thomas. Books given by, to the library of St. John's College, *Tatham, Ev. p.* 403.

Benlowes, Edward. Books given by, to the library of St. John's College, *Tatham, Ev. p.* 403.

Bentley, Dr. Encouragement afforded by, to the establishment of the professorship of chemistry, *Rep. p.* 58——Also to the foundation of an observatory in connexion with the Plumian Professorship of Astronomy, *p.* 59.

Beresford, Rev. James. Fellowships at St. John's College founded by, 11 Henry VIII.; limitations as to kindred, &c., *Rep. p.* 160——Scholarships at the same college also founded by, *p.* 190.

Beridge, Mrs. Scholarship at Christ's College, founded by bequest of; present annual value, *Cartmell, Ev. p.* 381; *Master and Fellows of Christ's College, Ev. p.* 394.

Berkeley, Sir Maurice, Knt. Scholarship founded by, at Christ's College, 7 Henry VIII., *Rep. p.* 189; *Cartmell, Ev. p.* 378.

Beverley (*York*). Fellowships at St. John's College appropriated to natives of the town of, *Rep. p.* 160. 162.

Bibles and Prayer Books. Increase made in the buildings and establishment of the University Press to meet the demand for Bibles and Prayer Books, *Rep. p.* 135—— Schedule of prices of each description of Bible and Prayer Book, *p.* 136——Causes of the reduction of price, *ib.*

Account of the privilege possessed by the University of printing Bibles and Prayer Books, *Syndics of the Press, Ev. p.* 20——Account of amounts of duty on paper used for Bibles, &c., remitted in certain years, 1810–1850, *ib.*——Account of the number of Bibles, Testaments, and Prayer Books printed in the years 1810–1850, *p.* 21——Nett prices in certain years, *ib.*——Effect of the licence to print the Bible being extended to Scotland, *ib.*

Billingsley, Henry. Scholarships at St. John's College, founded by, 33 Eliz., *Rep. p.* 189.

Bilney, East (*Norfolk*). Fellowships at St. Peter's College, open to natives of, *Cookson, Ev. p.* 308.

Birchington (*Isle of Thanet*). Estate at, left by Mr. Robinson to St. John's College, *Rep. p.* 192.

Birkbeck Laboratory (*London University College*). Provision made by means of this institution for the manipulative instruction of students, *Rep. p.* 117.

Bishop Hatfield's Hall (*Durham*). Payment for tuition at this college, *Thompson, Ev. p.* 199.

Blackrode School (*Lancaster*). Exhibition at Pembroke College on Holmes' foundation, for a scholar from; amount of the allowance, *Ainslie, Ev. p.* 319; *Master and Fellows of Pembroke College Ev. p.* 322.

Blakesley, Rev. Joseph William, B.D. late Fellow and Tutor of Trinity College. (Analysis of his Answers to Queries.)

[*Queries as to Expenses and Tuition:*]

No means of diminishing the necessary expenses at the University, *Ev. p.* 147—— System pursued respecting tradesmens' bills; no power other than the adoption of such a system, to check the practice of credit; explanation of the usage of discommuning, *ib.* ——Suggestions for diminishing undergraduates' expenses, *ib.*——College staff of tutors, *p.* 147, 148——Hindrances to the complete development of the system of instruction, *p.* 148——Classification of students adopted, *ib.*——Studying with private tutors lessens the interest of students in the college lectures, *ib.*——The re-enactment of the Grace of 1781, restricting private tuition, is not to be recommended, *ib.*

Report, 1852—*continued.*

Blakesley, Rev. Joseph William, B.D. (Analysis, &c.)—continued.

[*Queries as to Expenses and Tuition*] —continued.

Number of foundation sizars at Trinity College, funds devoted to them, practice observed in admitting sub-sizars; poverty alone ought not to be a claim, *Ev. p.* 148—— A hall or college for poor students would not be attended with good results, *ib.*—— Description of the college and University examinations; the "previous examination" prejudicial, *p.* 149——Causes which operate unfavourably to the continuance of promising students at the University as professors, &c., *ib.*——Evils of the existing restrictions on fellowships, *p.* 149, 150——The number of professors ought to be increased, *p.* 150 ——The resident members of the senate should form a separate house, *ib.*——Authority that might be vested in them, *ib.*——Scheme for the formation of a professional fund, *ib.*——Sufficiency of the staff of lecturers and tutors at Trinity College, *ib.*——Manner in which a like efficiency might be secured to the smaller colleges, *ib.*

A reduction in the number of terms is desirable; modification suggested in the system of examinations, *Ev. p.* 150——No good would result from shortening the vacations, *ib.* ——Doubtful benefit of extending lectures through the whole length of the terms, *ib.* ——Reading parties are of common occurrence, the result depends on the character of the party, *p.* 151——The majority of the students of Trinity live in lodgings, which perhaps, is the safest plan, *ib.*——It would be advisable to modify the regulation prohibiting the residence of students who have not been admitted members of a college, *ib.* ——Advantages that would ensue from the revival of hostelries, *p.* 151, 152——Practice respecting Dissenters, *p.* 152.

Blomefield's Annals. This work quoted as to certain fellowships and scholarships at Gonville and Caius College, *Rep. p.* 158. 186.

Blomefield's History of Norfolk. Quoted with reference to the foundation of Trinity Hall *Rep. p.* 178——And as to Gonville and Caius College, *Chapman, Ev. p.* 324.

Blundell, Mr. Fellowships and scholarships at Sidney Sussex College, founded by; emoluments; term of tenure, *Rep. p.* 164. 195; *Phelps, Ev. p.* 430.

Blunt, Rev. J. J., B.D., *Margaret Professor of Divinity.* (Analysis of his Answers to Queries.)

[*Queries as to the Professorships:*]

Particulars respecting the foundation of the Margaret Professorship of Divinity, *Ev. p.* 86——Duties required by the statutes, *ib.*——Duties actually performed at the present time, *p.* 86, 87——System pursued as to lectures, *p.* 87, 88——Amount of original endowment, *p.* 87——Fees, *ib.*——Present annual value, *ib.*——Manner of appointment and qualifications requisite, *ib.*——There is no residence, *ib.*——Present condition of the study of theology in the University, *p.* 87, 88——Voluntary theological examination, *p.* 88——Compulsory attendance on lectures, *ib.*——Suggestions for the improvement of the study, *p.* 88, 89——Questions set at the voluntary examination, *p.* 89.

Blunt, Professor. Detail by the Commissioners of the duties discharged by Professor Blunt, as Lady Margaret reader, *Rep. p.* 47——Letter from Professor Blunt, dated 12th November, 1850, in answer to circular of Commissioners of 30th October, *Corr. p.* 9, 10.

Blythe, Mr. Scholarships at St. Peter's College founded by, in 1620, *Cookson, Ev. p.* 308.

Board for Carrying out Reforms in the University. Such a Board, with temporary powers, to be conferred by an Act of the Legislature suggested, *Rep. p.* 199.

Boards of Studies:

I. *Mathematical Studies:*

1. Origin, Powers, and Duties of this Board.
2. Its Operation.
3. Improvements in its Constitution suggested.

II. *Other similar Boards recommended:*

1. Generally.
2. Board of Classical Studies:
   - i. Opinions in favour of the Establishment of such a Board.
   - ii. Opinions adverse to its Foundation.
   - iii. Its proposed Powers and Functions.
3. Board of Legal Studies.
4. Board of Medical Studies.
5. Board of Moral Sciences Studies.
6. Board of Theological Studies.
7. Board of Natural Sciences Studies.

Report, 1852—*continued.*

Boards of Studies—continued.

I. *Mathematical Studies:*

1. Origin, Powers, and Duties of this Board:

Board of mathematical studies instituted of late years; its province; beneficial influence exercised by it, *Rep. p.* 22. 97——Circumstances which led to the formation of this Board, *Rep. p.* 106, 107; *Ainslie, Ev. p.* 26——The authority of the Board of Studies is merely recommendatory; satisfactory working of the Board, *Goodwin, Ev. p.* 237; *Mathison, Ev. p.* 249; *Philpott, Ev. p.* 262; *Stokes, Ev. p.* 267 *b*——Intention of the appointment of the Board of Mathematical Studies, *Philpott, Ev. p.* 262——Duties assigned to the Board, *Philpott, Ev. p.* 262; *Stokes, Ev. p.* 267 *b*——Course adopted by the Board with reference to the examination, *Whewell, Ev. p.* 273.

2. Its Operation:

The recently established Mathematical Board furnishes the means of making any alteration necessary as to the examinations, *Cooper, Ev. p.* 222——Preventive efficacy of the Board of Mathematical Studies, as to any mischievous tendency in the examinations, *Goodwin, Ev. p.* 236——Curtailment of the book-work questions recommended by the Board in 1849, and since made, *Mathison, Ev. p.* 249——The recommendations of the Board in their report of 1850, as to a limitation of the subjects of examination; approved of, *Mathison, Ev. p.* 249; *Mould, Ev. p.* 251——Manner in which the Board acts on the course of University reading, *Phelps, Ev. p.* 257——Substance of the recommendations embraced by the two reports already made by the Board, *Philpott, Ev. p.* 262; *Stokes, Ev. p.* 267 *b*——Concurrence in the recommendations of the Board, for the limitation or omission of the matters defined by them as requiring "a refined and laborious analysis," *Philpott, Ev. p.* 262——Effect of the recommendations of the Board on the discriminatory powers of the moderators and examiners, *Stokes, Ev. p.* 267 *b*——Limitation of subjects of examination already recommended, *ib.*

Copy of the report of the Board of mathematical studies for 1849, *Gaskin, Ev. p.* 230–234——Report of the same Board for the year 1850, *Gaskin, Ev. p.* 234–236; *Mould, Ev. p.* 252–254.

3. Improvements in its Constitution suggested:

Proposed constitution of this Board, *Rep. p.* 88——Proposed enlargement of the powers of the Board, *p.* 97.

II. *Other similar Boards recommended:*

1. Generally:

The establishment of similar Boards to that of mathematical studies, recommended for other departments of academical study, *Rep. p.* 23; *Whewell, Ev. p.* 274——Classification of existing professorships for the formation of Boards of studies, *Rep. p.* 88, 89——Proposed composition and functions of the Boards of study, *p.* 103, 104——Suggestion for a general council of studies, *p.* 104.

2. Board of Classical Studies:

i. Opinions in favour of the establishment of such a Board:

Advantages that would result from the establishment of a Board of classical studies; opinions in favour of and against the same, *Rep. p.* 88. 98, 99——Great advantage would arise to the University from the establishment of a board of classical studies, *France, Ev. p.* 283——A limitation of the passages proposed for examination in the classical tripos is to be desired; it might be effected by a Board to be formed for the superintendence of classical studies, *Jeremie, Ev. p.* 286——Advantages that would attend the establishment of a Board for the superintendence of classical studies, *Thring, Ev. p.* 289——The establishment of a Board of classical studies would be most desirable, *Warter, Ev. p.* 291——The establishment of a Board to superintend classical studies would be attended with great advantages, *Whewell, Ev. p.* 292——Probability that advantages would result from the establishment of a Board of classical studies, *Wood, Ev. p.* 297——A Board of classical studies similarly constituted to that for mathematics might satisfactorily regulate the course of classical reading, *Worsley, Ev. p.* 298.

ii. Opinions adverse to its Foundation:

Objection to any change in the constitution of the functionaries who conduct the classical examinations; the working of the mathematical Board must be ascertained before applying a similar Board to classical subjects; extent to which the objects proposed by such a Board are already secured, *Beatson, Ev. p.* 277——Reasons opposed to the appointment of a Board for the superintendence of classical studies, *Currey, Ev. p.* 281——No necessity exists for the appointment of a Board for the superintendence of classical studies, *Thompson, Ev. p.* 288.

Report, 1852—*continued.*

Boards of Studies—continued.

II. *Other similar Boards recommended*—continued.

2. Board of Classical Studies—continued.

iii. Its proposed Powers and Functions:

Proposed constitution of this Board, *Rep. p.* 88——Powers with which the proposed Board should be entrusted, *p.* 99——Nature of the superintendence that might beneficially be vested in a Board of classical studies, *Williams, Ev. p.* 294.

3. Board of Legal Studies;

The establishment of a Board of legal studies analagous to the Board of Mathematical studies recommended, *Maine, Ev. p.* 79——Remarks on Dr. Maine's suggestion, *Rep. p.* 34——Proposed constitution of the Board, *Rep. p.* 88. 91.

4. Board of Medical Studies:

Suggestion for the establishment of a medical Board or syndicate; its proposed constitution and powers, *Bond, Ev. p.* 86; *Fisher, Ev. p.* 132——Remarks on the proposition of Dr. Bond for the establishment of a Board of medical studies, *Rep. p.* 37——Proposed constitution of the Board, *p.* 88.

5. Board of Moral Sciences Studies:

A Board of moral sciences studies suggested; its proposed constitution, *Rep. p.* 88. 101.

6. Board of Theological Studies;

Great advantages that would result from the institution of such a Board, *Rep. p.* 32——Members of which it should be composed, *p.* 32–88.

7. Board of Natural Sciences Studies:

Proposed constitution of this Board, *Rep. p.* 88. 101.

Boating. See *Amusements.*

Bond, H. J. H., M.D., Regius Professor of Physic. (Analysis of his Answers to Queries.)

[*Queries as to the Professorships:*]

General condition of the study of physic at the University, *Ev. p.* 82——Scheme for its improvement, *p.* 83. 84——Plan for carrying out these suggestions, *p.* 84, 85——Suggestions relative to proceeding in physic by graduates, *p.* 85——Change proposed in the duties of the professor, *ib.*

Bonn, University of. No student is admitted until he has passed an examination in English or French, *Thompson, Ev. p.* 199.

Bookbinding. See *Libraries,* I.

Books:

1. *Mathematical Books.*
2. *Classical Books.*

1. *Mathematical Books:*

Particulars as to the books which a student aiming at high mathematical honours is expected to consult and master, *Rep. p.* 106——Lists of elementary mathematical books used in the University, *Gaskin, Ev. p.* 228; *Hopkins, Ev. p.* 244; *Stokes, Ev. p.* 267*c*; *Swainson, Ev. p.* 269——The books used are continually varying; general use made of MSS. instruction in conjunction with books; efficacy of this plan, *Goodwin, Ev. p.* 237——Few foreign books are in use, their substance being incorporated in English works; MSS. are extensively used, though not so much so as formerly, *Hind, Ev. p.* 238, 239——MSS. are in universal use; description of them, *Hopkins, Ev. p.* 244——Description of books and MSS. in use at the University, *Mould, Ev. p.* 251——Need that the University stands in of a set of really standard and satisfactory books, *Steventon, Ev. p.* 266——The system of resorting to any books and MSS. is to be deprecated, *p.* 266.

2. *Classical Books:*

The reading in classics should be limited to the best authors, *Roberts, Ev. p.* 287——Suggestion for the selection of classical works to be used at the examinations, *Thring, Ev. p.* 289——A selection of classical works to be used would be attended with some difficulty; extent to which such a selection might beneficially be made, *Warter, Ev. p.* 291——Reasons in favour of specifying the books which are to form the subject of classical reading, *Whewell, Ev. p.* 292——Reasons for which a distinction should be observed between the classical tripos and the scholarship examinations, in making a selection of classical reading, *Wood, Ev. p.* 297——A specification of books would be advantageous if confined to the classical tripos, *Wratislaw, Ev. p.* 300——Advantage if a knowledge

Report, 1852—*continued.*

Books—continued.

2. *Classical Books*—continued.

a knowledge of certain fixed books were required instead of verse composition in the classical tripos examination, *Wratislaw, Ev. p.* 300.

No necessity for specifying the books embraced in the classical course of study and examination, *Beatson, Ev. p.* 277——Reasons against a specification of the classical books to be used, *Currey, Ev. p.* 281——Inexpedient to fetter the discretion of examiners by restrictions on the selection of books; course recommended, *Williams, Ev. p.* 294.

See also *Manuscripts.*

Botanic Garden and Museum. Periods of formation thereof; grant made by the senate for the maintenance of the former, *Rep. p.* 62 —— Suggestions in regard thereto, *p.* 62, 63. —— Steps taken by the University of late years in the formation of a new garden, *Rep. p.* 121 —— Museum attached to the old garden; contains an herbarium, *p.* 122 —— Amount required for carrying out the requirements of this department, *ib.*—— Belief that the University will in time be able to effect them, *ib.*—— Students can frequent the garden for experimental research, but there is no attendant to preserve the specimens or render them available for study, *Henslow, Ev. p.* 113—— Efficient state of the botanic garden, *Babington, Ev. p.* 450——Buildings requisite; large outlay involved; how to be met, *ib.*——Proposed appropriation of the site of the old garden, *ib.*——Improvements in the constitution of the Board of managers and governors suggested, *p.* 451——Annual statement of expenditure desirable, *ib.*

Botany. General condition of this branch of study, *Henslow, Ev. p.* 114——Best means of enabling botany to assume a proper status in the University, *ib.*

Botany, Professorship of. Date of foundation of this professorship, *Rep. p.* 62, *Henslow, Ev. p.* 113——Augmentation made by Dr. Richard Walker in 1762, *Rep. p.* 62—— Lectures from, by the present Professor (Henslow), *ib.*——Botanical museum; grant made by the Senate for its maintenance, *ib.*——New arrangements necessary in future appointments to this professorship, *p.* 62, 63 —— Present amount and sources of income of the professorship, *p.* 72.

No duties absolutely annexed to the professorship; duties actually performed, *Henslow, Ev. p.* 113——Amount and source of endowment; fees taken; net value of the office, *ib.* ——Mode and terms of appointment, *ib.*——No residence, museum or library attached, *ib.*

Museum, with library and herbarium, under the Professor's care, as "Walker's Reader in Botany," *Henslow, Ev. p.* 113——Annual sum allowed by the University for the maintenance and augmentation of this museum, *ib.*——Opportunities afforded to students for experimental research, *ib.*——New arrangements that will be necessary on any future appointment to this chair, *p.* 113, 114——Capacity of the lecture-room attached to the professorship, *p.* 114——Fees charged to students attending the lectures, *ib.*

Bowbrickhill (*Bucks*). The living of, purchased by Queen's College in 1835; expense thereof, *Dalton, Ev. p.* 357.

Bowes School (*York*). Scholarship at Pembroke College, on Rev. C. Parkin's foundation, open to a student from; amount of stipend and term of tenure, *Rep. p.* 186; *Ainslie, Ev. p.* 318.

Bowtell, Mr. His salary and emoluments as assistant at the University library, *Power, Ev. p.* 51.

Bradley, Richard. Was the first professor of Botany; appointed as such in 1724, *Rep. p.* 62.

Branthwait, William. Scholarships at Caius College, founded by, in 1618, *Rep. p.* 187.

Bratton Fleming (*Devon*). Fellowship at Gonville and Caius College, on Wortley's foundation, to which a son of the rector of this parish has a claim, *Chapman, Ev. p.* 326.

Braybrooke, Lord, Visitor of Magdalene College. Letter from, dated 7th November 1850, in reply to circular of the Commissioners of 30th October, *Corr. p.* 2.

See also *Audley End.*

Bread. See *Assize of Bread.*

Brentwood (*Essex*). Exhibition at Christ's College, on Plume's foundation, open to natives of, *Cartmell, Ev. p.* 381; *Master and Fellows of Christ's College, Ev. p.* 394.

Bright, Rev. Mynors, Librarian of Magdalene College. (Analysis of his Answers to Queries.)

[*Queries as to the College Libraries:*]

Three libraries are united in that of Magdelene College, the original foundation one, the Peckard and the Pepysian; particulars as to each collection; deserving undergraduates are allowed to sit and read in the library; there is no special fund for the support of the library, the college occasionally buys books, *Ev. p.* 413.

Report, 1852—*continued.*

Broadbanke, Robert. Scholarship at Christ's College, founded by; present annual value thereof, *Cartmell, Ev. p.* 379; *Master and Fellows of Christ's College, Ev. p.* 393.

Broadley, C.B., LL.D., Member of the Caput Senatus. Letter from, dated 14 November, 1850, in answer to circular of the commissioners of 30 October, *Corr. p.* 8.

Brocher, Mr. Scholarships founded at Corpus Christi College out of a benefaction of, *Rep. p.* 188.

Brodrick, Mr. Property left by, to Trinity College, in 1843, *Master and Fellows of Trinity College, Ev. p.* 424.

Brooke, Henry James. Collection of shells presented by, to the Woodwardian Museum, *Sedgwick, Ev. p.* 118.

Brooks' Museum. Amount expended in preparations purchased at the sale of, *Rep. p.* 121.

Brougham, Lord Chancellor. Decision by, in regard to the Frankland Fellowship at St. Catharine Hall, *Philpott, Ev. p.* 362.

Brown, Rev. I. Exhibitions at Emmanuel College founded by, annual value, *Master and Fellows of Emmanuel College, Ev. p.* 427.

Brown, Rev. John. Legacy left by, to Trinity College, for the foundation of a scholarship, *Master and Fellows of Trinity College, Ev. p.* 423.

Brown, William Haig, M.A., Librarian of Pembroke College. (Analysis of his Answers to Queries.)

[*Queries as to the College Libraries:*]

The treasurer and bursar of the college have the care of the library, and the latter is librarian, *Ev. p.* 324; there is a manuscript catalogue; arrangement of the books, *ib.*; funds for library purposes, *ib.*——Number and description of the books, *ib.*——Regulations respecting admission, *ib.*

Browne's Medals. Particulars as to this prize established by Sir W. Browne; the value; and for what awarded, *Rep. p.* 24; *Ainslie, Ev. p.* 27; *Wratislaw, Ev. p.* 299.

Browne Scholarship. This scholarship (founded by Sir W. Browne) is open to the whole University, but the successful candidate must remove to St. Peter's College, *Rep. p.* 24; *Wratislaw, Ev. p.* 299.

Bryant, Jacob. Bequest of books by, to the library of King's College, *Okes, Ev. p.* 349.

Budd, George. See *Gonville and Caius College*, 9.

Buildings, Collegiate. See *College Buildings.*

Buildings of the University. Statement of the sums expended out of the University chest during the years 1821–1842 on the buildings of the University, *The Vice-Chancellor (Okes), Ev. p.* 16, 17.

Buchanan, Dr. Collection of Oriental MSS. presented by, to the University library, *Rep. p.* 127; *Power, Ev. p* 50.

Bunting, Richard. Exhibitions at Christ's College founded by; annual value, *Cartmell, Ev. p.* 378; *Master and Fellows of Christ's College, Ev. p.* 392.

Buntingford Grammar School (Herts). Preference shown to students of, as candidates for Ward's scholarships at Christ's College, *Master and Fellows of Christ's College, Ev. p.* 393.

Buntingford Scholarship (Christ's College). Founded by Dr. Ward, Bishop of Sarum; annual value; restrictions, *Cartmell, Ev. p.* 380; *Master and Fellows of Christ's College, Ev. p.* 393.

Burckhardt, ——. Oriental MSS. presented by, to the University library, *Rep. p.* 127; *Power, Ev. p.* 50.

Burgesses of Cambridge. Oath administered to the four burgesses by the University authorities; recommended to be abolished, *Rep. p.* 6, 7; *Ev. p.* 36.

Burghley, Lord. Allowance of scholars of St. John's College increased by, *Rep. p.* 193.

Burney Prize. Particulars as this prize, *Rep. p.* 32; *Ainslie, Ev. p.* 27.

Burnham Westgate (Norfolk). Scholarships at Christ's College on Bunting's foundation, with a preference to natives of this parish, *Cartmell, Ev. p.* 378; *Master and Fellows of Christ's College, Ev. p.* 392.

Bursar (University). The Vice-Chancellor is not assisted in the management of the University finances by any permanent officer, in the capacity of bursar, *The Vice-Chancellor (Okes), Ev. p.* 17——Doubtful advantage of appointing such an officer, *ib.*

Bursar,

Report, 1852—*continued.*

Bursar (*University*). Objections to the funds of the University being administered, and the accounts kept by the Vice-Chancellor, *Babington, Ev. p.* 452——Suggestion for the appointment of a paid officer as University bursar, controlled by a small syndicate, *ib.*

Burwell Manor. Annual produce of the Burwell manor and tithe rent charge; deductions therefrom, *Rep. p.* 138; *The Vice-Chancellor* (*Okes*), *Ev. p.* 15.

Bury St. Edmund's Grammar School. Spalding's scholarship at St. John's College, open to students from, *Rep. p.* 192. 194——Scholarship at Trinity Hall on Maptyde's foundation, open to students from, *Geldart, Ev. p.* 333.

Bushby, Dr. Scholarships at Trinity Hall, founded by, in 1577; value thereof, *Rep. p.* 187; *Geldart, Ev. p.* 333.

Bye Examinations. See *Examinations.*

Bye Fellowships. Nature of these fellowships explained, *Rep. p.* 167——Circumstances in which they originated, *ib.*——Objectionable features in the system which has led to these subordinate fellowships being made stepping stones to the more valuable ones on the foundation, *ib.*——Disadvantage which has arisen with respect to the fellowships, in consequence of the altered value of money, *p.* 168——Careful revision, under competent authority, which the bye fellowships demand, *ib.*

Queries circulated by the Commissioners relative to the bye fellowships of the several colleges, *Ev. p.* 302——Answers thereto in regard to the following colleges and halls, viz.: St. Peter's College, *Cookson, Ev. p.* 307, 308; Pembroke College, *Ainslie, Ev. p.* 318; Gonville and Caius College, *Chapman, Ev. p.* 326; Trinity Hall, *Geldart, Ev. p.* 333; Corpus Christi College, *Pulling, Ev. p.* 344; King's College, *Okes, Ev. p.* 348; Queen's College, *Dalton, Ev. p.* 355; St. Catharine Hall, *Philpott, Ev. p.* 362, 363; Christ's College, *Cartmell, v. Ep.* 376-378; St. John's College, *Tatham, Ev. p.* 397; Magdelene College, *Warter, Ev. p.* 405, 406; Trinity College, *Whewell, Ev. p.* 414; Emmanuel College, *Archdall, Ev. p.* 425; Sidney Sussex College, *Phelps, Ev. p.* 430, 431; Downing College, *Worsley, Ev. p.* 437.

Bysby, Humfry. Scholarship at Caius College, founded by, in 1570, *Rep. p.* 187.

C.

Caius College. See *Gonville and Caius College.*

Caius, Dr. A copy of the statutes given by Dr. Caius to Gonville and Caius College, with his will, &c., are in the library at Lambeth, *Rep. p.* 150——Particulars as to the fellowships founded by Dr. Caius; evils resulting from their being restricted to natives of Norwich or Norfolk; memorial of the senior fellows of Gonville and Caius College in regard thereto, *Rep. p.* 158; *Chapman, Ev. p.* 329——Particulars of the scholarships founded by Dr. Caius, at Gonville and Caius College; limitations thereof, *Rep. p.* 186; *Chapman Ev. p.* 327——New charter procured for Gonville and Caius College by, *Chapman, Ev. p.* 324——Complaint made of the restrictions in regard to the election of the master and fellows of Gonville and Caius College, introduced under statutes supposed to have been given by Dr. Caius in 1572, *Memorial from the three Fellows of Gonville and Caius College, Ev.* 449.

See also *Bateman, William, Bishop of Norwich. Gonville and Caius College.*

Cambridge Antiquarian Society. Small, though valuable, museum of antiquities formed by this society, *Babington, Ev. p.* 451.

Cambridgeshire. Fellowship at St. John's College, on Thimbleby's foundation, open to natives of, *Rep. p* 163——One of Cardinal Morton's scholarships at St. John's College, open to natives of, *p.* 192——Scholarships at Caius College, on the foundation of Dr. Caius, limited to natives of, *p.* 186——Newman's scholarship at Trinity College, open to natives of, *p.* 194——Scholarships at Trinity Hall, on Allen's foundation, appropriated to natives of the town or county, *Geldart, Ev. p.* 333—— Exhibition at Christ's College, on Tancred's foundation, open to natives of; present annual value, *Cartmell, Ev. p.* 379; *Master and Fellows of Christ's College, Ev. p.* 393.

"*Cambridge Education.*" This work referred to, *Whewell, Ev. p.* 206 *et seq.*

Cambridge Philosophical Society. Collections of zoological specimens in possession of the society; would form an excellent nucleus for a zoological museum, *Babington, Ev. p.* 451.

Cambridge System. See *Alterations in the Cambridge System. Out-of-College Men. Peacock on the Statutes. Poor Students.*

Cambridge, Town of. Answer to objections urged against Cambridge as not offering wherewith to form a medical school, *Fisher, Ev. p.* 129——Comparison with some of the Continental university towns, and with London and its medical schools, *ib.*——In what the opportunities for the study of medicine at Cambridge consist, *ib.*

Cambridge, Town of—continued.

Scholarships at Pembroke College appropriated to students from Perse's School, *Rep. p.* 187——Scholarships at Trinity Hall, on Allen's foundation, open to persons born in Cambridge town, *Geldart, Ev. p.* 333.

Camden Medal. Particulars as to this prize, *Rep. p.* 24; *Ainslie, Ev. p.* 27; *Wratislaw, Ev. p.* 299.

Camerarius, Dr. Lectures required to be delivered by the Woodwardian Professor of Geology, in refutation of Dr. Camerarius' "Discourse on Vegetation" and "State of Physic"; such lectures would be quite a mockery, *Sedgwick, Ev. p.* 115. 117.

Canon Law. Provision made in the statues of Trinity Hall for the study of the canon law, *Rep. p.* 178. 180. 182.

Canons of the Church of England. Remarks on the Thirty-sixth Canon, requiring subscription of such as are to be made ministers, *Rep. p.* 39 *et seq.*

Canterbury. Scholarship at Gonville and Caius College, appropriated to natives of, and educated at the school there, *Rep. p.* 187——Robinson's fellowships and scholarships at St. John's College, open to students from Canterbury school, *p.* 192. 194.

Canterbury, Archbishop of. Scholarship at Pembroke College in the gift of, or *sede vacante* by the dean and chapter, *Rep. p.* 187.

Capell, Mr. The Shakesperian collection of, is in Trinity College library, *Rep. p.* 134.

Caput Senatus. Constitution of this Council; mode of appointment, *Rep. p.* 13——Functions of the caput, *ib.*——Respects in which the caput has worked conveniently and usefully, *p.* 14——Greater liberty of action, however, desirable, *ib.*——Important changes in the appointment and functions of the caput recommended by the syndicate, *ib.*——New council suggested; how to be constituted, *p.* 14, 15——Approval of these propositions, *p.* 15.

The power exercised by the caput is a considerable evil; in what it consists; the appointment is bad, and should be changed, *J. J. Smith, Ev. p.* 191——Such a body is useful, but all important control should be exercised by a simple majority, *ib.*

Answers received by the Commissioners to their circular of the 30th October 1850, from the following members of the Caput, viz.: Dr. Cookson, *Corr. p.* 8; Dr. Broadley, *ib.*

Carey, Valentine, Bishop of Exeter. Law books given by, to the library of St. John's College, *Tatham, Ev. p.* 402.

Carnarvon, County of. Fellowship at Magdalene, on Hughes' foundation, College, open to natives of, *Warter, Ev. p.* 406.

Carr, Rev. Richard. Scholarships and fellowships at Christ's College, founded by; annual allowance, present proceeds, *Cartmell, Ev. p.* 379; *Masters and Fellows of Christ's College, Ev. p.* 392, 393.

Carter, Henry. Scholarship at Caius College, founded by, in 1504, *Rep. p.* 187.

Cartmell, Rev. J., D.D., Master of Christ College. (Analysis of his Answers to Queries.)

[*Queries as to the Colleges:*]

Particulars relative to the foundation of Christ's College, *Ev. p.* 370——Statuable directions, and present practice relative to the election of the head or master; the qualifications requisite in him; his tenure of office; residence, duties, powers, and emoluments, *p.* 370, 371——The like particulars as to the fellowships, *p.* 372-375——And also as to scholarships, *p.* 375, 376——Statement as to the bye or supplemental fellowships and scholarships of this college, *p.* 376-381.

Regulations for the admission of students over and above the members of the foundation, *Ev. p.* 381——Hours of Divine service in the college chapel, and attendance enforced thereat, *ib.*——Course of collegiate instruction and examinations; rewards for proficiency in the examinations, *p.* 381, 382——Attendance required at lectures, and in hall at dinner; hour at which the college gates and licensed lodgings are closed at night, *p.* 382——Regulations as to credit given to students, *p.* 383.

Estimate of the necessary expenses of the several classes of students, *Ev. p.* 383-385——Estimate of their actual expenses, *p.* 385——Provision made for the assistance of poor students, *ib.*——The further reduction of the necessary expenses of a student to a lower scale than at present is not practicable; difficulties and considerations involved in the adoption of stringent rules for checking extravagant habits, *p.* 385, 386——Means by which the college and University indirectly promote habits of regularity in students, *p.* 386——Difficulty of repressing the class of money-lenders who infest the University, *ib.*

Modifications

Report, 1852—*continued.*

Cartmell, Rev. J., D.D. (Analysis, &c.)—*continued.*

Modifications that might advantageously be made in the limitations and restrictions attached to certain of the fellowships, scholarships, and exhibitions at this college, *Ev. p.* 387——Instances are common of scholarships and exhibitions becoming ineffective from want of claimants locally qualified, *ib.*——Remarks as to a consolidation of any of the fellowships or scholarships, *ib.*——Table of actual total expenses of 104 studnts of this college, up to the time of their taking their first degree, in the years 1843–49 inclusive, *p.* 388, 389.

Cartmell, Dr. Letter from, dated 18th November 1850, in answer to circular of the Commissioners of 30th October, *Corr. p.* 6.

Cartwright, Mr. Scholarships at St. Catharine Hall, founded by; annual allowance, *Philpott, Ev. p.* 365.

Caston, Alice. Scholarships at Corpus Christi College, in 1618, *Rep. p* 188.

Casuistical Divinity. See *Moral Philosophy, Professorship of.*

Catalogues. Efforts made of late years in the different colleges to make and publish catalogues of their libraries; their value, *Rep. p.*134——Particulars as to the catalogues of several of the colleges, *ib.*——State of the catalogues of the Woodwardian Geological Museum, *Sedgwick, Ev. p.* 119.——*See* also *Libraries.*

Catharine St. Hall:

1. *The Mastership.*
2. *Fellowships.*
3. *Scholarships and Exhibitions.*
4. *Matriculations and Degrees.*
5. *Lectures and Examinations.*
6. *Students; their Expenses, Discipline, &c.*
7. *College Library.*

1. *The Mastership:*

The power of choosing the master is vested in the fellows, *Rep. p.* 152——Sources of emolument of the mastership, *p.* 154——Particulars as to the appointment, eligibility, duties and stipend of the master, as prescribed by the statutes; present practice as to the stipend and other emoluments, *Philpott, Ev. p.* 360, 361.

2. *Fellowships:*

Number of foundation and bye fellowships in this college, distinguishing whether open or restricted, *Rep. p.* 157——The election of fellows is restricted to candidates born in England only, *ib.*——No information furnished by this society as to the value of its foundation fellowships, *p.* 167——The incorporation of the bye with the foundation fellowships at this college recommended, *p.* 168——Academical standing required of candidates for fellowships, *p.* 169——Mode of election to the Frankland fellowship, *ib.*

Statutable regulations as to the mode of election to fellowships and qualifications, tenure, residence, duties and emoluments of fellows; present practice as to their duties and emoluments, *Philpott, Ev. p.* 361——Particulars as to the several bye fellowships, *p.* 362.

3. *Scholarships and Exhibitions:*

Number of scholarships at this Hall; proportion thereof appropriated; their annual value, *Rep. p.* 188——Scholarship at Trinity Hall, on Spicer's foundation, appropriated to a student from this college, *Geldart, Ev. p.* 332——Statutable injunction as to a scholar appointed to read the Bible during dinner; a usage not now practised, but this is the only mention of scholars, *Philpott, Ev. p.* 362——Detailed particulars relative to the different scholarships and exhibitions, *p.* 363. 367——Mr. Holway's scholarships have been ineffective for several years, from default of qualified claimants, *Ev. p.* 369——Consolidation of minor scholarships, *ib.*

Number of sizarships; their value, *Rep. p.* 195; *Philpott, Ev. p.* 181——Assistance given to poor students, *Philpott, Ev. p.* 369.

4. *Matriculations and Degrees:*

Table showing the number of matriculations at this college in the years 1800, 1810, 1820 and 1830, and in each of the ten years 1840 to 1850, *Romilly, Ev. p.* 66——Similar table of the number of degrees of the several grades granted in the same periods, *p.* 67–70——Total number of degrees granted in the last eight years, *p.* 70——Statutable conditions attached to the admission of students; qualifications now required of applicants for admission as students, *Philpott, Ev. p.* 367.

Report, 1852—*continued.*

Catharine, St., Hall—continued.

5. *Lectures and Examinations:*

List of the lectures given in this college; classification of the students; attendance is compulsory, *Philpott, Ev. p.* 180——College examinations for which students are required to prepare; rewards for proficiency, *p.* 181, 182. 368——No examination previous to admission, *p.* 182——College tutors and lecturers; the staff is sufficient, *p.* 183, 368——Course of instruction given to students, *p.* 367, 368.

6. *Students; their Expenses, Discipline, &c.:*

Average annual expense of a student at Catharine Hall, *Philpott, Ev. p.* 179——List of tradesmen's bills admitted into the quarterly accounts of the tutors, *ib.*——Estimate of the expenses of students, *p.* 369——It is not practicable to reduce the necessary expenses of college residence, *ib.*——Regulations as to credit given to students; suggestions for the restriction of extravagance, *ib.*

The students have not hitherto been permitted to visit in college during the long vacation; it has recently been determined to allow it; regulations intended to be enforced, *Philpott, Ev. p.* 184——Number of students belonging to the college usually residing in lodgings, *ib.*——Hours of Divine service in the college chapel; attendance required thereat, *p.* 367——Attendance required at lectures and at dinner in the college hall, and hour of closing the college gates at night, *p.* 368.

7. *College Library:*

Particulars as to the library of this society, *Rep. p.* 135——Salary and duties of the librarian; particulars of Dr. Sherlock's bequest, *Philpott, Ev. p.* 359. 367——Catalogue; classification of books; description of the library-room; arrangement of books; funds applicable to library purposes; average annual sum expended in the purchase and binding of books; number of books and MSS., and description of them; access to the library, *p.* 359, 360.

Catharine, St., Cree, Church (London), Parsonage of. Bequeathed to Magdalene College by Lord Audley, *Warter, Ev. p.* 404.

Cathedral Canonries. Suggestion for endowing additional professorships in the universities out of the revenues of suppressed canonries, *Rep. p.* 87.

See also *Ecclesiastical Preferments.*

Catton, Thomas. Books given by, to the library of St. John's College, *Tatham, Ev. p.* 403.

Cautions for Exercises. Nature thereof explained, *Rep. p.* 34. 37——Their objectionable character; proposition of the Syndicate for the Revision of the Statutes for their abrogation, *ib.*——Amount of the cautions exacted for the several exercises, *Ainslie, Ev. p.* 34——Conditions on which a caution is accepted, *ib.*——Annual amount derived from cautions for exercises not kept, *Romilly, Ev. p.* 64.

Cave, Mr. Scholarships at Clare Hall, founded by; their value, *Rep. p.* 185.

Celibacy. Effect of the condition of celibacy upon the prolonged residence of men of ability at the University, *Rep. p.* 82 *et seq*——The condition of celibacy now attached to the tenure of fellowship cannot conveniently be separated from the collegiate system, *p.* 84. 172——The condition, however, has prevented many men of ability from continuing their residence in the University, *p.* 172——Means by which it is proposed to remedy this disadvantage, *ib*——The statutes of some of the colleges are silent on this point; probable reason thereof; the omission supplied by the Elizabethan code, *ib.*——In revising the University and college statutes provision for the continuance of this rule will be necessary, *ib.*——A married man is ineligible for election to the Woodwardian Professorship of Geology, *Sedgwick, Ev. p.* 117——Not desirable that the tutor of a college should be married; nature of the influence which he can exercise, *Swainson, Ev. p.* 195——Highly objectionable to permit fellowships to be tenable after marriage; some evils result from heads of colleges even having that permission, *J. J. Smith, Ev. p.* 190.

See also *Fellowships,* 4.

Certificates. Amount of the stamp duty on the official certificates of degrees; the remission of this tax recommended, *Rep. p.* 140——Regulation passed by the senate, in October 1848, requiring certificates of attendance on lectures in certain cases, *Stokes, Ev. p.* 98——The certificates of residence demanded of students at the examination for the B. A. degree, are valuable as test of attendance at the college lectures; importance of these lectures, *Whewell, Ev. p.* 272.

Certificates required of a bachelor of physic on taking the degree of licentiate in medicine; they are more numerous than are needed, *Fisher, Ev. p.* 127——Certificates required of candidates for the M. D. degree, *ib.*

Report, 1852—*continued.*

Challis, Rev. J., Plumian Professor of Astronomy. (Analysis of his Answers to Queries.)

[*Queries as to the Professorships:*]

Name of founder of the Plumian professorship of astronomy, and date of foundation, *Ev. p.* 103——Duties prescribed by the original trustees, *ib.*——Duties actually performed, *p.* 104——Nature and amount of the original endowment, *ib.*——Subsequent augmentation, *p.* 104, 105——Emoluments from fees, *p.* 105——Present annual value, *ib.*——In whom the appointment to the professorship rests; qualifications required, *ib.*——Residence provided; library and apparatus attached, *ib.*——Practical and illustrative instruction afforded to students, *p.* 106——Means of promoting the study of astronomy, *ib.*——System of regular astronomical observations carried on, *ib.*——Desirableness of not increasing the duties of the professor, *ib.*——The superintendence of the observatory strictly the duty of the professor, *p.* 107——Suggestions for increasing the efficiency of the observatory and the professorship, *ib.*——Offer made of apparatus for magnetical observations, *ib.*——Great importance of increasing the efficiency of the observatory, *ib.*——General state of the study, *ib.*

Challis, Rev. J. Letter from, dated 7 November 1850, in answer to circular of the Commissioners of 30 October, *Corr. p.* 11.

Chalton-cum-Clanfield (Hants). Living of purchased by King's College, *Provost and Fellows of King's College, Ev. p.* 354.

Chancellor of the University. Authority given by the Code of Queen Elizabeth to the Chancellor, with the consent of the whole body, to frame statutes, *Rep. p.* 3——Mode of election of this officer, *ib.*——His duties performed in his absence by the Vice-Chancellor, *ib.*——Jurisdiction which the Chancellor is empowered to exercise on behalf of the University, *p.* 4——Authority and powers of the Chancellor's Court, *p.* 4, 5——Court of the Commissary, *p.* 5.

Chancellor's Medals. Particulars as to this prize, value, date of establishment and by whom founded, *Rep. p.* 24; *Ainslie, Ev. p.* 27; *Wratislaw, Ev. p.* 299——Objections to the requirement in the case of the Chancellor's medals, that the candidate shall have taken a senior optime's degree, *Warter, Ev. p.* 292——Advantage of the mathematical qualification required of candidates for the Chancellor's medals and the classical tripos, *Whewell, Ev. p.* 292——Suggestions with regard to the eligibility of candidates for the Chancellor's medals, *Williams, Ev. p.* 294; *Wratislaw, Ev. p.* 300.

See also *Examinations*, IV.

Changes in the Cambridge System. See *Alterations in the Cambridge System.*

Chantrey, Sir Francis. Specimens presented by, to the Woodwardian Museum, *Sedgwick, Ev. p.* 118.

Chapel Clerks:

St. Catharine Hall.—Annual stipend paid to the Chapel clerk; the duties appointed by the founder of the Bible clerkship discontinued, *Philpott, Ev. p.* 181. 363.

Queen's College.—The chapel clerks have their commons free during residence, with a scholarship of 15*l.* per annum each, *Peill, Ev. p.* 178; *Dalton, Ev. p.* 355——The chapel clerkships are sometimes called Sedgwick scholarships, *Dalton, Ev p.* 355

Trinity Hall.—This office formerly held by a sizar; duties performed; emoluments, *Master and Fellows of Trinity Hall, Ev. p* 342

Chapels of Colleges. Attendance of students at College Chapel; and how enforced, *Rep. p.* 145——Services performed; administration of the Holy Communion, *ib.*——Attendance on the chapel service in no case imposed as a punishment, *p.* 146.

Queries circulated by the Commissioners respecting the celebration of Divine service in the College chapels, and the regulations respecting attendance thereat and at the Holy Communion, *Ev. p.* 302——Answers thereto from the following colleges and halls, viz.: St. Peter's College, *Cookson, Ev. p.* 308, 309; Pembroke College, *Ainslie, Ev. p.* 319; Gonville and Caius College, *Chapman, Ev. p.* 326; Trinity Hall, *Getdart, Ev. p.* 336; Corpus Christi College, *Pulling, Ev. p.* 344; King's College, *Okes, Ev. p.* 348; Queen's College, *Dalton, Ev. p.* 355; St. Catharine Hall, *Philpott, Ev. p.* 367; Christ's College, *Cartmell, Ev. p.* 381; St. John's College, *Tatham, Ev. p.* 397; Magdalene College, *Warter, Ev. p.* 408; Trinity College, *Whewell, Ev. p.* 414; Emmanuel College, *Archdall, Ev. p.* 425; Sidney Sussex College, *Phelps, Ev. p.* 431; Downing College, *Worsley, Ev. p.* 438.

See also *Religious Services.*

Report, 1852—*continued.*

Chapman, Rev. Benedict, D.D., Master of Gonville and Caius College. (Analysis of his Answers to Queries.)

[1. *Queries as to the Colleges:*]

Particulars relative to the foundation of Gonville and Caius College, *Ev. p.* 324——Statutes given by Bishop Bateman, and subsequently by Dr. Caius, *p.* 324, 325——Visitors, *p.* 325——Manner of election of the master, *ib.*——Election of fellows; circumstances which vacate a fellowship; absence from residence permitted to fellows, *ib.*——Duties and stipends of the masters and fellows, *ib.*——Restrictions attached to fellowships, *ib.*——List of bye-fellowships founded at different periods, and statement as to scholarships and exhibitions, *p.* 326——Admission of students, *ib.*

Services performed at the chapel; regulations as to attendance thereat, and also in the hall at dinner time; hour of closing the college gates, *Ev. p.* 326——Subjects of the collegiate lectures and examinations; number of lectures given, and persons employed in giving them; number of examinations, *p.* 326, 327——The fellows conduct the examinations; there are fourteen fellows resident in the college, and they either hold offices or are engaged in public or private tuition, *p.* 327——Attendance of students at the college lectures, *ib.*

Amount of the daily college expenses of a student for eatables; there are no means of reducing this sum, *Ev. p.* 327——Many students go through the whole college course, including every expense, except private tuition, for 300 *l.* or 400 *l.*, *ib.*——Nature of the provision at this college for the assistance of poor scholars, *p.* 327, 328——The necessary expenses of college residence cannot be reduced; an Act of the Legislature alone can check habits of extravagance and facilities of credit, *p.* 328——Objections to the practice of discommuning tradesmen giving credit over 5 *l.*, without notice to the tutor; instances of fraudulent and extravagant charges made by tradesmen; difficulty of dealing with such cases, *ib.*

Nothing can justify a departure from the wishes of the founders, concerning the conditions attached to the elections to fellowships, &c., *Ev. p.* 328, 329.——No scholarships have been known to become ineffective from want of claimants, *p.* 329——Objections to a consolidation of those bye-fellowships, which are inadequate to the maintenance of a fellow, *ib.*——Many scholarships with small stipends are preferable to a few with large stipends, as they excite a greater number of students to compete for them, *ib.*

[2. *Queries as to the College Libraries:*]

The library of this college is in the care of the librarian, who is a fellow, appointed to that office by the master; a scholar acts as assistant; no regular attendance is required of them, *Ev. p.* 329——Catalogue, arrangement of books, and general description of library, *ib.*——Bequests to the library; sources from which the library is supported, *ib.*——Number and description of books and manuscripts, *ib.*——Admission permitted to the library, *p.* 329, 330——Extracts from the rules and regulations, as to the MSS., and locked up classes of books, *p.* 330.

Chapman, Dr. Letter from, dated 18th November 1850, in answer to circular of the Commissioners of 30th October, *Corr. p.* 4.

Charles II., King. Instructions issued by to the University authorities respecting subscription, *Rep. p.* 43——Letter of Charles II. on the subject of the regius professorships adverted to, *p.* 48 *note*, 49——Augmentation of the endowments of certain of the regius professorships by Charles II., *Rep. p.* 49——Grant of Charles II., dated 18th January 1663, confirming the Deed of Foundation of the Lucasian Professorship of Mathematics, *Rep. p.* 57; *Stokes, Ev. p.* 96——Grant of Charles II., dated 20th April 1685, *Stokes, Ev. p.* 97——Letter of Charles II. in 1679, authorizing the University to confer the degree of M. A. on a baronet or knight, although he may not have complied with the usual forms, *Ainslie, Ev. p.* 29.——*See* also *James I.*

Charters of Colleges. Usual terms of, and powers conferred by, the charters granted by the Crown to colleges on their foundation, *Rep. p.* 150——Important information conveyed by these charters as to the power of the Crown in regard to changing and reconstructing the early collegiate foundations, *ib.*

Chelmsford (Essex). Scholarship at Christ's College, on Plume's foundation, open to natives of, *Cartmell, Ev. p.* 381; *Master and Fellows of Christ's College, Ev. p.* 394.

Chemistry. Rapid extension of the study of the science of chemistry, *Rep. p.* 102——Suggestion for the appointment of a second professor, *ib.*——The study of chemistry hitherto discouraged in the University; the recent establishment of the natural sciences tripos expected to remove this objection, *Cumming, Ev. p.* 102.

Chemistry, Professorship of. Date of foundation of this professorship, *Rep. p.* 58——Mode of election, *ib.*——Stipend, and from what source derived, *p.* 58. 73——Remarks relating thereto, *p.* 58——Date of foundation of this professorship; duties annexed, and how

Report, 1852—*continued.*

Chemistry, Professorship of—continued:

how performed, *Cumming, Ev. p.* 102——Original endowment; emoluments from fees; total annual value, *ib.*——Mode of appointment to the office; no conditions of eligibility or tenability, *ib.*——No residence, museum, or apparatus, *ib.*

Cherbury Parish (*Salop*). Scholarships at St. John's College limited to natives of, *Rep. p.* 189.

Cherry, Benjamin. Scholarship at Clare Hall, founded by; value thereof, *Rep. p.* 185.

Chester, Diocese of. Fellowships of St. John's College limited to persons born within, *Rep. p.* 163.

Chesterfield Parish (*Derby*). Fellowships at St. John's College, open to natives of, *Rep. p.* 160.

Chetwode, Dr. Scholarship at Trinity Hall founded by in 1734; annual value thereof, *Geldart, Ev. p.* 333. 335.

Chinnock, East, Rectory. Gift of, to Corpus Christi College by Hon. Roger Manners for the foundation of four scholarships, *Rep. p.* 188.

Christ Church (*Oxford*). Approval of the annexation of canonries of, to professorships in the University of Oxford, *Rep. p.* 87.

Christian Preacher and Christian Advocate (*Hulsean*). Date of foundation of this office, *Rep. p.* 69——Amount of stipend, *ib.*——Period for which, and by whom elected, *ib.*——Duties, *ib.*——Decree in Chancery of 1830, *ib.*——Remarks in regard thereto, *ib.*

CHRIST'S COLLEGE:

1. *Foundation of the College.*
2. *Revenues and Expenditure.*
3. *The Mastership*
4. *Fellowships.*
5. *Scholarships.*
6. *Sizarships.*
7. *Matriculation and Degrees.*
8. *Lectures and Examinations.*
9. *Students; their Discipline and Expenses.*
10. *College Library.*

1. *Foundation of the College:*

Particulars relative to the foundation of Christ's College, *Cartmell, Ev. p.* 370.

2. *Revenues and Expenditure:*

Average gross and net annual income of Christ's College, derived from estates in land, houses, and tithe rent charges; *Master and Fellows of Christ's College, Ev. p.* 389, 390——Income derived from funded property and Exchequer Bills, from rents of rooms, fees, &c., and other sources, *p.* 390, 391——Total gross and net income, *p.* 391——Expenditure of the college; sums received by the master, fellows and scholars, *ib.*——Sums received by the master, fellows and scholars from the foundation of Sir John Finch and Sir Thomas Baines, *p.* 392——List of particulars relative to the several exhibitions, *p.* 392–394——Manner in which the table of the college hall is supported, *p.* 394——There are always four and sometimes more sizars, but there is no statutable provision for them, *ib.*——Expense of keeping up the collegiate buildings, *ib.*——Repair of church chancels, *ib.*——Annual sums expended in prizes or rewards for the encouragement of learning, and in donations to charities, *ib.*——Miscellaneous purposes to which the college income is also applied *p.* 394, 395——Number of beneficial leases which have expired of late years; practice of the college in respect to beneficial leases, *p.* 395——There is no special fund for the purchase of advowsons; advowsons purchased at different periods; assistance afforded by the college to the small livings in its patronage, *ib.*——Additions made to the college buildings in late years, *p.* 396——Restrictions as to the election to fellowships and scholarships, but might advantageously be removed, *ib.*——In failure of claimants qualified for certain exhibitions, the emoluments of such exhibitions might with advantage be bestowed upon other deserving students of the college, *ib.*

Gross income of the college at the present time, *Rep. p.* 196——Remarks on the measures taken by the college for running out beneficial leases, *p.* 197.

3. *The Mastership:*

The power of choosing the master is vested in the fellows, *Rep. p.* 152——Sources and amount of emolument of the mastership, *p.* 154——Statutable directions and present practice relative to the election of the head or master; the qualification requisite in him; his tenure of office, residence, duties, powers, and emoluments, *Cartmell, Ev. p.* 370, 371.

Report, 1852—*continued.*

CHRIST'S COLLEGE—continued.

4. *Fellowships:*

Number of foundation and bye fellowships in this college, distinguishing whether open or restricted, *Rep. p.* 157——Value of a foundation fellowship, *p.* 167——Academical standing required of candidates for fellowships, *p.* 169——Vacancies in the fellowships are required to be filled up within one month; an annual election recommended *p.* 170——Requirements of the statutes as to fellows entering Holy Orders; the period within which this is to be complied with recommended to be extended, *p.* 171.

Detailed particulars as to the several fellowships; conditions of eligibility and tenure, duties, powers, and emoluments, *Cartmell, Ev. p.* 372–375——Statement as to the bye or supplemental fellowships and scholarships, *p.* 376–381.

The election of fellows is confined to candidates born in England and Wales, *Rep. p.* 157——Particulars as to the limitations to which the twelve foundation fellows of this college are subject, *p.* 159——Recommendations for throwing open these fellowships, *ib.*——Other fellowships added by Edward VI., Sir J. Finch, and Sir T. Baines. *p.* 160——Christ's the only college in which restrictions as to the place of birth, &c., in the election to fellowships are retained, *p.* 165——Modifications that might advantageously be made in the limitations and restrictions attached to certain of the fellowships, scholarships, and exhibitions of this college, *Cartmell, Ev. p.* 387——Remarks as to a consolidation of any of the fellowships or scholarships, *ib.*

5. *Scholarships:*

Number of scholarships at this college; proportion thereof restricted; value thereof; mode of election, and other particulars, *Rep. p.* 189; *Gunson, Ev. p.* 163; *Cartmell, Ev. p.* 375, 376——Instances are common of scholarships and exhibitions becoming ineffective from want of claimants locally qualified, *Cartmell, Ev. p.* 387——Mr. Tancred's deed of settlement, *App. p.* 471.

6. *Sizarships:*

Number of sizarships; qualifications required, *Rep. p.* 195; *Hildyard, Ev. p.* 166; *Shaw, Ev. p.* 186; *J. Smith, Ev. p.* 192; *Swainson, Ev. p.* 193; *Wratislaw, Ev. p.* 213; *Cartmell, Ev. p.* 385.

7. *Matriculations and Degrees:*

Number of students entered at Christ's College, in each year ending 10th October 1844 to 1848, *Rep. p.* 145——Summary of the number of members of the college in 1851, *ib.*——Number of residents on 14th November 1851, *ib.*——Table showing the number of matriculations at this college in the years 1800, 1810, 1820, and 1830; and in each of the ten years 1840 to 1850, *Romilly, Ev. p.* 66——Similar table of the number of degrees of the several grades granted in the same periods, *p.* 67–70 —— Total number of degrees granted in the last eight years, *p.* 70 —— Regulations for the admission of students over and above the members of the foundation, *Cartmell, Ev. p.* 381.

8. *Lectures and Examinations:*

Statement of the lectures given at this college; classification of students, *Gunson, Ev. p.* 162; *Shaw, Ev. p.* 185; *J. Smith, Ev. p.* 191; *Swainson, Ev. p.* 193; *Wratislaw, Ev. p.* 212; *Cartmell, Ev. p.* 381, 382——The college has a competent staff of tutors and lecturers, *Gunson, Ev. p.* 162. 164; *Shaw, Ev. p.* 186; *J. Smith, Ev. p.* 191; *Swainson, Ev. p.* 195; *Wratislaw, Ev. p.* 215——The staff is not enough, *Hildyard, Ev. p.* 165——Tabular statement of the course of study pursued at Christ's College, *Wratislaw, Ev. p.* 214.

Account of the college examinations; there is no examination previous to admission *Gunson, Ev. p.* 163; *Shaw, Ev. p.* 186; *J. Smith, Ev. p.* 192; *Swainson Ev. p.* 195; *Wratislaw, Ev. p.* 213, 214; *Cartmell, Ev. p.* 381, 382——Witness, whilst a tutor, kept up a matriculation examination, *Hildyard, Ev. p.* 166.

9. *Students; their Discipline and Expenses:*

Students are allowed to reside in college during the long vacation; permission is never withheld from a deserving student; regulations enforced, *Gunson, Ev. p.* 164; *Shaw, Ev. p.* 186; *J. Smith, Ev. p.* 192; *Swainson, Ev. p.* 196; *Wratislaw, Ev. p.* 216—— Part of the students of this college reside in lodging-houses, *Gunson, Ev. p.* 164; *Shaw, Ev. p.* 186; *J. Smith, Ev. p.* 192; *Swainson, Ev. p.* 196; *Wratislaw, Ev. p.* 216—— Hours of Divine service in the college chapel, and attendance enforced thereat, *Cartmell, Ev. p.* 381——Attendance required at lectures, and in the hall at dinner; hours at which the college gates and licensed lodgings are closed at night, *p.* 382.

Actual expenses of students at this hall, *Rep. p.* 148——The necessary expenses of students are not large; average amount at Christ's College, *Hildyard, Ev. p.* 165—— Estimate of the necessary expenses of the several classes of students, *Cartmell, Ev. p.* 383–385——Estimate of their actual expenses, *p.* 385——The further reduction of the necessary

necessary expenses of a student to a lower scale than at present is not practicable; difficulties and considerations involved in the adoption of stringent rules for checking extravagant habits, *Cartmell, p.* 385, 386——Table of actual total expenses of 104 students of this college up to the time of their taking the first degree, in the years 1843–49 inclusive, *p.* 388, 389.

Regulations as to credit given to students, *Cartmell, Ev. p.* 383——Means by which the College and University indirectly promote habits of regularity in students, *p.* 386.

10. *College Library:*

Particulars as to the College library, *Rep. p.* 135.

Christ's Hospital. Scholarships at St. Peter's College for students from Christ's Hospital, *Rep. p.* 185.

Exhibitions at Pembroke College for students from this institution; how far prejudicial to the college to have so many students from one school attracted by the largeness of the allowances, *Rep. p.* 186; *Ainslie, Ev. p.* 320——Exhibitions at Pembroke College, on Moses' foundation, for scholars from; amount of the allowance, *Ainslie, Ev. p.* 319——Present emoluments attached to these exhibitions, *Master and Fellows of Pembroke College, Ev. p.* 322.

Preference shown to students from Christ's Hospital as candidates for the Barnardiston scholarship at St. Catharine Hall; annual value, *Philpott, Ev. p.* 364, 365.

Church of England. High importance of the University taking a leading part in promoting the education of the clergy, *Rep. p.* 31, 32.

Circulars issued by the Commissioners. Copy of circular issued at the outset of the inquiry, dated 30 October 1850, together with answers thereto, *Corr. p.* 2 *et seq.*——Further circular, dated 14 May 1851, addressed to those heads of colleges who had not previously furnished the desired information, *p.* 12——Circular, dated 5 November 1851, enclosing questions relative to the revenues of the University, *Ev. p.* 14——Circular, issued 15 May 1851, with queries relative to the printing press of the University, *p.* 18——Queries circulated by the Commissioners relative to the period of residence, course of study and examinations required for the several degrees, and as to the maintenance of discipline, fees payable, &c., *p.* 22——Circular, dated December 1850, issued by the Commissioners, enclosing queries relative to the state of the University library, *p.* 48——Circular, dated December 1850, addressed to the registrary of the University, relative to the duties, &c. of that office, *p.* 62——Circular, dated 20 November 1850, enclosing queries relative to the several professorships, *p.* 74——Circular, dated February 1851, enclosing queries relative to the University lectures, *p.* 75——Circular, dated 18 February 1851, enclosing queries relative to expenses and tuition, *p.* 140——Circular, dated December 1850, relative to the mathematical studies and examinations, *p.* 220——Circular (without date) relative to classical studies and examinations, *p.* 276——Circular, dated December 1850, enclosing queries respecting the regulations by which each college is governed; its fellowships, &c. &c., *p.* 302——Circular, dated 5 November 1851, with queries relative to the revenues and expenditure of the colleges, *p.* 303——Circular, dated February 1851, enclosing queries relative to the college libraries, *p.* 305.

Civil Engineering. Neglect of the science of civil engineering; necessity for a course of instruction, *Rep. p.* 26. 97——Lectures given by Professor Willis, touching upon the mechanics of engineering, *p.* 97——Fitness of Cambridge for a school of civil engineering, *p.* 98——Recommendations of the Commissioners in regard hereto; a new professorship for this branch of study suggested, *p.* 98. 102——Want of lectures on civil engineering, *Amos, Ev. p.* 124.

Civil Law, Faculty of. Requirements of the statutes in regard to students proceeding to the degree of bachelor of law; relaxations in actual practice, *Rep. p.* 33——The like, in regard to the degree of doctor of laws, *p.* 34——Recommendation of the Syndicate for the Revision of the Statutes, that this faculty be in future denominated the Faculty of Law, *ib.*——Other changes suggested by the Syndicate, *ib.*——Board of Legal Studies suggested by Dr. Maine, *ib.*——Provision made in the statutes of Trinity Hall for the study of civil law, *p.* 178. 180. 182.

General condition of the study; motives influencing certain classes of students in seeking degrees in this faculty, *Maine, Ev. p.* 78——Conditions exacted for degrees in law; course of study pursued; examinations and exercises enforced, *ib.*——Methods proposed of rescuing the lower degrees from the discredit attached to them considered, *p.* 78, 79——Necessity for assimilating the Faculty of Law to that of Arts, *p.* 79——Copy of the notice published by the professor, as a guide to persons desirous of proceeding in law, *p.* 80.

Report, 1852—*continued.*

Civil Law, Regius Professorship of. History of the foundation of this professorship; stipend, duties, &c., *Rep. p.* 48. 52 *et seq.*——Inadequacy of the stipend, *p.* 54——Reference to the evidence of Dr. Maine on the subject of the professorship, *ib.*——Concurrence of the Commissioners in his suggestions; recommendations founded thereon, *p.* 55, 56——Particulars as to the amount and sources of income of the present professor, *p.* 72.

Date of foundation of this professorship, *Maine, Ev. p.* 77——Duties of the professor, as prescribed by the Elizabethan statutes; duties actually performed, *ib.*——Endowment of the professorship; additional stipend lately conferred by the Crown; emoluments from fees, *ib.*——Mode of appointment of the professor; term of office, *p.* 78——No residence annexed to the professorship; Trinity Hall allow the professor a set of rooms on payment of the usual rent, *ib.*——The lectures are delivered in the law school, for which the professor pays an annual sum to the University, *ib.*——Inadequacy of the professor's income; objections to the fees accruing from degrees, *p.* 79.

Clare Hall:

Letter from the master of Clare Hall, dated 28 January 1852, declining to answer the queries propounded by the Commissioners in their circular of 30 October 1850, *Corr. p.* 3.

Number of students entered at Clare Hall in each year ending 10 October 1844 to 1848, *Rep. p.* 145——Summary of the number of members of the college in 1851, *ib.*——Number of residents on 14 November 1851, *ib.*——Table showing the number of matriculations at this hall in the years 1800, 1810, 1820, and 1830, and in each of the ten years, 1840 to 1850, *Romilly, Ev. p.* 66——Similar table of the number of degrees of the several grades granted in the same periods, *p.* 67–70——Total number of degrees granted in the last eight years, *p.* 70.

The power of choosing the master is vested in the ten senior fellows, *Rep. p.* 152——No information furnished as to the emoluments of the master, *p.* 156.

Number of foundation and bye-fellowships at this college, distinguishing whether open or restricted, *Rep. p.* 157——No information furnished by the society as to the value of its foundation fellowships, *p.* 167——Academical standing required of candidates for fellowships, *p.* 169.

Number of scholarships at this college; proportion thereof restricted; their value, *Rep. p.* 185, 186——Scholarship at Trinity Hall on Spicer's foundation appropriated to a student from this college, *Geldart, Ev. p.* 332.

Number of sizars now admitted at this college, *Rep. p.* 195.

Contents and condition of the library of Clare Hall, *Rep. p.* 135; *Power, Ev. p.* 60.

Clark, Sir Francis. Fellowships and scholarships at Sidney Sussex College founded by; annual value, *Rep. p.* 195; *Phelps, Ev. p.* 430——Present annual income of estate left by, to Sidney College, *Master and Fellows of Sidney Sussex College, Ev. p.* 434.

Clark, Rev. W., M.D., Professor of Anatomy. (Analysis of his Answers to Queries.)

[*Queries as to the Professorships:*]

Particulars of foundation of the Professorship of Anatomy, *Ev. p.* 107——Duties assigned to the professorship, *p.* 108——Alterations made therein, *ib.*——Duties actually performed at the present time, *ib.*——No original endowment, *ib.*——Amount of subsequent endowment, *ib.*——Annual income from fees and other sources, *p.* 108, 109——Present annual value, *p.* 109——By whom appointment is conferred, and qualifications requisite, *ib.*——Statement as to residence, museum, &c., *ib.*——Opportunities afforded to the students for dissections, *ib.*——Suggestions for a modification of the present system of instruction, *p.* 109, 110——Present condition of the study, *p.* 110.

Clark, Rev. Dr. W. Enhancement of the anatomical collection by the personal labour bestowed by Dr. Clark upon it, *Rep. p.* 121——Letter from, dated 19 November 1850, in answer to circular of the Commissioners of 30 October, *Corr. p.* 11.

Clarke, Rev. Christopher. Exhibition at Christ's College, founded by; present value, *Cartmell, Ev. p.* 379; *Master and Fellows of Christ's College, Ev. p.* 393.

Clarke, Dr. Edward Daniel. The first professor of mineralogy, *Rep. p.* 66——Large attendance given upon his lectures, *ib.*——Purchase of his mineralogical collection, *Rep. p.* 123.

Clarke, Robert. Scholarship at St. John's College founded by, *Rep. p.* 189.

Clarke, Rev. Thomas. Estate given by, for the support of Queen's College library, *Dalton, Ev. p.* 358.

Clarke,

Report, 1852—*continued.*

Clarke, Rev. W. B. Specimens presented by, to the Woodwardian Museum, *Sedgwick, Ev. p.* 118.

Classes. Project for the formation of University classes by M. A.'s, acting as sub-professors, suggested as a means of doing away with private tuition, *Rep. p.* 77.

Classical Studies and Examinations. Queries addressed by the Commissioners to the heads of the several colleges, the classical tutors and lecturers, and the examiners for the classical tripos for the past ten years, *Ev. p.* 276——Answers thereto from the following, viz.: Rev. B. W. Beatson, fellow of Pembroke College, *p.* 277 —— Rev. E. M. Cope, fellow of Trinity College, *p.* 277-279 —— Rev. G. Currey, late fellow and tutor of St. John's College, *p.* 279-282——Rev. F. France, fellow and tutor of St. John's College, *p.* 282-286——Rev. W. G. Humphry, fellow of Trinity, *p.* 286——Dr. Jeremie Regius Professor of Divinity, *p.* 286——J. Roberts, fellow of Magdalene College, *p.* 287, ——Rev. W. H. Thompson, fellow and tutor of Trinity College, *p.* 287, 288—— H. Thring, fellow of Magdalene College, *p.* 288-290——Rev. E. Warter, fellow and tutor of Magdalene College, *p.* 290-292——Dr. Whewell, master of Trinity College, *p.* 292——Rev. R. Williams, fellow and late tutor of King's College, *p.* 293-296—— Rev. W. S. Wood, late fellow of St. John's College, *p.* 296, 297——Rev. T. Worsley, master of Downing College, *p.* 298——Rev. A. H. Wratislaw, fellow and tutor of Christ's College, *p.* 298-300.

Particulars as to the classical prizes awarded by the University, *Rep. p.* 24——Excessive cultivation of philology to the exclusion of Belles Lettres; young men often quit the University with the highest mathematical and classical honours who have no habituation with the English language, *Amos, Ev. p.* 124——Among the great mass of mankind the compulsory study of Greek and Latin authors is a misapplication of time, *ib.*

Classification of Students. See *Lectures.*

Claypoole, Sir J. Scholarships at St. Catharine Hall founded by; yearly allowance, *Philpott, Ev. p.* 364. 369.

Clement, VI., Pope. Bull granted by, dated at Avignon 13 October 1349, referred to, *Rep. p.* 178.

Clere, Elizabeth. Fellowship at Gonville and Caius College founded by, *Rep. p.* 158.

Clerk of Accounts. The appointment of such an officer to assist the Vice-chancellor in the management of the University affairs recommended, *Rep. p.* 142.

Cocker, Rev. John, m. a., Librarian of St. Peter's College. (Analysis of his Answers to Queries.)

[*Queries relative to the College Libraries:*]

The librarian of this college is selected annually from among the fellows, *Ev. p.* 315 ——Duties performed by him; no assistant librarian, *ib.*——There is a MS. catalogue of the library; manner in which the books are arranged, *ib.*——Average annual amount of the income of the library and of the expenditure for books and binding, *ib.*——Amount of the librarian's stipend; the college provides, from their general funds, for the insurance of the books and the repair of the substantial fabric of the library building, *ib.*—— Number and description of the books; bequests and donations made to the library at different periods, *ib.*——Privilege of entering the library and borrowing books, *ib.*—— Admission of strangers, *ib.*——Regulations respecting the library, *p.* 316.

Cocket, Lady. Scholarship at St. Catharine Hall founded by; annual stipend, *Philpott, Ev. p.* 364. 369.

Cokefield School. Scholarship at Trinity Hall on Spicer's foundation appropriated to a student from, *Geldart, Ev. p.* 332.

Colchester School. Scholarships at St. John's College, on the foundation of Ambrose Gilbert, limited to students from, *Rep. p.* 191. 194——Another scholarship at the same college, on Lewis's foundation, also open to students from this school, *p.* 191.194.

College Libraries. See *Libraries.*

College of Physicians. Effect of the relaxation of the restrictive regulations of the college respecting admission to their fellowships in lessening the number of medical degrees taken at the University, *Rep. p.* 92.

College of Preceptors. See *Preceptors, College of.*

Report, 1852—*continued.*

Colleges:

1. *General Particulars as to the Colleges of this University.*
2. *Queries circulated by the Commissioners, with Answers thereto, relative to the Collegiate System of Instruction.*
3. *Similar Queries relative to College Buildings.*

1. *General Particulars as to the Colleges of this University:*

Present number of colleges and halls; object of these institutions at the earlier periods of the University, *Rep. p.* 2.——The accommodation afforded in them is inadequate; consequent necessity for lodgings, *ib.*——Respects in which the present domestic system of colleges conduces to moral discipline and academical austerity, *p.* 16——Origin of colleges; earlier foundations at Cambridge, *p.* 143——Foundation of hostels, *ib.*——Supercession of hostels by the colleges, *ib.*——Inexpediency of reverting to the ancient practice, so far as to allow of matriculated students of the University not attached to any college or hall, *ib.*——Any extension of the benefits of the University must be sought in a corresponding growth of the collegiate system, *p.* 143, 144——Lodgings in the town; regulations enforced, *p.* 144——Table exhibiting the numerical condition of the several colleges, *p.* 145——College discipline and expenses, *p.* 145-149——Charters and statutes, *p.* 150-152——Elections of heads of colleges, *p.* 152,153——Their emoluments, *p.* 153-156——Fellowships in the several colleges, *p.* 156-172——Scholarships, *p.* 185-195——Sizarships, *p.* 195, 196——College revenues, *p.* 196-199——Visitors of colleges, *p.* 199——Influence opposed to any modification of the present collegiate system, *Hopkins, Ev. p.* 245, 246. 248.

2. *Queries circulated by the Commissioners, with Answers thereto, relative to the Collegiate System of Instruction:*

Queries circulated by the Commissioners respecting the course of collegiate instruction given to the students, and its relation to the public examinations of the University, the use of college examinations, and how conducted, *Ev. p.* 302——Answers to the foregoing from the following colleges and halls, viz.: St. Peter's College, *Cookson, Ev. p.* 309——Pembroke College, *Ainslie, Ev. p.* 319——Gonville and Caius College, *Chapman, Ev. p.* 326, 327——Trinity Hall, *Geldart, Ev. p.* 336——Corpus Christi College, *Pulling, Ev. p.* 344——King's College, *Okes, Ev. p.* 348——Queen's College, *Dalton, Ev. p.* 355, 356——St. Catharine Hall, *Philpott, Ev. p.* 367, 368——Christ's College, *Cartmell, Ev. p.* 381, 382——St. John's College, *Tatham, Ev. p.* 397——Magdalene College, *Warter, Ev. p.* 408——Trinity College, *Whewell, Ev. p.* 414——Emmanuel College, *Archdall, Ev. p.* 426——Sidney Sussex College, *Phelps, Ev. p.* 431, 432——Downing College, *Worsley, Ev. p.* 438.

3. *Similar Queries relative to College Buildings:*

Queries circulated by the Commissioners respecting the annual expense of maintaining the collegiate buildings, and the source whence the same is defrayed; also as to the additions made in recent years, *Ev. p.* 304——Answers thereto from the following, viz.: St. Peter's College, *Ev. p.* 313, 314——Pembroke College, *p.* 323——Trinity Hall, *p.* 342, 343——King's College, *p.* 352. 354——Queen's College, *p.* 357——Christ's College, *p.* 394. 396——St. John's College, *p.* 400, 401——Trinity College, *p.* 423, 424——Emmanuel College, *p.* 428——Downing College, *p.* 443. 445.

Collins, John, M.D. Bequest by, to the library of St. John's College, *Tatham, Ev. p.* 402.

Colne (Huntingdon). Fellowship at St. Peter's College restricted to natives of, *Cookson, Ev. p.* 308.

Colonial and Missionary College. Such a college a desideratum in this University, *Crowfoot, Ev. p.* 158.

Combe, F. Property bequeathed by, to Sidney Sussex College in 1641; present annual value, *Phelps, Ev. p.* 431; *Master and Fellows of Sidney College, Ev. p.* 434.

Commissary Court. Jurisdiction of this court, *Rep. p.* 5.

Commission of Inquiry. Copy of the Commission, dated 31 August 1850, *Rep. p.* iii.

Common Women. Statement, in memorial, of the Town Council relative to the authority exercised by the University authorities in the search for common women, *Ev. p.* 36——Remarks of the syndicate appointed by the senate to consider the foregoing, *p.* 42.

Commons, House of. Resolution of, dated 19 January 1640, abolishing subscription, *Rep. p.* 43.

Commorantes in Villa. Position of this class of members of the University explained, *Rep. p.* 2——Number of commorantes in villa in the year 1851, *p.* 145.

Communion, The Holy. See *Chapels of Colleges.*

Comparative

Report, 1852—*continued.*

Comparative Philology. Suggestion for a professorship of comparative philology, *Whewell, Ev. p.* 102.

Compounders. Enactments of the Elizabethan statutes in regard to compounders' fees; inequality, and oppressive results thereof, *Rep. p.* 139——Explanation of the term "compounder," *Ainslie, Ev. p.* 34——Additional fees paid by compounders on admission to degrees, *ib.*

Congeston (Leicester). Lands at, bequeathed for the use of the library of St. Catharine's Hall, *Philpott, Ev. p.* 359.

Constable, Sir Marmaduke. Fellowship at St. John's College founded by, *Rep. p.* 160—— Scholarship at the same college also founded by, *p.* 190.

Constables. Number of constables attending each proctor and pro-proctor, *Ainslie, Ev. p.* 31——Power of the Vice-chancellor to appoint additional constables, *ib.*——Statement in memorial of the town council relative to the authority exercised by the University authorities in the appointment of constables, *Ev. p.* 39——Remarks of the syndicate appointed by the senate to consider the foregoing, *p.* 45.

Constitution, Government, &c. of the University. Outline of the early history and privileges of the University, *Rep. p.* 2——Origin of colleges, *ib.*——Statutes or ordinances framed for its government, *p.* 2, 3——Changes in the statutes necessary, *p.* 3.

Principal executive authorities of the University, viz. The Chancellor, *Rep. p.* 3——The Vice-chancellor, *p.* 4–9——The High Steward, *p.* 9, 10——The Proctors, *p.* 10——Taxors, *p.* 11——Scrutators, *ib.*——The Orator, *ib.*——The Librarian, *ib.*——The Registrary, *ib.* ——Esquire bedells, *p.* 11, 12——The senate or legislative body of the University, *p.* 13–15.

Discipline enforced, *Rep. p.* 16–19——Degrees, *p.* 20–37——Declarations and oaths required at matriculation and on admission to degrees, *p.* 38–45——Professorships, *p.* 46–73 ——Tuition, *p.* 74–89——Boards of studies, *p.* 89–104——Mathematical studies, *p.* 105–114——Lecture-rooms, *p.* 115—— Laboratories and apparatus, *p.* 116–119—— Museums, *p.* 119–127——Public and other libraries, *p.* 127–135——The University press, *p.* 135–137——University revenues, *p.* 138–142.

The colleges, *Rep. p.* 143–149——College charters and statutes, *p.* 150–152——Elections of heads of colleges, *p.* 152, 153——Their emoluments, *p.* 153–156——Fellowships, *p.* 156–172——Particulars as to King's College, *p.* 173–177——Trinity Hall, *p.* 178–183 ——Appropriations to schools, *p.* 184——Scholarships, *p.* 185–195——Sizarships, *p.* 195, 196——College revenues, *p.* 196–199——Visitors of colleges, *p.* 199——Conclusion, *p.* 201–203.

Cookson, Rev. H. W., D. D., Master of St. Peter's College. (Analysis of his Answers to Queries.)

[*Queries as to the Colleges:*]

The appointment to the mastership of this college is made by the fellows electing two persons of statutable qualifications, and presenting them to the visitor, the Bishop of Ely, who institutes one of them to the office, *Ev. p.* 306——The office is for life, and there is no direct statutable obligation to residence, *ib.*——The master has a supervision over all college matters, both temporal and spiritual, and has, as far as he is able, to maintain the rights of the society, *ib.*——in conjunction with certain other fellows, he exercises discipline over members of the college; manner in which the statutes enjoin this duty, as respects fellows; practice in the case of students, *ib.*——The master, in his absence, can appoint a *locum tenens*; powers of the *locum tenens, ib.* —— The master has no fixed stipend; the college income is divided equally between him and the fellows; extra emoluments of the master, *ib.*

Manner of election of the foundation fellows; oath taken, *Ev. p.* 306, 307——A fourth part of the fellows must be in Holy Orders; a fellowship is not vacated by marriage, according to the statutes, but in practice it is, *p.* 307——Residence is enjoined during the terms, *ib.*——Studies to which the fellows devote themselves; special duties are only prescribed in the case of those who hold offices, *ib.*——Emoluments of fellows, *ib.*—— Duties of the deans and bursars, *ib.*——Duties and stipend of the prælector; these offices are all annual, *ib.*——Manner in which the bye-fellowships are regulated, *ib.*——Period of foundation of, and conditions annexed to the Perne, Ramsey, Parke, and Gisborne fellowships, *p.* 308.

List of scholarships; with the period of foundation, *Ev. p.* 308——The admission of students over and above the members of the foundation is not regulated by the statutes; practice adopted, *ib.*——Hours at which service is performed in the college chapel; attendance expected from students; methods by which such attendance is secured, *p.* 308, 309——Course of collegiate instruction given to students in each of the three years, *p.* 309—— Number of fellows employed in giving college lectures, *ib.*——Examinations held in each year; prizes awarded, *ib.*——Students in civil law and medicine attend the

Report, 1852—*continued.*

Cookson, Rev. W. H., Master of St. Peter's College. (Analysis, &c.)—continued.

professorial lectures and study privately, there being no lectures on those subjects, *Ev. p.* 309—— Discipline enforced respecting attendance at the college lectures, and in the hall, and as to the hour when students must be within college or lodgings at night; also as to their expenses, *ib.*

Estimate of the necessary college expenses of a fellow commoner, pensioner, and sizar, *Ev. p.* 309, 310——Like estimate of actual expenses, *p.* 310——Nature of provision for poor students at St. Peter's College, *p.* 311——The necessary expenses of college residence cannot be materially diminished; influences which check habits of extravagance, *ib.*——The chief restriction which obtains, as to fellowships, &c., is that which prevents the election of any one into a foundation fellowship who is of sufficient standing to take the degree of M. A.; opinion is much divided as to the expediency of removing this limitation, *ib.*——The statutes of this college provide for eight poor scholars; these are represented by the sizars, *ib.*——There has been no default of claimants for the scholarships and exhibitions, *ib.*——It would not be advantageous to consolidate any of the fellowships, scholarships, or exhibitions, *p.* 311, 312.

Cookson, Dr. Letters from, dated 8 November 1850, and 1 March 1851, in reply to circulars dated 30 October, addressed to him by the Commissioners, as master of St. Peter's College, *Corr. p.* 3——Letter from, dated 4 December 1850, in reply to same circular addressed to him as a member of the caput senatus, *p.* 8.

Cooper, C. H., Town Clerk of Cambridge. Letter from, dated 5 February 1852, to the Commissioners, enclosing memorial respecting the relations between the University and the town, *Ev. p.* 35.

Cooper, Rev. J., M.A, Fellow and Tutor of Trinity College. (Analysis of his Answers to Queries.)

[1. *Queries as to Expenses and Tuition:*]

The necessary expenses of a college residence cannot be materially diminished, *Ev. p.* 152——No privileges conceded to tradespeople connected with Trinity College, *ib.* ——Extent to which the dealings of students with tradespeople are controlled, *p.* 152. 156——Stringent legislation alone can check the transactions of students with London tradesmen and money lenders, *p.* 152——Period at which students are classified by the lecturer, *ib.*——Sufficiency of the present staff of lecturers at this college, *ib.*——All the examination subjects capable of oral instruction are lectured on, *ib.*

Reasons for which private tutors are preferred to those of the college, and in some degree supersede them, *Ev. p.* 153——Charges made for private tuition, *ib.*——Charges made by the college tutor, *ib.*——Several men of eminence in the University are private tutors, *ib.*——Private tuition could be dispensed with in preparing for the ordinary examinations, *ib.*——The employment of private tutors cannot be effectually restricted, *ib.*——Any institution for poor students only would not be successful; reasons which at present incite a poor student to exertion, *ib.*——Particulars relative to examinations, *ib.*——Modification suggested, *ib.*

The period of college residence is not long enough to admit of habits of independent study, *Ev. p.* 153——An examination, previous to residence, is had at this college, *ib.* ——Objections to an admission examination by the University, *p.* 153, 154——Means by which men of talent might be retained at the University as college tutors, &c.; the absence of peculiar fitness for instruction is the chief difficulty in selecting such at present, *p.* 154——The residence required for the B. A. degree is not too long; but in the case of those not candidates for honours it has been thought so; system at present in operation, *ib.*

Objections to shorter vacations, *Ev. p.* 154——Extent to which residence during the vacation is permitted, *ib.*——Reading parties are of common occurrence; circumstances which regulate their utility, *ib.*——About half the students are in lodgings; regulations enforced; advantages of lodgings, *p.* 155. 157——Suggestions for the better enforcement of University discipline, *p.* 155——General suggestions; the University should be protected against frequency of change in her system, and allowed time to test her present experiments; the adoption of the ancient practice of endowments disposable by free competition is to be recommended, *ib.*

[2. *Queries as to Mathematical Studies and Examinations:*]

Mathematical honours are never sought without the assistance of a private tutor; students sometimes dispense with this assistance at first, but never ultimately, *Ev. p.* 222 ——Class of gentlemen constituting private tutors, *ib.*——Private tuition is a necessary consequence of the present system of examination, and is advantageous, *ib.*——It is desirable that a better communication should be maintained between the private and college tutor respecting the student; and that the charges for private tuition should be reduced, *ib.*

The

Report, 1852—*continued.*

Cooper, Rev. J. M. A., Fellow and Tutor of Trinity College. (Analysis, &c.)—*continued.*

The examinations constitute the *bonâ fide* means of instruction, and any change in the present educational system, to be effective, must be made in them, *Ev. p.* 222——Reasons for which the professors' lectures have less influence than formerly, *ib.*——The recently-established Mathematical Board furnishes the means of making any alteration necessary as to the examination, *ib.*

Cope, Rev. E. M., M. A., Fellow of Trinity College. (Analysis of his Answers to Queries.)

[*Queries as to Classical Studies and Examinations:*]

The principal classical examinations are those for the University scholarships, the Chancellor's medals, and the classical tripos, *Ev. p.* 277, 278——Mode of appointment of examiners for the Chancellor's medals and the Craven scholarship; defects thereof; remedy suggested, *p.* 278——Number of examiners appointed for the classical tripos; principle upon which they are appointed, *ib.*

Points of difference between the examinations for the University scholarship and the Chancellor's medals, and that for the classical tripos, *Ev. p.* 278——General nature of these examinations, *ib.*——Complaint that is generally urged, that the University offers an insufficient education to candidates for classical honours; this complaint might more justly be urged against the past than the present state of things, *p.* 279——Suggestions for alterations, if deemed necessary, by which greater solidity might be given to the reading for the final classical examination, *ib.*

Copyright Act. Number of books received by the University library in virtue of its privilege under the Act, *Rep. p.* 128——Number of volumes added to the University library during the years 1844 to 1850, in virtue of the privilege enjoyed under the Copyright Acts, *Power, Ev. p.* 55——Pecuniary value of the books thus procured, *Rep. p.* 128; *Power, Ev. p.* 55.

Doubtful value of this privilege, *Rep. p.* 128——Suggestions for its commutation for a money payment, *p.* 129——Strong objections to the commutation of the privilege for a money payment, *Power, Ev. p.* 56.

Corpus Christi College:

1. *The Mastership.*
2. *Fellowships.*
3. *Scholarships.*
4. *Sizarships.*
5. *Matriculations and Degrees.*
6. *Lectures and Examinations.*
7. *Students; their Discipline, Expenses, &c.*
8. *College Library.*

1. *The Mastership:*

The power of choosing the master is vested in the fellows, *Rep. p.* 152——No information as to the emoluments of the mastership, *p.* 156——Remarks on some of the statutes by which this college is now governed, *Pulling, Ev. p.* 344.

2. *Fellowships:*

Number of bye-fellowships in this college, distinguishing whether open or restricted, *Rep. p.* 157——Particulars as to the restricted fellowships founded by Archbishop Parker, *p.* 159——Appeal brought in 1829 by certain fellows of the college respecting the ninth and tenth fellowships; result, *ib.*——Academical standing required of candidates for fellowships, *p.* 169——The B. D. degree an essential requisite in the college statutes, and is complied with in practice, *p.* 170——The fellows are chosen from the scholars and students who excel in the examinations, a preference being given to scholars; circumstances which vacate fellowships, *Pulling, Ev. p.* 344.

No information furnished by this society as to the value of its foundation fellowships, *Rep. p.* 167——Division of surplus income between the master and fellows, *Pulling, Ev. p.* 344.

3. *Scholarships:*

Number of scholarships at this college; proportion thereof unrestricted; names of founders; annual value, and other particulars, *Rep. p.* 188; *Mould, Ev. p.* 177; *Pulling, Ev. p.* 344. 346——The appropriation of scholarships to particular localities, with power of transfer in default of eligible claimants, is an encouragement to learning in those places, *Pulling, Ev. p.* 346——This college, possessing such power of transfer, no scholarships, have become ineffective from default of claimants, *ib.*—— The most valuable scholarships are competed for in the first year's examination, the smaller ones being distributed over the succeeding years; an incentive to exertion is thus extended beyond the first year, and therefore it is not desirable to consolidate such small scholarships, *p.* 346, 347.

Corpus Christi College—continued.

4. *Sizarships:*

Number of sizarships; conditions of eligibility and value, *Rep. p.* 195; *Mould, Ev. p.* 177; *Pulling, Ev. p.* 344. 346.

5. *Matriculations and Degrees:*

Number of students entered at Corpus Christi College in each year ending 10th October 1844 to 1848, *Rep. p.* 145——Summary of the number of members of the college in 1851, *ib.*——Number of residents on 14th November 1851, *ib.*——Table showing the number of matriculations at this college in the years 1800, 1810, 1820, and 1830, and in each of the ten years 1840 to 1850, *Romilly, Ev. p.* 66——Similar table of the number of degrees of the several grades granted in the same periods, *p.* 67-70——Total number of degrees granted in the last eight years, *p.* 70.

6. *Lectures and Examinations:*

Statement as to the lectures delivered at this college; classification of students, *Mould, Ev. p.* 176, 177——Examinations undergone by students; they do not pass a matriculation examination, *p.* 177——Number of fellows engaged in college tuition; subjects of the college lectures; examinations, *Pulling, Ev. p.* 344.

7. *Students; their Discipline, Expenses, &c.:*

Well conducted and industrious students are permitted to reside in college during the long vacation, *Mould, Ev. p.* 177——None of the students of this college reside in lodgings, *ib.*——Mode of admission of students, *Pulling, Ev. p.* 344——Period during which the master and fellows are resident in college; licences of non-residence granted to fellows; residence of scholars, *ib.*——Officers who have the moral and religious charge of students, and who conduct the preparatory examinations, and the college tuition, *ib.*——Hours of service in chapel, attendance required of students, *ib.*——Attendance required of students at lectures and at dinner in the hall; hour at which they are expected to be in college or lodgings at night, *ib.*——Detailed estimate of the necessary expenses of pensioners and sizars during residence, *p.* 345——Like estimate of actual average expenses of pensioners and sizars, *p.* 345, 346——If the period of residence for the B.A. degree were reduced to three years it would lessen the expenses, *p.* 346.

8. *College Library:*

The valuable MS. library of Archbishop Parker is deposited at this college, *Rep. p.* 134——Onerous conditions on which it is accessible; excellent catalogue extant, *ib.*——Sum annually expended in the purchase of books for the library; description and arrangement of the books; Archbishop Parker's MS. library is kept here; number of printed volumes in the library; conditions of admission, *Pulling, Ev. p.* 347.

Corrie, Rev. G. E. D.D., Vice-Chancellor of the University. Letter from, dated 8 November 1850, in answer to circular of the Commissioners of 30 October, *Corr., p.* 2——Further letter from, dated 2 December 1850, declining to answer questions propounded by the Commission, *ib.*——Letter from, dated 16 May 1851, in reply to circular of the Commissioners, dated 15 May, declining to answer queries enclosed therein, *Ev. p.* 19.

Cosin, Bishop. Scholarships at St. Peter's College, founded by, in 1669, *Cookson, Ev. p.* 308.

Cotes, Roger. Was the first Plumian Professor of Astronomy, *Rep. p.* 59.

"Coucher." Allowance so termed, made to the master, and each fellow of Trinity Hall, when in residence, *Master and Fellows of Trinity Hall, Ev. p.* 342.

Council of Studies. Recommendation for the institution of such a council, *Rep. p.* 104——Its constitution and functions described, *ib.*——*See* also *Boards of Studies.*

Courts Leet. Privilege of holding, enjoyed by the high steward, or his deputy, *Rep. p.* 9——In what their proceedings consist, *ib.*——Improvements needful to render them more useful, *ib.*

Covent Garden. Bequeathed by Lord Audley to Magdalene College; manner in which it became lost to the college, *Warter, Ev. p.* 404.

Coventry Free Grammar School. The Frankland fellowship at St. Catharine Hall restricted to a student from, *Philpott, Ev. p.* 362.

Coventry, Mayor and Aldermen of. Right of nomination to the Frankland fellowship at St. Catharine Hall, vested in, *Rep. p.* 169; *Philpott, Ev. p.* 362.

Coventry and Lichfield Diocese. Fellowship at St. John's College restricted to persons born within, *Rep. p.* 162.

Coxe, Jane. Allowance for a scholarship at Pembroke College, given by, *Ainslie, Ev. p.* 319.

Report, 1852—*continued.*

Cramming. The evil of "cramming" results from the defective system of college lecturing, *Rep. p.* 108-110——Remedy for this evil, *p.* 110——Desirableness of reviving the *vivâ voce* form of examination, *p.* 110, 111——The perpetual recurrence of examinations fosters the system of cramming, *Worsley, Ev. p.* 210.——*See* also *Private Tuition.*

Crane, Mr. House given to the Regius Professorship of Medicine by; present annual value, *Rep. p.* 56. 72; *Haviland, Ev. p.* 80.

Craven Scholarships. Date of foundation of these scholarships, the value, with other particulars; number originally, and at present, *Rep. p.* 24; *Wratislaw, Ev. p.* 299.

Creake, North and South (Norfolk). Scholarships at Christ's College, on Bunting's foundation, with preference to natives of these parishes, *Cartmell, Ev. p.* 378; *Master and Fellows of Christ's College, Ev. p.* 392.

Creation. Explanation of the ceremony of creation, *Rep. p.* 39——Oath administered to masters of arts, *ib.*——Also to doctors in the several faculties, *ib.*——The discontinuance of these oaths recommended, *ib.*

Credit:

1. *Generally.*
2. *Summary of Answers to Queries circulated by the Commissioners on this subject.*

1. *Generally:*

Steps resorted to by the University for preventing undue credit being given to students, *Ainslie, Ev. p.* 31.

2. *Summary of Answers to Queries circulated by the Commissioners on this subject:*

Queries circulated by the Commissioners relative to the checks imposed by the college tutor upon the supply of goods on credit to students; tradesmen's bills, &c., *Ev. p.* 140——Analysis of answers to the foregoing, from the following, viz.:

Pembroke College:—

The college tutor can impose no certain check upon the supply of goods on credit; benefits resulting from the system of tradesmen sending in their bills to the tutors, *Arlett, Ev. p.* 143——Classes of tradesmen usually permitted to send in their bills to the tutors; advantages of the system, *ib.*——Indefinite credit is not given; a student at the University, without means, has as much difficulty in obtaining credit as a person similarly circumstanced elsewhere, *ib.*

Gonville and Caius College:—

Efficiency of the regulations for preventing undue credit; these do not, however, extend to tradesmen resident in London or elsewhere, *J. J. Smith, Ev. p.* 187.

Trinity Hall:—

No tradesmen's bills are paid through the tutor at Trinity Hall, except for repairs to rooms, &c., *Latham, Ev. p.* 170——London tradesmen would not grant credit to a student with greater facility than those of Cambridge, from the fact of his being at the University, *ib.*——Means by which greater stringency might be enforced, *ib.*——Cases of extravagance more rare than is supposed, *ib.*

Corpus Christi College:—

A college tutor can warn Cambridge tradesmen not to supply goods on credit; this, however, will effect but little, *Mould, Ev. p.* 116——In consequence of checks lately applied by the University, tradesmen out of Cambridge have obtained more custom, *ib.*

Queen's College:—

The college tutor can impose a check only upon tradesmen in Cambridge, and chiefly with respect to students resident within the college walls; advantages generally of the regulation for admitting tradesmen's bills into the tutors' quarterly accounts, *Peill, Ev. p.* 178.

St. Catharine's Hall:—

Order issued by the University authorities 11 February 1847, respecting debts for sums above 10 *l.* and 5 *l.* respectively; working thereof, *Philpott, Ev. p.* 179, 180——Tradesmen's bills admitted into the quarterly accounts of the tutors; advantages of this system, *ib.*——Difficulty of checking the supply of goods by London tradesmen; suggestions for meeting the evil, *p.* 180.

Report, 1852——*continued.*

Credit—continued.

2. *Summary of Answers to Queries, &c.*—continued.

Christ's College:—

The College tutor cannot impose much check upon credit; suggestion for a Legislative enactment, *Hildyard, Ev. p.* 165.

The regulations in force in the University give the college tutor a powerful check, *Shaw, Ev. p.* 185——This however cannot extend to the students' expenditure in London or elsewhere, *ib.*——Classes of tradesmen's bills usually admitted into the quarterly accounts of the tutors, *ib.*

The check in the hands of the college tutor for controlling credit is incomplete; the rule as to bills exceeding 5 *l.* being evaded, *Swainson, Ev. p.* 193——Effect of the said regulation to throw business into the hands of London tradesmen, *ib.*——Control exercised by the college tutor over the bills of the cook, steward, &c., for entertainments, *ib.*

St. John's College:—

A college tutor can impose checks upon tradesmen in Cambridge whose bills he takes in; he cannot exercise any control over tradesmen out of Cambridge, *Hughes, Ev. p.* 169.

Magdalene College:—

The college tutor cannot impose any check on the supply of goods by tradesmen out of Cambridge; effect of the recent regulations in regard to local tradesmen, *Warter, Ev. p.* 201.

Trinity College:—

Tradesmen whose bills are admitted into the quarterly accounts of the tutors of Trinity College; other accounts also passing through the tutors' hands; notice in regard to each, *Blakesley, Ev. p.* 147——No power whatever in a tutor to prevent unlimited credit, *ib.*

Nature of the checks which the college tutor can impose upon undue credit to pupils; copy of the regulation enforced by the University respecting debts exceeding 5 *l.*, *Cooper, Ev. p.* 152. 156——No control over the London tradesman, and the money-lender; legislative aid required, *p.* 152——Copy of a form of tradesman's account with the college tutor, *p.* 156.

Formerly the tutor had no direct control over, or knowledge of, debts contracted by his pupils, except those due to the college tradesmen, whose accounts were sent through him; the regulation of February 1847, relative to debts above 5 *l.*, obviated this in a great degree, *Thompson, Ev. p.* 196——Respects in which the regulation is evaded; legislative interference essential, *p.* 196, 197——Classes of tradesmen's bills admitted into the quarterly accounts, *p.* 197.

The rule laid down by the University authorities that tradesmen send in a statement every term of debts due to them by students, is well adapted to check excessive credit, *Whewell, Ev. p.* 206——This rule, however, is specially disobeyed by the horse dealers, *ib.*

Emmanuel College:—

Impracticable to impose any further material check; tradesmen lend no assistance to the tutors in checking extravagance, but encourage such habits, *Archdall, Ev. p.* 142——Suggestion that the B. A. degree be not granted until the student applying for it proves that he has no outstanding debt, *ib.*

Cricket Playing. See *Amusements.*

Crosse Theological Scholarships. Particulars as to these scholarships, *Rep. p.* 32——Professors by whom the examination for these scholarships are conducted, *p.* 47.

Crowfoot, Rev., J. R., M.A., late Fellow of Gonville and Caius College. (Analysis of his Answers to Queries.)

[*Queries as to Expenses and Tuition:*]

The necessary expenses of residence cannot be materially reduced; causes of extravagance, *Ev. p.* 158——The efficiency of the college lectures regulates the necessity for private tuition, *ib.*——Cases in which private tutors are commonly resorted to; a reading man of average talent can do without them, *ib.*——Each college should be provided with an efficient staff of lecturers, and then the restrictive Grace of 1781 might be re-enacted, *ib.*

A hall for poor students is not advisable, the establishment of "University hostels" would obtain the desired advantages, *Ev. p.* 158——A college entrance examination is to be desired, but not a general one, *ib.*——Causes which operate in withdrawing tutors from the duties of public instruction, *ib.*——Inefficiency of the lodging-house regulations, *ib.*——The establishment of a colonial and missionary college, and a museum of natural history, and the formation of a large pleasure ground are desiderata, *ib.*

Report, 1852—*continued.*

Cumberland County. Fellowship at Pembroke College restricted to natives of, *Rep. p.* 157——Fellowship at Christ's College, *Rep. p.* 159; *Cartmell, Ev. p.* 372——The like at St. John's College, *Rep. p.* 162.

Scholarships at Pembroke College; on Archbishop Grindall's foundation restricted to natives of, *Ainslie, Ev. p.* 318——Scholarships at Christ's College open to natives of, *Cartmell, Ev. p.* 375.

Cumming, Rev. J., M.A., Professor of Chemistry. (Analysis of his Answers to Queries.)

[1. *Queries as to the Professorships:*]

Particulars of foundation of the professorship of chemistry, *Ev. p.* 102——Duties annexed, *ib.*——Amount of original endowment, *ib.*——Present value from fees and other sources, *ib.*——Mode of appointment, *ib.*——No residence, museum, or apparatus, &c., attached to the professorship, *ib.*

[2. *Queries as to Lecture Rooms:*]

Lecture room; when built; and capacity, *Ev. p.* 103——Fees taken from students, *ib.*——Suggestions for the improvement of the study, *ib.*——No residence is attached to the professorship; desirable that a house should be provided, *ib.*

Currency. See *Money.*

Currey, Rev. G., M.A., late Fellow and Tutor of St. John's College. (Analysis of his Answers to Queries)

[*Queries as to Classical Studies and Examinations:*]

Periods of foundation of the several classical prizes and examinations, *Ev. p.* 279, 280——Particular circumstances which exclude the Browne and Bell scholarships from a consideration of the effects of the various prizes, *p.* 280——The institution of the classical tripos has lessened the interest felt in the prizes for particular exercises, *ib.*——The tendency of the classical examinations is to test the grammatical and critical acquaintance with Latin and Greek, and the power of composition, rather than a knowledge of the contents of classical works, *ib.*——The tripos examination is of a more comprehensive character than the others, but too little time is allowed for some of the papers; there is not much in the examination to test the acquaintance with the subject-matter of the works read, *ib.*

The candidates for the classical tripos have not increased in number since its institution, neither has any material change been made in the qualifications required, *Ev. p.* 280——The examiners for the several University scholarships are not always the same body; reasons of this; evils of such a system; suggestions for its remedy, *p.* 280, 281——Objections to the present constitution of the examiners for the Chancellor's medals, *p.* 281——The appointment of examiners for the classical tripos might be left as it is, *ib.*——Reasons opposed to the appointment of a Board for the superintendence of classical studies, *ib.*——Similar reasons against a specification of the classical books to be used, *ib.*

Suggestions respecting the restrictions in the case of certain scholarships, and the Chancellor's medals, *Ev. p.* 281——In altering the examination in the case of the scholarships and the medals, composition should continue to have weight; in the case of the former, critical and grammatical knowledge of Greek and Latin should be principally required, and in the case of the latter, collateral information in history and philosophy; English composition should also be introduced, *p.* 281, 282——A discretionary power should rest with the examiners to extend the time allowed for the papers set, and to increase the duration of the examination; the adoption of a *vivâ voce* examination in the subject-matter of some of the works read by candidates, *p.* 282.

Cutting, William. Scholarships at Caius College founded by, in 1599, *Rep. p.* 187.

D.

Dalling, Simon. Fellowships at Trinity Hall founded by, in 1453, *Rep. p.* 182; *Geldart, Ev. p.* 332——Scholarship at the same college also founded by, in 1453, *Rep. p.* 187; *Geldart, Ev. p.* 332.

Dalton, Rev., J. E., B.D., Vice-President of Queen's College. (Analysis of his Answers to Queries.)

[1. *Queries as to the Colleges:*]

Statutes by which Queen's College is governed, *Ev. p.* 354——Qualification and election of the president, and of the fellows, *ib.*——Conditions of election and tenure of fellowships; Royal dispensation from observance of these conditions has sometimes been granted

Report, 1852—*continued.*

Dalton, Rev. J. E., D. D., Vice President of Queen's College. (Analysis, &c.)—*continued.*

[1. *Queries as to the Colleges*]—continued.

granted, *Ev. p.* 354——Permission to live away from Cambridge is granted to fellows by the society; emoluments of fellows, *p.* 354, 355.

The scholarships have twice been consolidated; number and value of scholarships given away annually, and principle guiding their bestowal; duties annexed to the scholarships, *Ev. p.* 355——Donations given to those who excel in the college examinations, *ib.*——Particulars as to the bye-fellowship attached to this college, also as to the librarian, the chapel clerkships, and a scholarship recently established, *ib.*——Admission of students, *ib.*

Hours of service in the college chapel, and attendance required thereat, *Ev. p.* 355——Subjects, and number of the college lectures and examinations; the lectures have a direct reference to the University examinations; persons by whom the lectures are given; candidates for the B. A. degree are examined by the prælector; a college examination is held in May, *ib.*——Prizes and rewards for proficiency in the college examinations; prizes for particular essays, &c., *p.* 355, 356——Attendance is required at lectures, and occasionally at dinner, and the students are obliged to be in college or lodgings at a certain hour at night, *p.* 356.

College charges for a fellow commoner, a pensioner, and a sizar, *Ev. p.* 356——Sums for which pensioners and sizars have been known to maintain themselves at college, *ib.*——Sum expended by a pensioner living with his friends in Cambridge, *ib.*——Sum expended by fellow commoners, *ib.*——Amount of fund for the assistance of poor scholars, *ib.*——There are no means of reducing the expenses of college residence, or checking extravagant habits, *ib.*

[2. *Queries as to College Libraries:*]

The library of Queen's College is in the care of a librarian, who is considered as a scholar; attendance given by him at the library, *Ev. p.* 358——Bequest of Thomas Clarke, M. A., for library purposes, *ib.*——There is a printed, and also a manuscript catalogue; arrangement of the books, *ib.*——Particulars as to the library building, *ib.*——Monie sappropriated to the support of the library; sum expended in the purchase, &c. of books; number and description of books, *ib.*——Names of principal benefactors, *ib.*——Practice as to admission and use of books, *ib.*

Dampier, Dr., Bishop of Ely. Judgment given by, in 1808, in the matter of the Rokeby Fellowship at St. John's College, *Rep. p.* 160–162.

Davenant, Dr. John. Annuity left by, to Queen's College library, *Dalton, Ev. p.* 358.

Davers, Alice. Endowment of the Margaret Professorship of Divinity, augmented by, *Blunt, Ev. p.* 87.

Davies' Scholarship. Date of foundation of this scholarship; its present value, and other particulars, *Rep. p.* 24; *Wratislaw, Ev. p.* 299.

Dawes, Sir Thomas. Books and MSS. given by, to the library of St. John's College, *Tatham, Ev. p.* 403.

Debt. See *Credit. Expenses of Students. Extravagance. Legal Proceedings against Students. Money Lenders. Parents and Guardians. Promissory Notes. Tradesmen.*

Declarations. Form of declaration made by students on matriculation, *Rep. p.* 38——On taking the degree of B. A., *ib.*——Proposition of the syndicate for revision of the statutes to abolish oaths on admission to a degree, and to substitute a solemn promise of obedience, *p.* 39.

Dee, Dr. Francis, Bishop of Peterborough. Fellowship and scholarships at St. John's College founded by, *Rep. p.* 164. 192——Appeal made to the visitor in regard thereto in the year 1802, *p.* 164—— Books given by to the library of St. John's College, *Tatham, Ev. p.* 403.

Degrees:

1. *Requirements for the several Academical Degrees.*
2. *Particulars as to the number of Degrees granted at this University.*
3. *Oaths and Subscription.*
4. *Fees payable on each Grade; Stamp Duty levied by Government.*

1. *Requirements for the several Academical Degrees;*

Course of residence, studies, exercises, and examinations required for the various academical degrees; viz., bachelor of arts, *Rep. p.* 20–26——Proposal for the re-arrangement of the course of study for that degree, *p.* 27–29——Master of arts, *p.* 29——Bachelor of divinity, *p.* 30——Doctor of divinity, *p.* 30–33——Bachelor of laws, *p.* 33——Doctor of laws, *p.* 34——Bachelor of physic, *p.* 35——Doctor of physic, *p.* 36——Degrees in music, *p.* 37.

Queries

Report, 1852—*continued.*

DEGREES—continued.

1. *Requirements for the several Academical Degrees*—continued.

Queries issued by the Commissioners relative to the course of study, exercises, and examinations required for the several degrees, *Ev. p.* 22——Answers thereto by Dr. Ainslie, master of Pembroke; viz., statement of the residence, studies, exercises, and examinations for degrees, as prescribed by the statutes 12 Eliz. (1570), viz, bachelor of arts, *p.* 22——Bachelor of law, *p.* 23——Bachelor of physic, *ib.*——Master of arts, *ib.*——Bachelor in divinity, *p.* 24——Doctor in divinity, *ib.*——Doctor of law, *p.* 25——Doctor of physic, *ib.*——Comparison with the present actual practice; viz., degree of bachelor of arts, *p.* 25——Bachelor of law, *p.* 28——Bachelor of physic, *ib.*——Master of arts, *p.* 29——Bachelor in divinity, *ib.*——Doctor in divinity, *ib.*——Doctor of law, *p.* 30——Doctor of physic, *ib.*

Particulars of the course of study and exercises required of candidates for degrees in divinity, *Jeremie, Ev. p.* 76——Requirements of the statutes for attainment of the degrees of B. C. L. and D. C. L.; conditions actually enforced, *Maine, Ev. p.* 78——Qualifications required of candidates for degrees in medicine, *Haviland, Ev. p.* 81——Requisites for the common degree, *Goodwin, Ev. p.* 236.

Explanation of the ceremony of creation gone through after admission to the degrees of M. A. and doctor, *Rep. p.* 39——The University is at liberty to admit to any degree privy councillors, bishops, noblemen, and the sons of noblemen who may not have kept the terms and complied with the prescribed forms, *Ainslie, Ev. p.* 24——Cautions for the non-performance of exercises are permitted in the case of degrees by Royal mandate, or *per saltum*; *Jeremie, Ev. p.* 76——Suggested improvements in the course of proceeding for degrees in physic, *Bond, Ev. p.* 85.

The prevalent impression that the standard of requirements for the ordinary degree has been raised is in some respects erroneous; difficulties opposed to raising the standard of requirements, *Goodwin, Ev. p.* 236——Efforts made of late years to raise the mathematical requirements for the ordinary degree, *Hind, Ev. p.* 238——The proficiency in mathematical science required for the ordinary degree is too small, *p.* 239——Tendency of late years to raise the standard of requirements for degrees, *Peill, Ev. p.* 254——Desire obtaining of late years to raise the standard of qualifications both for the common degree and the lowest mathematical honour; in both instances they are now sufficiently difficult, *Phelps, Ev. p.* 256——Honorary distinctions should be independent of degrees; manner in which this might be effected, *Thring, Ev. p.* 289.

2. *Particulars as to the number of Degrees granted at this University:*

Total number of degrees of all grades granted in the last eight years, *Romilly, Ev. p.* 64——Average annual number of degrees; actual number in 1850, *ib.*——Table showing the number of degrees of different classes granted in each of the years 1800, 1810, 1820, 1830, and 1840 to 1850, distinguishing the different colleges, *p.* 67–70——Average proportion of students to the total number taking degrees in decimal periods from 1801 to 1851, *Gaskin, Ev. p.* 227——Number of rejected candidates for honours, and for the ordinary degree, *Goodwin, Ev. p.* 237.

3. *Oaths and Subscription:*

Oath formerly enforced on admission to the degree of bachelor of arts; an equivalent affirmation is now taken, *Rep. p.* 38——The like on admission to any higher degree, *p.* 38, 39——Remarks on the subscription required before admission to a degree; proposed relaxations, *p.* 39–44.

4. *Fees Payable on each Grade; Stamp Duty levied by Government:*

Average annual income derived from fees on degrees, *Rep. p.* 139——The fees payable were raised on 1st June 1825, *ib.*——And again on 2d November 1842, *ib.*——Table of fees paid on admission to the several degrees, *Ainslie, Ev. p.* 33——Table of fees paid by noblemen on certain degrees, *ib.*——Fees paid by persons admitted to degrees by Royal mandate, *p.* 34——Average annual payments from all these degeres, *Romilly, Ev. p.* 64——Additional fees imposed in 1825 and 1842, and again in 1848, *p.* 71.

Recommendation of a syndicate appointed in 1848 to charge an additional fee on all degrees; rejected by the senate, *Rep. p.* 139——Alterations in the fees for degrees recommended; pecuniary loss this will entail upon the University, *p.* 139, 140——Suggestion that such loss be made good by a remission of the stamp duty paid on matriculation degrees, &c, *p.* 140——Fruitless attempt made in 1848 to levy an additional tax, *Romilly, Ev. p.* 71.

Project for transferring the Government tax on degrees to the University chest; annual produce of the tax, *Rep. p.* 132——Amount of stamp duty paid to Government on each degree, *Romilly, Ev. p.* 63——Average annual produce of the duties, *ib.*——The taxes on degrees should be remitted, *Peill, Ev. p.* 179——Objections to the tax now paid on matriculation and degrees, *Babington, Ev. p.* 453.

Dennis (alias *King*), *Hugh.* Fellowships at Magdalene College, founded by, in 1543; annual value, *Warter, Ev. p.* 405.

Deputy High Steward. Court leet held by this officer, *Rep. p.* 9——Mode of appointment, *p.* 10.

Derby Grammar School. Walton's scholarships at St. John's College open to students from, *Rep. p.* 193——Exhibitions at Emmanuel College, on Ash's foundation, open to students from, *Master and Fellows of Emmanuel College, Ev. p.* 427.

Derbyshire. Fellowships at Christ's College, limited to natives of, *Rep. p.* 159; *Cartmell, Ev. p.* 372——The like at St. John's College on Beresford's foundation, *Rep. p.* 160. 162——Another fellowship at the same college, on Bailey's foundation, similarly limited, *p.* 162——Walton's scholarships at St. John's College, open to natives of, *p.* 193, 194.

Scholarships at Christ's College, open to natives of, *Cartmell, Ev. p.* 375.

Determinations or Theses. Required of candidates for the degree of B. D., *Jeremie, Ev. p.* 76——Also for the degree of D.D., *ib.*

Devon, North. Fellowship at Gonville and Caius College, on Wortley's foundation, restricted to a native of, *Chapman, Ev. p.* 326.

Dialectics, Lecturer of. Course of instruction required by the Statutes of Elizabeth to be given by this lecturer, *Rep. p.* 20.

Dinner Parties. Are not to be given by students residing in lodgings, without consent of the college tutor, *Rep. p.* 18.——*See* also *Suppers.*

Dinners. See *Hall Dinner.*

Diplomatic and other Appointments. Foundation by George I. of the professorship of Modern History with the view to the giving instructions in modern language and otherwise qualifying members of the University for, *Rep. p.* 61——Want of a special education for students destined to fill diplomatic and consular appointments, *p.* 101——Suggestion for converting the foundation of Mr. Worts into a Professorship of the Law of Nations and Diplomacy, *ib.*

Discipline:

1. *As enforced by the University generally.*
2. *As maintained by the Colleges individually.*

1. *As enforced by the University generally:*

The University, as distinct from the colleges, not unmindful of this important branch of its duties, *Rep. p.* 16——Moral discipline maintained, *ib.*——Restraints on extravagance and wasteful expense, *ib.*——Regulations laid down a few years since for effecting this object, *p.* 16, 17——Objections urged to these regulations by the council of the borough of Cambridge in their memorial, *p.* 17, 18——Reply of the University thereto, *ib.*——Opinion that the expenses of the majority of the students are moderate, *p.* 18——Supervision exercised by the University over lodging-houses, *p.* 18, 19——Expediency of establishing hostels in connexion with and dependence on the colleges, *p.* 19.

Means of enforcing discipline at the command of the University, *Ainslie, Ev. p.* 30, 31——Number of proctors and pro-proctors, their academical rank, powers, and remuneration, *p.* 31——Academical punishments in vogue, *ib.*——Plans resorted to for preventing undue credit being given to students, *ib.*——Effect of recent Acts of Parliament in interrupting the power of the University authorities over persons *in statu pupillari, p.* 31, 32——Control exercised over lodging-houses, *p.* 32.

Some permanent officer much needed for the external discipline of the University; not indispensable that he should be a graduate, *Cooper, Ev. p.* 155——Of great importance to the efficiency of external discipline that there should be a good understanding between the University authorities and the magistracy of the town, *ib.*——Suggestions for the appointment of a special officer to supervise the lodging-houses, *Warter, Ev.* p. 203——Public legislation has rendered the jurisdiction of the University over its members uncertain and ineffective; the University officers should have extraordinary and well-defined powers, *J. J. Smith, Ev. p.* 190, 191——The means provided for preserving good order and morals in the University have not been found deficient until very recent times, *Whewell, Ev. p.* 203——Recent legislation and judicial decisions have weakened or destroyed the ancient privileges of the University, which were valuable for such purposes, *ib*——The want of co-operation between the University and the town, prejudicial, *p.* 204.

Report, 1852—*continued.*

DISCIPLINE—continued.

2. *As maintained by the Colleges individually :*

Beneficial influence springing out of the present internal constitution of the several colleges, *Rep. p.* 16——Manner in which discipline is maintained in the colleges, as distinguished from the University, *p.* 145, *et seq.*——College chapel; attendance thereat how enforced, *p.* 145, 146——Hall dinner, *p.* 146——Closing of the college gates, *ib.* ——The lectures one mode of discipline, *ib.*——Punishments, *ib.*——Wide latitude left for the indulgence of idleness, extravagance and vice, *ib.*——Enough not done by parents and guardians to check habits of dissipation and expense, *p.* 147——Expensive habits brought by students from public schools to college, *ib.*——Actual expenses of students, *p.* 148, 149——Necessity for a general and universal improvement of college discipline, *Archdall, Ev. p.* 142.

Queries circulated by the Commissioners respecting the regulations of discipline as to the attendance of the students at college lectures; dinner in the college hall; hour at which required to be in college or lodgings, and as to their expenses, *Ev. p.* 302—— Answers to the foregoing from the following colleges and halls, viz., St. Peter's College, *Cookson, Ev. p.* 309——Pembroke College, *Ainslie, Ev. p.* 319——Gonville and Caius College, *Chapman, Ev. p.* 327——Trinity Hall, *Geldart, Ev. p.* 336, 337——Corpus Christi College, *Pulling Ev. p.* 344——Kings' College, *Okes, Ev. p.* 348——Queen's College, *Dalton, Ev. p.* 356——St. Catharine Hall, *Philpott, Ev. p.* 368——Christ's College *Cartmell, Ev. p.* 382, 383——St. John's College, *Tatham, Ev. p.* 398——Magdalene College, *Warter, Ev. p.* 408, 409——Trinity College, *Whewell, Ev. p.* 414-416 ——Emmanuel College, *Archdall, Ev. p.* 426——Sidney Sussex College, *Phelps, Ev. p.* 432, 433.——Downing College, *Worsley, Ev. p.* 438.

See also *Gates of the College. Lodging Houses. Long Vacation. Moral Discipline of the University. Proctors. Pro-Proctors. Punishments. Rustication.*

Discommuning. Nature of this power exercised by the Vice-chancellor and heads of colleges, *Rep. p.* 8, 9——The temperate and judicious exercise thereof well calculated to produce salutary effects, *p.* 9——Statement in memorial of the town council relative to the authority exercised by the University authorities in regard to discommuning, *Rep. p.* 8, and *Ev. p.* 38——Remarks of the Syndicate appointed by the senate to consider the foregoing, *Ev. p.* 43——This penalty has been already inflicted in several instances; complaints made of it by Cambridge tradesmen; its propriety defended, *Whewell, Ev. p.* 204, 205——This penalty described; although a protection against gross misconduct is scarcely appreciable as a check upon habitual extravagance, *Blakesley, Ev. p.* 147——This power should be more clearly defined, *Latham, Ev. p.* 170.——*See* also *Money Lenders.*

Disney, John. Founded the professorship of Archæology in 1851, *Rep. p.* 67——Series of ancient marbles presented by, to the Fitzwilliam Museum in 1850, *p.* 126.

Disney Professorship of Archæology. Date of foundation of this professorship, *Rep. p.* 67——Nature and amount of the endowment, *p.* 67. 73——By whom the professor is appointed, *p.* 67——His duties, *ib.*——Publication of lectures by the present professor (Marsden), *ib.*

Disputations in the Schools. Have lost their value and importance, *Haviland, Ev. p.* 82.

Dissecting Rooms. Capacity of those attached to the Anatomical Museum, *Rep. p.* 120.

Dissections. Opportunities for dissection afforded to students; prejudice of the people against it, *Clark, Ev. p.* 109.

Dissenters. The subject of the admission of Dissenters to degrees glanced at by the commissioners, *Rep. p.* 44, 45——No University regulation to debar Dissenters of any description from residence and from academical distinctions, *Blakesley, Ev. p.* 152—— The first religious test is applied at the time of admission *ad respondendum quæstioni, ib.* ——Each college can however refuse admission to any person, *ib.*——Suggestion that hostelries be established to receive students of this class, *ib.*

Divine Service. See *Chapels of Colleges.*

Divinity. See *Bachelor of Divinity, Degree of. Barnaby Lecturers. Doctor of Divinity, Degree of. Lady Margaret's Professorship of Divinity. Licentiates in Theology. Norrisian Professorship of Divinity. Ten-year Men. Theological Faculty. Voluntary Theological Examination.*

Divinity Lecture Room. Its size and capacity for lecturing, *Stokes, Ev. p.* 97, 98.

Divinity, Regius Professorship of. History of the foundation of this professorship; stipend, duties, &c., *Rep. p.* 48. 50; *Jeremie, Ev. p.* 76——Amount and sources of income of the present professor, *Rep. p.* 71; *Romilly, Ev. p.* 64——Duties annexed by the statutes; duties actually performed, *Jeremie, Ev. p.* 76——Amount of the original endowment; present gross and net annual value of the professorship, *ib.*——Great numbers who attend the lectures, *p.* 76, 77.

Report, 1852—*continued.*

Dixie, Sir Wolstan. Fellowships and scholarships at Emmanuel College founded by, in 1592; annual value, *Rep. p.* 169; *Archdall, Ev. p.* 425. 427; *Master and Fellows of Emmanuel College, Ev. p.* 427.

Dobree, Professor. Collection of classical books and MSS. bequeathed by, to the University library, *Power, Ev. p.* 56.

Doctor of Divinity (D.D.), *Degree of:*

Interval placed between the degrees of B.D. and D.D., *Rep. p.* 30——Exercises enforced, *ib.*——Dispensing power possessed by the University, *ib.*——Proposals of the syndicate for revision of the statutes in regard to the requirements for attaining this degree, *p.* 30-32——Proposed institution of an entirely new class of theological students, to be termed licentiates in theology, *p.* 31, 32——Statement of the residence, studies, exercises, and examinations prescribed by the Elizabethan statutes for this degree, *Ainslie, Ev. p.* 24——Comparison with the present actual practice, *p.* 29——Exercises, &c. required of candidates for this degree, *Jeremie, Ev. p.* 76——Inexpediency of changing the exercises required for this degree, *ib.*——The degree of D.D. of no value whatever as denoting proficiency in divinity, *Wratislaw, Ev. p.* 216.

Circumstances under which a M. A. takes the degree of D. D., *per saltum, Rep.* p. 30, 31; *Ainslie, Ev. p.* 25. 30——This degree is allowed by the statutes to be conferred on a privy councillor, bishop, nobleman, &c., although he may not have complied with the usual conditions, *Ainslie, Ev. p.* 30.

Table showing the number of degrees of this grade confirmed in the years 1800, 1810, 1820, and 1830, and in each of the years 1840 to 1850, distinguishing the several colleges, *Romilly, Ev. p.* 67-70.

Fees paid on admission to the degree, *Ainslie, Ev. p.* 33——Fees paid by noblemen, *ib.*——Cautions exacted on holding this degree, *p.* 34——Amount of stamp duty paid to Government on this degree, *Romilly, Ev. p.* 63.

Doctor of Laws (L.L.D.), *Degree of:*

Requirements of the statutes as respects the attainment of the degree of Doctor of Laws; relaxations in practice, *Rep. p.* 34——Statement of the residence, studies, exercises and examinations prescribed by the Elizabethan statutes for this degree; comparison with the present actual practice, *Ainslie, Ev. p.* 25. 30; *Maine, Ev. p.* 78——Table showing the number of degrees of this grade conferred in the years 1800, 1810, 1820, and 1830, and in each of the years 1840 to 1850, distinguishing the several colleges, *Romilly, Ev. p.* 67-70.

Fees paid on admission to this degree, *Ainslie, Ev. p.* 33——Fees paid by noblemen, *ib.*——Cautions exacted on taking this degree, *p.* 34——Amount of stamp duty paid to Government, *Romilly, Ev. p.* 63.

Doctor of Medicine (M.D.), *Degree of:*

Requirements of the statutes as regards candidates proceeding to the degree of Doctor of Physic; actual practice, *Rep. p.* 36——Important changes introduced at the instance of Dr. Haviland in the requirements for this degree, *Rep. p.* 92——Small number of M.D. degrees granted annually, *ib.*

Statement of the residence, studies, exercises and examinations prescribed by the Elizabethan statutes for this degree, *Ainslie, Ev. p.* 25——Comparison with the present actual practice, *p.* 30——Qualifications required of candidates for this degree, *Haviland, Ev. p.* 81; *Fisher, Ev. p.* 127——Alterations in the mode of proceeding to this degree suggested, *Bond, Ev. p.* 85.

Amount of fees paid on admission to this degree, *Ainslie, Ev. p.* 33; *Fisher, Ev. p.* 128——Cautions exacted, *Ainslie, Ev. p.* 34——Amount of stamp duty paid to Government, *Romilly, Ev. p.* 63.

Table showing the number of degrees of this grade conferred in the years 1800, 1810, 1820 and 1830, and in each of the years 1840 to 1850, distinguishing the several colleges, *Romilly, Ev. p.* 67-70.

Doctor of Music (*Mus. Doc.*), *Degree of:*

Conditions for attaining this degree, *Rep. p.* 37——Fees payable on admission, *Ainslie, Ev. p.* 33; *Walmisley, Ev. p.* 136——Amount of stamp duty paid to Government, *Romilly, Ev. p.* 63——Table showing the number of degrees of this grade conferred in the years 1800, 1810, 1820, and 1830, and in each of the years 1840 to 1850, distinguishing the several colleges, *p.* 67-70.

Dolben, David, Bishop of Bangor. Sum of money given by, to the library of St. John's College, *Tatham, Ev. p.* 402.

Domestic

Report, 1852—*continued.*

Domestic System of Cambridge. Injurious effects of the domestic system of Cambridge, by which students and graduates of one college are rarely elected scholars or fellows of the other; suggestions with a view to its abrogation, *Wratislaw, Ev. p.* 216.

See also *Alterations of the Cambridge System.* *"Out of College Men."* *Poor Students.*

Dongworth, Margaret. Addition made by, in 1775, to fellowships at Magdalene College, on Dennis's foundation, *Warter, Ev. p.* 405.

Dorsetshire. One of Cardinal Morton's scholarships at St. John's College open to natives of this county, *Rep. p.* 192.

Dowman, Dr. John. Sizarships at St. John's College, founded by, *Rep. p.* 190. 194; *Tatham, Ev. p.* 400.

Downing College:

1. *Charter of the College.*
2. *Revenues and Expenditure.*
3. *The Mastership.*
4. *Fellowships.*
5. *Scholarships, &c.*
6. *Matriculations and Degrees.*
7. *Lectures and Examinations.*
8. *Students; their Discipline, Expenses, &c.*
9. *College Library.*

1. *Charter of the College:*

The charter of foundation gave the first example of the complete incorporation of professors of the University, with the constituent and governing body of a college, *Rep. p.* 65—— Power vested in the visitors by the charter, to revoke, repeal or alter the statutes, &c.; reasons for which it appears doubtful whether the visitors have ever attained, or as yet possess this power, *Worsley, Ev. p.* 435.

2. *Revenues and Expenditure:*

Gross income of the college at the present time, *Rep. p.* 196——Prohibition by the statutes of the system of beneficial leases, *ib.* 198.

Correspondence between the master and the secretary to the commission respecting the queries addressed by the commissioners to the college, *Ev. p.* 439, 440.

Condition in which the college estates were, in 1800, the period at which the college received its charter, and succeeded to their possession, *Master, Professors, Fellows and Scholars of Downing College, Ev. p.* 441—— Difficulties with which the college has had to contend in effecting the improvement of the estates, *ib.*——Sum expended since the year 1800 in the erection of college buildings, *ib.*——Character of the improvements made on the college estates; sum ordered by the Court of Chancery in 1849, to be annually set apart for the formation of an estate improvement fund; leave given by the court in 1851 for a reduction of the sum annually paid into the building fund, *ib.*——Principle upon which the average rental is given, *ib.*

Statement of income and expenditure, *Ev. p.* 442—— Necessity for providing against the increased demand for maintenance that will arise when the complement of fellows and scholars is complete, by putting the estate into good condition, and erecting buildings of a substantial character, *ib.*——Analysis of the Downing College accounts from 1843 to 1850, *p.* 443——Statement of the excess of income in 1850 over that of the years 1834, 1835, 1836; amount of gross income in the years 1800, 1811, and after abatements in 1850, *p.* 444——Amount of the gross annual income of the college on an average of seven years, and corresponding net income, *ib.*——Deductions constituting the difference between the gross and net income, *ib.*——Detailed statement of the annual expenditure of the college, *ib.*

Mode of application of the surplus income, *Ev. p.* 444, 445——Amount of accumulated building fund, *p.* 445——Emoluments and advantages enjoyed by the master, professors and fellows, *ib.*——There are no rewards of any description in this college for the encouragement of learning, *ib.*——The institution of exhibitions for the special encouragement of students in law and medicine is much desired, *ib.*

3. *The Mastership:*

Mode of election of the master, *Rep. p.* 153——Source and amount of the emoluments of the mastership, *p.* 155——References to the statutable directions as to the appointment, &c. of the head of the college; the present practice is in conformity with these directions, but the practice as to professors may be excepted from, *Worsley, Ev. p.* 436.

Report, 1852—*continued.*

Downing College—continued.

4. *Fellowships:*

Number of fellowships in this college; particulars with regard to them, *Rep. p.* 65, 66. 72. 157——Value of a foundation fellowship, *p.* 167——Academical standing required of candidates for fellowships, *p.* 170——Limited term for which the lay fellowships are tenable, *p.* 182.

Number of lay fellows which the foundation will ultimately comprehend; number of years for which the fellowships will be tenable, *Fisher, Ev. p.* 132——Reference to the statutable regulations respecting the fellows; circumstances which have prevented a similar compliance with these regulations, as in the case of the head, *p.* 436, 437——Difference of opinion among the governing members as to a strict or modified adherence to the letter of the statutes in the election of fellows in the present intermediate condition of this college; judgment of the Lord Chancellor and other judges upon this subject, *p.* 437——There are no supplemental or bye-fellowships, *ib.*

5. *Scholarships, &c.:*

There will not be any scholarships until the college is completed, *Rep. p.* 195——No sizars or sub-sizars are admitted, *ib.*——No scholars have as yet been elected, the building not being complete nor all the fellows nominated, *Worsley, Ev. p.* 437——Neither does the college possess any scholarships, exhibitions, prizes, or other endowments or emoluments for under-graduates; its fellowships are open to candidates from any college of either University, *p.* 437, 438——There are no endowments for the assistance of poor scholars, *p.* 438——These reasons have rendered the number of its under-graduates very small; plan pursued with reference to them, *ib.*

6. *Matriculations and Degrees:*

Number of students entered at Downing College in each year ending 10th October 1844 to 1848, *Rep. p.* 145——Summary of the number of members of the college in 1851, *ib.*——Number of residents on 14th November 1851, *ib.*——Table showing the number of matriculations at this college in the years 1820, 1830, and in each of the ten years 1840 to 1850, *Romilly, Ev. p.* 66——Similar table of the number of degrees of the several grades granted in the same periods, *p.* 67–70——Total number of degrees granted in the last eight years, *p.* 70.

7. *Lectures and Examinations:*

Difficulties experienced in securing a sufficient and permanent supply of college tutors and lecturers, *Worsley, Ev. p.* 211——Course of collegiate instruction, *p.* 438——Amount of college fees, and manner in which they are appropriated, *ib.*

Candidates are examined individually on applying for admission, *Worsley, Ev. p.* 210——Number of fellows employed in giving college lectures; private examinations in the tutors' rooms are substituted at this college for more formal college examinations, *p.* 438.

8. *Students; their Discipline, Expenses, &c.:*

Expense of graduating in law; students at Downing are usually prepared for the ordinary B.A. degree without the aid of a private tutor, *Worsley, Ev. p.* 209——Several items of expenditure in this college have been diminished lately by withdrawing privileges conceded to college servants, *ib.*——This college rarely has any of its members resident in lodgings, *p.* 212——Particulars as to the residence of the college officers, *p.* 436——Estimates of the necessary and actual expenses of students at this college, *p.* 438——Remarks as to a reduction of expenses, *ib.*——Divine service is performed in a room set apart in the college for a chapel, there being none as yet built, *ib.*——Attendance of students at the college lectures, and at dinner in the hall; hour at which the college gates are closed, *ib.*

9. *College Library:*

The library is only now in course of formation, *Rep. p.* 135; *Worsley, Ev. p.* 212.

Downing Professorship of the Laws of England. Advantage of bringing the lectures of this professorship into more direct connexion with degrees in the faculty of law, *Rep. p.* 34——Endowment and duties of this professorship, *p.* 65——Number of lectures required to be delivered annually, *ib.*——Practice of the present professor (Amos), *ib.*——His complaints of the little attention paid to the study of English law, *p.* 65, 66——Remarks of the Commissioners hereon, *p.* 66——Present amount and sources of income of the professorship, *p.* 72——Number of lectures required by the statutes to be given; other duties imposed on the professor, *Amos, Ev. p.* 123——Small number of law students; causes thereof, *ib.*——Means of promoting the study, *p.* 124.

Downing Professorship of Medicine. Was founded on the same conditions as the professorship of English law, *Rep. p.* 66——Lectures given by the present professor (Dr. Fisher), *ib.*——Compulsory attendance required of certain classes of students, *ib.*——Present amount and sources of income of the professorship, *p.* 72——The professorship

Report, 1852—*continued.*

Downing Professorship of Medicine—continued.

ship was founded by Sir George Downing, *Fisher, Ev. p.* 125——Duties annexed to the professorship; how far they have been modified; duties now actually performed, *ib.*——Amount of the endowment; has not been augmented, *ib.*——Allowance by the college for commons, *ib.*——Emoluments derived from fees, *ib.*——Present annual value of the professorship, *ib.*——Mode of election to the office; conditions of eligibility and tenure, *p.* 125, 126——Residence attached, *p.* 126——No apparatus belonging to the professorship, *ib.*——No prescribed subjects of instruction are laid down for the professor; advantages thereof, *ib.*——General condition of the branch of study to which this professorship relates, *ib.*——Payments, fees, &c.; changes suggested, *p.* 132——Encouragement given to the study of medicine by Downing College, *p.* 132, 133.

Drury, Lady Diana. Exhibitions at Christ's College founded by; present proceeds, *Cartmell, Ev. p.* 378; *Masters and Fellows of Christ's College, Ev. p.* 392.

Drury, Drue. Fellowship at Magdalene College founded by, in 1698; conditions of tenure; annual value; effect of the restrictions, *Rep. p.* 169; *Warter, Ev. p.* 406. 412.

Dublin University. See *Trinity College, Dublin.*

Ducket, Mr. Scholarships at St. John's College, founded by, *Rep. p.* 190.

Dunne, Gabriel. Scholarship at Trinity Hall founded by, in 1560; value thereof, *Rep. p.* 187; *Geldart, Ev. p.* 333.

Duport, Dr. Scholarships at Magdalene College founded by, in 1679; annual value, *Warter, Ev. p.* 407.

Durham County. Foundation fellowships at Christ's College limited to natives of, *Rep. p.* 159; *Cartmell, Ev. p.* 372—— Scholarships at the same college similarly limited, *Cartmell, Ev. p.* 375.

Durham, Dean and Chapter of. Right of nomination to a scholarship on Dr. Patynson's foundation, at Christ's College, vested in, *Cartmell, Ev. p.* 378.

Durham Diocese. Fellowship at St. John's College on Hugh Ashton's foundation, limited to persons born within, *Rep. p.* 163——Scholarship at Christ's College on Dr. Patyuson's foundation, restricted to natives of, *Rep. p.* 189; *Cartmell, Ev. p.* 378.

Durham University. Course of education for the duties of the ministerial office established in this University, *Rep. p.* 31——Result of the experiment of a college for poor students, tried at this University, *Thompson, Ev. p.* 199——Payment made for tuition at Bishop Hatfield's Hall, *ib.*

E.

East India Company. Donations by, to the University Library, *Power, Ev. p.* 50—— Specimens presented by, to the Woodwardian Museum, *Sedgwick, Ev. p.* 118.

Easter Term. Residence is only required during one-half of this term; average number of days of which it consists, *Fisher, Ev. p.* 132——Very desirable that this term should be lengthened and the studies throughout its course better enforced, *Archdall, Ev. p.* 142 ——The amusements in this term now amount to a serious evil, *ib.*——Easter term is too much curtailed by having the examinations so soon after division, *Blakesley, Ev. p.* 150 ——Half the idleness and dissipation of the academic year is concentrated in the Easter term, *Hildyard, Ev. p.* 166——Evil effects of the practice of keeping only half of Easter term, *J. J. Smith, Ev. p.* 190.——*See* also *Terms,* **2.**

Ecclesiastical Duties and Revenues Act, 3 & 4 Vict. c. **113.** Augmentation of the endowments of certain of the Regius Professorships by this Act, *Rep. p.* 49—— General approval of the annexation of canonries in Christ Church and Ely Cathedral to professorships in the two Universities under this Act, *p.* 87.

Ecclesiastical Preferments. Effect of recent legislative changes in regard to cathedral and other ecclesiastical preferment in lessening the inducement for men of high attainments to remain at the University, *Rep. p.* 83.——*See* also *Cathedral Canonries.*

Eden, Dr. Festival allowance to master, fellows, and scholars of Trinity Hall, given by; amount thereof, *Master and Fellows of Trinity Hall, Ev. p.* 341, 342.

Edward VI., King. Code of statutes drawn up by commissioners appointed in this reign, for the government of the University, *Rep. p.* 2——Fellowship at Christ's College founded by, *Rep. p.* 160; *Cartmell, Ev. p.* 375, 376——Scholarships at the same college, founded by, *Rep. p.* 189; *Cartmell, Ev. p.* 375, 376.

Edward's, St., Church, Cambridge. Expenditure on account of repairs, &c. of the chancel of, by Trinity Hall, *Master and Fellows of Trinity Hall, Ev. p.* 342.

Report, 1852—*continued.*

Election to Collegiate Offices:

1. *Heads of Colleges.*
2. *Fellowships, Scholarships, &c.*

1. *Heads of Colleges:*

The election to the headships of the several colleges variously provided for, *Rep. p.* 152——Practice obtaining in each college stated, *p.* 152, 153——Recommendation in regard hereto, *p.* 153——Special recommendation with respect to Caius College, *ib.*

2. *Fellowships, Scholarships, &c.:*

Peculiarities of election to fellowships in the several colleges; spirit in which these societies have viewed the trust reposed in them, *Rep. p.* 168——Recommendation that the election to all fellowships and scholarships should be vested in the master and fellows or in that portion of the society to which the government of the college may be entrusted, *ib.*——Not many fellowships to which this recommendation would apply; list of such foundations, *p.* 169——Conditions of election to, and tenure of fellowships, viz.: academical standing, *ib.*——Time during which fellowships may be kept vacant, *p.* 170——Statutable requirements in regard to theological degrees from fellows, *ib.*——Holy orders, *p.* 171——Conditions as to the amount of income with which the tenure of fellowships and scholarships shall be incompatible, *ib.*——Residence, *ib.*——Celibacy, *p.* 172.

Ellis, Robert Leslie, M.A, late Fellow of Trinity College. (Analysis of his Answers to Queries.)

[*Queries as to Mathematical Studies and Examinations:*]

Grounds on which the study of mathematics is admitted into the Cambridge educational system, *Ev. p.* 222, 223——Effect produced on the mind from mathematical studies, *p.* 223——An important constituent of which is the enlargement of the student's sphere of intuition, *ib.*——But his progress must mainly be measured by the degree in which he attains to a complete intuition into the results, which he is able to prove, *ib.*——Degree in which these considerations should be taken as a guide in examining the merits and defects of a mathematical course of study, intended to form part of a liberal education, *ib.*——Circumstances which must influence any conclusions on this subject, *ib.*——Alterations that might advantageously be made in the choice of subjects of study, *ib.*

Remarks as to the choice of methods, and as to the increasing preference for geometry over analysis, *Ev. p.* 223, 224——Erroneousness of the prevalent practice of making too rigorous a separation of geometry and analysis; change required to more liberal views in this respect, but this could only be effected by a change of opinion in the professors, &c., and is consequently beyond any legislative enactment, *p.* 224, 225——The inclination sometimes evinced to exclude electricity and the cognate theories of heat, light, and magnetism, from the mathematical course for the B. A. degree, could not be acceded to with advantage to the student, *p.* 225——Remarks on the calculus of variations, and definite and elliptic integrals, *ib.*——General observations in reference to the present manner of filling up the problem papers on examinations, and the various tendencies of this system, *p.* 225, 226.

Elmington (*Northampton*). Estate at, charged with the maintenance of a scholarship at Corpus Christi College, *Rep. p.* 188.

Elizabethan Statutes (*A.D.* 1570). The letters patent and Act of Elizabeth referred to, *Rep. p.* 2——Code of regulations laid down by these measures, *p.* 2, 3——Minutiæ entered into by the Elizabethan statutes; it has only been by a tacit disregard of the letter of the injunction that the University has been enabled to develope its system, *p.* 23——Statement of the residence, studies, exercises, and examinations for degrees, as prescribed by the statutes 12 Eliz., *Ainslie, Ev. p.* 22–25——Comparison with the present actual practice, *p.* 25–30.

Ely, Bishop of. Fellowship at Jesus College, the election to which is vested in the bishop; recommendation in regard thereto, *Rep. p.* 169——Also a fellowship at St. John's College, *ib.*——Scholarship at Pembroke College, on the foundation of Matthew Stokys, in the gift of, *p.* 187——Part taken by the Bishop of Ely in the election of master of St. Peter's College, *Rep. p.* 152, 153; *Cookson, Ev. p.* 306——The election of master of Jesus College is absolutely in the bishop, *Rep. p.* 153——Letter from the Bishop of Ely, as visitor of St. Peter's, Jesus, and St. John's Colleges, dated 9 November 1850, in reply to circular of the commissioners, of 30th October, *Corr. p.* 3——Further letter from, dated 6 December 1850, *ib.*

Ely Cathedral. Reversion of stalls in, given to certain of the Regius Professors by the Act 3 & 4 Vict. c. 113, *Rep. p.* 49. 71——Approval of the annexation of canonries in Ely Cathedral to the poorly endowed professorships of Greek and Hebrew, *p.* 87——Suggestion for the extension of this principle to the endowment of two new theological professorships, *ib.*

Ely,

Report, 1852—*continued.*

Ely, Isle of (*Cambridge*). Fellowships at St. Peter's College restricted to natives of, *Cookson, Ev. p.* 308——Lands in the isle, given by the Duchess of Somerset, for establishing scholarships at St. John's College, *Tatham, Ev. p.* 400.

EMMANUEL COLLEGE:

1. *Foundation of the College; Statutes.*
2. *Revenues and Expenditure.*
3. *The Mastership.*
4. *Fellowships.*
5. *Scholarships, &c.*
6. *Matriculations and Degrees.*
7. *Students; their Discipline and Expenses.*
8. *College Library.*

1. *Foundation of the College; Statutes:*

Period of foundation, and name of founder of Emmanuel College, *Archdall, Ev. p.* 425.

Modifications of the original code of statutes of this college recently obtained, *Rep. p.* 150.

2. *Revenues and Expenditure:*

Gross income of the college at the present time, *Rep. p.* 196——Remarks on the measures taken by the college for running out beneficial leases, *p.* 198.

Gross amount of income accruing to the college from estates in land, from houses, and from tithe rentcharges; net amount derived from the same sources, *Master, Fellows, and Scholars of Emmanuel College, Ev. p.* 426——Annual income from funded property, rents of rooms, and miscellaneous sources, *p.* 427——Total gross and total net income of the college, *ib.*——Manner in which the net income is expended, *ib.*——Average sum annually received by the master and fellows, *ib.*——Annual sum received by a foundation scholar, *ib.*——Monies accruing to the foundations of Mr. Gillingham and Sir W. Dixie; conditions attached to these foundations, *ib.*——Particulars of the several scholarships and exhibitions possessed by the college on separate foundations, *p.* 427, 428——Manner in which the expense of the table in the college hall is defrayed, *p.* 428——Number of sizars, and annual amount received by them, *ib.*——Average sum annually spent in the repair of the college buildings; there is no special building fund; no outlay has recently been made on the repair of church chancels; sum annually expended in prizes; practice as to subscriptions to charities and schools; large sums are occasionally laid out in the repair of farm buildings, *ib.*——Practice observed as to beneficial leases, *ib.*——There is no fund for the augmentation of small livings, *ib.*——Advowsons purchased with the surplus income of the Dixie property, *ib.*——Additions made to the college buildings in 1825, *ib.*

3. *The Mastership:*

Manner of election of the master; qualifications required in him; tenure of office; absence permitted from college; regulations of stipend, *Rep. p.* 152; *Archdall, Ev. p.* 425——Emoluments of the mastership, *Rep. p.* 155.

4. *Fellowships:*

Foundation and bye-fellowships in this college, distinguishing whether open or restricted, with particulars in regard to the same, *Rep. p.* 157. 169; *Archdall, Ev. p.* 425——The election of fellows is restricted to candidates born in England only, *Rep. p.* 157——Value of a foundation fellowship at this college, *p.* 167——Academical standing required of candidates for fellowships, *p.* 170——The B. D. degree an essential requisite in the college statutes, and is complied with in practice, *ib.*——The original statutes of this college did not permit fellowships to be held after the standing requisite for the D. D. degree had been attained, *p.* 182.——Inexpediency of removing or altering any of the conditions now attached to the fellowships, &c., *Archdall, Ev. p.* 426.

5. *Scholarships, &c.:*

Number of scholarships at this college; annual value thereof; no distinction made between scholarships and exhibitions, *Rep. p.* 195——No scholarships or exhibitions have become ineffective from want of claimants, *Archdall, Ev. p.* 426——No advantage would arise from a consolidation of scholarships or exhibitions, *ib.*

Number of sizars admitted at this college, *Rep. p.* 195——Average annual amount of payments for the support of poor scholars and students at this college, *Archdall, Ev. p.* 426.

6. *Matriculations and Degrees:*

Number of students entered at Emmanuel College in each year ending 10th October 1844 to 1848, *Rep. p.* 145——Summary of the number of members of the college in 1851, *ib.*——Number of residents on 14th November 1851, *ib.*——Table showing the

Report, 1852—*continued.*

Emmanuel College—continued.

6. *Matriculation and Degrees*—continued.

number of matriculations at this college in the years 1800, 1810, 1820, and 1830, and in each of the ten years, 1840 to 1850, *Romilly, Ev. p.* 66——Similar table of the number of degrees of the several grades granted in the same periods, *p.* 67-70——Total number of degrees granted in the last eight years, *p.* 70.

7. *Students; their Discipline and Expenses:*

Actual expenses of students at this college, *Rep. p.* 148——No examination of the students previous to admission, *Archdall, Ev. p.* 142——Students are not permitted to reside in the college during the long vacation, *ib.*——Mode of admission of students, *p.* 425——Hours of Divine service in the college chapel, and attendance required at same, *ib.*——Course of instruction at this college; fellows engaged therein; prizes given, *p.* 426——Attendance enforced at the college lectures, and in the hall at dinner hour; hour of closing the college gates at night, *ib.*——Average annual unavoidable expense, exclusive of private tuition, of the different classes of students, *ib.*——Impossibility of further reducing the necessary expenses of college residence, or of restraining credit and extravagance, *ib.*

8. *College Library:*

Number of volumes in the college library, *Rep. p.* 135——The college has a librarian, who has the general care of the library, *Archdall, Ev. p.* 428——Catalogue in use; arrangement of the books, *ib.*——Fund applicable to the purposes of the library, *ib.*——Number of books; benefactors thereto, *ib.*——Conditions on which the library is accessible, *ib.*

Engineering. See *Civil Engineering.*

England. Fellows at St. Catharine Hall required to be natives of England, *Philpott, Ev. p.* 361——All fellowships at Emmanuel College (Dixie's excepted), are open to all England, *Archdall, Ev. p.* 425.

England and Wales. Scholarships at St. Catharine Hall on Ramsden's (Skenie's) foundation restricted to natives of England and Wales, *Philpott, Ev. p.* 363. 366——Candidates for fellowships and scholarships at St. John's College required to be natives of, *Tatham, Ev. p.* 396.

English Language and Literature. Importance of giving attention to the study of English literature; neglect thereof hitherto, *Amos, Ev. p.* 124——A new foundation for the study of English language and literature suggested, *Pryme, Ev. p.* 136——English composition (especially prose essays), should form a part of the examinations, *Currey, Ev. p.* 282——An incitement should be given to the study of the English language; this might be effected by establishing an English essay, *Thring, Ev. p.* 290.

Enniskillen, Earl of. Specimens presented by, to the Woodwardian Museum, *Sedgwick, Ev. p.* 118.

Entertainments. Control exercised by the college tutor over the bills of the cook, steward, &c. for entertainments, desserts, &c., *Swainson, Ev. p.* 193.——*See* also *Dinners.*

Esquire Bedells. Mode of appointment, and number of these officers; their duties, *Rep. p.* 11——Proposition to reduce their number; also to abrogate certain ancient forms, *p.* 11, 12——Their emoluments, *Rep. p.* 138; *Romilly, Ev. p.* 64.

Essays. Expediency of instituting prize essays in preference to prizes to be gained by examinations, *Rep. p.* 114.

Essex County. Scholarships at St. John's College, on the foundation of Ambrose Gilbert, limited to natives of, *Rep. p.* 191.

Scholarship at Christ's College, on Sir Walter Mildmay's foundation, for a native of, *Cartmell, Ev. p.* 379; *Master and Fellows of Christ's College, Ev. p.* 392——Scholarship at Christ's College, on Plume's foundation, restricted to natives of, *Cartmell, Ev. p.* 381; *Master and Fellows of Christ's College, Ev. p.* 394——Preference shown to natives of, as candidates for Jenens' exhibitions at Christ's College, *Master and Fellows of Christ' College, Ev. p.* 392.

Groom's exhibitions at Magdalene College limited to natives of, *Warter, Ev. p.* 407.

Ethnography. Suggestion for a professorship of ethnography, *Whewell, Ev. p.* 102.

Eton College. Particulars as to the connexion between Eton College and King's College, *Rep. p.* 173——The education of seventy scholars provided for at Eton, who were to succeed to vacancies at King's College, *p.* 174. 176——Changes in the constitution of King's College recommended; respects in which they would affect Eton, *p.* 176, 177——Details as to the annual election of scholars to the foundation of King's College, *Okes, Ev. p.* 348.

Eton College—continued.

Fellowship at St. Catharine's Hall, on Holway's foundation, appropriated, in default of certain injunctions, to scholars from; stipend thereof; present practice, *Philpott, Ev. p.* 362. 366——Scholarship founded by Magdalene College in 1835 open to students from, *Warter, Ev. p.* 407.

See also *King's College.*

Evans, Rev. R. W., m.a., late Fellow and Tutor of Trinity College. (Analysis of his Answers to Queries.)

[*Queries as to Expenses and Tuition:*]

Delicacy of effecting the classification of students, *Ev. p.* 158, 159——Examinations, independent of college and University lectures, have encouraged private tuition, *ib.*——Objections to the establishment of a hall or college for poor students in Cambridge, but it might be placed in the neighbourhood, *ib.*——Evils of the present numerous examinations, *ib.*——Difficulty of carrying out a University entrance examination, *ib.*——Circumstances inducing men of promise to leave the University, *ib.*——Suggestion as to reducing the number of terms, *ib.*

Everleigh (*Wilts*). Estate at, belonging to Queen's College library exchanged for one at Kingston (Cambridge), *Dalton, Ev. p.* 358.

Ewhurst (*Sussex*). Living of, purchased by King's College, *Provost and Fellows of King's College, Ev. p.* 354.

Examinations:

I. *College and University Examinations generally:*
   1. Digest of Evidence on the subject of the different Examinations enforced in each College.
   2. Other Particulars respecting the Examinations.
   3. Suggestions in regard to the Examinations.
   4. Expediency of reviving *vivâ voce* Examinations considered.

II. *Bye Examinations.*

III. *Classical Tripos Examination:*
   1. Particulars as to the Origin, &c. of this Examination.
   2. Working thereof, and suggestions for its Improvement.

IV. *Other Classical Examinations* (*University Scholarships and Chancellor's Medals*):
   1. Scope and Object of these Examinations.
   2. Suggestions in regard to them.

V. *Law Examinations.*

VI. *Mathematical Tripos Examination.*

VII. *Medical Examinations.*

VIII. *Natural Sciences Tripos Examination.*

IX. *Theological Examinations* (*including the Voluntary Theological Examination*).

I. *College and University Examinations generally:*

1. Digest of Evidence on the subject of the different Examinations enforce in each College:

Queries circulated by the Commissioners respecting the different college and University examinations, for which students are required to prepare in the interval between their first residence and the degree of M.A.; the subjects embraced; whether pushed to an extent to interfere with habits of independent study, and to make a private tutor a matter of necessity, and whether the increase in their number of late years has tended to diminish the attendance on the professors' lectures, *Ev. p.* 141.

Answers to the foregoing in regard to the following colleges and halls; viz.—

Pembroke College:—

Details of the subjects on which the student prepares for college or University examination in each year, *Arlett, Ev. p.* 145——The examinations are neither too frequent nor too difficult; in general they do not interfere with independent study; qualification of which this opinion admits, *ib.*——A growing distrust of the efficacy of professional teaching, the real reason that so many lecture rooms are deserted; private tutors have superseded University professors by the superior utility of their lectures, *ib.*

Gonville and Caius College:—

Particulars of the examinations at this college, *J. J. Smith, Ev. p.* 188——There is ample time for independent studies for those not aiming at distinctions and prizes; the minimum of requirement in examinations, both college and University, is very

Report, 1852—*continued.*

EXAMINATIONS—continued.

I. *College and University Examinations generally*—continued.

1. Digest of Evidence, &c.—*Gonville and Caius College*—continued.

low, *J. J. Smith, Ev. p.* 189——A mistake to suppose the attendance at professors' lectures to have systematically decreased; their disadvantage has always been that they do not lead immediately to any distinct end, *ib.*

Trinity Hall:—

Examinations undergone by the students at this college; new examination resolved upon, *Latham, Ev. p.* 172——The college examinations are most beneficial; they prevent inaccurate and desultory study, *ib.*——The abundance and cheapness of good works on scientific and other subjects, enabling men to acquire the knowledge they would obtain from the lectures of the professors, is the chief cause of falling off in attendance on those lectures, *ib.*——Such professors as lecture on popular subjects, &c., obtain fair, and in many cases, crowded audiences, *ib.*

Corpus Christi College:—

Account of the examinations undergone by students at this college; students read too much with private tutors, *Mould, Ev. p.* 177.

Queen's College:—

Account of the examinations passed through by students at this college, *Peill, Ev. p.* 178.

St. Catharine's Hall:—

Details of the college and University examinations, and the subjects embraced thereby, *Philpott, Ev. p.* 181, 182——The examinations do not interfere unduly with habits of independent study in the case of those students who come to the University sufficiently prepared, *p.* 182——The number of subjects at examinations might be reduced with advantage; a private tutor cannot, however, be said to be a matter of necessity with the great majority, *ib.*——The increase in the number of examinations, as well as the increase in the subjects of study, are the principal causes of the decreasing attendance on professors' lectures, *ib.*

Christ's College:—

Tabular statement of the college and University examinations required to be passed by students of this college, *Gunson, Ev. p.* 163——It would be advantageous to do away with the previous examination, and substitute in its stead an examination on coming into residence, *ib.*——College examinations are not too frequent, *ib.*

The different examinations for which students are required to prepare are neither too numerous or too difficult; they need not interfere unduly with habits of independent study or make private tuition a matter of necessity; the professional tutors would be better attended if the subjects bore more directly upon the examination, *Hildyard, Ev. p.* 166.

Account of the college examinations, *Shaw, Ev. p.* 186——The tendency of late years has been to push the examinations too far, and to multiply the subjects of them to an extent not compatible with the limited powers of the youthful mind; these causes, with the reduction of the period of residence by one term, as proposed, cannot but drive students into the hands of private tutors, *ib.*

Particulars of the examinations required in this college, and subjects thereof, *J. Smith, Ev. p.* 192——The examinations are numerous and difficult enough; the present system should be fully carried out without further change, *ib.*——The lectures of the professors have not been diminished by this cause, *ib.*

University examinations at the end of the first and second year's residence, recommended as a substitute for the present college examinations, *Swainson, Ev. p.* 195——These examinations would not interfere with private study in other branches of science or literature, *ib.*——The previous examination interferes with candidates for honours, but not so as to warrant its being done away with, *ib.*——The falling off in the professors' lectures is not to be attributed to it, *ib.*

Tabular statements of the various University and college examinations, *Wratislaw, Ev. p.* 213, 214——The college examinations after the first year in nowise interfere with independent study except as restricting attention to classics and mathematics, *p.* 214——The previous examination does so by cutting up the second year; that for the ordinary degree interferes with independent study, and frequently necessitates the employment of a private tutor, *ib.*

St. John's College:—

The examinations are neither too severe or too frequent, *Hoare, Ev. p.* 167.

Particulars of the college examinations held, *France, Ev. p.* 285——Belief that frequent college examinations tend to discourage rather than encourage the system of private tuition; a correspondence between the college and the University examinations is however essential, *ib.*

Magdalene

Report, 1852—*continued.*

EXAMINATIONS—continued.

I. *College and University Examinations generally*—continued.

1. Digest of Evidence, &c.—*continued.*

Magdalene College:—

Both the University and some of the college examinations, are too much of a *lanx satura*, the latter often interfere with habits of independent study; the present ordinary B. A. examination most objectionable and needs re-modelling, *Warter, Ev. p.* 202——There should be three examinations, one at the end of each academical year and the third general B. A. examination should complete the course, *ib.*——The honour examinations should be left just as they are, *ib.*——The professional system was better suited to the olden time than the present for particular instruction, *ib.*

Trinity College:—

Particulars of the examinations through which students are required to pass, *Blakesley, Ev. p.* 149——The college examinations are not too frequent, and are well conducted; the "previous examination" is the most prejudicial regulation of the whole University, *ib.*

Period at which the University examinations take place; the examination for mathematical honours is pushed too far in respect of difficulty and range of subjects; the period of college residence is not sufficiently long to admit of habits of independent study, *Cooper, Ev. p.* 153.

The excessive number of examinations (besides being the cause of so much private tuition), is fatal to the independence of the mental character of the students, *Evans, Ev. p.* 159.

The frequency and difficulty of the examinations could not be increased with advantage; any harm which may have been done by the previous examination has been amply compensated for by the Grace of 1848, compelling attendance on one course at least of professional lectures by all persons not candidates for honours; an increased supply of professors would increase the audiences in attendance on their lectures, *W. H. Thompson, Ev. p.* 199.

It cannot be said that the examinations are too numerous or difficult; the University scholarships, and some other prizes, interfere very much with progressive reading, *Whewell, Ev. p.* 207——The previous examination appears to thin the attendance on professors' lectures; but this affects quite a different class of students from those who are commonly candidates for the University scholarships, *ib.*

Emmanuel College:—

The examinations are not so frequent as to interfere with independent studies, *Archdall, Ev. p.* 142.

Downing College:—

The previous examination far from being too difficult; the perpetual recurrence of examinations nevertheless fosters the system of cramming, and often interrupts the more genial students; resort to private tutors is occasioned by the great accuracy required in the University examinations, *Worsley, Ev. p.* 210.

2. Other Particulars respecting the Examinations:

Two Public Examinations for the degree of B.A., *Rep. p.* 20——Period of the first or "previous" examinations taking place; subjects, *ib.*——The second or final examination divided into two sets, for, or not for, honours, *p.* 20, 21——Subjects of examination for those not candidates for honours, *p.* 21——Subjects of examination of candidates for mathematical honours; mode in which conducted, *p.* 21, 22——Classical tripos, *p.* 22, 23——Mathematical and classical prizes, *p.* 23, 24——Moral sciences tripos, *p.* 25——Natural sciences tripos, *p.* 25, 26——Voluntary theological examination, *p.* 26——Carefully watching and guarding the examinations, would be the best means of checking the evils of undue private tuition, *p.* 74 *et. seq.*——Approval of the course pursued by the University in relaxing the stringency of its rule regarding the connexion between the examinations for mathematical and classical honours, *p.* 81——Proportion of candidates for the B. A. degree who fail in their examination, *p.* 106——Outline of the changes effected of late years in the system of University examinations, *p.* 108, 109.

Examinations prescribed by the Elizabethan statutes for the degree of Bachelor of Arts; comparison with the present actual practice, *Ainslie, Ev. p.* 23. 26——The like in regard to the degree of Bachelor of Law, *p.* 23. 28——Bachelor of Physic, *ib.*——Master of Arts, *p.* 24. 29——Bachelor in Divinity, *ib.*——Doctor in Divinity, *ib.*——Doctor of Law, *p.* 25——Doctor of Physic, *p.* 25. 30.

Subjects embraced in the final examination, *Ainslie, Ev. p.* 26. 32——Not advisable to increase the subjects of the ordinary B.A. examination, *Hoare, Ev. p.* 168——College or University examinations are not so frequent as to interfere with the independent studies of the students, *Archdall, Ev. p.* 142——Two examinations, into both of which mathematics enter, are had of candidates for the B. A. degree, *Mould, Ev. p.* 250.

Report, 1852—*continued.*

EXAMINATIONS—continued.

I. *College and University Examinations generally*—continued.

3. Suggestions in regard to the Examinations:

Desirableness of a general examination being passed by all students in the course of their second year, *Rep. p.* 81——On whom the task of preparing students for this preliminary examination should be devolved, *Rep. p.* 81——Proposition for only one examination in Easter term in the third year to qualify for the B. A. degree; other examinations for mathematical honours and in the classical and other triposes that would follow; all to be finished before the October term, *Gunson, Ev. p.* 164——There should be a pass examination for B. A. for all students shortly before the close of the third year; candidates passing the same to be qualified to offer themselves for the mathematical and other triposes in the following year, *Peill, Ev. p.* 179——Proposition for a University examination for candidates for fellowships in the smaller colleges; ends contemplated by such an examination, *Wratislaw, Ev. p.* 216——Suggestion for a University honour examination for the Oriental, and another for the modern languages, *ib.*——The examinations constitute the *bonâ fide* means of instruction, and any change in the present educational system, to be effective, must be made in them, *Cooper, Ev. p.* 222——Comparative efficiency of the present system of examination, but the re-introduction of the old system of academical school exercises is to be desired, *Goodwin, Ev. p.* 237——The University legislation of the last twenty-four years, in regard to the examinations, has had a most beneficial tendency, *Hopkins, Ev. p.* 240.

Objections to the institution of examinations at a later period than the present B. A. degree, *Mathison, Ev. p.* 250——The institution of an examination by the University at the end of every academic year recommended, *Steventon, Ev. p.* 267——Evil of the recently instituted preliminary examination, in giving too diffuse a character to the reading of students, *Swainson, Ev. p.* 268——Both the classical and mathematical tripos should be open to all members of the University, *Jeremie, Ev. p.* 286——Expediency of a general examination to be undergone alike by all candidates for a B. A. degree, and to be followed at certain intervals by competition for honours in the several triposes, *Williams, Ev. p.* 294, 295——Modification recommended in the recently established triposes examinations, *p.* 295——No modification with respect to the conditions of admissibility to the examinations appears necessary, *Wood, Ev. p.* 297——It is not expedient to extend further than at present the permission to students to choose between classics and mathematics, as referring to the several examinations, *Worsley, Ev. p.* 298.

Alterations suggested in the periods of the examinations taking place, *Arlett, Ev. p.* 146; *Blakesley, Ev. p.* 150——Changes suggested in the time of holding the examinations in the event of a reduction in the number of terms, *Philpott, Ev. p.* 183, 184——Alterations in the time of the examinations taking place suggested so as to do away with the first term, *J. J. Smith, Ev. p.* 190——Alterations in the course of the examinations, in the event of the first and last terms being abolished, *Wratislaw, Ev. p.* 216——If more University examinations between that at matriculation and that for the degree be instituted, it or they should be placed towards the conclusion of Easter term, *p.* 217——Suggestion as to the arrangement of the examinations in the event of a change, *France, Ev. p.* 285.

4. Expediency of reviving *vivâ voce* Examinations considered:

Desirableness of reviving the system of *vivâ voce* examinations as a remedy for "cramming," *Rep. p.* 110——The exclusive prevalence of paper examinations one cause of the system of private tuition; the restoration of oral examination recommended, *Whewell, Ev. p.* 206——By the Grace of 1827, the examinations were uniformly required to be conducted by written questions, instead of, as formerly, in part *vivâ voce*; this has been a great improvement, *Hopkins, Ev. p.* 239, 240——A *vivâ voce* examination, combined with that by printed questions, now in operation, recommended, *p.* 242——Influence which a *vivâ voce* examination would have in discouraging the tendency to resort to cramming, *p.* 242, 243.

The introduction of some *vivâ voce* questions into the examinations would supply a means, at present wanting, of testing the quality of a candidate's knowledge, *Mould, Ev. p.* 251——Before 1827 the questions from books were proposed *vivâ voce* to candidates; at that period all the questions were directed to be in writing, excepting in certain cases; this exception was omitted in the regulations of 1832, *Philpott, Ev. p.* 259——Advantage of introducing *vivâ voce* questions into the examinations, *p.* 261——If the examination is to be entirely by written answers, the present plan is extremely good; the papers might be shortened with advantage; the introduction of *vivâ voce* questions is desirable, *Stokes, Ev. p.* 267*b*, 267*c*.

A defect in the present mode of examination is its exclusively paper character; a *vivâ voce* examination by the University could be conducted only with great difficulty, *Whewell, Ev. p.* 272——Extent to which the disputations in the schools partially remedied this formerly; reasons of their being abolished, *ib.*——A *vivâ voce* examination by an examiner thoroughly acquainted with his subject would be most effectual, *Currey, Ev. p.* 282——The

Report, 1852—*continued.*

EXAMINATIONS—continued.

I. *College and University Examinations generally*—continued.

4. Expediency of reviving *vivâ voce* Examinations considered—*continued.*

——The revival of *vivâ voce* examination in certain cases would supply a deficiency at present much felt, *Humphrey, Ev. p.* 286——Necessity that exists for a *vivâ voce* examination, *Thring, Ev. p.* 290.

II. *Bye-Examinations:*

Bye-examinations for those who fail to pass the general final examination, and for certain other classes, *Ainslie, Ev. p.* 26, 27.

III. *Classical Tripos Examination:*

1. Particulars as to the Origin, &c. of this Examination:

Details explanatory of the classical tripos examination, *Rep. p.* 22; *Wratislaw, Ev. p.* 299——Number of examiners appointed to conduct the examination in this tripos, *Ainslie, Ev. p.* 32——The classical tripos was established in 1824, and the examination extended over four days; in 1836 it was changed to five days, and in 1850 to six days; mode of procedure; conditions required in candidates; the number of candidates has increased, *Beatson, Ev. p.* 277——The candidates for the classical tripos have not increased in number since its institution, neither has any material change been made in the qualifications required, *Currey, Ev. p.* 280——Changes that have been made in the classical tripos examination at different times, *Thompson, Ev. p.* 288; *Warter, Ev. p.* 290, 291——Opposition offered to the establishment of the classical tripos and to its subsequent modification; the candidates have not increased in the ratio desired; a relaxation has been effected of the mathematical requirements, and a tendency has been evinced to lessen the value attached to Greek and Latin compositions, *Williams, Ev. p.* 293—The examination for classical honours, called the classical tripos examination, first took place in 1824; details of the arrangement adopted in 1849, *Wratislaw, Ev. p.* 299.

2. Working thereof, and Suggestions for its Improvement:

Complaints made of the manner in which the classical tripos examination is conducted; entrusted to young and inexperienced examiners; recommendations in regard hereto, *Merivale, Ev. p.* 175, 176——The present length of the examination papers as compared with the time allotted to them, is unobjectionable, *Beatson, Ev. p.* 277——The tripos examination is of a more comprehensive character than the others, but too little time is allowed for some of the papers; there is not much in the examination to test the acquaintance with the subject-matter of the works read, *Currey, Ev. p.* 280——Questions relating to the subject-matter of classical authors could not with advantage be introduced into the classical tripos examination, *Thompson, Ev. p.* 288——Proposal of this nature rejected by the syndicate in 1849, *ib.*——An effect of the working of the classical tripos has been to raise the standard of accuracy in teaching Greek in the better grammar schools of the country, *Williams, Ev. p.* 293.

Suggestion for opening the classical tripos to all classes of the ordinary degree, *Beatson, Ev. p.* 277——Other recommendations on this subject, *ib.*——It is desirable to throw open the classical tripos to all who have passed the ordinary degree in the previous January, *France, Ev. p.* 283——Desirability of limiting the length of the passages proposed for examination in the classical tripos, *Jeremie, Ev. p.* 286——A special examination in a portion of classics to be selected two years before the examination, might be added to the present classical tripos examination, *Roberts, Ev. p.* 287——Suggestions for the modification of this examination, *Williams, Ev. p.* 293, 294——Suggestion that all students obtaining the A. B. degree at the same time be without distinction admitted candidates for the classic tripos, *Wratislaw, Ev. p.* 300.

IV. *Other Classical Examinations (University Scholarships and Chancellor's Medals):*

1. Scope and Object of these Examinations:

The principal classical examinations are those for the University scholarships, the Chancellor's medals, and the classical tripos; subjects of and points of difference between each, *Beatson, Ev. p.* 277; *Cope, Ev. p.* 277, 278; *France, Ev. p.* 282; *Thompson, Ev. p.* 287; *Warter, Ev. p.* 290; *Williams, Ev. p.* 293; *Wood, Ev. p.* 296——The two former examinations require more elegant accomplishments in classics than the latter, this distinction ought to be carried further by omitting certain requirements in the tripos examination, *Thompson, Ev. p.* 287——The necessity for the accomplishments alluded to, deter many students from competing for classical honours, *ib.*——The distinction between the scholarship and tripos examinations is, that the former requires great proficiency in the accomplishments of a classical scholar, whilst the latter gives a preference to solidity in scholarship, *Thring, Ev. p.* 288; *Williams, Ev. p.* 293——Classes into which the honorary classical examinations in the University are divisable; subjects of the different examinations, *Wratislaw, Ev. p.* 299.

Report, 1852—*continued.*

EXAMINATIONS—continued.

VI. *Other Chemical Examinations, &c.*—continued.

2. Suggestions in regard to them:

A carefully arranged system of examinations the chief point to which the attention of the University should be directed; complaints made of the classical tripos examination; recommendations in regard hereto, *Merivale, Ev. p.* 175, 176——Suggestions for alterations, by which greater solidity might be given to the reading for the final classical examination, *Cope, Ev. p.* 279——The tendency of the classical examinations is to test the grammatical and critical acquaintance with Latin and Greek, and the power of composition rather than a knowledge of the contents of classical works, *Currey, Ev. p.* 280 ——In altering the examination in the case of the scholarships and the medals, composition should continue to have weight; in the case of the former, a critical and grammatical knowledge of Greek and Latin should be principally required and; in the case of the latter, collateral information in history and philosophy, *p.* 281, 282——A discretionary power should rest with the examiners to extend the time allowed for the papers set, and to increase the duration of the examination, *p.* 282.

Works that might be excluded from classical examinations, *France, Ev. p.* 283—— Change that might be made in the eligibility of candidates for the medal examination, in the event of its retention, *ib.*——Injudicious preference at present given to Latin verse composition over sound scholarship, in the examinations for the scholarships, *p.* 283, 284——A reduction in the number of classical exercises in verse and prose, might be made with advantage, *p.* 284——The Chancellor's medal examination ought to be open to all classes of the mathematical tripos, and the classical tripos to all who have the ordinary degree, *Roberts, Ev. p.* 287.

Prose composition being a more valuable attainment than verse composition, ought to be confined to the examinations for the medals and University scholarships, *Thompson, Ev. p.* 287——The examinations for the University scholarships and medals are conducted by unpaid *ex-officio* examiners; inconveniences of this arrangement; they might be obviated by allowing certain of these examiners to appoint deputies, approved by the senate, *p.* 288——It is desirable that all persons who have passed the ordinary examination for the B. A. degree should be eligible as candidates for the Chancellor's medals and classical tripos, *ib.*

A paper of questions and an essay should form part of every classical examination; what those questions should be, *Thring, Ev. p.* 289——Long examination papers conduce to quickness of thought, a faculty that ought to be encouraged; if too long, are scrambled through imperfectly, *ib.*——Defects which exist in the systems of these examinations, *Williams, Ev. p.* 293——The Oxford practice of taking up definite portions of classical authors would be beneficial if engrafted on the Cambridge method of examining generally in classes, *Worsley, Ev. p.* 298.

V. *Law Examinations:*

Examinations required to be undergone by candidates for the degree of Bachelor of Laws, *Rep. p.* 33——Practice as to candidates for the degree of Doctor of Laws, *p.* 34 ——Changes in the mode of conducting the law examinations suggested, *Maine, Ev. p.* 79——Remarks on Dr. Maine's suggestions for improving the law examinations, *Rep. p.* 35.

VI. *Mathematical Tripos Examination:*

Nature of the mathematical tripos explained, *Rep. p.* 22——Increasing severity of the examinations in mathematical science of late years, *p.* 105 —— Steady increase in the number of honours taken, notwithstanding, *ib.*——Method pursued in determining the proficiency in mathematics of candidates for the B. A. degree, *Gaskin, Ev. p.* 226. 230-233. 234——The bookwork questions are more searching than formerly; the matter has remained stationary for ten years; subjects introduced in 1831; tendency at the present time to reduce the subjects of the examination; purport of the regulations made in regard hereto in 1848, *p.* 226——No tendency to make the subjects of the examination less elementary, *ib.*—— Mathematical subjects embraced in the requirements for a common degree, *p.* 226, 227——Subjects of examinations for honours, *p.* 227—— Reason for supposing that the standard of qualification both for the ordinary degree and for honours will be raised, *ib.*——The examples and deductions accompanying the mathematical propositions are generally too difficult, *p.* 227, 228——The higher treatment of some subjects might be advantageously postponed till after the B. A. degree, *p.* 228——No alteration is to be recommended in the subjects included in the present course of examination, *ib.*——Recommendations of the Board of Mathematical Studies (1849), in reference to this subject, *p.* 233, 234——Report of the Board (1850) on the working thereof, and further recommendations, *p.* 234-236.

The examinations have improved of late years; extension from time to time of the range of subjects; tendency evinced in the last few years to restrict the range of subjects, *Goodwin, Ev. p.* 236——Improved condition of the mathematical examination, *Hind, Ev. p.* 238——

Report, 1852—*continued.*

EXAMINATIONS—continued.

VI. *Mathematical Tripos Examination*—continued.

Ev. p. 238——Effect of the changes made, *ib.*——It is scarcely possible to improve on the present plan of examination, *ib.*——Subjects struck out of the examinations by the syndicate of studies; it is not advisable further to curtail the subjects for examination of the best candidates, *ib.*——But some of the higher parts of mathematical science might be advantageously deferred till a late period, *ib.*——The tendency of the examination to become more analytical, though on the increase at one time, has received a salutary check, *Hind, Ev. p.* 239; *Whewell, Ev. p.* 273.

Changes made in 1827, and at subsequent periods in the duration of the examinations; object of these changes, and improvement resulting from them, *Hopkins, Ev. p.* 239 *et seq.*——The mathematical examinations are more stringent than formerly; reasons of this, *p.* 240——Extension of the subjects of examination made at different periods; causes which have prevented these extensions from imposing much additional labour on the students, *p.* 241——Object of the examinations; their efficiency, *ib.*——A reduction, however, in the number of questions would be an improvement, *ib.*——Whether the examinations answer the intentions with which they have been instituted, must always be a matter of opinion, *p.* 241, 242——Definite character of the examinations; advantages of this feature; respects in which the present system is nevertheless defective, *p.* 242——Inclination in students to direct their energies to the objects most likely to influence their places in the tripos, rather than the higher purposes of the study, *ib.*——The deficiency was formerly obviated by the exercises in the schools; manner in which it happened that these were discontinued, *ib.*——Favourable influence of the present system on the mental development of students; but it is desirable that a higher and more diffuse tone should be given to their acquirements, *p.* 243.

General nature of the changes made in the examinations, *Mould, Ev. p.* 250——The examination for the common degree is well adapted to show the qualification of the candidates, *Peill, Ev. p.* 254——Omission to be desired in the subjects of the examinations, *ib.*——Tendency in the examination of late years to embrace too wide a range of subjects, and to keep down the proportion of elementary questions, *Phelps, Ev. p.* 256——The existing form of examination has resulted from the deliberations at different periods of syndicates appointed by the senate; fitness of these bodies for devising further measures of educational progress, *p.* 256, 257.

Mode and period of appointment of the examiners, qualifications required, period at which the examinations commence, manner in which conducted; classification of candidates for honours, *Philpott, Ev. p.* 258——Method formerly pursued in determining the relative merits of candidates, between whose ability it was difficult to decide, *p.* 259, 260——The changes enumerated have had the effect of lengthening the duration of the examinations, and giving a preponderating portion of time to book questions, as compared with problems, *p.* 260——Objects proposed in printing the questions and problems; degree in which the elementary parts of mathematics enter into every plan of examination, *ib.*——Changes made at different periods, and present nature of the mathematical examination of students not candidates for honours, *ib.*——General tendency of the alterations made from time to time in the examinations, *ib.*——Nature of the examination now passed by candidates for a common degree, *p.* 261——The number of questions required to be answered in the time allowed gives an undue advantage to quick writing and decision of thought, but experienced examiners obviate this by extending the time for answers, *ib.*——Satisfactory working of the questions proposed in examinations for some years past, *p.* 262.

Particulars relative to the mathematical portion of the examination for ordinary degrees, *Stokes, Ev. p.* 267——General efficiency of the present plan of examination, *p.* 267 *b*, 267 *c*——Any change in the present system should be to further curtail it, *p.* 267 *c*——Unfavourable operation of the present limited time allowed to students in the senate house, for answering questions on the examination papers, *Swainson, Ev. p.* 267 *e*, 268——The length of the examination papers has, on the recommendation of the Mathematical Board, been diminished; they might, with advantage, be further abridged, *p.* 268——Suggestions as to the classification of students, *p.* 271——Mathematical subjects in which candidates for the B. A. degree are examined; the number of candidates prevents a *vivâ-voce* examination, *Whewell, Ev. p.* 272——Manner in which the paper examinations interfere perniciously with the beneficial effects of the college lectures in the later part of a student's undergraduateship, *p.* 273——Remarks as to the limitation of the subjects included in the present range of examinations, *ib.*

VII. *Medical Examinations:*

Examination passed by a candidate for the degree of Bachelor of Physic, *Rep. p.* 35——The like in regard to the degree of Doctor of Physic, *Rep. p.* 36; *Fisher, Ev. p.* 127——Examinations instituted for medical degrees in 1819; great care with which they are conducted; examiners, *Haviland, Ev. p.* 80——Efficiency of the examinations in medicine, *Fisher, Ev. p.* 127——Examination passed through by candidates for the degree of Licentiate in Medicine, *ib.*

Report, 1852—*continued.*

EXAMINATIONS—continued.

VIII. *Natural Sciences Tripos Examination:*

Result of the examinations recently instituted in the natural science studies, *Rep. p.* 101.

IX. *Theological Examinations (including the Voluntary Theological Examinations):*

Examination undergone by candidates for the degree of B. D., *Rep. p.* 30——Particulars as to the theological examinations held, *Blunt, Ev. p.* 87, 88.

Details as to the voluntary theological examination; when held; its subjects; and by whom conducted, *Blunt, Ev. p.* 88——Supplemental examination in Hebrew held after the voluntary theological examination, *ib.*——Date of institution of this examination; number of candidates at first and in 1850; satisfactory result, *ib.*——Amelioration of the mechanism of the voluntary theological examination suggested, *p.* 88, 89.

See also *Classical Studies and Examinations. Examiners. Fellowships,* 9. *Honours,* 3. *Mathematical Studies and Examinations. Matriculation,* 3. *Moderators. Moral Sciences Tripos. Previous Examination. Problems. Terms,* 3. *Triposes. Vivâ Voce Examinations.*

Examiners. The professors should not be required to act as examiners except in those departments of study which come within their respective provinces, *Rep. p.* 53——General objection entertained to *ex-officio* classical examiners whose duties do not connect them with the promotion of classical studies, *ib.*——Passages from the evidence quoted with reference to this point, *p.* 53, 54——Number and mode of selection of the examiners by whom the previous examination is conducted, *Ainslie, Ev. p.* 32——A Board of examiners slowly changing, instead of a body of examiners each of whom is elected for a year only, suggested, *Whewell, Ev. p.* 206——A portion of the examiners should be taken from the class of private tutors, *ib.*——Appointments of examiners; if they were constituted a more permanent Board it would favourably effect the consistency of the examinations from year to year, *p.* 272. 274——Mode of appointment of examiners for the Chancellor's medals and the Craven scholarship; defects thereof, remedy suggested, *Cope, Ev. p.* 278——Number of examiners appointed for the classical tripos; principle upon which they are appointed, *ib.*

The examiners for the several University scholarships are not always the same body, reason of this; evils of such a system, suggestion for its remedy, *Currey, Ev. p.* 280, 281——Objections to the present constitution of the examiners for the Chancellor's medals. *p.* 281——The appointment of examiners for the classical tripos might be left as it is, *ib.*——The examiners for the University scholarships are *ex-officio* examiners, whose officers have frequently no connection with classical studies; it would be desirable to apply the rule in the case of the Pitt scholarship to the others, *France, Ev. p.* 283——The same plan might be applied to the medal examination, *ib.*

An assimilation of the constitutions of the Boards of examiners of the several University scholarships, to that of the Pitt scholarship, would be a beneficial arrangement, *Humphry, Ev. p.* 286——Four public examiners in classics should be chosen annually for the tripos, and also to take part in the other classical examinations, *Roberts, Ev. p.* 287——Objections to the present system of *ex-officio* examiners, *Warter, Ev. p.* 291; *Babington, Ev. p.* 453——The constitution of the Boards of examiners is capable of improvement, *Wood, Ev. p.* 297——It is desirable that certain of the *ex-officio* examiners should be unconnected with the University classical examinations; circumstances under which a Board of classical studies is to be recommended, *Wratislaw, Ev. p.* 299, 300.

See also *Examinations. Moderators.*

Exercises. Exercises enjoined by the Elizabethan statutes to be kept for the several degrees; comparison with the present actual practice; viz. Bachelor of Arts, *Ainslie, Ev. p.* 23. 26—— Bachelor of Law, *Rep. p.* 33; *Ainslie, Ev. p.* 23. 28——Bachelor of Physic, *Rep. p.* 35; *Ainslie, Ev. p.* 23. 28; *Haviland, Ev. p.* 81——Master of Arts, *Ainslie, Ev. p.* 24. 29——Bachelor in Divinity, *Rep. p.* 30; *Ainslie, Ev. p.* 24. 29; *Jeremie, Ev. p.* 76——Doctor in Divinity, *Rep. p.* 30; *Ainslie, Ev. p.* 24. 29; *Jeremie, Ev. p.* 76——Doctor of Law, *Rep. p.* 34, *Ainslie, Ev. p.* 25——Doctor of Physic, *Rep. p.* 36; *Ainslie, Ev. p.* 25. 30; *Haviland, Ev. p.* 81; *Fisher, Ev. p.* 127——Nature of "Cautions for Exercises;" objections thereto; proposed to be abolished, *Rep. p.* 37——Amount of the cautions exacted for the several exercises, *Ainslie, Ev. p.* 34——Fees paid for exercises, *ib.*

Necessity for a modification of the exercises required on proceeding to medical degrees; alterations proposed by the syndicate for the revision of the statutes, *Rep. p.* 95——Inexpediency of changing the exercises required for the degrees of B.D. and D.D., *Jeremie, Ev. p.* 76——Questionable propriety of retaining the exercises required for the degree of M.B. in their present shape; modifications recommended, *Fisher, Ev. p.* 127——Objections to the exercises required to be performed for the degree of M.D., *ib.*

Exhibitions. Recommendation that exhibitions be substituted for the existing claims of schools to particular fellowships and scholarships at different colleges, *Rep. p.* 184——

Plan

Report, 1852—*continued.*

Exhibitions—continued.

Plan of carrying this out laid down; authority to be constituted for effecting the commutation, *Rep. p.* 184, 185——A clear distinction should be drawn between exhibitions (*i. e.* helps for poor students) and scholarships (*i. e.* honourable rewards for attainments), *Merivale, Ev. p.* 174——The unclaimed exhibitions at Christ's College are formed into a fund (amounting to about 170*l.* per annum), from which the college rewards the most deserving undergraduates of each year, according to merit, *Gunson, Ev. p.* 163.

Queries circulated by the Commissioners as to the expediency of changing the conditions or application of the exhibitions attached to the several colleges, or of extending their range of eligibilty; also as to the propriety of making a more extended provision for these foundations, *Ev. p.* 304——Answers thereto from the following colleges viz.: St. Peter's College, *Ev. p.* 314, 315——Pembroke College, *Ev. p.* 323——King's College, *Ev. p.* 354——Christ's College, *Ev. p.* 396——St. John's College, *Ev. p.* 401——Downing College, *Ev. p.* 445.

Expenditure. See *Income and Expenditure.*

Expenses of Students:

I. *Results of the Inquiries of the Commissioners on this head.*

II. *Digest of Evidence received in regard to each College and Hall:*

1. As to the practicability of curtailing the Expenses of Residence.
2. Details as to the necessary and actual Expenses of Students.

I. *Results of the Inquiries of the Commissioners on this head:*

Efforts made by the University authorities to control the expenses of pupils, *Rep. p.* 16——Practical difficulties attending the attainment of this object, *ib.*——Regulations laid down for checking extravagance and debt, *p.* 16, 17——Objections made to the foregoing regulations by the council of the borough in their memorial, *p.* 17, 18——Answer hereto by the University, *ib.*——Decree in force respecting legal proceedings against students for the recovery of debt, *p.* 17——Objections of the before-mentioned memorialists to this rule, *p.* 18——Answer thereto, *ib.*——Belief that the expenses of the great majority of the students are small, *ib.*

Wide latitude left for the indulgence of idleness, extravagance, and vice, *Rep. p.* 146——The colleges can go no further in restraining than they have done, *ib.*——Enough not done by parents and friends of students in checking such habits, *p.* 147——Authority of the college tutor, *ib.*——Expensive habits brought by students to college from public schools, *ib.*——Results of the Commissioners' inquiries as to the actual expenses of students, and the best means of reducing them, *p.* 148——General concurrence of opinion in all classes, that the necessary expenses of a University education cannot be materially reduced, *ib.*——Recommendation of the Commissioners on this subject, *p.* 149.

II. *Digest of Evidence received in regard to each College and Hall:*

1. As to the practicability of curtailing the Expenses of Residence:

Queries circulated by the commissioners relative to the practicability of curtailing the necessary expenses of residence in college, and as to whether any privileges are conceded to college tradesmen and servants calculated to increase those expenses, *Ev. p.* 140.

Analysis of answers to the foregoing in regard to the following colleges and halls, viz.:—

Pembroke College:—

The college expenses cannot be reduced; statement of the average annual expense actually incurred, *Arlett, Ev. p.* 142——No privileges are extended to tradesmen or servants tending to increase expense, *p.* 143.

Gonville and Caius College:—

The necessary expenses cannot be materially reduced; college tradesmen and servants have no privileges tending to enhance such expenses, *Crowfoot, Ev. p.* 158; *J. J. Smith, Ev. p.* 186——The real cause of extravagance is due to the force of *expensive* rather than of *extravagant* examples, *Crowfoot, Ev. p.* 158——Fees and perquisites are almost wholly abolished and forbidden; when any causes of expense continue in action, it is through the student's own carelessness and want of resolution, *J. J. Smith, Ev. p.* 187.

Trinity Hall:—

No material reduction can be effected in the necessary expenses; actual average amount thereof at this hall; regulations enforced with regard to tradesmen and servants, *Latham, Ev. p.* 170.

Report, 1852—*continued.*

Expenses of Students—continued.

II. *Digest of Evidence received in regard to each College and Hall*—continued.

1. As to the practicability of curtailing Expenses of Residence—*continued.*

Corpus Christi College:—

The necessary expenses of students cannot be diminished, *Mould, Ev. p.* 176.

Queen's College:—

Impracticable to diminish the necessary expenses; no privileges are conceded to college tradesmen and servants having the effect of increasing these expenses, *Peill, Ev. p.* 177.

St. Catharine Hall:—

Impracticable to diminish the expenses of residence in college; no privileges are conceded to college tradesmen and servants having the effect of increasing the expense, *Philpott, Ev. p.* 179.

Christ's College:—

The necessary expenses of students not large; difficult materially to diminish them; no privileges conceded to college servants or tradesmen, tending to increase expense, *Hildyard, Ev. p.* 165; *Shaw, Ev. p.* 185; *J. Smith, Ev. p.* 191; *Wratislaw, Ev. p.* 212——No privileges are conceded to tradesmen; it is entirely optional with a student to deal with a college tradesman; abuses to which the system of tutors admitting into their accounts the bills of tradesmen is liable, *Swainson, Ev. p.* 192——The college servants are highly paid, but men of great trust being required, their income should not be reduced, *p.* 193——The present system of fees and perquisites should be entirely abolished, *ib.*

St. John's College:—

Not practicable to diminish materially the necessary expenses; no privileges conceded to tradesmen and servants calculated to increase expense, *Hughes, Ev. p.* 169; *Merivale, Ev. p.* 173——The expenses of a University education might be lessened by reducing the number of terms to nine, and by increasing the staff of college lecturers, thereby doing away with private tutors, *Hughes, Ev. p.* 169——The expenses of students might be reduced by a constant and vigilant superintendence of college authorities; suggestion for a system of monthy reports of conduct and progress, *Merivale, Ev. p.* 174.

Magdalene College:—

Neither practicable nor desirable to diminish materially the necessary expenses of a residence in college; no privileges are conceded to tradesmen or servants, *Warter, Ev. p.* 201.

Trinity College:—

Impossible to diminish the necessary expenses; no privileges are granted to servants or tradesmen calculated to increase expense, *Blakesley, Ev. p.* 147; *Cooper, Ev. p.* 152; *Frere, Ev. p.* 160; *Whewell, Ev. p.* 204, 205, 206——The greater proportion of expenditure is due to the social habits of the place; improvement herein of late years, *Blakesley, Ev. p.* 147——Any privileges granted to servants or tradesmen are designed for the protection of the student, *Cooper, Ev. p.* 152——In what the privileges of college tradesmen actually consist; advantages accruing therefrom, *Thompson, Ev. p.* 196——The necessary expenses cannot very materially be reduced, though some diminution is practicable, *ib.*——Nature of the privileges conceded to the superior servants of the college; the ordinary servants receive nothing beyond their wages; all perquisites and fees are discountenanced, *ib.*——The average annual expenditure of a pensioner at Trinity College varies from 150*l.* to 250*l.*, the former being a low, the latter a high average, *p.* 198——The expensiveness of students is their own act, and in spite of measures taken by the University and the colleges, *Whewell, Ev. p.* 204——The conduct of parents and friends increases the difficulty of controlling the expenses of students, *ib.*

Emmanuel College:—

The necessary college expenses cannot be diminished; tradesmen and servants of the college have no privileges tending to increase the expenses of students, *Archdall, Ev. p.* 142.

Downing College:—

Not practicable to diminish very materially the necessary expenses; the actual expenditure of students might in some cases be diminished by an increase of the necessary expenses, *Worsley, Ev. p.* 209.

2. *Details as to the necessary and actual Expenses of Students:*

Queries circulated by the Commissioners respecting the amount of the necessary and of the actual expenses of each class of students, and as to the practicability of reducing the expenses of college residence, *Ev. p.* 302——Answers to the foregoing from the following

Report, 1852—*continued.*

EXPENSES OF STUDENTS—continued.

II. *Digest of Evidence received in regard to each College and Hall*—continued.

2. Details as to the necessary and actual Expenses of Students—*continued.*

lowing colleges and halls, viz.: St. Peter's College, *Cookson, Ev. p.* 309, 310, 311—— Pembroke College, *Ainslie, Ev. p.* 319——Gonville and Caius College, *Chapman, Ev. p.* 327, 328——Trinity Hall, *Geldart, Ev. p.* 337, 338——Corpus Christi College, *Pulling, Ev. p.* 345, 346——King's College, *Okes, Ev. p.* 348—— Queen's College, *Dalton, Ev. p.* 356——St. Catharine Hall, *Philpott, Ev. p.* 369——Christ's College, *Cartmell, Ev. p.* 383-386. 388——St. John's College, *Tatham, Ev. p.* 398——Magdalene College, *Warter, Ev. p.* 409-412——Trinity College, *Whewell, Ev. p.* 416, 417, 418, 419—— Emmanuel College, *Archdall, Ev. p.* 426——Sidney Sussex College, *Phelps, Ev. p.* 433, 434——Downing College, *Worsley, Ev. p.* 438.

FELLOWSHIPS:

1. *Generally.*
2. *Restrictions as to Place of Birth, Kindred, &c.*
3. *Conditions of Election and Tenure.*
4. *Celibacy.*
5. *Residence.*
6. *Vacancies.*
7. *Private Incomes of Fellows.*
8. *Expediency of limiting the Term of Tenure considered.*
9. *University Examination of Candidates for Fellowships advantageous.*
10. *Digest of Answers to Queries issued by the Commissioners.*

1. *Generally:*

The fellowships in the colleges are the greatest incentive to exertion, *Rep. p.* 24. 156 ——The impartiality with which these prizes are awarded, one of the most valuable features of the Cambridge system, *ib.*——This purity of election of comparatively modern growth, *p.* 156——Principal causes of this excellence of modern practice, *ib.*—— Fellows have free access to the libraries of their respective colleges, and are allowed to remove books to their own chambers, *p.* 133——According to the ancient usage all the fellows of the society took a regular part in conducting and moderating the exercises of the students, *p.* 151——Nature of the relation that formerly existed between the fellow and the student, *ib.*

Total number of fellowships in all the colleges, *Rep. p.* 156——Table showing the distribution of these foundations in the several colleges, *p.* 157——Great changes which have taken place in the value and use of fellowships, *p.* 166——Important considerations suggested thereby in reference to the question of appropriated foundations, *ib.*——Statement exhibiting the annual value of a foundation fellowship at each of the colleges, *p.* 167——Particulars as to the bye-fellowships, their nature, and respect in which they need revision, *p.* 167, 168——Highly desirable that in every college there should be a competent number of well-endowed fellowships, in the election to which merit alone should be regarded, *p.* 184——The charters and statutes of some of the colleges direct the augmentation of the number of fellowships in proportion to the increase in the value of the college property, *ib.*

Effect of the establishment of the classical tripos in giving weight to the elections of fellows, *Whewell, Ev. p.* 101——The merits of candidates for fellowships in small colleges is too exclusively measured by their relative places in the classical or mathematical tripos; the system adopted at Trinity, which allows a student to follow a course of independent study without forfeiting his right to a fellowship, is to be preferred, *Arlett, Ev. p.* 145——Proposition for suppressing 20 per cent. of the fellowships in the different colleges, and applying their revenues in the endowment of existing and new professorships, *Blakesley, Ev. p.* 150.

2. *Restrictions as to Place of Birth, Kindred, &c.:*

Restrictions obtaining in each college as to place of birth or education, &c.; conditions of such restrictions in particular cases, and result, *Rep. p.* 157–164——All the restricted fellowships (excepting Bishop Dee's fellowship) were founded during the 16th century, *p.* 164. 166——The statutes of the earlier colleges were liberal and comprehensive, *p.* 164——Dr. Peacock's work on the statutes quoted in regard hereto, *p.* 164, 165 ——Expediency of removing all limitations, excepting in the case of particular schools, by a legislative enactment, *p.* 165——Considerations influencing the Commissioners in coming to this conclusion, *ib.*——Other considerations affecting as well the claims of kindred, as those of a merely local character, *p.* 166——The chief motives for local restrictions in the election to fellowships have ceased to exist, *ib.*——If the claims of kindred and local qualification in existing foundations be extinguished, the creation of any similar claims in future accessions of endowment must be prohibited, *p.* 167—— The restrictions as to north and south, and particular counties, are no longer desirable, and should be abolished *Hildyard, Ev. p.* 167——Fellowships, &c. are better without

Report, 1852—*continued.*

FELLOWSHIPS—continued.

2. *Restrictions as to Place of Birth, Kindred, &c.*—continued.

restrictions, *Phelps, Ev. p.* 434——Large proportion of lay to ecclesiastical fellows in St. John's and Trinity Colleges; effect of these restrictions in excluding persons desirous of pursuing the study of science, *Babington, Ev. p.* 451, 452——Objections to the system of appropriated fellowships; opinion that all such restrictions to county, district or kingdom, be done away, *p.* 452.

3. *Conditions of Election and Tenure:*

Peculiarities of election to the several fellowships; changes therein recommended in certain instances, *Rep. p.* 168, 169——Provisions of the several statutes with regard to the academical standing of candidates for fellowships; recommendations in regard hereto, *p.* 169, 170——Legal and medical fellowships in some of the colleges; course recommended to be taken in regard to these classes of fellowships, *p.* 170——Statutable requirements in regard to theological degrees taken by fellows; recommendation in regard thereto, *p.* 170, 171——Strong objections to the removal of the obligations imposed upon fellows in regard to the choice of a profession. *p.* 171——The allowance of a reasonable interval of time before a newly-elected fellow should be required to enter into Holy orders, or vacate his fellowship recommended, *ib.*

4. *Celibacy:*

The condition of celibacy at present attached to all fellowships cannot conveniently be relaxed, *Rep. p.* 84——The condition of celibacy is now invariably attached to the tenure of all fellowships, *p.* 172——Opinion that it cannot be conveniently separated from the collegiate system, *ib.*——Effect of the condition to prevent many men of ability from continuing their residence in the University; manner in which this is proposed to be obviated, *ib.*——Rule laid down in the Elizabethan statutes in regard hereto, *ib.*——In revising the statutes of the University and of the colleges, it will be necessary to provide for the continuance of this rule, *ib.*——Highly objectionable to make fellowships tenable after marriage, *J. J. Smith, Ev. p.* 190.

5. *Residence:*

Change in this system of tuition resulting from the non-residence of a large number of the fellows, *Rep. p.* 152——Inexpedient to recall the severity of ancient statutable regulations in respect to the residence of fellows within the walls of the college, *p.* 171——Sufficient to enforce the residence during term time of the master and scholars, *ib.*——Very questionable whether desirable to retain the more distinguished students in the University after attaining fellowships; sufficient for the purposes of education will always remain, *Hildyard, Ev. p.* 166——The fellows should not be forced into residence, but the non-resident members of the foundations ought to contribute more than they do to the work of education, *Swainson, Ev. p.* 194——The succession to fellowships is slower than it should be; the abolition of non-residence would be a gain in this matter; plan for distributing a portion of the smaller benefices in the Chancellor's gift among the fellows, *J. J. Smith, Ev. p.* 190.

6. *Vacancies:*

Diversity in the law and practice of the several colleges in regard to the time during which fellowships are kept vacant, *Rep. p.* 170——Recommendation for retaining the annual election at a fixed time for the three large colleges, and that all vacancies in other colleges be filled up within twelve months, *ib.*

7. *Private Incomes of Fellows:*

Condition in most of the ancient college statutes respecting the amount of private income with which the tenure of fellowships and scholarships shall be incompatible, *Rep. p.* 171——Modifications of the ancient statutable regulations effected in the revised codes of several of the colleges; those modifications approved of, *ib.*

8. *Expediency of limiting the Term of Tenure considered:*

Expediency of limiting the tenure of fellowships to a term of years; recommendations as to what this term should be, *Rep. p.* 182, 183——All the colleges founded since the Reformation required, in their original codes, that the fellows should cease to derive any advantage from the college after a limited time, *p.* 182.

9. *University Examination of Candidates for Fellowships advantageous:*

A University examination of candidates for fellowships in the smaller colleges recommended, *Wratislaw, Ev. p.* 216——Advantage of establishing an examination by a University Board of those gentlemen who shall be elected to fellowships; nature of the examination that might be required in such cases, *Swainson, Ev. p.* 270, 271.

10. *Digest*

Report, 1852—*continued.*

FELLOWSHIPS—continued.

10. *Digest of Answers to Queries issued by the Commissioners:*

Queries circulated by the Commissioners as to whether the great increase of the emoluments, &c., in the law and church, &c., have had the effect of inducing the more distinguished students, after attaining fellowships, to quit the University; whether this has increased the difficulty of retaining the best qualified persons to fill the more important offices in the colleges and University, and as to the means of increasing the emoluments of tutors, &c., so as to retain the ablest men, *Ev. p.* 141.

Answers to the foregoing from the following, viz.:

Pembroke College:—

No effect whatever has been produced by the causes referred to; desirable, nevertheless, to increase the emoluments of the public teachers; this proposed to be effected by enlarging the inducements to students to go to the University, *Arlett, Ev. p.* 146.

Gonville and Caius College:—

The desire to marry and settle in domestic life has had more influence than any other motive, *Crowfoot, Ev. p.* 158——No serious difficulty has yet been found in retaining the best qualified persons to fill offices in college or University; the emoluments and honour attaching to the important offices are sufficient to induce well-qualified men to remain; non-residence a great abuse; suggestions for improving the position of professors, *J. J. Smith, Ev. p.* 189, 190.

Corpus Christi College:—

A considerable part of the highest talent is drained off to the law; high ideas of the Christian ministry do not prevent men from acting as college tutors, *Mould, Ev. p.* 177.

Queen's College:—

To retain the ablest men would require a more radical change in the University and college system than it is possible to carry out at the present time, *Peill, Ev. p.* 178, 179.

St. Catharine's Hall:—

A greater number of persons who have gained distinction leave the University now than formerly; with such emoluments and prospects as the University is able to afford, no difficulty has been found in securing well-qualified men, *Philpott, Ev. p.* 183——Suggestions for increasing the professorial emoluments, *ib.*

Christ's College:—

The effect of the increased emoluments in the legal profession, preferments in the Church, and the improved revenues of public schools, has been to draw away many of the ablest men at the time when experience has rendered them most useful, *Gunson, Ev. p.* 164——Suggestion for allowing members of the senate to open houses for the board and education of students, who should be members of the University, though not of any college, *ib.*——Plan proposed for raising a fund for augmenting the incomes of professorships by payments from students for attending lectures, by contributions from the colleges, and by a better management of the Pitt Press, *ib.*——The difficulty of retaining men of ability lies in the underpayment of lecturers and tutors, their offices leading to nothing; the present professorships, however well endowed, would not remedy this defect, which is owing to the uncertainty of tenure rather than any other cause; not desirable that the tutor should be married; a wide difference, however, between the offices of tutor and lecturer, *Swainson, Ev. p.* 195——The causes referred to have operated most prejudicially to the University; changes suggested in the collegiate and academical system, *Wratislaw, Ev. p.* 215.

St. John's College:—

There is no difficulty found in retaining the best qualified persons to fill the more important offices; the increase of the number and emoluments of the masterships in large schools is the chief cause of withdrawal; any plan fixing men in their present positions as tutors, &c. for life, would act most prejudicially, *Hoare, Ev. p.* 168——No difficulty in the large colleges in finding able men to fill the offices of tutor and lecturer; there may be in the small colleges, *Hughes, Ev. p.* 169——Doubts whether a less disposition to remain in college obtains now than formerly; if it exists it is to be attributed to an impression that the system of the University is carried on in an unsatisfactory manner, and that its arrangements fall behind the requirements of the age, *Merivale, Ev. p.* 175.

Magdalene College:—

The quick succession and great youthfulness of college tutors and officers have been decidedly detrimental to the colleges, *Warter, Ev. p.* 202.

Report, 1852—*continued.*

Fellowships—10. *Digest of Answers &c.*—continued.

Trinity College:

The difficulty of retaining the best qualified students after obtaining fellowships has been materially increased of late years; cathedral preferments, increase of proprietary schools, district churches, inspectorships of schools, &c. has operated in causing this, *Blakesley, Ev. p.* 149——Suggestions for remedying this state of things, *p.* 149, 150——Large emoluments and removal of the restriction on marriage in the case of tutors of colleges would retain many distinguished men; the best men might however be retained too long; doubts whether the causes specified have had the effect supposed, *Cooper, Ev. p.* 154——The changes alluded to, especially in the law, have had the effect of much diminishing the number of residents from which the official staff is supplied, *Evans, Ev. p.* 159——Doubts whether the changes that have taken place in the legal and clerical profession have occasioned any difficulty in retaining the services of those best qualified to fill college offices, *Frere, Ev. p.* 161——The changes enumerated have undoubtedly been injurious to the University; increasing the number of professorships, unclogging others from the conditions of celibacy and Holy orders, and increasing the proportion of lay to clerical fellowships, suggested as a remedy, *Thompson, Ev. p.* 199, 200——The changes referred to have not affected this college; the present very wide licence of non-residence of fellows injurious; suggestions for a class of college professors constituted out of the present fellows, with certain commutations as to Holy orders and celibacy, *Whewell, Ev. p.* 207.

Emmanuel College:

No alteration in the collegiate system would be desirable in order to secure the services of the best men, *Archdall, Ev. p.* 142.

Downing College:—

The causes enumerated have tended materially to engage the abler University men in professions more generally and earlier than heretofore; the effects consequently are to withdraw the more advanced students, and to debar professors from larger historical research, and a more thorough investigation and exposition of principles; the increase of professional emoluments will be best left to the increase of each professor's class; no increase of tutorial emoluments is needed to induce sufficiently able men to hold college tutorships, *Worsley, Ev. p.* 210.

Queries circulated by the Commissioners relative to the fellowships of the several colleges; their mode of election, conditions of eligibility and tenure, and stipends and duties; also whether expedient to remove restrictions now affecting the same or to consolidate the smaller fellowships, *Ev. p.* 302——Answers to the foregoing from the following colleges and halls, viz.: St. Peter's College, *Cookson, Ev. p.* 306, 307. 311——Pembroke College, *Ainslie, Ev. p.* 317–319, 320——Gonville and Caius College, *Chapman, Ev. p.* 325, 326. 328, 329——Trinity Hall, *Geldart, Ev. p.* 331. 333. 338——Corpus Christi College, *Pulling, Ev. p.* 344. 346, 347——King's College, *Okes, Ev. p.* 347, 348, 349——Queen's College, *Dalton, Ev. p.* 354, 355——St. Catharine Hall, *Philpott, Ev. p.* 361, 362. 369——Christ's College, *Cartmell, Ev. p.* 372–375. 387——St. John's College, *Tatham, Ev. p.* 396, 397, 398——Magdalene College, *Warter, Ev. p.* 404, 405. 412, 413——Trinity College, *Whewell, Ev. p.* 414. 417, 418——Emmanuel College, *Archdall, Ev. p.* 425, 426——Sidney Sussex College, *Phelps, Ev. p.* 428–430. 434——Downing College, *Worsley, Ev. p.* 436, 437, 438.

Queries circulated by the Commissioners respecting the yearly sums received by the fellows on the foundation, or on any supplemental or bye-foundation in the several colleges and halls, *Ev. p.* 303——Answers thereto from the following, viz.: St. Peter's College, *Ev. p.* 313, 314——Pembroke College, *Ev. p.* 321, 322——Trinity Hall, *Ev. p* 342——King's College, *Ev. p.* 351, 352——Queen's College, *Ev. p.* 357——Christ's College, *Ev. p.* 391——St. John's College, *Ev. p.* 400——Trinity College, *Ev. p.* 422, 423——Emmanuel College, *Ev. p.* 427——Downing College, *Ev. p.* 445.

Fothergill, Thomas. Books and MSS. given by to the library of St. John's College, *Tatham, Ev. p.* 403.

France, Rev. F., M.A., Fellow and Tutor of St. John's College. (Analysis of his Answers to Queries.)

[1. *Queries as to Classical Studies and Examinations:*]

The principal honorary classical examinations are the University scholarships, the Chancellor's medals, and the classical tripos; respects in which the latter differs from the two former, *Ev. p.* 282——Subjects of the scholarships' and the Chancellor's medals,

Report, 1852—*continued.*

France, Rev. F., M. A. (Analysis of his Answers to Queries)—*continued.*

[1. *Queries as to Classical Studies and Examinations*]—continued.

examinations, *Ev. p.* 282——Particulars as to the foundation of the different scholarships, the institution of the Chancellor's medals, and the establishment of the classical tripos; changes made from time to time in the latter, *p.* 282, 283.

The examiners for the scholarships are *ex-officio* examiners, whose offices have frequently no connexion with classical studies; it would be desirable to apply the rule in the case of the Pitt scholarship to the others, *i.e.*, the Regius Professor of Greek and the Public Orator to be permanent examiners, to be assisted by two others to be appointed, *Ev. p.* 283——The same plan might be applied to the medal examination, *ib.*——Great advantage would arise to the University from the establishment of a Board of classical studies, *ib.*——Works that might be excluded from classical examinations, *ib.*——Change that might be made in the eligibility of candidates for the medal examination, in the event of its retention, *ib.*——It is desirable to throw open the classical tripos to all who have passed the ordinary degree in the previous January, *ib.*——Injudicious preference at present given to Latin verse composition over sound scholarship in the examinations for the scholarships, *p.* 283, 284——A reduction in the number of classical exercises in verse and prose might be made with advantage, *p.* 284.

[2. *Queries as to Expenses and Tuition:*]

Number of tutors on each side of St. John's College; lectures given by the classical tutors on witness's side of the college, *Ev. p.* 284——Most candidates for the classical tripos examination read with private tutors; if the staff of college classical lecturers were doubled, this practice would be discouraged, *ib.*——Candidates for the previous or the ordinary degree examinations need not, even under the present state of things, resort to a private tutor, unless very backward, *ib.*——Means by which private tuition might be discouraged, *ib.*

Number of sizarships at St. John's College; examination had for them; principle upon which they are filled up; the latter being irrespective of mere poverty, merit being the only practicable or desirable principle of guidance, *Ev. p.* 284——An inadequately endowed hall or college for poor students would not succeed, *p.* 285——College examinations had at St. John's; period at which the scholarship examination is held; University examinations for which preparation is required, *ib.*——Frequent college examinations have a tendency to discourage private tuition; necessity, in order to promote this tendency, for the college examinations to be conducted in correspondence with, and subordinate to the University examinations, *ib.*

There is no matriculation examination at St. John's excepting for sizarships, *Ev. p.* 285——It would not be judicious to establish a University admission examination; such an examination would act in a manner not to be desired in the case of candidates for Holy orders, *ib.*——Neither do schools require to be stimulated by such a means, *ib.*——In order to increase the staff of tutors and lecturers, the fees for college tuition should be raised; as private tuition would be then superseded, the student would be a gainer, *ib.*

Suggestion for the omission of the first and last terms; a general degree examination ought to take place in the June of the third year of residence, *Ev. p.* 285——Inconvenience arising from the accumulation of students in the Michaelmas term, *ib.*——Suggestion as to the arrangement of the examinations in the event of a change, *ib.*——Residence permitted to students during the vacation, *ib.*——Few students of St. John's form reading parties out of Cambridge with private tutors, during the vacation, *ib.*

Francis, Rev. Clement. Minerals presented by, to the Mineralogical Museum, *Rep. p.* 123; *Miller, Ev. p.* 133.

Frankland, Mr. Scholarship at St. Catharine's Hall founded by, mode of election thereto, stipend, &c., *Rep. p.* 169. 188; *Philpott, Ev. p.* 362. 366——Regard had to the recommendation of the mayor and aldermen of Coventry in the nomination to the fellowship, *Philpott, Ev. p.* 362.

Frankland, Joyce. Scholarships at Caius College founded by, in 1585, *Rep. p.* 187.

Frankland, Mrs., and William Saxey. Fellowships at Gonville and Caius College founded by, in 1586, *Chapman, Ev. p.* 326.

Frankwell Parish (*Salop*). Scholarships at Magdalene College, on J. Millington's foundation, open to natives of, *Warter, Ev. p.* 407.

Freeston, John. Fellowship and scholarships at Sidney Sussex College founded by; present annual value thereof, *Rep. p.* 195; *Phelps, Ev. p.* 430; *Master and Fellows of Sidney Sussex College, Ev. p.* 434.

French Language. Preceptor of the French language about to be appointed by the Professor of Modern History; conditions and emoluments of the office, *Sir J. Stephen, Ev. p.* 113.

Report, 1852—*continued.*

FRERE, REV. JOHN ALEXANDER, M.A., FELLOW OF TRINITY COLLEGE. (Analysis of his Answers to Queries.)

[*Queries as to Expenses and Tuition:*]

The necessary expenses of college residence cannot be diminished; they are not increased by privileges granted to tradesmen, *Ev. p.* 159, 160——Classification of students formerly adopted, but since abandoned, *ib.*——Attendance given at lectures; sufficiency of the present staff of lecturers at this college, *p.* 160, 161——Charges for private tuition, *p.* 160——The re-enactment of the Grace of 1781, restricting private tuition, would not be expedient, *ib.*——Number and value of the foundation sizarships at this college; plan observed in filling them up, *ib.*

Working of the college matriculation examination, *Ev. p.* 161——Objections to a general entrance examination by the University, *ib.*——The extension of the sphere of professional employment has not increased the difficulty of obtaining college officers, *ib.*——The substitution of nine for ten terms would be an advantage; but to shorten the vacation would not, *ib.*——Permission to reside in college during the long vacation, is not easily obtained, *ib.*——Reading parties are of ordinary occurrence, and if well managed, are beneficial, *ib.*——Large proportion of students of this college living in lodgings; regulations prescribed for lodging-houses; manner in which they are observed, *p.* 161, 162.

Freshwater Rectory (*Isle of Wight*). Annexed to the mastership of St. John's College, by Sir Isaac Pennington, *Tatham, Ev. p.* 397.

Funded Property of the University. Annual income produced therefrom, *Rep. p.* 138.

See also *Income and Expenditure.*

Furness Fells (*Lancaster*). Fellowships and scholarships at St. John's College, on Dr. Fell's foundation, limited to natives of, *Rep. p.* 163. 190.

G.

Gale, William. Scholarships at Caius College founded by, in 1540, *Rep. p.* 187.

Garnons, Rev. G. L. P. Collection of corals presented by, to the Woodwardian Museum, *Sedgwick, Ev. p.* 118.

GASKIN, REV. T., M.A., LATE FELLOW AND TUTOR OF JESUS COLLEGE. (Analysis of his Answers to Queries.)

[*Queries as to Mathematical Studies and Examinations:*]

Method pursued by the University in determining the proficiency in mathematics of students being candidates for the B. A. degree, *Ev. p.* 226. 230–233. 234——Recommendations of the Board of Mathematical Studies (1849) in reference to this subject, *p.* 233, 234——The same having been adopted, report of the said Board (1850) on the working thereof, and further recommendations on this subject, *p.* 234–236——The book-work question of the examinations are more searching than formerly; the matter of the examinations has remained stationary during the last ten years; subjects introduced in 1831; tendency at the present time to reduce the subjects of the examination; purport of the regulations made in regard hereto in 1848, *p.* 226——No tendency at this time to extend the number of subjects of the examination, or to make them less elementary, *ib.*

Mathematical subjects embraced in the requirements for a common degree, *Ev. p.* 226, 227——Subjects of examinations for honours, *p.* 227——Reason for supposing that the standard of qualification, both for the ordinary degree and for honours, will be raised, *ib.*——Average proportion of students to the total number taking degrees, in decennial periods, from 1801 to 1851, *ib.*——Statement respecting rejected candidates for honours, *ib.*——The examples and deductions accompanying the examination propositions are generally too difficult, *p.* 227, 228——Working of the recently-appointed syndicate of studies, *p.* 228——This Board has no power to effect alterations in the examinations, *ib.*——Graces passed in consonance with suggestions made by them in 1849 and 1850, *ib.*——Subjects excluded from the examinations on the foregoing recommendations, *ib.*

The higher treatment of some subjects of examination might be advantageously postponed till after the B. A. degree, *Ev. p.* 228——No alteration is to be recommended in the subjects included in the present course of examination, *ib.*——List of elementary books used in the University, *ib.*——Completeness of the course of mathematics embraced by these books, *p.* 229——Use made of MSS. containing problems, &c., *ib.*——From 1832 to 1847 there was a tendency in the mathematical course to become increasingly symbolic and analytical; the regulations of 1848 have checked this tendency, *ib.*——The problems proposed in the examinations do not bear too large a proportion to the questions derived from the books commonly read, *ib.*——But the ingenuity of them is such at times

Report, 1852—*continued.*

Gaskin, Rev. T., M. A., late Fellow and Tutor of Jesus College. (Analysis, &c.)—continued.

[*Queries as to Mathematical Studies and Examinations*]—continued.

as to embarrass those required to solve them in the time allowed, *Ev. p.* 229——Although the number of problems is generally more than the time allowed suffices for their solution, yet it is not expedient to alter the plan in this respect; reasons assigned, *ib.*

System of preparation adopted by candidates for honours, *Ev. p.* 229——In these cases private tutors are rarely dispensed with, *ib.*——Many eminent University men are private tutors, *ib.*——Suggestion for making the private tutors auxiliaries to those of the college, *p.* 229, 230——Inducements to prosecute mathematical studies after attaining the B.A. degree, *p.* 230——To defer the examination for the Smith's Prize would not operate as an inducement, but an alteration in the subject of the prize might be advantageously made, *ib.*

Nature of the Adams' prize, *Ev. p.* 230——The institution of prizes similar to this would contribute to the continued and progressive study of mathematics and natural philosophy, *ib.*——Method adopted by the examiners to test the relative merits of the candidates for mathematical honours; alteration suggested in this plan, *ib.*——Practice of allowing private examinations which obtains in certain cases of candidates for the ordinary degree; advisability of discontinuing this practice, *ib.*——Copy of the report of the Board of Mathematical Studies for 1849, *p.* 230–234——Report of the same Board for the year 1850, *p.* 234–236.

Gates of the College. Usual hour of closing the college gates at night; regulations as to leaving and entering the college after that time, *Rep. p.* 146.——See also *Lodging Houses.*

Geldart, Rev. Dr. J. W. (*Formerly Professor of Civil Law*). Terminal examinations instituted by, for students in civil law, *Rep. p.* 33; *Maine Ev. p.* 78.

Geldart, T. C., M. A., Master of Trinity Hall. (Analysis of his Answers to Queries).

[*Queries as to the Colleges:*]

Period of foundation of Trinity Hall; particulars respecting the statutes, *Ev. p.* 330——Qualifications required, and manner of appointment of the masser, *p.* 330, 331——Mode of appointment of fellows, qualifications required, conditions attached to their election, emoluments and privileges annexed, *p.* 331——Leave of absence from residence permitted to the master and fellows, *p.* 331, 332——Number of foundation scholarships; studies prescribed, and allowances, *p.* 332——List of, and particulars respecting, other fellowships and scholarships; their endowment, and qualifications required of those elected into them, *p.* 332, 333.

Changes of practice, in regard to the regulation of the college, made at different periods, *Ev. p.* 333, 334——Present practice, so far as regards the master and fellows, *p.* 334——The like, as to the scholarships, &c., *p.* 334, 335——Particulars respecting Dr. Allen's scholarships, and the Chetwode and Oxenden exhibitions, *p.* 335——Tenure of scholarships, *ib.*——Law studentships established in 1849, *ib.*——Practice as to admissions to this college, *ib.*——Hours of Divine service, and attendance required thereat, *p.* 336.

Course of instruction given to students; this is regulated with a view to the public examinations of the University, *Ev. p.* 336——Fellows employed in giving college lectures, *ib.*——Number of the college examinations; subjects, and periods when held, *ib.*——Rewards for proficiency in the examinations, *ib.*——Attendance at lectures required of students, and also at preparatory examinations, *p.* 336, 337——Attendance required at dinner in the hall, *p.* 337——Hours at which students must be in either in college or lodgings, *ib.*——Regulations for restrictions of expenses, *ib.*——Necessary expenses of fellow commoners and pensioners, *ib.*——Average actual expenses of same, *p.* 337, 338——No provision for poor students exists at this college beyond the scholarships and exhibition, *p.* 338——No considerable reduction can be made in the price of commons, &c.; legislative interference seems necessary for further restraining habits of extravagance and facilities of credit, *ib.*

The Allen scholarships are the only ones involving limitations, and no inconvenience is felt from the circumstance; but this college feels aggrieved at its members being debarred from becoming candidates for the Bell scholarships, *Ev. p.* 338——No scholarships have become ineffective from default of claimants; no consolidation of any scholarships appears necessary, *ib.*——Reasons which have deterred the college from seeking new statutes, *ib.*

General Council of Studies. Recommendation for the institution of such a council; its contemplated character, functions and constitution described, *Rep. p.* 104.

General Jurisprudence. New professorship recommended, *Rep. p.* 102.

Geological

Report, 1852—*continued.*

Geological Lecture Room. Its size and capacity for lecturing, *Stokes, Ev. p.* 97, 98.

Geology. Date of foundation, endowment, &c., of the Woodwardian professorship of geology, *Rep. p.* 63. 72; *Sedgwick, Ev. p.* 115. 117——Duties of the professor, *Sedgwick, Ev. p.* 115, 116——Fees, *p.* 116——Museum and library, *p.* 117–119——General condition of the study of geology in the University, *p.* 119——Best means of promoting it, *p.* 119–121.

Geometry. A new professorship of descriptive geometry recommended, *Rep. p.* 102——Date of foundation of the Lowndes' professorship of astronomy and geometry; endowment, duties, &c., *Peacocke, Ev. p.* 121, 122.

Remarks as to the choice of methods, and as to the increasing preference for geometry over analysis, *Ellis, Ev. p.* 223, 224——Erroneousness of the prevalent practice of making too rigorous a separation of geometry and analysis; change required, *p.* 224, 225——The examination, as now carried on, is not too analytical and symbolical, objections to forcing geometrical methods on students, more than is at present done, *Mould, Ev. p.* 251——The recurrence to geometrical proofs has discouraged the tendency of the mathematical course of study to become too analytical and symbolic; general effect of the change on the habits of study of the present generation of mathematical men, *Swainson, Ev. p.* 269.——*See* also *Lowndean Professorship of Astronomy, &c.*

George, I., King. Professorship of Modern History founded by, in the year 1724; particulars as to the same, *Rep. p.* 61; *Sir J. Stephen, Ev. p.* 111——Letters Patent of George I, creating the modern history professorship, *App. p.* 457——Copy of letter, dated 16 May 1724, sent by His Majesty to the University on the subject of the professorship, *p.* 459——Address of the University in reply, *p.* 460——Appointment of Samuel Harris to the professorship, *p.* 461——Appointment of 15 scholars, *p.* 462.

Donation of books by George I. to the University library, *Rep. p.* 127; *Power, Ev. p.* 50, 56.

George II., King. Donation by, towards building the University library, *Power, Ev. p.* 50.

George IV., King. Amount given by, to Trinity College, towards erecting additional buildings, *Master and Fellows of Trinity College, Ev. p.* 424.

German Language. Preceptor of the German language recently appointed by the professor of modern history; conditions and emoluments of the office, *Sir J. Stephen, Ev. p.* 112.

German Universities. Strict checks enforced on tradesmen by the law, *Thompson, Ev. p.* 197.

Giggleswick Grammar School. Scholarships at Christ's College on Carr's foundation restricted to students from, *Cartmell, Ev. p.* 379; *Master and Fellows of Christ's College, Ev. p.* 393.

Gilbert, Ambrose. Scholarships at St. John's College, founded by, in 1647, *Rep. p.* 191. 194——Books given by to the library of St. John's College, *Tatham, Ev. p.* 403.

Gillingham, Mr. Fellowship at Emmanuel College founded by, in 1721, *Archdall, Ev. p.* 425——Annual income of the property left by Mr. Gillingham, *Master and Fellows of Emmanuel College, Ev. p.* 427.

Gisborne, Rev. Francis. Fellowships and scholarships at St. Peter's College founded by, in 1824; mode of election; conditions of tenure, *Cookson, Ev. p.* 308.

Gisborne, Thomas, M.D. Books given by to the library of St. John's College, *Tatham, Ev. p.* 403.

Glaston Rectory (Rutland). Net value thereof; attached, by Act of Parliament, to the mastership of St. Peter's College, *Rep. p.* 154.

Gloucestershire. Scholarship at Christ's College, on the Berkeley foundation, limited to natives of, *Rep. p.* 189; *Cartmell, Ev. p.* 378.

Goade, Dr. Roger. Bequest by, to the library of King's College, *Okes, Ev. p.* 349.

Goch, Dr. Fellowships at Magdalene College founded by, in 1639; they have now no endowment, *Rep. p.* 168; *Warter, Ev. p.* 406——Foundation estate left by Lord Audley to Magdalene College, sought to be recovered during the mastership of, 1606, *Warter, Ev. p.* 404.

Report, 1852—*continued.*

Gonville and Caius College:

1. *Foundation of the College; Statutes.*
2. *The Mastership.*
3. *Fellowships.*
4. *Scholarships and Exhibitions.*
5. *Matriculations and Degrees.*
6. *Lectures and Examinations.*
7. *Students; their Discipline and Expenses.*
8. *College Library.*
9. *Memorial from three Fellows.*

1. *Foundation of the College; Statutes:*

Particulars relative to the foundation of Gonville and Caius College, *Chapman, Ev. p.* 324——Visitors, *p.* 325.

Two distinct codes of statutes are in force in this college; those of Dr. Caius are binding only so far as they are not repugnant to the earlier code of Bishop Bateman, *Rep. p.* 150——Curious provision in Dr. Caius' statutes respecting fines on leases, *ib.* 198——Particulars as to the statutes given by Bishop Bateman, and subsequently by Dr. Caius, *Chapman Ev. p.* 324, 325.

Copy of Mr. Tancred's deed of settlement, *App. p.* 471.

2. *The Mastership:*

Manner in which the election of master of this college is provided for, *Rep. p.* 152; *Chapman, Ev. p.* 325——Alteration introduced by Dr. Caius in the statutable regulations relating to the mastership, *Rep. p.* 153——No information as to the emoluments of the mastership, *p.* 156——Duties and stipend of the master, *Chapman, Ev. p.* 325.

3. *Fellowships:*

Medical fellowships at this college, *Rep. p.* 95——Number of foundation and bye-fellowships in this college, distinguishing whether open or restricted, *p.* 157——Particulars as to the restricted fellowships founded by Lady Ann Scroope, Elizabeth Clere, and Dr. Caius, *p.* 158——No information furnished by this society as to the value of its foundation fellowships, *p.* 167——Academical standing required of candidates for fellowships, *p.* 170.

Election of fellows; circumstances which vacate a fellowship; absence from residence permitted to fellows, *Chapman, Ev. p.* 325——Restrictions attached to fellowships, *ib.* ——Duties and stipends of the fellows, *ib.*

List of bye-fellowships founded at different periods, and statement as to scholarships and exhibitions, *Chapman, Ev. p.* 326——Opinion that nothing can justify a departure from the wishes of the founders concerning the conditions attached to the elections into fellowships, &c., *p.* 328, 329——Objections to a consolidation of those bye-fellowships, which are inadequate to the maintenance of a fellow, *p.* 329.

4. *Scholarships and Exhibitions:*

Number of scholarships at this college; proportion thereof restricted; annual value, *Rep. p.* 186, 187——The college should have a more influential voice in the appointment to the Tancred medical scholarships than it has at present, *Fisher, Ev. p.* 133——No scholarships have been known to become ineffective from want of claimants, *Chapman, Ev. p.* 329——Many scholarships with small stipends are preferable to a few with large stipends, as they excite a greater number of students to compete for them, *ib.*

No sizars are admitted, *Rep. p.* 195——Provision made for poor students in the way of exhibitions, *J. J. Smith, Ev. p.* 188; *Chapman, Ev. p.* 327, 328.

5. *Matriculations and Degrees:*

Number of students entered at Caius College in each year ending 10th October 1844 to 1848, *Rep. p.* 145——Summary of the number of members of the college in 1851, *ib.* ——Number of residents on 14th November 1851, *ib.*——Table showing the number of matriculations at this college in the years 1800, 1810, 1820, and 1830, and in each of the ten years 1840 to 1850, *Romilly, Ev. p.* 66——Similar table of the number of degrees of the several grades granted in the same periods, *p.* 67–70——Total number of degrees granted in the last eight years, *p.* 70——Mode of admission of students, *Chapman, Ev. p.* 326.

6. *Lectures and Examinations:*

Particulars as to the lectures given at this college; classification of the students adopted; attendance is compulsory, *J. J. Smith, Ev. p.* 187——The staff of college lecturers is sufficiently compete, *ib.*——College examinations for which students are required to prepare; there is no matriculation examination, *p.* 189——Subjects of the collegiate lectures and examinations; number of lectures given, and persons employed in giving them; number of examinations, *Chapman, Ev. p.* 326, 327——The fellows conduct

Report, 1852—*continued.*

Gonville and Caius College—continued.

Lectures and Examinations—continued.

duct the examinations; there are fourteen fellows resident in the college, and they either hold offices or are engaged in public or private tuition, *Chapman, Ev. p.* 327——Attendance of students at the college lectures, *ib.*

7. *Students; their Discipline and Expenses:*

Students are allowed to reside in college during the long vacation, by special permission, *J. J. Smith, Ev. p.* 190——The greater number of students of this college reside in lodgings, *ib.*——Services performed at the chapel; regulations as to the attendance thereat, and also in the hall at dinner-time; hour of closing the college gates, *Chapman, Ev. p.* 326——The daily college expenses of a student for eatables amount to 1 *s.* 7½ *d.*; there are no means of reducing this sum, *p.* 327——Many students go through the whole college course, including every expense, except private tuition, for 300 *l.* or 400 *l.*, *ib.*——The necessary expenses of college residence cannot be reduced; an Act of the Legislature alone can check habits of extravagance and facilities of credit; there are objections to the practice of discommuning tradesmen giving credit over 5 *l.* without notice to the tutor; instances of fraudulent and extravagant charges made by tradesmen; difficulty of dealing with such cases, *p.* 328.

8. *College Library:*

Number of volumes and MSS. in the college library; catalogue made thereof, *Rep. p.* 134——Valuable character of portions of the collection, *ib.*——The library is in the care of the librarian, who is a fellow appointed to that office by the master; a scholar acts as assistant; no regular attendance is required of them, *Chapman, Ev. p.* 329——Catalogue, arrangement of books, and general description of the library, *ib.*——Bequests to the library; sources from which the library is supported, *ib.*——Number and description of books and MSS., *ib.*——Admission permitted to the library, *p.* 329, 330——Extracts from the rules and regulations as to the MSS. and locked-up classes, *p.* 330.

9. *Memorial from three Fellows:*

Memorial of Messrs. Budd, Tozer, and Walker, senior fellows of this college, calling the attention of the Commissioners to certain facts, viz., the limitation of the mastership to men born in Norfolk, *Ev. p.* 448——The restrictions in regard to place of birth of senior fellows, *ib.*——The like in respect to the Wortley and other fellowships and scholarships, *p.* 448, 449——The inequality of the fellowships in emoluments and privileges, *p.* 449——As to the statutes given to the college by Bishop Bateman in 1353, and those of Dr. Caius in 1572, *ib.*

Remarks on the foregoing by the Commissioners, *Rep. p.* 158.

Goodbehere, H. Fellowship at Trinity Hall founded by, in 1821; annual value thereof, *Geldart, Ev. p.* 333, 334; *Master and Fellows of Trinity Hall, Ev. p.* 341——The clerical fellow on the Goodbehere foundation gives college lectures, *Geldart, Ev. p.* 336.

Goodknape, Robert. Fellowship at Trinity Hall founded by, in 1508, *Rep. p.* 182; *Geldart, Ev. p.* 332.

Goodwin, Rev. H., M.A., late Fellow of Gonville and Caius College. (Analysis of his Answers to Queries.)

[*Queries as to Mathematical Studies and Examinations:*]

Manner in which the mathematical examinations are conducted; period over which the examination for honours extends, *Ev. p.* 236——The examinations have improved of late years; extension from time to time of the range of subjects; tendency evinced in the last few years to restrict the range of subjects, *ib.*——Preventive efficacy of the Board of mathematical studies as to any mischievous tendency in the examinations, *ib.*

Requisites for the common degree, *Ev. p.* 236——Also for honours, *ib.*——The prevalent impression that the standard of requirements for the ordinary degree has been raised is, in some respect, erroneous; difficulties opposed to raising the standard of requirements, *ib.*——The requirements for honours are now more definite, but not higher; reason of this, *ib.*——Proportion of degrees with honour, to the ordinary degree, *ib.*——Number of rejected candidates for honours, and for the ordinary degree, *p.* 237.

Comparative efficiency of the present system of examination; the re-introduction of the old system of academical school exercises is to be desired, *Ev. p.* 237——The authority of the Board of studies is merely recommendatory; satisfactory working of the Board, *ib.*——The books used are continually varying; general use made of MS. instruction in conjunction with books; efficacy of this plan, *ib.*——Tendency of mathematical study to become exclusively analytical and symbolic; checks opposed to this tendency, *ib.*——Difficulty of fixing, by legislation, the nature of the problems, *ib.*

Goodwin, Rev. H., M.A., late Fellow of Gonville &c. College. (Analysis, &c.)—continued.

6. *Lectures and Examinations*—continued.

Prevalence of private tuition; an improved system of college tuition would supersede this practice, *Ev. p.* 237——Nature of indirect encouragement given to mathematical reading, *ib.*——Advantage of deferring the examination for the Smith's prize till a later period after that for the B. A. degree, *ib.*——Operation of the Adams' prize, *p.* 238——Impediments to the prosecution of mathematical studies after the attainment of the B. A. degree, *ib.*——An improved system of professorships, and a more liberal scale of endowment, are the means by which the public teaching of the University can be made more efficacious, *ib.*

Gostlin, Dr. Scholarships at Caius College founded by, in 1626, *Rep. p.* 187——Scholarships at St. Catharine Hall founded by; annual stipend, *Philpott, Ev. p.* 364. 369.

Government Assistance. Futility of looking to the University for funds for accommodation; apparatus, &c. for rendering the professional system effective; Government aid is required, *Henslow, Ev. p.* 114.

Government Duties. See *Stamp Duties.*

Gower, Humphrey, D.D. Books given by, to the library of St. John's College, *Tatham, Ev. p.* 403.

Graces. Mode of proceeding in passing a general Grace, *Rep. p.* 13——Regulations limiting the introduction of general Graces, *ib.*——Proposition for constituting a new council for the consideration of certain classes of Graces, *p.* 14.

Grafton, Duke of, formerly Vice-Chancellor. Specimens presented by, to the Woodwardian Museum, *Sedgwick, Ev. p.* 118.

Grainthorpe Parsonage (Lincoln). Allowance to fellowships at Magdalene College, on Wray's foundation, payable out of, *Warter, Ev. p.* 405.

Grand Compounders. The statute about grand compounders acts very oppressively; the payment is fair enough, but should be otherwise arranged; the University has not the power to alter such a matter, *J. J. Smith, Ev. p.* 191.

Grantham School. Exhibitions at Sidney College on Lovett's foundation, open to students from, *Phelps, Ev. p.* 431.

Great Assembly. Nature of this ceremonial; oaths administered thereat; recommended to be abolished, *Rep. p.* 6, 7; *Ev. p.* 36.

Greek, Regius Professorship of. History of the foundation of this professorship, stipend, duties, &c., *Rep. p.* 48. 50. 71——This professor gives his lectures in the suite of lecture rooms belonging to Trinity College, *p.* 115——Explanation with regard to the information furnished by professor Scholefield, *Ev. p.* 92.

Green, John, Bishop of Lincoln. Sum of money given by, to the library of St. John's College, *Tatham, Ev. p.* 403.

Green, Professor. Books presented by, to the library attached to the Woodwardian Museum, *Sedgwick, Ev. p.* 117.

Greenhill, Mr., of Stationers' Hall. Allowance made to, as agent to the University library, *Power, Ev. p.* 56.

Gregson, Edward. Fellowships at St. John's College founded by, 19 Hen. 8, *Rep. p.* 162——Scholarship at the same college also founded by, *p.* 190.

Grenville, Hon. and Rev. G. Neville, Master of Magdalene College. Letter from, dated 7 November 1850, in answer to circular of the Commissioners of 30 October, *Corr. p.* 6.

Gressenhall (Norfolk). Living of, purchased by King's College, *Provost and Fellows of King's College, Ev. p.* 354.

Griffith, R. Specimens presented by, to the Woodwardian Museum, *Sedgwick, Ev. p.* 118.

Grindal, Archbishop. Fellowship and scholarships at Pembroke College founded by, in 1583; restricted to natives of Cumberland or Westmoreland, and educated at St. Begh's school, *Rep. p.* 157, 158. 186; *Ainslie, Ev. p.* 318——Present annual value of the scholarships, *Ainslie, Ev. p.* 318; *Master and Fellows of Pembroke College, Ev. p.* 321, 322——The Grindal Fellowship considered a great grievance to the college, *Rep. p.* 157, 158; *Ainslie, Ev. p.* 320.

Scholarship at Magdalene College on Wray's foundation, to be called the Scholarship of Edmond Gryndal (late Archbishop of Canterbury), *Warter, Ev. p.* 406.

Report, 1852—*continued.*

Groom, Rev. Mr. Exhibitions at Magdalene College founded by, in 1760, *Warter, Ev. p.* 407.

Guilden Morden (*Cambridge*). Rent of farm at, received by the master of St. Catharine Hall, *Philpott, Ev. p.* 360.

"*Gunning, on the Ceremonies of the University.*" This work referred as to discommuning, *Ev. p.* 38.

Gunning, Peter, Bishop of Ely. Books given by, to the library of St. John's College, *Tatham, Ev. p.* 403.

Gunson, Rev. W. M., M.A., Fellow and Tutor of Christ's College. (Analysis of his Answers to Queries.)

[*Queries as to Expenses and Tuition:*]

Synoptic view of the lectures given at Christ's College, *Ev. p.* 162——Classification of students adopted, *ib.*——Staff of lecturers provided, *ib.*——Charges made for private tuition, *ib.*——Extent to which private tuition obtains, *ib.*——Many eminent men are private tutors, *ib.*——Candidates for honours have private tuition for a longer period than those for the ordinary degree, *ib.*——The re-enactment of the Grace of 1781 restricting private tuition would be expedient, but not practicable, *p.* 163.

Number of scholarships, &c. at this college; their value, *Ev. p.* 163——Objections to pecuniary aid to students on ground of poverty only, *ib.*——A college for such students exclusively would not work well, *ib.*——Table of the college and University examinations, *ib.*——The college examinations are not too frequent, *ib.*——There is no matriculation examination at this college, *ib.*——Reasons in favour of a general admission examination by the University, *ib.*——Causes which have operated in withdrawing able men from University life, *p.* 164——Remedies proposed, *ib.*

Compulsory attendance at lecture by students for the ordinary degree works well, and might usefully be extended to other students, *Ev. p.* 164——Advantage that would arise from adapting the lectures to the University examinations; manner in which a fund for promoting this object might be raised, *ib.*——The present staff of lecturers at this college is efficient for the requirements of the ordinary examinations, but not for the modern examinations, *ib.*——A reduction in the number of terms is advisable, *ib.*——Suggestions for a re-arrangement of the examinations, *ib.*——Conditions on which students reside at college during the vacation; frequency of reading parties, *ib.*——Manner in which the rules as to lodging-houses are evaded; a residence in college is preferable to lodgings in respect to discipline, *ib.*——The establishment of a Latin professorship, and of a modern language tripos recommended, *p.* 165——Suggestions as to discipline, *ib.*

Gurdon, William. Law books presented by, to the library of Downing College, *Worsley, Ev. p.* 212.

H.

Hacket, John, Bishop of Lichfield. Donation of books made by, to the University library, *Rep. p.* 127; *Power, Ev. p.* 50——Books and MSS. given by, to the library of St. John's College, *Tatham, Ev. p.* 403.

Hailstone, Professor. When Woodwardian Professor of Geology, attempted to form a geological class, but failed, *Sedgwick, Ev. p.* 116——Arrangements made in his retirement from the professorship in 1818, *ib.*——Books and specimens presented by Professor Hailstone to the library, *Ev. p.* 117, 118.

Hale, Dr. Bernard. Scholarships at St. Peter's College founded by, in 1662, *Rep. p.* 185; *Cookson, Ev. p.* 308.

Halford, Rev. Thomas. Contribution of, towards the extension of the library buildings, *Rep. p.* 132; *Power, Ev. p.* 59.

Halifax (*York*). Millner's scholarships at Magdalene College open to students from, *Warter, Ev. p.* 407.

Halitreholme, Mr. Fellowship at St. John's College founded by, *Rep. p.* 162.

Hall Dinner. Regularity in attendance at the dinner in the college hall enforced, *Rep. p.* 146.

Hallam, G. W. Minerals presented by, to the Mineralogical Museum, *Miller, Ev. p.* 133.

Hamilton, Sir William. Passages from Lord Bain's works, collected by, quoted, *Rep. p.* 102.

Report, 1852—*continued.*

Harris, Samuel. Was the first Professor of Modern History; appointed in 1724, *Rep. p.* 61——Copy of appointment of Samuel Harris, *App. p.* 461.

Hart, Sir John. Fellowships at Sidney Sussex College founded by, *Phelps, Ev. p.* 430.

Harvey, Dr. Scholarship at Caius College founded by, in 1627, *Rep. p.* 187.

Harvey, John. Scholarship at Christ's College founded by; present value, *Cartmell, Ev. p.* 380; *Master and Fellows of Christ's College, Ev. p.* 393.

Harwood, Sir Busick. Date of purchase, and cost of Sir B. Harwood's collection in the Anatomical Museum, *Rep. p.* 121——Subjects of the lectures delivered by him, as anatomical professor, *Clark, Ev. p.* 108.

Haviland, the late John, M.D., Regius Professor of Physic. (Analysis of his Answers to Queries.)

[*Queries as to the Professorships:*]

Period of foundation of the Regius Professorship of Physic, *Ev. p.* 80——Duties assigned by the statutes, *ib.*——Duties actually performed, *ib.*——Amount of original endowment, *ib.*——Fees, *ib.*——Present income, *ib.*——Particulars relative to appointment, *ib.*——Establishment of museum, *p.* 81——Resources for practical illustration of the study, *ib.*——No means of modifying the duties of the professorship, *ib.*——General condition of the study of physic, *ib.*——Qualifications requisite for degrees, *ib.*——Changes suggested in the course of study, *p.* 81, 82.

Haviland, Dr. Valuable services rendered by Dr. Haviland to the University in its medical faculty, *Rep. p.* 36——Improvements effected by Dr. Haviland in the course of medical studies and examinations of the University, *Rep. p.* 91, 92; *Fisher, Ev. p.* 127——Letter from Dr. Haviland, dated 11 November 1850, in answer to circular of Commissioners of 30 October, *Corr. p.* 9——Subject of the lectures delivered by Dr. Haviland when professor of anatomy, *Clark, Ev. p.* 108——When Dr. Haviland first appointed Regius Professor of Physic, he was the sole representative of that faculty; he afterwards incorporated with it by means of Graces of the senate, the professors of chemistry, &c., *Fisher, Ev. p.* 128.

Hawford, Dr. Exhibitions at Christ's College founded by, *Cartmell, Ev. p.* 379; *Master and Fellows of Christ's College, Ev. p.* 392.

Hawkins, Dr. Scholarships at St. Peter's College founded by, in 1831, *Cookson, Ev. p.* 308.

Heads of Colleges:

1. *Conditions of Election; Duties and Emoluments of the several Masterships generally.*
2. *Answers to Queries issued by the Commissioners on the same Topics.*

1. *Conditions of Election; Duties and Emoluments of the several Masterships generally:*

The election to the headships of the several colleges variously provided for, *Rep. p.* 152——Practice obtaining in each college stated, *p.* 152, 153——Recommendations in regard hereto, *p.* 153——Details as to the nature and amount of the emoluments of the heads of the several colleges, *p.* 153–156——Recommendations of the Commissioners in regard hereto, *p.* 156.

2. *Answers to Queries issued by the Commissioners on the same Topics:*

Answers received by the Commissioners to their circular of the 30th October 1850, from the following heads of colleges, viz.: Dr. Cookson, master of St. Peter's College, *Corr. p.* 3——The master of Clare Hall (Dr. Philpott), *ib.*——Dr. Ainslie, master of Pembroke College, *p.* 3, 4——Dr. Chapman, master of Gonville and Caius College, *p.* 4——Rev. J. Pulling, master of Corpus Christi College, *ib.*——Dr. Okes, provost of King's College, *p.* 4, 5——Dr. King, president of Queen's College, *p.* 5——Dr. Philpott, master of St. Catharine's Hall, *p.* 5, 6——Dr. Cartmell, master of Christ's College, *p.* 6——Dr. Tatham, master of St. John's College, *ib.*——Hon. and Rev. G. Neville Grenville, master of Magdalene College, *ib.*——Dr. Whewell, master of Trinity College, *p.* 6, 7——Dr. Phelps, master of Sidney Sussex College, *p.* 7——Dr. Archdall, master of Emmanuel College, *ib.*——Rev. T. Worsley, master of Downing College, *ib.*

Queries circulated by the Commissioners relative to the mode of election, conditions of eligibility and tenure, powers, stipends, and duties, &c. of the heads of the several colleges and halls, *Ev. p.* 302——Answers to the foregoing from the following, viz.: St. Peter's College, *Cookson, Ev. p.* 306——Pembroke College, *Ainslie, Ev. p.* 316–318——Gonville and Caius College, *Chapman, Ev. p.* 324, 325——Trinity Hall, *Geldart, Ev. p.* 330, 331——Corpus Christi College, *Pulling, Ev. p.* 344——King's College, *Okes, Ev. p.* 347, 348——

Report, 1852—*continued.*

Heads of Colleges—continued.

2. *Answers to Queries issued by the Commissioners on the same Topics*—continued.

p. 347, 348——Queen's College, *Dalton, Ev. p.* 354, 355——St. Catharine Hall, *Philpott, Ev. p.* 360, 361——Christ's College, *Cartmell, Ev. p.* 370-372——St. John's College, *Tatham, Ev. p.* 396——Magdalene College, *Warter, Ev. p.* 403, 404——Trinity College, *Whewell, Ev. p.* 414——Emmanuel College, *Archdall, Ev. p.* 425——Sidney Sussex College, *Phelps, Ev. p.* 428, 429——Downing College, *Worsley, Ev. p.* 436.

Queries circulated by the Commissioners, respecting the yearly sum received by the head of each college or hall, *Ev. p.* 303——Answers thereto from the following, viz.: St. Peter's College, *p.* 313——Pembroke College, *p.* 321, 322——Trinity Hall, *p.* 342——King's College, *p.* 351-353——Queen's College, *p.* 357——Christ's College, *p.* 391——St. John's College, *p.* 400——Trinity College, *p.* 422——Emmanuel College, *p.* 427——Downing College, *p.* 445.

Heat, Light, and Magnetism, &c. The inclination sometimes evinced to exclude electricity and the cognate theories of heat, light, and magnetism from the mathematical course for the B. A. degree, could not be acceded to with advantage to the student, *Ellis, Ev. p.* 225——The hasty introduction of the new subjects, such as those of heat, electricity, &c., into the course of reading, is not to be recommended; if admitted at all, they should be made subjects of special prizes subsequent to the B. A. degree, *Steventon, Ev. p.* 266.

Heath, Sir Robert. Books given by, to the library of St. John's College, *Tatham, Ev. p.* 402.

Hebblethwaite, Henry. Scholarships and fellowship at St. John's College founded by; terms of the deed of settlement, *Rep. p.* 163, 164. 194.

Hebrew. Voluntary examination in Hebrew for those who have passed the voluntary theological, *Blunt, Ev. p.* 88——Condition of this branch of study in the University; circumstances rendering its pursuit necessarily imperfect, *Mill, Ev. p.* 90, 91——Study of Rabbinical literature; means of its pursuit in Cambridge, *p.* 91——Necessity for the study of the cognate Semitic languages, *ib.*——The promotion of the study of Arabic urged, *p.* 91, 92.——*See* also *Tyrwhitt Hebrew Scholarships.*

Hebrew, Regius Professorship of. History of the foundation of this professorship; stipend, duties, &c., *Rep. p.* 48. 50 *et seq.*, 71——Date of foundation of this professorship, *Mill, Ev. p.* 90——Duties of the professorship, as defined by the statutes; duties actually performed, *ib.*——Salary attached to the professorship; augmentation thereof in the present reign; annual value, *ib.*——Mode of election to the office; conditions of eligibility and tenure, *ib.*——The professor occupies rooms in Trinity College by virtue of his office, *ib.*——There is no library or museum attached to the professorship, *ib.*

Henry, III., King. The earliest Royal letters patent now traced as authentic are of this reign, *Rep. p.* 2.

Henry, VI., King. Particulars as to the foundation of King's College and Eton College by this monarch, *Rep. p.* 173 *et seq.*

Henry VIII. Injunctions issued in this reign, *Rep. p.* 2——The five Regius Professorships founded by Henry VIII. in 1540; details as to their endowment, &c., *Rep. p.* 48; *Jeremie, Ev. p.* 76; *Maine, Ev. p.* 77; *Haviland, Ev. p.* 80; *Mill, Ev. p.* 90.

Henslow, Rev. J. S., M.A., Professor of Botany. (Analysis of his Answers to Queries.)

[1. *Queries as to Professorships:*]

Particulars of foundation of the professorship of Botany, *Ev. p.* 113——Duties originally assigned, *ib.*——Amount of endowment, *ib.*——Duties now performed, *ib.*——Present annual income from stipend and fees, *ib.*——By whom appointment is made, and duration of same, *ib.*——Particulars relative to residence, museum, &c., *p.* 113. 115——Opportunities for practical and illustrative instruction afforded to students, *p.* 113, 114——New arrangements that will be necessary on any future appointment to this chair, *p.* 114——Condition of the study, *ib.*

[2. *Queries as to Lecture Rooms:*]

Capacity of the lecture-rooom attached to the professorship of Botany, *Ev. p.* 114——Futility of looking to the University for funds for apparatus, &c., for rendering the professional system effective; Government aid is required, *ib.*——Fees charged to students attending the lectures; suggestions in regard thereto, *ib.*——How far new professorships are required to complete the cycle of study, *p.* 115——Expediency of providing professors with residences, *ib.*

Report, 1852—*continued.*

Henslow, Professor. Remarks as to the nature of his duties as professor of botany, and recommendations in regard thereto, *Rep. p.* 62, 63——Election of Mr. Henslow, in 1822, to the professorship of mineralogy; dispute raised as to the legality of the appointment; result, *p.* 66, 67——Letter from Professor Henslow, dated 7 November 1850, in answer to circular of the Commissioners of 30 October, *Corr. p.* 12——Specimens presented by Professor Henslow to the Woodwardian Museum, *Sedgwick, Ev. p.* 118.

Hereford School. Scholarships at St. John's College on the Duchess of Somerset's foundation, open to students from, *Rep. p.* 194.

Herefordshire. Scholarships at St. John's College, open to natives of, *Rep. p.* 194.

Hertfordshire. Scholarship at Clare Hall, on Cherry's foundation, appropriated to a native of, *Rep. p.* 185——Scholarships at Caius College on the foundation of Dr. Caius, *p.* 186——Scholarships at Christ's College, on Ward's foundation, *Cartmell, Ev. p.* 380; *Master and Fellows of Christ's College, Ev. p.* 393.

Hervey, Dr. Scholarships at Trinity Hall founded by, in 1562; value thereof, *Rep. p.* 187; *Geldart, Ev. p.* 333.

Heversham (Westmoreland). Scholarships at Magdalene College on Millner's foundation open to students from, *Warter, Ev. p.* 407.

Hewett, Peter. Scholarships at Caius College founded by, in 1570. *Rep. p.* 187.

Hewke, Walter. Fellowship at Trinity Hall founded by, in 1518, *Rep. p.* 182; *Geldart, Ev. p.* 332.

High Steward. High character of this office, *Rep. p.* 9——Privilege appertaining to it, *ib.*——Court leet held by the steward or his deputy, *ib.*——Mode of appointment of the high steward; objections to which open *p.* 10——Also of the deputy high steward, *ib.*

Highlord, Mr. Sizarships at St. John's College founded by, *Tatham, Ev. p.* 400.

Hildyard, Rev. James, M.A., late Fellow and Tutor of Christ's College. (Analysis of his Answers to Queries.)

[*Queries as to Expenses and Tuition:*]

Amount of necessary expenses of a student; it would be difficult to diminish them materially; charges for private tuition are excessive *Ev. p.* 165——Limited check on the supply of goods by trademen to students, *ib.*——Legislative interference suggested, *ib.*——The inequalities of attainment in freshmen are impediments to a uniform success resulting from lectures; a general admission examination would partially remedy this *ib.*——Inadequacy of the staff of lecturers at Christ's College, *ib.*

The duties of the college tutors are needlessly superseded by, *Ev. p.* 165.——Charges for private tuition; belief that no real advantage results from private tuition, *ib.*——Private Tuition is now a permanent and professional occupation, *ib.*——Practice of cramming, *ib.*——Private tuition might be superseded by an increase of professors, *p.* 165, 166——Number of sizarships at Christ's College; qualifications required in those appointed to them; any institution for poor students only is not to be recommended, *p.* 166——The examinations are not too numerous; the professional lectures ought to be adapted to them, *ib.*——An examination was established at Christ's College by witness; a general admission examination by the University is to be recommended; scheme for conduct thereof, *ib.*

There exist reasonable encouragements for able students to seek professorships in the University; necessity for the establishment of a Latin professorship, *Ev. p.* 166——Suggestion for a reduction in the number of terms, and an appropriation of the payments made by the students on account of them, *ib.*——Remarks upon the present system of payment for tuition, *ib.*——Plan for re-arrangement of the academical year, *ib.*——Objections to residence in vacation; beneficial effects of reading parties; they might be made less expensive, *ib.*——Students are not exposed to greater temptation in lodgings than in college, *ib.*——The present state of the University is a sound one; the statutes of some colleges, however, might, with advantage, be slightly altered, *p.* 167.

Hind, Rev. John, M.A., late Fellow of Sidney Sussex College. (Analysis of his Answers to Queries.)

[*Queries as to Mathematical Studies and Examinations:*]

Improved condition of the mathematical examination, *Ev. p.* 238——Effect of the changes made, *ib.*——Efforts have been made in late years to raise the mathematical requirements for the ordinary degree, *ib.*——The failures of candidates for honours and the ordinary degree have increased, *ib.*——It is scarcely possible to improve on the present plan of examination, *ib.*——Beneficial working of the syndicate of studies, *ib.*——Subjects struck out of the examinations by the syndicate; it is not advisable further to curtail the subjects for examination of the best candidates, *ib.*——But some

of

Report, 1852—*continued.*

Hind, Rev. John, M. A., late Fellow of Sidney Sussex College. (Analysis, &c.)—continued.

of the higher parts of mathematical science might be advantageously deferred till a later period, *Ev. p.* 238——Few foreign books are in use at the University, their substance being incorporated in English works; MSS. are extensively used, though not so much so as formerly, *p.* 238, 239.

The tendency of the examination to become more analytical, though on the increase at one time, has received a salutary check, *Ev. p.* 239——The problems, though not too numerous, are, perhaps, a little too difficult, *ib.*——The assistance of a private tutor is generally thought indispensable; particulars as to private tutors; the sanction of the syndicate of studies and of the tutors of colleges would be beneficial to the system of private tuition, *ib.*——Limited encouragement offered for the prosecution of mathematical study after the B.A. degree; means by which this might be remedied, *ib.*——The proficiency in mathematical science required for the ordinary degree is too small, *ib.*

Hinman, Rev. J. Scholarship at Clare Hall founded by, *Rep. p.* 186.

History. See *Ancient History. Modern History.*

Hitchin, Vicarage of. Augmented by Trinity College from the Pigott fund, *Master and Fellows of Trinity College, Ev. p.* 424.

Hoare, Rev. Arthur M., M. A., Fellow of St. John's College. (Analysis of his Answers to Queries.)

[*Queries as to Expenses and Tuition:*]

Manner in which students are classified at St. John's College, *Ev. p.* 167——The staff of lecturers is not sufficient to prepare students for the University examinations, *p.* 167, 168——Objections to imposing any restriction on private tuition, *p.* 167——Necessity of adapting the college lectures to the University examinations, *ib.*——Objections to the establishment of a hall or college for poor students only, *ib.*——The University or college examinations are not too severe or frequent, *ib.*——There is no examination before admission to this college, *p.* 168——Expediency of a general matriculation examination by the University, *ib.*

There is no difficulty experienced in filling the college and University offices, *Ev. p.* 168——The increase in the number and emoluments of large schools has taken many men from University life, *ib.*—— Impolicy of making the college tutorships more permanent than at present, *ib.*——Remarks respecting the terms, *ib.*——The subjects of the ordinary B. A. examination should not be increased, *ib.*——Prejudicial influence of lodgings on students, *ib.*——Suggestion for the establishment of a systematic scheme of theological training, *ib.*

Hobart, ——. Donation by, to the University library, *Power, Ev. p.* 50.

Hobbs Mr. Scholarships at St. Catharine Hall founded by; annual value, *Phillpott, Ev. p.* 365.

Hobbs, Thomas. See *Livesey, Amy, &c.*

Holderness (York). Scholarships at St. John's College on Ducket's foundation limited to natives of the vicinity of, *Rep. p.* 190.

Holdsworth, Richard, D.D. Sum of money given by, to the library of St. John's College, *Tatham, Ev. p.* 403.

Holidays. See *Vacations.*

Holmes, John. Exhibition at Pembroke College founded by, in 1568; amount of the allowance, *Ainslie, Ev. p.* 319.

Holmes, William. Scholarhips at Magdalene College forwarded by, in 1656; annual value, *Warter, Ev. p.* 407.

Holt, Jeremiah. MSS. bequeathed by, to the library of St. John's College, *Tatham, Ev. p.* 403.

Holt School (Norfolk). Exhibitions at Christ's College on Dame Drury's foundation, with preference to students from, *Cartmell, Ev. p.* 378; *Master and Fellows of Christ's College, Ev. p.* 392.

Holton Hall (Suffolk). Estate called, purchased by Corpus Christi College out of the proceeds of Bishop Mawson's bequest, *Rep. p.* 188.

Holway, Moses. Fellowship and scholarships at St. Catharine's Hall founded by; annual value, *Rep. p.* 188; *Philpott, Ev. p.* 362. 366——Failure of candidates for the Holway scholarships, *Philpott, Ev. p.* 369.

Report, 1852—*continued.*

Holy Communion. Administration thereof at the college chapels; participation is entirely voluntary, *Rep. p.* 145, 146.——*See* also *Communion.*

Holy Orders. Effect of the condition of taking Holy Orders and remaining celibate upon the prolonged residence of distinguished men in the University, *Rep. p.* 82 *et seq.*—— Disposition existing to view the University as a theological institution; the interests of both the University and the Established Church are best consulted by a mixture of theological with other studies, *p.* 94——Objections to the practical working of the condition imposed by the statutes of colleges upon fellows of entering into Holy Orders; extent to which a relaxation of the rule should be permitted, *p.* 171——Requirements of the statutes of King's College as to the fellows taking Holy Orders; how far observed, *p.* 174, 175——Requirements of the statutes of Trinity Hall as to certain of the fellows taking Holy Orders, *p.* 181, 182.——*See* also *Celibacy.*

Honorary Degrees. Anomalies existing in the case of these degrees, *Rep. p.* 29——Amount of stamp duty paid to Government on these degrees, *Romilly, Ev. p.* 63—— Table showing the number of honorary degrees granted in certain years, 1800 to 1850, *p.* 67 *et seq.*

Honours:

1. *Proportion of Students taking Honours.*
2. *Preparation requisite.*
3. *Examination for Honours.*

1. *Proportion of Students taking Honours:*

Proportion of candidates for the B. A. degree taking mathematical honours, *Goodwin, Ev. p.* 236; *Mould, Ev. p.* 251; *Stokes, Ev. p.* 267 *d*——Number of students at Sidney Sussex College, who have taken honours and degrees in the last ten years, *Phelps, Ev. p.* 256——Statement respecting rejected candidates for honours, *Gaskin, Ev. p.* 227—— The failures of candidates for honours, and the ordinary degree, have increased, *Hind, Ev. p.* 238.

2. *Preparation requisite:*

System of preparation adopted by candidates for honours, *Gaskin, Ev. p.* 229——In these cases private tutors are rarely dispensed with, *ib.*——Amount of knowledge requisite for obtaining mathematical honours, *Mould, Ev. p.* 250, 251——No disposition has existed of late years to raise the standard of qualification for mathematical honours; the standard for the common degree was raised in 1837 and 1846, *Philpott, Ev. p.* 261—— Efficacy of the existing regulations in securing the attention of candidates for honours to the elementary subjects and principles of mathematics; the course of reading pursued by the advanced students might be restricted with advantage, *p.* 263——Mode in which candidates for mathematical honours proceed in preparing themselves for the examination, *Stokes, Ev. p.* 267 *d.*

3. *Examination for Honours:*

Subjects of examination for candidates for honours, how conducted, *Rep. p.* 21. 23—— The requirements for honours are now more definite, but not higher; reasons of this, *Goodwin, Ev. p.* 236——Beneficial character of the influence exercised by the Board of Mathematical Studies over the examinations, and the course of reading for honours, *Philpott, Ev. p.* 262——Course of mathematics required for an ordinary degree; circumstances determining the place of a candidate for mathematical honours on the tripos, *Stokes, Ev. p.* 267 *a*——Previous to 1848 there was a slight tendency to lower the qualification for a place in the mathematical tripos; regulations made herein in 1848, and subsequently; effects of these regulations, *ib.*——Objection to the change which threw open the honours of the classical tripos to persons who had not obtained a mathematical honour, *Whewell, Ev. p.* 274.

Manner in which the mathematical examinations are conducted; period over which the examination for honours extend, *Goodwin, Ev. p.* 236——Beneficial tendency of the changes effected in 1848 in the examinations for mathematical honours, *Mathison, Ev. p.* 249.——The examination papers for honours are too long for the time allowed for answering them; extension of time suggested, *Peill, Ev. p.* 254——The examination for mathematical honours is not more searching, but more extensively than formerly, *Phelps, Ev. p.* 256——Importance of the recent change limiting the three first days' examination to the elementary parts of the course, *ib.*——Changes made at different periods in the time of the commencement of the examination of candidates for mathematical honours; and also in the interval between such commencement and the final publication of the list of honours, *Philpott, Ev. p.* 258, 259——Like changes in the time allowed to candidates for answering questions, and in that allowed for answering the propositions from books and from problems, *p.* 259——General character of the alterations made of late years in the examination for mathematical honours, *Stokes, Ev. p.* 267 *a.*

Method adopted by the examiners to test the relative merits of the candidates for mathematical honours; alteration suggested in this plan, *Gaskin, Ev. p.* 230——System of classification of candidates for mathematical honours formerly adopted; subsequent alterations

Report, 1852—*continued.*

HONOURS—continued.

2. *Examination for Honours*—continued.

alterations as to same, *Hopkins, Ev. p.* 240——Successful candidates for mathematical honours are placed on the tripos list in the order of merit, *ib.*——Classification of candidates for honours practised formerly, such classification being determined by the exercises in the schools; alterations made herein prior to 1838, when the practice was discontinued, *Philpott, Ev. p.* 259——Grave objections to which the present plan of classification, after examination, of candidates for honours is open; suggestions for its improvement, *Steventon, Ev. p.* 266, 267——Average number of candidates for mathematical honours; duration of the examination; exposition of the system of "marks" by which the relative proficiency of candidates is arrived at, *Stokes, Ev. p.* 267 *a.*

HOPKINS, WILLIAM, M.A., PRESIDENT OF THE GEOLOGICAL SOCIETY.—(Analysis of his Answers to Queries.)

[*Queries as to Mathematical Studies and Examinations:*]

Changes made in 1827 and at subsequent periods in the duration of the examinations; object of these changes and improvement resulting from them, *Ev. p.* 239——By the Grace of 1827, the examinations were uniformly required to be conducted by written questions, instead of, as formerly, in part *vivâ voce*; this has been a great improvement, *p.* 239, 240——System of classification of candidates for mathematical honours formerly adopted, and subsequent alterations as to same, *p.* 240——Extension of time of duration of examinations made in 1848; working of this modification, *ib.*——The University legislation of the last twenty-four years has had a most beneficial tendency, *ib.*

Circumstances determining the appointment of moderators and examiners, *Ev. p.* 240——Successful candidates for mathematical honours are placed on the tripos list in the order of merit, *ib.*——The mathematical examinations are more stringent than formerly; reasons for this, *ib.*——Extensions of the subjects of examination, made at different periods; causes which have prevented these extensions from imposing much additional labour on the students, *p.* 241——Object of the examinations; their efficiency, *ib.*——A reduction, however, in the number of questions would be an improvement, *ib.*

Whether the examinations answer the intentions with which they have been instituted must always be a matter of opinion, *Ev. p.* 241, 242——Definite character of the examinations; advantages of this feature; the present system, nevertheless, defective, inasmuch as although it determines accurately the elements of the candidate's knowledge, it does not require the combination of these elements, which must constitute the highest test of the student's powers, *p.* 242——A *vivâ-voce* examination, combined with that by printed questions, would remedy this defect, *ib.*——The deficiency was formerly obviated by the exercises in the schools; manner in which it happened that these were discontinued, *ib.*

Inclination in students to direct their energies to the objects most likely to influence their places in the tripos, rather than the higher purposes of the study, *Ev. p.* 242——Influence which a *vivâ-voce* examination would have in discouraging this tendency, *p.* 242, 243——Favourable influence of the present system of mathematical examinations on the mental development of students; but it is desirable that a higher and more diffuse tone should be given to their acquirements, *p.* 243——Beneficial nature of the superintendence exercised by the syndicate of studies over the mathematical course, *ib.*——Extent to which the reading on certain subjects is limited, *ib.*——It is not advisable to restrict the studies in such manner as to bring them "within the grasp of the present public and recognized teaching of the University," *ib.*

Mathematical works used in the University; MSS. are in universal use; description of them, *Ev. p.* 244——Abuse to which the use of MSS. is subject, *ib.*——There is no tendency in the present course of mathematical study to become exclusively analytical and symbolic, *ib.*——The present system, both of reading and examining, has a tendency to fix the mind too much on the mere use of mathematical symbols; written questions and answers on the examinations will always tend to this end, *ib.*——The problems bear too large a proportion to the questions from books and simple examples; character of the problems; their number is greater than the time allowed admits of solution; reasons why this is not to be objected to; a substitution of easier for the more difficult problems is desirable, *p.* 244, 245.

State of preparation attained to, by students entering the University, *Ev. p.* 245——Period during which students are generally accustomed to have private tutors, *ib.*——Attendance at college lectures required of students, *ib.*——Manner in which the vacations are generally passed, *ib.*——Class of gentlmen, who constitute the class of private tutors, *ib.*——Desirable that the private tutors should in some way be recognised as authorised teachers; suggestions for effecting this result, *ib.*——Influences opposed to any modification of the present collegiate system; difficulties to be contemplated in carrying out the foregoing suggestions, *p.* 245,246——Lectures to be efficacious should have a catechetical character, and this can only be had by lecturing to small classes, *p.* 246——Effect that the adoption of such measures as suggested, would

Hopkins, William, M. A., President of the Geological Society. (Analysis, &c.)—continued.

[*Queries as to Mathematical Studies and Examinations*]—continued.

have on the expenses of private tuition, *Ev. p.* 247——Causes why no such system of academic lecture, as suggested has ever been attempted by the mathematical professors, *ib.*

Absence of inducements to the study of mathematics after the B. A. degree, *Ev. p.* 247——It is not advisable to defer the examination for the Smith's prize, in order to furnish such an inducement, nor to establish any prizes to be gained by examination; but prizes for essays would accomplish the desired result, *ib.*——Recapitulation of witness's suggestions, together with further remarks on the present collegiate system and the expediency or otherwise of an immediate adoption of any new plan, *p.* 248——General character of the higher class of students; equitable system on which the honours and emoluments of the University are awarded, *ib.*——The test of merit recognised by the University and colleges in the disposal of emoluments is of a strictly intellectual nature; experience proves that this test secures a high tone of morality, *p,* 248, 249.

Hopkins, Mr. Specimens presented by, to the Woodwardian Museum, *Sedgwick, Ev. p.* 118.

Hore, Margery. See *Atkin, Thomas, &c.*

Hospital Practice. Certificates of attendance on, required of candidates for the degree of Bachelor of Physic, *Rep. p.* 35——Also, for the degree of Doctor of Physic, *p.* 36.

See also *Addenbrooke's Hospital*

Hostels. In the early state of the University, students lodged in hostels; they fell into disuse as the colleges increased, *Rep. p.* 2——Proposition for establishing hostels in connexion with colleges, for the reception of students, as a substitute for the present lodging-houses, *p.* 19——Nature and origin of hostels; were gradually displaced by the colleges, *p.* 143——Advantages of reviving the ancient system of hostelries; their peculiar features sketched, *Blakesley, Ev. p.* 151, 152——Hospices or hostels for poor students grafted on the old foundations, and under the control of the lecturers, suggested, *Swainson, Ev. p.* 196.——*See* also *Pensioners. Poor Students,* 1.

Houldsworth, Dr. Books left to Emmanuel College library by, *Archdall, Ev. p.* 428.

Howlett, Samuel. Books given by, to the library of St. John's College, *Tatham, Ev. p.* 403.

Hughes, Rev. David. Sum of money left to Queen's College by, in 1779, to be applied to certain Divinity prizes, and for the augmentation of livings; sum expended since 1800 in the latter, *Dalton, Ev. p.* 357——Bequest by, to Queen's College library, *p.* 358.

Hughes, Rev. Mr. (Chancellor of Bangor). Scholarships at Magdalene College founded by, in 1543, *Warter, Ev. p.* 406.

Hughes, Rev. H. H., M. A., late Tutor of St John's College. (Analysis of his Answers to Queries.)

[*Queries as to Expenses and Tuition:*]

The necessary expenses of a residence in college cannot be materially diminished, *Ev. p.* 169——They are not increased by privileges conceded to tradespeople, *ib.*——Nature of check upon credit given at Cambridge; there is none on that given by tradesmen in London, *ib.*——It would be inexpedient to prohibit the services of private tutors, *ib.*——Reasons opposed to any institution exclusively for poor students, *ib.*——Advantages of a general matriculation examination by the University, *ib.*——There is no difficulty in large colleges in selecting competent men as tutors, &c; but there may be so in the small colleges, *ib.*——Suggestion for increasing the staff of tutors, &c., *ib.*——Scheme for a re-arrangement of the terms, *ib.*——The expenses of a University education might be diminished by the substitution of nine for ten terms, and by superseding the necessity for private tuition, *ib.*

Hull School. Scholarship at Clare Hall appropriated to a scholar from, *Rep. p.* 185.

Hulsean Christian Preacher and Christian Advocate. Particulars as to the Rev. John Hulse's foundations for a Christian Preacher and Christian Advocate, *Rep. p.* 69——Amount of stipends, and from what source derived, *ib.*——Period for which, and by whom elected, *ib.*——Decree in Chancery of 1830, *ib.*——Remarks in regard to these foundations, *ib.*——Suggestion for applying the income of these two offices to the establishment of one of the new chairs of theology, *p.* 87.

Hulsean Prize. Particulars as to this prize, *Rep. p.* 32; *Ainslie, Ev. p.* 27.

Report, 1852—*continued.*

Humphrey, Rev. W. G., M. A., Fellow of Trinity College. (Analysis of his Answers to Queries.)

[*Queries as to Classical Studies and Examinations:*]

An assimilation of the constitution of the boards of examiners of the several University scholarships to that of the Pitt scholarship, would be a beneficial arrangement, *Ev. p.* 286——The revival of *vivâ-voce* examination in certain cases, would supply a deficiency at present much felt. *ib.*

Hume, Sir Abraham. His mineralogical collection presented to the University, by Viscount Alford, *Rep. p.* 123.

Hunsdon, John Carey, Lord. Sum of money given by, to the library of St. John's College, *Tatham, Ev. p.* 402.

Huntingdon Grammar School. Scholarship at St. Peter's College on Mr. Miller's foundation appropriated to, *Rep. p.* 185; *Cookson, Ev. p.* 308.

Huntingdon, Town of. Scholarship at Christ's College on Broadbanke's foundation restricted to a native of, *Cartmell, Ev. p.* 379; *Master and Fellows of Christ's College, Ev. p.* 393.

Hutton, Timothy. Bequest given by to the library of St. John's College, *Tatham, Ev. p.* 403.

Hemsworth [*Hymsworth*] *Parish* (*York*). Scholarship at St. John's College, on Thurleston's foundation, open to natives of, *Rep. p.* 193, 194.

I.

Income and Expenditure:

1. *Of the University.*
2. *Of the Colleges.*

1. *Of the University:*

Annual income of the University, available for general purposes, passing through the hands of the Vice-chancellor, *Rep. p.* 138——Annual expenditure, for general purposes, charged against this income, *ib.*——Income appropriated to specific objects, *ib.*——Amount passing through the hands of other officers, *ib.*——Income arising from the funded property of the University, *ib.*——Amount derived from fees on matriculations and degrees, *p.* 138, 139——Augmentation of these fees at different periods; particulars generally with reference to them, *p.* 139, 140——Recommendation that the taxes paid to Government be remitted, *p.* 140——Particulars of, and recommendations as to, the Parliamentary grant in aid of the stipends of certain professors, *p.* 140, 141——Grants of money formerly made by the University for public purposes, not of an academic character, *p.* 141——Publication of the accounts annually; audit thereof, in compliance with a Grace of 1851, *ib.*——Provision of the Elizabethan statutes for the custody of University money; present actual practice, *ib.*——Stipend of the Vice-chancellor; onerous nature of his duties in relation to the University finances; recommendation, *p.* 141, 142——Means for securing an effective audit of the accounts considered, *p.* 142——Remarks on the power exercised by the University of taxing its members, *ib.*——Expediency of legalizing this power, *ib.*

Queries circulated by the Commissioners, relating to the income and expenditure of the University, and audit of accounts, *Ev. p.* 14——Answers to the foregoing from the Vice-chancellor (Okes), *p.* 15–17.

2. *Of the Colleges:*

Statements of income and expenditure have been received from twelve out of the seventeen colleges, *Rep. p.* 196——The five from which no information has been received are Clare Hall, Gonville and Caius, Corpus Christi, St. Catharine's Hall, and Jesus, *ib.*——Gross incomes of the twelve colleges, *p.* 196, 197——Great improvement effected of late years in the college estates, especially in the abolition of beneficial leases, *p.* 197–199——Curious provision in Dr. Caius' statutes for Gonville and Caius College, respecting fines for leases, *p.* 198.

Queries circulated by the Commissioners respecting the gross and net income of the several colleges and halls, specifying particulars; also the manner in which the net income is distributed, and to whom, specifying the sums received by masters, fellows, and scholars, &c., with other particulars in regard thereto, *Ev. p.* 303, 304——Answers thereto from the following colleges, viz.: St. Peter's College, *Ev. p.* 312–315——Pembroke College, *p.* 320–323——Trinity Hall, *p.* 339–343——King's College, *p.* 349–354——

Report, 1852—*continued.*

Income and Expenditure—continued.

2. *Of the Colleges*—continued.

Queen's College, *Ev. p.* 357——Christ's College, *p.* 389-396——St. John's College, *p.* 398-401——Trinity College, *p.* 419. 424——Emmanuel College, *p.* 426-428——Sidney Sussex College, *p.* 434, 435——Downing College, *p.* 439-445.

See also *Accounts of the University.* *Vice-Chancellor of the University*, 3.

Income Tax. Objections to the levying of income-tax on the annual contributions to the University library fund, *Power, Ev. p.* 53; *Babington, Ev. p.* 452.

International Law. Suggestion for a professorship of international law, *Whewell, Ev. p.* 102.

Ipswich School. Scholarships at Pembroke College, on Smart's and Scrivener's foundation, appropriated to; value thereof, *Rep. p.* 186——Application made by the managers of the school to the college, for the consolidation of the scholarships; the proposal not entertained, *ib.*——Particulars as to the scholarships on Smart's foundation restricted; amount of the allowance, *Ainslie, Ev. p.* 318——Scholars rarely come from Ipswich to this college, *p.* 320——Expediency of consolidating these scholarships considered, *ib.*——Present emoluments attached to these scholarships, *Master and Fellows of Pembroke College, Ev. p.* 322.

Scholarship at Trinity Hall, on Moptyd's foundation, restricted to students from, *Geldart, Ev. p.* 333.

Ireland, Joshua. Bequest by, to the library of St. John's College, *Tatham, Ev. p.* 403.

Ives' Select Papers. This work referred to, *Rep. p.* 186.

J.

Jackson, Rev. Richard. Founded the Jacksonian Professorship of Natural and Experimental Philosophy and Chemistry, *Rep. p.* 65.

Jacksonian Professorship of Natural and Experimental Philosophy and Chemistry. Date of foundation of this professorship, *Rep. p.* 65——Amount and sources of endowment, *p.* 65. 72——Qualifications required of the professor, *p.* 65——Character of the lectures given by the present and former professors, *ib.*

James I., King. Letter sent by, to the Vice-chancellor in 1613, respecting subscription to the three articles in the Thirty-sixth Canon, *Rep. p.* 40——Grace accordingly passed by the senate in compliance therewith, *p.* 41——Further instructions on this subject subsequently given by his Majesty; obedience paid thereto by the University, *ib.*——Petition of James Tabor, register of the University, to the King, with answer thereto, dated 27 February 1623, *ib.*——Decree thereupon passed, *p.* 42——Augmentation of the endowment of the Lady Margaret's Reader in Divinity by James I., *Rep. p.* 46; *Blunt, Ev. p.* 87——Augmentation of the Regius Professorship of Divinity by James I., *Rep. p.* 49; *Jeremie, Ev. p.* 76.

James, Thomas. Scholarship at Pembroke College founded by, in 1632; amount of the allowance, *Rep. p.* 186; *Ainslie, Ev. p.* 318; *Master and Fellows of Pembroke College, Ev. p.* 322.

Jarrett, Professor (*Sir Thomas Adams, Professor of Arabic*). No replies have been received to the queries addressed by the Commissioners to this professor, *Rep. p.* 56.

Jenens, Rev. Thomas. Exhibitions at Christ's College founded by; present proceeds, *Cartmell, Ev. p.* 378; *Master and Fellows of Christ's College, Ev. p.* 392.

Jenkinson, Rev. G. Specimens presented by, to the Woodwardian Museum, *Sedgwick, Ev. p.* 118.

Jeremie, Rev. J. A., D.D., Regius Professor of Divinity. (Analysis of his Answers to Queries.)

[1. *Queries as to Professorships:*]

Period of foundation of the Regius Professorship of Divinity, *Ev. p.* 76——Duties annexed by statute, *ib.*——Duties actually performed, *ib.*——Amount of original endowment, *ib.*——Present annual value, *ib.*——General condition of the study, *ib.*——Exercises required for degrees in divinity, *ib.*

[2. *Queries as to Lecture Rooms:*]

No lecture rooms attached to this professorship, *Ev. p.* 76——Rooms to which access is afforded, are insufficient in size, *p.* 77——Importance of regular attendance at the Divinity Lectures, *ib.*——Subject of the lectures, *ib.*——No fees charged for attendance thereat, *ib.*——No house attached to the professorship, but rooms in Trinity College, *ib.*

Report, 1852—*continued.*

Jeremie, Rev. J. A., D. D., Regius Professor of Divinity. (Analysis, &c.)—*continued.*

[3. *Queries as to Classical Studies and Examinations:*]

A limitation of the passages proposed for examination in the classical tripos, is to be desired; it might be effected by a Board to be formed for the superintendence of classical studies, *Ev. p.* 286——Principle on which the limitation should be made, *ib.*——The range of reading for the University scholarships might be considerably enlarged, the examiners in these instances should remain unfettered in their discretion, *ib.*——Both the classical and mathematical tripos should be open to all members of the University, *ib.*

Jeremie, Dr. Letter from, dated 13 November 1850, in answer to circular of the Commissioners of 30 October, *Corr. p.* 9.

Jermin, Frances. Scholarship at St. John's College founded by, 23 Eliz., *Rep. p.* 189.

JESUS COLLEGE:

Stipends paid by Jesus College to the Barnaby lecturers, *Rep. p.* 48, 73——No information has been received respecting the library of this college, *p.* 135——Modifications of the original code of statutes of this college recently obtained, *p.* 150——The election of master is absolutely in the Bishop of Ely, *p.* 153——No information as to the emoluments of the mastership, *p.* 156——Number of foundation and bye-fellowships in this college, *p.* 157——No information furnished by this society as to the value of its foundation fellowships, *p.* 167.

Fellowship at this college, the election to which is vested in the Bishop of Ely; recommendation in regard hereto, *Rep. p.* 169——Academical standing required of candidates for fellowships, *ib.*——Number of scholarships at this college; proportion thereof restricted, *p.* 189——No sizars or sub-sizars are admitted, *p.* 195.

Number of students entered at Jesus College in each year ending 10 October 1844 to 1848, *Rep. p.* 145——Summary of the number of members of the college in 1851, *ib.*——Number of residents on 14 November 1851, *ib.*——Table showing the number of matriculations at this college in the years 1800, 1810, 1820, and 1830, and in each of the ten years 1840 to 1850, *Romilly, Ev. p.* 66——Similar table of the number of degrees of the several grades granted in the same periods, *p.* 67–70——Total number of degrees granted in the last eight years, *p.* 70.

JOHN'S, ST., COLLEGE:

1. *Generally.*
2. *Revenues and Expenditure of the College.*
3. *The Mastership.*
4. *Fellowships.*
5. *Scholarships.*
6. *Sizarships.*
7. *Matriculations and Examinations.*
8. *Lectures and Examinations.*
9. *Students: their Discipline and Expenses.*
10. *College Library.*

1. *Generally:*

The appointment to the Linacre professorship of medicine is vested in the master and fellows, *Rep. p.* 48——Revision of the statutes of St. John's effected of late years, *p.* 150——Remarks on the measures taken by the college for running out beneficial leases *p.* 197.

2. *Revenues and Expenditure of the College:*

Statement of the sources and amount of the income of this college, and manner in which the same is expended, *Master, Fellows, and Scholars of St. John's College, Ev. p.* 398, 399——Average annual sum received by the master, and fellows, and scholars on the foundation, *p.* 400——Provision made for the supplemental fellowships and scholarships, *ib.*——Statutable provision for reservation of a fourth of the revenue and possessions for the maintenance of supplemental foundations, *ib.*——Manner in which payments to exhibitioners are regulated, *ib.*——Way in which the expenses of the college table, in the case of fellows and scholars, is regulated, *ib.*——Particulars relative to the sizars and sub-sizars, *ib.*——Sum, under the name of "detriments," raised among the members of the college, and applied to the general household purposes of the college, and also to its ordinary repairs; extraordinary repairs being defrayed out of the income, *p.* 400, 401——Average expense of repairing church chancels, *p.* 401——Cost of prize books annually given away, *ib.*——The surplus income, after satisfaction of all claims, is divided amongst the master and fellows, *ib.*——Practice in respect to beneficial leases, *ib.*——Amount of fund for the purchase of advowsons; number purchased,

Report, 1852—*continued.*

JOHN'S, ST., COLLEGE—continued.

2. *Revenues and Expenditure of the College*—continued.

and assistance afforded to small livings, *Ev. p.* 401——A new court added to the college buildings in 1830, a loan to complete the same having been raised, *ib.*

Gross income of the college at the present time, *Rep. p.* 196.

3. *The Mastership:*

The power of choosing the master is vested in the fellows being of the degree M. A., *Rep. p.* 152——Sources and amount of emolument of the mastership, *p.* 154, 155.

Appointment of the master, and election of the fellows and scholars of St. John's College; qualifications required in them, *Tatham, Ev. p.* 396——Absence from residence permitted to the master and fellows; duties of fellows; particulars relative to the government of the college; stipends, emoluments, and advantages of the master, fellows, and scholars; statement as to the supplemental foundations, *p.* 397——Inexpediency of removing the limitations as to fellowships, scholarships, and exhibitions in this college, *p.* 398——It is not desirable that any of the fellowships, scholarships, or exhibitions should be consolidated, *ib.*

4. *Fellowships:*

Number of foundation and bye-fellowships at this college, distinguishing whether open or restricted, *Rep. p.* 157——The election of fellows is confined to candidates born in England and Wales, *ib.*——Particulars as to the twenty-one appropriated foundations and fellowships, *p.* 160–164——Fellowship limited to the choristers of the college, *p.* 163——Modifications effected by the society in the limitations as to consanguinity, place of birth, &c., imposed by founders of fellowships, *p.* 165——Value of a foundation fellowship, *p.* 167.

Academical standing required of candidates for fellowships, *Rep. p.* 199——The B.D. degree an essential requisite in the college statutes, and is complied with in practice, *p.* 170——Fellowship, the presentation to which is in the Bishop of Ely, *p.* 169——The election to fellowships is required to take place annually at a stated time, *p.* 170——Requirements of the statutes as to fellows entering Holy Orders, *p.* 171——Provision made in the revised statutes of the college, in regard to the private property of fellows, *ib.*——Tenure of fellowships and scholarships, *Tatham, Ev. p.* 396, 397——Proportion of lay to ecclesiastical fellows; effect of the condtion of Holy Orders to exclude persons desirous of pursuing the study of science and to remain laymen, *Babington, Ev. p.* 451.

5. *Scholarships:*

Number of scholarships at this college; particulars as to those entirely open; also of those restricted, and value, *Rep. p.* 189–194——Usage as to disposal of scholarships and exhibitions in cases of there being no eligible claimant, *Tatham, Ev. p.* 398.

6. *Sizarships:*

Number of sizars and sub-sizars admitted; pecuniary and other advantages annexed thereto, *Rep. p.* 195; *Tatham, Ev. p.* 398.

7. *Matriculations and Examinations:*

Number of students entered at St. John's College in each year, ending 10 October 1844 to 1848, *Rep. p.* 145——Summary of the number of members of the college in 1851, *ib.*——Number of residents on 14 November 1851, *ib.*——Table showing the number of matriculations at this college in the years 1800, 1810, 1820 and 1830, and in each of the ten years 1840 to 1850, *Romilly, Ev. p.* 66——Similar table of the number of degrees of the several grades granted in the same periods, *p.* 67–70——Total number of degrees granted in the last eight years, *p.* 70——No matriculation examination of students at St. John's, *Hoare, Ev. p.* 168——Practice respecting the admission of students over and above the members of the foundation, *Tatham, Ev. p.* 397.

8. *Lectures and Examinations:*

Subjects embraced by the course of collegiate instruction, number of fellows employed in giving the college lectures, and number of college examinations annually; prizes given at same, *Tatham, Ev. p.* 397.

The staff of college lecturers is not sufficient to prepare students for the University examinations; additional tuition is required, *Hoare, Ev. p.* 167, 168——Classification of students adopted, *p.* 167.

9. *Students; their Discipline and Expenses:*

Hours of Divine service in the chapel; attendance required thereat, *Tatham, Ev. p.* 397——Attendance required at the college lectures and in the hall at dinner; hour at which students are required to be in college or their licensed lodging at night, *p.* 398——Control exercised over the expenses of students, *ib.*——Amount of the necessary expenses of

Report, 1852—*continued.*

of the several classes of students, *Tatham, Ev. p.* 398——The present moderate amount of the necessary expenses of students cannot be reduced; the existing regulations for restraining extravagance works beneficially, *ib.*

10. *College Library:*

Number of volumes in the college library; classes of literature therein, *Rep. p.* 134; *Tatham, Ev. p.* 402——The library has received many considerable gifts, *Rep. p.* 134—— Catalogue of the MSS., and of rare books lately published, *ib.*——One of the fellows of the college acts as librarian, and is assisted by a sub-librarian, who is generally a scholar of the college, and a graduate of the University, *Tatham, Ev. p.* 401——There is a catalogue of the books and a descriptive catalogue of the MSS.; the arrangement of the books is generally according to their subjects, but not strictly so; the library-room is not fire-proof, *ib.*——Sum contributed by each fellow, on his election, to the purposes of the library; amount of librarian's and sub-librarian's salaries, which, together with the other expenses of the library, are defrayed out of the general funds of the college; sum annually spent in the purchase and binding of books, *p.* 402——Access permitted to the library *ib.*——Rules of the library as ordered by the master and senior fellows; instructions of the librarian to the sub-librarian, *ib.*——List of the several contributors of money or books, and number of volumes given or bequeathed, *p.* 402, 403.

John's, St., College v. *Todington* (*Burrow*, i. *p.* 158). This case referred to, *Rep. p.* 162.

Johnson, Rev. Archdeacon Robert,. Exhibitions at Emmanuel College, founded by; annual value thereof, *Master and Fellows of Emmanuel College, Ev. p.* 427——Exhibitions at Sidney Sussex College, also founded by; annual value; term of tenure, *Phelps, Ev. p.* 430; *Master and Fellows of Sidney Sussex College, Ev. p.* 434.

Jones, T. S. Specimens presented by, to the Woodwardian Museum, *Sedgwick, Ev. p.* 118.

Jurisdiction of the University. See *Discipline.*

Jurisprudence. See *Civil Law.*

K.

Kay, Roger. Books and MSS. given, by to the library of St. John's College, *Tatham, Ev. p.* 403.

Kaye, Dr., Bishop of Lincoln. Examination instituted by, when Regius Professor of Divinity of candidates for the B. D. degree, *Rep. p.* 30.

Kendal, Vicarage of. Augmented from "The Pigott Fund" by Trinity College, *Master and Fellows of Trinity College, Ev. p.* 424.

Kent County. Scholarship at St. John's College, on the foundation of Mr. Ducket, limited to candidates from certain places in Kent, *Rep. p.* 190——One of Cardinal Morton's scholarships at the same college open to natives of Kent, *p.* 192——Robinson's fellowships and scholarships at St. John's College open to natives of, *ib.*

Scholarship at Trinity College, on Newman's foundation, open to natives of this county, *Rep. p.* 194——Scholarship at Trinity Hall, on Oxenden's foundation, with preference to sons of Kentish clergymen, *Geldart, Ev. p.* 333——Brown's exhibitions at Emmanuel College open to scholars from any school in the county, *Master and Fellows of Emmanuel College, Ev. p.* 427——Candidates for the foundation scholarships at Sidney College required to be natives of Kent, *Phelps, Ev. p.* 429.

Keton, John, D.D. Fellowships at St. John's College founded by, temp. Hen. VIII., *Rep. p.* 162——Legal proceedings of which one became the subject in 1756, *ib.*——Subsequent disputes, *ib.*—— Re-constitution of the fellowships required in consequence of the changes effected by the Ecclesiastical Commissioners in the collegiate church of Southwell, *p.* 162, 163.

King, Rev. Joshua, D.D., President of Queen's College. Letter from, dated 25 November 1850, in answer to circular of the Commissioners of 30 October, *Corr. p.* 5——Letter from, to the Commissioners, stating his inability, from ill health, to reply to the queries contained in their circular of December, 1850, *Ev. p.* 354.

Report, 1852—*continued.*

KING'S COLLEGE:

1. *Foundation of the College: its connexion with Eton College; Statutes, and how far observed; Changes expedient.*
2. *Revenues and Expenditure of the College.*
3. *The Provostship.*
4. *Fellowships.*
5. *Scholarships.*
6. *Matriculations and Examinations.*
7. *Lectures and Examinations.*
8. *Students; their Discipline and Expenses.*
9. *College Library.*
10. *Privilege in regard to the B. A. Degree.*

1. *Foundation of the College; its connexion with Eton College; Statutes, and how far observed; Changes expedient:*

General remarks on the peculiar circumstances connected with the foundation of King's College, and its relations with Eton College, *Rep. p.* 173——Position of the provost and scholars as affected by the oaths which they have taken to obey the statutes of their founder (Hen. VI.); solemn character of those oaths, *ib.*——Objects of the foundation as described in the patent; connexion between this corporation and Eton College, *p.* 174.

Abstract of commentary on the statutes, and the conditions involved in their observance, viz. as to fellows taking Holy Orders, *Rep. p.* 174——Prohibition from doing clerical duty in any other church than that of the college, *ib.*——Numbers on the foundation immutable, *ib.*——Residence, *p.* 175——Course of instruction, *ib.*——Poverty, *ib.*——Comparison of the practice of the college in modern times with the foregoing, *p.* 175, 176.

A reform of the college statutes urgently necessary, *Rep. p.* 174——Plan suggested for removing the existing incongruities, and extending the usefulness of the college, *p.* 176, 177.

Particulars as to the deed of composition entered into between the society and the University in 1456; objects thereof, and manner in which it should be dealt with, *Rep. p.* 177.

Inexpediency of removing the appropriations and limitations, &c. now obtaining, relative to the election to, or tenure of the fellowships or scholarships in this college, *Okes, Ev. p.* 348, 349——A consolidation of the fellowships and scholarships of the college is not desirable, *p.* 349.

2. *Revenues and Expenditure of the College:*

Gross income of the college at the present time, *Rep. p.* 196——Remarks on the measures taken by the college for running out beneficial leases, *p.* 197.

Sum derived by the college during each year from 1845 to 1851, inclusive, from arrears and rents of land, tithes and rentcharge, house rents, quit and composition rents, and rents of underwood and game, *Provost and Fellows of King's College, Ev. p.* 349——Amount of fines during same period, taken on renewal of beneficial leases, *p.* 349, 350——Amount of manorial fines; proceeds of sale of timber, *p.* 350——Receipts from all the beforementioned sources in the years 1836 and 1851, the former year being the last brought to account before the Tithe Commutation Act took effect, *ib.*——Amount of present gross yearly income derived from houses, from tithe rentcharge, and from college dues, *p.* 350, 351——Gross and net income on an average of the seven years from 1845 to 1851 inclusive, *p.* 351——Present gross income from funded property, *ib.*——There are no room rents, and the degree fees are of the small amount stated, *ib.*——Total of the net general income of the college, *ib.*

Average amount of dividends paid to the provost, fellows and scholars, *Ev. p.* 351, 352——Total average income of the different members of the college, *p.* 352——Manner in which the expense of the table in the college hall is defrayed, *ib.*——There is no statutable provision for sizars or sub-sizars, nor for the maintenance of students who are not on the foundation, *ib.*——Detailed statement of annual expense of the college chapel, *ib.*——Average annual expense of the repairs to the college buildings and walks, *p.* 352, 353——Statement as to the building fund, and also as to the repair of church chancels, *p.* 353.

Annual amount expended in prizes and rewards, and in subscriptions to charities and schools, *Ev. p.* 353——Other miscellaneous purposes to which the college income is applied, *ib.*——General statement of the expenditure of the college, *ib.*——Practice with respect to beneficial leases, *p.* 354——Application of the Advowson Fund, *ib.*——Period at which the most recent additions were made to the college buildings, *ib.*

3. *The*

Report, 1852—*continued.*

KING'S COLLEGE—continued.

3. *The Provostship:*

The power of choosing the provost is vested in the fellows, *Rep. p.* 152——Emoluments of the provost, *p.* 154——Mode of appointment of the provost; qualifications required; conditions on which the offices is held; residence enjoined; duties, powers and stipend, and emoluments, *Okes, Ev. p.* 347.

4. *Fellowships:*

Value of a foundation fellowship at this college, *Rep. p.* 167——The certainty of succession from a probationary scholarship to a perpetual fellowship an objectionable feature in this foundation, *p.* 176——Average number of probationary fellows; annual stipend of a probationary fellow; also of an actual fellow while an under graduate, and when B. A., *p.* 188——Election of fellows; tenure of fellowship; residence required; duties and emoluments, *Okes, Ev. p.* 347, 348——There are no supplemental or bye fellowships, nor any exhibition, *p.* 348.

5. *Scholarships:*

Mode of election to scholarships, *Okes, Ev. p.* 348——Scholars of this college have their rooms, commons, allowances of bread and beer and tuition free of expense, besides a share of the dividends and other allowances, *p.* 348.

No sizars are admitted, *Rep. p.* 195.

6. *Matriculations and Examinations:*

Number of students entered at King's College in each year ending 10th October 1844 to 1848, *Rep. p.* 145——Summary of the number of members of the college in 1851, *ib.*——Number of residents on 14th November 1851, *ib.*——Table showing the number of matriculations at this college in the years 1800, 1810, 1820 and 1830, and in each of the ten years 1840 to 1850, *Romilly, Ev. p.* 66——Similar table of the number of degrees of the several grades granted in the same periods, *p.* 67–70——Total number of degrees granted in the last eight years, *p.* 70——Students over and above the members of the foundation have in former times been admitted, but the statutes forbid the admission of strangers "*ad onus collegii*," *Okes, Ev. p.* 348.

7. *Lectures and Examinations:*

College lectures and examinations; prizes given, *Okes, Ev. p.* 348.

8. *Students; their Discipline and Expenses:*

Hours of service in the college chapel; attendance thereat required from the scholars, *Okes, Ev. p.* 348——Attendance of scholars at lectures, and at dinner in hall; hour at which they are required to be in college at night; no members of this college are permitted to reside in lodgings, *ib.*——The queries of the Commissioners relative to the expenses of students are not applicable to this college, *ib.*——There are no facilities for credit given within the college, *ib.*——Manner in which any enactments as to extravagant practices will always be inefficacious, *ib.*

9. *College Library:*

Number of volumes contained in the college library; the collection of Jacob Bryant is included, *Rep. p.* 135——The library is in the care of a librarian, one of the fellows of the college; his duties, *Okes, Ev. p.* 349——Catalogue; arrangement of books; description of building; number and description of volumes; bequests; access to the library, *ib.*

10. *Privilege in regard to the B. A. Degree:*

Privilege possessed by this society of presenting their students to the University for the B. A. degree without undergoing any examination, *Rep. p.* 29——The college has voluntarily surrendered this privilege, *p.* 29. 173.

King's College (London). Course of education for the duties of the ministerial office established at King's College, *Rep. p.* 31——Provision made for the manipulative instruction of students, *p.* 117——Scholarship founded by Magdalene College in 1835, open to students from, *Warter, Ev. p.* 407.

King's School (Canterbury). Exhibitions at Emmanuel College, on Brown's foundation, open to students from, *Master and Fellows of Emmanuel College, Ev. p.* 427.

Kingston (Cambridge). Estate at, belonging to King's College library, *Dalton, Ev. p.* 358.

Kirkby Lonsdale School. Scholarships at Christ's College, on Bishop Otway's foundation, open to scholars from, *Cartmell, Ev. p.* 378; *Master and Fellows of Christ's College, Ev. p.* 392——Other scholarships at the same college, on Wilson's foundation, restricted to students from, *Cartmell, Ev. p.* 379; *Master and Fellows of Christ's College, Ev. p.* 393.

Kirkpatrick, John. Casts of works of ancient art presented by, to the Fitzwilliam Museum, *Rep. p.* 126.

Report, 1852—*continued.*

Kirton (*Kyrton*) *School* (*Lincoln*). Wray's scholarships at Magdalene College open to students from, *Warter, Ev. p.* 407.

Knight, Mr. Collection of county visitations presented by, to Gonville and Caius College library, *Chapman, Ev. p.* 329.

Knights. By a letter of Charles II., in 1679, the University is authorised to confer the degree of M. A. on a knight, without compliance with the usual forms, *Ainslie, Ev. p.* 29.

Knightbridge, Dr. John. The professorship of moral theology and casuistical divinity founded by, in 1667; particulars as to the professorship; amount of the endowment, *Rep. p.* 57, 58; *Whewell, Ev. p.* 99, 100.

L.

Laboratories and Apparatus. Deficiency in the University of any organised system of practical instruction by means of laboratories, and apparatus, and museums, *Rep. p.* 116 —— Quotations from evidence, indicating a sense of this deficiency, *p.* 116, 117——Ample provision made in King's College, London; the Birkbeck laboratory of London University College, and in other home and foreign institutions, *p.* 117——No want of apparatus, however, or of instruction for its use, in the astronomical department, *p.* 117, 118—— Objections to an extensive encouragement of experimental science answered, *p.* 118, 119——Great want of a laboratory in the University, *Stokes, Ev. p.* 97.

See also *Apparatus. Museums.*

Lady Margaret's Preacher. Period of foundation; stipend; no duties performed, *Rep. p.* 48——Suggestion for the suppression of the inconsiderable payment at present attached to this office, *p.* 87.

Lady Margaret's Professorship of Divinity. Period of foundation of this professsorship; name of founder, &c., *Rep. p.* 47; *Blunt, Ev. p.* 86—— Duties required by the statutes; duties actually performed, *Rep. p.* 47; *Blunt, Ev. p.* 86, 87——Particulars and amount of original endowment; present annual value; no fees or other emoluments, *Rep. p.* 47. 71; *Blunt, Ev. p.* 87——Mode and tenure of appointment, *Blunt, Ev. p.* 87——No residence attached, *ib.*

Lectures delivered; usual subject thereof; attendance given, *Blunt, Ev. p.* 87—— Plan on which the lectures of the present professor are based; their relation to the questions set at the voluntary theological examination, *p.* 88, 89.

Modifications of the statutes relating to the professorship advisable, *Rep. p.* 47—— Suggestion, on the next vacancy, of reserving a portion of the funds of the professorship for the endowment of a new theological professorship, *p.* 87.

Lamb, Very Rev. Dr., Dean of Bristol. Opinion expressed by, relative to the right exercised by the Vice-chancellor to grant ale-licences, *Rep. p.* 7; *Ev. p.* 37.

Lancashire. Foundation fellowships at Christ's College open to natives of this county, *Rep. p.* 159; *Cartmell, Ev. p.* 372——Scholarships on the original foundation of Christ's College, open to natives of, *Cartmell, Ev. p.* 375——Scholarships at the same college, on Risley's foundation, also open to natives of the county; present annual value thereof, *Cartmell, Ev. p.* 380; *Master and Fellows of Christ's College, Ev. p.* 393.

Bible clerkship at St. Catharine's Hall restricted to natives of; annual stipend, *Philpott, Ev. p.* 363.

Fellowship at St. John's College, on Gregson's foundation, for natives of, *Rep. p.* 162, 163——Scholarship at the same college, also on Gregson's foundation, limited to natives of, *p.* 190.

Landbeach (*Cambridge*). Estate at, belonging to the University library, *Rep. p.* 128.

Languages. See *German Language. Modern Languages. Oriental Languages.*

Lany, Bishop. Fellowship at Pembroke College founded by, in 1675, *Ainslie, Ev. p.* 318 ——Present emoluments, *Master and Fellows of Pembroke College, Ev. p.* 322.

Latham, Rev. H., M. A., Fellow and Tutor of Trinity Hall. (Analysis of his Answers to Queries).

[*Queries as to Expenses and Tuition:*]

Amount of a student's necessary expenses at Trinity Hall; no material reduction can be effected, *Ev. p.* 170——Regulations respecting tradesmen in Cambridge; manner in which tradesmen from London evade them; remedy proposed, *ib.*——Attendance of students

Report, 1852—*continued.*

Latham, Rev. H., M. A., Fellow and Tutor of Trinity Hall. (Analysis, &c.)—*continued.*

[*Queries as to Expenses and Tuition*]—continued.

dents at lectures, *Ev. p.* 170, 171——Particulars relative to private tuition, *p.* 171——Its restriction by enactment would not succeed; comparative efficiency of college lectures; a mitigation of the abuse must rest with the college authorities; cases in which private tuition is beneficial, *ib.*——Objections to any institution exclusively for poor students, *ib.*

Examinations undergone by students at this college; great utility of the college examinations, *Ev. p.* 172——The increase in instructive and popular works has thinned the attendance on professional lectures; qualities in lectures which would encourage attendance at them, *ib.*——No actual examination on admission to this college, *ib.*——Benefits that would accrue from a slight general entrance examination, *ib.*——Boon Government might confer by abolishing the matriculation tax, *ib.*

Difficulties opposed to the reduction of the terms from ten to nine, *Ev. p.* 172——Manner in which the necessity for a reduction might be obviated, *p.* 173——Conditions on which permission to reside during vacation is granted, *ib.*——Proportion of students joining reading parties, *ib.*——Number of students in lodgings; control exercised over them, *ib.*——Difficulty experienced by colleges in providing for students of extraordinary ability, *ib.*——Such men are in general obliged to frequent the classes of eminent private tutors, *ib.*——Suggestion for meeting cases of this character, *ib.*

Latin Language. The study of Latin needs greater encouragement than it at present receives at this University, *Thring, Ev. p.* 289.

Latin, Professorship of. Necessity for the addition of a professorship of Latin to the department of classical study, *Rep. p.* 98. 102——The foundation of a Latin professorship recommended; source from whence his stipend could be defrayed, *Gunson, Ev. p.* 165——A professorship of Latin is grievously wanted; a permanent endowment of 300 *l.* or 400 *l.* a year would secure this for the students, *Hildyard, Ev. p.* 166——Proposition for the constitution and endowment of a Latin professorship, *Merivale, Ev. p.* 176.

Laughton, Rev. Thomas. Scholarship at Christ's College founded by; annual value, *Cartmell, Ev. p.* 380; *Master and Fellows of Christ's College, Ev. p.* 393.

Law, Faculty of. Great benefits that would result to the University and to the country from a re-organization of the faculty of law; application thereof more especially to Trinity Hall, *Rep. p.* 182, 183——Causes of the small number of law students; suggestions for promoting the study, *Amos, Ev. p.* 123, 124——A course of lectures on medical jurisprudence desirable; Cambridge almost the only medical school of repute in Europe without such a chair, *p.* 124——The state of this faculty, and the system followed to obtain the degree in law is very imperfect; an attempt recently made to amend it failed, *J. J. Smith, Ev. p.* 190——Number of foundation fellowships in St. John's and Trinity Colleges; proportion required to take Holy Orders, *Babington, Ev. p.* 451——Effect of these restrictions in excluding persons desirous of pursuing the study of science and to remain laymen, *ib.*

Particulars as to the Downing professorship of the laws of England, *Rep. p.* 65. 73——Lectures delivered by the Downing professor, *Amos, Ev. p.* 123.

See also *Bachelor of Laws. Bar, The. Boards of Studies,* II. 3. *Canon Law. Civil Law, Faculty of. Doctor of Laws. Downing Professorship of the Laws of England. Examinations,* V. *Legal Fellowships.*

Law of Nations and Diplomacy. Suggestion for the foundation of such a professorship, *Rep. p.* 101, 102.

Lawrence, Sir Souldern. Bequest by, to the library of St. John's college, *Tatham, Ev. p.* 403.

Le Bas Prize. Particulars as to this prize, *Ainslie, Ev. p.* 27.

Lectores Ordinarii or Barnaby Lecturers. Particulars as to these readerships; stipend, duties, &c., *Rep. p.* 48. 73——Suggestion for the suppression of the inconsiderable payments at present attached to these offices, *p.* 87.

Lecture Rooms. Inadequacy of the present provision of lecture rooms belonging to the University, *Rep. p.* 115——Extent of that provision, *ib.*——Power of the Vice-Chancellor, in regard to assigning rooms for lectures; his authority is rarely appealed to, *ib.*——Suite of lecture rooms designed to occupy the ground floor of the proposed new library, *ib.*——Want of funds for building and maintaining lecture-rooms and museums, &c., *p.* 116——Suggestion for attaining this object without a very great expenditure, *ib.*

Capacity of the lecture room attached to the anatomical museum, *Rep. p.* 119——The law lectures are delivered in the law school; an apartment for the use of which the Regius Professor pays an annual sum to the University, *Maine, Ev. p.* 78——The founda-

Report, 1852—*continued.*

Lecture Rooms—continued.

tion of new professorships would render further room necessary, *Stokes, Ev. p.* 98; *Whewell Ev. p.* 101; *Cumming, Ev. p.* 103——The present University lecture rooms are insufficient to answer their purpose well, *Whewell, Ev. p.* 101——Absolute necessity for public lecture rooms; site, and means of raising funds for their erection suggested, *Wratislaw, Ev. p.* 216.

Queries circulated by the Commissioners as to the lecture rooms belonging to the University, or rooms, used as such by the several professors; accommodation afforded, &c.; answers thereto by the following, viz.: Dr. Jeremie, Regius professor of Divinity, *Ev. p.* 76——Dr. Robinson, Lord Almoner's Professor of Arabic, *p.* 92——G. G. Stokes Lucasian Professor of Mathematics, *p.* 97——Dr. Whewell, Professor of Moral Philosophy, *p.* 101——Rev. J. Cumming, Professor of Chemistry, *p.* 103——Rev. J. S. Henslow, Professor of Botany, *p.* 114——W. H. Miller, Professor of Mineralogy, *p.* 134——G. Pryme, Professor of Political Economy, *p.* 136.

Lecture Tickets. Amount received annually from the special and general lecture tickets of 3*l.* and 5*l.*, which all candidates for the bachelor's degree, whose names do not occur in the mathematical tripos, are obliged to procure, *Rep. p.* 71——Proportions and mode of distribution, *ib.*

Lecturers. Origin of the term lecturer or lector, *Rep. p.* 46——Severity of the conditions imposed upon this body in ancient times, *ib.*——Observations on the practice of requiring lecturers to deposit copies of their lectures for preservation in the University archives, *p.* 70——Recommendation for creating a new body of public lecturers; mode of remuneration and duties prescribed, *p.* 81——Mode in which the public lecturers should be appointed, *p.* 82——Authority by which their several duties should be assigned from time to time, *p.* 82, 83——Beneficial results to be expected from a good system of public lecturers, *p.* 83——Opinions of various witnesses in support of this opinion, *p.* 83-85——Source from which the stipends of the proposed public lecturers should be defrayed; opinions of various witnesses in regard hereto, cited, *p.* 85 *et seq.*

Suggestion for increasing the tuition payment, and the number of lecturers, and to suppress the vocation of private tutors, *J. J. Smith, Ev. p.* 189——The colleges themselves should, out of their own funds, contribute directly towards the support of the tutors and lecturers, *Swainson, Ev. p.* 194——Suggestion that each lectureship be endowed with a fellowship, and a sum proportionate to the number of students in its class, and should be constituted a life appointment in the gift of the masters and fellows of the college, *Phear, Ev. p.* 255.

Extract from the will of Dame Mary Sadleir founding the Algebra lectureships, with other papers, *App. p.* 462-468.

LECTURES:

I. *Of University Professors:*
1. Particulars as to the Lectures Delivered, and the Attendance required thereat.
2. Alterations in the System expedient

II. *Of College Lecturers and Tutors:*
1. Generally.
2. Digest of Answers to Queries issued by the Commissioners on the subject.

I. *Of University Professors:*

1. Particulars as to the Lectures Delivered, and the Attendance required thereat:

Programme issued annually by the Vice-Chancellor of the lectures to be given by the professors in the ensuing academic year; arrangement under which this is done, *Rep. p.* 115——Requirements of the Elizabethan statutes as to the lectures to be delivered, *Ainslie, Ev. p.* 22 *et seq.*——Fees paid for attendance on a course of lectures by a professor, *p.* 34.

Particulars as to the lectures delivered by the following professors; viz.: the Regius Professor of Divinity, *Jeremie, Ev. p.* 76, 77——Regius Professor of Civil Law, *Maine, Ev. p.* 77——Regius Professor of Physic, *Haviland, Ev. p.* 81——Plumian Professor of Astronomy, *Challis, Ev. p.* 104, 105——Professor of Anatomy, *Rep. p.* 120; *Clark, Ev. p.* 108——Professor of Botany, *Henslow, Ev. p.* 113——Woodwardian Professor of Geology, *Sedgwick, Ev. p.* 115, 116——Lowndes' Professor of Astronomy, *Peacock, Ev. p.* 121, 122——Downing Professor of Law, *Amos, Ev. p.* 123——Professor of Mineralogy, *Miller, Ev. p.* 133——Professor of Political Economy, *Pryme, Ev. p.* 135.

List of professors whose lectures candidates for the B. A. degree are required to attend, *Rep. p.* 21——Degree of L.L.B., *p.* 33——Degree of L.L.D., *p.* 34——Degree of M.B., *p.* 35——Degree of M.D., *p.* 36.

Report, 1852—*continued.*

LECTURES—continued.

I. *Of University Professors*—continued.

1. Particulars as to the Lectures delivered, &c.—*continued.*

Attendance on lectures secured by means of the voluntary theological examination, *Blunt, Ev. p.* 88——Numerous attendance given upon the lectures of the Professor of Modern History, *Sir J. Stephen, Ev. p.* 112——Attendance of inhabitants of the town at the lectures of the Woodwardian Professor; they are freely admitted, *Sedgwick, Ev. p.* 116. 119——No lectures have ever been given by the Professor of Music, *Walmisley, Ev. p.* 137——Reasons for which the professor's lectures have less influence than they formerly had, *Cooper, Ev. p.* 222——Causes why no system of academic lectures has ever been attempted by the Mathematical Professors, *Hopkins, Ev. p.* 247.

2. Alterations in the System expedient:

Suggestions for a more complete organization of the lectures of the three Divinity Professors, so as to bring them into a closer relation to one another, and to the examination itself, *Blunt, Ev. p.* 88——Expediency of establishing a course of lectures on medical jurisprudence, *Amos, Ev. p.* 124——Want of lectures on scientific agriculture, *ib.*——Also on civil engineering, *ib.*——The adoption of an arrangement for making the admission to lectures gratuitous urged, *Miller, Ev. p.* 135——No objection to extending lectures through the whole length of the terms, *Blakesley, Ev. p.* 150——The plan, in operation, of compulsory attendance upon the lectures of some of the professors works well, and might be extended; fund that might be raised thereby, *Gunston, Ev. p.* 164——Lectures, to be efficacious, should have a catechetical character, and this can only be had by lecturing to small classes, *Hopkins, Ev. p.* 246.

Questions circulated by the Commissioners, relative to the present system of fees for attending public lectures; provision existing for a complete and systematic course of lectures, and whether any new foundations are necessary, *Ev. p.* 75——Answers to the foregoing, from the following, viz.: Dr. Jeremie, Regius Professor of Divinity, *Ev. p.* 76, 77——Dr. Robinson, Lord Almoner's Professor of Arabic, *p.* 92, 93——G. G. Stokes, Lucasian Professor of Mathematics, *p.* 97. 99——Dr. Whewell, Professor of Moral Philosophy, *p.* 101, 102——Rev. J. Cumming, Professor of Chemistry, *p.* 103——Rev. J. S. Henslow, Professor of Botany, *p.* 114, 115——Andrew Amos, Downing Professor of Law, *p.* 124, 125——W. H. Miller, Professor of Mineralogy, *p.* 134, 135——George Pryme, Professor of Political Economy, *p.* 136.

II. *Of College Lecturers and Tutors:*

1. Generally:

Respects in which the system of college lecturing is defective, as regards the highest training for mathematical honours, *Rep. p.* 108——The lectures of the tutors and assistant tutors are one mode of discipline, *p.* 146——Evils of the present system of enforcing attendance on lectures in college during the best part of the day, from which often no benefit whatever is derived, *Henslow, Ev. p.* 114——Attendance at college lectures required of students, *Hopkins, Ev. p.* 245.

2. Digest of Answers to Queries issued by the Commissioners on this subject:

Queries circulated by the Commissioners, relative to the lectures given in each college; attendance thereon; whether the staff of lecturers is sufficient, and how far their functions are superseded by private tutors, *Ev. p.* 140.

Answers to the foregoing, from the following colleges and halls, viz.:

Pembroke College:—

Subjects of the lectures for the freshmen's year, and for the second and third years, *Arlett, Ev. p.* 143——Classification of students; attendance is compulsory, *ib.*——The staff of lecturers is sufficient, *ib.*——The system of private tuition interferes materially with the efficacy of college lecturers, *ib.*——Lectures given in Greek and Latin composition, *ib.*

Gonville and Caius College:—

Description of the lectures given; classification of students is very partial; attendance compulsory; the staff of lecturers is complete, if they give their whole time to the office, and could command the full attention of the students, *J. J. Smith, Ev. p.* 187.

Trinity Hall:—

Course pursued in regard to the attendance of students on the different college lectures; compulsion with respect to certain lectures, *Latham, Ev. p.* 170——Voluntary attendance on some lectures, *p.* 171——The college staff of lecturers is quite sufficient, *ib.*

Corpus Christi College:—

Table of the lectures at this college, *Mould, Ev. p.* 176——Classification of students adopted, *p.* 177——Attendance is compulsory, *ib.*——Subjects treated, *ib.*

Report, 1852—*continued.*

Lectures—continued.

II. *Of College Lecturers and Tutors*—continued.

2. Digest of Answers to Queries, &c.—*continued.*

Queen's College :—

Description of the lectures given at this college; classification of students; the college tutors are responsible for the supply of lecturers, and paying them; attendance is compulsory; the staff is sufficient, *Peill, Ev. p.* 178.

St. Catharine's Hall :—

List of the lectures given at this college; classification of students; attendance is compulsory; the staff of lecturers is sufficient, *Philpott, Ev. p.* 180.

Christ's College :—

Synoptic view of the lectures given to the students of this college, *Gunson, Ev. p.* 162 —— Classification of students, *ib.*——The staff of lecturers is competent for the mathematical and classical triposes, but no provision has been made in regard to the newly established moral and natural sciences triposes, *ib.*

The inequality of attainment among pupils renders impossible lecturing with equal profit to all, *Hildyard, Ev. p.* 165——A general admission examination would be some remedy for this, *ib.*——Attendance is compulsory, *ib.*——The functions of the tutors are needlessly superseded by private tutors, *ib.*

Classification of students; attendance is compulsory; the staff of lecturers is amply sufficient; their functions, to some extent, are superseded by private tutors, *Shaw, Ev. p.* 185.

Number of lectures given daily; subjects thereof; number of lecturers; classification of students; attendance for the most part compulsory; the staff of lecturers sufficient, but their functions superseded, to a great extent, by private tuition, *J. Smith, Ev. p.* 191.

Particulars as to the mathematical lectures; classification of students; attendance required; the staff of lecturers is sufficient, but the funds of a small college are not ample enough for such a multiplication of lecturers as would render private tuition unnecessary, *Swainson, Ev. p.* 193.

Number of lecturers; subjects of the compulsory lectures, and of the voluntary lectures; period at which students are classified; the staff not sufficient for the honour examinations; the functions of the lecturers, in the case of candidates for honours, superseded by private tutors, *Wratislaw, Ev. p.* 212.

St John's College :—

Principle of classification of students observed at this college, *Hoare, Ev. p.* 167—— The staff of lecturers not sufficient to prepare students for the University examinations without assistance from private tutors, *ib.*——Additions to the staff necessary, *ib.*

Magdalene College :—

Attendance is, as far as possible, compulsory; the staff of lecturers of this, as well as every other college, is insufficient to provide for the entire course of public instruction, and the consequence is that a great portion of the instruction is supplied by private tutors, *Warter, Ev. p.* 201.

Trinity College :—

Number of tutors, *Blakesley, Ev. p.* 147——Average number of students under lecture, *ib.*——Quite sufficient educational force, *p.* 148——Principal hindrances to the complete and regular development of the system of instruction, *ib.*——Classification of students, *ib.*——Extent to which attendance is compulsory; hindrance to attendance on college lectures resulting from the system of private tuition, *ib.*

Classification of students, *Cooper, Ev. p.* 152——Attendance is compulsory, regard being had to the expression of a preference for any particular course, *ib.*——Classification according to capacity, if adopted at an early stage of pupilage, requires great delicacy, *Evans, Ev. p.* 159——System of classification formerly observed; reasons for its abandonment, *Frere, Ev. p.* 160.

Augmentation of the number of lecturers since the accession of the present master; classification of students adopted; conditions of attendance; the staff of lecturers fully adequate for the mathematical department; a little more in regard to classical honours required; additional force requisite for preparing students for the moral and natural sciences triposes, *Thompson, Ev. p.* 197.

Schedule of the lectures delivered at Trinity College; the lectures so given would be sufficient if they were resorted to with that intention, but a large portion of the students seek the assistance of private tutors, *Whewell, Ev. p.* 206.

Downing College :—

The staff of lecturers is sufficient for the present circumstances of the college, *Worsley, Ev. p.* 209.

Leeds

Report, 1852—*continued.*

Leeds (*York*). Scholarships at Magdalene College, on Millner's foundation, open to students from, *Warter, Ev. p.* 407.

Legal Fellowships. Some of the colleges have fellowships appropriated to persons pursuing the legal profession; recommendations in regard to this class, *Rep. p.* 170.

Legal Proceedings against Students. Decree of the University authorities respecting the enforcement of legal process against students, by tradesmen, for the recovery of debts, *Rep. p.* 17——Objections thereto urged by the Cambridge tradespeople; answered by the University, *p.* 17, 18.——*See* also *Minors.*

Legge, Dr. Collection of civil law books given by, to Gonville and Caius College library, *Chapman, Ev. p.* 329.

Legislative Interference. The authority of the Legislature the only practical means by which the recommendations of the Commissioners can be effectively carried out, *Rep. p.* 199 ——A Board, with temporary powers, suggested to be appointed by an Act of Parliament, *ib.*

Leicestershire. Exhibitions at Christ's College, on Hawford's foundation, open to natives of, *Cartmell, Ev. p.* 379; *Master and Fellows of Christ's College, Ev. p.* 392.

Lent Term. Suggestion that students enter in the Lent term instead of the October term, *Latham, Ev. p.* 173.

Lewis, Archdeacon. Donation by, to the University library, *Power, Ev. p.* 50.

Lewis, Robert and Mary. Scholarship at St. John's College founded by, in 1620, *Rep. p.* 191. 194.

Libraries (*Public and other*):

Details as to the Contents, sources of Income, and future Requirements, &c. of the following Public and other Libraries of the University and Colleges, viz.:—

The University Library, *Rep. p.* 127–132; *Power, Ev. p.* 50–59.
Fitzwilliam Library, *Rep. p.* 132; *Power, Ev. p.* 59, 60.
St. Peter's College, *Rep. p.* 135; *Cocker, Ev. p.* 315, 316.

Emmanuel College, *Rep. p.* 135; *Archdall, Ev. p.* 428.
Sidney Sussex College, *Phelps, Ev. p.* 435.
Downing College, *Rep. p.* 135; *Worsley, Ev. p.* 212. 438.

Library of astronomical works at the observatory, *Challis, Ev. p.* 105——An inconsiderable collection attached to the professorship of modern history; no fund available for its maintenance, *Sir J. Stephen, Ev. p.* 111——Library attached to the museum of the Woodwardian professorship of geology, *Sedgwick, Ev. p.* 117—— No library attached to the professorship of political economy; the present professor has formed a collection of books; loan thereof made to students, *Pryme, Ev. p.* 135.

Licences, Alehouse and Wine. Statement, in memorial of the council of the borough of Cambridge as to the granting of licences, *Rep. p.* 7, and *Ev. p.* 37—— Answer thereto by a syndicate appointed to consider the memorial, *Ev. p.* 42.

See also *Ale Licences. Theatrical and other Entertainments. Wine Licences.*

Licences to Lodging-house Keepers. By whom granted; conditions annexed, *Rep. p.* 18.

See also *Lodging Houses.*

Report, 1852—*continued.*

Licentiate of Medicine, Degree of:

In what cases licences *ad practicandum in medicina* are granted, *Rep. p.* 36——Particulars of fees paid on admission to this degree, *Ainslie, Ev. p.* 33; *Fisher, Ev. p.* 127——Amount of stamp duty paid to Governnent, *Romilly, Ev. p.* 63——Table showing the number of degrees of this grade conferred in the years 1800, 1810, 1820 and 1830, and in each of the years 1840 to 1850, distinguishing the several colleges, *p.* 67–70——Conditions required to be observed by candidates for this degree, *Fisher, Ev. p.* 127——Proposed re-arrangement of the course of medical study and probation, by which this degree would be dispensed with, *p.* 132.

Licentiates in Divinity. Suggestion for a degree of licentiate in divinity, requiring a much shorter residence, *Warter, Ev. p.* 201.

Licentiates in Theology. Proposition of the syndicate for the revision of the statutes for the establishment of a new class of theological students, to be so called; approval of this plan, *Rep. p.* 31——Restrictive condition annexed by the syndicate to this plan; objections thereto; suggestions for modifying this condition, *p.* 32.

Lightfoot, Edward. Books given by, to the library of St. John's College, *Tatham, Ev. p.* 403.

Linacre Professorship of Medicine. Date of foundation thereof; stipend; duties, and how at present performed, *Rep. p.* 48——Proposed appropriation of this professorship to the purposes of a medical scholarship, *p.* 96.

Lincoln, Bishop of. Letter from, as visitor of King's College, dated 11 November 1850, in reply to circular of the Commissioners of 30 October, *Corr. p.* 2.

Lincoln Diocese. Scholarships at St. John's College, on Lord Keeper Williams's foundation, limited to persons born within, *Rep. p.* 191.

Lincoln School. Scholarships at Magdalene College, on Wray's foundation, open to students from, *Warter, Ev. p.* 407.

Lincolnshire. Fellowship at St. John's College, on Thimbleby's foundation, restricted to natives of, *Rep. p.* 163——Preference shown to natives of, as candidates for scholarships at St. Catharine Hall, on Ramsden's (Skerne's) foundation, *Philpott, Ev. p.* 363. 366——Scholarship at Christ's College, on Laughton's foundation, open to natives of, *Cartmell, Ev. p.* 380; *Master and Fellows of Christ's College, Ev. p.* 393——Scholarships at Magdalene College, on the Countess of Warwick's foundation, open to natives of, *Warter, Ev. p.* 407.

Littledale, Mr. Justice. Sum of money given by, to the library of St. John's College, *Tatham, Ev. p.* 403.

Livesay, Amy, and Thomas Hobbs. Allowance for a scholarship at Pembroke College given by, *Ainslie, Ev. p.* 319.

Local Burthens. Statement, in memorial, of the town council, relative to the inequalities of the local burthens imposed on the University, and the exemptions from certain thereof enjoyed, *Ev. p.* 40——Reply of the syndicate appointed by the senate to consider the foregoing, *p.* 45.

Lodge, Mr. (*late University Librarian*). Quarterly tax of 1 *s.* 6 *d.* first levied on members of the University, on the recommendation of, for the purchase of books, *Rep. p.* 131.

Lodging Houses:

1. *General Particulars relative to the Lodging House System, and the Supervision exercised.*
2. *Digest of Answers to Queries on this subject with reference to each College.*

1. *General Particulars relative to the Lodging House System, and the Supervision exercised:*

Supervision exercised by the University authorities over lodging-houses; licences granted, *Rep. p.* 18——General nature of the rules laid down, *ib.*——How far the system is equal to collegiate superintendence, *p.* 19——It has long been the practice to allow students to reside in lodgings, *p.* 144——Great care taken to place proper checks upon the keepers of lodging-houses; regulations enforced, *ib.*——Number of students residing in lodgings in November 1850 and November 1851, *ib.*——Operation of the lodging-house system; conflicting opinions in regard hereto, *ib.*——Advantage of erecting buildings for the reception of students in immediate connexion with the collegiate bodies, *p.* 144, 145——Details as to the authority exercised by the University over the houses in which students lodge; licences granted, *Ainslie, Ev. p.* 32.

Report, 1852—*continued.*

Lodging Houses—continued.

1. *General Particulars relative to the Lodging House System, &c.*—continued.

Copy of the University regulations respecting lodging-houses, *Cooper, Ev. p.* 157—— Lodging-house licence, *ib.*——Lodging-house certificate, *ib.*

2. *Digest of Answers to Queries on this subject with reference to each College:*

Queries circulated by the Commissioners relative to the residence of students in lodgings in the town; the regulations enforced, and how far the same are generally observed; also whether students are under less rigorous control than those in college, *Ev. p.* 141.

Answers to the foregoing from the following, viz.:—

Pembroke College:—

Some of the students reside in lodgings; the regulations are observed; students in lodgings are not under less rigorous control than those in college, *Arlett, Ev. p.* 146.

Gonville and Caius College:—

The regulations for the lodging-house keepers are in many cases ineffectual; reasons thereof, *Crowfoot, Ev. p.* 158——The greater number of the students of this college reside in lodgings; the regulations on the whole are observed; the proctors might enforce a stricter attention to them, *J. J. Smith, Ev. p.* 190.

Trinity Hall:—

About ten students belonging to this college reside in lodgings; they are subject to more rigorous control than in college, if the housekeepers report regularly; cases of neglect or connivance occur, *Latham, Ev. p.* 173.

Corpus Christi College:—

None of the students of this college reside in lodgings; the system is bad; reducing the terms of residence to nine would diminish the necessity for lodging-houses, colleges ought not to take students they cannot accommodate, *Mould, Ev. p.* 177.

Queen's College:—

Several of the students reside in lodgings during term, *Peill, Ev. p.* 179.

St. Catharine's Hall:—

Number of students of this college in lodgings; regulations enforced; not many cases in which the keepers have been punished; in most instances they escape detection; the great majority, however, are honestly desirous to observe the regulations; students in such houses, in some respects, are under stricter control than those in college; supervision exercised by the proctors, *Philpott, Ev. p.* 184, 185.

Christ's College:—

Part of the students of this college reside in lodgings; regulations laid down; how evaded; students in lodgings are under less control, and exposed to greater temptation, than those in college, *Gunson, Ev. p.* 165.

The "gate" returns of the lodging-houses are much tampered with; in other respects the students in lodgings are not exposed to greater temptation than those in college, *Hildyard, Ev. p.* 166.

The students are subject to the same regulations in lodgings as in college; the regulations are generally observed, *Shaw, Ev. p.* 186.

Some of the students reside in lodgings; highly desirable that they should be accommodated in college when possible, *J. Smith, Ev. p.* 192.

Number of sets of rooms in this college; number of students in lodgings; these houses are looked upon with so much disfavour that any one of whose conduct any doubt is felt is required to reside in college, *Swainson, Ev. p.* 196.

Several of the students reside in lodgings; the regulations are very loosely observed; students in the town are under far less rigorous control, and are exposed to greater temptations than those in college, *Wratislaw, Ev. p.* 216.

St. John's College:—

The regulations imposed on lodging-house keepers are not generally observed; the students are therefore exposed to greater temptations, *Hoare, Ev. p.* 168.

Magdalene College:—

A few of the students of this college reside in lodgings; no great evil arises out of it; the penalty falling on the keeper for infraction of the regulations is heavy; greater temptations in lodgings than in college; further inspection and discipline recommended, *Warter, Ev. p.* 203.

Report, 1852—*continued.*

Lodging Houses—continued.

2. *Digest of Answers to Queries, &c.*—continued.

Trinity College:—

The majority of the students of this college reside in lodgings; the regulations are generally observed; the students are not less under control, and are not subjected to greater temptations; a well-selected lodging is to be preferred to residence in college, *Blakesley, Ev. p.* 151.

A considerable proportion of the students in this college reside in lodgings; the majority of the lodging-house keepers discharge their trust with fidelity, but more supervision is, nevertheless, required; the control over the student is more complete in a lodging-house of respectability than in college, *Cooper, Ev. p.* 155.

A considerable proportion of the students are lodged in the town; regulations enforced; penalty for infraction; a large number of the lodging-house keepers are faithful to their trust; incessant watchfulness is required on the part of the deans, *Frere, Ev. p.* 161, 162.

Three-fifths of the students are in lodgings during Michaelmas term, and one-half during the rest of the year; conditions imposed on the keepers, how far observed; not much difference between the control exercised over students in lodgings and those in college, *Thompson, Ev. p.* 200, 201.

Students in lodgings, in general, are nearly as much under control as in college; are more so as to their hours than when in college; number of students belonging to this college residing in lodgings, *Whewell, Ev. p.* 208.

Emmanuel College:—

A great many of the students reside in lodgings; the lodgings are all licensed, and the college-gate bill is equally applicable, *Archdall, Ev. p.* 142.

Downing College:—

This college has very rarely any residents in the town, except fellow commoners, *Worsley, Ev. p.* 212.

Logic. Particulars as to the Barnaby logic lectureship, *Rep. p.* 48. 73.

Londisdale (*Westmoreland*). Bible clerkship at St. Catharine Hall restricted to natives of; annual stipend, *Phillpott, Ev. p.* 363.

London. Scholarships at Caius College, on the foundation of Dr. Caius, appropriated to natives of, *Rep. p.* 186.

London Tradesmen. Effect of the rules regulating the dealings between students and tradesmen in the town of Cambridge in causing the former to resort to London and other non-resident traders, *Rep. p.* 17——Indefinite credit is not given by London tradesmen till they are satisfied that the debtor has the means of payment, *Arlett, Ev. p.* 143; *Latham, Ev. p.* 170——College authorities have no control over the London tradesmen and money lender; legislative aid required, *Cooper, Ev. p.* 152; *Hildyard, Ev. p.* 165——There is no way of preventing tradesmen in London from giving credit, *Hughes, Ev. p.* 169——Some London tradesmen have established offices in Cambridge to receive orders; means of meeting them, *Latham, Ev. p.* 170.

Great difficulty of checking the supply of goods on credit by London tradesmen; measures suggested, *Philpott, Ev. p.* 180——Evils of the system of illicit dealing through the agents of London tradesmen; no control over this, *J. J. Smith, Ev. p.* 187——The effect of the University regulations for controlling credit is to throw business into the hands of London tradesmen, *Swainson, Ev. p.* 193——The University has and can have no control over London tradesmen, *Thompson, Ev. p.* 197——The danger from the London tradesman and Jew requires legislation, *Warter, Ev. p.* 201.

See also *Tradesmen.*

London and Blackwall Railway Company. Property belonging to the professorship of moral philosophy sold to, *Whewell, Ev. p.* 100.

London University. Effect of the institution of the University of London in lessening the number of medical degrees taken at Cambridge, *Rep. p.* 92.

Long, Dr. Exhibition at Pembroke College, founded by; amount of the allowance, *Ainstie, Ev. p.* 319; *Master and Fellows of Pembroke College, Ev. p.* 322.

Long Vacation:

Queries circulated by the Commissioners relative to the residence of students in college during the long vacation, and the regulations of discipline to which they are subjected; and also as to reading parties, and their results, *Ev. p.* 141——Digest of Answers to the foregoing in regard to the following colleges and halls; viz.

Report, 1852—*continued.*

Long Vacation—continued.

St. Catharine Hall:—

Students of this college have not hitherto been permitted to reside in college during the long vacation, but it has recently been determined to allow it; special permission will be required; regulation laid down, *Philpott, Ev. p.* 184.

Christ's College:—

Students are allowed to reside; permission is never withheld from a deserving student; regulations enforced, *Gunson, Ev. p.* 164.

Not desirable to encourage residence in college during the long vacation, though under certain circumstances it is conceded, *Hildyard, Ev. p.* 166——Students of regular conduct are frequently allowed to reside; special permission is required, *Shaw, Ev. p.* 186——Students are allowed to reside by special permission, *J. Smith, Ev. p.* 192——Students of good character are allowed to reside; strict attention to the college regulations is enforced; reading parties at a distance are preferable, *Swainson, Ev. p.* 196——None but scholars (who have a statutable right to do so) are allowed to reside without special permission; regulations enforced, *Wratislaw, Ev. p.* 216.

Corpus Christi College:—

The well-conducted and industrious reside in college with special permission, *Mould, Ev. p.* 177.

Downing College:—

In so small a society, it rarely happens that a student wishes to reside; the practice is discouraged, *Worsley, Ev. p.* 212.

Emmanuel College:—

Not within the walls of the college; some few remain in lodgings by special permission, *Archdall, Ev. p.* 142.

Gonville and Caius College:—

Students are allowed to reside on receiving special permission; the regulations are more stringent than in term, *J. J. Smith, Ev. p.* 190.

St. John's College:—

This vacation should be shortened by a month, and extend from the middle of June to the middle of September, *Merivale, Ev. p.* 175.

Magdalene College:—

Students of steady habits and good conduct are allowed, with special permission, to reside whenever a fellow remains in college, *Warter, Ev. p.* 203.

Pembroke College:—

Students are not permitted to reside in college; but are in the town, by special permission to those whose conduct has been unexceptionable, *Arlett, Ev. p.* 146.

Queen's College:—

Special permission is granted to deserving students; one of the tutors always resides, to enforce discipline, *Peill, Ev. p.* 179.

Trinity College:—

Strong objections to any curtailment of the long vacation, *Blakesley, Ev. p.* 150——Students who have proved themselves suitable persons by their place in the college examinations, &c., are allowed to reside, on obtaining special permission; they are subject to more stringent discipline than in term, *Cooper, Ev. p.* 154——Leave is not given, except under special circumstances; the discipline is much the same as in term time, *Frere, Ev. p.* 161——The indulgence is accorded to certain classes of students; regulations enforced, *Thompson, Ev. p.* 200——Permission is given only to students of the first class; a more extensive practice of residence would lead to great evils, *Whewell, Ev. p.* 208.

Trinity Hall:—

Special permission is required, and awarded only to diligent students, *Latham, Ev. p.* 173.

See also *Reading Parties.* *Vacations.*

Longsdon. Estate at, appropriated to the Jacksonian Professor, &c., *Master and Fellows of Trinity College, Ev. p.* 423.

Lord Almoner's Professorship of Arabic. Date of foundation of this professorship, *Rep. p.* 56——Amount of stipend, and from what source derived, *p.* 56. 73——There are no statutes, &c., regulating its duties, *p.* 56——Paucity of students attending the lectures, *ib.*

Report, 1852—*continued.*

Lord Almoner's Professorship of Arabic—continued.

No record of the origin of this professorship; no statutable requirements, *Robinson, Ev. p.* 92——Lectures at present given, *ib.*——Amount of the original endowment; not subsequently increased; no fees; present value of the professorship, *ib.*——In whom the appointment is vested, *ib.*——No library appropriated to the professorship; suggestion for the augmentation of the Oriental literature in the University library, *ib.*——Suggestions for an alteration in the professor's duties, and for increasing the number of students attending his lectures, *ib.*——A room at the Pitt Press assigned for the delivery of the lectures, *p.* 92, 93——The lectures are gratuitous, *p.* 93——No residence or rooms in college attached to the professorship, *ib.*

Lovett, Rev. Thomas. Exhibitions at Sidney Sussex College founded by; present annual value, *Phelps, Ev. p.* 431; *Master and Fellows of Sidney Sussex College, Ev. p.* 434.

Lowndean Professorship of Astronomy and Geometry. Date of foundation of this professorship, *Rep. p.* 63——List of the electors, *ib.*——Amount of the endowment; sources from which derived, *p.* 63. 71——Course of duty prescribed, *p.* 63——Difficulty of forming classes to attend the lectures, *p.* 64——Remarks on this head, *ib.*

Founded by Thomas Lowndes, of Overton (Chester), in 1748, *Peacock, Ev. p.* 121——Extract from his will relating to the professorship, *ib.*——Duties annexed; statutes drawn up by George, Earl of Macclesfield, *ib.*——No modification has taken place, *p.* 122——Duties performed by the present professor, *ib.*——Nature and amount of the original endowment; no subsequent augmentation; no fees, *ib.*——Present annual value, *ib.*——Names of the electors; no conditions of eligibility or tenability are enforced, *ib.*——No residence, museum, or library; collection of apparatus, *ib.*——Lectures given; those on practical astronomy are delivered by the Plumian professor, *ib.*

Lowndes, Thomas. Founder of the Lowndean Professorship of Astronomy and Geometry, *Rep. p.* 63; *Peacock, Ev. p.* 121.

Lucasian Professor of Mathematics. Date of foundation of this professorship, *Rep. p.* 57——Severe conditions of the deed of foundation; their character and requirements, *ib.*——Terms of the grant of Charles II., *ib.*——Justice and expediency of relaxing the disqualifying conditions, *ib.*——Present amount and sources of income of the professorship, *p.* 73.

Period of foundation of this professorship, and by whom established, *Stokes, Ev. p.* 93——Duties actually performed, *ib.*——Conditions of tenure of the professorship; restrictions as to holding offices, benefices, &c., *ib.*——Amount of fee taken from each person attending the lectures of the professor; annual produce thereof *ib.*——Present annual income of the professorship, *p.* 93, 94——No residence, museum, library, or apparatus is attached to the professorship, *p.* 94——The instruments employed in lecture are the private property of the professor, *ib.*——Subjects to which the lectures of the professor refer; opportunity of experimenting afforded, *ib.*——Inexpediency of altering the statutes relating to the professorship, *ib.*——The practice of registering copies of the lectures delivered by the professor has not been attended to since the time of Newton, *ib.*——Urgent necessity for a museum of physical instruments, *ib.*——Copy of the deed of foundation of the professorship, *p.* 95——Grant of Charles II., confirming the foundation, *p.* 96——Grant of Charles II., containing a dispensation to the professor to hold a professorship without taking Holy Orders, *p.* 97——Subjects on which the Lucasian Professor now lectures, which were formerly undertaken by the Plumian professor, *Challis, Ev. p.* 104. 106.

Lumley, Marmaduke, Bishop of Lincoln. Bequest by, to Queen's College library, *Dalton, Ev. p.* 358.

Lupton, Dr. Roger. Fellowships and scholarships at St. John's College founded by, *temp.* Henry VIII., *Rep. p.* 163. 194.

M.

Macartney, Dr. Price paid for his collection of anatomical specimens, *Rep. p.* 121——Works presented by, to the Anatomical Museum, *Clark, Ev. p.* 109.

Macclesfield, George, Earl of. Sketch of statutes drawn up by Lord Macclesfield for the regulation of the Lowndes' Professorship of Astronomy, *Peacock, Ev. p.* 121.

Macky's Journey through England. This work quoted, *Ev. p.* 36.

M'Coy, Professor. Arrangement of specimens in the Woodwardian Collection effected by, *Rep. p.* 122; *Sedgwick, Ev. p.* 118.

Report, 1852—*continued.*

MAGDALENE COLLEGE:

1. *Foundation of the College; Statutes and Interpolations therein.*
2. *Revenues and Expenditure of the College.*
3. *The Mastership.*
4. *Fellowships.*
5. *Scholarships.*
6. *Sizarships.*
7. *Lectures, &c.*
8. *Matriculations and Degrees.*
9. *Students; their Discipline and Expenses.*
10. *College Library.*

1. *Foundation of the College; Statutes and Interpolations therein:*

Interpolations in the statutes of the college, *Rep. p.* 151——Date of charter of foundation of this college; date of statutes; interpolations made in the statutes at a subsequent period to their compilation; questionableness of the legality of such interpolations; a revision of the statutes, after the example of several of the other colleges, is to be recommended, *Warter, Ev. p.* 403, 404.

2. *Revenues and Expenditure of the College:*

Gross income of the college at the present time, *Rep. p.* 196——Remarks on the measures taken by the college for running out beneficial leases, *p.* 198——Dividends of the college; net income paid annually to the master and fellows; addition thereto from a property left by Dr. Peckard; other emoluments accruing to the master, *Warter, Ev. p.* 404, 405——Account of the manner in which the college lost the Covent-garden property, *p.* 404.

3. *The Mastership:*

The right of appointment of master is vested in the owner of the house at Audley End, *Rep. p.* 153——Emoluments of the mastership, *p.* 155——Mode of appointment of the head fellows and scholars; qualifications requisite; restrictions upon the election thereto; conditions of tenure; length of residence required, and duties now performed; the latter not being in conformity with the statutes from the alteration of circumstances, *Warter, Ev. p.* 404.

4. *Fellowships:*

Number of foundation and bye-fellowships in this college, distinguishing whether open or restricted, *Rep. p.* 157——Value of a foundation fellowship, *p.* 167——The fellowships of Dr. Goch are now without any endowment, and have only a titular existence, *p.* 168——The incorporation of the bye with the foundation fellowships recommended, *ib.*——Travelling fellowship founded by Mr. Drury; the election is in the hands of the master; recommendations in regard hereto, *p.* 169——Academical standing required of candidates for fellowships, *p.* 170.

List of, and particulars relative to the bye fellowships, *Warter, Ev. p.* 405, 406——Advantage would arise from the removal of certain restrictions which now apply to some of the fellowships, &c., particularly in the case of the Millner scholarships, and the Norfolk travelling fellowship, *p.* 412——Reasons for which a consolidation of the smaller fellowships is not to be recommended, *p.* 413.

5. *Scholarships:*

Number of scholarships at this college; proportion thereof restricted or open, *Rep. p.* 194——List of, and particulars as to the scholarships and exhibitions, either incorporated or connected with the college, *Warter, Ev. p.* 406–408——Claimants have for years been wanting for many of the appropriated scholarships, but the college has been enabled, from the extension clauses, to treat them as open scholarships, *p.* 412.

6. *Sizarships:*

Number of sizars admitted at this college, *Rep. p.* 195——The sizars receive a small payment each time; there are four of them at this college; their appointment is claimed by the master, *Warter, Ev. p.* 411, 412——Provision under the Pepysian benefaction for the assistance of poor students, *p.* 412.

7. *Lectures, &c.*

The attendance on college lectures is compulsory, as far as possible; the staff of this or of any other college, is not sufficiently complete to provide for the entire course of public instruction, *Warter, Ev. p.* 201——Course of instruction given to students of this college, *p.* 408.

8. *Matriculations and Degrees:*

Number of students entered at Magdalene College in each year, ending 10 October 1844 to 1848, *Rep. p.* 145——Summary of the number of members of the college in

Report, 1852—*continued.*

Magdalene College—continued.

8. *Matriculations and Degrees*—continued.

1851, *Rep. p.* 145——Number of residents on 14 November 1851, *ib.*——Table showing the number of matriculations at this college in the years 1800, 1810, 1820, and 1830, and in each of the ten years 1840 to 1850, *Romilly, Ev. p.* 66——Similar table of the number of degrees of the several grades granted in the same periods, *p.* 67-70——Total number of degrees granted in the last eight years, *p.* 70——There is no statutable or other limit as to the number of members or students admitted, *Warter, Ev. p.* 408.

9. *Students; their Discipline and Expenses:*

Students are specially permitted to reside in college during the long vacation, if a fellow remains, *Warter, Ev. p.* 203—— A few of the students belonging to the college, reside in lodgings in the town, *ib.*——Hours of Divine service in the college chapel, and attendance required thereat from undergraduates, *p.* 408——Attendance required of students at the college lectures, and at dinner in the hall, *ib.*——Hours at which students are required to be in college, or in their licensed lodgings at night, *ib.*

Regulations for the restriction of credit given to students; these regulations, however, are evaded by a resort to London tradesmen; the only remedy would be an Act of Parliament, *Warter, Ev. p.* 409——Detailed statement of the necessary expenses of the second classes of students, *p.* 409-411——Average expense of the several classes of students, *p.* 412——Remarks relative to the reduction of the expenses of college residence, *ib.*

10. *College Library:*

Valuable return of the Pepysian library provided at this college; building in which deposited, *Rep. p.* 134——Three libraries are united in that of the Magdalene College; the original foundation one, the Peckard, and the Pepysian; particulars as to each collection, *Bright, Ev. p.* 413——Deserving undergraduates are allowed to sit and read in the library, *ib.*——There is no special fund for the support of the library, the college occasionally buying books, *ib.*

Magnetical Observations. Offer made to the observatory of apparatus for conducting, declined on account of the expense of erecting a building for its reception, *Challis, Ev. p.* 107.

Maim and Felony. Cases of, excepted from the jurisdiction of the Vice-Chancellor's Court, *Rep. p.* 4. 9——The trial thereof committed to the high steward, in practice, has become a mere nominal power, *p.* 9.

Maine, H. J. Sumner, L. L. D., Regius Professor of Civil Law. (Analysis of his answers to Queries.)

[*Queries as to the Professorships:*]

Period of foundation of the Regius Professorship of Civil Law, *Ev. p.* 77——Duties annexed by the statutes, *ib.*——Subject of the lectures, *ib.*——Duties actually performed, *ib.*——Original endowment and present income, *ib.*——Fees, *ib.*——Mode of appointment, *p.* 78——Residence, *ib.*——Exercises required for degrees in law, *ib.*——Subjects of examinations and course of study, *ib.*——General condition of the study, and reasons for which the lower degrees are sought, *ib.*——Suggestions for the improvement of the study, *p.* 78, 79——Inadequacy of income, *p.* 79——Evils arising from fees on degrees, *ib.*——Copy of the notice published by the professor, as a guide to persons desirous of proceeding in law, *p.* 80.

Maine, Dr. Letter from, dated 6 November 1850, in answer to circular of Commissioners of 30 October, *Corr. p.* 9.

Mainwaring, J. Books and MSS. given by, to the library of St. John's College, *Tatham, Ev. p.* 403.

Maitland Prize. Particulars as to this prize, *Ainslie, Ev. p.* 27.

Maldon (Essex). Exhibition at Christ's College on Plume's foundation, open to students from, *Cartmell, Ev. p.* 381; *Master and Fellows of Christ's College, Ev. p.* 393.

Manchester School. Scholarships at St. John's College, on the Duchess of Somerset's foundation, open to students from, *Rep. p.* 194.

Manistre, Rev. John. Bequest made by, to the University Library, *Rep. p.* 128——Annual income derived from the Manistre Fund; particulars as to its administration, *Power, Ev. p.* 53.

Manners, Hon. Roger. Scholarships at Corpus Christi College, founded by, in 1559, *Rep. p.* 188.

MSS.

Report, 1852—*continued.*

MSS. Use made by students of MSS. containing problems, &c., as adjuncts to books, *Gaskin, Ev. p.* 229——Abuse to which the use of MSS. is subject, *Hopkins, Ev. p.* 244——Extent to which MSS. are in use, *Peill, Ev. p.* 254——Formerly most lecturers and private tutors taught from MSS.; at the present time, however, mathematical works are so abundant that both MSS. and private tuition might be dispensed with, *Phelps, Ev. p.* 257——Reason of the discontinuance of the use of MSS.; objections to their use, *Philpott, Ev. p.* 263——Regulations made by the senate to discourage the use thereof, *ib.*——Power of the moderators and examiners to discourage their use, *ib.* ——Use made of MSS.; the system of instruction by their means is part of the system of private tuition, *Stokes, Ev. p.* 267 c——The use of MSS. is not carried to an injurious extent; their use promotes exactness of study, but diminishes the amount of reading, *Swainson, Ev. p.* 269——Impossibility under existing circumstances of superseding their use, *ib.*——*See* also *Books.*

Mapletoft, Dr. Robert. Allowance for an exhibition at Pembroke College given by, *Ainslie, Ev. p.* 319; *Master and Fellows of Pembroke College, Ev. p.* 322.

MASTER OF ARTS, DEGREE OF:

Admission to this degree should not be rendered more difficult than at present, *Rep. p.* 29——The present interval of three years should be preserved, *ib.*——Dispensing power possessed by the University of admitting a Master of Arts to the degree of D.D., *per saltum, Rep. p.* 30, 31——Ceremony of creation gone through after admission to this degree; oath taken, *Rep. p.* 39.

Report, 1852—*continued.*

Master of Arts, Degree of—continued.

Statement of the residence, studies, exercises, and examinations prescribed by the Elizabethan statutes for this degree, *Ainslie, Ev. p.* 23——Comparison with the present actual practice, *p.* 29——The statutes allow the degree of M. A. to be conferred on a nobleman, or son of a nobleman, although he may not have complied with the usual conditions, *ib.*——Present regulations of the University on this point, *ib.*——By a letter of Charles II., in 1679, the degree may be conferred on a baronet or knight without compliance with the usual forms, *ib.*

Statement of fees paid on admission to the degree, *Ainslie, Ev. p.* 33——Fees paid by noblemen on proceeding to this degree, *ib.*——Amount of stamp duty paid to Government, *Romilly, Ev. p.* 63——Table showing the number of degrees of this grade conferred in the years 1800, 1810, 1820, and 1830, and in each of the years 1840 to 1850, distinguishing the several colleges, *p.* 67–70.

Masters of Colleges. See *Heads of Colleges.*

Masters' History of Corpus Christi College. Referred to, *Rep. p.* 159. 188.

Mathematical Prizes. Particulars as to the mathematical prizes afforded by the University. *Rep. p.* 24.——*See* also *Adams' Prize. Smith's Prize.*

Mathematical Studies:

1. *Resumé of the present State of Mathematical Study in the University.*
2. *General Summary of the Evidence on this subject received by the Commissioners.*
3. *Queries issued respecting Mathematical Studies and Examinations.*

1. *Resumé of the present State of Mathematical Study in the University:*

The present state of these studies one of great progress, *Rep. p.* 105——High reputation ever maintained by Cambridge as a mathematical University, *ib.*——Evidence proving the study to have been greatly progressive *p.* 105, 106——Abundant room, nevertheless, for ameliorations; viz. 1st. In respect of the selections of portions of the general body of the science and the rejection of superfluities, *p.* 106——Origin of the present Board of Mathematical Studies, *p.* 106, 107——Reports made by that Board adverted to, *p.* 107——Principles of rejection laid down therein, *ib.*——Opinion of the Commissioners that all changes and improvements may be safely left to the University itself, *p.* 108.

Secondly, in the mode of communicating the knowledge to be acquired; possible improvements that may be effected, *Rep. p.* 108——The present system of college lecturing is defective, and has led to private tuition with its attendant evils, *ib.*——Outline of the changes which have taken place in the system of examinations, *p.* 108–110——Vices of the examinatton system; recommendations in regard thereto, *p.* 110——Evils of "cramming," *ib.*——Report at the entire abandonment of the oral or *vivâ-voce* examination; evidence bearing on this point, *p.* 110, 111——Recommendations of the Commission, *p.* 111.

Thirdly, in what manner and to what extent the beneficial influence of mathematical study in the education and discipline of the mind is secured by the mathematical training adopted in the University, *Rep. p.* 111——Great value to be attached to the oral exposition of general principles by lecturers or professors, *p.* 112——Undue tendency formerly to analytical processes and the dextrous use of symbols; this has been corrected since 1848, *p.* 112,113——The analytical and geometrical methods compared, *p.* 113——Influence of the mathematical prizes on the mathematical reading of the student, *p.* 114——Expediency of postponing the examination for the Smith's prize, for one or two years, or until the M. A. degree, with the view to keeping up the inducement to mathematical study, considered, *ib.*

2. *General Summary of the Evidence on this subject received by the Commissioners:*

Doubts whether professional lectures on pure mathematics are effective as part of the general system, *Stokes, Ev. p.* 99——The present system too abstract and exclusive of the propositions and processes of reasoning required by the actual demand of science, *Challis, Ev. p.* 107——No adequate provision for a complete and systematic course of lectures on mathematics, and their applications to natural philosophy, *Miller, Ev. p.* 135——Grounds on which the study of mathematics is admitted into the Cambridge educational system, *Ellis, Ev. p.* 222, 223——Effect produced on the mind by mathematical studies, *p.* 223——An important constituent of which is the enlargement of the student's sphere of intuition, *ib.*——But his progress must mainly be measured by the degree in which he attains to a complete intuition to the results which he is able to prove, *ib.*——Degree in which these considerations should be taken as a guide in inquiring into the merits and defects of a mathematical course of study, intended to form part of a liberal education, *ib.*——Circumstances which must influence any conclusions on this subject, *ib.*——Alterations that might advantageously be made in the choice of subjects of study, *ib.*——Remarks on the calculus of variations, and definite and elliptic integrals, *p.* 225.

Report, 1852—*continued.*

Mathematical Studies—continued.

2. *General Summary of the Evidence on this subject, &c.*—continued.

From 1832 to 1847, there was a tendency in the mathematical course to become increasingly symbolic and analytical; the regulations of 1848 have checked this tendency, *Gaskin, Ev. p.* 229——Inducements to prosecute mathematical studies after attaining the B. A. degree, *p.* 230——The institution of prizes, similar to this, would contribute to the continued and progressive study of mathematics and natural philosophy, *ib.*——Tendency of mathematical study to become exclusively analytical and symbolic; checks opposed to this tendency, *Goodwin, Ev. p.* 237——Nature of indirect encouragement given to mathematical reading, *ib.*——Impediments to the prosecution of mathematical studies after attainment of the B. A. degree, *p.* 238——Limited encouragement offered for the prosecution of mathematical study after the B. A. degree; means by which this might be remedied, *Hind, Ev. p.* 239.

There is no tendency in the present course of mathematical study to become exclusively analytical and symbolic, *Hopkins, Ev. p.* 244——The present system, both of reading and examining, has a tendency to fix the mind too much on the mere use of mathematical symbols; written questions and answers on the examinations will always tend to this end, *ib.*——Absence of inducements to the study of mathematics after the B. A. degree, *p.* 247——Any external interference with the mathematical course of study, or the conduct of the examinations is not to be recommended, *Mathison, Ev. p.* 249——Hardly any motive for continuing mathematical studies after the B. A. degree is held out by the University, *Mould, Ev. p.* 252——Circumstances at present militating against the ultimate prosecution of mathematical studies, as a profession, *ib.*——Scheme by which these obstructions might be obviated, *ib.*——Exposition of the present system of mathematical teaching at the University, *Phear, Ev. p.* 255.

Provisions made from time to time by the senate, for preventing the course of mathematical study from becoming too exclusively analytical and symbolic, *Philpott, Ev. p.* 263, 264——Existing inducements for the continuance of mathematical studies after the B. A. degree, *p.* 265——Tendency of the mathematical course of study, as determined by the examiners to become increasingly analytical and symbolical in character; few students derive any advantage, *Steventon, Ev. p.* 266——The mathematical course is decidedly more analytical now than formerly, *Stokes, Ev. p.* 267 *d*——Remarks suggestive of the best method of study, *ib.*——Indirect inducements arising in the University for the continuance of the study of mathematics after the B. A. degree, *ib.*——The number of subjects required to be studied is not greater than may be mastered by students of fair abilities; circumstances to be considered in diminishing their number, *Swainson, Ev. p.* 268, 269——Inducements for the continuance of mathematical study after the B. A. degree; favourable influence of the fellowship examination at Trinity College in this respect; considerations involved in the institution of similar examinations at other colleges, *p.* 270——Limited character of the inducements held out by the University for the continuance of study after B. A. degree; the changes suggested by the Commissioners would be productive of a favourable effect in this respect, failure of the present essay prizes in accomplishing the desired result, *Thompson, Ev. p.* 271.

3. *Queries issued respecting Mathematical Studies and Examinations:*

Queries circulated by the Commissioners respecting the mathematical studies and examinations of the University, *Ev. p.* 220, 221——Answers thereto from the following mathematical tutors and lecturers and the moderators and examiners for the past ten years: viz.: Rev. J. Cooper, fellow and tutor of Trinity College, *Ev. p.* 222——R. L. Ellis, late fellow of Trinity College, *p.* 222–226——Rev. T. Gaskin, late fellow and tutor of Jesus College, *p.* 226–236——Rev. H. Goodwin, late fellow of Gonville and Caius College, *p.* 236–238——Rev. J. Hind, late fellow of Sidney Sussex College, *p.* 238, 239——W. Hopkins, president of the Geological Society, *p.* 239–249——Rev. W. C. Mathison, fellow of Trinity College, *p.* 249, 250——Rev. J. G. Mould, fellow and tutor of Corpus Christi College, *p.* 250–254——Rev. J. N. Peill, fellow and tutor of Queen's College, *p.* 254——J. B. Phear, fellow of Clare Hall, *p.* 255——Dr. Phelps, master of Sidney Sussex College, *p.* 256–258——Dr. Philpott, master of Catherine Hall, *p.* 258–266——Rev. E. H. Steventon, late fellow of Corpus Christi College, *p.* 266, 267——G. G. Stokes, Lucasian professor of mathematics, *p.* 267–267 *e.*——Rev. C. A. Swainson, fellow and tutor of Christ College, *p.* 267 *e*–271——Rev. W. H. Thompson, fellow and tutor of Trinity College, *p.* 271——Dr. Whewell, master of Trinity College, *p.* 271–274.

Report, 1852—*continued.*

Mathison, Rev. W. C., m.a., Fellow of Trinity College. (Analysis of his Answers to Queries.)

[*Queries as to Mathematical Studies and Examinations:*]

Any external interference with the mathematical course of study, or the conduct of the examinations, is not to be recommended, *Ev. p.* 249——Beneficial tendency of the changes effected in 1848 in the examinations for mathematical honours, *ib.*——Curtailment of the book-work question recommended by the Mathematical Board in 1849, and since made, *ib.*——The Board has only power to make recommendations, but these recommendations are generally adopted, *ib.*——The recommendations of the Board in June 1850, as to a limitation of the subjects of examination are to be approved of, *ib.*——There are no grounds for a reduction of the number of problems, *ib.*——Private tutors are generally considered desirable, but not indispensable; important service rendered by them in their present capacity; manner in which their influence would be diminished if they received any official character, *ib.*——Expenses of private tuition, *p.* 250——Objections to the institution of examinations at a later period than the present B.A. degree, *ib.*

Matriculation:

1. *Nature of this Form.*
2. *Statistics of Matriculations and of the Fees payable thereon.*
3. *Digest of Evidence on the Subject of the Admission Examination at each College, and also as to whether desirable to institute a General University Matriculation Examination.*

1. *Nature of this Form:*

In what matriculation consists; is strictly enforced, *Rep. p.* 20——Oath required by the ancient ordinances of the University to be taken by the students on matriculation; this is now converted into an affirmation, *p.* 38——No other engagement or test is required at matriculation, *ib.*

2. *Statistics of Matriculations and of the Fees payable thereon:*

Annual average income derived from fees on matriculation, *Rep. p.* 139——The fees payable were raised on 1st June 1825, *ib.*——And again on 2d November 1842, *ib.*——Table of fees paid on matriculation, *Ainslie, Ev. p.* 32——Amount of stamp duty paid to Government on each matriculation, *Romilly, Ev. p.* 63——Average annual produce of the duties, *ib.*——Average annual number of matriculations; number in 1850, *p.* 65——Average annual payment to the University chest and to the registry, *ib.*——Table showing the number of matriculations at each college in each of the years 1800, 1810, 1820, 1830, and 1840 to 1850, distinguishing noblemen, fellow commoners, pensioners, and sizars, *p.* 66——Augmentation of the fees in 1825 and again in 1842, *p.* 71——Objection to the tax now paid to Government on matriculation, *Babington, Ev. p.* 453.

3. *Digest of Evidence on the Subject of the Admission Examination at each College, and also as to whether desirable to institute a General University Matriculation Examination:*

Queries circulated by the Commissioners as to any examination of students previous to admission or matriculation; whether such an examination conducted by the University would be desirable, and the probable effect of such an examination, *Ev. p.* 141——Answers to the foregoing in regard to the following colleges and halls, viz.:

Pembroke College:—

No general examination by the college; students are admitted on the certificate of a M.A., and are examined by the tutor on coming to reside, *Arlett, Ev. p.* 145——An admission examination conducted by the University would produce no good effect whatever, *ib.*

Gonville and Caius College:—

An entrance examination is essential to the efficacy of college ectures; cases in which a general entrance examination would be objectionable, *Crowfoot, Ev. p.* 158.

No examination at this college, except the nominal one by a M.A., which is utterly valueless; great value of a University examination previous to matriculation; if confined to a college, it would entirely destroy the effect, *J. J. Smith, Ev. p.* 189.

Trinity Hall:—

No actual examination at this college; a certificate is required from a M.A. that he has examined the candidate, *Latham, Ev. p.* 172——A slight entrance examination would be beneficial; general principles on which it should be conducted, *ib.*——The expense would be a serious charge on the University; this might be met, however, by the abolition of the Government tax, *ib.*

No

Report, 1852—*continued.*

MATRICULATION—continued.

3. *Digest of Evidence, &c.*—continued.

Corpus Christi College:—

No matriculation examination passed by students at this college; a certificate of competency signed by a M. A. is sufficient, *Mould, Ev. p.* 177——A matriculation examination, if established, should be conducted by the University; the expediency is doubtful, *ib.*——The establishment of a University examination prior to admission recommended, *Steventon, Ev. p.* 267.

Queen's College:—

Every candidate for admission is required to produce a certificate from a M. A., *Peill, Ev. p.* 178.

St. Catharine Hall:—

No examination at this college previous to admission; a certificate of a graduate of Oxford or Cambridge, that the candidate is properly qualified in point of learning for residence at the University is required, *Philpott, Ev. p.* 182——A proposal made in 1848 for the appointment of a syndicate for drawing up a plan for a general examination was rejected, *ib.*—— Such an examination would tend to lessen the number of under-graduates; other objections to it, *p.* 182, 183.

Christ's College:—

No examination of students previous to matriculation at this college; a general University examination would be an inestimable good, *Gunson, Ev. p.* 163——A general examination on admission conducted by the University on a low scale most desirable; plan on which it should be carried out, *Hildyard, Ev. p.* 165, 166.

No examination previous to admission at this college; the immediate effect of an examination conducted by the University would be a very great diminution of admissions, but it would stimulate preparation for the University, *Shaw, Ev. p.* 186——No examination previous to admission; a certificate of qualification from a M. A. is required in all cases; a general University examination would be beneficial if too much be not required; it would at first diminish the admissions, but eventually stimulate public and other schools, *J. Smith, Ev. p.* 192.

No admission examination at this college; a general University examination would be attended with almost unqualified good results; the number of admissions would not be affected more than five per cent.; it would act as a stimulant, *Swainson, Ev. p.* 195—— No examination at this college previous to admission; a general examination conducted by the University would be most desirable; all that is demanded at the present previous examination should be required; the result would be a temporary diminution of students, *Wratislaw, Ev. p.* 214, 215.

St John's College:—

No such examination at this college; a general examination is desirable; respects in which it would be advisable, *Hoare, Ev. p.* 168——A University matriculation examination would be desirable; it would diminish the number of students at first, but eventually would render it less necessary to pass the present number of terms before the B. A. degree, *Hughes, Ev. p.* 169——A general examination before matriculation would be advantageous; in what its advantages would consist, *Merivale, Ev. p.* 174, 175.

There is no matriculation examination at St. John's excepting for sizarships, *France, Ev. p.* 285——It would not be judicious to establish a University admission examination; such an examination would act in a manner not to be desired in the case of candidates for Holy Orders, *ib.*——Neither do schools require to be stimulated by such means, *ib.*

Magdalene College:—

The results of a general University examination would stimulate the public schools and provincial private tutors, *Warter, Ev. p.* 202.

Trinity College:—

An examination of a very elementary character is enforced upon first coming into residence at this college, *Blakesley, Ev. p.* 149—— A general admission examination by the University not desirable; reasons against it, *Cooper, Ev. p.* 154——Exceedingly difficult to regulate the proper standard of a University examination, besides being an interference with the essential rights of colleges, *Evans, Ev. p.* 159.

An examination of students previous to matriculation is held at this college; established in 1836; satisfactory results; has not had the effect of deterring students from applying for admission; a general University examination not likely to be equally useful, *Frere, Ev. p.* 161——The examination enforced at this college has not diminished the number of

Report, 1852—*continued.*

Matriculation—continued.

3. *Digest of Evidence, &c.—Trinity College*—continued.

applicants for admission; a general examination would require the selection of examiners of judgment, experience, and attainments; other points on which caution is expedient; its probable effects on the public schools, *Thompson, Ev. p.* 199——The initial examination at this college is attended with a good effect; respects in which useful; a University examination not to be recommended at present; probable result on the schools, *Whewell, Ev. p.* 207.

Emmanuel College:—

No examination previous to the admission of students to Emmanuel College: they are admitted on certificate of fitness from a M.A. of either University; a general University examination not desirable, *Archdall, Ev. p.* 142.

Downing College:—

Candidates are examined individually on applying for admission; the present system of each college examining its own students to be preferred to a University examination, *Worsley, Ev. p.* 210.

Other Evidence:—

Memorial of the College of Preceptors urging the authorization of a stringent matriculation examination before students be allowed to reside, *Ev. p.* 453.

1. *Studies and Exercises in this Faculty.*
2. *Condition of the Study; Objections to Cambridge as a Medical School answered.*
3. *Professorships.*
4. *Recommendations for the Improvement of the Faculty.*

1. *Studies and Exercises in this Faculty:*

Requirements of the statutes regulating degrees in physic; also actual practice: 1st. Bachelor of Physic, *Rep. p.* 35——2d. Doctor of Physic, *p.* 36——Qualifications required of candidates for the degrees in medicine, *Haviland, Ev. p.* 81——Outline of the proceedings in physic; course of study and examinations, *Fisher, Ev. p.* 126–130.

2. *Condition of the Study; Objections to Cambridge as a Medical School answered:*

General condition of this branch of study, *Haviland, Ev. p.* 81; *Bond, Ev. p.* 82, 83; *Fisher, Ev. p.* 126——Museum available for the students; practice afforded by the hospital, *Haviland, Ev. p.* 81.

Some of the colleges have fellowships devoted to persons pursuing the legal profession; recommendations in regard to this class, *Rep. p.* 170——Objections to the town of Cambridge as not offering wherewith to form a medical school answered, *Fisher, Ev. p.* 129——Comparison with London, *ib.*——In what the opportunities for the study of medicine at Cambridge consist, *ib.*——Observations hereon, *Rep. p.* 93, 94.

3. *Professorships:*

Particulars as to the Linacre professorship of medicine, *Rep. p.* 48——The like as to the Regius professor of physic, *Rep. p.* 52, *et seq.* 56; *Haviland, Ev. p.* 80; *Bond, Ev. p.* 82——Particulars as to the Downing professorship of medicine, *Rep. p.* 66. 72; *Fisher Ev. p.* 125——The professorship of chemistry, *Rep. p.* 58; *Cumming, Ev. p.* 102——The professorship of anatomy, *Rep. p.* 60; *Clark, Ev. p.* 107——The professorship of botany, *Rep. p.* 62; *Henslow, Ev. p.* 113.

4. *Recommendations for the Improvement of the Faculty:*

Suggestions of the syndicate for the revision of the statutes in regard to this faculty, *Rep. p.* 36, 37——Board of Medical Studies proposed by Dr. Haviland, *p.* 37——Organization, by Dr. Haviland, of the studies of medical students, *p.* 91, 92——

Severity

Report, 1852—*continued.*

Medicine, Faculty of—continued.

4. *Recommendations for the Improvement of the Faculty*—continued.

Severity of the examinations, *p.* 92——Failure of the regulations, nevertheless, to increase the number of medical students, *ib.*——Causes which have contributed to this failure, *ib.*——Revisions of the statutes proposed, *p.* 92, 93——Additional professorship of anatomy necessary, *p.* 93——Evidence of Dr. Fisher quoted in reply to the objection urged against Cambridge as a medical school, *p.* 93, 94——Means suggested for encouraging the resort of medical students to the University, *p.* 94——Exercises required for the medical degrees; modifications of which they are susceptible, *p.* 94, 95——Absence of any marks of honour to those medical students who pass with credit, *p.* 95——Also of any provision to assist medical students in the University, *ib.*——The Tancred studentships referred to, *ib.*——Inefficiency of the medical fellowships in certain colleges, *ib.*——Expediency of appropriating some of the emoluments of the University and colleges to the students in the medical sciences, *p.* 96——Importance of instituting medical scholarships, *ib.*——The Linacre professorship at St. John's College, *ib.*

Changes desirable in the course of medical study, *Haviland, Ev. p.* 81, 82——Suggestions for the improvement of the study, *Bond, Ev. p.* 83, 84——Mode by which these suggestions might be carried out, *p.* 84, 85——Proceedings in physic by graduates in that faculty, *p.* 85——A course of lectures on medical jurisprudence is desirable; Cambridge almost the only medical school of repute in Europe without such a chair, *Amos, Ev. p.* 124.

The time required for the B.M. degree is too long, and the general academical qualifications too limited, *Fisher, Ev. p.* 126——Best means of promoting the advancement of the study of medicine; scheme of study suggested, *p.* 128-130——How far the present medical professional staff is adequate to the requirements of a faculty of physic, *p.* 129, 130 *et seq.*

Suggestions for and programme of medical study adjusted to the general character of the proceedings in physic, which obtain in this University, viz. I. Elementary course: Human anatomy, *Fisher, Ev. p.* 130—Institutes of medicine, *ib.*—Materia medica and pharmacy, *ib.*—General pathology, *ib.*—Special pathology and therapeutics, *ib.*—Clinical instruction, *p.* 131—Morbid anatomy, *ib.*——II. Complementary course: Practical study of diseases, *p.* 131—Obstetrics, *ib.*—Application of medical knowledge to social purposes, *ib.*—General remarks, *ib.*—Period of study, *ib.*—Payments, fees, &c. *p.* 132.

See also *Addenbrooke's Hospital. Anatomy. Anatomy, Professorship of. Bachelor of Medicine. Boards of Studies,* II. 4. *Botany, Professorship of. Chemistry, Professorship of. Dissections. Doctor of Medicine. Downing Professorship of Medicine. Examinations,* VII. *Licentiate of Medicine. Linacre Professorship of Medicine. London University. Physic, Regius Professorship of.*

Mediæval Art. Absence of any provision in the University for teaching and illustrating mediæval art, *Rep. p.* 67, 68.

Melbourne, Lord. Scholarships at St. Peter's College in the patronage of, *Rep. p.* 185; *Cookson, Ev. p.* 308.

Members' Prizes. Particulars as to these prizes given by the University representatives; date when established, and value, *Rep. p.* 24; *Ainslie, Ev. p.* 27; *Wratislaw, Ev. p.* 299.

Memorial of the Town Council. Memorial addressed by the town council to the Commissioners respecting respecting the relations between the University and the town, *Rep. p.* 5——Copy of the memorial, *Ev. p.* 35 *et seq.*——Remarks of a syndicate appointed by the senate, upon the foregoing memorial, *Ev. p.* 41 *et seq.*

Merchant Tailors' School. Many valuable exhibitions, at Pembroke College for students from this school; how far injurious to the college to have so many students from one school attracted by the largeness of the allowances, *Rep. p.* 186; *Ainslie, Ev. p.* 320.

Scholarships at Pembroke College, on Dr. Stuart's and Rev. C. Parkins's foundations, restricted to students from; amount of the allowance and term of tenure, *Rep. p.* 186; *Ainslie, Ev. p.* 318.

Fellowship at St. Catharine Hall, on Holway's foundation, appropriated, in default of certain injunctions, to scholars from this school; stipend thereof; present practice, *Philpott, Ev. p.* 362. 366.

Fellowship at St. John's College founded by Dr. Dee, Bishop of Peterborough for scholars from, *Rep. p.* 164——Scholarships at the same college, on Wood's foundation, open to students from, *p.* 193.

Report, 1852—*continued.*

Merivale, Rev. C., M.A., late Fellow and Tutor of St. John's College. (Analysis of his Answers to Queries.)

[*Queries as to Expenses and Tuition:*]

The necessary expenses of students at the University cannot be materially reduced, *Ev. p.* 173——A stringent supervision, on the part of the college authorities, might effect some reduction, *p.* 174——Private tuition would be resorted to, notwithstanding any improvement in the professional system, *ib.*——The union of several small colleges, for the purposes of tuition, would enable them to compete with the large colleges, *p.* 174, 175——Objections to any abandonment of college tuition, *p.* 174——An improved standard of college and professional lecturers, and greater care in the examinations, would correct what is faulty in private tuition, *ib.*——The charges for private tuition might be lessened, *ib.*

Poor students ought to have encouragements held out to them, but not be separated into a clique of themselves; poverty, independent of ability, should not be a plea for election to fellowships, &c., *Ev. p.* 174——Halls for poor students ought to be tried, *ib.*——Desirableness of making the University a centre of educational establishments, *ib.*——Advantages of a general matriculation examination, *ib.*——A dissatisfaction with the present system of education at the University is the chief cause of a University life not being in favour, *p.* 175——Means by which the staff of lecturers might be made efficient, *ib.*——Badness of the present arrangement as to terms; plan for alteration thereof, *ib.*——General remarks, *p.* 175, 176——Suggestions for re-modelling the present system of classical examinations; for an increase of the classical professors and constitution of a Board of classical examination; manner in which the funds incidental to these arrangements might be obtained, *p.* 176.

Merton College (Oxford). Date of the statutes of this college; is ten years prior to the charter for the foundation of St. Peter's College in this University, *Rep. p.* 143.

Mesman, Daniel. Details as to the collection of paintings, drawings, and prints bequeathed by, to the University, *Rep. p.* 126——This is now placed in the Fitzwilliam Museum, *ib.*

Metcalfe, Robert, D.D. Sum of money given by, to the library of St. John's College, *Tatham, Ev. p.* 403.

Michael House. A foundation merged in Trinity College by Henry VIII., *Rep. p.* 150——The statutes of this foundation said to be the first given to any college in Cambridge, *ib.*

Michaelmas Term. See *Terms*, 3.

Michell, Mr. Formerly Woodwardian Professor of Geology, *Sedgwick, Ev. p.* 116.

Micklethwaite, Paul. Scholarships at Sidney Sussex College founded by; annual value, *Rep. p.* 195; *Phelps, Ev. p.* 430.

Middleton (York). Estate at, belonging to Trinity College, *Master and Fellows of Trinity College, Ev. p.* 423.

Middleton, Dr. Conyers. The first Woodwardian Professor of Geology, *Sedgwick, Ev. p.* 115.

Middleton Township (Westmoreland). Preference shown to natives of, as candidates for the Otway scholarships at Christ's College, *Master and Fellows of Christ's College, Ev. p.* 392.

Mildmay, Sir Walter. Emmanuel College founded by in 1584, *Archdall, Ev. p.* 425——Exhibitions at Christ's College founded by, *Cartmell, Ev. p.* 379; *Master and Fellows of Christ's College, Ev. p.* 392.

Mill, Rev. W. H., D.D., Regius Professor of Hebrew. (Analysis of his Answers to Queries.)

Date of foundation of the Regius Professorship of Hebrew, and name of founder, *Ev. p.* 90——Duties enjoined by the statutes, *ib.*——Extent to which the same are observed at the present time, *ib.*——Original endowment, *ib.*——Subsequent augmentations thereof, *ib.*——Present annual value, *ib.*——No extraneous sources of emolument, *ib.*——Particulars relative to the mode of appointment, and qualifications required, *ib.*——There is no library or museum, *ib.*——Opinion as to modification of duties, *ib.*——Present condition of this branch of study; desirableness of encouraging it, *p.* 90–92.

Mill, Dr. Remarks with reference to the discharge by Dr. Mill of his duties as Regius Professor of Hebrew, *Rep. p.* 50–52——Letter from Dr. Mill, dated 27 November 1850, in answer to circular of the Commissioners of 30 October, *Corr. p.* 10.

Miller, Mr. Scholarship at St. Peter's College founded by, in 1683, *Rep. p.* 185; *Cookson, Ev. p.* 308.

Miller,

Report, 1852—*continued.*

Miller, William Hallows, M.A., Professor of Mineralogy. (Analysis of his Answers to Queries.)

[*Queries as to the Professorships:*]

Particulars of foundation of the Professorship of Mineralogy, *Ev. p.* 133—— Duties annexed by the statutes, *ib.*——Duties actually performed, *ib.*——Original and present amount of endowment, *ib.*——No extraneous sources of emolument, *ib.*——Mode of appointment, *ib.*——No residence, *ib.*——The apparatus used is the property of the professor, *ib.*——Description of the museum, *ib.*——Deficiencies in the means of promoting the study, *p.* 134.

Statement respecting the lecture rooms of the University, *Ev. p.* 134——Lecture fees, *ib.*——Inadequacy of the provision for teaching mathematics and natural philosophy, *ib.*——Residences attached to professorships, *ib.*

Miller, Professor. Appointed professor of mineralogy by a Grace of the senate in 1832, *Rep. p.* 67——Remarks on the replies given by Professor Miller to the queries addressed to him, *ib.*——Particulars as to the lectures given by Professor Miller in the Mineralogical Museum, *p.* 123——Approval of his recommendations for the improvement of the museum, *ib.*

Millington, Dr. Fellowships at Magdalene College founded by, in 1724; annual value, *Warter, Ev. p.* 406——Exhibitions at the same college founded by, in 1724, *p.* 407.

Millington, Mr. J. Scholarships at Magdalene College founded by, in 1734; annual value, *Warter, Ev. p.* 407.

Millner, Mrs. Scholarship at Magdalene College founded by, in 1736, *Warter, Ev. p.* 407.

Millner, Rev. Thomas. Scholarship at Magdalene College founded by, in 1721; annual value, *Warter, Ev. p.* 407.

Milner, Dr. Isaac. One of the first holders of the Jacksonian Professorship of Natural and Experimental Philosophy, *Rep. p.* 65——Bequest to Queen's College library, *Dalton, Ev. p.* 358.

Mineralogical Museum. Particulars as to the museum attached to the professorship of mineralogy, *Rep. p.* 67——Locality of this collection; its origin, extent and requirements, *p.* 123——Recommendations in regard to the museum, *ib.*——Use made of the museum as a lecture room, *Stokes, Ev. p.* 97, 98——Contents of the museum; names of the principal donors, *Miller, Ev. p.* 133——Incomplete state of the collection, *p.* 134.

Mineralogy. Present state of the study of mineralogy at the University, *Miller, Ev. p.* 134.

Mineralogy, Professorship of. Period of foundation of this professorship, *Rep. p.* 66—— Large attendance given at the lectures of Dr. Clarke, *ib.*——Disputed appointment of Mr. Henslow in 1822; compromise entered into, *p.* 66, 67——Amount and source of emolument, *p.* 67. 73——Valuable museum of minerals, *p.* 67——Great want of a proper laboratory and apparatus, *ib.*

Date of foundation of this professorship, *Miller, Ev. p.* 133——Duties required to be and duties actually performed by the professor, *ib.*——Amount of the original endowment; present value, *ib.*——Mode of appointment; no conditions of eligibility or tenability, *ib.*——No residence is attached to the professorship, nor any apparatus, the instruments used being the private property of the professor, *ib.*——Contents of the museum; no funds for its enlargement, *ib.*——Students have no opportunities of conducting experimental researches, *p.* 134——No modification of the professor's duties can be suggested, *ib.*——Rooms used by the professor for his lectures, *ib.*——Fees payable by certain classes of students, *ib.*

Minors. Effect of the general law of the land preventing the recovery of debts contracted by a minor in restraining facilities of credit, *Rep. p.* 18——Expediency of extending this law to the case of all under-graduates, *ib.*

Missionary College. See *Colonial and Missionary College.*

Moderators. Origin of this term; their duties under the statutes; how now fulfilled, *Rep. p.* 22——Are nominated by the proctors, *ib.*——Annual amount received by the two moderators, *p.* 138——System of nomination of moderators; their duties in regard to the examinations, *Ainslie, Ev. p.* 32——Remuneration made to the moderators, *ib.*—— Annual amount derived from fees on degrees by the two moderators, *Romilly, Ev. p.* 64 ——Circumstances determining the appointment of moderators and examiners, *Hopkins, Ev. p.* 240.

Modern History. Recommendation that modern history be separated from the moral sciences tripos, and united with modern languages, to form a separate tripos, *Gunson, Ev. p.* 165.

Report, 1852—*continued.*

Modern History, Professorship of. Date of foundation of this professorship, *Rep. p.* 61 —— Stipend, and from what sources derived, *p.* 61. 72——Obligation imposed to maintain two teachers of modern languages, who were to instruct, gratuitously, twenty scholars to be nominated by the Crown, *p.* 61——Course pursued by the present professor (Sir James Stephen) on his appointment in 1849, *p.* 61, 62——Lectures delivered by him, *p.* 62——Connexion intended to be established between the professorship of modern history and the study of modern languages, *p.* 100——Studies this chair was designed to promote, *ib.*——Remarks as to the stipend, *p.* 101——Recommendation that the professor be relieved from the obligation to find stipends for two teachers of modern languages, *ib.*——Formal appointments of teachers of modern languages have occasionally been made by this professor, *ib.*——The professor delivers his lectures in Trinity Hall, *p.* 115——The stipend to the professor is chargeable on the hereditary revenues of the Crown; recommendation in regard thereto, *p.* 140.

The professorship was founded by Geo. I, in 1724, *Sir J. Stephen, Ev. p.* 111—— Duties of the professorship as defined by the letters patent; preceptors of modern languages required to be appointed; effect given thereto, *p.* 111, 112——Amount of the original endowment; present actual value, *p.* 111——Terms of appointment; conditions of eligibility; none of tenure of office, *ib.*——Collection of books attached to the library is inconsiderable; no fund available for its maintenance, *ib.*——Large attendance given at the lectures of this professor, *p.* 112——Requirement of the letters patent that the professor should appoint and pay preceptors of modern languages; effect recently given thereto, *ib.*——Royal scholars also required to be nominated for studying modern history and languages, *p.* 112, 113.

Letters patent for the creation of the professorship, *App. p.* 457——Letter of George I. to the University, dated 16 May 1724, respecting the foundation of the professorship, *p.* 459——Address of the University in reply, dated 19 May 1724, *p.* 460——Appointment of Samuel Harris to the professorship, *p.* 461——Letter from Lord Townsend to the Vice-Chancellor, dated 22 October 1724, sending the patent, *ib.*——Answer of the University to Lord Townsend, dated 23 November, *ib.*——Appointment of fifteen scholars for studying modern history, *p.* 462.

Modern Languages. Necessity for the addition of modern languages to the course of study, *Rep. p.* 26——Recommendation as to a knowledge of modern languages with modern history being required as a passport to the B. A. degree, *p.* 101——Means afforded for pursuing the study of modern languages, *ib.*——Requirements of the letters patent founding the professorship of modern history, that the professor should appoint two preceptors of modern languages; effect lately given thereto, *p.* 112——Also that twenty scholars be nominated by the Crown to study modern languages, *ib.*——The neglect of the study of modern languages a great defect; suggestion for constituting modern history and modern languages into a new tripos, *Gunson, Ev. p.* 165——Suggestion for the institution of an honour examination for the modern languages, *Wratislaw, Ev. p.* 216 —— Encouragement that should be given to the study of modern languages, especially German, *p.* 300.——*See* also *French Language. German Language.*

Money. Important changes in the observance and effects of many statutable regulations occasioned by the alteration in the last 300 years in the value of money, *Rep. p.* 152.

Money Lenders. Disreputable class of money-lenders in Cambridge; they regard discommuning with perfect unconcern, *Thompson, Ev. p.* 197——Difficulty of repressing the class of money-lenders who infest the University, *Cartmell, Ev. p.* 386.

See also *London Tradesmen.*

Montague, Edward. Scholarships at Sidney Sussex College founded by; annual value, *Rep. p.* 195; *Phelps, Ev. p.* 430.

Moore, Dr., Bishop of Ely. His library presented by George I. to the University, *Rep. p.* 127.

Moore, Mr. Collection of MSS. presented by, to Gonville and Caius College library, *Chapman, Ev. p.* 329.

Moral Discipline of the University. Is in a great measure sustained by the internal system of the colleges, *Rep. p.* 16——The University, apart from the colleges, not unmindful of its duties; its present regulations, *ib.*——Restraints on extravagance, *p.* 16–18——Supervision of lodging-houses, *p.* 18, 19——Hostels in connexion with colleges, *p.* 19.

Moral Philosophy. General condition of the study of moral pilosophy in the University; best means of promoting it, *Whewell, Ev. p.* 101.

Moral Philosophy, Professorship of. Date of foundation, and by whom founded, *Rep. p.* 57——Duties imposed by the original deed, *ib.*——Practice of the present professor (Dr. Whewell), *p.* 58——Income, and from what sources derived, *p.* 58. 73——This professor gives his lectures in the suite of rooms belonging to Trinity College, *p.* 115.

Date

Report, 1852—*continued.*

Moral Philosophy, Professorship of—continued.

Date of foundation of this professorship, and by whom founded and subsequently augmented, *Whewell, Ev. p.* 99——Duties annexed by the original foundation; duties actually performed, *p.* 100——Prizes offered by the present professor, *ib.*——Amount of the original endowment; augmentations thereof; present annual value, *ib.*——No fees asked or received; certain of the students will have to pay for future tickets when the new rules of the University come into operation, *ib.*——Mode of appointment, *ib.*——Opinion as to whether any, and what, modifications of the duties of the professorship are necessary or desirable, *p.* 101.

Moral Sciences Studies. According to the present arrangement, legal studies are included in the moral sciences tripos, *Rep. p.* 100——If increased authority were imparted to the system of legal studies, it would be convenient to separate them, *ib.*——Connexion intended to be established between modern history and modern languages, *ib.*——Particulars as to Mr. Wort's foundation for the maintenance of two travelling bachelors, *ib.*——Suggestion for its conversion into a professorship of the law of nations and diplomacy, *p.* 101——Suggestion for the institution of a Board of Moral Studies, *Whewell, Ev. p.* 101.——*See* also *Boards of Studies*, II., 5.

Moral Sciences Tripos. Establishment of this tripos; scope of the examination, *Rep. p.* 25——Number of examiners appointed to conduct the examination in this tripos, *Ainslie, Ev. p.* 32——Probable effect of the institution of the tripos, in increasing the number of law students, *Amos, Ev. p.* 123——Alteration required in the bearing of the moral sciences tripos, on the study of classical authors, *Worsley, Ev. p.* 298.

Moral Theology. See *Moral Philosophy, Professorship of.*

Morton, Thomas, Bishop of Durham. Books and MSS. given by, to the library of St. John's College, *Tatham, Ev. p.* 402.

Morland, Sir Samuel. MSS. given by, to the University library, *Power, Ev. p.* 56.

Morton, Cardinal. Scholarships at St. John's College founded by, *Rep. p.* 192.

Moses, William. Exhibitions at Pembroke College founded by; amount of the allowance, *Ainslie, Ev. p.* 319.

Mould, Rev. J. G., M.A., Fellow and Tutor of Corpus Christi College. (Analysis of his Answers to Queries.)

[1. *Queries as to Expenses and Tuition:*]

The necessary expenses of students cannot be materially diminished, *Ev. p.* 176——Inefficacy of any attempt to restrain the credit system, *ib.*——Lectures given at this college; classification of students adopted, *p.* 176, 177——Charges for private tuition; plan pursued by private tutors, *p.* 177——Class of men constituting private tutors, *ib.*——Any restriction of private tuition is not advisable, *ib.*——Number and value of the sizarships at this college, *ib.*——An institution for poor students only would be a thoroughly bad thing, *ib.*

Examinations at this college, *Ev. p.* 177——Students read too much with private tutors, *ib.*——There is no matriculation examination at this college, *ib.*——If a matriculation examination was established, it ought to be conducted by the University, *ib.*——A considerable part of the highest talent of the University is absorbed by the law; witness is not aware of college duties being declined as incompatible with the Christian Ministry, *ib.*——Staff of lecturers, &c.; limit fixed to the number employed, *ib.*——A reduction of the terms of residence might be made with advantage, *ib.*——Residence during vacation; expense the only objection to reading parties, *ib.*——No students of this college live in lodgings; the lodging system is a bad one, *ib.*

[2. *Queries as to Mathematical Studies and Examinations:*]

Two examinations, into both of which mathematics enter, are had of candidates for the B.A. degree, *Ev. p.* 250——General nature of the changes made in the examinations, *ib.*——Remarks upon the amount of knowledge requisite for obtaining the B.A. degree, or mathematical honours, *p.* 250, 251——Proportion of candidates taking mathematical honours, *p.* 251——The introduction of some *vivâ voce* questions into the B.A. examination would supply a means, at present wanting, of testing the quality of a candidate's knowledge, *ib.*

A limitation of the subjects of the examinations, as suggested by the Commissioners, has already been anticipated in the Report of the Board of Mathematical Studies of 3 June 1850; it would be desirable to add to the subjects excluded therein, that part of the undulatory theory respecting double refraction, *Ev. p.* 251——Description of books and MSS. in use at the University, *ib.*——The examination, as now carried on, is not too analytical and symbolical; objections to forcing geometrical methods on students

Report, 1852—*continued.*

Mould, Rev. J. G., Fellow and Tutor of Corpus Christi College. (Analysis, &c.)—*continued.*
more than is at present done, *Ev. p.* 251——Variable character of the problems; they are not too numerous, but are perhaps too difficult, and often dependent on special artifice, *ib.* ——Candidates for honours almost universally have private tutors; many might dispense with them, but for those who read high, it is all but necessary, *ib.*—— Educational standard of private tutors; manner in which students might be relieved of the expense of their services, *ib.*

Defects in the respective systems of college tutors and of private tutors, *Ev. p.* 251 ——Hardly any motive for continuing mathematical study after the B.A. degree is held out by the University, *p.* 252——The postponement of the Smith's prize, or the institution of prizes for graduates, would not promote this object in any material degree, *ib.* ——Circumstances at present militating against the ultimate prosecution of mathematical studies as a profession, *ib.*——Scheme by which these obstructions might be obviated, *ib.*——Copy of the Report of the Board of Mathematical Studies for 1850, *p.* 252–254.

Mountjoy House, Doctors Commons. Lease of, obtained by Trinity Hall, probably as a residence for civilians, *Geldart, Ev. p.* 334.

Mouse, Dr. William. Fellowship and Scholarship at Trinity Hall founded by, in 1586; value thereof, *Rep. p.* 182. 187; *Geldart, Ev. p.* 333.

Muniments (University). See *Registrary of the University.*

Münster, Count. Fossils from his collection purchased for the Woodwardian Museum, *Sedgwick, Ev. p.* 117, 118.

Museums. Particulars as to the present condition and requirements of the museums and collections attached to several of the professorships; viz.: the Anatomical Museum and lecture room, *Rep. p.* 119-121; *Clark, Ev. p.* 109——Botanic garden and museum, *Rep. p.* 121; *Henslow, Ev. p.* 113——Woodwardian Museum of Geology, *Rep. p.* 122; *Sedgwick, Ev. p.* 117——Mineralogical Museum, *Rep. p.* 123; *Miller, Ev. p.* 133, 134 ——Recommendations in regard to these collections, *Rep. p.* 123, 124——Fitzwilliam Museum, *p.* 124–127——Concluding remarks, *p.* 127——No museum attached to the professorship of botany; as "Walker's Reader in Botany," the present professor has a museum, with a small library and herbarium under his care, *Henslow, Ev. p.* 113——No museum attached to the Lowndes' Professor of Astronomy, *Peacock, Ev. p.* 122——A museum of natural history a desideratum, *Crowfoot, Ev. p.* 158.

See also *Anatomical Museum. Antiquities, Museum of. Botanic Garden, and Museum. Laboratories and Apparatus. Libraries. Mineralogical Museum. Natural History Museum. Physical Instruments. Woodwardian Museum of Geology.*

Music, Degrees in. Particulars as to the degrees in music conferred by the University, *Rep. p.* 37——Grounds on which musical degrees are chiefly sought, *Walmisley, Ev. p.* 137——Music not cultivated to any great extent in the University, *ib.*——A taste for the art is rapidly increasing, *ib.*

See also *Bachelor of Music, Degree of. Doctor of Music, Degree of.*

Music, Professorship of. Date of foundation of this professorship, *Rep. p.* 68——There is no endowment, *p.* 68. 73——Duties, *p.* 68——No lectures have been given hitherto; the present professor (Walmisley) intends giving them, *ib.*

Date of foundation of this professorship, and by whom founded, *Walmisley, Ev. p.* 136——Mode of election, *ib.*——No salary; emoluments from fees, *ib.*——Number of degrees in music granted in the last fourteen years, *ib.*——Copy of the Grace presented to the senate on the occasion of the appointment of the present professor, *ib.*——His duties, *p.* 136, 137——No lectures hitherto given, *p.* 137——Objects for which degrees in music are usually sought, *ib.*——Present state of the study; a taste for the art is increasing, *ib.*

N.

Natural History Museum. Such a museum a desideratum in the University, *Crowfoot, Ev. p.* 158.

Natural Sciences Studies, Board of. See *Studies, Board of.*

Natural Sciences Tripos. Recent institution of this tripos; its scope, *Rep. p.* 25——Number of examiners appointed to conduct the examination in this tripos, *Ainslie, Ev. p.* 32—— Additional labour cast upon the professor of anatomy by the establishment of the tripos, *Clark, Ev. p.* 109——The establishment of this tripos will render necessary new arrangements for future appointments to the botanical chair, *Henslow, Ev. p.* 114.

Report, 1852—*continued.*

National Society's Training Establishment (Chelsea). See *Mark's, St., College.*

Newcastle, Holles, Duke of (Chancellor of the University). Donation by, towards building the University library, *Power, Ev. p.* 50——Established in 1751 the gold medals given annually, known as the Chancellor's medals, *Wratislaw, Ev. p.* 299.

Newcome, John, D.D. Books given by, to the library of St. John's College, *Tatham, Ev. p.* 403.

Newman, Mr. Scholarship at Trinity College founded by; annual value, *Rep. p.* 194; *Master and Fellows of Trinity College, Ev. p.* 423.

Newmarket. Exhibition at Christ's College, on Tancred's foundation, for a native of; present annual value thereof, *Cartmell, Ev. p.* 379; *Master and Fellows of Christ's College, Ev. p.* 393.

Newton, Sir Isaac. Held the Lucasian Professorship of Mathematics, *Rep. p.* 57.

Nicke, Richard, Bishop of Norwich. Fellowship and scholarships at Trinity Hall founded by, in 1557, *Rep. p.* 182. 187; *Geldart, Ev. p.* 332.

Noblemen. Scale of fees payable by noblemen for college tuition, *Rep. p.* 82——Fees paid by a nobleman on matriculation, *Ainslie, Ev. p.* 32; *Romilly, Ev. p.* 63. 65. 71——Fees paid by noblemen on proceeding to the several degrees of M.A., L.L.D., and D.D., *Ainslie, Ev. p.* 33——Number of matriculations of noblemen in certain years, 1800 to 1850, at each college, *Romilly, Ev. p.* 66.

The statutes allow the degree of M.A. to be conferred on a nobleman, or the son of a nobleman, although he may not have complied with the usual conditions; actual regulations of the University, *Ainslie, Ev. p.* 29——Every nobleman at Trinity College pays 2*l.* 2*s.* per quarter for the benefit of the sizars, *Blakesley, Ev. p.* 148.

Non-Regent House. Constitution thereof, *Rep. p.* 13.——*See* also *Regent House.*

Norfolk County. Fellowships and scholarships at the several colleges open to natives of this county, viz.: *St. Peter's College:* On Dr. Perne's foundation, *Cookson, Ev. p.* 308.——*Gonville and Caius College:* Fellowships on Dr. Caius' foundation, *Rep. p.* 158; *Chapman, Ev. p.* 325. 329——On Wortley's foundation, *Chapman, Ev. p.* 326——Scholarships on Dr. Caius' foundation, *Rep. p.* 186—On Matthew Stokys' foundation, *Rep. p.* 187—On Dr. Belward's foundation, *Chapman, Ev. p.* 328. The master of this college required to be a native of Norfolk or Suffolk, *Chapman, Ev. p.* 325——*Corpus Christi College:* Fellowships on Archbishop Parker's foundation, *Rep. p.* 159; *Pulling, Ev. p.* 344——*Christ's College:* Exhibition on Clarke's foundation, *Cartmell, Ev. p.* 379; *Master and Fellows of Christ's College, Ev. p.* 393—On Rawlins' foundation, *Cartmell, Ev. p.* 379; *Master and Fellows of Christ's College, Ev. p.* 392—On Bunting's foundation, *Master and Fellows of Christ's College, Ev. p.* 392——*St. John's College:* Fellowship on Gregson's foundation, *Rep. p.* 162——*Magdalene College:* Fellowship on Drury's foundation, *Warter, Ev. p.* 406.

Norfolk, Duchess of. Scholarship founded at Corpus Christi College, out of a benefaction of, *Rep. p.* 188.

Normanby School (York). Freeston's exhibitions at Sidney College, open to scholars from, *Phelps, Ev. p.* 430.

Norris, John. Founded the Norrisian Professorship of Divinity, *Rep. p.* 64.

Norrisian Prize. Particulars as to this prize, *Rep. p.* 32; *Ainslie, Ev. p.* 27.

Norrisian Professorship of Divinity. Date of foundation of this professorship, *Rep. p.* 64——Amount of endowment, *p.* 64. 73——Mode of election, *p.* 64——Duties, *ib.*——Compulsory character of the attendance upon the lectures, *ib.*——Recommendation that the Norrisian professor be added to the examiners in the voluntary theological examinations, *Blunt, Ev. p.* 88.

North, Edward Lord. Scholarships at St. Peter's College founded by, in 1574, *Cookson, Ev. p.* 308.

Northampton, Marquis of. Collection of minerals presented by, to the Mineralogical Museum, *Miller, Ev. p.* 133.

Northamptonshire. Scholarships at Christ's College, on Sir Walter Mildmay's foundation, for natives of, *Cartmell, Ev. p.* 379; *Master and Fellows of Christ's College, Ev. p.* 392——Exhibitions at the same college, on Hawford's foundation, open to natives of this county, *Cartmell, Ev. p.* 379; *Master and Fellows of Christ's College, Ev. p.* 392——Scholarships at Sidney Sussex College, on Montague's foundation, open to natives of, *Phelps, Ev. p.* 430.

Report, 1852—*continued.*

Northumberland. Foundation fellowships at Christ's College, limited to natives of this county, *Rep. p.* 159; *Cartmell, Ev. p.* 372——Foundation scholarships at the same college, open to natives of the county, *Cartmell, Ev. p.* 375——Scholarship at the same college, on Patynson's foundation, limited to natives of Northumberland, *p.* 378.

Northumberland, the late Duke of (Chancellor of the University). Twenty feet refractor presented to the observatory by, *Challis, Ev. p.* 106——The Northumberland Equatorial was mounted in 1838, and has been worked with success, *Rep. p.* 59.

Norwich Cathedral. Canonry of, enjoyed by master of St. Catharine's Hall, *Philpott, Ev. p.* 361.

Norwich City. Scholarships founded by Dr. Caius, at Caius College, limited to natives of, *Rep. p.* 186——Other scholarships in the same college, founded by Dr. Gostlin, similarly limited, *p.* 187——The like scholarships founded by Matthew Stokys, *ib.*

Fellowships at Corpus Christi College, on Parker's foundation, similarly appropriated; emoluments and privileges, *Pulling, Ev. p.* 334. 344——Scholarships on Drury's foundation at the same college, *Master and Fellows of Christ's College, Ev. p.* 392——Exhibition at the same college, on Clarke's foundation, also open to natives of this city, *p.* 393.

Norwich Diocese. Particulars of the connexion between the diocese and Trinity Hall as founded by Bishop Bateman, *Rep. p.* 178 *et seq.*——Scholarship at Trinity Hall, on Maptyde's foundation, restricted to one born within the diocese, *Geldart, Ev. p.* 333——Scholarships at the same college, on Allen's foundation, similarly appropriated, *ib.*

Fellowships at Gonville and Caius College restricted to natives of the diocese, *Rep. p.* 158; *Chapman, Ev. p.* 325——Scholarship at Pembroke College, founded by Henry Carter, appropriated to natives of the diocese, *Rep. p.* 187——Similar scholarships founded by Peter Hewett, *ib.*

Norwich School. Exhibitions at Christ's College on Dame Drury's foundation, with a preference to students from, *Cartmell, Ev. p.* 378——Similar exhibition at the same college on Clark's foundation, *p.* 379.

Nottinghamshire. Fellowships at Christ's College limited to natives of, *Rep. p.* 159; *Cartmell, Ev. p.* 372——Scholarships at the same college similarly limited, *Cartmell, Ev. p.* 375.

Nubell Estate. Stipend of a fellowship at Magdalene College charged on, *Warter, Ev. p.* 405.

O.

Oakham School. Exhibitions at Sidney Sussex College on Johnson's and Lovett's foundation, open to students from, *Phelps, Ev. p.* 430, 431——Exhibitions at Emmanuel College, on Johnson's foundation, open to students from, *Master and Fellows of Emmanuel College, Ev. p.* 427.

OATHS:

1. *On Matriculation and Admission to Degrees.*
2. *Oaths taken by the Mayor, &c., of Cambridge before the Chancellor of the University.*

1. *On Matriculation and Admission to Degrees:*

Oath required by the ancient ordinances of the University to be taken by students on matriculation; this is now converted into an equivalent affirmation or promise, *Rep. p.* 38——Oath or affirmation required to be taken before admission to the degree of B. A., *ib.*——Academical oath taken on admission to a higher degree, *p.* 38, 39——Recommendation of the syndicate for the revision of the statutes that no academical oath be in future required of any person on admission to a degree, *p.* 39.

Oaths administered to a master of arts on creation, *Rep. p.* 39——Also to doctors in the several faculties, *ib.*——Recommendation of the syndicate to discontinue these oaths also, *ib.*

Subscription required before admission to a degree; origin thereof, and changes effected at different periods, *Rep. p.* 39-44——Relaxations of the form of subscription proposed by the syndicate, *p.* 43, 44——Importance of the question as to the admission of Dissenters to degrees; sense of the Commissioners hereon, *p.* 44——Oaths of allegiance and supremacy enforced by Act of Parliament before admission to degrees, *ib.*——Value of the information on this subject, furnished by Dr. Ainslie, of Pembroke College,

Report, 1852—*continued.*

Oaths—continued.

1. *On Matriculation and Admission to Degrees*—continued.

College, *Rep. p.* 44, 45——Reference to the evidence, &c., supplied by Dr. Whewell, of Trinity College, *p.* 45.

The oath to observe the statutes is enforced on all persons becoming members of the collegiate foundations, as distinguished from those who are only entered on the Boards of any of the colleges, *Rep. p.* 152——Recommendation of the syndicate for the revision of the statutes that no oath be required upon admission to a degree, *ib.*——Recommendation of the Commissioners that an alteration of a similar character might be extended to the collegiate statutes, *ib.*

Oath administered to the Plumian Professor of Astronomy, *Challis, Ev. p.* 105.

2. *Oaths taken by the Mayor, &c., of Cambridge before the Chancellor of the University:*

Oath administered to the mayor and bailiffs by the Vice-chancellor of the University; authority for this proceeding, *Rep. p.* 6; *Ev. p.* 35——The aldermen's oath, *Rep. p.* 6; *Ev. p.* 36——The oath for the four burgesses, *ib.*——The oath for two of every parish, *ib.*——Objections urged by the town to the administration of these oaths; answer thereto by the University, *Rep. p.* 6, 7; *Ev. p.* 41—— Recommendation of the Commissioners that they be discontinued, *Rep. p.* 7.

See also *Allegiance and Supremacy, Oaths of. Degrees,* 3. *Statutes,* 2.

Observatory, The. Observatory erected by the University in 1823, *Rep. p.* 59——The Plumian Professor of Astronomy appointed director, *ib.*——Particulars as to the observatory and its requirements, *ib.*——Duties of the Plumian Professor in regard to the observatory, *Challis, Ev. p.* 104. 106——Constitution and functions of the observatory syndicate, *p.* 104——Grants made from the University chest towards the support of the observatory, *p.* 105——The Plumian Professor resides rent free at the observatory, *ib.*——Library of astronomical works, *ib.*——Astronomical instruments attached to the professorship and belonging to the observatory; no available funds for the maintenance of apparatus, *ib.*

Opportunities of practical instruction and observation afforded to the students, *Challis, Ev. p.* 106——System of regular astronomical observations commenced at the observatory in 1828 by Professor Airy, *ib.*——Instruments now in use; observations carried on therewith; computations and calculations performed, *ib.*——Objections to the separation of the direction of the observatory; principal duties of the Plumian Professorship, *p.* 107——Means by which the efficiency of the observatory might be increased, *ib.*——Emoluments of the assistants; are too small, *ib.*——Offer made of apparatus for magnetical observations; the expense of erection of a building for its reception prevents its being accepted, *ib.*——Great importance of increasing the efficiency of the observatory, *ib.*

2. *Revenues and Expenditure:*

Gross income of the college at the present time, *Rep. p.* 196——Remarks on the measures taken by the college for running out beneficial leases, *p.* 197.

Gross income of Pembroke College, derived from lands, houses, and tithe-rent charges, deductions therefrom, and net income remaining, *Master and Fellows of Pembroke College, Ev. p.* 320, 321——Gross income derived from investments in the funds, Exchequer bills, and other securities, and from rents of rooms, fees, and charges *p.* 321——Total income from the above sources, deductions therefrom, and net income remaining, *ib.*——Expenditure of this net income, *p.* 321, 322——Statement of the emoluments annexed to the several scholarships and exhibitions of this college, *p.* 322, 323 ——All the beneficial leases of land granted by the college have expired; beneficial leases granted of houses, *p.* 323——Fund for augmentation of poor livings, *ib.*——The collegiate buildings have not been added to in recent years, *ib.*

3. *The Mastership:*

The power of choosing the master is vested in the fellows, *Rep. p.* 152——Source and amount of the emoluments of the mastership, *p.* 154——Mode of election of the master of Pembroke College; nature of oath taken by him; conditions upon which he holds office; duties assigned to him, *Ainslie, Ev. p.* 316, 317——The master is the ordinary of the chapel; he may appoint one of the fellows to be president of the college, or his *locum tenens, Ev. p.* 317——Provision made in the statutes for his stipend, *ib.*

4. *Fellowships:*

Number of foundation and bye-fellowships in this college, distinguishing whether open or restricted, *Rep. p.* 157——The Grindal fellowship is restricted to persons born in Cumberland or Westmoreland, and educated at St. Begh's grammar-school; this restriction considered a very great grievance to the college, *Rep. p.* 157; *Ainslie, Ev. p.* 319, 320 ——Value of a foundation fellowship, *Rep. p.* 167——Academical standing required of candidates for fellowships, *p.* 169.

Provision made in the revised statutes of the college in regard to the private property of fellows, *Rep. p.* 171——Number of Pembroke men for whom there were no vacancies at their own college elected to fellowships at other colleges from 1844 to 1848, *Arlett, Ev. p.* 145——Procedure adopted in the election of fellows; restrictions appertaining to fellowships; limitations as to their absence from college; their duties; each fellow has an independent vote in the election of the master, &c.; their stipends, *Ainslie, Ev. p.* 317, 318 ——Bye-fellowships, and conditions annexed thereto, *p.* 318.

5. *Scholarships and Exhibitions:*

Number of scholarships at this college; proportion thereof restricted; names of founders, and annual value, *Rep. p.* 186——Particulars respecting the election of scholars, *Ainslie, Ev. p.* 318——List of scholarships and exhibitions, together with the allowances and restrictions annexed thereto, *p.* 318, 319.

Number of sizars now admitted, *Rep. p.* 195——No provision for the maintenance of poor scholars on the ground of poverty only; exhibitions appropriated to sizars, *Arlett, Ev. p.* 144——The exhibitions are the main provision for poor students; the college

Report, 1852—*continued.*

Pembroke College—continued.

5. *Scholarships and Exhibitions*—continued.

consolidates the smaller ones; commons are allowed to Christ's Hospital scholars when admitted as sizars; deserzing sizars are sometimes rewarded from a fund formed from allowances not given to any scholar, *Ainslie, Ev. p.* 319.

Suggestion made by the college for the constitution of a competent authority for dealing with the appropriations to schools adverted to, *Rep. p.* 184, 185——Remarks as to a modification of the conditions attached to any of the fellowships, scholarships, &c., and as to extending the range of eligibility of scholarships, &c., *Master and Fellows of Pembroke College, Ev. p.* 323——No re-adjustment of the revenues applied to the maintenance of scholars and exhibitioners appears necessary, *ib.*——Modifications required in regard to the encouragement at present given for the resort of scholars from Christ's Hospital and the Merchant Tailors' School; no change is needed in the election to tenure of the foundation fellowships or scholarships, *Ainslie, Ev. p.* 319, 320——Statement as to the Ipswich scholarships, *ib. p.* 320.

6. *Matriculations and Degrees:*

Number of students entered at Pembroke College in each year ending 10 October 1844 to 1848, *Rep. p.* 145——Summary of the number of members of the college in 1851, *ib.* ——Number of residents on 14th November 1851, *ib.*——Table showing the number of matriculations at this college in the years 1800, 1810, 1820, and 1830, and in each of the ten years, 1840 to 1850, *Romilly, Ev. p.* 66——Similar table of the number of degrees of the several grades granted in the same periods, *p.* 67-70——Total number of degrees granted in the last eight years, *p.* 70——There is no admission examination; students are received on the certificate of a M. A., *Arlett, Ev. p.* 145——There are no regulations in the statutes as to the admission of students over and above the members of the foundation, *Ainslie, Ev. p.* 319.

7. *Lectures and Examinations:*

Subjects of the college lectures, *Arlett, Ev. p.* 143, 144——Subjects of the college examinations, and period at which held, *p.* 145——The staff of lecturers and tutors quite sufficient, *p.* 146 —— Subjects embraced in the college lectures; they always have reference to the University examinations; preparatory examinations; fellows alone give the college lectures, *Ainslie, Ev. p.* 319——Only one general examination is held, and that is at Easter; subjects of it; prizes, *ib.*

8. *Students, their Discipline and Expenses:*

Actual expenses of students at this college, *Rep. p.* 148; *Arlett Ev. p.* 143——Students are not allowed to reside in college during the long vacation; but are permitted in special cases to go to lodgings in the town, *Arlett, Ev. p.* 146——Some of the students (who cannot be accommodated in college) reside in lodgings, *ib.*——Hours of service in the chapel; the computation of a student's residence in the college excludes the days when he either was not at chapel, or present in the hall at dinner-hour, *Ainslie, Ev. p.* 319 ——Attendance of students at lectures and dinner, *ib.*——Necessary expenses, and actual expenses of a pensioner and of a sizar, *ib.*——No means of reducing the expenses of residence in the college, or of further restricting habits of extravagance, *ib.*

9. *The College Library:*

Number of volumes in the college library, *Rep. p.* 135——The treasurer and burser of the college have the care of the library, and the latter is librarian, *Brown, Ev. p.* 324—— There is a MS. catalogue; arrangement of the books, *ib.*——Funds for library purposes, *ib.*——Number and description of the books, *ib.*——Regulations respecting admission, *ib.*

Pennington, Sir Isaac. Bequests by, to St. John's College, *Rep. p.* 155; *Tatham, Ev. p.* 397. 399——Books given by, to the library of St. John's College, *Tatham, Ev. p.* 403.

Pensionaries. Existed in ancient times, as a species of adjunct to the colleges, *Rep. p.* 144.

Pensioners. Scale of fees payable by pensioners for college tuition, *Rep. p.* 82——Fees paid by a pensioner on matriculation, *Ainslie, Ev. p.* 32; *Romilly, Ev. p.* 63. 65. 71 ——Number of matriculations of pensioners in certain years, 1800 to 1850, at each college, *Romilly, Ev. p.* 66.

Pepysian Library (Magdalene College). Particulars of the Pepysian library at Magdalene College, *Rep. p.* 134; *Bright, Ev. p.* 413——Strict surveillance under which this collection is placed, *Power, Ev. p.* 60.

Permanent Syndicates. See *Syndicates.*

Perne, Dr. Fellowships at St. Peter's College founded by, in 1589; qualifications required of candidates; restrictions as to place of birth; mode of election; conditions of tenure, *Cookson, Ev. p.* 308——Scholarships at the same college founded by Dr. Perne in 1589, *ib.*

Report, 1852—*continued.*

Perquisites. College servants should be paid by fixed stipends and not by perquisites, *Rep. p.* 149.——*See* also *Servants of Colleges.*

Perry, Mr. Exhibitions at Trinity College founded by; present annual value, *Master and Fellows of Trinity College, Ev. p.* 423.

Perse, Stephen. Fellowships and scholarships at Gonville and Caius College founded by in 1615, *Rep. p.* 186, 187; *Chapman, Ev. p.* 326.

Peterborough School. Fellowship at St. John's College founded for scholars from, *Rep. p.* 164.

Peter, St., College (Peterhouse):

1. *Origin of this Foundation.*
2. *Revenues and Expenditure.*
3. *The Mastership.*
4. *Fellowships.*
5. *Scholarships.*
6. *Sizarships.*
7. *Matriculations and Degrees.*
8. *Lectures and Examinations.*
9. *Students, their Discipline and Expenses.*
10. *The College Library.*

1. *Origin of this Foundation:*

The earliest foundation at Cambridge is that of St. Peter; when and by whom established, *Rep. p.* 143.

2. *Revenues and Expenditure:*

Gross income of the college at the present time, *Rep. p.* 196——Remarks on the measures taken by the college for running out beneficial leases, *p.* 197.

Gross average annual income of this college derived from estates in land, from houses, and from tithe-rent charges, *Master and Fellows of St. Peter's College, Ev. p.* 312——Gross and net amount of income from these sources, and statement of deductions which constitute the difference between such gross and net income, *ib.*——Annual income from funded property, the rent of rooms in the college, fees and charges on members, and miscellaneous sources, *p.* 313——Total aggregate of gross income and of net income; and sources of income included in same, *ib.*——Statement as to the expenditure of the income, *ib.*

Sums received by the master out of the net income of the college in the years 1851 to 1845 inclusive, such sums being exclusive of certain other emoluments attached to his office, *Ev. p.* 313——Like statement as to sums received by a foundation fellow, *ib.*——Explanation as to the foregoing statements, *ib.*——There are no foundation scholars, *ib.*——Sums received by the bye-fellows on the Parke, Ramsey and Perne foundations, *ib.*——Sums received by the bye-fellows on the Gisborne foundation, and manner in which such amount is made up, *p.* 314——Sums received by the scholars on the several bye-foundations; the same person may hold several scholarships on different foundations *ib.*——Application of deductions for non-residence; statement as to stipends on bye-foundations, *ib.*

Exhibitions at this college, *Ev. p.* 314——Particulars as to the expenses of the table of the college-hall, *ib.*——Privileges allowed to the four sizars of this college, *ib.*——Amounts expended annually in the college repairs, in prizes for the encouragement of learning and in charities, *ib.*——Practice pursued as to granting beneficial leases, *ib.*——Amount of fund for purchase of advowsons, *ib.*——An addition was made to the college buildings in 1827, such addition being the Gisborne court, *ib.*——No alterations appear to be necessary as to the regulation of the scholarships and exhibitions so far as respects the localities from which claimants thereto may come, nor for a re-arrangement of the revenues of such scholarships, &c., *p.* 314, 315.

3. *The Mastership:*

Manner in which the election of master of this college is provided for, *Rep. p.* 152, 153; *Cookson, Ev. p.* 306——Stipend and allowances of the master; their amount, and source whence derived, *Rep. p.* 154; *Cookson, Ev. p.* 306——Objection to the union of a benefice in the church with the mastership, *Rep. p.* 156——Duties of the master; power to appoint a *locum tenens* during absence, *Cookson, Ev. p.* 306.

4. *Fellowships:*

Number of foundation and bye-fellowships in this college, distinguishing whether open or restricted, *Rep. p.* 157——Value of a foundation fellowship at this college, *p.* 167——Mode of election to the two Ramsey fellowships, *p.* 169——And to the Parke fellowships, *ib.*——Academical standing required of candidates for fellowships, *p.* 169, 170——Mode of election of the fellows; qualifications required; oath taken; conditions as to Holy Orders and celibacy, *Cookson, Ev. p.* 307—Requirement of the statutes as to

Report, 1852—*continued.*

Peter, St., College (Peterhouse)—continued.

4. *Fellowships*—continued.

residence, *Cookson, Ev. p.* 307——Studies to which fellows are expected to devote themselves; other duties appertaining to the office, *ib.*

Two of the fellows fill the office of senior and junior bursar; duties of that office; are annually appointed, *Cookson, Ev. p.* 307——One of the fellows fills the office of prælector; his duties and stipend, *ib.*——Statutes of the bye-fellows; they have no voice in the college affairs; no duties are enjoined, *ib.*——Particulars as to these bye-fellowships; by whom founded; mode of election and stipends, &c., *p.* 308——The chief restriction which obtains as to fellowships, &c., is that which prevents the election of any one into a foundation fellowship, who is of sufficient standing to take the degree of M. A.; opinion is much divided as to the expediency of reviving this limitation, *p.* 311——It would not be advantageous to consolidate any of the fellowships, scholarships, or exhibitions, *p.* 311, 312.

5. *Scholarships:*

Number of scholarships; proportion thereof restricted; amount of the endowment, *Rep. p.* 185——Number of scholarships; names and periods of foundation; conditions of tenure, *Cookson, Ev. p.* 308——There has been no default of claimants for the scholarships and exhibitions, *p.* 311——Scholarships at Magdalene College, on Wray's foundation, open to students from, *Warter, Ev. p.* 407.

6. *Sizarships:*

Number of sizars now admitted at this college, *Rep. p.* 195——The statutes of the college provide for eight poor scholars; these are represented by the sizars, *Cookson, Ev. p.* 311.

7. *Matriculations and Degrees:*

Number of students entered at St. Peter's College in each year, ending 10 October 1844 to 1848, *Rep. p.* 145——Summary of the number of members of the college in 1851, *ib.*——Number of residents on 14 November 1851, *ib.*——Table showing the number of matriculations at this college in the years 1800, 1810, 1820, and 1830, and in each of the ten years 1840 to 1850, *Romilly, Ev. p.* 66——Similar table of the number of degrees of the several grades granted in the same periods, *p.* 67–70——Total number of degrees granted in the last eight years, *p.* 70——Regulations respecting the admission of students, *Cookson, Ev. p.* 308.

8. *Lectures and Examinations:*

Course of collegiate instruction given to the students in each of the three years, *Cookson, Ev. p.* 309——Number of fellows employed in giving college lectures, *ib.*——Examinations held in each year; prizes awarded, *ib.*——Students in civil law and medicine, attend the professorial lectures and study privately, there being no lectures on those subjects, *ib.*

9. *Students; their Discipline and Expenses:*

Hours at which Divine service is performed in the chapel; attendance of students thereat, and how enforced, *Cookson, Ev. p.* 308——Discipline enforced respecting attendance at the college lectures and in the hall, and as to the hour when students must be within college or lodgings at night; also as to their expenses, *p.* 309——Estimate of the necessary college expenses of a fellow-commoner, pensioner, and sizar, *p.* 309, 310——Like estimate of actual expenses, *p.* 310——The necessary expenses of college residence cannot be materially diminished; influences which check habits of extravagance, *p.* 311.

10. *The College Library:*

Number of volumes in the college library, *Rep. p.* 135——The librarian is selected annually from among the fellows, *Cocker, Ev. p.* 315——Duties performed by him; no assistant librarian, *ib.*——There is a MS. catalogue of the library; manner in which the books are arranged, *ib.*——Average annual amount of the income of the library, and of the expenditure for books and binding, *ib.*——Amount of the librarian's stipend; the college provides from their general funds for the insurance of the books, and the repair of the substantial fabric of the library building, *ib.*——Number and description of the books; bequests and donations made to the library at different periods, *ib.*——Privilege of entering the library and borrowing books, *ib.*——Admission of strangers, *ib.*——Regulations respecting the library, *p.* 316.

Petyt, Sylvester. Exhibitions at Christ's College founded by; annual value, *Cartmell, Ev. p.* 380; *Master and Fellows of Christ's College, Ev. p.* 393.

Petyt, William. Bequest to Christ's College by, for the augmentation of scholarships, *Cartmell, Ev. p.* 378; *Master and Fellows of Christ's College, Ev. p.* 392.

Report, 1852—*continued.*

Phear, J. B., M.A., Fellow of Clare Hall. (Analysis of his Answers to Queries.)

[*Mathematical Studies and Examinations:*]

The private tutors have the principal conduct of the mathematical education; the suspension of the college lectures would involve little if any loss to the students, *Ev. p.* 255——Exposition of the present system of mathematical teaching at the University, *ib.*——Bearing which it has on the position of the private tutors, *ib.*——The private tutors are essentially necessary to the maintenance of a healthy state of education in the University, *ib.*——Importance of a public recognition of them, at the same time leaving intact their independent relation to the colleges, and of their pupils to them, *ib.*——Sphere of teaching to which the college lecturer might then confine himself, *ib.*——Suggestion that each lectureship be endowed with a fellowship, and a sum proportionate to the number of students in its class, and should be constituted a life appointment in the gift of the masters and fellows of the college, *ib.*——Candidates for degrees should rather receive a mental training than information, *ib.*

Phelps, Rev. R., D.D., Master of Sidney Sussex College. (Analysis of his Answers to Queries.)

[1. *Queries as to Mathematical Studies and Examinations:*]

The examination for mathematical honours is not more searching but more extensive than formerly, *Ev. p.* 256——Importance of the recent change limiting the three first days' examination to the elementary parts of the course, *ib.*——There is, perhaps, a preference for a wide range of subjects, rather than elementary questions, to be complained of in the mathematical tripos examination; probable causes of this tendency, *ib.*——Desire obtaining of late years to raise the standard of qualifications both for the common degree and the lowest mathematical honour; in both instances they are now sufficiently difficult, *ib.*——Number of students at Sidney Sussex College who have taken honours and degrees in the last ten years, *ib.*

The existing form of examination has resulted from the deliberations, at different periods, of syndicates appointed by the senate; the high standard of ability distinguishing these syndicates, and the success of their deliberations, suggests their fitness for devising further measures of educational progress, *Ev. p.* 256, 257——Manner in which the Board of Mathematical Studies acts on the course of University reading, *p.* 257——Objects of a University; degree in which they are understood or agreed in, *ib.*

Formerly most lecturers and private tutors taught from MSS.; at the present time, however, mathematical works are so abundant that both MSS. and private tuition might be dispensed with, *Ev. p.* 257——Eminent ability of many of the private tutors; to deprive the University of their services would be a subject for regret, yet there are reasons for considering the universal recourse of students to them as an evil, *ib.*——The adoption by the University of a settled course of mathematics would diminish private tuition, *ib.*——Manner in which the University might proceed to effect this, *p.* 257, 258——Nature of prizes that might be instituted for mathematical examinations, had after the first degree, *p.* 258.

[2. *Queries as to the Colleges:*]

Mode of election of the master and fellows of this college, qualifications required of them, and restrictions attached to their offices, *Ev. p.* 428, 429——Like particulars as to the scholarships, *p.* 429——Leave of absence from college residence permitted to the master, fellows, and scholars, *ib.*——Duties of the master and fellows, *ib.*——Mode of appointment of the college tutors, and duties performed by them, *ib.*——Amount of stipends to college officers, as fixed by the statutes, and sums received by them at the present time, *p.* 429, 430.

List and particulars of the different bye-foundations attached to this college, *Ev. p.* 430, 431——Statutable provisions as to pensioners; departure in present practice from these provisions, *p.* 431——Hours at which Divine service is performed in the college chapel; attendance at same expected from students, *ib.*——Course of collegiate instruction pursued, *p.* 431, 432——Number of examinations, and periods at which they are held; classification of students made after these examinations; prizes given, *ib.*——Relation which the collegiate instruction and examinations bear to the public examinations of the University, *p.* 432.

Attendance required from students at the college lectures, and at dinner in the hall, *Ev. p.* 432——Rule as to dinners being supplied to students in their own rooms, *ib.*——Hour at which the college gates are closed, and practice as to students coming in after that hour, *ib.*——Regulations enacted at different periods relative to the expenses of students; circumstances affecting this question, *p.* 432, 433——Estimates of the necessary expenses of the different classes of students, *p.* 433——Probable actual average expenses, *ib.*——The item of private tuition is excluded from these estimates; in no case is private tuition absolutely necessary, *ib.*

Report, 1852—*continued*.

Phelps, Rev. R., D.D., Master of Sidney Sussex College. (Analysis, &c.)—*continued*.

[2. *Queries as to the Colleges*]—continued.

The whole provision of the college in all its foundations, and in the spirit in which they are observed may be considered as for the maintenance and support of poor scholars, *Ev. p.* 433, 434——The admission of sizars is not statutably obligatory, but the practice now is to admit four, *p.* 434——Remarks as to existing facilities possessed by students to pass through a college residence with economy, *ib.*——The college authorities discourage, to the fullest extent, credit being given to students by tradesmen; and the only remedy to be suggested, in addition to those already in operation, would be the absolute prohibition of the use of wine and horses, *ib.*——Fellowships, &c. are better without restrictions or limitations, *ib.*

Phelps, Dr. Letter from, dated 13 November 1850, in answer to circular of the Commissioners of 30 October, *Corr. p.* 7.

Philological Studies. The importance of philological studies has been over-rated, *Amos, Ev. p.* 124.——*See* also *Comparative Philology.*

Philosophy. Course of instruction required by the statutes of Elizabeth to be given by the lecturer of philosophy, *Rep. p.* 20——Particulars as to the Barnaby philosophy lectureship, *p.* 48. 73——Changes which have taken place in the studies in natural, moral, and political philosophy, *Ainslie, Ev. p.* 26.

See also *Ancient Philosophy. Readerships of Philosophy, &c.*

PHILPOTT, REV. H., D.D., MASTER OF CATHARINE HALL. (Analysis of his Answers to Queries.)

[1. *Queries as to Expenses and Tuition:*]

Average annual expense of residence at Catharine Hall; it cannot practically be diminished, *Ev. p.* 179——Order issued in 1847 by the University authorities respecting debts contracted with vintners; control vested in tutors over transactions of students with tradesmen, *p.* 179, 180——Extent to which these restrictions are evaded by a resort to London tradesmen, *p.* 180——Lectures given at this college; classification of the students; attendance is compulsory, *ib.*——Staff of lecturers, *ib.*——Charges for private tuition, *ib.*——Class of gentlemen occupied in private tuition; plan pursued; extent to which resorted to, *ib.*——Objections to any restriction on private tuition, *p.* 180, 181.

Sizarships at this college, *Ev. p.* 181——Reasons why limited aid might beneficially be afforded to poor students, *ib.*——Objections to the establishment of any institution for poor students alone, *ib.*——Particulars relative to the college examinations, *p.* 181, 182——The examinations do not, by their number or difficulty, interfere with independent study, *p.* 182——The number of examination subjects might be reduced; private tuition is not a necessity in the majority of cases, *ib.*——Voluntary attendance on lectures unconnected with the examinations has diminished, *ib.*——There is no matriculation examination at this college, but a certificate of qualification is required, *ib.*——Objections to a general matriculation examination by the University, *ib.*

Causes that have operated in withdrawing men from University life, *Ev. p.* 183——The professors are more actively engaged in the education of students now than formerly, *ib.*——Increase in their emoluments from the fees consequently arising, *ib.*——This increase would admit of more assistants being engaged, *ib.*——The staff of tutors, &c. at this college is sufficient for the work, *ib.*——The terms might advantageously be reduced to nine; reasons in favour of retaining the first term, *ib.*——Inconvenience arising from the accumulation of students in the Michaelmas term, *ib.*——Suggested arrangement of the examinations in the event of an alteration of the terms, *p.* 183, 184——There are no grounds for shortening the vacations, *p.* 184——Objections to residence during half the term only, *ib.*——Conditions on which students of this college have recently been permitted to reside during vacation time, *ib.*——Reading parties are frequently formed, and are very beneficial, *ib.*——Lodging-house regulations; students in lodgings are, perhaps, under stricter control than when in college, *p.* 184, 185.

[2. *Queries as to Mathematical Studies and Examinations:*]

Mode and period of appointment of the examiners, qualifications required, period at which the examinations commence, manner in which they are conducted, their duration, subjects embraced in them, classification adopted of candidates for honours; several periods at which examinations for the B. A. degree are had, *Ev. p.* 258——Changes made at different periods in the time of the commencement of the examination of candidates for mathematical honours; and also in the interval between such commencement and the final publication of the list of honours, *p.* 258, 259——Like changes in the time allowed to candidates for answering questions, and in that allowed for answering the propositions from books and from problems, *p.* 259.

Classification

Report, 1852—*continued.*

Philpott, Rev. H., D.D., Master of Catherine Hall. (Analysis, &c.)—*continued.*

[2. *Queries as to Mathematical Studies and Examination*—continued.

Classification of candidates for honours practised formerly, such classification being determined by the exercises in the schools; alterations made herein prior to 1838, when the practice was discontinued, *Ev. p.* 259——Before 1827 the questions from books were proposed *vivâ voce* to candidates; at that period all the questions were directed to be in writing, with an exception in certain cases; this exception was omitted in the regulations of 1832, *ib.*——Method formerly pursued in determining the relative merits of candidates between whose ability it was difficult to decide, *p.* 259, 260.

The changes enumerated have had the effect of lengthening the duration of the examinations, and giving a preponderating portion of time to book questions, as compared with problems, *Ev. p.* 260——Objects proposed in printing all the questions and problems; degree in which the elementary parts of mathematics enter into every plan of examination, *ib.*——Changes made in, at different periods, and present nature of the mathematical examination of persons proceeding to the B. A. degree not being candidates for honours, *ib.*——General tendency of the alterations made from time to time in the examinations, *ib.*——Nature of the examination now passed by candidates for a common degree, *p.* 261.

No disposition has existed of late years to raise the standard of qualification for mathematical honours; the standard for the common degree was raised in 1837 and 1846, p. 261——Advantage of introducing *vivâ voce* questions into the examination, *ib.*——The number of questions required to be answered in the time allowed gives an undue advantage to quick writing and decision of thought, but experienced examiners obviate this by extending the time for answers, *ib.*——The object in putting so many questions into the problem papers is to afford candidates a full opportunity of selection; it is not politic to fetter the discretion of the moderators in this matter, *ib.*——Satisfactory working of the questions proposed in examinations for some years past, *p.* 262.

Intention of the appointment of the Board of Mathematical Studies, *Ev. p.* 262——Duties assigned to the Board, *ib.*——Its powers are only of a recommendatory nature, *ib.*——Substance of the recommendations embraced by the two reports already made by the Board, *ib.*——Beneficial character of the influence exercised by it over the examinations, and the course of reading for honours, *ib.*——Concurrence in the recommendations of the Board for the limitation or omission of the matters defined by them as requiring "a refined and laborious analysis," *ib.*

The effect of the Adams' prize lately instituted should be awaited before determining on the establishment of special prizes for mathematics subsequent to the B. A. degree, *p.* 262, 263——Efficacy of the existing regulations in securing the attention of candidates for honours to the elementary subjects and principles of mathematics; the course of reading pursued by the advanced students might be restricted with advantage, *p.* 263——Reason of the discontinuance of the use of MSS.; objections to their use, *ib.*——Regulations made by the senate to discourage the use thereof, *ib.*——Power of the moderators and examiners to discourage their use, *ib.*

Provisions made from time to time by the senate, for preventing the course of mathematical study from becoming too exclusively analytical and symbolic, *Ev. p.* 263, 264——The time assigned to problems in the examinations is not too great as compared with questions from books, nor do they occupy too large a share of the whole examination, *ib.*——Character of the problems, *p.* 264——The number could be diminished with advantage, *ib.*——Private tuition might be dispensed with; a contrary opinion obtains among students, *ib.*——Circumstances under which it possesses advantages, *ib.*——Many men of eminent talent are engaged in private tuition; considerable addition made to students' expenses, by payments to private tutors, *p.* 265——Measures adopted by the senate at different periods, to prohibit private tuition; inefficacy of any such prohibitions, *ib.*——

Remedies suggested for preventing the abuse of private tuition, *Ev. p.* 265——Existing inducements for the continuance of mathematical studies after the B. A. degree, *ib.*——The postponement of the examination for the Smith's prize would not encourage the study of mathematics in the University, *ib.*——Particulars relative to the Adams' prize, *ib.*——Advantage likely to accrue from the institution of similar prizes, *p.* 266——Advantage of such prizes as compared with the creation of new examinations, *ib.*

[3. *Queries as to the College Libraries:*]

Office, salary, and duties of the librarian; particulars of Dr. Sherlock's bequest, *Ev. p.* 359. 367——Catalogue; classification of books; description of the library-room; arrangement of books; funds applicable to library purposes; average annual sum expended in the purchase and binding of books; number of books and manuscripts, and description of them; access to library, *p.* 359, 360.

[4. *Queries as to the Colleges:*]

Particulars as to the appointment, eligibility, duties, and stipend of the head of the college, as prescribed by the statutes; present practice as to the stipend and other emoluments,

Pocklington Grammar School. Scholarships at St. John's College appropriated to students from, *Rep. p.* 190. 194.

Podmore, Rev. R. B. Exhibition at Trinity College founded by; present annual value, *Master and Fellows of Trinity College, Ev. p.* 423.

Political Economy. Small progress made by the study of political economy, *Rep. p.* 67——Paucity of attendance upon the lectures of the professor of this science; attention to it now, however, on the increase, *Pryme, Ev. p.* 135——The institution of a prize for an essay on some subject in the science suggested, *ib.*

Political Economy, Professorship of. Date of foundation of this professorship, and circumstances under which founded; duties performed, *Rep. p.* 67; *Pryme, Ev. p.* 135——No endowment or stipend, *Rep. p.* 67. 73——The lectures are gratuitous, *p.* 67——No statutes, *ib.*——Lectures delivered; small attendance thereat, *Pryme, p.* 135——No endowment; an application made to the Treasury for a grant was not entertained; no extraneous source of emolument, *ib.*——The lectures hitherto delivered gratuitously; share of fees receivable in future, *ib.*——No particular mode of appointment, nor conditions of eligibility or tenability enforced, *ib.*——No library attached; valuable collection formed by the present professor; books lent to students, *ib.*——A new foundation for this professorship is desirable, *p.* 136.

Poll-Tutors. Class of private tutors so termed; are similar to the "Répétiteurs" of Paris, or the medical crammers of London; are a nearly unmixed evil, *Thompson, Ev. p.* 198.

Pollexfen, J. H. (*Queen's College*). Specimens presented by, to the Woodwardian Museum, *Sedgwick, Ev. p.* 118.

Pomfret School (*York*). Freeston's exhibitions, at Sidney Sussex College, open to scholars from, *Phelps, Ev. p.* 430.

Poor Students:

1. *Digest of Answers to Queries respecting the Foundations in each College for Poor Students, and whether expedient to found a College for Poor Students alone.*
2. *Answers to Queries respecting the actual Amounts applicable in each College to Poor Students, and Details of the Application thereof.*

1. *Digest of Answers to Queries respecting the Foundations in each College for Poor Students, and whether expedient to found a College for Poor Students alone.*

Queries circulated by the Commissioners respecting the provision made for poor students; the expediency of affording such aid on the ground of poverty alone, without regard to merit and attainments, and as to the effect of establishing a hall or college for poor students only, and the influence the domestic system of Cambridge, by which

Report, 1852—*continued.*

Poor Students—continued.

1. *Digest of Answers to Queries, &c.*—continued.

the students of one college are rarely admitted to scholarships and fellowships at another, would have upon such an institution, *Ev. p.* 140——Answers to the foregoing in regard to the following colleges and halls, viz.:

Pembroke College:—

No provision for the maintenance of students on the ground of poverty alone; three exhibitions, at 12*l.* a year each for sizars; inexpedient to afford aid to students on the ground of poverty alone, *Arlett, Ev. p.* 144——Objections to which a college for poor students would be liable, *p.* 144, 145——The existing system of the University does not present obstacles to deserving students obtaining fellowships at other than their own colleges, *p.* 145.

Gonville and Caius College:—

The effect of a hall exclusively for poor students would be bad; the advantages of such an institution might be obtained by the establishment of "University hostels," conducted with strict regard to economy, *Crowfoot, Ev. p.* 158.

The scholarships and exhibitions are given, with few exceptions, according to merit; no provision for poor students, as such, except a few exhibitions of about 50*l.* a year, *J. J. Smith, Ev. p.* 188——Aid should not be given independent of merit and attainments, *ib.*——All experience is against the permanence of these preferments to students; the appointments should be annual, *ib.*——Doubtful advantage of a distinct college for poor students, *ib.*

Trinity Hall:—

No special provision in this college, for poor students; a hall or college for poor students only would not answer its end; the scale of expenditure at St. Mark's College, Chelsea, for training national schoolmasters, averages 70*l.* per head per annum, *Latham, Ev. p.* 171.

Corpus Christi College:—

Six sizarships at this college worth about 20*l.* a year; poverty, without talent and acquirements, not a good ground for aid; a hall or college for poor students would be a thoroughly bad thing, *Mould, Ev. p.* 177.

Queen's College:—

The chapel clerks have their commons free during residence, with a scholarship of 15*l.* per annum each; fund under the control of the president for aiding poor students, *Peill, Ev. p.* 178——The necessary expenses of a sizar need not exceed 45*l.* per annum, *ib.*——No college or hall could be maintained, in which the expenses of the student would be lower than the present scale, unless the board, lodging, and tuition were in a great measure gratuitous; such a gratuitous system would not be beneficial to the community, as it would introduce a pauper class of students, *ib.*

St. Catharine Hall:—

Two sizarships in this college; one of 42*l.* a year, with rooms, the other 11*l.*, with rooms and commons; both appointed by the master, *Philpott, Ev. p.* 181——Provision for poor students of great use, but should not be afforded to great extent, or in very many cases, *ib.*——The establishment of a hall or college, for poor students only, not to be recommended; reasons stated, *ib.*

Christ's College:—

Forty-nine scholarships, of 15*s.* a week during residence; conditions of election and tenure; various exhibitions also; four sizarships of about 30*l.* per annum each; four Tancred studentships of about 108*l.* per annum each, *Gunson, Ev. p.* 163——Not advisable to afford pecuniary aid to students simply on the ground of poverty, *ib.*——A college for poor students only would not work well, *ib.*

Four foundation sizarships at this college; bestowed for attainment, conduct and pecuniary necessity; superior attainments should not be the sole recommendation to sizarships, *Hildyard, Ev. p.* 166——A hall or college exclusively for poor students would be a failure, *ib.*

The four sizarships in this college are given to the poorer students, after due inquiry into their circumstances and those of their relatives; sizarships should be given on the ground of poverty alone, as the college can reward its other students by scholarships, *Shaw, Ev. p.* 186——A hall or college for poor students only would be disadvantageous, *ib.*

Four poor students are provided for by means of sizarships, the average annual value of each being 30*l.*, *J. Smith, Ev. p.* 192——Poor students would derive more benefit by being distributed among the existing colleges, than by being congregated together, *ib.*

Four

Report, 1852—*continued.*

Poor Students—continued.

1. *Digest of Answers to Queries, &c.*—continued.

Christ's College—continued.

Four foundation sizarships of 4*l.* each per annum, with commons and other advantages; the entire value between 24*l.* and 26*l.*; in more than one instance the expenses of a sizar have not amounted to 37*l.* a year; considerations kept in view in filling up vacancies, *Swainson, Ev. p.* 193, 194——Objections to the establishment of a hall or college for poor students only; reasons for such objections stated at length, *p.* 194——Suggestions for a wider application of the resources of the present colleges to the purposes of education, *ib.*——Scheme for founding an institution in connexion with any of the present colleges, providing sets of apartments on economical principles, *ib.*

Provision is made for poor students by means of four sizarships, worth about 25*l.* per annum each; mode and conditions of selection, *Wratislaw, Ev. p.* 213——A hall or college for poor students only would be beneficial if made entirely subsidiary to the study of theology, *ib.*——The domestic system of Cambridge, by which students are rarely admitted to scholarships or fellowships, at another would have a most baneful effect upon such an institution, if unprovided with ample endowments of its own, *ib.*

St. John's College:—

The establishment of a hall or college at a reduced rate of expenditure not advisable; reasons in support of this opinion, *Hoare, Ev. p.* 167——Inexpedient to regard poverty alone, without reference to merit and attainments; a hall for poor students alone would not be beneficial; one main benefit of University education arising from the association of men of various attainments and ranks would be lost altogether, *Hughes, Ev. p.* 169.

Inducements and facilities ought to be held out to poor students by the colleges; such should not, however, be confined to a class by themselves; poverty should not be admitted as a plea for election to fellowships; a clear distinction should be drawn between exhibitions and scholarships; halls for poor students might be established as an experiment; they would lead to the discovery of methods for checking expense and improving discipline, *Merivale, Ev. p.* 174——Institutions for special purposes, such as training of missionaries or parochial schoolmasters, might be attached as halls to the Universities, *ib.*——An inadequately endowed hall or college for poor students would not succeed, *France, Ev. p.* 285.

Magdalene College:—

The establishment of a hall or college for poor students, on the lowest possible scale of expenditure, would be preferable to a general reduction of the necessary expenses of a University education, *Warter, Ev. p.* 202.

Trinity College:—

Sixteen foundation sizars at this college; nature and amount of their emoluments, &c.; sub-sizars, their number unlimited, pay less fees for admission and tuition, and succeed to the foundation fellowships, *Blakesley, Ev. p.* 148——Highly undesirable that mere poverty, independent of attainments, should constitute a claim to admission as a sizar, *ib.*——The establishment of a hall for poor students would be a positive evil, *ib.*

An institution for poor students only would not be found successful or beneficial, unless provided with ample endowments, *Cooper, Ev. p.* 153——The plan of a hall or college for poor students quite impracticable; such an establishment might, however, be placed within a reasonable distance of Cambridge (at Stamford), with every privilege a college on the spot would have, *Evans, Ev. p.* 159——Sixteen foundation sizarships, worth from 50*l.* to 60*l.* a year; the number of sub-sizars unlimited; in what their advantages consist; practice as to filling up the sizarships and sub-sizarships; examination held, *Frere, Ev. p.* 160, 161.

In this college there are now seventy-two scholarships and sixteen sizarships; the value of both has increased by the college within the last five years; average value of each class; manner of selection, *Thompson, Ev. p.* 198——It would be extremely detrimental to choose students for these preferments without regard to merit and superior attainments, *ib.*——A college for four students could hardly be self-supporting, and the students would necessarily consist of persons of inferior attainments; result of the experiment at Bishop Hatfield's Hall, Durham, *p.* 199.

Sixteen sizarships in this college of the value of about 45*l.* per annum, *Whewell, Ev. p.* 206——It would not be beneficial to establish a college for poor students, *ib.*

Emmanuel College:—

Assistance given in college to poor students is always with regard to merit, industry, and poverty; the establishment of a college for poor students would not work well, *Archdall, Ev. p.* 142——A strong feeling in all colleges against engrafting out-of-college men on to the foundation, *ib.*

Report, 1852—*continued.*

Poor Students—continued.

1. *Digest of Answers to Queries, &c.*—continued.

Downing College:—

No provision for poor scholars at this college, *Worsley, Ev. p.* 209 ——Not expedient to afford such aid on the ground of poverty alone; a hall or college for poor students alone could not educate successfully for the liberal professions; disadvantages which would attend such a plan, *p.* 209, 210.

2. *Answers to Queries respecting the actual Amounts applicable in each College to Poor Students:*

Queries circulated by the Commissioners respecting the provision made in each college for the maintenance or assistance of poor students, *Ev. p.* 302——Answers to the foregoing from the following colleges and halls, viz.: St. Peter's College, *Cookson, Ev. p.* 311——Pembroke College, *Ainslie, Ev. p.* 319——Gonville and Caius College, *Chapman, Ev. p.* 327, 328——Trinity Hall, *Geldart, Ev. p.* 338——Corpus Christi College, *Pulling, Ev. p.* 346——King's College, *Okes, Ev. p.* 348——Queen's College, *Dalton, Ev. p.* 356——St. Catharine Hall, *Philpott, Ev. p.* 369——Christ's College, *Cartmell, Ev. p.* 385——St. John's College, *Tatham, Ev. p.* 398——Magdalene College, *Warter, Ev. p.* 412——Trinity College, *Whewell, Ev. p.* 417——Emmanuel College, *Archdall, Ev. p.* 426——Sidney Sussex College, *Phelps, Ev. p.* 433, 434——Downing College, *Worsley, Ev. p.* 438.

PRIVATE TUITION:

1. *Summary of Evidence respecting the system of Private Tuition; its Advantages and Disadvantages, and Means by which it might be restrained.*

3. *Conclusions arrived at by the Commissioners in regard hereto.*

2. *Particulars as to the Class adopting the profession of Private Tutor; their present and proposed future Status in relation to the teaching of the University.*

1. *Summary of Evidence respecting the system of Private Tuition; its Advantages and Disadvantages, and Means by which it might be restrained.*

The usual payment made to a private tutor is 14*l.* for a whole term, 7*l.* for a half term; the expense is a considerable addition to the expenditure of students; few dispense with the aid of a private tutor, even when not candidates for honours; the office of private tutor now a permanent professional occupation; the re-enactment of the Grace of 1781 is not to be recommended, *Archdall, Ev. p.* 142——The office of private tutor is now a permanent and professional occupation; 14*l.* for daily, and 7*l.* for alternate daily, lectures, the usual charge; the latter most beneficial, and are now superseding the former; most students, candidates for honours, engage a private tutor; as also those not candidates for honours; inexpedient to re-enact the Grace of 1781; the system of private tuition

Report, 1852—*continued.*

Private Tuition—continued.

1. *Summary of Evidence, &c.*—continued.

tuition a consequence of the excessive competition for honours; interferes materially with the efficacy of college lectures, *Arlett, Ev. p.* 144.

The attendance on private tutors is pleaded as a ground of exemption from attendance at college lectures, *Blakesley, Ev. p.* 148——The re-enactment of the Grace of 1781 is not desirable; the evil would be better met by a modification of the examinations, *ib.* ——£. 14 for the term for one hour daily, and 30 *l.* for the long vacation; half this charge for alternate days; few students, whether candidates for honours or not, dispense with private tutors; not really required however by the latter class; the whole cost of public tuition is 10 *l.* for the year; no restriction can be effectually imposed upon private tuition, *Cooper, Ev. p.* 153——Mathematical honours are never sought without the assistance of a private tutor; students sometimes dispense with this assistance at first, but never ultimately, *ib. p.* 222——Private tuition is a necessary consequence of the present system of examinations, and is advantageous, *ib.*

Very little need of private tuition if the college lectures be good; too much assistance from private tutors prejudicial to the student; desirable to re-enact the old prohibition previously securing to each college the most efficient lecturers, *Crowfoot, Ev. p.* 158.

Private tuition is making the same inroad on the college tutorial system as the latter has made on the University professorial system; the examinations have led to this, *Evans, Ev. p.* 159——£. 14 and 7 *l.* now the ordinary fee for a private tutor; 20 *l.* and 10 *l.* per term formerly the charge at Trinity College; inexpedient to re-enact the prohibition, *Frere, Ev. p.* 160.

The payments made to private tutors are 20 *l.* and 10 *l.*, or 14 *l.* and 7 *l.* per term; the corresponding payments for the long vacation are 40 *l.*, 20 *l.*, 30 *l.*, or 15 *l.*; three-fourths of the candidates for honours, and five-sixths of those for ordinary degrees engage private tutors; the expense amounts to one-fourth of the whole cost of education, *Gunson, Ev. p.* 162——The office of private tutor now a permanent occupation; candidates for the ordinary degree generally employ a tutor only during a term or two preceding the previous and degree examinations, *ib.*——The restriction imposed by the Grace of 1781 would be expedient if it were practicable, *p.* 163.

The charges for private tuition are excessive, and might be superseded by assistance from professors or others for a small annual payment, *Hildyard, Ev. p.* 165——The functions of the college tutors are needlessly superseded by private tutors, to the injury of the students themselves, and the serious expense of their parents, *ib.*——The usual payment is 14 *l.* and 7 *l.* per term, 30 *l.* per long vacation, and 10 *l.* per short vacation; above two-thirds of the students engage private tutors, at an annual average cost of 40 *l.*, *ib.*——The office of private tutor is now a permanent profession in the University; injurious effects of the system upon the students, *ib.*——An enactment against private tuition would be evaded; means of mitigating the evil suggested, *p.* 165, 166.

The difficulty of enforcing any regulation such as that of 1781 an insuperable argument against it; increasing the efficiency of college lectures the best remedy; the occasional assistance of tutors, especially in the long vacation, important, *Hoare, Ev. p.* 167——It is inexpedient to enact any prohibition against private tuition; contrary to sound policy to interfere with any educational advantages which wealth can procure to its possessor, *Hughes, Ev. p.* 169——The necessity for private tutors might be diminished by increasing the staff of college lecturers, *ib.*

A very small proportion of students at Trinity Hall read continuously with private tutors; recourse is had to them chiefly in the term preceding examinations; the fee payable is 14 *l.* and 7 *l.* per term; during the long vacation, 30 *l.* and 15 *l.*, *Latham, Ev. p.* 171——Futile and detrimental to attempt to abolish private tuition; advantages of the system; college authorities may prevent its being an unnecessary expense, or in any way an abuse, *ib.*

No improvement of the tutorial or professorial system would supersede private tuition; to establish restrictions upon it would lead to students rushing to the larger colleges; the union of the smaller colleges for the purposes of tuition would allow of a fair competition between the colleges, which does not now exist, *Merivale, Ev. p.* 174——The faults of private tuition would be best corrected by raising the standard of college and professional lecturers and the examinations, *ib.*——The fee of 14 *l.* might be abated; 10 *l.* was the customary amount formerly, *ib.*

The charge for private tuition every day is 14 *l.* per term, and 30 *l.* for long vacation; every other day, 7 *l.* and 15 *l.* for the long vacation; very few students aim at honours without private tuition; some tutors are permanent residents in Cambridge; the number of able men is small; the restriction of 1781 would not be advantageous or practicable, *Mould, Ev. p.* 177—— Candidates for honours almost universally have private tutors; many might dispense with them, but for those who read high it is all but necessary, *ib.*

£. 14 and 7 *l.* per term, and 30 *l.* and 15 *l.* for the long vacation, the usual charge,

Report, 1852—*continued.*

Private Tuition—continued.

1. *Summary of Evidence, &c.*—continued.

Peill, Ev. p. 178——Private tuition is thought indispensable for such as aspire to the higher mathematical honours, *ib. p.* 254.

The payment made to a private tutor is 14 *l.* for an hour daily, and 7 *l.* for attendance on alternate days, as is frequently the case; for the long vacation it is 30 *l.* and 15 *l.*; many persons of great ability reside in Cambridge permanently as private tutors, *Philpott, Ev. p,* 180——Few students become candidates for honours without private tuition; candidates for the ordinary degree avail themselves of it only for a short time before the examination, *ib.*——Inexpedient to re-enact the prohibition of 1781; such prohibitions always evaded; private tuition is an efficient means of education, but abused, *p.* 180, 181——Private tuition might be dispensed with; a contrary opinion obtains among students, *ib. p.* 264——Circumstances under which it possesses advantages, *ib.* ——Measures adopted by the senate at different periods to prohibit private tuition; inefficacy of any such prohibitions, *p.* 265——Remedies suggested for preventing the abuse of private tuition, *ib.*

The assistance derived from private tutors is so much added to the instruction derived from the public tutors, *Shaw, Ev. p.* 185——The usual payment is 14 *l.* and 7 *l.*, and 30 *l.* for the long vacation; the office of private tutor has for may years been a permanent and professional occupation; mode of lecturing pursued; students not candidates for honours resort to private tuition, although ample instruction might be afforded by the college lectures; objectionable to enforce any regulation similar to that of 1781, *ib.*

The fee is 14 *l.* for a whole term, for a short vacation 10; *l.* and for a long vacation 30 *l.*; half those sums for half pupils; a few received 20 *l.* a term; understanding on which private tutors are engaged, *J. J. Smith, Ev. p.* 187——Proportions in which students resort to private tutors; annual average expense to them; the payment is a superfluous expense, the private tutor in the greater number of cases being really needless, *p.* 188 ——The office has become a permanent occupation; plan of instruction pursued, *ib.*—— The same system obtains in regard to students candidates for the common examination; this is inconvenient and improper, *ib.*——No simple prohibition would be effective; a more effective arrangement of the college lectures needful; other measures also suggested, *ib.*——The aid of a private tutor not so requisite as is commonly supposed; in many respects it is prejudical; the increase in the number of private tutors is due to the increased zeal for distinction in the University examinations, *p.* 189——Attendance at professors' lectures has not systematically decreased, as is supposed; in what the disadvantages of those lectures consist, *ib.*

The functions of the college tutors are suspended to a considerable extent by the private tutors, *J. Smith, Ev. p.* 191——The usual payments are 7 *l.* or 14 *l.* for the term, and 15 *l.* or 30 *l.* for the long vacation; the average annual expense incurred by a student, amounts to 15 *l.*, *ib.*——The office of private tutor now a permanent profession; lectures delivered, *ib.*——Most students, whether candidates for honours or the ordinary degree resort to private tuition, *ib.*——Not required, however, by the latter, except, in a few extreme cases, *p.* 191, 192.—— Inexpedient to re-enact the prohibition of 1781, *p.* 192.

The sum now spent in private tuition, much less now than it was ten years since; the custom of reading only every day much increased; few wranglers have spent less than other 120 *l.*, and senior oftimes between 40 *l.* and 60 *l.* in private tuition, *Swainson, Ev. p.* 193 ——The system of lecturing in classes that pursued by private tutors; the more advanced students prefer it, *ib.*——Students not candidates for honours resort to private tuition during the two or three terms preceding their degree examination, *ib.*——No advantage would result from re-enacting the Grace of 1781; an adequate provision should be made to supply the place of the private tutors, *ib.*——The funds of the small colleges ar e insufficient to maintain such a staff of lecturers as would render private tuition unnecessary, *ib.* ——Motives which prompt students to resort to private tutors; difficulties opposed to the suppression of private tuition, *p.* 269, 270——Abuses of the system of private tuition; remedy suggested, *p.* 270.

Private tutors receive 14 *l.* per a term, 30 *l.* for the long, and 10 *l.* for the Christmas vacation; recent practice of reading only on alternate days; few pupils spend more than 21 *l.* during the academical year on this head, or 100 *l.* for the entire course; in some cases the entire addition to the student's expenses will amount to 144 *l.*, *Thompson, Ev. p.* 197, 198——The office of private tutor a permanent occupation; there is also a class called "poll tutors," answering to the "répétiteurs" of Paris, and the medical crammers of London; description of students who resort to this class; their existence an unmixed evil, *p.* 198——Doubtful expediency of re-enacting the Grace of 1781, even in a modified form; seggestions for meeting the difficulty, *ib.*——The preference of students for private over public teaching, as a preparation for the mathematical examinations, is not wholly unreasonable; any attempt to put it down would be eventually unsuccessful, *ib. p.* 271.

Private tutors are either what is called whole or half; 14 *l.* or 7 *l.* per term being the respective charges; some tutors receive 10 *l.* for the half pupil, and fellows of Trinity formerly 20 *l.* per term; the charge for the long vacation is 30 *l.* or 40 *l.*; and the half pupil 15 *l.* or 20 *l.*, *Warter, Ev. p.* 201——Very few candidates for honours who do not avail

Report, 1852—*continued.*

PRIVATE TUITION—continued.

1. *Summary of Evidence, &c.*—continued.

avail themselves of private tuition; a similar system exists in regard to candidates for ordinary degrees; some test prior to residence is required, *Warter, Ev. p.* 201——The prohibition of 1781 cannot be practically carried out, *p.* 202——Means suggested for doing away with private tuition, *ib.*

Injurious effects of private tuition; not desirable to prevent it in the early part of the student's residence herein; legislation of the University, *Whewell, Ev. p.* 204——Causes of private tuition and its predominance over other modes of teaching; remedies suggested; the prohibitory Grace of 1781 was in part repealed in 1807, 1815, and 1824; purport of the Grace of 1824; this is never acted upon; its enforcement would be beneficial, but would go a very small way in suppressing private tuition, *p.* 206——Students resort to private tuition; those, however, who dispense with such assistance and rely on themselves, with the occasional explanations of the college tutors in cases of difficulty, attain to a higher state of mental culture, *p.* 273——So long as private tuition is generally allowed, individual students will not be found to dispense with it, *ib.*——A limitation of private tuition would effect a considerable reduction in the expense of a University education; it would be more advantageous perhaps to repress private tuition altogether; but to alter the college lectures so as to supersede private tuition would be to lower the character of them, and not have the effect of superseding the system, *p.* 416, 417.

An under-graduate of this college (Downing) is rarely put to the expense of a private tutor unless he takes a degree in law, when, if a fellow commoner, he is liable to 20 *l.* per term for private tuition, *Worsley, Ev.* 6. 209——Students of Downing are usually prepared for the ordinary B. A. degree without private tuition, *ib.*——Futile to pass Graces to restrain private tuition, *ib.*

The insufficiency of the staff of college lecturers to prepare candidates for honours leads to their resorting to private tutors; this, however, is unnecessarily done by candidates for the ordinary degree, *Wratislaw, Ev. p.* 212——Two classes of charges for private tutors; the charges for whole pupils, 14 *l.* to 20 *l.* per term; 10 *l.* for a short vacation, and 30 *l.* to 40 *l.* for the long vacation, *p.* 212, 213——Nearly three-fourths of the students employ a private tutor; the annual expense would vary from 21 *l.* to 70 *l.*; in some cases equalling the expenses of residence, *p.* 213——The office of private tutor has become a permanent occupation; mode in which the tuition is conducted, *ib.*——Few students become candidates for honours without the assistance of a private tutor; a similar system obtains in regard to students not candidates for honours, *ib.*——Injurious to put any limitation upon private tuition without the establishment of a complete and well-organized University staff of professors, *ib.*——Any interference with private tuition should be limited to term time, and not extend to the long vacation, *ib.*——The examination for the B. A. degree frequently necessitates the employment of a private tutor, not from its difficulty but from the very great number of subjects which have to be got ready, *p.* 214——Success in the mathematical tripos is unattainable without the employment of a private tutor, *ib.*

Prevalence of private tuition; an improved system of college tuition would supersede this practice, *Goodwin, Ev. p.* 237——The assistance of a private tutor is generally thought indispensable, particulars as to private tutors; the sanction of the syndicate of studies and of the tutors of colleges would be beneficial to the system of private tuition, *Hind, Ev. p.* 239——Period during which students are generally accustomed to have private tutors, *Hopkins, Ev. p.* 245——Effect that the adoption of such measures as suggested would have on the expenses of private tuition, *p.* 247.

Expenses of private tuition, *Mathison, Ev. p.* 250——The adoption by the University of a settled course of mathematics would diminish private tuition, *Phelps, Ev. p.* 257——Manner in which the University might proceed to effect this, *p.* 257, 258——Private tuition increases the expenses of a University education, *Stokes, Ev. p.* 267 *d.*

Most candidates for the classical tripos examination read with private tutors; if the staff of college classical lecturers were doubled this practice would be discouraged, *France, Ev. p.* 284——Candidates for the previous or ordinary degree of examination need not, even under the present state of things, resort to a private tutor, unless very backward, *ib.*——Means by which private tuition might be discouraged, *ib.*——Frequent college examinations have a tendency to discourage private tuition; necessity, in order to promote this tendency, for the college examinations to be conducted with, and subordinate to, the University examinations, *p.* 285——The formation of classes under certain restrictions, by graduates, would supply a means of superseding private tuition, *Williams, Ev. p.* 295.

2. *Particulars as to the Class adopting the profession of Private Tutor; their present and proposed future Status in relation to the Teaching of the University:*

Remarks on the system of reading parties with private tutors, *Sir J. Stephen, Ev. p.* 111——Proposition for securing the services of the best of the private tutors, and

Report, 1852—*continued.*

Private Tuition—continued.

2. *Particulars as to the Class, &c.*—continued.

attaching them to the University, *Latham, Ev. p.* 173——Class of gentlemen who adopt the profession of a private tutor, *Cooper, Ev. p.* 222; *Hopkins, Ev. p.* 245; *Stokes, Ev. p.* 267*d*——It is desirable that a better communication should be maintained between the private and college tutors, respecting the student, and that the charge for private tuition should be reduced, *Cooper, Ev. p.* 222——Many eminent University men are private tutors, *Gaskin, Ev. p.* 229——Suggestion for making the private tutors auxiliaries to those of the college, *p.* 229, 230.

Desirable that the private tutors should, in some way, be recognised as authorised teachers; suggestions for effecting this result, *Hopkins, Ev. p.* 245——Private tutors are generally considered desirable, but not indispensable; important service rendered by them in their present capacity; manner in which their influence would be diminished if they received any official character, *Mathison, Ev. p.* 249——Educational standard of private tutors; manner in which students might be relieved of the expense of their services, *Mould, Ev. p.* 251——Defects in the respective systems of college tutors and of private tutors, *ib.*

Desirable to connect the instruction of the private tutor with the college lectures; difficulties opposed to it, *Peill, Ev. p.* 254——The private tutors have the principal conduct of the mathematical education; the suspension of the college lectures would involve little, if any, loss to the students, *Phear, Ev. p.* 255——Bearing which the present system of mathematical teaching at the University has on the position of the private tutors, *ib.*—— The private tutors are essentially necessary to the maintenance of a healthy state of education in the University, *ib.*——Importance of a public recognition of them, at the same time leaving intact their independent relation to the colleges, and of their pupils to them, *ib.*——Sphere of teaching to which the college lecturer might then confine himself, *ib.*

Eminent ability of many of the private tutors; to deprive the University of their services would be a subject for regret, yet there are reasons for considering the universal recourse of students to them as an evil, *Phelps, Ev. p.* 257——Many men of eminent talent are engaged in private tuition; considerable addition made to students' expenses by payment to private tutors, *Philpott, Ev. p.* 265——Exertions made by a distinguished private tutor to encourage a liberal and philosophical spirit of study in students, *Swainson, Ev. p.* 270——Amount of mathematical ability of private tutors, *Whewell, Ev. p.* 273—— Remarks as to the employment of private tutors as college lecturers, *ib.*

3. *Conclusions arrived at by the Commissioners in regard hereto:*

Serious extent to which the system of private tuition interferes with all other forms of instruction, *Rep. p.* 74——Analysis of the various opinions conveyed to the Commissioners on this head, viz.: Evidence of Dr. Whewell, *p.* 74, 75——Of Dr. Philpott, master of St. Catharine Hall, *p.* 75, 76——Of Mr. Hughes, tutor of St. John's, *p.* 76——Of Mr. Charles Merivale, *p.* 76, 77——Of Mr. Arlett, tutor of Pembroke and others, *p.* 77—— Of Mr. Rowland Williams, *ib.*——Of Mr. Blakesley, *p.* 77, 78——Of Mr. Thompson, tutor of Trinity College, *p.* 78——Of Mr. Cooper, tutor of Trinity, *ib.*

Inexpediency and difficulty of prohibiting private tuition; bearings of the question as regards the smaller colleges, *Rep. p.* 79——Chief motives to the employment of private tutors, *p.* 80——Conditions to be satisfied in any plan for ameliorating University tuition, *p.* 80 *et seq.*——Increasing the number and value of the public college lectures, would be the means of restraining private tuition, *p.* 76——The institution of a system of public lecturers, however efficient, would not entirely do away with private tutors, *p.* 83—— The system of private tuition, with its attendant evils, expense and "cramming," is to be traced to the defective college lecturing, *p.* 108.

Problems:

General Nature of the Problems proposed in the Examinations; and whether too numerous or too difficult:

General observations in reference to the present manner of filling up the problem papers on examinations, and the various tendencies of this system, *Ellis, Ev. p.* 225, 226——The problems proposed in the examinations do not bear too large a proportion to the questions derived from the books commonly read, *Gaskin, Ev. p.* 229——But the ingenuity of them is such at times as to embarrass those required to solve them in the time allowed, *ib.*——Although the number of problems is generally more than the time allowed suffices for their solution, yet it is not expedient to alter the plan in this respect; reasons assigned, *ib.*——Difficulty of fixing, by legislation, the nature of the problems, *Goodwin, Ev. p.* 237.

The problems, though not too numerous, are perhaps a little too difficult, *Hind, Ev. p.* 239——The problems bear too large a proportion to the questions from books and simple examples; character of the problems; their number is greater than the time allowed admits of solution; reasons why this is not to be objected to; a substitution of easier for the more difficult problems is desirable, *Hopkins, Ev. p.* 244, 245——There are no grounds for a reduction of problems, *Mathison, Ev. p.* 249——Variable character of the problems; they are not too numerous, but are perhaps too difficult, and often dependent on special artifice, *Mould, Ev. p.* 251——Nature of the problems, *Peill, Ev. p.* 254.

The object in putting so many questions into the problem papers is to afford candidates a full opportunity of selection; it is not politic to fetter the discretion of the moderators in this matter, *Philpott, Ev. p.* 261——The time assigned to the problems in the examinations is not too great, as compared with questions from books, nor do they occupy too large a share of the whole examination, *p.* 264——The number could be diminished with advantage, *ib.*

Satisfactory working of the present proportion of problems to book-work questions in the examinations; difficult character of the problems; their solution depends on an innate talent for mathematics; the practice of giving students more problems to solve than the time allowed will admit of has the advantage of enabling them to select such as they are competent to answer, *Stokes, Ev. p.* 267 *d*——The problems proposed in the examination do not bear too large a proportion to the book-work questions; manner in which they are generally arranged, *Swainson, Ev. p.* 269——The proportion of problems to book questions in the examinations has been too small, *Whewell, Ev. p.* 273.

PROFESSORSHIPS:

1. *Answers to Commissioners' Circular of* 30 *October* 1850.
2. *Answers to Queries respecting the several Professorships; their Duties and Emoluments.*
3. *Remarks on the foregoing Answers to Queries.*
4. *Review of the present state of the Professorial System of the University, with Suggestions for its Improvement.*
5. *Evidence received by the Commissioners, bearing generally on the same points.*
6. *Papers laid before the Commissioners.*

1. *Answers to the Commissioners' Circular of* 30 *October* 1850:

Answers received by the Commissioners to their circular of the 30th October 1850, from the following professors of the University, viz., Dr. Jeremie, Regius Professor of Divinity, *Corr. p.* 9——Dr. Maine, Regius Professor of Civil Law, *ib.*——Dr. Haviland, late Regius Professor of Physic, *ib.*——Rev. J. J. Blunt, Margaret Professor of Divinity, *p.* 10——Dr. Mill, Regius Professor of Hebrew, *ib.*——Rev. J. Scholefield, Regius Professor of Greek, *ib.*——Dr. Robinson, Lord Almoner's Professor of Arabic, *ib.*——G. G. Stokes, Professor of Mathematics, *ib.*——Dr. Whewell, Professor of Moral Philosophy, *p.* 10, 11——Rev. J. Challis, Plumian Professor of Astronomy, *p.* 11——Dr. Clark, Professor of Anatomy, *ib.*——Sir James Stephen, Professor of Modern History, *p.* 11, 12——Rev. G. S. Henslow, Professor of Botany, *p.* 12——Dr. Fisher, Downing Professor of Medicine, *ib.*——George Pryme, Professor of Political Economy, *ib.*

2. *Answers to Queries respecting the several Professorships; their Duties and Emoluments:*

Queries circulated by the Commissioners respecting the several professorships; the duties annexed to them, and duties performed; fees and emoluments; mode of appointment; lectures, and houses attached to the professorships, &c., *Ev. p.* 74, 75 —— Answers to the foregoing, from the following, viz., Dr. Jeremie, Regius Professor of Divinity, *p.* 76, 77——Dr. Maine, Regius Professor of Civil Law, *p.* 77–79——The late Dr. Haviland, Regius Professor of Physic, *p.* 80–82—— Dr. Bond, Regius Professor of Physic, *p.* 82–86——Rev. J. J. Blunt, Margaret Professor of Divinity, *p.* 86–89——Dr. Mill, Regius Professor of Hebrew, *p.* 90–92——Rev. J. Scholefield, Regius Professor of Greek, *p.* 92——Dr. Robinson, Lord Almoner's Professor of Arabic, *ib.*——G. G. Stokes, Lucasian Professor of Mathematics, *p.* 93–99——Dr. Whewell, Professor of Moral Philosophy, *p.* 99–102——Rev. J. Cumming, Professor of Chemistry, *p.* 102, 103—— Rev. J. Challis, Plumian Professor of Astronomy, *p.* 103–107——Dr. Clark, Professor of Anatomy, *p.* 107–110——Sir J. Stephen, Professor of Modern History, *p.* 111–113 ——Rev. J. S. Henslow, Professor of Botany, *p.* 113–115——Rev. Adam Sedgwick, Woodwardian Professor of Geology, *p.* 115–121——Dr. Peacock, Lowndes' Professor of Astronomy and Geometry, *p.* 121, 122——Andrew Amos, Downing Professor of Law, *p.* 122–125——Dr. Fisher, Downing Professor of Medicine, *p.* 125–133—— W. H. Miller, Professor of Mineralogy, *p.* 133–135——George Pryme, Professor of Political Economy, *p.* 135, 136——Dr. Walmisley, Professor of Music, *p.* 136.

3. *Remarks on the foregoing Answers to Queries:*

General remarks on the answers received by the Commissioners to the queries addressed by them to the professors, *Rep. p.* 46——Review of the facts and suggestions contained

Report, 1852—*continued.*

PROFESSORSHIPS—continued.

3. *Remarks on the foregoing Answers to Queries*—continued.

contained in these replies, viz., the Lady Margaret's Reader in Divinity, *Rep. p.* 46——The four Lectores Ordinarii, *p.* 48——The Linacre Professorship of Medicine, *ib.*——The five Regius Professors of Divinity, Hebrew, Greek, Law, and Physic, *p.* 48–56——Sir Thomas Adams' and the Lord Almoner's Professors of Arabic, *p.* 56——The Lucasian Professor of Mathematics, *p.* 57——The Professor of Moral Philosophy, *ib.*——The Professor of Chemistry, *p.* 58——The Plumian Professor of Astronomy and Experimental Philosophy, *ib.*——The Professorship of Anatomy, *p.* 60——The Professorship of Modern History, *p.* 61——The Professorship of Botany, *p.* 62——Woodwardian Professorship of Geology, *p.* 63——The Lowndean Professorship of Astronomy and Geometry, *ib.*——The Norrisian Professorship of Divinity, *p.* 64——Jacksonian Professorship of Natural and Experimental Philosophy and Chemistry, *p.* 65——The Downing Professorship of the Laws of England, *ib.*——The Downing Professorship of Medicine, *p.* 66——Professorship of Mineralogy, *ib.*——Professorship of Political Economy, *p.* 67——The Disney Professorship of Archæology, *ib.*——Professorship of Music, *p.* 68——Sadlerian Lectureships, *ib.*——Mr. Hulse's foundations, *p.* 69——General observations of the Commissioners on the foregoing, *p.* 69, 70——Statement as to the present stipends of professors and lecturers, *p.* 71–73.

4. *Review of the present state of the Professorial System of the University, with Suggestions for its Improvement:*

Necessity for resorting to the college foundations for the means of providing additional stipends in aid of the existing staff of professors, and to endow such new chairs as may be necessary, *Rep. p.* 85——Principle which should be acted upon in determining the scale on which contributions should be made by each college, *p.* 86——Special sources of income belonging to the University, which may be made available, *p.* 87——Proposed constitution of the two classes of professors and public lecturers, *p.* 88——Classification of the existing professorships for the formation of boards of studies, *ib.*——One additional professorship of anatomy is necessary to give completeness to the medical staff already existing in the University, *p.* 93——There is only one professor, that of Greek, in the classical department of the University, *p.* 98——The addition of a Latin professorship recommended, *ib.*——Proposition for the foundation of a professorship of the law of nations and diplomacy, *p.* 101, 102——A new professorship required in the science of zoology, *p.* 102.

Recapitulation of the new professorships recommended to be established in the University, *Rep. p.* 102——Endowment of new and additional endowment for existing professorships, *ib.*——The principle upon which the endowments of professors should be regulated stated in the words of Lord Bacon, *ib.*——Amount at which the income of the professorships should be fixed, *p.* 103——Mode of appointment, *ib.*——Conditions of tenure to be enforced, *ib.*——Provision to be made for old and ineffective professors, *ib.*

Absence of any organisation or co-operation among the professors; consequences of this, *Rep. p.* 115——Programme issued annually by the Vice-Chancellor since 1848, of the lectures to be given by the professors in the ensuing academic year, *ib.*

5. *Evidence received by the Commissioners bearing generally on the same points:*

Fees paid for attendance on a course of lectures by a professor, *Ainslie, Ev. p.* 34——Professorships most needed to complete the professorial scheme of the University, *Whewell, Ev. p.* 102; *Henslow, Ev. p.* 115——The income of professors should be made independent of any extraneous sources beyond what they might command from fees, &c, *Henslow, Ev. p.* 114——Futility of looking to the University for funds for accommodation, apparatus, &c. for rendering the professorial system effective; Government aid is required, *ib.*——The professorial system cannot be made complete without an adequate staff of professors being resident two out of three terms, *p.* 115.

Meagre salaries attached to most of the professorships; they could not be completely filled unless held in conjunction with livings, *Amos, Ev. p.* 124——Suggestion for the appointment of an assistant professor of anatomy, or a lecturer on human anatomy, *Fisher, Ev. p.* 130——Suggestion for the appointment of a lecturer on surgery, *p.* 130, 131——Also of a lecturer on medicine, or assistant professor of medicine, *p.* 131——The University formerly granted licences in surgery; if the usage were resumed, it would be desirable to appoint a professor of surgery, *p.* 131 *note.*

The number of professorships ought to be increased, their endowment materially augmented, their election to them vested in the hands of resident members of the senate, and the position of the professors improved, so that their power should be co-ordinate with that of heads of houses, *Blakesley, Ev. p.* 150——A fund for endowing such additional professorships might be raised by suppressing 20 per cent. of the fellowships, *ib.*——The colleges should be taxed for the purposes of the additional lectures that should be given by the professors, *Gunson, Ev. p.* 164——A Latin professorship recommended to be established; source from whence his stipend could be defrayed, *p.* 165——The addition of stalls to the Greek and Hebrew professorships has given them a respectable endow-

Report, 1852—*continued.*

PROFESSORSHIPS—continued.

5. *Evidence received by the Commissioners, &c.*—continued.

ment, *Hildyard, Ev. p.* 166——A Latin professorship is grievously wanted, *ib.*——Suggestion for the increase of the number of classical professors by the addition of Latin, ancient history, and ancient philosophy, *Merivale, Ev. p.* 176——The college revenues ought to be assessed for the purposes of the University in regard to the payment of the stipends of the proposed new professors, *ib.*

Suggestions for increasing the number of professorships unclogged with the conditions of celibacy, and holy orders; powers to be given to colleges to convert a certain number of its fellowships into professorships, *Thompson, Ev. p.* 199, 200——An improved system of professorships and a more liberal scale of endowment are the means by which the public teaching of the University can be made more efficacious, *Goodwin, Ev. p.* 238——Improvement that would be effected in the present system by increasing the number of professors, remunerating them in a more liberal manner, and compelling their residence during the major part of every term, *Thompson, Ev. p.* 271——Many of the eminent private tutors would then be employed in a way worthier of their talents, and more conducive to the honour of the University, *ib.*——Objection to professors being required to act *ex officio* as examiners, *Babington, Ev. p.* 453.

6. *Papers laid before the Commissioners:*

Letters patent for the creation of the modern history professorship, with documents relating thereto, *App. p.* 457-462.

[2. *Queries as to the University Lecture Rooms:*]

Details as to the lecture rooms of the University, *Ev. p.* 136——System of fees adopted, *ib.*——New foundations desirable, *ib.*——Residences or rooms at present provided for certain of the professors; provision in this respect desirable, *ib.*——The academical year too short, *ib.*

Pryme, Mr. The title of Professor of Political Economy conferred upon Mr. Pryme by grace of the Senate in 1828, *Rep. p.* 67——There are no emoluments derived from the professorship, *ib.*——Suggestions of Mr. Pryme for promoting the study of this science, *ib.*——Letter from Mr. Pryme, 12 November 1850, in answer to circular of Commissioners of 30 October, *Corr. p.* 12.

Public Lecturers. Expediency of creating a staff of public lecturers; sketch of a plan for their institution, remuneration and duties, *Rep. p.* 81——Mode in which the public lecturers should be appointed, *p.* 82——Authority by which their several duties should be assigned from time to time, *p.* 82, 83——Beneficial results to be expected from a good system of public lecturers, *p.* 83——Opinions of various witnesses supporting this view, *p.* 83-85.

Necessity for resorting to the college foundations for the means of providing for the stipends of the proposed new office of public lecturer, *Rep. p.* 85——Opinions of various witnesses in regard hereto, *p.* 85, 86——Principle which should be acted upon in determining the scale on which contributions should be made by each of the colleges, *p.* 86——Special sources of income belonging to the University which may be made available, *p.* 87——Summary of the recommendations of the Commissioners in regard hereto, *p.* 88.

Public Orator, The. The office of orator is one of great honour and precedency in the University mode of election, *Rep. p.* 11——His duties, *ib.*——Amount received annually by this officer, *p.* 138——Annual amount derived by the orator from fees on degrees, *Romilly, Ev. p.* 64.

Public Schools. Expensive habits brought by students from public schools, *Rep. p.* 147, 148; *Whewell, Ev. p.* 204. 206.——*See* also *Parents and Guardians. Schools.*

Pulling, Rev. J., B. D., Master of Corpus Christi College. (Analysis of his Answers to Queries.)

[1. *Queries as to the Colleges:*]

Remarks on some of the statutes by which this college is now governed, *Ev. p.* 344——The fellows are chosen from the scholars and students who excel in the examinations, a preference being given to scholars; circumstances which vacate fellowships, *ib.*——Period during which the master and fellows are resident in college; licences of non-residence granted to fellows; residence of scholars, *ib.*——Division of surplus incom between the master and fellows, *ib.*

Officers who have the moral and religious charge of students, and who conduct the preparatory examinations, and the college tuition, *Ev. p.* 344——Allowance to scholars; exemptions permitted to sizars, *ib.*——Statement as to scholarships; exhibitions and fellowships; admission of students, *ib.*——Hours of service in chapel; attendance required of students, *ib.*——Number of fellows engaged in college tuition; subjects of the college lectures; examinations, *ib.*——Attendance required of students at lectures and at dinner in the hall; hour at which they are expected to be in college or lodgings at night, *ib.*

Detailed estimate of the necessary expenses of pensioners and sizars during residence, *Ev. p.* 345——Like estimate of actual average expenses of pensioners and sizars, *p.* 345, 346——Number of sizarships and scholarships; extent to which holders of them are assisted, *p.* 346——If the period of residence for the B. A. degree were reduced to three years it would lessen the expenses, *ib.*

The appropriation of scholarships to particular localities, with power of transfer in default of eligible claimants, is an encourgement to learning in those places, *Ev. p.* 346——This college possessing such power of transfer before mentioned, no scholarships have become ineffective from default of claimants, *ib.*——The most valuable scholarships are competed for in the first year's examination the smaller ones being distributed over the succeeding years; an incentive to exertion is thus extended beyond the first year, and therefore it is not desirable to consolidate such small scholarships, *p.* 346, 347.

[2. *Queries as to the College Libraries:*]

Sum annually expended in the purchase of books for the library; description and arrangement of the books; Archbishop Parker's manuscript library is kept here; number of printed volumes in the library; conditions of admission, *Ev. p.* 347.

Report, 1852—*continued.*

Pulling, Rev. J. Letter from, dated 13 November 1850, in answer to circular of the Commissioners of 30 October, *Corr. p.* 4.

Punishments. Attendance on the chapel service is in no case imposed as a punishment, *Rep. p.* 146——Offences against college discipline; punishments with which usually visited, *ib.*——Particulars as to the academical punishment enforced, *Ainslie, Ev. p.* 31.

10. *The College Library.*

1. *Statutes of the College:*

Statutes by which the college is governed, *Dalton, Ev. p.* 354.

2. *Revenues and Expenditure:*

Gross income of the college at the present time, *Rep. p.* 196——Remarks on the measures taken by the college for running out beneficial leases, *p.* 197.

Average gross income derived from estates in land, and from houses; deductions therefrom; income derived from funded property and from rents of rooms; total gross and net income, *President and Fellows of Queen's College (per Rev. J. E. Dalton), Ev. p.* 356, 357——Average annual sum received by the president, fellows, and scholars, *p.* 357——Number and value of scholarshps; there is a bye-fellowship, and an exhibition, *ib.*——The college pays for the commons of the chapel clerks, and part of the expenses of the fellows' table, *ib.*——Average annual expense of the college repairs, and also of repairing chancels; there is no special building fund, *ib.*——Prizes, *ib.*——Sum expended in charities, *ib.*——Practice of the college with regard to beneficial leases, *ib.*——Bequest of Rev. Mr. Hughes for establishing divinity prizes and augmenting livings, *ib.*——Sum expended in the augmentation of livings since 1800, *ib.*——Advowsons purchased, *ib.*

3. *The Presidentship:*

The power of choosing the President is vested in the fellows, *Rep. p.* 152——Emoluments of the President, *p.* 154——Qualification and election of the President and of the fellows, *Dalton, Ev. p.* 354.

4. *Fellowships:*

Number of foundation and bye-fellowships in this college, *Rep. p.* 157——Value of a foundation fellowship at this college, *p.* 167——Academical standing required of candidates for fellowships, *p.* 170——The B.D. degree an essential requisite in the college statutes, and is complied with in practice, *ib.*——Conditions of election and tenure of fellowships; royal dispensation from observance of these conditions has sometimes been granted, *Dalton, Ev. p.* 354——Permission to live away from Cambridge is granted to fellows by the Society; emoluments of fellows, *p.* 354, 355——Particulars as to the bye-fellowships attached to this college; also as to the librarian, the college clerkships, and a scholarship recently established, *p.* 355.

5. *Scholarships:*

Number of scholarships belonging to this college; are not fettered by any local restrictions; their annual value, *Rep. p.* 188——The scholarships have twice been consolidated; number and value of scholarships given away annually, and principle guiding their bestowal; duties annexed to the scholarships, *Dalton, Ev. p.* 355.

6. *Sizarships:*

Report, 1852—*continued.*

QUEEN'S COLLEGE—continued.

6. *Sizarships:*

Number of sizars admitted at this college, *Rep. p.* 195——Provision made for the assistance of poor scholars; allowances made to the chapel clerks and librarian, *Peill, Ev. p.* 178——Amount of funds disposable for the assistance of poor scholars, *Dalton, Ev. p.* 356.

7. *Matriculations and Degrees:*

Number of students entered at Queen's College in each year ending 10th October 1844 to 1848, *Rep. p.* 145——Summary of the number of members of the college in 1851, *ib.* ——Number of residents on 14th November 1851, *ib.*——Table showing the number of matriculations at this college in the years 1800, 1810, 1820, and 1830, and in each of the ten years 1840 to 1850, *Romilly, Ev. p.* 66——Similar table of the number of degrees of the several grades granted in the same periods, *p.* 67-70——Total number of degrees granted in the last eight years, *p.* 70——Mode of admission of students, *Dalton, Ev. p.* 355.

8. *Lectures and Examinations:*

Lectures delivered at this college; classification of the students; attendance is compulsory; the tutors have the responsibility of supplying the lectures and paying the lecturers, *Peill, Ev. p.* 178——The college staff of lecturers is sufficiently complete, *ib.* —— Particulars of the college and University examinations; candidates for admission to the college are required to produce a certificate from a M. A., *ib.*——Prizes awarded to those who excel in the college examinations, *Dalton, Ev. p.* 355——Subjects and number of the college lectures and examinations; the lectures have a direct reference to the University examinations; persons by whom the lectures are given; candidates for the B. A. degree are examined by the prælector; a college examination is held in May, *ib.*—— Prizes and rewards for proficiency in the college examinations; prizes for particular essays, &c., *p.* 355, 356.

9. *Students, their Discipline and Expenses:*

Special permission to reside in college during the long vacation is given to students considered deserving of the indulgence, *Peill, Ev. p.* 179——Several of the students reside in lodgings during term, *ib.*——Hours of service in the college chapel, and attendance required thereat, *Dalton, Ev. p.* 355——Attendance is required at lectures, and occasionally at dinner, and the students are obliged to be in college or lodgings at a certain hour at night, *p.* 356.

College charges for a fellow commoner, a pensioner, and a sizar, *Dalton, Ev. p.* 356 ——Sums for which pensioners and sizars have been known to maintain themselves at college, *ib.*——Sum expended by a pensioner living with his friends in Cambridge, *ib.* ——Sum expended by fellow commoners, *ib.*——There are no means of reducing the expenses of college residence, or checking extravagant habits, *ib.*

10. *The College Library:*

Considerable extent and value of the college library, *Rep. p.* 134——Catalogue of its contents; number of volumes, *ib.*——The library is in the care of a librarian, who is considered as a scholar; attendance given by him at the library, *Dalton, Ev. p.* 358—— Bequest of Thomas Clarke, M. A., for library purposes, *ib.*——There is a printed and also a MS. catalogue; arrangement of the books, *ib.*——Particulars as to the library building, *ib.*——Monies appropriated to the support of the library; sum expended in the purchase, &c. of books; number and description of books, *ib.*——Names of principal benefactors, *ib.*——Practice as to admission and use of books, *ib.*

Queen's Reader in Botany. See *Botany, Professorship of.*

R.

Radcliffe Observatory, Oxford. The direction of this observatory is a distinct office, separate from any professorship, *Challis, Ev. p.* 107.

Rawlins, Philip. Scholarship at Christ's College founded by; annual value, *Cartmell, Ev. p.* 379; *Master and Fellows of Christ's College, Ev. p.* 392.

Readers in Arabic. See *Lord Almoner's Professor of Arabic.*

Readerships of Philosophy, &c. Particulars as to the four lectores ordinarii, or Barnaby lecturers, *Rep. p.* 48. 73.

Reading Parties:

Digest of Evidence respecting Reading Parties; Numbers of which they usually consist; and whether advantageous to the Students.

Doubtful value of reading parties, as respects the majority of the students, *Sir J. Stephen, Ev. p.* 111——These parties consist usually of six, eight, or ten, under the control of a tutor; the results are beneficial; the plan is to be preferred to remaining in college or the town, *Archdall, Ev. p.* 142——Reading parties not so common as formerly; usually consist of from two to twelve pupils, and remain with the tutor twelve weeks; no difference in progress observed in those who have gone on reading parties, as compared with those who read with tutors in Cambridge, *Arlett, Ev. p.* 146——Reading parties are very common; usually consist of four to six students; the good or bad results entirely depend upon the character of the party, *Blakesley, Ev. p.* 151.

Reading parties are frequently formed; they consist of from two to twelve or fourteen pupils, and last for three months; on the whole they are productive of good, *Cooper, Ev. p.* 154——Reading parties are common; when not too large, and care is exercised by the tutor in the selection of students, they are quite unobjectionable, *Frere, Ev. p.* 161——Reading parties are very common; the numbers vary from two to twenty, and continue twelve weeks, *Gunson, Ev. p.* 164——The system of reading parties is advantageous, but the charge of 30 *l.* is excessive; not so much objection to five or six, and the charge reduced one-half, *Hildyard, Ev. p.* 166.

One-tenth of the students join reading parties; good effects generally result, *Latham, Ev. p.* 173——Reading parties are common; are preferable to residence in college, except on the ground of expense, *Mould, Ev. p.* 177——Reading parties not so frequent as formerly; six or seven the average number; continue for twelve weeks; the effect of such parties in general advantageous, *Philpott, Ev. p.* 184——Numerous parties are formed; the number of each varies from two to twenty; the effect is not altogether what is intended, *J. J. Smith, Ev. p.* 190.

The number of students joining reading parties is not so great as formerly, *J. Smith, Ev. p.* 192——Reading parties are preferable to residing in college; students do not work so hard, however, *Swainson, Ev. p.* 196——The practice of forming reading parties is not increasing; the proportion of students spending their vacation that way is not considerable; the practice is healthful, and need not be unfavourable to the industry and morals of the pupils, *Thompson, Ev. p.* 200.

More is done by those permitted to remain in college than by those who join reading parties; the benefit of the latter is much to be doubted, *Warter, Ev. p.* 203——Reading parties are usual during the long vacation; the numbers are variable; continue during twelve weeks; their effect depends upon the tutor, and the set of students who happen to be thrown together, *Wratislaw, Ev. p.* 216——Few students of St. John's form reading parties, out of Cambridge, with private tutors during the vacation, *France, Ev. p.* 285.

Reading Room (University Library). Expediency of adding a reading room to the University library, *Rep. p.* 132; *Power, Ev. p.* 58.

Rede, Sir Thomas, Chief Justice of the Common Pleas (1524). Readerships founded by, *Rep. p.* 48.

Regent House. Composition thereof, *Rep. p.* 13.——*See* also *Non-Regent House.*

Registrary of the University. Mode of appointment of this officer, *Rep. p.* 11——Duties, *ib.*; *Romilly, Ev. p.* 63——Emoluments, and from what sources derived, *Rep. p.* 138; *Romilly, Ev. p.* 63——Letter from Rev. J. Romilly, registrary of the University, dated 6 November 1850, in answer to circular of the Commissioners of 30 October, *Corr. p.* 9.

Nature of the Government duties paid to the registrary on each class of degrees, *Romilly, Ev. p.* 63——Average annual produce thereof for the last eight years, *ib.*——Fees paid on matriculations and degrees, and how distributed, *p.* 63-65. 71——Tables of the number of matriculations and degrees of the several classes for different years, 1800 to 1850, *p.* 66 *et seq.*——Nature of the muniments preserved in the registrary; their condition; when, and to whom accessible; safety from fire, &c., *p.* 71.

Report, 1852—*continued.*

Regius Professorships. Details as to the foundation and endowment of the five Regius Professorships, *Rep. p.* 48, 49——Additional endowment of three of these professorships by James 1 and Charles 2, *p.* 49——Original statutable duties, *ib.*——Operation of the new statutes granted to Trinity College in 1844, in regard to the professorships, *ib.*——New statutes required, *ib.*——Duties and emoluments of the several professors specified, viz.: the Professor of Divinity, *p.* 50——The Professor of Greek, *ib.*——The Professor of Hebrew, *p.* 50–52——The Professors of Civil Law and Physic, *p.* 52–56——Present amount and sources of income of each Regius Professorship, *p.* 71, 72.

Rent of Rooms. See *Income and Expenditure.*

Répétiteurs. See *Poll Tutors.*

RESIDENCE:

1. *Of Professors.*
2. *Of Fellows of Colleges.*
3. *Of Students.*

1. *Of Professors:*

Providing rooms would undoubtedly facilitate the adoption of regulations for securing residence, which under existing circumstances is impossible, unless the professor be also fellow of this college, *Robinson, Ev. p.* 93——Inconvenience of attaching residences to particular professorships, *Stokes, Ev. p.* 99——Doubts whether *ex officio* houses would increase the residence of professors in the University; the recent laws enforcing clerical residence on livings has broken up the scientific society of Cambridge, *Whewell, Ev. p.* 102——It is highly desirable that houses should be provided for professors required to reside, *Cumming, Ev. p.* 103——The professorial system cannot be made complete unless with an adequate staff of professors being resident two out of three terms, *Henslow, Ev. p.* 115——Objections to attaching houses or chambers to the professorships; would not secure the residence of the professors, *Miller, Ev. p.* 135——Propriety of enabling any professor to require rooms at his own college, *Pryme, Ev. p.* 136——Such a provision would promote the inclination of professors to reside, *ib.*——Advantage of resident professors; the smallness of the pay of many not a sufficient reason for non-residence, *Babington, Ev. p.* 453.

The Regius Professor of Civil Law has no residence, but Trinity Hall permits him to occupy a set of rooms on payment of the usual rent, *Maine, Ev. p.* 78——The Regius Professor of Hebrew occupies rooms in Trinity College in virtue of his office, *Mill, Ev. p.* 90——The Plumian Professor resides rent-free at the observatory, *Challis, Ev. p.* 105——The Downing Professorship of Medicine has a lodge, &c. at the college, *Fisher, Ev. p.* 126.

To the following professorships no residences are attached, viz.: Margaret Professor of Divinity, *Blunt, Ev. p.* 87——Lord Almoner's Professor of Arabic, *Robinson, Ev. p.* 93——Lucasian Professor of Mathematics, *Stokes, Ev. p.* 94——Professor of Chemistry, *Cumming, Ev. p.* 103——Professor of Anatomy, *Clark, Ev. p.* 109——Professor of Botany, *Henslow, Ev. p.* 113——Woodwardian Professor of Geology, *Sedgwick, Ev. p.* 117——Lowndes' Professor of Astronomy, *Peacock, Ev. p.* 122——Professor of Mineralogy, *Miller, Ev. p.* 133.

2. *Of Fellows of Colleges:*

The collegiate statutes requiring the residence of the corporate members have to a great extent fallen into disuse, *Rep. p.* 171——Inexpedient to attempt to recal the severity of ancient statuable regulations in respect to residence within the college walls, *ib.*——Sufficient to enforce the residence of the master and scholars during term; the fellows should be left unfettered, *ib.*——Stringent requirements of the statutes of King's College as to residence; how far observed, *p.* 175, 176——Provision made in the statutes of Trinity Hall concerning residence and absence, *p.* 180——Any measure tending to secure *bonâ fide* residence most beneficial to the University; the non-residence of any members of a college is an abuse, but that of heads, professors, &c., especially mischievous, *J. J. Smith, Ev. p.* 189, 190——Not desirable that the fellows should be required generally to reside, *Swainson, Ev. p.* 196.

Residence—continued.

3. *Of Students:*

Period of residence prescribed by the Elizabethan statutes for the several degrees; comparison with the present actual practice; viz. Bachelor of Arts, *Ainslie, Ev. p.* 22. 25——Bachelor of Law, *p.* 23. 28——Bachelor of Physic, *ib.*——Master of Arts, *p.* 23. 29——Bachelor in Divinity, *p.* 24. 29——Doctor in Divinity, *ib.*——Doctor of Law, *p.* 25. 30——Doctor of Physic, *ib.*——The present length of academical residence, one reason preventing young persons from entering the University, *Amos, Ev. p.* 123——The regulation prohibiting the residence of students not admitted as members of an existing college should be carefully considered with a view to its modification, *Blakesley, Ev. p.* 151.——*See* also *Private Pupils. Terms.*

Revenues of the University and Colleges. See *Accounts of the University. Income and Expenditure. Vice-Chancellor of the University*, 3.

Revision of the Statutes. See *Statutes. Syndicates*, 4.

Rhetoric. Course of instruction required by the statutes of Elizabeth to be given by the lecturer of rhetoric, *Rep. p.* 20——Particulars as to the Barnaby Rhetoric Lectureship, *p.* 48. 73——The peculiar study of rhetoric has been superseded by the general study of the best Greek and Latin authors, *Ainslie, Ev. p.* 26.

Richardson, Sir John. Decision given by, in regard to the legality of the election of Mr. Henslow to the professorship of mineralogy in 1822, *Rep. p.* 67.

Richardson, Dr. Thomas. Bequest by, to St. Peter's College library, *Cocker, Ev. p.* 315.

Richmond, Lady Margaret, Countess of. Professorship of Divinity founded by, *Rep. p.* 46. 71; *Blunt, Ev. p.* 86——Christ's College also founded by, A. D. 1505, *Cartmell, Ev. p.* 370.

See also *Lady Margaret's Preacher. Lady Margaret's Readership in Divinity.*

Richmond School (*York*). Scholarships at Trinity Hall on Allen's foundation, appropriated to scholars from, *Geldart, Ev. p.* 333.

Richmondshire (*York*). Fellowships and scholarships at Christ's College limited to natives of, *Rep. p.* 159; *Cartmell, Ev. p.* 372. 375——The like as to fellowships at St. John's College, *Rep. p.* 162.

Riplingham, Dr. Scholarships at St. John's College founded by, *Rep. p.* 192.

Risley, Name of. Preference shown to candidates of the, for one of the Risley scholarships at Christ's College, *Master and Fellows of Christ's College, Ev. p.* 393.

Risley, Rev. Richard. Scholarships at Christ's College founded by; annual value, *Cartmell, Ev. p.* 380; *Master and Fellows of Christ's College, Ev. p.* 393.

Roberts, Mr. Scholarships at Magdalene College founded by, in 1591; annual value, *Warter, Ev. p.* 407.

Roberts, John, M.A., Fellow of Magdalene College. (Analysis of his Answers to Queries.)

[*Queries as to Classical Studies and Examinations:*]

Four public examiners in classics should be chosen annually for the tripos, and also to take part in the other classical examinations, *Ev. p.*287——The reading in classics should be limited to the best authors, *ib.*——The Chancellor's medal examination ought to be open to all classes of the mathematical tripos, and the classical tripos to all who have the ordinary degree, *ib.*——A special examination in a portion of classics to be selected two years before the examination might be added to the present classical tripos examination, *ib.*

Robinson, Rev. Thomas, D.D., Lord Almoner's Professor of Arabic. (Analysis of his Answers to Queries.)

[*Queries as to the Professorships:*]

Period of foundation of the Lord Almoner's Professorship of Arabic, *Ev. p.* 92—— No statutable requirements, *ib.*——Actual duties of the professorship, *ib.*——Amount of original endowment, *ib.*——Not subsequently increased, neither are there fees or extraneous sources of emolument, *ib.*——In whom appointment is vested, *ib.*——No library, *ib.*——Alterations suggested in the professor's duties, *ib.*——Good result likely to ensue from the establishment of scholarships, *ib.*——Particulars as to lectures, lecture rooms, fees and residence, *p.* 92, 93.

Robinson, Dr. Letter from, dated 8 November 1850, in answer to circular of the Commissioners of 30 October, *Corr. p.* 10.

Report, 1852—*continued.*

Robinson, Mr. Fellowships and scholarships at St. John's College founded by *Rep. p.* 192. 194.

Rockingham, Lord. Stipends for certain of the professors obtained by, in 1766, from the King, *Clark, Ev. p.* 108.

Rogers, Professor H. (United States). Specimens presented by, to the Woodwardian Museum, *Sedgwick, Ev. p.* 118.

Rokeby, Lady Jane. Fellowship at St. John's College founded by, in 17 Hen. VIII.; proviso in the deed regulating the election, *Rep. p.* 160——Appeal to the visitor, of which this fellowship was the subject in 1808; copy of the judgment of Dr. Dampier, Bishop of Ely, *p.* 160–162.

Rolfe, George. The first professor of anatomy (appointed in 1707) subsequently superseded, *Rep. p.* 60; *Clark, Ev. p.* 107, 108.

Romilly, Rev. Joseph, Registrary of the University. (Analysis of his Answers to Queries.)

[*Questions as to the Registrary:*]

Duties of the registrary, *Ev. p.* 63——Annual emoluments of the office, and from what sources derived, *ib.*——Government duties paid on matriculations and degrees, *ib.*——Average annual produce of the last eight years, *ib.*——Stamp duties paid at other Universities, *ib.*——Distribution of the fees received upon degrees, *p.* 63, 64——List of the total number of degrees in the last eight years, *p.* 64——Distribution of the fees received on matriculations, *p.* 64, 65.

Table showing the number of matriculations and degrees of different classes, distinguishing the different colleges for every year during the ten years 1840 to 1850, as well as their number for the years 1830, 1820, 1810, and 1800, *Ev. p.* 66–70——Particulars of the matriculation fees payable; additions made thereto since 1820, *p.* 71——The like in regard to degree fees, *ib.*——Nature of the muniments contained in the registrary, *ib.*——Conditions on which accessible, *ib.*——Condition of the room in which kept, *ib.*——Letter from, dated 6 November 1850, in answer to circular of the Commissioners of 30 October, *Carr, p.* 9——Valuable assistance received by the Commissioners from Mr. Romilly, *Rep. p.* 145.

Romney, Rev. J. Collection of drawings and sketches presented to the Fitzwilliam Museum by, *Rep. p.* 126.

Rotherham, Archbishop. Benefaction by, to the University library, *Rep. p.* 127; *Power, Ev. p.* 50.

Rotherham School (York). Exhibitions at Sidney Sussex College, on Freeston's foundation, open to students from, *Phelps, Ev. p.* 430.

Rouse, Mr. Series of orders agreed upon by, for the regulation of the Sadlerian lectureships, *Rep. p.* 68.

Royal College of Chemistry (London). Allusion made to this institution, *Rep. p.* 117.

Royal Mandate. Fees paid by persons admitted to degrees by Royal mandate, *Ainslie, Ev. p.* 34——Amount of stamp duty paid to Government on mandate degrees, *Romilly, Ev. p.* 63——Table showing the number of mandate degrees conferred in certain years, 1800 to 1850, *p.* 67 *et seq.*

Russian Government. Specimens presented by, to the Woodwardian Museum, *Sedgwick, Ev. p.* 118.

Rustat, Tobias. Estate left by, for the support of the University library, *Rep. p.* 127——Annual income derived by the University library from the Rustat fund; particulars as to its administration, *Power, Ev. p.* 53.

Rustication. A punishment resorted to in graver offences against college or University discipline, *Rep. p.* 146——In what cases resorted to, *Ainslie, Ev. p.* 31.

Rutland, County of. Foundation scholarships at Sidney Sussex College restricted to natives of, *Phelps, Ev. p.* 429.

S.

Sacrament, The Blessed. See *Communion, The Holy.*

Sadleir, Dame Mary. See *Sadlerian Lectureships.*

Sadlerian Lectureships. Date of foundation of these lectureships; and by whom founded, *Rep. p.* 68——Design of the founder, *ib.*——Nature and amount of the endowment, *p.* 68. 73——Statutes regulating the trust, *p.* 68——Mode of election of the lecturers, *p.* 68, 69——Their duties, *p.* 68——Recommendations of the Commissioners in regard to these lectureships, *p.* 69——Extract from the will of Dame Mary Sadleir, founding algebra lectureships, *App. p.* 462——Copy of the instrument mentioned in the foregoing, prescribing the duties, &c. of the professors, *p.* 463——Orders concerning the algebra lectures founded by Lady Sadleir, *p.* 465.

Proposition for augmenting one of the larger mathematical professorships from the Sadlerian fund, *Latham, Ev. p.* 173.

St. John's College. See *John's, St., College.*

St. Peter's College. See *Peter's, St., College.*

Saltfleet Haven. Lands lying in, left by Lady Anne Wray for the support of scholarships at Magdalene College, *Warter, Ev. p.* 407.

Sancroft, Archbishop. Books bequeathed by, to Emmanuel College library, *Archdall, Ev. p.* 428.

Sandwich Free School (Kent). Scholarships at Caius College, appropriated to students from, *Rep. p.* 187.

Sandys, Archbishop. Fellowships at St. Peter's College, the appointment to which is partly vested in the heirs male of, *Cookson, Ev. p.* 308.

Sandys, Rev. John. Exhibition at Queen's College in the gift of; value thereof, *Dalton, Ev. p.* 357.

Saxby, S. M. Specimens presented by, to the Woodwardian Museum, *Sedgwick, Ev. p.* 118.

Saxey, William. Fellowships at Gonville and Caius College founded by, *Chapman, Ev. p.* 326.

Scarning School (Norfolk). Exhibitions at Christ's College, on Dame Drury's foundation, with preference to students from, *Cartmell, Ev. p.* 378; *Master and Fellows of Christ's College, Ev. p.* 392.

SCHOLARSHIPS:

1. *Summary of the Scholarships at the different Colleges.*
2. *Queries circulated by the Commissioners.*
3. *Suggestions on this Head.*

1. *Summary of the Scholarships at the different Colleges:*

Enumeration and summary of the several scholarships at the different colleges, specifying the number, date of foundation, and value, viz.: at St. Peter's College, *Rep. p.* 185——Clare Hall, *p.* 185, 186——Pembroke College, *p.* 186——Gonville and Caius College, *p.* 186, 187——Trinity Hall, *p.* 187——Corpus Christi College, *p.* 188——King's College, *ib.*——Queen's College, *ib.*——St. Catharine's Hall, *ib.*——Jesus College, *p.* 189——Christ's College, *ib.*——St. John's College, *p.* 189–194——Magdalene College, *p.* 194——Trinity College, *p.* 194, 195——Emmanuel College, *p.* 195——Sidney Sussex College, *ib.*——Downing College, *ib.*

2. *Queries circulated by the Commissioners:*

Queries circulated by the Commissioners relative to the different scholarships of the foundation, or bye-scholarships at each college; the names of founders; mode of appointment; conditions of eligibility and tenure; value, &c.; also as to the expediency of removing the restrictions thereon, or consolidating the poorer foundations, *Ev. p.* 302——Answers thereto, in regard to the following colleges and halls, viz.: St. Peter's College, *Cookson, Ev. p.* 306, 307. 311, 312——Pembroke College, *Ainslie, Ev. p.* 318, 319, 320——Gonville and Caius College, *Chapman, Ev. p.* 325, 326. 328, 329——Trinity Hall, *Geldart, Ev. p.* 332. 334, 335. 338——Corpus Christi College, *Pulling, Ev. p.* 344. 346, 347——

Report, 1852—*continued.*

SCHOLARSHIPS—continued.

2. *Queries circulated by the Commissioners*—continued.

346, 347——King's College, *Okes, Ev. p.* 347, 348, 349——Queen's College, *Dalton, Ev. p.* 354, 355——St. Catharine Hall, *Philpott, Ev. p.* 362, 363-367. 369——Christ's College, *Cartmell, Ev. p.* 375-381. 387——St. John's College, *Tatham, Ev. p.* 396, 397, 398——Magdalene College, *Warter, Ev. p.* 403-405. 406-408. 412, 413——Trinity College, *Whewell, Ev. p.* 414. 417, 418——Emmanuel College, *Archdall, Ev. p.* 425, 426——Sidney Sussex College, *Phelps, Ev. p.* 429 .434——Downing College, *Worsley, Ev. p.* 437, 438. 445.

Queries circulated by the Commissioners respecting the yearly sums received by the scholars, &c. on the foundation, or bye-foundation, in the several colleges and halls, *Ev. p.* 303——Answers thereto, from the following, viz.: St. Peter's College, *p.* 313, 314——Pembroke College, *p.* 322——Trinity Hall, *p.* 342——King's College, *p.* 351, 352——Queen's College, *p.* 357——Christ's College, *p.* 391-394——St. John's College, *p.* 400——Trinity College, *p.* 423—— Emmanuel College, *p.* 427, 428.

3. *Suggestions on this Head:*

Expediency of establishing medical scholarships as rewards for superior merit, *Rep. p.* 96——Highly desirable that in every college there should be a competent number of well-endowed scholarships, in the election to which merit alone should be regarded, *p.* 184——Suggestion for the establishment of Arabic scholarships, *Robinson, Ev. p.* 92.

See also *University Scholarships.*

Scholefield, Rev. James, M.A., Regius Professor of Greek. Remarks with reference to the discharge by Professor Scholefield, of his duties as Regius Professor of Greek, *Rep. p.* 50——Letter from Professor Scholefield, dated 22 Nov. 1850, in answer to circular of the Commissioners of 30 Oct, *Corr. p.* 10——Explanation relative to the evidence furnished by Professor Scholefield, *Ev. p.* 92.

School Keeper. Amount received annually by the school keeper, *Rep. p.* 138——Amount derived from fees on degrees by this officer, *Romilly, Ev. p.* 64.

Schools. Remarks on the appropriations to schools having claims to particular fellowships and scholarships at different colleges, *Rep. p.* 184——The substitution of exhibitions to be conferred by the authorities of the school, in lieu of the existing claims to fellowships and scholarships recommended, *ib.*——Manner in which such a scheme of commutation should be carried out, *p.* 184, 185.

See also *Appropriations to Schools. Public Schools.*

Scotland. Stamp duty on the M.D. degree at the two Scotch Universities, *Romilly, Ev. p.* 63.

Scripture and Ecclesiastical History. Strong objection to the introduction of such subjects as Scripture and ecclesiastical history into a general examination, like that for B.A., *Thompson, Ev. p.* 198.

Scrivener, Rev. Matthew. Augmentation of stipend of the Frankland Fellow of St. Catharine Hall, made by, *Philpott, Ev. p.* 362.

Scrivener, Ralph. Scholarships at Pembroke College founded by, in 1601 ; amount of the allowance, *Rep. p.* 186 ; *Ainslie, Ev. p.* 318 ; *Master and Fellows of Pembroke College, Ev. p.* 322——Scholarship at Clare Hall founded by, *Rep. p.* 186.

Scroope, Lady Ann. Fellowship at Gonville and Caius College founded by, in 1502, *Rep. p.* 158.

Scrutators. Number of scrutators appointed ; mode of selection ; their duty, *Rep. p.* 11——Annual amount received by the two scrutators, *Rep. p.* 138——Annual amount derived from fees on degrees by the two scrutators, *Romilly, Ev. p.* 64.

Seaton Prize. Particulars as to this prize, *Ainslie, Ev. p.* 27.

Sedbergh Grammar School. Fellowships at St. John's College founded by Roger Lupton, limited to scholars educated at, *Rep. p.* 163——Fellowship at the same college founded by Henry Hebblethwaite, similarly limited, *ib.*

Scholarships at St. John's College on Hebblethwaite's foundation limited to students from this school, *Rep. p.* 164. 191. 194——Similar scholarships at the same college on Lupton's foundation, *Rep. p.* 194.

Scholarships at Christ's College on Otway's foundation, open to students from Sedbergh school, *Master and Fellows of Christ's College, Ev. p.* 392.

Report, 1852—*continued.*

Sedgwick, Rev. Adam, m.a., Woodwardian Professor of Geology. (Analysis of his Answers to Queries.)

[*Queries as to the Professorships:*]

History of the foundation and endowment of the Woodwardian Professorship of Geology, *Ev. p.* 115——Duties annexed by the original constitution, *ib.*——How far they have been practically observed, *p.* 115, 116——Duties now actually performed, *p.* 116.——Fees, *ib.*——Present annual value of the professorship, *p.* 116, 117——Mode of appointment, *p.* 117——There is no residence, *ib.*——State of the museum, library, &c. *ib.*——Cost of keeping up the collection; inadequacy of the funds, *ib.*——Account of the present collection, *p.* 117. 119——Benefactors of the museum, *p.* 118——Catalogue, *p.* 119——Opportunities of examination afforded to students, *ib.*——The letter of the founder's will not being complied with, a legal sanction for the modifications is essential, *ib.*——Satisfactory condition of the study; suggestions for its promotion, *p.* 119–121.

Sedgwick, William. Bequest by, to Queen's College library, *Dalton, Ev. p.* 358.

Senate, The. Constitution of the legislative body, *Rep. p.* 13—— Composition and mode of election of the Regent House, *ib.*——The Non-regent House, *ib.*——The Caput Senatus, *ib.*——Ordinary subjects requiring the votes of the senate, *p.* 13, 14—— Changes in the appointment and functions of the caput recommended by the syndicate, *p.* 14, 15.——Approval of these recommendations, *p.* 15.

The regulation of the course of study and forms of examination should be left to the free judgment and discretion of the Univesity senate, *Rep. p.* 23——In any modification of the University charter, the resident members of the senate should form a separate house, the consent of which should be requisite for any change in the University regulations, *Blakesley, Ev. p.* 150——In the event of such powers being entrusted to the resident members, they might be trustees for any fund for endowing existing or new professorships, *ib.*——Want of power in the senate to enforce payment of taxes; it should have such power, *Babington, Ev. p.* 453.

Sermons. Latin and English sermons required to be preached by candidates for the degree of B.D., and also D.D., *Ainslie, Ev. p.* 29; *Jeremie, Ev. p.* 76——Fees paid by any one preaching a sermon in the University church, *Ainslie, Ev. p.* 34.

Servants of Colleges. College servants are generally highly paid, but men of great trust are required, and their incomes should not be much reduced, *Swainson, Ev. p.* 193—— Expediency of making up their incomes by fixed money payments, and the abolishing the present system of fees and perquisites, *ib.*——Privileges conceded to the superior servants of Trinity College; none are accorded to the ordinary servants; all fees and perquisites are discountenanced, *Thompson, Ev. p.* 196——The system of paying college servants by perquisites instead of salaries increases the expenses of students, *Wratislaw, Ev. p.* 212.——*See* also *Expenses of Students. Perquisites.*

Shaw, Rev. Joseph, b.d., Senior Fellow of Christ's College. (Analysis of his answers to Queries.)

[*Queries as to Expenses and Tuition:*]

Impracticability of diminishing the necessary expenses of a student's residence in college, *Ev. p.* 185——Control over extravagant expenditure vested in the college tutors, *ib.*——Lectures at this college, *ib.*——Sufficiency of the present staff of tutors, *ib.*—— Extent to which private tuition supersedes that of the college tutors, *ib.*——Charges for private tuition, *ib.*——Private tuition occupies many men of eminence, *ib.*——Objection to the imposition of any restriction on the system, *p.* 185, 186.

Sizarships at this college, *p.* 186——Objections to a hall or college for poor students only, *ib.*——Particulars relative to the college examinations; are pushed too far, *ib.*—— There is no matriculation examination at this college, *ib.*——Probable result of a matriculation examination by the University, *ib.*——Sufficiency of the staff of tutors, &c. at this college, *ib.*——Witness is unfavourable to a diminution of the terms, *ib.*——Residence during the vacation, *ib.*——Remarks as to lodgings, *ib.*

Sheppey Rents. Rent-charge, so called, left to Queen's College library, *Dalton, Ev. p.* 358.

Sherlock, Thomas, Bishop of London. Scholarship at St. Catharine Hall founded by, to go with the library-keepership of the college, *Philpott, Ev. p.* 359. 367——The residue of the rents of the property left being divided, to be applied to the purchase of books, &c., *ib.* 359, 360——Bequest of books also made by Dr. Sherlock, *p.* 360——Property left by, to St. Catharine Hall, as an addition to the scholarship usually given to the master's sizar, *p.* 364.

Shrewsbury School. Scholarships at St. John's College, on Aston's foundation, appropriated to students from, *Rep. p.* 189. 194——Fellowships at Magdalene College, on Millington's foundation, restricted to sudents from, *Warter, Ev. p.* 406——Scholarships at the same college also on Millington's foundation, open to students edcucated at, *p.* 407.

Sibbs,

Report, 1852—*continued.*

Sibbs, Dr. Richard (formerly Master of St. Catharine's Hall). Stipend of scholarship called Dr. Sibbs' Scholarship at St. Catharine's Hall, *Philpott, Ev. p.* 364——Books given by Dr. Sibbs to the library of St. John's College, *Tatham, Ev. p.* 403.

Sidney Sussex College:

1. *Revenues and Expenditure.*
2. *The Mastership.*
3. *Fellowships.*
4. *Scholarships.*
5. *Sizarships.*
6. *Matriculations and Degrees.*
7. *Tuition and Examinations.*
8. *Students; their Discipline and Expenses.*

1. *Revenues and Expenditure:*

Gross income of the college at the present time, *Rep. p.* 196——Remarks on the measures taken by the college for running out beneficial leases, *p.* 198.

The whole of the property of this college, with a single exception, is let at rack-rent; nothing has been derived from the sale of timber, there being but little, and sales of that having only been made to meet expensive improvements, *Master and Fellows of Sidney Sussex College, Ev. p.* 434——The college has no property in tithes, *ib.*——Gross annual income derived from all sources, and expenditure of same, *p.* 434, 435——Amount of the advowson fund possessed by the college, and particulars as to its creation, *p.* 435——Manner in which the library has been formed, and is now supported; condition of the library room, *ib.*

2. *The Mastership:*

The power of choosing the master is vested in the fellows, *Rep. p.* 152——Source and amount of the emoluments of the mastership, *p.* 155——Mode of election of the master and fellows of this college; qualifications required of them, and restrictions attached to their offices, *Phelps, Ev. p.* 428, 429——Leave of absence from college residence permitted to the master, fellows and scholars, *p.* 429——Duties of the master and fellows, *ib.*

3. *Fellowships:*

Number of foundation and bye-fellowships in this college, distinguishing whether open or restricted, *Rep. p.* 157——Details as to the appropriated fellowships and scholarships at this college, *p.* 164. 169——Value of a foundation fellowship, *p.* 167——Academical standing required of candidates for fellowships, *p.* 169——The B.D. degree is an essential requisite in the college statutes, and is complied with in practice, *p.* 170——The original statutes of the college did not permit fellowships to be held after the standing requisite for the D.D. degree had been attained, *p.* 182——Amount of stipends to college officers as fixed by the statutes, and sums received by them at the present time, *Phelps, Ev. p.* 429, 430——List and particulars of the different bye-foundations, *p.* 430, 431.

4. *Scholarships:*

Number of scholarships in this college; their value, and names of founders, *Rep. p.* 195——Particulars as to the scholarships; restrictions attached thereto, &c., *Phelps, Ev. p.* 429.

5. *Sizarships:*

Number of sizars admitted at this college, *Rep. p.* 195——The whole provision of the college is all its foundations, and in the spirit in which they are observed may be considered as for the maintenance and support of poor scholars, *Phelps, Ev. p.* 433. 434——The admission of sizars is not statutably obligatory, but the practice now is to admit four, *p.* 434.

6. *Matriculations and Degrees:*

Number of students entered at Sidney Sussex College in each year, ending 10 October 1844 to 1848, *Rep. p.* 145——Summary of the number of members of the college in 1851, *ib.*——Number of residents on 14 November 1851, *ib.*——Table, showing the number of matriculations at this college in the years 1800, 1810, 1820 and 1830, and in each of the ten years, 1840 to 1850, *Romilly, Ev. p.* 66——Similar table of the number of degrees of the several grades granted in the same periods, *p.* 67–70——Total number of degrees granted in the last eight years, *p.* 70.

7. *Tuition and Examinations:*

Mode of appointment of the college tutors, and duties performed by them, *Phelps, Ev. p.* 429——Course of collegiate instruction pursued, *p.* 431, 432——Number of examinations, and periods at which they are held; classification of students made after these examinations; prizes given, *ib.*——Relation which the collegiate instruction and examinations bear to the public examinations of the university, *p.* 432.

Report, 1852—*continued.*

Sidney Sussex College—continued.

8. *Students; their Discipline and Expenses:*

Statutable provisions as to pensioners; departure in present practice from these provisions, *Phelps, Ev. p.* 431——Hours at which Divine service is performed in the college chapel; attendance at same expected from students, *ib.*——Attendance required from students at the college lectures, and at dinner in the hall, *p.* 432——Rule as to dinners being supplied to students in their own rooms, *ib.*——Hours at which the college gates are closed, and practice as to students coming in after that hour, *ib.*

Regulations enacted at different periods relative to the expenses of students; circumstances affecting this question, *Phelps, Ev. p.* 432, 433——Estimates of the necessary expenses of the different classes of students, *p.* 433——Probable actual average expenses, *ib.*——The item of private tuition is excluded from these estimates; in no case is private tuition absolutely necessary, *ib.*——Remarks as to the existing facilities possessed by students to pass through a college residence with economy, *p.* 434——The college authorities discourage, to the fullest extent, credit being given to students by tradesmen; the only remedy to be suggested, in addition to those already in operation, would be the absolute prohibition of the use of wine and horses, *ib.*

Sigo, William. Scholarship at Caius College founded by, in 1507, *Rep. p.* 187.

Simpson, Mr. Fellowship at St. John's College founded by, in 21 Henry VIII., *Rep. p.* 162.

Sizarships:

1. *Generally.*
2. *In regard to each College.*

1. *Generally:*

Scale of fees payable by sizars for college tuition, *Rep. p.* 82——Fees paid by a sizar on matriculation, *Ainslie, Ev. p.* 32; *Romilly, Ev. p.* 63. 65——Number of matriculations of sizars in certain years 1800 to 1850 at each college, *Romilly, Ev. p.* 66——False estimate prevailing of the necessary expenses incurred by the poorer class of students; the necessary expenses of a sizar need not exceed 45 *l.* per annum, *Peill, Ev. p.* 178——Sizars formerly were very distinct from the rest of the college, the liberal feeling of the time prevailed to abolish outward distinctions, *J. J. Smith, Ev. p.* 188.

2. *In regard to each College:*

Pembroke College:

Three exhibitions of 12 *l.* per annum each at this college for sizars, who are selected by the tutor, *Arlett, Ev. p.* 144.

Corpus Christi College:

Six sizarships at this college, worth about 20 *l.* a year, *Mould, Ev. p.* 177.

St. Catharine's Hall:

Two sizarships at this college, one of 42 *l.* per annum, with rooms; the other 11 *l.* with rooms and commons; both are appointed by the master, *Philpott, Ev. p.* 181.

Christ's College:

Four sizarships, of about 30 *l.* per annum each, at this college, given to students having the strongest claim on the score of poverty, *Gunson, Ev. p.* 163; *Hildyard, Ev. p.* 166; *J. Smith, Ev. p.* 192; *Wratislaw, Ev. p.* 213——The sizars receive 4 *l.* a year, with commons, &c., the value annually amounting to 24 *l.* or 26 *l.*, *Swainson, Ev. p.* 193, 194.

St. John's College:

Number of sizarships at St. John's College; examination had for them; principle upon which they are filled up; the latter being irrespective of mere poverty, merit being the only practicable or desirable principle of guidance, *France, Ev. p.* 284.

Trinity College:

Sixteen foundation sizars at this college; particulars as to their income; the money value of each from 50 *l.* to 60 *l.* per annum; the number of sub-sizars unlimited; the only advantage possessed by them is, to pay less admission and tutors' fees, and the admission to a foundation fellowship, *Blakesley, Ev. p.* 148; *Frere, Ev. p.* 160——The value of the sizarships varies from 50 *l.* to 70 *l.* per annum, *Thompson, Ev. p.* 198——The value may be considered as about 45 *l.* a year, *Whewell, Ev. p.* 206.

See also *Chapel Clerkships. Poor Students. Sub-sizarships.*

Skerne, Mr. Fellowships and scholarships a St. Catharine's Hall, founded by; annual stipend; mode of election, *Philpott, Ev. p.* 362. 365.

Shipton Grammar School (*York*). Exhibitions at Christ's College on Petyt's foundation, open to students from, *Cartmell, Ev. p.* 379, 380 ; *Master and Fellows of Christ's College, Ev. p.* 392, 393.

Slade, Mr. Scholarships at St. Peter's College founded by, *Cookson, Ev. p.* 308.

Small Colleges. Difficulty experienced by the smaller colleges in providing instruction in sufficient amount and quality for the present University examinations, *Rep. p.* 79—— Means of meeting such difficulties, *ib.*——Efficiency of tuition that might be secured from a confederation of the smaller colleges with that view; such an union might be extended to the free election of scholars and fellows indifferently from among the students of the colleges so united, *Blakesley, Ev. p.* 150——Proposition for an University examination for candidates for fellowships in the smaller colleges, *Wratislaw, Ev. p.* 216.

Smallwood (*Chester*). Estate at, belonging to the Lowndes' Professor of Astronomy, *Peacock, Ev. p.* 121, 122.

Smart, William. Fellowship at Pembroke College founded by, in 1598, *Ainslie, Ev. p.* 318 ——Scholarships at the same college also founded by, in 1598; amount of the allowance, *Rep. p.* 186; *Ainslie, Ev. p.* 318——Present emoluments attached to these scholarships, *Master and Fellows of Pembroke College, Ev. p.* 322.

Smith, Dr. Augmentation of the endowment of the Plumian Professorship by Dr. Smith, *Challis, Ev. p.* 104.

Smith, Rev. J., M.A., Fellow of Christ's College. (Analysis of his Answers to Queries.)

[*Queries as to Expenses and Tuition :*]

The expenses of college residence cannot be materially diminished, *Ev. p.* 191—— They are not increased by privileges granted to tradesmen, *ib.*——Lectures given at Christ's College, *ib.*——Classification of students, *ib.*——Attendance on lectures is mostly compulsory, *ib.*——The staff of lecturers is sufficient to prepare students for the examinations; case in which private tuition may be thought necessary, *ib.*——Charges for private tuition, *ib.*——A few men of eminence are permanently occupied as private tutors, *ib.*——Some lecture in classes and some separately, *ib.*

Candidates for the higher honours seldom attain that distinction without the aid of private tuition, *Ev. p.* 191——The college lectures would be sufficient for candidates for the ordinary examination for the first degree, *ib.*——It is not expedient to restrict private tuition by enactment, *p.* 192——Number and value of sizarships at this college; principle on which they are filled, *ib.*——Objections to any institution for poor students exclusively, *ib.*

College and university examinations, *Ev. p.* 192——They are sufficiently numerous and difficult, but this has not caused a resort to private in preference to college tutors, *ib.*——There is no matriculation examination at this college, *ib.*——Advantages of a general matriculation examination by the University, *ib.*——Recommendation for reducing the terms to nine, *ib.*——And for lengthening the May term, *ib.*——Permission given to students to reside in the long vacation at college, *ib.*——Diminution in the number of students joining reading parties now as compared with formerly, *ib.*——Desirableness of students living in college in preference to lodgings, *ib.*

Smith, John (*President of Magdalene College*). Fellowships and scholarships at Magdalene College founded by, in 1638; present annual value, *Warter, Ev. p.* 406, 407.

Smith, John, M.A. (*Fellow of Queen's College*). Books given by, to Queen's College Library, in 1652, *Dalton, Ev. p.* 358.

Smith, Rev. J. J., M.A., late Fellow and Tutor of Gonville and Caius College. (Analysis of his Answers to Queries.)

[*Queries as to Expenses and Tuition :*]

Impossible to reduce the expenses of college residence in any material degree; misapprehension in regard to these expenses, *Ev. p.* 186, 187——Power of the college tutors to restrain extravagance, *p.* 187——Difficulty of effectually checking extravagant practices; suggestion as to any legislation that might be applied to this evil, *ib.*——Subjects of lectures, and manner in which students are classified for them, *ib.*——Attendance at the lectures, *ib.*——Circumstances which detract from the efficiency of the staff of lecturers, *ib.*

Charges for private tuition, *Ev. p.* 187——Extent to which private tuition is carried, *p.* 188——Objections thereto, *ib.*——It is now an established occupation, *ib.*——But few eminent men are engaged in it, *ib.*——Private tutors have exchanged the former plan of individual instruction for that of classes, *ib.*——Checks that might be successfully imposed on private tuition, *ib.*——The scholarships and exhibitions at this college are

Report, 1852—*continued.*

Smith, Rev. J. J. (Analysis of his Answers to Queries)—continued.

[*Queries as to Expenses and Tuition*]—continued.

given according to merit, *Ev. p.* 188——Provision for poor students, *ib.*——Questionable expediency of giving aid independently of merit or attainment, *ib.*——Experience is opposed to the permanence of these preferments to students, *ib.*——A college for poor students only would fail unless well endowed, *ib.*

College examinations, *Ev. p.* 188, 189——Private tuition is prejudicial, but its prevalent use is an obstacle to a student's dispensing with it, *p.* 189——Increase of private tutors, *ib.*——Professors' lectures are unattractive from their not leading to any positive end, *ib.*——At no college is there a matriculation examination, *ib.*——If such an examination were instituted it would be preferable to make it a general one by the University, *ib.*——No serious difficulty has arisen in filling the college offices, *ib.*——Non-residence should be discouraged, *p.* 189, 190.

Suggestions for improving the college and academical system, *Ev. p.* 189——And for the reduction and re-arrangement of the terms, *p.* 190——Residence in college is permitted during the vacation, *ib.*——Prevalence of reading parties; they do not fully answer their intention, *ib.*——Evil of the college losing sight of its students in the vacation, *ib.*——Lodgings are much resorted to; rules as to them, *ib.*

General remarks:—Spirit of improvement existing in the University; amendment needed in the law faculty; worn-out state of the Divinity faculty; necessity for accelerating the succession of fellowships, and strengthening the power of the University to enforce discipline; advantage of enabling the University to take contributions for specific purposes from its members, especially for the library; evil of the present mode of deciding questions in the caput; oppressive nature of the statute respecting Grand Compounder's Acts, *Ev. p.* 190, 191.

Smith, Leonard. Fellowship at Sidney Sussex College founded by term of tenure, *Rep. p.* 169; *Phelps, Ev. p.* 430.

Smith, Mr. Emoluments as assistant at the University library, *Power, Ev. p.* 51, 52.

Smith, Robert. One of the early Plumian professors, *Rep. p.* 59.

Smith's Prize:

1. *Advantage of postponing the Examination for this Prize.*
2. *Objections to such Postponement.*

1. *Advantage of postponing the Examination for this Prize:*

Expediency of postponing the examination for this prize for one or two years considered, *Rep. p.* 114——Advantage of deferring the examination for the Smith's prize till a later period after that for the B. A. degree, *Goodwin. Ev. p.* 237.

2. *Objections to such Postponement:*

To defer the examination for the Smith's prize would not operate as an inducement to the prosecution of mathematical studies after the attainment of the B. A. degree, but an alteration in the subject of the prize might be advantageously made, *Gaskin, Ev. p.* 230——It is not advisable to defer the examination for the Smith's prize in order to furnish such an inducement, nor to establish any prizes to be gained by examination; but prizes for essays would accomplish the desired result, *Hopkins, Ev. p.* 247——The postponement of the Smith's prize, or the institution of prizes for graduates, would not promote this object in any material degree, *Mould, Ev. p.* 252——The postponement of the examination for the Smith's prize would not encourage the study of mathematics in the University, *Philpott, Ev. p.* 265.

Limited influence which the Smith's prizes have on the studies of the University, *Stokes, Ev. p.* 267 *d*—— Deferring the examination of the Smith's prizes would have some tendency to promote the continuance of mathematical studies, *ib. p.* 267 *d*, 267 *e*—— Difficulty of anticipating the effect of deferring the Smith's prizes for a period of one or two years after the examination for honours, *Whewell, Ev. p.* 273——Probability that, in the event of such an alteration, the highest wranglers might not be competitors for the prizes in question, *ib.*

Smoult, Dr. The Professorship of Moral Philosophy augmented by, *Whewell, Ev. p.* 99, 100——Books and MSS. given by, to the library of St. John's College, *Tatham, Ev. p.* 403.

Solicitors. See *Attornies.*

Somerset, County of. Certain of the Duchess of Somerset's scholarships at St. John's College open to natives of, *Rep. p.* 194.

Somerset, Duchess of. Scholarships at St. John's College founded by; amount of the allowance, *Rep. p.* 194; *Tatham, Ev. p.* 400.

Report, 1852—*continued.*

Somersham (*Huntingdon*). Fellowships at St. Peter's College restricted to natives of, *Cookson, Ev. p.* 308.

Somersham Rectory (*Hunts*). Annexed by James I. to the Regius Professorship of Divinity; annual value thereof, *Rep. p.* 49. 71; *Jeremie, Ev. p.* 76.

Southampton, Henry Wriothesley, Earl of. Books and MSS. given by, to the library of St. John's College, *Tatham, Ev. p.* 402, 403.

Southwell Collegiate Church. Fellowships at St. John's College limited to choristers of the Chapter of Southwell, *Rep. p.* 162——The suppression of these rights desirable, *ib.*

Spalding, William, and John Spalding. Scholarship at St. John's College founded by 42 Eliz., *Rep. p.* 192. 194.

Spell, Thomas. Sum of money given by to the library of St. John's College, *Tatham, Ev. p.* 403.

Spencer, Dr. John. Scholarship at Corpus Christi College founded by, in 1687, *Rep. p.* 188.

Spendluff, Mr. Fellowship at Magdalene College founded by, in 1594; present annual value, *Warter, Ev. p.* 405——Scholarships at the same college also founded by, in 1594; annual value, *ib. p.* 407.

Spicer, Mr. Scholarship at Trinity Hall founded by, *Rep. p.* 187; *Geldart, Ev. p.* 332.

Spinning House. Recommendation that the University give up the Spinning-house, *Gunson, Ev. p.* 165.

Spinola, Benedict. Estate left by Lord Audley to Magdalene College, sold to, in 1574, *Warter, Ev. p.* 404.

Spurslow, William. Scholarship at St. Catharine Hall founded by, annual allowance, *Philpott, Ev. p.* 364. 369.

Stafford, Mrs. Scholarships at St. Catharine Hall founded by; annual value, *Philpott, Ev. p.* 365. 369.

Staffordshire. Fellowships at St. John's College, on Beresford's foundation, open to natives of, *Rep. p.* 160——Fellowship at the same college on Bailey's foundation, also open to natives of, *p.* 162——One of Cardinal Morton's scholarships also at St. John's College, open to natives of, *p.* 192.

Staggins, Dr. Was appointed the first professor of music in 1684, *Rep. p.* 68.

Stamp Duty. Recommendation that the stamp duty on matriculations, degrees, &c., be remitted, *Rep. p.* 140——Amount of this tax on each class of degree, &c.; produce thereof, *ib.*——No similar tax in any other University of the United Kingdom, *ib.*——The remission of the duties will render necessary a revision of the grants voted by Parliament in aid of the stipends of certain professors; suggestions in regard thereto, *ib.*

Amount of duties paid to the registrary on matriculations and degrees, *Romilly, Ev. p.* 63——Average annual produce of these duties for the last eight years, *ib.*——The stamp duties payable at Dublin now the same as at Cambridge and Oxford, *ib.*——Stamp on the M.D. degree at the two Scotch universities, *ib.*——Great satisfaction the reduction or removal of the stamp duties would give, *p.* 71——The amount paid to the professors of the University is about one-third of the sum levied as a tax on degrees, *Clarke, Ev. p.* 108——Indefensible character of this tax, *ib.*——The abolition of the tax would be a great boon, *Latham, Ev. p.* 172——The taxes on degrees should be remitted, *Peill, Ev. p.* 179.

Stanton, Long (*Cambridge*). Property at, left by Mr. John Smith for the support of fellowships at Magdalene College, *Warter, Ev. p.* 406.

STATUTES:

1. *Of the University.*
2. *Of the Colleges.*

1. *Of the University:*

Early history of the statutes; changes effected at different periods, *Rep. p.* 2, 3——Injunctions of King Henry VIII, *p.* 2——Code of statutes promulgated by Edward VI, *ib.*——Ordinances substituted by Queen Mary, *ib.*——Act of Parliament and letters patent of Queen Elizabeth, *p.* 2, 3——Present state of the statutes, *p.* 3——Re-arrangement and consolidation expedient, *ib.*——Syndicate appointed by the University in 1849 to effect this; draft of an amended code drawn up by them, *ib.*——The reservation and exercise of a power of revision and amendment of statutes the only means by which they can be made permanently efficient, *p.* 47.

Report, 1852—*continued.*

STATUTES—continued.

2. *Of the Colleges:*

Early origin of college statutes; sources resorted to by the Commissioners for the statutes of the several colleges, *Rep. p.* 150——Colleges which have furnished copies of their statutes to the Commissioners, *ib.*——Revisions of the statutes of several of the colleges effected of late years, *ib.*——Urgent importance of a revision of the college statutes, *p.* 151——Causes which render this necessary glanced at, *p.* 151, 152——The oath to observe the statutes is enforced on all persons becoming members of the collegiate foundations; serious objections to its enforcement, *p.* 152.

See also *the several Colleges under their respective names.*

Steeple Ashton Parsonage (*Wilts*). Left for the support of Drury's fellowship at Magdalene College, *Warter, Ev. p.* 406.

STEPHEN, RIGHT HON. SIR JAMES, K.C.B., PROFESSOR OF MODERN HISTORY. (Analysis of his Answers to Queries.)

[*Queries as to the Professorships:*]

Date of foundation and founder of the Professorship of Modern History, *Ev. p.* 111——Duties assigned at the period of foundation, *p.* 111, 112, 113——Duties actually performed at the present time, *p.* 111, 112——Amount of original endowment, *p.* 111——Source from whence now paid, *ib.*——No fees or other emoluments; present value of the professorship, *ib.*——Manner of appointment and qualification requisite for holding same, *ib.*——Collection of books attached to the professorship; is inconsiderable; no fund available for its maintenance, *ib.*

General remarks on the studies of the University, and the hinderances by which they are obstructed; reforms suggested, *Ev. p.* 111, 112——Condition of the study of modern history, *p.* 112——Duties of the professorship as defined by the letters patent of foundation, *ib.*——Requirements of the letters patent in regard to the appointment of preceptors of modern languages; effect given thereto, *ib.*——Scholars formerly appointed for studying modern history and languages, *p.* 112, 113.

Stephen, Right Hon. Sir James. Steps taken by him on his appointment to the professorship of modern history, in regard to the appointment of teachers of modern languages, *Rep. p.* 28. 61, 62——Lectures delivered by him, *p.* 62——Letter from Sir James Stephen, dated 13 November 1850, in answer to circular of the Commissioners of 30 October, *Corr. p.* 11, 12——Letter from Sir J. Stephen, dated 4 February 1852, to the Commissioners, relative to the terms of the letters-patent constituting the professorship of modern history, *Ev. p.* 112.

STEVENTON, REV. E. H., M.A., LATE FELLOW OF CORPUS CHRISTI COLLEGE. (Analysis of his Answers to Queries.)

[1. *Queries as to Mathematical Studies and Examinations:*]

Need that the University stands in of a set of really standard and satisfactory books, *Ev. p.* 266——The system of resorting to any books and MSS. is to be deprecated, *ib.*——Tendency of the mathematical course of study, as determined by the examiners, to become increasingly analytical and symbolical in character; few students derive any advantage, *ib.*——The hasty introduction of the new subjects, such as those of heat, electricity, &c., into the course of reading, is not to be recommended; if admitted at all, they should be made subjects of special prizes subsequent to the B.A. degree, *ib.*

Grave objections to which the present plan of classification, after examination, of candidates for honours is open; suggestions for its improvement, *Ev. p.* 266, 267——The establishment of an University examination prior to admission, recommended, *p.* 267——And also of an examination by the University at the end of every academic year, *ib.*

Stipends of Professors. Present distribution of the Parliamentary grant in aid of the stipends of certain professors, *Rep. p.* 140——Revision thereof recommended, *p.* 140, 141.

Particulars with reference to each Professor, viz.:

The Regius Professor of Civil Law, *Maine, Ev. p.* 77——Professor of Chemistry, *Cumming, Ev. p.* 102——Professor of Anatomy, *Clark, Ev. p.* 108——Regius Professor of Modern History, *Sir J. Stephen, Ev. p.* 111——Professor of Botany, *Henslow, Ev. p.* 113——Professor of Mineralogy, *Miller, Ev. p.* 133——Origin of the Parliamentary grant made towards the payment of the stipends of certain of the professors, *Clark, Ev. p.* 108——The withholding of the grant made to the professor of modern history would render the Treasury liable to the payment charged upon the Crown revenues by George the First, *Sir J. Stephen, Ev. p.* 111.——*See* also *Stamp Duty.*

Report, 1852—*continued.*

Stokes, G. G., M.A., Lucasian Professor of Mathematics. (Analysis of his Answers to Queries.)

[1. *Queries as to the Professorships:*]

Period of foundation of the Lucasian professorship, *Ev. p.* 93——Duties performed, *ib.*——Fees taken; their annual amount, *ib.*——Present income of the professorship, *p.* 93, 94——No residence, museum, library, or apparatus attached, nor funds available for instruments, &c., *p.* 94——General subjects to which the lectures refer, *ib.*——Inexpediency of altering the statutes or regulations relating to the professorship, *ib.*——Suggestions for the establishment of a museum of physical instruments, *ib.*

Copy of the deed of foundation of the professorship, *Ev. p.* 95——Grant of Charles II. confirming the foundation, *p.* 96——Grant of Charles II. containing a dispensation to the professor to hold a fellowship without taking holy orders, *p.* 97.

Number and capacity of the lecture-rooms belonging to the University, *Ev. p.* 97——The like in regard to museums, *ib.*——Great want of a museum of physical instruments and of a chemical laboratory, *ib.*——Division of the lecture-rooms among the several professors, *p.* 98——More ample provision of lecture-rooms that will be required if the professorial system of the University be extended, *ib.*——Fees exacted by some of the professors for attendance on their lectures, *ib.*——Regulations agreed to by the several professors in regard to the certificate required of candidates for the B.A. degree not being candidates for honours, *p.* 98, 99——Remarks on the objects and character of the mathematical lectures delivered in this University, *p.* 99——Objections to attaching residences to particular professorships, *ib.*

[2. *Queries as to Mathematical Studies and Examinations:*]

Particulars relative to the mathematical portion of the examination for ordinary degrees, *Ev. p.* 267——General character of the alterations made of late years in the examination for mathematical honours, *p.* 267 *a*——Course of mathematics required for an ordinary degree; circumstances determining the place of a candidate for mathematical honours on the tripos, *ib.*——Average number of candidates for mathematical honours; duration of the examination; exposition of the system of "marks," by which the relative proficiency of candidates is arrived at, *ib.*——Previous to 1848 there was a slight tendency to lower the qualification for a place on the mathematical tripos; regulations made herein in 1848, and subsequently; effects of these regulations, *ib.*——Average annual proportion of students taking the B.A. degree who obtain mathematical honours, *ib.*——If the examination is to be entirely by written answers, the present plan is extremely good; the papers might be shortened with advantage; the introduction of *vivâ voce* questions is desirable, *p.* 267*b*, 267*c*——Duties of the board of mathematical studies; substance of the reports already made by them; effect of their recommendations on the discretionary powers of the moderators and examiners, *p.* 267 *b*——Limitation of subjects of examination already recommended, *ib.*

General efficiency of the present plan of examination, *Ev. p.* 267 *b*, 267 *c*——Any change made in the present system should be to further curtail it, *p.* 267 *c*——Definition of the public tuition of the University; to supply the slight deficiencies in its completeness would not be a matter of any difficulty, *ib.*——Elementary books in use in the University, *ib.*——Use made of MSS.; the system of instruction by their means is part of the system of private tuition, *ib.*——The mathematical course is decidedly more analytical now than formerly, *p.* 267 *d*——Remarks suggestive of the best method of study, *ib.*——Satisfactory working of the present proportion of problems to bookwork questions in the examinations; difficult character of the problems; their solution depends on an innate talent for mathematics; the practice of giving students more problems to solve than the time allowed will admit of, has the advantage of enabling them to select such as they are competent to answer, *ib.*

Mode in which candidates for mathematical honours proceed in preparing themselves for the examination, *ib.*——Class of gentlemen who adopt the profession of a private tutor, *ib.*——Private tuition increases the expense of a university education, *ib.*——Indirect inducements arising in the University for the continuance of the study of mathematics after the B.A. degree, *ib.*——Limited influence which the Smith's prizes have on the studies of the University, *ib.*——Deferring the examination for the Smith's prizes would have some tendency to promote the continuance of mathematical studies, *p.* 267 *d*, 267 *e*——Particulars respecting the Adams' prize, *p.* 267 *e*——The institution of a few large prizes would have the effect of encouraging the study of mathematics and natural philosophy, after the B.A. degree, but many small prizes would not be productive of such a result, *ib.*

Stokes, Professor. Remarks upon the manner in which he discharges his duties as Lucasian professor of mathematics, *Rep. p.* 57——Letter from Professor Stokes, dated 8 November 1850, in answer to circular of the Commissioners, of 30 October, *Corr. p.* 10.

Stokes, Rev. G. H. (*Fellow of Caius College*). Specimens presented by, to the Woodwardian Museum, *Sedgwick, Ev. p.* 118.

Report, 1852—*continued.*

Stokys, Matthew (*Fellow of Gonville and Caius Colleges*). Fellowship at Gonville and Caius Colleges founded by, in 1635, *Chapman, Ev. p.* 326——Scholarships at the same college also founded by, in 1639, *Rep. p.* 187.

Stuart, Dr. Scholarship at Pembroke College founded by; its value and term of tenure, *Rep. p.* 186; *Ainslie, Ev. p.* 318; *Master and Fellows of Pembroke College, Ev. p.* 322.

Students. Tables showing the number of students entered in the years ending 10 October 1844–48; and number of residents on 14 November 1851, distinguishing each college, *Rep. p.* 145——General character of the higher class of students; equitable system on which the honours and emoluments of the University are awarded, *Hopkins, Ev. p.* 248.

Scholarships. Sizarships. Suppers. Tradesmen.*

Studies of the University:

1. *Course of Study prescribed for the several Degrees.*
2. *Defects in the present System; Ameliorations suggested.*

1. *Course of Study prescribed for the several Degrees:*

Course of study prescribed by the Elizabethan statutes for the B.A. degree, *Rep. p.* 20——Present regulations, *ib.*——Recent extension of the course of study, *p.* 24——Additions to the course of study required, *p.* 26——Proposal for a re-arrangement of the course of study for the degree of B.A., *p.* 27——Recommendation that after passing the "previous examination," students be allowed to select the studies best suited to their aptitudes, tastes, and professional destinations, *p.* 27, 28——Advantages that would attend these changes, *p.* 28.

Course of study prescribed by the Elizabethan statutes for the degree of Bachelor of Arts; comparison with the present actual practice, *Ainslie, Ev. p.* 23. 26——The like in regard to the degree of Bachelor of Law, *p.* 23. 28——Bachelor of Physic, *ib.*——Master of Arts, *p.* 23. 29——Bachelor in Divinity, *p.* 24. 29——Doctor in Divinity, *ib.*——Doctor of Law, *p.* 25. 30——Doctor of Physic, *ib.*——Course of study required for degrees in medicine, *Fisher, Ev. p.* 126.

2. *Defects in the present System; Ameliorations suggested:*

General remarks on the hinderances by which the studies of the University are obstructed; suggestions for their removal, *Sir J. Stephen, Ev. p.* 111——To require the whole body of the students to prosecute during three years either classical or mathematical studies is a capital error; regulation suggested, *p.* 112——The present compulsion in regard to classical and mathematical studies operates to prevent law students from entering the University, *Amos, Ev. p.* 123, 124——Neglect of the study of the Belles Lettres, especially of the English language and literature; belief that the value of philological studies has been over-rated, *p.* 124——Best means of promoting the studies of the University apart from classics and mathematics, *p.* 124, 125——Suggestions for an improved course of study for those proceeding in physic, *Fisher, Ev. p.* 128 *et seq.*——It is not advisable to restrict the studies in such manner as to bring them "within the grasp of the present public and recognised teaching of the University," *Hopkins, Ev. p.* 243——Extent to which the reading on certain subjects is limited, *ib.*——Candidates for degrees should rather receive a mental training than information, *Phear, Ev. p.* 255——Objects of an University; degree in which they are understood or agreed in, *Phelps, Ev. p.* 257——Definition of the public tuition of the University; to supply the slight deficiencies in its completeness would not be a matter of any difficulty, *Stokes, Ev. p.* 267 *c.*

Complaint that is generally urged that the University offers an insufficient education to candidates for classical honours; this complaint might be more justly urged against the past than the present state of things, *Cope, Ev. p.* 279——Merits of the Cambridge system of classics; expediency nevertheless of an infusion of general information into the classical course, *Thring, Ev. p.* 289——The establishment of lectures in logic and rhetoric, and of facilities for the study of modern languages, would remedy serious defects in the present course of University education, *Williams, Ev. p.* 295——Suggestions for raising funds for carrying out these improvements, *p.* 296.

See also *Classical Studies. Lecturers. Mathematical Studies. Medicine, Faculty of. Mineralogy. Moral Sciences Studies. Philosophy. Political Economy. Prizes. Professorships. Public Lecturers. Reading Parties. Rhetoric. Surgery. Terms. Theological Faults. Tuition. Tutors* (*College.*)

Subscription.

Report, 1852—*continued.*

Subscription. History of the subscription required before admission to a degree, *Rep. p.* 39-43——Proposed relaxations of the form, *p.* 43, 44.

Sub-Sizarships:

Trinity College:

The number of sub-sizars is unlimited; the only advantage possessed by a sub-sizar is, that he pays 4 *l.* instead of 10 *l.* for tuition, and that the admission fee is 2 *l.* 15 *s.* instead of 5 *l.*; with the prospective advantage of a foundation sizarship; *Blakesley, Ev. p.* 148; *Frere, Ev. p.* 160.

Suffolk. The mastership of Gonville and Caius College required to be filled by a native of Norfolk or Suffolk, *Chapman, Ev. p.* 325——Exhibitions at Christ's College, on Hawford's foundation, open to natives of, *Cartmell, Ev. p.* 379; *Master and Fellows of Christ's College, Ev. p.* 392——Scholarship at the same college on Rawlins' foundation also open to natives of, *Cartmell, Ev. p.* 379; *Master and Fellows of Christ's College, Ev. p.* 392.

Suppers. Are not permitted to be given by students residing in lodgings, without consent of the college tutor, *Rep. p.* 18.

Supplicats for Degrees. Mode of proceeding in passing supplicats for degrees, *Rep. p.* 13.

Supremacy, Oath of. See *Allegiance and Supremacy, Oaths of.*

Surgeons, Royal College of. Specimens presented by, to the Woodwardian Museum, *Sedgwick, Ev. p.* 118.

Surgery. Desirableness of the University having some authorised teacher of surgery; the want of power in the University to appoint to the surgeoncies in Addenbrooke's Hospital is an objection, *Fisher, Ev. p.* 130, 131——The University used formerly to grant licences in this branch of medicine, *p.* 131, *note*——If the usage were resumed it would be desirable to appoint a professor of surgery, *ib.*

Sussex County. Scholarships at Sidney Sussex College, on Montague's foundation, open to natives of, *Phelps, Ev. p.* 430.

Swaffham School. Exhibitions at Christ's College on Dame Drury's foundation, with preference to students from, *Cartmell, Ev. p.* 378; *Master and Fellows of Christ's College, Ev. p.* 392.

Swainson, Rev. C. A., m.a., Fellow and Tutor of Christ's College. (Analysis of his Answers to Queries.)

[1. *Queries as to Expenses and Tuition:*]

A student's expenses are not increased by any privileges given to tradesmen, *Ev. p.* 192——Practice of tutors as to admitting tradesmen's bills into their accounts, *ib.*——Abuses to which this practice is liable, *ib.*——Advantage of substituting fixed payments to servants in lieu of their present fees and perquisites, *p.* 193——Checks on credit, and manner in which they are evaded, *ib.*——Bills for entertainments are the only superfluous charges admitted into the tutor's accounts, *ib.*

Mathematical lectures given; the tutors classify the candidates; attendance is compulsory; for the average mental calibre of the students the college provides ample means of instruction, but it is doubtful whether it does so for students of eminent ability, *Ev. p.* 193——Inadequacy of the means of small colleges to render students independent of private tuition, *ib.*——Expense of private tuition, *ib.*——Mode of instruction adopted, *ib.*——Private tuition is resorted to by those who are not candidates for honours, *ib.*——It is not advisable to impose an immediate restriction on it, *ib.*

Number and value of the sizarships at Christ's College, *Ev. p.* 193——Privileges annexed, and manner in which vacancies are filled up, *Ev. p.* 194——Objections to a hall or college for poor students only, *ib.*——Resources in the University at present in abeyance which might be made available for educational purposes, *ib.*——The colleges should contribute from their own funds to the support of tutors and lecturers, *ib.*——The non-residence of fellows operates adversely to the efficiency of the colleges, *ib.*——Suggestion for the establishment of hotels in connection with the colleges, *Ev. p.* 194-196——University examinations after the first and second year's residence might advantageously be substituted for those now had by the colleges, *Ev. p.* 195.

Break now caused in the studies of candidates for honours, by the Previous Examination, *Ev. p.* 195——There is no matriculation examination at this college, *ib.*——Advantages of such an examination by the University, *ib.*——One cause of the disinclination of men of talent to become lecturers, &c., is the bad pay, but the chief reason is the uncertainty of tenure and the absence of any ultimate prospect, *ib.*——Celibacy is desirable in tutors; the lecturers need not be affected by this condition, *ib.*——The staff of tutors and lecturers at this college is adequate to its requirements, *ib.*

Report, 1852—*continued.*

Swainson, Rev. C. A., M. A. (Analysis of his Answers to Queries)—*continued.*

[1. *Queries as to Expenses and Tuition*]—continued.

Nine terms even for students not candidates for honours is too long; the present terms are needed for honour men, *Ev. p.* 195, 196——Permission given to students to reside in college in the long vacation, *p.* 196——Reading parties to be preferred, *ib.*——Number of students in college and in lodgings, *ib.*——Unfavourable opinion as to lodgings, *ib.*——The colleges should be responsible for the liberal payment of those occupied in instructing students, *ib.*——Advantages of hospices in lieu of any proposed college for poor students, *ib.*

[2. *Queries as to Mathematical Studies and Examinations:*]

Unfavourable operation of the present limited time allowed to students in the Senate House, in answering questions on the examination papers, *Ev. p.* 267 *e*, 268——Evil of the recently instituted preliminary examination, in giving too diffuse a character to the reading of students, *Ev. p.* 268.

The length of the examination papers has, on the recommendation of the Mathematical Board been diminished, they might, with advantage, be further abridged, *Ev. p.* 268——Objections to the omission from the examination subjects of the Lunar, Planetary, or Undulatory Theory; their omission would not be compensated by having a re-examination for special prizes, *ib.*——Remarks as to the calculus of variations and other subjects, *ib.*——The number of subjects required to be studied is not greater than may be mastered by students of fair abilities; circumstances to be considered in diminishing their number, *p.* 268, 269.

Elementary works used in the University, *Ev. p.* 269——The use of MSS. is not carried to an injurious extent; their use promotes exactness of study, but diminishes the amount of reading, *ib.*——Impossibility under existing circumstances of superseding their use, *ib.*——The recurrence to geometrical proofs has discouraged the tendency of the mathematical course of study to become too analytical and symbolic; general effect of the change on the habits of study of the present generation of mathematical men, *ib.*

The problems proposed in the examination do not bear too large a proportion to the book-work questions; manner in which they are generally arranged, *Ev. p.* 269——Motives which prompt students to resort to private tutors; difficulties opposed to the suppression of private tuition, *p.* 269, 270——Exertions made by a distinguished private tutor to encourage a liberal and philosophical spirit of study in students, *p.* 270——Abuses of the system of private tuition; remedy suggested, *ib.*

Inducements for the continuance of mathematical study after the B.A. degree; favourable influence of the Fellowship Examination at Trinity College in this respect; considerations involved in the institution of similar examinations at other colleges, *Ev. p.* 270——Advantage of establishing an examination by a University Board of those gentlemen who shall be elected to fellowships; nature of the examination that might be required in such cases, *p.* 270, 271——Suggestion as to the classification of students, *p.* 271.

Syndicates:

1. *Generally.*
2. *Syndicate of the Printing Press.*
3. *Syndicate of Studies.*
4. *Syndicate for the Revision of the Statutes.*
5. *Syndicate for the University Library.*

. *Generally:*

Inconvenience of the practice of the vice-chancellor being always the convener and chairman of all syndicates; improvement suggested, *Babington, Ev. p.* 452——Expediency of the permanent syndicates annually reporting their proceedings to the senate, *ib.*——Changes suggested in the constitution of the permanent syndicate, *ib.*

2. *Syndicate for the Printing Press:*

Institution of this body; attendance given by its members in the affairs of the press, *Rep. p.* 136——Particulars as to the appointment, meetings, powers, and authority of the syndic of the University press, *Syndics of the Press, Ev. p.* 19.

3. *Syndicate of Studies:*

Working of the recently appointed syndicate of studies, *Gaskin, Ev. p.* 228——This Board has no power to effect alterations in the examination, *ib.*——Graces passed in consequence of suggestions made by the syndicate in 1849 and 1850, *ib.*——Subjects excluded from the examinations on the foregoing recommendations, *ib.*——Beneficial working of the syndicate of studies, *Hind, Ev. p.* 238——Beneficial nature of the superintendence exercised by the syndicate of studies over the mathematical course, *Hopkins, Ev. p.* 243.

4. *Syndicate*

SYNDICATES—continued.

4. *Syndicate for the Revision of the Statutes:*

Proposals of the syndicate with respect to the degree of D.D., *Rep. p.* 30–32——Proposition for the abolition of the privilege by which the degree of B.D. is accessible to ten-year men, *p.* 31——Compensation suggested by the syndicate in the institution of a new class, to be termed licentiates in theology, *ib.*——Objections to a restrictive condition annexed to this plan, *p.* 32.

Propositions of the syndicate in regard to the faculty of civil law, *Rep. p.* 34——In regard to the faculty of physic, *p.* 36, 37——For the abolition of Cautions for Exercises, *p.* 37——As to abolishing the oaths now required to be taken on admission to degrees, *p.* 39. 152——The discontinuance of the oath taken at creation by masters of arts and doctors, *p.* 39——For the relaxation of the form of subscription, *p.* 43——For an improved audit of the University accounts, *p.* 142.

5. *Syndicate for the University Library:*

Constitution of the syndicate for the management of the University library, *Rep. p.* 130; *Power, Ev. p.* 51——Respects in which objectionable; improved organization suggested, *Rep. p.* 131.

T.

Tabor, James. Petition of J. Tabor, register of the University, to James I., with his majesty's answer thereto, dated 27 Feb. 1623, *Rep. p.* 41.

Tamworth Grammar School. Candidus for the Frankland scholarship at St. Catherine Hall required to be a scholar of this school; annual stipend, *Philpott, Ev. p.* 366.

Tamworth Parish (*Stafford*). Fellowship at St. John's College limited to natives of, *Rep. p.* 162.

Tancred, Christopher. Divinity studentships at Christ's College founded by; mode and conditions of election; names of electors; annual allowance, &c., *Gunson, Ev. p.* 163; *Cartmell, Ev. p.* 381.

Particulars as to the Tancred medical studentships at Gonville and Caius College, *Rep. p.* 95——These studentships should be made available for the promotion of a spirit of emulation among medical students, *Haviland, Ev. p.* 82——Objections to the present mode of appointment to the medical scholarships at Gonville and Caius College; the college should have a more influential voice, *Fisher, Ev. p.* 133.

Benefaction of Mr. Tancred to the master, fellows and scholars of Christ's College; income derived therefrom, *Cartmell, Ev. p.* 372. 374; *Master and Fellows of Christ's College, Ev. p.* 391.

Exhibition at Christ's College founded by Mr. Tancred; present annual value thereof, *Cartmell, Ev. p.* 379; *Master and Fellows of Christ's College, Ev. p.* 393.

Copy of Mr. Tancred's deed of settlement of his benefactions to Christ's and Caius Colleges, *App. p.* 471 *et seq.*

TATHAM, REV. R., D.D., MASTER OF ST. JOHN'S COLLEGE. (Analysis of his Answers to Queries.)

[1. *Queries as to the Colleges:*]

Appointment of the master and election of the fellows and scholars of St. John's College; qualifications required in them, *Ev. p.* 396——Tenure of fellowships and scholarships, *p.* 396, 397——Absence from residence permitted to the master and fellows; duties of fellows; particulars relative to the government of the college; stipends, emoluments and advantages of the master, fellows and scholars; statement as to the supplemental foundations, *p.* 397——Practice respecting the admission of students over and above the members of the foundation, *ib.*

Hours of Divine service in the chapel; attendance required thereat, *Ev. p.* 397——Subjects embraced by the course of collegiate instruction; number of fellows employed in giving the college lectures, and number of college examinations annually; prizes given at same, *ib.*——Attendance required at the college lectures, in the hall at dinner, and hour at which students are required to be in college or their licensed lodgings at night, *p.* 398——Control exercised over the expenses of students, *ib.*——Amount of the necessary expenses of the several classes of students, *ib.*——Like statement of actual expenses, *ib.*

Provision made for poor students, *Ev. p.* 398——The present moderate amount of the necessary expenses of students cannot be reduced; the existing regulations for restraining extravagance works beneficially, *ib.*——Inexpediency of removing the limitations as to fellowships, scholarships and exhibitions in this college, *ib.*——Usage as to disposal of

Report, 1852—*continued.*

Tatham, Rev. R., d. d. (Analysis of his Answers to Queries)—*continued.*

[1. *Queries as to the Colleges*]—continued.

scholarships and exhibitions in cases of there being no eligible claimant, *ib.*——It is not desirable that any of the fellowships, scholarships or exhibitions should be consolidated, *ib.*

[2. *Queries as to the College Libraries:*]

One of the fellows of the college acts as librarian, and is assisted by a sub-librarian, who is generally a scholar of the college and a graduate of the University, *Ev. p.* 401 ——There is a catalogue of the books and a descriptive catalogue of the MSS.; the arrangement of the books is generally according to their subjects, but not strictly so; the library room is not fire-proof, *ib.*——Sum contributed by each fellow, on his election, to the purposes of the library; amount of librarian and sub-librarian's salaries, which, together with the other expenses of the library, are defrayed out of the general funds of the college; sum annually spent in the purchase and binding of books, *p.* 402—— Number and description of the books of which the library is composed, *ib.*——Access permitted to the library, *ib.*——Rules of the library as ordered by the master and senior fellows; instructions of the librarian to the sub-librarian, *ib.*——List of the several contributors of money, or books contributed, and number of volumes given or bequeathed, *p.* 402, 403.

Tatham, Dr. Letter from, dated 8 November 1850, in answer to circular of the Commissioners of 30 October, *Corr. p.* 6.

Tattersall (Lincoln). Fellowship at St. John's College open to choristers of the church of, *Rep. p.* 163.

Taxation (University). Tax of 6 *s.* per annum levied on members of the University for the University Library; produce thereof in 1851, *Rep. p.* 128. 131——This tax first imposed in 1825, *p.* 131——Doubts as to the power possessed by the University of levying taxes on its members, *p.* 142——The legalization of such a power desirable, *ib.*——The University should have the power of taking contributions from its members for its own purposes, *J. J. Smith, Ev. p.* 191——Want of power in the senate to legally enforce the payment of taxes it imposes upon members of the University; it should have such power, *Babington, Ev. p.* 453.

See also *Income Tax.* *Paving and Lighting the Town of Cambridge.*

Taxors. Number of taxors annually appointed; mode of selection; their rank and duties, *Rep. p.* 11——The office recommended to be discontinued, *ib.*——These officers perform the duty of supervision of weights and measures within the town and suburbs, *Ev. p.* 37. 43——They also superintend weights and measure in the markets and fairs, and have also the exclusive privilege of weighing hops and leather in Sturbridge fair, *p.* 37.

Taylor, Joseph. Books given by, to the library of St. John's College, *Tatham, Ev. p.* 403.

Taylor, Samuel. Estate bequeathed by, to Sidney Sussex College; present annual value and proceeds, *Phelps, Ev. p.* 430, 431.

Ten-Year Men. This class of persons described, *Rep. p.* 31——Proposition of the syndicate for the revision of the statutes to abolish the privilege by which the degree of B.D. has hitherto been accessible to them, *ib.*——The proposal is to be viewed with regret, *ib.*——Compensation provided by the institution of licentiates in theology, *ib.* ——Requirements of the Elizabethan statutes (cap. ix) in regard to persons proceeding to the degree of B.D. without having previously taken any degree in arts; comparison with the present practice, *Ainslie, Ev. p.* 24. 29——Statement of fees payable by ten-year men on proceeding to the degree of B.D., *p.* 33.

Tendring. Estate at, belonging to Trinity College, *Master and Fellows of Trinity College, Ev. p.* 423.

Terms:

1. *Terms required to be kept.*
2. *Whether a Reduction in the Number of Terms is expedient.*
3. *Digest of Answers to Queries on this Subject.*

1. *Terms required to be kept:*

Requirements of the statutes of Elizabeth as to the terms to be kept before proceeding to the degree of B.A., *Rep. p.* 20——Present practice, *ib.*——Number of terms, residence, &c., required of students proceeding to the degree of Bachelor of Laws, *p.* 33 ——The like on proceeding to the degree of Bachelor of Physic, *p.* 35.

Commencement

Report, 1852—*continued.*

TERMS—continued.

1. *Terms required to be kept*—continued.

Commencement and termination of each University Term as prescribed by the Elizabethan statutes, *Ainslie, Ev. p.* 22——The power to dispense with the keeping of a term authorised in certain cases is not exercised for more than one term, *p.* 26——The arrangement of the terms is not suited to medical students, *Haviland, Ev. p.* 81.

2. *Whether a Reduction in the Number of Terms is expedient:*

Proposal of the syndicate for the revision of the statutes to reduce the number of terms of residence for the B.A. degree from ten to nine; approval thereof, *Rep. p.* 27——Advantage of making the period of academical residence to commence in January instead of October, *p.* 28——The practice of considering any one term as kept when only half is kept, is a modern innovation; objection thereto, *Sir J. Stephen, Ev. p.* 112——The length of the academical year should be increased by abridging the vacation; the whole course might then be reduced from three years to two, *ib.*——Custom obtaining with regard to residence during one-half only of Easter Term, *Fisher, Ev. p.* 132——Average length of the several terms, *ib.*——The academical year should be much longer than it is, *Pryme, Ev. p.* 136——The institution of an examination before matriculation would lead to a less number of terms being necessary before B.A. degree, *Hughes, Ev. p.* 169.

3. *Digest of Answers to Queries on this Subject:*

Queries circulated by the Commissioners as to whether desirable to reduce the number of terms required for the degree of B.A.; the inconveniences produced by the unequal accumulation of students in the Michaelmas Term; and the means by which a reduction might be effected, *Ev. p.* 141.

Digest of answers to the foregoing:—

Very desirable that the Easter Term should be lengthened and the studies better enforced; the amusements in that term now a serious evil, *Archdall, Ev. p.* 142.

Nine terms might with advantage be substituted for the present ten; the accumulation of students in the Michaelmas Term the least sufficient reason for reducing the number of terms; alterations in the times for the examinations suggested; not desirable to shorten the vacations, *Arlett, Ev. p.* 146.

The reduction of the number of terms very desirable; suggestions for a new arrangement of the examinations; no good to be gained by shortening the vacations; the Long Vacation especially should not be curtailed, *Blakesley, Ev. p.* 150.

The period of residence is not too long in the case of candidates for honours; but has been thought so in regard to ordinary students; the recent regulation requiring a certificate of attendance at some professor's lectures, which affects the latter class, should be fairly tried before any alreration is made; the unequal accumulation of freshmen in the Michaelmas Term occasions some inconvenience; no advantage in shortening the vacations, *Cooper, Ev. p.* 154.

Very desirable to cut off the overlapping Michaelmas Term from the fourth year, *Evans, Ev. p.* 159.

The substitution of nine for ten terms will be a considerable advantage; the inconveniences produced by the unequal accumulation of students in Michaelmas Term are very great; to increase the proportion of each term would be advantageous, but it is not nevertheless desirable to shorten the vacation, *Frere, Ev. p.* 161.

It would be advantageous to reduce the number of terms from twelve to ten, and to substitute nine terms of actual residence; changes in the examinations to correspond suggested, *Gunson, Ev. p.* 164.

If an admission examination were carried into effect, the first term now formally exacted might be given up; no valid reason also for requiring the last term; changes that might be made in the academical year, *Hildyard, Ev. p.* 166.

The present time of residence is not longer than is necessary for candidates for honours, but it is too long for the majority of those for the ordinary degree; not expedient nevertheless to exact a longer residence from candidates for honours than from the Polloi; remedy suggested, *Hoare, Ev. p.* 168.

Nine terms would be an improvement; students passing the ordinary B.A. examination at the end of the seventh term; Michaelmas Term might begin with September, *Hughes, Ev. p.* 169.

Difficulties attending the substitution of nine for ten terms of residence; strong objections to lessening the period for the ordinary degree; the inconveniences of the unequal accumulation of students in the Michaelmas Term not very serious; suggestion that students enter in the Lent Term instead of the October Term, *Latham, Ev. p.* 172, 173.

Terms—continued.

3. *Digest of Answers to Queries on this Subject*—continued.

It would be convenient to cut off the first or the tenth term; questionable expediency of reducing the time to two years, or of giving the ordinary degree at the end of six terms, and postponing the examination for honours to the ninth; other plans suggested; the Long Vacation should be shortened by a month, *Merivale, Ev. p.* 175.

Nine terms of actual residence kept fully might be advantageously substituted, *Mould, Ev. p.* 177.

No alteration to be recommended in the length or number of the terms; there should be a pass examination for B.A. for all students shortly before the close of the third year; candidates passing the same to be qualified to offer themselves for the mathematical and other triposes in the following year, *Peill, Ev. p.* 179.

The time of residence might be reduced to nine terms with advantage; no reason for retaining the last term, but it is desirable to keep the first; the undue crowding in Michaelmas Term is attended with disadvantage, *Philpott, Ev. p.* 183——Suggestions with regard to the examinations, *ib. p.* 183, 184——Not desirable to shorten any of the vacations, *p.* 184——Students in general should be required to reside for a longer time than the half of each term, *ib.*

The number of examinations established of late years makes witness most unwilling to give any opinion in favour of a diminution of the number of terms, *Shaw, Ev. p.* 186.

Changes in the examinations recommended so as to cut off the first term, which is nominal; the inconvenience produced by the unequal accumulation of students in Michaelmas Term is very great; the keeping only half terms is quite unreasonable, *J. J. Smith, Ev. p.* 190.

The reduction of the number of terms to nine is not to be recommended; the May term might be increased, *J. Smith, Ev. p.* 192.

Nine terms even is unnecessarily long for students not candidates for honours; with an admission examination as stringent as the previous examination, the general studies of the University might be finished at the end of the second year; no change should be made in regard to the examination of candidates for honours, *Swainson, Ev. p.* 195, 196.

Nine terms of actual residence sufficient; any change in the succession of examinations might be provided for without difficulty; the proportion of each term required to be kept ought to be increased; unnecessary to diminish the length of the vacations, *Thompson, Ev. p.* 200.

The resident terms should be reduced to nine; in what the advantages of the first term consist; alterations in the examinations suggested, *Warter, Ev. p.* 203.

The reduction of the number of terms of residence by omitting the first or last, as also the increase of the proportion of each term required to be kept by residence are changes now under the consideration of the University, *Whewell, Ev. p.* 207.

The expediency of introducing the changes referred to cannot be determined until after observing the effect of the recent alterations in the triposes, &c., *Worsley, Ev. p.* 212.

The omission of the first and last terms, and the substitution of nine for ten terms of actual residence recommended; the time assigned to general studies might be reduced to two years, provided a third year were spent in professional studies; arrangements in regard to the examinations necessary, *Wratislaw, Ev. p.* 215, 216——Not expedient to shorten any of the vacations, *p.* 216; the proportion of each term might be increased to two-thirds, *ib.*

Inconvenience arising from the accumulation of students in the Michaelmas Term, *France, Ev. p.* 285——Suggestion for the omission of the first and last terms; a general degree examination ought to take place in the June of the third year of residence, *ib.*

these entertainments, *Rep. p.* 8, *and Ev. p.* 38——Remarks thereon by a syndicate appointed to consider the memorial, *Ev. p.* 43——Recommendations of the Commissioners on the subject, *Rep. p.* 8.

Theological Examination. See *Voluntary Theological Examination.*

Theological Faculty:

1. *Present State of this Branch of Study.*
2. *Improvements suggested.*

1. *Present State of this Branch of Study:*

Various inducements to graduate in theology; University and other prizes, *Rep. p.* 32——Particulars as to the several professorships of divinity, viz., the Regius Professorship, *Rep. p.* 48, 50; *Jeremie, Ev. p.* 76; the Lady Margaret's Reader, *Rep. p.* 46, 47, 71; *Blunt, Ev. p.* 86; the Norrisian Professorship, *Rep. p.* 64, 73——Inadequacy of the present theological professorships, *Rep. p.* 89——Consequences thereof, *ib.*——Instruction in theology not, nevertheless, unduly neglected, *ib.*——Provision made by the University for its study, *ib.*——The voluntary theological examination and its effects, *ib.*——Improvements recommended, *p.* 90, 91.

General condition of the study of theology in the University, *Blunt, Ev. p.* 87——Theological examinations held; details as to the voluntary theological examination, 87, 88——The state of this faculty is very imperfect, *J. J. Smith, Ev. p.* 190.

2. *Improvements suggested:*

Suggestion, on the next vacancy, of reserving a portion of the funds of the Lady Margaret's Professorship of Divinity, for the endowment of a new theological professorship, *Rep. p.* 87——The like in regard to the Hulsean foundations, *ib.*——And also with respect to suppressed canonries in Ely cathedral, *ib.*——New professorship recommended, *p.* 102——Suggestions for improvements in the study of theology, *Blunt, Ev. p.* 88——Proposition for converting the present voluntary theological examination into a theological tripos, *Gunson, Ev. p.* 164——Highly desirable to provide a more systematic theological training in college for students not anxious to compete for high honours, but wishing to qualify for holy orders; plan on which it might be carried out, *Hoare, Ev. p.* 168——Great advantage that would result from bringing the faculty of theology and its degrees to bear directly upon the study of that science; the degrees of B.D. and D.D. of no value whatever as denoting proficiency in divinity; suggestions for a remedy, *Wratislaw, Ev. p.* 216.

See also *Boards of Studies*, II., 6. *Examinations*, IX. *Licentiates in Theology. Margaret Professorship of Divinity. Norrisian Professorship of Divinity. Ten-Year Men. Voluntary Theological Examination.*

Thimbleby, Dr. Thomas. Fellowship at St. John's College founded by, *temp.* Henry VIII.; limitations in regard to election to, *Rep.* 163——Scholarship at the same college also founded by, *p.* 192.

Thompson, Rev. W. H., Fellow and Tutor of Trinity College. (Analysis of his Answers to Queries.)

[1. *Queries as to Expenses and Tuition:*]

Some diminution is practicable in the expenses of students at this college, *Ev. p.* 196——Privileges allowed to tradesmen and servants, *ib.*——Control exercised by college tutors over debts incurred by students; several ways in which this control is made nugatory, *p.* 196, 197——The Legislature can alone effectually check extravagance; suggestion as to an enactment, *p.* 197——Number of lecturers in Trinity College, *ib.*——Classification of students, *ib.*——Attendance required at lectures, *ib.*——Sufficiency of the staff of lecturers for the requirements of the several examinations, *p.* 197–200.

Charges for private tuition, *Ev. p.* 197——Average annual expenditure of a pensioner, *ib.*——There are more men of mathematical than classical eminence who make private tuition a profession, *ib.*——Increase of "poll-tutors," *ib.*——Doubtful expediency of any enactment restricting private tuition, *ib.*——Limits of any restriction that might be imposed, *ib.*

Number and value of scholarships and sizarships at this college; principles on which students are selected for them, *Ev. p.* 198, 199——Difficulties incidental to the creation of a college or hall for poor students only, *p.* 199——Effect of the institution of the Previous Examination, favourable working of the new triposes, *ib.*——Audiences would be found for an increased staff of professors, *ib.*——Matriculation examination had at this college, *ib.*——Care that would be requisite in the arrangements of a general matriculation examination by the University; effects that might be expected to result from it, *ib.*——Examination at the University of Bonn on admission of students, *ib.*

Report, 1852—*continued.*

Thompson, Rev. W. H.—continued.

[1. *Queries as to Expenses and Tuition*]—continued.

Reason of college offices not being generally in request among eminent men, *Ev. p.* 199——The creation of additional professorships on a permanent and liberal footing would remedy this evil; means by which this might be effected, *p.* 199, 200——Contemplated alteration of terms, *p.* 200——Objections to a curtailment of the vacations, *ib.*——Residence in college permitted in the vacations, *ib*——Decline of reading parties; extent to which benefit arises from them, *ib.*——Proportion of students of Trinity in lodgings; regulations enforced; slight difference of actual control over students in college as compared with those in lodgings, *p.* 201.

[2. *Queries as to Mathematical Studies and Examinations:*]

Limited character of the inducements held out by the University for the continuance of study after the B. A. degree; the changes suggested by the Commissioners would be productive of a favourable effect in this respect; failure of the present essay prizes in accomplishing the desired result, *Ev. p.* 271——Improvement that would be effected in the present system, by increasing the number of professors, remunerating them in a more liberal manner, and compelling their residence during the major part of every term, *ib.*——Many of the eminent private tutors would then be employed in a way worthier of their talents, and more conducive to the honour of the University, *ib.*——Remarks as to private tuition, *ib.*

[3. *Queries as to Classical Studies and Examinations:*]

The honorary classical examinations had in the University are the University scholarships, the Chancellor's medals, and the classical tripos; subjects of these examinations, *Ev. p.* 287——The two former require more elegant accomplishments in classics than the latter; this distinction ought to be carried further by omitting certain requirements in the tripos examination, *ib.*——The necessity for the accomplishments alluded to, deter many students from competing for classical honours, *ib.*

Prose composition being a more valuable attainment than verse composition, ought to be confined to the examinations for the medals and University scholarships, *Ev. p.* 287——Questions relating to the subject matter of classical authors could not with advantage be introduced into the classical tripos examination, *p.* 288——Proposal of this nature rejected by the syndicate in 1849, *ib.*——Changes that have been made in the classical tripos examination, *ib.*——The examination for the University scholarships and medals are conducted by unpaid *ex-officio* examiners; inconveniences of this arrangement; they might be obviated by allowing certain of these examiners to appoint deputies approved by the senate, *ib.*

No necessity exists for the appointment of a board for the superintendence of classical studies, *Ev. p.* 288——It is desirable that all persons who have passed the ordinary examination for the B.A. degree should be eligible as candidates for the Chancellor's medals and classical tripos, *ib.*——One of the members' prizes might advantageously be given for an English essay, *ib.*

Thorpe, Dr. Exhibitions at Emmanuel College founded by; annual value, *Master and Fellows of Emmanuel College, Ev. p.* 427.

Thorpe Arnold (*Lincoln*). Scholarship at Christ's College on Laughton's foundation open to natives of, *Cartmell, Ev. p.* 380; *Master and Fellows of Christ's College, Ev. p.* 393.

Thring, Henry, M.A., Fellow of Magdalene College. (Analysis of his Answers to Queries.)

[1. *Queries as to Classical Studies and Examinations:*]

The distinction between the scholarship and tripos examinations is, that the former requires great proficiency in the accomplishments of a classical scholar, whilst the latter gives a preference to solidity in scholarship, *Ev. p.* 288——Merits of the Cambridge system of classics; expediency nevertheless of an infusion of general information into the classical course, *p.* 289——Advantages that would attend the establishment of a Board for the superintendence of classical studies, *ib.*

Long examination papers conduce to quickness of thought, a faculty that ought to be encouraged, but if too long are scrambled through imperfectly, *Ev. p.* 289——Suggestion for the selection of classical works, *ib.*——A paper of questions and an essay should form part of every classical examination; what these questions should be, *ib.*——The study of Latin needs greater encouragement than it at present receives at this University, *ib.*——Honorary distinctions should be independent of degrees; manner in which this might be effected, *ib.*——Necessity that exists for a *vivâ voce* examination, *p.* 290——An incitement should be given to the study of the English language; this might be effected by establishing an English essay, *ib.*

TRADESMEN:

1. *Regulations enforced by the University for controlling the Dealings of Students with Tradesmen.*
2. *Complaints made by the Tradespeople of these Checks.*
3. *Answers to Queries issued by the Commissioners.*

1. *Regulations enforced by the University for controlling the Dealings of Students with Tradesmen:*

Regulations laid down by the University authorities controlling dealings of tradesmen with students, *Rep. p.* 16, 17——Regulation as to sending in tradesmen's bills quarterly to the college tutor when the amount exceeds 5 *l.*, *p.* 147——Classes of tradesmen usually permitted to send in their bills to the tutors; advantages of the system, *Arlett, Ev. p.* 143; *Blakesley, Ev. p.* 147; *Philpott, Ev. p.* 179; *Shaw, Ev. p.* 185; *Thompson, Ev. p.* 197.

Copy of a form of tradesman's account with the college tutor, *Cooper, Ev. p.* 156—— The admission of the tradesman's bill into the tutor's quarterly account does not give him security for payment; but merely advantages in obtaining payment, *J. J. Smith, Ev. p.* 187——It is entirely optional with a student to deal with a college tradesman, *Swainson, Ev p.* 192——Effect of the system of the tutors admitting into their accounts the bills of tradesmen, *ib.*

2. *Complaints made by the Tradespeople of these Checks:*

Memorial of the town council relative to the authority exercised by the University authorities in regard to trade regulations, *Ev. p.* 38——Remarks of the syndicate appointed by the senate to consider the foregoing, *p.* 43——The tradesmen lend no assistance to the tutors in checking extravagance in the undergraduates, *Archdall, Ev. p.* 142——Complaints made by tradesmen of the penalty of discommuning; the practice defended, *Whewell, Ev. p.* 204, 205.

3. *Answers to Queries issued by the Commissioners:*

Queries addressed by the Commissioners to the heads and tutors of colleges relative to the control exercised, or that might be exercised, over transactions between students and tradesmen, *Ev. p.* 140.

Answers to the foregoing by the following, viz.:—Dr. Archdall, master of Emmanuel College, *Ev. p.* 142——Rev. H. Arlett, senior fellow and late tutor of Pembroke College, *p.* 143——Rev. J. W. Blakesley, late fellow and tutor of Trinity College, *p.* 147—— Rev. J. Cooper, fellow and tutor of Trinity College, *p.* 152. 156——Rev. J. Hildyard, late fellow and tutor of Christ's College, *p.* 165——Rev. H. H. Hughes, late tutor of St. John's College, *p.* 169——Rev. H. Latham, fellow and tutor of Trinity Hall, *p.* 170 ——Rev. J. G. Mould, fellow and tutor of Corpus Christi College, *p.* 176——Rev. J. N. Peill, fellow and tutor of Queen's College, *p.* 178——Dr. Philpott, master of Catherine Hall, *p.* 179, 180——Rev. J. Shaw, senior fellow of Christ's College, *p.* 185

Report, 1852—*continued.*

Travelling Bachelors. Particulars as to the Worts' foundation for two travelling bachelors, *Rep. p.* 100.

TRINITY COLLEGE:

1. *Revenues and Expenditure.*
2. *The Mastership.*
3. *Fellowships.*
4. *Scholarships.*
5. *Sizarships.*
6. *Matriculations and Degrees.*
7. *Tuition and Examinations.*
8. *Students; their Discipline and Expenses.*
9. *The College Library.*
10. *Other Particulars relating to the College.*

1. *Revenues and Expenditure:*

Gross income of the college at the present time, *Rep. p.* 196——Remarks on the measures taken by the college for running out beneficial leases, *p.* 198.

The college property is administered strictly in accordance with the statutes, which have been recently revised, *Master, Fellows, and Scholars of Trinity College, Ev. p.* 419, 420——Fund established for the improvement of the value of the small livings attached to the college, *p.* 420——Contributions have also been given for the establishment of new prizes, to the increase of the incomes of clergymen, the erection and support of schools and churches, and other purposes of a similar nature, *ib.*——Table of receipts and expenditure of Trinity College, *p.* 421——Gross yearly income derived from houses; account of the funded property possessed by the college; gross estimate of annual rental; value of rooms; net income derived from this source after the making of certain allowances and payments, *p.* 422.

Charges to which undergraduates are subject, *Ev. p.* 422——Fees paid by non-resident Bachelors of Arts and Masters of Arts; sum for which the same may be compounded for, *ib.*——Access to table in College Hall permitted to Masters of Arts retaining their names on the College Boards, *ib.*——Payment made to the library by resident members, *ib.*——Division of surplus income made amongst the college officers, *ib.*——Emoluments of a fellow, and pecuniary advantages of a scholar, *p.* 422, 423——There are no bye-fellowships; particulars relative to the scholarships and exhibitions, *p.* 423.

Statement relative to the trust estates possessed by the college, *Ev. p.* 423——The expense of the table for fellows and scholars in the college hall is defrayed (except wine) out of the general income of the college, *ib.*——Number of sizarships and pecuniary advantages attached to them, *ib.*——Practice as to sub-sizars, *ib.*——There is no special building fund, repairs being defrayed out of the general funds of the college, *ib.*——Rewards for encouragement of learning, *ib.*——Many beneficial leases have run out during the last twenty years, the master and fellows not receiving any compensation for loss of fines in renewing them; diminished fines have been taken in order to the increase of the reserved rent, *p.* 424.

There is no fund for the purchase of advowsons, but there is a fund, called the "Pigott Fund," applied to the increase of the value of poor vicarages, and another, the "Vicarage and Domus Fund," applied to building and improving vicarage houses, and augmenting small livings of the college in different ways, *Ev. p.* 424——Efforts of the college to improve the value of its small livings so as to render them acceptable to fellows, *ib.*——Additions made to the college buildings in 1823-25, *ib.*

2. *The Mastership:*

The Crown appoints to the mastership of Trinity College, *Rep. p.* 153.

3. *Fellowships:*

Report, 1852—*continued.*

TRINITY COLLEGE—continued.

3. *Fellowships:*

Number of fellowships in this college, *Rep. p.* 157——Value of a foundation fellowship, *p.* 167——Academical standing required of candidates for fellowships, *p.* 169, 170——The election to fellowships is required to take place annually, at a stated time, *p.* 170——Requirements of the statutes as to fellows entering holy orders, *p.* 171——Provision made in the revised statutes of the college in regard to the private property of fellows, *ib.*——The additional fellowships and scholarships have been assimilated to those of the foundation, *Whewell, Ev. p.* 414——Large proportion of lay to clerical fellows in this college; effect thereof to exclude persons desirous to pursue the study of science and to remain laymen, *Babington, Ev. p.* 451.

4. *Scholarships:*

Number of scholarships at this college; all quite open except one; annual value thereof; the restriction to Westminster School does not work well, *Rep. p.* 194, 195——Charge of each scholarship upon the college, *p.* 195——Inefficient working of appropriated scholarships, *ib.*——Particulars as to the scholarships, *Thompson, Ev. p.* 198.

5. *Sizarships:*

Number of sizars and sub-sizars; annual value of the situations, *Rep. p.* 195; *Blakesley, Ev. p.* 148; *Frere, Ev. p.* 160; *Thompson, Ev. p.* 198; *Whewell, Ev. p.* 206——Provision for poor students, *Whewell, Ev. p.* 416, 417.

6. *Matriculations and Degrees:*

Number of students entered at Trinity College in each year, ending 10 October 1844 to 1848, *Rep. p.* 145——Summary of the number of members of the college in 1851, *ib.*——Number of residents on 14 November 1851, *ib.*——Table, showing the number of matriculations at this college in the years 1800, 1810, 1820 and 1830, and in each of the ten years 1840 to 1850, *Romilly, Ev. p.* 66——Similar table of the number of degrees of the several grades granted in the same periods, *p.* 67–70——Total number of degrees granted in the last eight years, *p.* 70——The number of pensioners admitted every year is 135, *Whewell, Ev. p.* 414.

7. *Tuition and Examinations:*

Programme of the course of studies pursued at Trinity College, *Whewell, Ev. p.* 208, 209——Attendance required at the college lectures; general character of the lectures; classification made of students attending thereat, *p.* 414, 415——Prizes given for proficiency in the subjects of the college examinations, *p.* 415——Number of fellows engaged as lecturers and examiners; manner in which the examinations are conduced; particular examinations preparatory to those of the University; regulations as to the attendance of students at the college lectures, *ib.*

Staff of tutors and assistant tutors maintained; average number of students under lecture; classification of the students; attendance at lectures, *Blakesley, Ev. p.* 147, 148; *Frere, Ev. p.* 160; *Thompson, Ev. p.* 197——Examination to which students are subjected on admission; other examinations, *Blakesley, Ev. p.* 149; *Cooper, Ev. p.* 153; *Frere, Ev. p.* 160, 161; *Thompson, Ev. p.* 199; *Whewell, Ev. p.* 207——The staff of lecturers and tutors is sufficiently adequate, *Blakesley, Ev. p.* 150; *Cooper, Ev. p.* 152; *Frere, Ev. p.* 161; *Thompson, Ev. p.* 197.

8. *Students; their Discipline and Expenses:*

The majority of the students of Trinity reside in lodgings in the town; regulations enforced, *Blakesley, Ev. p.* 151; *Cooper, Ev. p.* 155; *Frere, Ev. p.* 161; *Thompson, Ev. p.* 200; *Whewell, p.* 208.

Students are allowed to reside in college during the Long Vacation on receiving special permission; regulations and discipline, *Cooper, Ev. p.* 154; *Frere, Ev. p.* 161; *Thompson, Ev. p.* 200; *Whewell, Ev. p.* 207.

Services celebrated in the chapel and attendance required thereat, *Whewell, Ev. p.* 414——Hour in the evening at which students are required to be in the college or in their lodgings, *p.* 415——Attendance required at dinner in the college hall, *ib.*

Actual expenses of students at this college, *Rep. p.* 148——No very material reduction of the expenses of students at this college is practicable; fees allowed to certain classes of the officers, *Thompson, Ev. p.* 196——Average actual expenditure of a student at Trinity, *p.* 198——Within the college the cook's bill is the principal opening for expense, but a restriction is imposed on the amount allowed to accrue; regulations as to debts incurred by tradesmen; manner in which evaded, *Whewell, Ev. p.* 415, 416——Table showing the expenses of the several classes of students at this college; evasions practised with reference to the regulations for checking extravagance, *p.* 418, 419.

Report, 1852—*continued.*

Trinity College—continued.

9. *The College Library:*

High character of the college library; liberal footing on which it is managed; satisfactory results, *Rep. p.* 133, 134——Amount of annual income appropriated to the support of the library, *p.* 134——Number of books in the library; of what classes of literarature, *ib.*——Respects in which deficient, *ib.*——Extensive and valuable collection of MSS., *ib.*

The library is in the care of a librarian, under whom is a library-keeper, who discharges the usual duties of a librarian, *Whewell, Ev. p.* 425——Description of the catalogue, *ib.*——Classification and arrangement of the books, *ib.*——The library-room is well ventilated, nearly fire-proof, and sufficient for present wants, *ib.*——Use permitted of the books in the library, and also access allowed thereto, *ib.*——Number and description of books and MSS., *ib.*

10. *Other Particulars relating to the College:*

Stipends of certain of the Regius Professorships charged on the revenues of Trinity College, *Rep. p.* 48——Right to fellowships in this college given to the professors when prevented by age or infirmity from performing their duties, *ib.*——Control and influence exercised by the college over these professorships, *p.* 48 *et seq.*——Operation of the new statutes granted to the college in 1844, in regard to the Regius Professors, *p.* 49——The college are trustees of the estates of the Jacksonian Professorship of Natural and Experimental Philosophy, &c., *p.* 65——Convenient suite of lecture-rooms belonging to this college; are used by certain of the University professors, *p.* 115——Revision of the statutes of Trinity effected of late years, *p.* 150.

The appointment and election of the head, fellows, and scholars of this college is strictly in conformity with the statutes, *Whewell, Ev. p.* 414——The college is able of itself to remove any limitations with reference to the tenure of fellowships, scholarships, &c., without external assistance; the only restriction is that requiring those of the scholars elected annually to be from Westminster School; no scholarships or exhibitions have been ineffective for want of claimants, *p.* 417, 418.

Trinity College, Dublin. Particulars as to the library of Trinity College, *Power, Ev. p.* 58, 59——The stamp duties on matriculations and degrees at this University are the same as at Cambridge and Oxford, *Romilly, Ev. p.* 63.

Trinity Hall:

1. *Foundation of the College; Statutes, &c.*
2. *Revenues and Expenditure.*
3. *The Mastership.*
4. *Fellowships.*
5. *Law Studentships.*
6. *Scholarships.*
7. *Provision for Poor Students.*
8. *Matriculations and Degrees.*
9. *Tuition and Examinations.*
10. *Students; their Discipline and Expenses.*
11. *The College Library.*

1. *Foundation of the College; Statutes, &c.:*

Origin of this society; Blomefield's History of Norfolk referred to, *Rep. p.* 178——Purport of the Letters of Foundation, dated 15 January 1350, *ib.*——Also of the Letters Patent of 24 Edw. III., *ib.*——General objects of the foundation; requirements of the statutes, *p.* 178, 179——Act of Parliament procured by the college, 1 Eliz., to remove doubts as to its corporate existence and confirm its rights, &c., *p.* 179——Connexion between the college and the diocese of Norwich has ceased for a long period; tenor of the declaratory statutes in regard hereto, *p.* 179, 180——The statutes still in the form in which delivered by the founder in 1350-51; wide departure therefrom in the practice of the present day, *p.* 180——Abstract of the statutes, viz.: Distribution of the fellows into Legistæ and Canonistæ, *ib.*——Studies, *ib.*——Residence and leave of absence, *ib.*——Allowances, *ib.*——Number of scholarships, *p.* 181——Other students, *ib.*——Prohibition to practice in the courts of law, *ib.*——Number of fellows required to be in holy orders, *p.* 181, 182——Urgent necessity for a revision of the statutes, *p.* 182——Reasons of the society for not putting into execution the idea entertained by them for the last fifty years, of obtaining new statutes, *ib.*——Recommendations of the Commissioners on this head, *p.* 182, 183.

Period of foundation of this college; particulars respecting the statutes, *Geldart, Ev. p.* 330——Changes of practice in regard to the regulation of the college made at different periods, *p.* 333, 334——Present practice so far as regards the master and fellows, *p.* 334——The like as to the scholarships, &c., *p.* 334, 335——Reasons which have deterred the college from seeking new statutes, *p.* 338.

Rooms belonging to the society used as lecture rooms by certain of the University professors, *Rep. p.* 115——Leave of absence from residence permitted to the master and fellows, *Geldart, Ev. p.* 331, 332.

2. *Revenues*

Report, 1852—*continued.*

TRINITY HALL—continued.

2. *Revenues and Expenditure:*

Gross income of the college at the present time, *Rep. p.* 196——Remarks on the measures taken by the college for running out beneficial leases, *p.* 197.

Average gross annual income derived from lands, houses, and tithe-rent charges; deductions from these several sources of income; net income remaining, *Master and Fellows of Trinity Hall, Ev. p.* 339, 340——Income derived from funded property, and from room rents, fees, &c., *p.* 340——Table of total receipts from all sources, and expenditure of same, *p.* 341——Monies accruing to the supplemental fellowships, &c. are paid into the general funds of the college, and administered by the general authorities, and such fellowships, &c. are on the same footing as the foundation fellowships; a supernumerary fellowship was established in 1851; sum annually received by the master and fellows and scholars, *p.* 342.

Allowance made to the master and fellows when in residence, in respect of hall commons, *Ev. p.* 342——The old allowances to scholars are now included in the increased amounts to them, without being kept distinct, *ib.*——Alterations as to the chapel clerkship and the sizars, *ib.*——Festival allowances, *ib.*——There is no building fund; manner in which the expense of repairs is covered, *ib.*——Sums expended in maintaining chancels in repair, *ib.*——Sums expended in pensions and contributions; donations have been made in aid of parochial schools and charities on application from incumbents of parishes in which the college is impropriator, *ib.*

Practice formerly observed by the college in respect to the renewal of leases; fines were discontinued in 1843, and a scheme resolved upon for running out beneficial leases, *Ev. p.* 343——Aid afforded to small livings in the patronage of the college; there is no special fund for such contributions, *ib.*——Additions and alterations made to the college buildings; expense involved by a recent fire, *ib.*

3. *The Mastership:*

The power of choosing the master is vested in the fellows, *Rep. p.* 152——Source and amount of the emolument of the mastership, *p.* 154, 155——These emoluments quite inadequate to the position the head of a college should occupy, *p.* 156——Qualifications required, and manner of appointment of the master, *Geldart, Ev. p.* 330. 331.

4. *Fellowships:*

Number of foundation and bye fellowships in this college, *Rep. p.* 157——Value of a foundation fellowship, *p.* 167——Academical standing required of candidates for fellowships, *p.* 169——Mode of appointment of fellows; qualifications required; conditions attached to their election; emoluments and privileges annexed, *Geldart, Ev. p.* 331——Lists of, and particulars respecting other fellowships and scholarships, their endowment, and qualifications required of those elected into them, *p.* 332, 333.

5. *Law Studentships:*

Law studentships established in 1849, *Geldart, Ev. p.* 335; *Master and Fellows of Trinity Hall, Ev. p.* 342.

6. *Scholarships:*

Number of scholarships at this college; proportion thereof restricted; names of founders; and annual value, *Rep. p.* 187——Number of foundation scholarships, studies prescribed, and allowances, *Geldart, Ev. p.* 332——Particulars respecting Dr. Allen's scholarships and the Chetwoode and Oxenden Exhibition, *p.* 335——Tenure of scholarships, *ib.*——The Allen scholarships are the only ones involving limitations, and no inconvenience is felt from the circumstance, but this college feels aggrieved at its members being debarred from becoming candidates for the Bell Scholarships, *p.* 338——No scholarships have become ineffective from default of claimants; no consolidation of any scholarships appear necessary, *ib.*

7. *Provision for Poor Students:*

No sizars are admitted, *Rep. p.* 195——No provision for poor students exists at this college beyond the scholarships and exhibitions, *Geldart, Ev. p.* 338.

8. *Matriculations and Degrees:*

Number of students entered at Trinity Hall in each year, ending 10 October 1844 to 1848, *Rep. p.* 145——Summary of the number of members of the college in 1851, *ib.*——Number of residents on 14 November 1851, *ib.*——Table, showing the number of matriculations at this hall in the years 1800, 1810, 1820, and 1830, and in each of the ten years 1840 to 1850, *Romilly, Ev. p.* 66——Similar table of the number of degrees of the several grades granted in the same periods, *p.* 67-70——Total number of degrees granted in the last eight years, *p.* 70——Practice as to admissions to this college, *Geldart, Ev. p.* 335.

Report, 1852—*continued.*

TRINITY HALL—continued.

9. *Tuition and Examinations:*

Lectures given; attendance thereat, *Latham, Ev. p.* 170, 171——The college staff of lecturers is quite sufficient, *p.* 171——Examinations undergone by students; no actual examination previous to admission, *p.* 172.

Course of instruction given to students; this is regulated with a view to the public examinations of the University, *Geldart, Ev. p.* 336——Fellows employed in giving college lectures, *ib.*——Number of the college examinations; subjects, and periods when held, *ib.*——Rewards for proficiency in the examinations, *ib.*——Attendance at lectures required of students, and also at preparatory examinations, *p.* 336, 337.

10. *Students; their Discipline and Expenses:*

Students are allowed, by special permission, to reside in college during the Long Vacation; regulations enforced, *Latham, Ev. p.* 173——Number of students in lodgings; control to which they are subject, *ib.*——Hours of Divine service and attendance required thereat, *Geldart, Ev. p.* 336——Attendance required at dinner in the hall, *p.* 33.——Hours at which students must be either in college or lodgings, *ib.*

Actual expenses of students at this college, *Rep. p.* 148——Average annual amount of the necessary expenses of a student at Trinity Hall, *Latham, Ev. p.* 170——The college servants are on fixed salaries, *ib.*——Terms on which students are allowed to be supplied with dishes, &c., by the college cook, *ib.*——Regulations for restriction of expenses, *Geldart, Ev. p.* 337——Necessary expenses of fellow commoners and pensioners, *ib.*——Average actual expenses of same, *p.* 337, 338——No considerable reduction can be made in the price of commons, &c.; legislative interference seems necessary for further restricting habits of extravagance and facilities of credit, *p.* 338.

11. *The College Library:*

Contents and condition of the library of Trinity Hall, *Rep. p.* 135; *Power, Ev. p.* 60.

Triposes. Particulars as to the several triposes; viz., the mathematical tripos, *Rep. p.* 22; the classical tripos, *p.* 22, 23; moral sciences tripos, *p.* 25; natural sciences tripos, *p.* 25, 26. *See* also *Examinations.*

Trott, Sir John. Scholarship at Clare Hall founded by, *Rep. p.* 186.

TUITION:

1. *Resumé by the Commissioners of their Inquiries on this head.*
2. *Digest of Evidence received in Answer to Queries.*

1. *Resumé by the Commissioners of their Inquiries on this head:—*

Review of the subject of tuition as at present carried on, *Rep. p.* 74——General feeling of dissatisfaction prevalent, *ib.*——Weighty objections to the system of private tuition, *ib.*——Opinions of various authorities in regard hereto, with proposed remedies, *p.* 74-78.

Difficulties attending the prohibition of private tuition, *Rep. p.* 79——Especially in regard to the smaller colleges, *ib.*——Objections urged against the present system of college tuition in general, *p.* 79, 80——Serious objections to the mode in which the tuition of the larger colleges is provided for, *ib.*——Motives to the employment of private tutors, *ib.*——Principal conditions to be satisfied in any plan of instruction, *p.* 80, 81.

Expediency of a general examination to be passed by all students in their second year, *Rep. p.* 81——Absence of any necessary connexion between the examinations for mathematical and classical honours; advantage of relaxation in the stringency of the rule, *ib.*——Expediency of creating a numerous staff of public lecturers; their proposed character and status described, *ib.*——How to be remunerated, *p.* 81, 82——Anomalies in the present system of fees for college tuition, *p.* 81——The scales of fees paid at different periods enumerated, *p.* 82——Recommendations on this head, *ib.*——Mode in which the public lecturers should be appointed; the selection proposed to be left to the contemplated boards of studies, *ib.*——Code of bye-laws requisite, *p.* 83——The institution of the office of public lecturer not expected to do away with the employment of private tutors, *ib.*—— Beneficial results to be anticipated from a good system of public lecturers, *ib.*——Injurious effects of recent legislation in the law and church in shortening the residence of distinguished men in the University, *p.* 83, 84——Remarks in regard to the relaxation of the condition of celibacy at present attached to fellowships, *p.* 84, 85.

Objection to the charges made for tuition prior to residence, and subsequent to the B.A. degree, *Rep. p.* 82——The charge to B.A.'s for tuition after leaving the University (but still keeping their names on the boards) ought to be abolished, *Hildyard, Ev. p.* 165——The payment for tuition by non-resident B.A.'s is utterly untenable, *p.* 166——Expedient to charge the tuition money by three separate terms, and not by four quarters, to avoid the anomaly of charging for the long vacation, *ib.*——The payments for college tuition cannot be properly diminished, *Whewell, Ev. p.* 205.

2. *Digest*

Report, 1852—*continued.*

TUITION—continued.

2. *Digest of Evidence received in Answer to Queries:*

Queries circulated by the Commissioners, as to whether the staff of lecturers and tutors in each college is sufficient; and if not, the means by which the deficiency might be supplied, *Ev. p.* 141.

Answers to the foregoing in regard to the following colleges and halls; viz.,

Pembroke College:—

The staff of lecturers and tutors quite sufficient; might be increased, if need be, from the resident fellows engaged in tuition, *Arlett, Ev. p.* 146.

Corpus Christi College:—

No lack of hands to conduct the tuition without going beyond the college fellows; a limit to the number employed is fixed by the amount of the tuition receipts, *Mould Ev. p.* 177.

Gonville and Caius College:—

The staff of lecturers of the college is sufficient, if they gave their whole time to their office, and could command the full attention of the students, but neither of these conditions is fulfilled, *J. J. Smith Ev. p.* 187.

Queen's College:—

The staff of lecturers is sufficient, except for some portions of the new triposes, *Peill, Ev. p.* 178.

St. Catharine Hall:—

The staff of tutors and lecturers is sufficient; if it were not, the best plan would be to obtain the services of fellows of other colleges, or of graduates living in the town, *Philpott, Ev. p.* 183.

Christ's College:—

The staff is quite competent for mathematics and classics, but not for the new triposes; it will require some time to breed a race of tutors in those subjects; suggestion with regard to students who are candidates for honours in these subjects, *Gunson, Ev. p.* 164.

An extra charge of 2 *l.* or 3 *l.* a head suggested to be levied on the students, in order to increase the number of lecturers and sub-lecturers in each college, *Hildyard, Ev. p.* 166.

The staff of lecturers and tutors of this college is amply sufficient, *Shaw, Ev. p.* 186.

The staff at this college is amply sufficient, *Swainson, Ev. p.* 195.

The staff is sufficient to prepare students for the ordinary degree, but not students for honours; plan suggested for supplying this deficiency, *Wratislaw, Ev. p.* 215—— Any increase in the payments for tuition is strongly to be deprecated, *ib.*

St. John's College:—

An addition to the staff of lecturers is required; the present payment for tuition made by the students might be increased to meet the additional expense, but the necessity for a private tutor would be thereby avoided, *Hoare, Ev. p.* 168.

The fee for tuition should be raised, and the staff increased; this plan would be really economical, as dispensing in a great measure with private tutors, *Hughes, Ev. p.* 169.

The tuition-money in large colleges is sufficient to increase the staff of lecturers, which should be done; this impracticable in small colleges, which should be combined in groups for such purposes; the fees for tuition should not be raised, *Merivale, Ev. p.* 175.

Number of tutors on each side of St. John's College; lectures given by the classical tutors on witness's side of the college, *France, Ev. p.* 284—— In order to increase the staff of tutors and lecturers, the fees for college tuition should be raised; as private tuition would be then superseded, the student would be a gainer, *ib.*

Magdalene College:—

Plan submitted for suppressing private tuition, and, in lieu thereof, increasing the public tuition, turning the private tutors into public ones, *Warter, Ev. p.* 202, 203.

Trinity College:—

The staff at this college sufficient; the same degree of efficiency might be secured in the smaller colleges by a confederation of three or four for the purposes of tuition; a scheme of union proposed, *Blakesley, Ev. p.* 150——The staff of lecturers is now sufficient;

Report, 1852—*continued.*

Tuition—continued.

2. *Digest of Evidence received in Answer to Queries*—continued.

Trinity College—continued.

cient; it has been considerably increased, *Frere, Ev. p.* 161——The staff of lecturers is fully adequate to the requirements of the mathematical examinations; a little more might be done for students for classical honours, *Thompson, Ev. p.* 197. 200.

Emmanuel College:—

No deficiency in this college, *Archdall, Ev. p.* 142.

Downing College:—

The present staff is sufficient, so long as the college is devoid of attractions for undergraduates; the greatest difficulties have been experienced in securing a sufficient supply of tutors and lecturers, *Worsley, Ev. p.* 211.

See also *Fees*, I. *Lectures*, II.

Tutors (College):

1. *Generally.*
2. *Queries circulated by the Commissioners.*

1. *Generally:*

The emoluments of tuition are chiefly devoted to the senior tutor; assistant tutors or lecturers are inadequately remunerated, *Rep. p.* 80——Power of influencing the conduct of the students for good, residing in the authority of the college tutor; regulation as to sending tradesmen's bills to him, *p.* 147——The office of tutor believed to have originated about 150 years ago, *p.* 151——The office of tutor quite unknown to the ancient statutes of any college, *ib.*

2. *Queries circulated by the Commissioners:*

Queries circulated by the Commissioners relative to the changes necessary to secure more effectually the services of the ablest men for tutors and professors; and also for supplying any deficiencies in the staff of such functionaries when insufficient in number, *Ev. p.* 141.

Answers to the foregoing by the following; viz.,

Dr. Archdall, master of Emmanuel College, *p.* 142; Rev. H. Arlett, senior fellow and late tutor of Pembroke College, *p.* 146; Rev. J. W. Blakesley, late fellow and tutor of Trinity College, *p.* 149, 150; Rev. J. Cooper, fellow and tutor of Trinity College, *p.* 154; Rev. J. R. Crowfoot, late fellow of Gonville and Caius College, *p.* 158; Rev. R. W. Evans, late fellow and tutor of Trinity College, *p.* 159; Rev. J. A. Frere, fellow of Trinity College, *p.* 161; Rev. W. M. Gunson, fellow and tutor of Christ's College, *p.* 164; Rev. J. Hildyard, late fellow and tutor of Christ's College, *p.* 166; Rev. A. M. Hoare, fellow of St. John's College, *p.* 168; Rev. H. H. Hughes, late tutor of St. John's College, *p.* 169, Rev. C. Merivale, late fellow and tutor of St. John's College, *p.* 175; Rev. J. G. Mould, fellow and tutor of Corpus Christi College, *p.* 177; Rev. J. N. Peill, fellow and tutor of Queen's College, *p.* 178; Dr. Philpott, master of Catharine Hall, *p.* 183; Rev. J. Shaw, senior fellow of Christ's College, *p.* 186; Rev. J. J. Smith, late fellow and tutor of Gonville and Caius College, *p.* 189, 190; Rev. C. A. Swainson, fellow and tutor of Christ's College, *p.* 194, 195; Rev. W. H. Thompson, fellow and tutor of Trinity College, *p.* 199, 200; Rev. E. Warter, fellow and tutor of Magdalene College, *p.* 202; Dr. Whewell, master of Trinity College, *p.* 207; Rev. T. Worsley, master of Downing College, *p.* 210-212; Rev. A. H. Wratislaw, fellow and tutor of Christ's College, *p.* 215.

Tyrwhitt Hebrew Scholarships. Particulars as to these scholarships, *Rep. p.* 33.

U.

Undergraduates. See *Students.*

University and Collegiate Instruction. Necessity for strictly defining the respective provinces of the University and the colleges in the education of students, *Rep. p.* 100.

University Court. Particulars as to this court; its jurisdiction and powers, *Rep. p.* 4, 5; its efficiency in some degree impaired by the indirect operation of an Act of 9 Geo. 4, *p.* 4——Expediency of affording facility to the University in this respect, *p.* 5.

Statement in memorial of the town council relative to the judicial authority exercised by the University, and complaining of the court, *Rep. p.* 5 and *Ev. p.* 39——Remarks of the syndicate appointed by the senate to consider the foregoing, *p.* 44.

Report, 1852—*continued.*

University Library:

I. *Statement by the Commissioners respecting the Library.*

II. *Evidence in Detail:*

1. Origin of the Library; Number of Books; Binding.
2. Management of the Library.
3. Access to the Library permitted; Books lent out; a Reading Room desirable.
4. Copyright Act.
5. Purchase of Books; Funds available.
6. Catalogues.
7. Librarian and other Officers.

III. *Papers relating hereto.*

I. *Statement by the Commissioners respecting the Library;*

Number of volumes at present in the public library of the University, *Rep. p.* 127——Period of its foundation; accessions of books by gift and purchase, *ib.*——Bequests made to the funds for the support of the library, *p.* 127, 128——Other sources of income, *p.* 128——Salaries and other disbursements, *ib.*——Privilege enjoyed under the Copyright Act; estimated value thereof, *p.* 128, 129——Recommendation that the privilege be commuted for a money payment, *p.* 129——Opinion of Mr. Power, the librarian, on this subject, *ib.*

Classes of books allowed, and not allowed, to be taken out of the library, *Rep. p.* 130——Conditions on which books are permitted to be removed, *ib.*——Average daily number of books taken, *ib.*——Answer to objections to the books being taken out of the library, *ib.*——Body in which the administration of the library is vested, *p.* 130, 131——Objections to the constitution of this syndicate, *p.* 131——As also to the mode of appointment and permanent tenure of office of the assistant libraries, *ib.*——Tax of 1 *s.* 6 *d.* per quarter imposed in 1825 upon members of the University for the purchase of books, *ib.*——Enlargement of the library, and of the library buildings consequent thereupon, *ib.*——Material reduction in the means available for the purposes of the library owing to a loan having been raised, and also to the income tax, *p.* 132——Further additions requisite; reading room recommended, *ib.*——Conditions of admission; ameliorations suggested, *ib.*

II. *Evidence in Detail:*

1. Origin of the Library; Number of Books; Binding:

Origin of the library; benefactors thereto, *Power, Ev. p.* 50. 56 and *note*——Buildings belonging to the library; cost of erection thereof, and how defrayed, *p.* 50.

Number of volumes annually added to the library, *Power, Ev. p.* 55——Total number of printed books and MSS. in the library, *p.* 56——The MSS. and rare and valuable books are now kept in fire-proof apartments, *ib.*——Comparison of the University library with that of Trinity College, Dublin, *p.* 58——Suggestion for the augmentation of the Oriental literature in the library, *Robinson, Ev. p.* 92.

Annual expense of bookbinding, *Power, Ev. p.* 54——System pursued in regard to the control of the bookbinding, *p.* 55.

2. Management of the Library:

Provision made in the University statutes for the management of the library, *Power, Ev. p.* 51——Constitution of the library syndicate; meetings thereof held; attendance thereat; sub-syndicates sometimes appointed, *ib.*——Improved constitution of the syndicate for the government of the library suggested, *Babington, Ev. p.* 452.

3. Access to the Library permitted; Books lent out; a Reading Room desirable:

Privilege of using the library, *Power, Ev. p.* 52——Conditions on which the undergraduates are permitted access to the library, *p.* 53.

Average number of books out of the library at one time, *Power, Ev. p.* 52——Very few books lost; injury is sustained from various causes, but not amounting to more than 40 *l.* or 50 *l.* annually, *p.* 52, 53——Inconvenience resulting from books being taken out of the library; classes of books not allowed to be taken, *p.* 53——Books lent to undergraduates, *ib.*

No reading-room at present, *Power, Ev. p.* 53——Great importance of providing a reading-room; its advantages to the undergraduates, *p.* 58——Would lead to an abridgment of the practice of taking books out of the library, *ib.*——Great want of store-rooms, and a business-room for the librarian and his assistants, *p.* 59.

Report, 1852—*continued.*

University Library—continued.

II. *Evidence in Detail*—continued.

4. Copyright Act:

Number of works procured under the Copyright Acts during the years 1844 to 1850, *Power, Ev. p.* 55——Money value of the books procured under the Copyright Acts; cost of agency, *p.* 55, 56.

5. Purchase of Books; Funds available:

Contribution levied on each college for the purchase of books for the University library, *Ainslie, Ev. p.* 34——Permanent funds for the supply of books, *Power, Ev. p.* 50——Funds derived from private bequests for the purchase of books, *p.* 53——Tax levied upon members of the University towards the purchase of books, and support of the library, *ib.*——Sums charged upon the library fund; gradual liquidation thereof, *p.* 54.

Statement of income and expenditure on account of the library subscription account, *Power, Ev. p.* 55——Arrangements by which new books are purchased, *p.* 57——Recommendation of books for purchase; such recommendations not often made by members of the University, *p.* 57, 58——Difficulties experienced in dealing with booksellers and bookbinders on account of the different funds to which charges have to be made, and in avoiding the purchase of duplicates, *p.* 58——Expediency of increasing the library funds; means of doing so considered; recommendations of a syndicate appointed a year or two ago, *p.* 58, 59.

Munificent contributions of Rev. T. Halford and others towards a building fund, *Power, Ev. p.* 59——Importance of this institution being well supported; the University should have the power of enforcing contributions from its members, *J. J. Smith, Ev. p.* 191——The students at present have not access to the library; they ought to have it, *ib.*

Annual subscription required of each person whose name is on the boards for the support of the University library; amount derived, *Babington, Ev. p.* 452——Income tax paid on this revenue; belief that it is charged in error, *ib.*——Opinion that the amount of subscription should be increased, *ib.*

6. Catalogues:

The books are not arranged in classes; impossibility of carrying out a classification; this question considered, *Power, Ev. p.* 57——No catalogue *raisonné*; doubtful necessity for it in the present day, *ib.*——General catalogue in use; principle on which constructed; is not printed; *ib.*——Catalogue of the MSS. about to be printed by the syndicate of the Pitt Press, *ib.*——Want of sufficient provision for the prompt cataloguing of new books, *ib.*

7. Librarian and other Officers:

Mode of appointment; duties, salary, and fees of the librarian, *Rep. p.* 11; *Power, Ev. p.* 50——Number of library assistants; their salaries and emoluments; hours of attendance and duties, *Power, Ev. p.* 51, 52——How removable in case of inefficiency or neglect; authority of the librarian over them, *p.* 52——Fees payable to the librarian, *ib. p.* 55.

III. *Papers relating hereto:*

Answer received by the Commissioners to their circular of the 30th October 1850, from the Rev. J. Power, librarian of the University, *Corr. p.* 9——Queries circulated by the Commissioners relative to the University library, *Ev. p.* 48, 49——Answers thereto by Rev. J. Power, librarian, *p.* 50 *et seq.*

University Press. See *Printing Press.*

University Scholarships. Particulars as to the University scholarships, *Rep. p.* 24. *Wratislaw, Ev. p.* 299——Large number of candidates usually contending for these scholarships; interruption to regular reading of which they are the cause, *Whewell, Ev. p.* 207——Suggestions respecting the restrictions as to the standing of candidates in the case of certain University scholarships, and the Chancellor's medals, *Currey, Ev. p.* 281——Particulars as to the foundation of the different University scholarships, the institution of the Chancellor's medals, and the establishment of the classical tripos; changes made from time to time in the latter, *France, Ev. p.* 282, 283——The range of reading for the University scholarships might be considerably enlarged; the examiners in these instances should remain unfettered in their discretion, *Jeremie, Ev. p.* 286——The University scholarships, with the exception of the Browne & Bell scholarships, are free from all restrictions, *Warter, Ev. p.* 292——Suggestions that the Pitt, Craven, Battie, Davies, and Porson scholarships be uniformly regulated——*Wratislaw, Ev. p.* 300.

Report, 1852—*continued.*

Uppingham Grammar School. Exhibitions at Sidney, Sussex College and Emmanuel College on Johnson's foundations, open to students from, *Phelps, Ev. p.* 430; *Master and Fellows of Emmanuel College, Ev. p.* 427.

V.

VACATIONS:

1. *The Abridgment of the Vacations recommended.*
2. *Objections to such Curtailment.*

1. *The Abridgment of the Vacations recommended:*

The long period occupied by the vacations, a formidable source of expense and inconvenience to parents and guardians of students, *Sir J. Stephen, Ev. p.* 111——Period over which the vacations extend; all reforms must be futile, unless they are very greatly abridged, *ib.*——The retrenchment of the vacations to three, or at the most four months, recommended, *p.* 112——The long vacation should be shortened by a month, *Merivale, Ev. p.* 175.

2. *Objections to such Curtailment:*

It is not expedient to shorten any of the vacations, *Arlett, Ev. p.* 146; *Wratislaw, Ev. p.* 216——Not much good to be gained by shortening the vacations; the long vacation especially, ought not to be curtailed, *Blakesley, Ev. p.* 150——No advantage in shortening the vacations; the comparative seclusion afforded to the industrious student, unbroken by lectures, is of good service, *Cooper, Ev. p.* 154——No sufficient reason can be given for shortening any of the vacations, *Philpott, Ev. p.* 184——To diminish the length of the vacations would be equivalent to increasing the expenses of a University education to an inconvenient extent, *Thompson, Ev. p.* 200——Useful manner in which the vacations are generally passed, *Hopkins, Ev. p.* 245.

See also *Long Vacation. Reading Parties. Terms,* 2.

VICE-CHANCELLOR OF THE UNIVERSITY:

1. *Mode of Election; Powers, &c., of this Officer.*
2. *His Emoluments.*
3. *Administration of the University Funds by him; Changes suggested.*

1. *Mode of Election; Powers, &c., of this Officer:*

Mode of election of this officer, *Rep. p.* 4——Nature of his functions, *ib.*——Jurisdiction; courts held by him, *p.* 4, 5——Power of the Vice-Chancellor in regard to assigning public rooms which are unappropriated to the professors for their lectures, *p.* 115——His authority rarely appealed to, *ib.*——Programme annually issued by the Vice-Chancellor of lectures to be given by the professors in the ensuing academical year, *ib.*

Power conferred on the Vice-Chancellor by the Act 6 Geo. 4, c. 97, to appoint constables, *Ainslie, Ev. p.* 31——Power of the Vice-Chancellor over persons *in statu pupillari* very much interrupted by recent Acts of Parliament, *ib.*——Inconvenience of the custom of the Vice-Chancellor being always the convener and chairman of all syndicates; change suggested, *Babington, Ev. p.* 452.

Functions proposed to be assigned to the Vice-Chancellor in the contemplated general council of studies, *Rep. p.* 104.

Letter from Dr. Corrie, dated 7 November 1850, in reply to circular of the Commissioners of 30th October, *Corr. p.* 2——Further letter from, dated 2 December 1850, declining to answer questions propounded by the Commission, *ib.*

2. *His Emoluments:*

Amount of the annual allowance made to the Vice-Chancellor, *Rep. p.* 141——Amount derived by the Vice-Chancellor from fees on honorary degrees, *Romilly, Ev. p.* 64.

3. *Administration of the University Funds by him; Changes suggested:*

Particulars of the income and expenditure passing through the hands of the Vice-Chancellor, *Rep. p.* 138——Annual publication by the Vice-Chancellor of his accounts, *p.* 141——Provisions of the statutes of Queen Elizabeth in regard to the custody by the Vice-Chancellor and others of the University money, *ib.*——In practice the Vice-Chancellor is the sole guardian, *ib.*——Recommendation that the Vice-Chancellor be assisted by an officer in the character of clerk of accounts, *p.* 142——Suggestions as to the appointment of auditors of the accounts, *ib.*——Objections to imposing on the Vice-Chancellor the administration of the University funds; suggestion for the appointment of a University bursar, *Babington, Ev. p.* 452.

Report, 1852—*continued.*

Victuallers. See Ale Licenses.

Vigani, John Francis. The first professor of chemistry, *Rep. p.* 58.

Vintners, or *Victuallers.* Regulations laid down by the University authorities contolling dealings of this class of tradesmen with students, *Rep. p.* 16, 17.

See also *Ale Licenses.*

Visitors of Colleges:

Observations on the office and authority of the visitors of colleges, *Rep. p.* 199——When the students are silent as to the visitor, the law has conferred this right on the heir of the founder, or in defalt, on the Crown, *ib.*——General visitations at stated times long since disused; periodical visitations recommended, *ib.*

Answers received by the Commissioners to their circular of the 30th October 1850, from the following visitors of colleges, viz.:—Lord Braybrooke, visitor of Magdalene College, *Corr. p.* 2——The Bishop of Lincoln, visitor of King's College, *ib.*——The Bishop of Ely, visitor of St. Peter's, Jesus, and St. John's colleges, *p.* 3.

Vivâ Voce Examinations. Desirableness of reviving oral or vivâ voce examinations as a remedy for the system of cramming, *Rep. p.* 110——The revival of oral examinations as a part of the examination for honours recommended, *Whewell, Ev. p.* 206.

See also *Examinations* I. 4.

Voluntary Theological Examination. Subjects of this examination; by whom conducted; to whom open, and how carried on; number of candidates, *Rep. p.* 26. 47; *Jeremie, Ev. p.* 76; *Blunt, Ev. p.* 88——Effects of the voluntary theological examination; improvements suggested, *Rep.* 89-91——Date of institution of this examination; number of candidates at first, and in 1850, *Blunt, Ev. p.* 88——Highly satisfactory result; circumstances which have ministered to this success, *ib.*——Ameliorations of the mechanism of the examination suggested, *p.* 88, 89——The present voluntary theological examination should be converted into a theological tripos of honours, *Gunson, Ev. p.* 164.

Wakefield Parish (*York.*) Scholarship at St. John's College on Thurleston's foundation, open to natives of, *Rep. p.* 193.

Wakefield School (*York*). Scholarships at Clare Hall on Cave's foundation, appropriated to students from, *Rep. p.* 185——Exhibitions at Sidney Sussex College on Freeston's foundation, open to scholars from, *Phelps, Ev. p.* 430.

Wales. Scholarships at St. John's College on Lord Keeper Williams's foundation, limited to natives of, *Rep. p.* 191——Fellowship at Magdalene College, on Hughes's foundation, open to natives of, *Warter, Ev. p.* 406.

Walker, J. T. See *Gonville and Caius College.*

Walker's Reader in Botany. This readership, founded by Richard Walker, Vice-Master of Trinity College; Museum, with small library and Herbarium attached to the readership; annual grant made by the senate for its support, *Henslow, Ev. p.* 113.

Walmisley, T. A., Mus. D., Professor of Music. (Analysis of his Answers to Queries.)

[*Queries as to the Professors:*]

Particulars of foundation of the professorship of music, *Ev. p.* 136——Appointment of professor, *ib.*——No original or subsequent endowment, *ib.*——Fees, *ib.*——Duties, *ib.* No lectures ever given, *p.* 137——By whom the degrees are sought, *ib.*——State of the study; increasing taste for music, *ib.*

Walton, Jane. Scholarship at St. John's College founded by, *Rep. p.* 193, 194.

Wangford Hundred of (*Suffolk.*) Scholarship, at Magdalene College, on Roberts's foundation open to natives of, *Warter, Ev. p.* 407.

Ward, Dr. Seth, Bishop of Sarum. Sholarships at Christ's College founded by; annual value, *Cartmell, Ev. p.* 380; *Master and Fellows of Christ's College, Ev. p.* 393, 394.

Ware, Vicarage of. Augmentation thereof from "The Pigott Fund" by Trinity College, *Master and Fellows of Trinity College, Ev. p,* 424.

Warren, Mr. Scholarship at St. Peter's College founded by in 1613, *Cookson, Ev. p.* 308.

Warren,

Report, 1852—*continued.*

Warren, W. S. Exhibition at Pembroke College founded by; amount of the allowance, *Ainslie, Ev. p.* 319.

Warter, Rev. E., M.A., President and Tutor of Magdalene College. (Analysis of his Answers to Queries.)

[1. *Queries as to Expenses and Tuition:*]

It is neither practicably or desirable to reduce very materially the expenses of a residence in college, *Ev. p.* 201——Proposition for a new degree of licentiate in divinity; requiring a short residence, *ib.*——The question of degree fees may be reconsidered with advantage, *ib.*——Working of the check on credit vested in the college tutor, *ib.*——Attendance on lectures is mostly compulsory, *ib.*——Inadequacy of the college staffs of lecturers, &c. to the requirements of the examinations, *ib.*——Charges for private tuition; both candidates for honours and the ordinary degree resort to private tutors, *p.* 201, 202.

Reasons in favour of a general admission examination by the University, *Ev. p.* 202——It is not advisable to re-enact any prohibition respecting private tuition, *ib.*——The establishment of a hall or college for poor students is preferable to a reduction of the present scale of expenditure, *ib.*——Imperfection of the system of terms and examinations; remedy proposed, *p.* 202, 203——The quick succession and great youthfulness of college tutors and officers have been very detrimental; witness can suggest no remedy, however, *p.* 202——Scheme for reformation of the present system of instruction, *ib.*——Residence at college is conditionally permitted in the vacation; more progress is made in this way than by giving reading parties, *p.* 203——A few of the students reside in lodgings; no great evil results, *ib.*

[2. *Queries as to Classical Studies and Examinations:*]

The three great honorary classical examinations are the University scholarship, the tripos, and the medal examinations, *Ev. p.* 290——General nature of these examinations, and respects in which they differ, *ib.*——Changes made at different periods in that of the tripos; result thereof, *p.* 290, 291——Objections to the present system of *ex-officio* examiners, *p.* 291——The establishment of a Board of classical studies would be most desirable, *ib.*

A selection of classical works to be used would be attended with some difficulty; extent to which such a selection might beneficially be made, *Ev. p.* 291——The University scholarships, with the exception of the Browne and Bell scholarships, are free from all restrictions, *p.* 292——Objections to the requirement in the case of the Chancellor's medals, that the candidates shall have taken a senior optime's degree, *ib.*

[3. *Queries as to the Colleges:*]

Date of charter of foundation of this college; date of statutes; interpolations made in the statutes at a subsequent period to their compilation; questionableness of the legality of such interpolations; a revision of the statutes after the example of several of the other colleges is to be recommended, *Ev. p.* 403, 404——Mode of appointment of the head, fellows, and scholars; qualifications requisite; restrictions upon the election thereto; condition of tenure; length of residence required, and duties now performed, the latter not being in conformity with the statutes, from the alteration of circumstances, *p.* 404.

Account of the manner in which the college lost the Covent Garden property, *Ev. p.* 404.——Dividends of the college net income paid annually to the master and fellows, and in addition thereto, from a property left by Dr. Peckard; other emoluments accruing to the master, *p.* 404, 405——List of, and particulars relative to, the bye-fellowships, *p.* 405, 406——Like list and particulars as to the scholarships and exhibitions, either incorporated or connected with the college, *p.* 406-408——There is no statutable or other limit as to the number of members or students admitted at this college, *p.* 408.

Hours of Divine service in the college chapel, and attendance required thereat from undergraduates, *Ev. p.* 408——Course of instruction given to students of this college, *ib.*——Attendance required of students at the college lectures, and at dinner in the hall, *ib.*——Hour at which students are required to be in college, or at their licensed lodgings at night, *ib.*——Regulations for the restriction of credit given to students; these regulations, however, are evaded by a resort to London tradesmen; the only effectual remedy would be by an Act of Parliament, *p.* 409.

Detailed statement of the necessary expenses of the several classes of students, *Ev. p.* 409-411——The sizars receive a small payment each term; there are four of them at this college, and their appointment is claimed by the master, *p.* 411, 412——Average expenses of the several classes of students, *p.* 412——Provision at this college for the maintenance of four students, *ib.*——Remarks relative to a reduction of the expenses of college residence, *ib.*——Advantage would arise from the removal of certain restrictions

Warters, Rev. E., M.A., *President and Tutor of Magdalene College.* (Analysis, &c.)—*contd.*

[3. *Queries as to the Colleges*]—continued.

which now apply to some of the fellowships, &c., particularly in the case of the Milner scholarships and the Norfolk travelling fellowshid, *Ev. p.* 412——Claimants have for years been wanting for many of the appropriated scholarships, but the college has been enabled, from the extension clauses, to treat them as open scholarships, *ib.*——Reasons for which a consolidation of the smaller fellowships is not to be recommended, *p.* 413.

Warwick, Frances, Countess of. Fellowship and scholarships at Magdalene College founded by; present annual value, *Warter, Ev.* 405. 407.

Watson, Richard. Formerly professor of chemistry; obtained a stipend from the Crown in 1766 for his professorship, which led to the same being granted to other professors, *Clark, Ev. p.* 108.

Watts, Dr. Thomas. Scholarships at Pembroke College founded by; present emoluments, *Rep. p.* 186; *Ainslie, Ev. p.* 318; *Master and Fellows of Pembroke College, Ev. p.* 322.

Webster, Rev. James. Foundations at St. John's College of, *Tatham, Ev. p.* 400.

Weights and Measures. Inspection thereof by the taxors, *Rep. p.* 11——Statement in memorial of the council of the borough of Cambridge relative to the supervision of weights and measures by the University; authorities, *Ev. p.* 37——Comments thereon by a syndicate appointed by the senate to consider the memorial, *p.* 43.

See also *Taxors.*

Wendy, Dr. Fellowship at Gonville and Caius College founded by, in 1559; restricted to one born in the Norwich diocese and in holy orders, *Chapman, Ev. p.* 326——This fellowship being limited to natives of Norfolk, is now vacant, no person being eligible, *Ev. p.* 449.

Westminster Abbey. The original endowment of the Margaret professorship of divinity was charged on, *Blunt, Ev. p.* 87.

Westminster, Liberties of. Scholarships at St. John's College, on Lord Keeper Williams's foundation, open to persons born within the, *Rep. p.* 191.

Westminster School. Scholarships at St. John's College, on Lord Keeper Williams' foundation, appropriated to students from, *Rep. p.* 191. 194——Other scholarships at the same college, on Sir Robert Wood's foundation, similarly limited, *p.* 193, 194.

Scholarships at Trinity College open to students from, *Rep. p.* 194; *Whewell, Ev. p.* 417.

Westmorland. Foundation fellowships and scholarships at Christ's College, open to natives of, *Rep. p.* 159; *Cartmell, Ev. p.* 372. 375——Fellowship at St. John's College on Simpson's foundation, *Rep. p.* 162——Scholarships at Pembroke College on Archbishop Grindal's foundation, *Rep. p.* 157; *Ainslie, Ev. p.* 318——Bible clerkship at St. Catharine's Hall, *Philpott, Ev. p.* 363.

Whewell, Rev. W., D.D., Professor of Moral Philosophy. (Analysis of his Answers to Queries.)

[1. *Queries as to Professorships:*]

Date of foundation of the professorship of moral philosophy, *Ev. p.* 99——Duties annexed by the statutes; qualifications required, *p.* 100——Duties performed at the present time, *ib.*——Prizes offered by the present professor, *ib.*——Amount of the original endowment; subsequent augmentations, *ib.*——Present annual income, *ib.*——Mode of appointment, *ib.*——Observations as to any alteration of the duties of the professorship, *p.* 101——Present state of the study, *ib.*——Suggestions for its advancement, *ib.*——Lecture-rooms of the University, *ib.*——Residences of professors, *p.* 102.

[2. *Queries as to Expenses and Tuition:*]

Powers vested in the University for the preservation of discipline; circumstances which have interfered with the due enforcement of these powers, *Ev. p.* 203, 204——The expenses of students are mostly regulated by the habits formed by them prior to their coming to college, *p.* 204, 205, 206——Countenance given by parents and guardians to habits of extravagance, *ib.*——Measures taken by the University for the repression of extravagance, *ib.*——Oppressive light in which these measures are viewed by Cambridge tradesmen; are evaded by the students, by a resort to those of London, *p.* 204.

Excessive prevalence of private tuition; its use is to be recommended on the entrance of most students at the University, but not in the latter portion of their residence, *Ev. p.* 204——Legislation of the University herein, *p.* 204-206——Smallness of the expenses of

Report, 1852—*continued.*

Whewell, Rev. W., Professor of Moral Philosophy. (Analysis, &c.)—*continued.*

[2. *Queries as to Expenses and Tuition*)—continued:

of students arising from their payments to the colleges, and limited amount of the emoluments of college tutors, *Ev. p.* 205——Payments made by students for food, *ib.*——considerable expense incurred for amusements; suggestion for its diminution, *ib.*——College and University affairs cannot be regulated by any external authority, without introducing confusion and mischief, *p.* 205, 206.

Course of studies and lectures at this college, *Ev. p.* 206. 208, 209——These lectures would be sufficient, if students resorted to them with the disposition to make them so, *p.* 206——The chief course of the predominance of private tuition is the prevalence of paper examinations; suggestions for discouraging private tuition, *ib.*——Number and value of the sizarships at this college; poor students without ability had better not aspire to an university education, *ib.*——Objections to any exclusive establishment for them, *ib.*——The examinations are not too numerous or difficult; that of the college is a preparation for that of the University, *p.* 207——Interruption to the University course of study, caused by attempts for scholarships and other prizes, *ib.*

Beneficial effect of the initial examination had at this college; objections to such an examination by the University, *Ev. p.* 207——The improved openings in the law and in the church have not affected the supply of professors, &c. at this college, *ib.*——Difficulties to be anticipated from a perpetuation of the present non-residence of fellows, *ib.*——Modification of the tenure of fellowships likely to create a body of professors adapted to this period, *ib.*——Steps contemplated by the University in regard to the reduction of terms, *ib.*——Circumstances under which students are allowed to remain in college during the vacation, *p.* 208——The practice should not be encouraged, *ib.*——Students in lodgings are perhaps under greater control than those in college; number in college and in lodgings, *ib.*

[3. *Queries as to Mathematical Studies and Examinations:*]

Objections to interference by an external authority in the affairs or studies of the University, *Ev. p.* 271, 272——Mathematical subjects in which candidates for the B.A. degree are examined; those for honours are examined in a more extensive range; the examinations are conducted on paper; reasons which exclude a *vivâ voce* examination, *p.* 272——Appointment of examiners; benefits that would ensue if they were constituted a more permanent Board, 272, 274.

The certificates of residence demanded of candidates for the B.A. degree are valuable as tests of attendance at the college lectures; importance of these lectures, *Ev. p.* 272——A defect in the examination is its exclusive paper character; difficulties of a *vivâ voce* examination being conducted by the University, *ib.*——Extent to which the former disputations in the schools partially remedied this; reason of their being abolished, *ib.*——Pernicious interference of the paper examinations with the utility of the college lectures in the later part of an undergraduateship, *p.* 273——Course adopted by the Board of Mathematical Studies with reference to the examination, *ib.*

Remarks as to the limitation of the subjects included in the present range of examinations, *Ev. p.* 273——Mischievous tendency to analysis formerly obtaining; recent changes have checked this, *ib.*——The proportion of problems to book questions in the examinations has been too small, *ib.*——Most students resort to private tuition; the instances of self instruction, assisted by occasional explanations from the college tutors, show higher mental culture, *ib.*——Private tuition will always be resorted to as long as it is generally allowed, *ib.*——Amount of mathematical ability of private tutors, *ib.*——Remarks as to the employment of private tutors as college lecturers, *ib.*

Difficulty of anticipating the effect of deferring the Smith's prizes for a period of one or two years after the examination for honours, *Ev. p.* 273——Probability that in the event of such an alteration, the highest wranglers might not be competitors for the prizes in question, *ib.*——Considerations involved in the establishment of prizes for dissertations upon special mathematical problems, *p.* 273, 274——Objection to the change which threw open the honours of the classical tripos to persons who had not obtained a mathematical honour, *p.* 274——Advantage of establishing boards similar to that of mathematical studies, to control the examinations in other subjects, *ib.*

[4. *Queries as to Classical Studies and Examinations:*]

No modification of studies by any extraneous power is likely to be beneficial, *Ev. p.* 292——The establishment of a Board to superintend classical studies would be attended with great advantages, *ib.*——Reasons in favour of specifying the books which are to form the subject of classical examination and reading, *ib.*——Advantage of the mathematical qualification required of candidates for the Chancellor's medals and the classical tripos, *ib.*

Whewell, Rev. W., Professor of Moral Philosophy. (Analysis, &c.)—*continued.*

[5. *Queries as to the Colleges:*]

The appointment and election of the head, fellows, and scholars of this college is strictly in conformity with the statutes, *Ev. p.* 414——The additional fellowships and scholarships have been assimilated to those of the foundation, *ib.*——The number of pensioners admitted every year is 135, *ib.*——Services celebrated in the chapel, and attendance required thereat, *ib.*

Course of instruction at this college, *Ev. p.* 414——Attendance required at the college lectures; general character of the lectures; classification made of students attending thereat, *p.* 414, 415——Prizes given for proficiency in the subjects of the college examinations, *p.* 415——Number of fellows engaged as lecturers and examiners; manner in which the examinations are conducted; particular examinations preparatory to those of the University; regulations as to attendance at the college lectures, *ib.*——Hour in the evening at which students must be in the college, or in their lodgings, *ib.*——Attendance required at dinner in the college hall, *ib.*

Within the college the cook's bill is the principal opening for expense; restriction imposed on its amount; regulations as to debts incurred with tradesmen; manner in which they may be evaded, *Ev. p.* 415, 416——Considerations as to restraining habits of extravagance; co-operation necessary from parents; reform requisite in such habits at the public schools, *p.* 416.

A limitation of private tuition would effect a considerable reduction of expense; it would be better to repress it altogether, *Ev. p.* 416——To alter the college lectures so as to supersede private tuition would only lower their character without effecting such result, *p.* 416, 417——Impossibility of raising the standard of private tuition by altering the examinations, *p.* 417——Lectures rather than examinations promote mental discipline; objections to making the former subsidiary to the character of the latter, *ib.*——Provision at this college for poor students, *ib.*

The college can, unaided, obtain the removal of limitations affecting fellowships, scholarships, &c.; no scholarships have been ineffective from want of claimants; consolidation of exhibitions already effected, *Ev. p.* 417, 418——Table showing the expenses of the several classes of students at this college; evasions of the regulations for checking extravagance; the decisions of courts of law have embarrassed the efforts to restrain extravagance; unnecessary expense incurred by dining out of the college hall, *p.* 418, 419.

[6. *Queries as to the College Libraries:*]

The library is in the care of a librarian, under whom is a library keeper, who discharges the usual duties of librarian, *Ev. p.* 425——Description of catalogue, *ib.*——Classification and arrangement of books, *ib.*——The library-room is well ventilated, nearly fire-proof, and sufficient for present wants, *ib.*——Use permitted of the books in the library, and also access allowed thereto, *ib.*——Number and description of the books, *ib.*

Whewell, Dr. Passages from Dr. Whewell's work on liberal education quoted, *Rep. p.* 109. 111. 113.

Letter from Dr. Whewell, dated 8 November 1850, in answer to circular of the Commissioners of 30 October, *Corr. p.* 6——Further letter from, dated 23 November 1850, protesting against the use, in the wording of the Commission, of the expressions, "authorize and empower" the Commissioners to take evidence, *p.* 6, 7——Letter from Dr. Whewell, dated 23 November, protesting against the Commissioners having any legal right to take compulsory evidence, as expressed in their Commission by the words "authorise and empower," *p.* 10, 11.

Collection of minerals and books presented by Dr. Whewell to the Mineralogical Museum, *Rep. p.* 123; *Miller, Ev. p.* 133.

Whewell Prize. Particulars as to this prize, *Rep. p.* 25; *Ainslie, Ev. p.* 27.

White, T. P. Prize at Queen's College instituted by, in 1842; annual value, *Dalton, Ev. p.* 356——Bequest to Queen's College library, *p.* 358.

Whitgift, Archbishop. Scholarship at St. Peter's College founded by, *Cookson, Ev. p.* 308.

Whytehead, Thomas. Books given by, to the library of St. John's College, *Tatham, Ev. p.* 403.

Widdrington, Rev. Dr. Exhibitions at Christ's College founded by; annual value, *Cartmell, Ev. p.* 378; *Master and Fellows of Christ's College. Ev. p.* 392.

Williams, Lord-keeper. Livings given by, to St. John's College, *Rep. p.* 155; *Tatham, Ev. p.* 397——Scholarships at St. John's College founded by, *Rep. p.* 191. 194——Fellowships also founded by, but suppressed, the estate given being inadequate, *p.* 192.

Report, 1852—*continued.*

Williams, Rev. Rowland, B.D., Fellow and Tutor of King's College. (Analysis of his Answers to Queries.)

[*Queries as to Classical Studies and Examinations:*]

The principal honorary examinations in classics are those for the University scholarships, the classical tripos, and the Chancellor's medals, *Ev. p.* 293—— The examination in the first of these turns upon elegance and correctness of composition, and the translation of selected passages, *ib.*——That for the next is severer in its character, admits of no original composition, but attaches great value to metrical and prose translations in Greek and Latin, *ib.*——In the third case, the examination has a great resemblance to those for the scholarships, *ib.*——Defects which exist in the systems of these examinations, *ib.*

Opposition offered to the establishment of the classical tripos, and to its subsequent modification, *Ev. p.* 293——The candidates have not increased in the ratio desired, *ib.* ——A relaxation has been effected of the mathematical requirements, and a tendency has been evinced to lessen the value attached to Greek and Latin composition, *ib.*——One effect of the working of the classical tripos has been to raise the standard of accuracy in teaching Greek in the better grammar schools of the country, *ib.*——Suggestions for the modification of this examination, *p.* 293, 294.

Nature of the superintendence that might beneficially be vested in a board of classical studies, *Ev. p.* 294——Inexpedient to fetter the discretion of examiners by restrictions on the selection of books; course recommended, *ib.*——Suggestions with regard to the conditions of eligibility attached to the Chancellor's medals, *ib.*——Expediency of a general examination to be undergone alike by all candidates for a B.A. degree, and to be followed at certain intervals by competition for honours in the several triposes, *p.* 294, 295 ——Modification recommended in the recently established triposes examinations, *p.* 295 ——The formation of classes under certain restrictions, by graduates, would supply a means of superseding private tuition, *ib.*——The establishment of lectures in logic and rhetoric, and of facilities for the study of modern languages, would remedy serious defects in the present course of University education, *ib.*——Suggestion for raising funds to carry out these improvements, *p.* 296.

Willis, Professor. Success of the lectures given by, as Jacksonian professor of natural and experimental philosophy, *Rep. p.* 65——Lectures given by this professor, touching upon the mechanics of engineering, *p.* 97.

Willison, Richard. Scholarships at Caius College founded by, in 1596, *Rep. p.* 187.

Willows, Thomas. Scholarship at Caius College, founded by, in 1503, *Rep. p.* 187.

Wilshaw, Henry. Scholarship at St. Peter's College, founded by, *Cookson, Ev. p.* 308.

Wilson, Rev. Thomas. Scholarships at Christ's College, founded by; present proceeds of estate, *Cartmell, Ev. p.* 379; *Master and Fellows of Christ's College, Ev. p.* 393.

Wilson's History of Merchant Tailors' School. This work referred to, *Rep. p.* 164.

Wiltshire. Scholarships at St. John's College, on the Duchess of Somerset's foundation, open to natives of, *Rep. p.* 194.

Winchester School. Preference given to students from, as candidates for Smith's scholarships at Magdalene College, *Warter, Ev. p.* 407.

Wine Licences. Exclusive right of granting such licences exercised by the Vice-chancellor, *Rep. p.* 7——The privilege was confirmed by Act 17 Geo. 2, *ib.*——Statement in memorial of the town council relative to the authority exercised by the University authorities in regard to alehouse and wine licences, *Ev. p.* 37——Remarks of the syndicate appointed by the senate to consider the foregoing, *p.* 42.

See also *Ale Licences. Vintners and Victuallers.*

Wisbech School. Scholarships at Magdalene College, on Holmes's foundation, restricted to students from, *Warter, Ev. p.* 407.

Witham (Essex). Preference to be shown to natives of, as candidates for the Barnardiston scholarships at St. Catherine Hall, *Philpott, Ev. p.* 364, 365.

Wollaston, Archdeacon. Formerly Jacksonian professor of natural and experimental philosophy, &c., *Rep. p.* 65.

Women of Ill-fame. The University should let alone the *feminas de malo suspectas,* and give up the Spinning House, *Gunson, Ev. p.* 165——The power exercised by the proctors of apprehending or removing suspected women, and of entering houses of ill-fame, has of late been found more difficult to exercise, *Whewell, Ev. p.* 203.

Wood, James, Dean of Ely. Books given by, to the library of St. John's College, *Tatham, Ev. p.* 403.

Wood, Sir Robert. Scholarships at St. John's College founded by, in 1659, *Rep. p.* 193, 194.

Wood, Rev. W. S., late Fellow of St. John's College. (Analysis of his Answers to Queries.)

[*Queries as to Classical Studies and Examinations:*]

The University honorary classical examinations are those for the classical tripos, scholarships, and Chancellor's medals the two last are very similar in their character, *Ev. p.* 296——The constitution of the Boards of Examiners is capable of improvement, *p.* 297——Probability that advantages would result from the establishment of a Board of classical studies, *ib.*—— Reasons for which a distinction should be observed between the classical tripos and the scholarship examinations in making a selection of classical reading, *ib.*——No modification with respect to the conditions of admissibility to the examinations appears necessary, *ib.*

Woodlarke, Dr. The College of St. Catharine the Virgin founded by, *Philpott, Ev. p.* 359.

Woodton (Norfolk.) Living of, purchased by King's College, *Provost and Fellows of King's College, Ev. p.* 354.

Woodward, Dr. Founder of the Woodwardian Professorship of Geology, *Sedgwick, Ev. p.* 115.——*See* also *Woodwardian Professorship of Geology.*

Woodward, Mr. Scholarships at St. Peter's College founded by, in 1661; conditions of tenure, *Cookson, Ev. p.* 308.

Woodwardian Museum of Geology. Great extent and value of the Palæontological collection in this museum, *Rep. p.* 132——Commendation of its arrangement by Professor M'Coy, *ib.*——Number of Count Münster's duplicates, *p.* 122, 123——Recommendations in regard to the museum, *p.* 123.

Woodwardian Professorship of Geology. Date of foundation, *Rep. p.* 63——Amount of stipend, &c. formerly and at present, *p.* 63. 72——Requirements of the will of Dr. Woodward, *p.* 63——How far at present observed, *ib.*——Suggestions for a scheme for regulating the professorship, *ib.*——Reference to the replies of Professor Sedgwick to the queries addressed to him, *ib.*——This professor lectures in a room not designed for such a purpose, adjoining his museum, *ib. p.* 115.

Founded by Dr. Woodward in 1727; terms of the bequest, *Sedgwick, Ev. p.* 115——Purchase of additional cabinets effected in the following year, *ib.*——Duties originally annexed to the professorship, *ib.*——How far observed in practice at the present time, *p.* 115, 116——Endowment settled by Dr. Woodward; no subsequent additions, *ib.*——Emolument derived from fees, *p.* 116——Present annual value of the professorship, *p.* 116, 117——Mode of appointment to the office; conditions of eligibility, *p.* 117——No residence attached to the professorship, *ib.*

Museum and library belonging to the professorship; contents thereof; cost of keeping up the collection; insufficiency of the funds, *Sedgwick, Ev. p.* 117——Account of the manner in which the present collection was formed, and of its extent and arrangement, *p.* 117-119——Principal benefactors of specimens, *p.* 118——State of the catalogues, *p.* 119——Opportunities of examining the collection afforded to the students, *ib.*——Expediency of a legal sanction being given to the modifications made in the duties of the professor, *ib.*——Large attendance given on the lectures of the professor; satisfactory condition of the study, *ib.*——Suggestions for promoting the objects of the professorship, *p.* 119-121.

Wootton, Mr. Emoluments as assistant at the University library, *Power, Ev. p.* 51, 52.

Wootton Rivers, Manor of. Left by the Duchess of Somerset for the maintenance of certain scholars at St. John's College, *Tatham, Ev. p.* 400.

Worksworth Parish (Derby). Fellowships at St. John's College open to natives of, *Rep. p.* 160.

Worsley, Rev, T. Master of Downing College. (Analysis of his Answers to Queries.)

[1. *Queries as to Expenses and Tuition:*]

Measures lately taken at this college for the reduction of necessary expenses; they cannot be further materially diminished, *Ev. p.* 209——Sufficiency of the staff of lecturers at this college, *ib.*——Students for the B.A. degree at this college rarely have occasion to resort to private tuition, unless in the case of taking a degree in law; expense of private tuition, *ib.*——Futility of any grace restricting private tuition, *ib.*

No

Report, 1852—*continued.*

Worsley, Rev. T., Master of Downing College. (Analysis, &c.)—*continued.*

[1. *Queries as to Expenses and Tuition*]—continued.

No provision for poor students exists at this college, *Ev. p.* 209——Objections to the establishment at Oxford or Cambridge of a hall or college for poor students alone; such an institution might be advantageously placed anywhere else, *p.* 209, 210——The previous examination is not too difficult, but rather deficient in standard classical subjects; there is ample time between this and the B.A. examination for attendance on professional lectures, and for study consequent thereon, *p.* 210——The need for private tuition arises from the accuracy required by the University as compared with schools, *ib.*

Circumstances under which alone a matriculation examination might be imposed *Ev. p.* 210——Unfavourable operation of the present frequent recurrence of examinations, *ib.*——The remedy of the difficulties hence arising rests in the spirit of advancement which animates the University authorities, *ib.*——Matriculation examination had at this college; an admission examination by each college is preferable to an uniform one by the University, *ib.*——The increase in favourable opportunities of advancement in the law and in the church has withdrawn men of promise more generally and earlier than heretofore; degree in which this has operated unfavourably to professional exertion and ability, *p.* 210, 211——Doubtful if increased emoluments would meet this difficulty, *p.* 211——The more elevated educational character and consequent requirements of students attending professorial lectures must eventually determine the character and success of such lectures, *ib.*——From a knowledge of this has arisen the recent modifications by the University of the system of lectures, *ib.*——Reasons for expecting that the desired result will ensue, *ib.*

The present system of election and remuneration of professors is preferable to an uniform system, *Ev. p.* 211——It is not desirable to increase the patronage of Government in the University professorships, *ib.*——Remarks relative to the emoluments of professors and tutors, *ib.*——Statement as to the staff of tutors and lecturers at this college, and also relative to the fellowships, *p.* 211, 212——Any alteration of the terms must depend on the degree to which the new triposes and other changes become essential parts of the University system, *p.* 212——Residence at this college during the vacation is of rare occurrence, and is discouraged, *ib.*——Married fellow commoners of this college are about the only residents in the town, *ib.*——Library arrangements, *ib.*

[2. *Queries as to Classical Studies and Examinations:*]

A Board of classical studies, similarly constituted to that for mathematics, might satisfactorily regulate the course of classical reading, *Ev. p.* 298——The Oxford practice of taking up definite portions of classical authors would be beneficial if engrafted on the Cambridge method of examining generally in classics, *ib.*——It is not expedient to extend further than at present the permission to students to choose between classics and mathematics, as referring to the several examinations, *ib.*——Alteration required in the bearing of the moral sciences tripos on the study of the classical authors, *ib.*

[3. *Queries as to the Colleges:*]

Power vested in the visitors by the charter to revoke, repeal, or alter the statutes, &c.; reasons for which it appears doubtful whether the visitors have ever attained, or as yet possess this power, *Ev. p.* 435——References to the statutable directions as to the appointment, &c., of the head of the college; the present practice is in conformity with these directions; but the practice as to professors may be excepted from this remark, *p.* 436——Statement as to the residence of the college officers, *ib.*

Reference to the statutable regulations respecting the fellows; circumstances which have prevented a similar compliance with these regulations, as in the case of the head, *Ev. p.* 436, 437——Difference of opinion among the governing members as to a strict or modified adherence to the letter of the statutes, in the election of fellows, in the present intermediate condition of this college; judgment of the Lord Chancellor and other judges upon this subject, *p.* 437——No scholars have as yet been elected, the building not being complete, nor all the fellows nominated, *ib.*——There are no supplemental or bye-fellowships attached to this college, *ib.*

The college does not possess any scholarships, exhibitions, prizes, or other endowments or emoluments for undergraduates; its fellowships are open to candidates from any college of either University, *Ev. p.* 437, 438——These reasons have rendered the number of its undergraduates very small; plan pursued with reference to them, *p.* 438——Divine service is performed in a room set apart in the college for a chapel, there being none as yet built, *ib.*——Course of collegiate instruction, *ib.*——Number of fellows employed in giving college lectures; private examinations in the tutors' rooms are substituted at this college for more formal college examinations, *ib.*

Statement as to the attendance of students at the college lectures and at dinner in the hall; hour at which the college gates are closed, *Ev. p.* 438——Estimates of the necessary and actual expenses of students at this college, *ib.*——Amount of college fees, and manner in which they are appropriated, *ib.*——There are no endowments at this college for the assistance of poor scholars, *ib.*——Remarks as to a reduction of expenses, *ib.*

Report, 1852—*continued.*

Worsley, Rev. Thomas. Letter from, dated 11 November 1850, in answer to circular of the Commissioners of 30 October, *Corr. p.* 7——Letter from, dated 28 May 1851, in answer to communication of Commissioners of 14 May, *p.* 8.

Worthington, Mr. Scholarship at St. Peter's College founded by, *Cookson, Ev. p.* 308.

Wortley, Mr. Fellowships at Gonville and Caius College founded by, in 1742, *Chapman, Ev. p.* 326; *Memorial from Three Fellows of the College, Ev. p.* 448.

Worts, William. Particulars of his foundation for travelling bachelors, *Rep. p.* 100——Expediency of a more useful application of this foundation, *p.* 87——Suggestion for converting it into a professorship of the law of nations and diplomacy, *p.* 101——Estate at Landbeach left by Mr. Worts, for the support of the University library; annual income derived therefrom; particulars as to its administration, *p.* 127, 128; *Power, Ev. p.* 53——Copy of the will of William Worts, dated 21 June 1709, *App. p.* 468.

Wratislaw, Rev. A. H., m.a., Fellow and Tutor of Christ's College. (Analysis of his Answers to Queries.)

[1. *Queries as to Expenses and Tuition:*]

Impracticable materially to reduce the necessary expenses of a residence in this college; suggestions by which some reduction might be effected, *Ev. p.* 212——Number of lecturers, and subjects upon which they lecture, *ib.*——Compulsory and voluntary lectures, *ib.*——Classification of students, *ib.*——The moral and natural sciences do not enter into the system of this college, *ib.*——The staff of lecturers is sufficient to meet the requirements of the ordinary examination, but not of those for honours, this latter deficiency being supplied by private tutors, *ib.*

Expenses of private tuition, and proportion of students availing themselves of it, *Ev. p.* 212, 213——Private tuition has become the permanent and professional occupation of many talented men, *Ev. p.* 213——System on which this description of instruction is conducted, *ib.*——Candidates for classical honours rarely dispense with private tuition; those for mathematical honours never do so, *ib.*——An analogous system of private tuition obtains for candidates for the ordinary degree, *ib.*——In the absence of an efficient University staff of professors it is not advisable to impose any restriction on the practice, *ib.*

Number and value of sizarships at Christ's College; qualifications requisite for appointment to them, *Ev. p.* 213——The establishment of a hall or college for poor students only is to be recommended if confined to theological students, and made entirely subsidiary to the study of theology, *ib.*——Table of University and college examinations, *ib.*——Table of compulsory examination subjects, both University and college, for 1850-51, *p.* 214——General working of the examinations, *ib.*——Circumstances which render private tuition necessary, *ib.*

No entrance examination is had at this college; such an examination by the University would be most desirable, *Ev. p.* 214——Nature of any such examination, and result that might be anticipated, *p.* 214, 215——Reasons for preference being given to active and professional pursuits foreign to University employment, *p.* 215——Recommendations for the removal of the causes of this preference, *ib.*—— The staff of lecturers and tutors is sufficient for the requirements of the degree examinations, but not for those of the various honour examinations; suggestion for remedying this deficiency, *ib.*——Alteration that might be beneficially effected in the present system of terms, *p.* 215, 216——In what cases residence in vacation time is permitted; prevalence of reading parties at this period, *p.* 216——Particulars relative to lodgings, *ib.*

Changes suggested in the collegiate and academical systems, viz., the establishment of an University examination, of a nature now stated, for all candidates for fellowships in the smaller colleges, *Ev. p.* 216——The institution of University honour examinations for oriental and modern languages, *ib.*——The establishment of a more intimate connexion between the faculty, and the study of theology, *ib.*——If lectures become more prevalent, the erection of lecture-rooms, an income-tax to be imposed on the revenues of the colleges primarily for this purpose, and ultimately for the general purposes of the University, *ib.*——That if the number of students be increased, permission be given to members of the senate to take private pupils into their houses, and students, being townsmen of Cambridge, be permitted to live with their relatives, *ib.*——In the event of more University examinations being decided upon, that they be placed at the conclusion of the Easter term, *p.* 216, 217.

[2. *Queries as to Classical Studies and Examinations:*]

Classes into which the honorary classical examinations in the University are divisible; subjects of the different examinations, *Ev. p.* 299——Prizes given by the Chancellor of the University, and conditions annexed thereto, *ib.*——Particulars as to the prizes given by the members for the University; and also as to the several scholarship prizes, *ib.*——Statement explanatory of the classical tripos examination, *ib.*——It is desirable that certain

2. [*Queries as to Classical Studies and Examinations*]—continued.

certain of the *ex officio* examiners should be unconnected with the University classical examinations; circumstances under which a Board of classical studies is to be recommended, *p.* 299, 300.

A specification of books would be advantageous if confined to the classical tripos, *Ev. p.* 300——Suggestion that the conditions of eligibility for the Chancellor's medals be assimilated to those of the classical tripos, *ib.*——Also, that all students obtaining the B.A. degree, at the same time be without distinction admitted candidates for the classical tripos, *ib.*——And that the Pitt, Craven, Battie, Davies and Porson scholarships be uniformly regulated, *ib.*——Advantageous if a knowledge of certain fixed books were required instead of verse composition in the classical tripos examination, *ib.*——Encouragement that should be given to the study of modern languages, especially German, *ib.*

Wray, Lady Anne. Scholarships at Magdalene College founded by, in 1591, *Warter, Ev. p.* 405. 407.

Wray, Sir Christopher. Fellowships at Magdalene College founded by, 1587; annual value, *Warter, Ev. p.* 405——Scholarships at the same college also founded by, in 1587; value thereof, *p.* 406.

Written Questions. See *Examinations. Paper Examinations.*
